Felicidad (Bliss) Lim, Ph.D. New York University, *Professor of Film and Media Studies; Visual Studies* (Philippine cinema, temporality, postcolonial and feminist film theory, transnational horror and the fantastic, film archives)

Catherine Liu, Ph.D. Yale University, *Professor of Film and Media Studies; Visual Studies* (Hou Hsiao-hsien, culture wars, Frankfurt School, historiography of critical theory/cultural studies, surveillance, cold war culture and neoliberalism)

Lyle Massey, Ph.D. University of California, Los Angeles, *Associate Professor of Art History; Visual Studies* (Italian Renaissance and early modern European art, gender theory, science studies)

Tyrus Miller, Ph.D. Stanford University, *Dean of the School of Humanities and Professor of English; Art History; Comparative Literature; Visual Studies* (modernist and avant-garde studies in literature and visual arts; critical theory and aesthetics; modern architecture and urbanism; East-Central European studies; culture of socialism and post-socialism; Frankfurt School theory)

Glen M. Mimura, Ph.D. University of California, Santa Cruz, *Associate Professor of Film and Media Studies; Visual Studies* (minoritarian and political film; media and race; popular culture and social movements)

James P. Nisbet, Ph.D. Stanford University, *Associate Professor of Art History; Visual Studies* (modern and contemporary art)

Alka Patel, Ph.D. Harvard University, *Associate Professor of Art History; History; Religious Studies; Visual Studies* (South Asian and Islamic art and architecture, historiographies, Islamic diasporas in Cuba)

Allison J. Perlman, Ph.D. University of Texas at Austin, *Associate Professor of History; Film and Media Studies; Visual Studies* (history of broadcasting, American social movements, media law and policy, media activism, popular memory)

Fatimah Tobing Rony, Ph.D. Yale University, *Department Chair and Associate Professor of Film and Media Studies; Visual Studies* (ethnographic film, race and representation, film production)

Bonnie Ruberg, Ph.D. University of California, Berkeley, *Assistant Professor of Film and Media Studies; Visual Studies* (video games, digital media, digital cultures, queer studies, gender and sexuality)

Braxton Soderman, Ph.D. Brown University, *Assistant Professor of Film and Media Studies; Visual Studies* (digital and new media studies, video games, networks, digital art and electronic literature)

Aaron Trammell, Ph.D. Rutgers University, *Assistant Professor of Visual Studies* (analog games and video games, sound, fan studies, digital subjectivity)

Cécile Marie Whiting, Ph.D. Stanford University, *Chancellor's Professor of Art History; Visual Studies* (American art, 20th century visual culture)

Bert Winther-Tamaki, Ph.D. New York University, *Department Chair and Professor of Art History; Asian American Studies; Visual Studies* (modern Japanese art and visual culture, Asian American art, art and globalization)

Roberta Wue, Ph.D. New York University, *Associate Professor of Art History; Visual Studies* (modern Chinese art, photography, print culture)

## Affiliate Faculty

Geoffrey C. Bowker, Ph.D. University of Melbourne, *Chancellor's and Donald Bren Professor of Informatics; Visual Studies* (values in design, social studies of databases, science and technology studies)

Kyung Hyun Kim, Ph.D. University of Southern California, *Professor of Korean Culture; Asian American Studies; Film and Media Studies; Visual Studies* (East Asian cinema, modern Korea, critical theory)

Jared Charles Sexton, Ph.D. University of California, Berkeley, *Professor of African American Studies; Culture and Theory; Film and Media Studies; Visual Studies* (race and sexuality, policing and imprisonment, contemporary U.S. cinema and political culture, multiracial coalition, critical theory)

Michael F. Szalay, Ph.D. Johns Hopkins University, *Department Chair and Professor of English; Film and Media Studies; Visual Studies* (contemporary television and literature)

Roxanne Varzi, Ph.D. Columbia University, *Professor of Anthropology; Culture and Theory; Film and Media Studies; Religious Studies; Visual Studies* (Iran, media, war, visual anthropology, film studies, ethnographic and fiction writing)

## Courses

### **VIS STD 290A. Art History: Theories and Methods. 4 Units.**

Examines canonical texts and explores current directions in Art History.

### **VIS STD 290B. Film & Media Studies: Theories and Methods. 4 Units.**

Examines canonical texts and explores current directions in Film and Media Studies.

### **VIS STD 290C. Visual Studies: Theories and Methods. 4 Units.**

Examines canonical texts and explores current directions in Visual Studies.

### **VIS STD 294. Getty Consortium Seminar. 4 Units.**

Special graduate seminar offered at the Getty Research Institute in Los Angeles, involving faculty and graduate students from the five graduate programs in Art History or Visual Studies located in southern California (UCI, UCLA, UCR, UCSB, and USC).

Repeatability: Unlimited as topics vary.

### **VIS STD 295. Graduate Seminar in Visual Studies. 4 Units.**

Studies in selected areas of Visual Studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

### **VIS STD 296. Directed Reading. 4 Units.**

Directed reading on a specific topic agreed upon by student and instructor.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

### **VIS STD 297. Writing Practicum. 4 Units.**

Offered winter quarter each year and taught in a workshop format. Assists students with the preparation and revision of the dissertation prospectus so that they may advance to candidacy.

Prerequisite: VIS STD 290A and VIS STD 290B and VIS STD 290C

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**VIS STD 298A. Reading for the Preliminary Examination. 4-12 Units.**

Directed reading in preparation for the preliminary examination. Formerly Visual Studies 298.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**VIS STD 298B. Prospectus Research. 4-12 Units.**

Research and writing of the dissertation prospectus.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**VIS STD 299. Dissertation Research. 4-12 Units.**

Research and writing of the dissertation.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Visual Studies, Graduate Emphasis

In addition to the doctoral program in Visual Studies described above, the Program in Visual Studies also offers an emphasis in Visual Studies available to Ph.D. and M.F.A. students in all departments at UCI. Satisfactory completion of the emphasis is certified by the Director of Visual Studies and is noted in the student's dossier.

Students must first be admitted to, or currently enrolled in, a Ph.D. or M.F.A. program at UCI. Applicants must submit to the Director of Visual Studies a summary of prior undergraduate and graduate course work related to Visual Studies, institutions attended, and major(s), together with a brief statement of purpose, including career objectives, areas of interest and research, record of research, teaching, professional accomplishments, and/or creative work. Lack of prior course work does not preclude admission, so long as a compelling statement of research interests, congruent with the emphasis, makes the case. Admission to the emphasis is on a rolling basis. The Director tracks students' progress toward fulfillment of the emphasis requirements and meets with students to advise them on a program of study, as required.

### Emphasis Requirements

Minimum course work for the graduate emphasis in Visual Studies consists of four courses: VIS STD 290C and three additional elective Visual Studies seminars.

For doctoral students, the qualifying examination and dissertation topic should incorporate Visual Studies as a central concern. One area of the Ph.D. qualifying examination should be on a Visual Studies topic, and one member of the candidate's qualifying examination committee and dissertation committee is normally a member of the Visual Studies faculty. There are no requirements concerning qualifying examinations or theses for M.F.A. students.

## Visual Studies, Ph.D.

The graduate program in Visual Studies, administered jointly by the faculties of the Department of Art History and the Department of Film and Media Studies, offers students the opportunity to pursue a doctorate in the cultural analysis of visual artifacts and experiences. Visual Studies synthesizes methodological insights from both component disciplines in order to examine the social practices of visual representation and visibility itself. The program leads to a Ph.D. in Visual Studies. While the program (in certain instances) grants an M.A. to students en route to their Ph.D., it admits only those students intending to complete their doctorate at UCI.

The program is open to students applying with either a bachelor's or a master's degree, and applicants must meet the general requirements for admission to graduate study at UCI.

The program accepts applicants for admission for the fall quarter only. Additional information is available on the Visual Studies website (<http://www.humanities.uci.edu/visualstudies/>).

## Language Requirements

All students are required to demonstrate a reading knowledge of at least one foreign language and are strongly encouraged to develop competence in a second. Students consult with the Director and/or their principal advisor(s) to determine the appropriate language on which the student will be tested, based on their interests and program of study. Advisors, moreover, may require the demonstration of reading knowledge in additional languages according to the scholarly demands of the student's specific field. All language requirements must be satisfied before students are advanced to candidacy for the Ph.D.

## Course Requirements

Beyond the core series (VIS STD 290A-VIS STD 290B-VIS STD 290C), students are required to complete an additional 11 courses for a total of 14 courses. Out of this total, at least 10 courses (including the core series and VIS STD 297) must be within the program in Visual Studies, and at least two courses are to be from outside the Visual Studies discipline.

Students admitted with an M.A. in a related field may petition the Visual Studies Graduate Committee to have some of their course requirements waived; such petitions will be considered in close consultation with the primary advisor and on a case-by-case basis (though all students must take the core sequence). While students may accrue units for University Teaching (ART HIS 399 or FLM&MDA 399), Reading for the Preliminary Examination (VIS STD 298A), and Prospectus Research (VIS STD 298B) these do not count toward the required number of courses.

## Master's Paper and M.A.

During their second year, students admitted without an M.A. in a related field will enroll in VIS STD 296 for the purpose of expanding and developing a seminar paper into a Master's paper under the supervision of a faculty advisor. The Master's paper is an essay of near-publication quality, approximately 30 pages in length. In addition to the advisor, two additional readers from the Visual Studies faculty will assess the Master's paper and the student's overall academic performance. The committee will assess whether or not the student has satisfied all requirements for the M.A. Those students who have satisfied the M.A. requirements, but whose committees assess their work as not meeting the standards for Ph.D. study, will receive a terminal M.A.

## Preliminary Examination

By the end of the first year, a student must reach an agreement with one of the program's core faculty members to serve as principal advisor. The student will work with the principal advisor to plan completion of their program requirements and to select the faculty who will supervise examination fields. The examination committee will be constituted in accordance with UCI Senate and Visual Studies program policies.

The student and principal advisor define two fields, one major and one minor to be examined by the faculty. The fields should combine historical breadth and some variety in media. Over the course of two quarters, students prepare reading lists in close consultation with their principal advisor and field supervisor, and complete the reading of those lists. The examination normally takes place at the end of each of the two quarters of study.

The first part of the examination consists of a written component, in which the student is called upon to respond to questions posed in the two examination fields. The student's written responses are assessed by the director of each exam reading as pass or fail; however, the responses are circulated to all committee members. There is also an oral component to the preliminary exam process.

## Prospectus and Advancement to Candidacy

During their third year, students draft a prospectus that defines the scope, approach, and rationale for a proposed dissertation and begin research on the dissertation. At the end of the third year the student should defend the written exams and prospectus with the entire five-person committee. Based on the student's written exam results, prospectus, oral defense, and overall progress, the committee will determine whether the student has successfully advanced to candidacy. Except in extraordinary circumstances, no student will be given more than two chances to pass any given section of the examination.

Advancement to candidacy for the Ph.D. is contingent upon successful completion of both the preliminary exams, subsequent approval of the prospectus by the dissertation committee, and satisfaction of all language requirements. The normative time for advancement to candidacy is three years.

## Dissertation

The student and the principal advisor consult to determine the composition of a doctoral committee of three members including the principal advisor, which then must unanimously approve the prospectus before the student proceeds with the dissertation. The doctoral committee, on the basis of the candidate's past academic performance and proposed dissertation topic, may require additional course work or other forms of preparation for the dissertation. The doctoral committee, under the direction of the principal advisor, supervises the student's research program and ultimately approves the dissertation. The normative time for completion of the Ph.D. program is six years, and the maximum permitted is seven years.

After submitting a full dissertation to their committee members, students will be required to pass an oral dissertation defense with their three-person doctoral committee prior to filing their dissertation and graduating. The examination will be open to all members of the academic community. Faculty and graduate students of the school (or academic unit) and the Graduate Dean must be given appropriate written notice at least five days in advance of the date, time, and place of the examination.

# Humanities Language Learning Program

## Andrew Paul Zissos, Director

400 Murray Krieger Hall  
949-824-6735  
<http://www.humanities.uci.edu/hllp/>

The learning of languages other than English is a crucial component of humanistic inquiry, global literacy, and academic diversity. The mission of the Humanities Language Learning Program (HLLP) is to support the learning and teaching of languages other than English on the UCI campus, provide instruction in languages not associated with undergraduate or graduate degree programs, foster intellectual and pedagogical connections between the fields of applied linguistics and the humanities, and provide local and national leadership in raising the profile and prominence of language learning as part of a university education in a rapidly changing, globally interconnected world.

The following languages are offered through the HLLP: Arabic, Persian, Hebrew, and Vietnamese. Students who would like to enroll in a HLLP language class should complete a language background questionnaire. This questionnaire is available on the HLLP Language Placement Information website (<http://www.humanities.uci.edu/hllp/resources/>) and should be submitted online. Students with previous exposure to Arabic, Hebrew, Persian, or Vietnamese may also need to take a placement test. These tests are administered by the UCI Academic Testing Center by appointment. Please contact the Testing Center at 949-824-6207 to schedule a time to take a placement test. Send any questions about placement to the HLLP Director.

See **Language Other Than English Placement and Progression**.

## Humanities Language Learning Program Peer-to-Peer Language Mentor Program

The HLLP Peer-to-Peer Language Mentor Program is designed both as a supplement to more formal language learning within the classroom and as a means for students not enrolled in language classes to maintain their language skills. Each language mentor will be paired with one to three mentees. Mentor and mentee(s) will meet for at least one hour each week and will engage in various activities conducted in the target language. These activities may include (but are not limited to) conversations in the target language; watching a film, television show, or news program in the target language; cooking a meal or snack that is typical of the culture of the target language; attending an appropriate cultural event, museum exhibition, or performance; producing a creative work (including dance) that is appropriate to the target culture; presentation of specialized vocabulary by the mentor (e.g., medical vocabulary); listening to music of the target culture; going to an ethnic grocery store or restaurant, etc. All conversation revolving around these activities should be in the target language to the greatest degree possible. Both the mentor and the mentee(s) will keep a journal and will reflect on each week's meeting and activities. Mentor and mentee(s) will also be required to attend two whole group meetings each quarter, one at the beginning of the quarter and one at the end.

Students must submit an application in order to participate in the program and the applications will be evaluated by the faculty of the Humanities Language Learning Program. Once chosen, mentors and mentees will be instructed to enroll in a 1 unit P/NP class corresponding to their language and level of participation.

### *Selection Requirements for Mentors (ARABIC 10A, HEBREW 10A, PERSIAN 10A, VIETMSE 10A) :*

- High-Intermediate to Advanced-level language skills (particularly oral language skills) in target language
- Sophomore to senior standing
- 2.7 (B-) G.P.A.
- Sincere interest in fostering the development of language skills of mentee(s)
- Leadership skills
- Active participation in planning of weekly activities
- Ability to meet with mentee(s) on a weekly basis and to attend whole group meetings

### *Selection Requirements for Mentees (ARABIC 10B, HEBREW 10B, PERSIAN 10B, VIETMSE 10B) :*

- Enrollment in an HLLP language is desirable, but not required
- Freshman to senior standing
- Commitment to improving speaking skills in target language
- Active participation in weekly activities
- Ability to meet with mentor on a weekly basis and to attend whole group meetings

## Faculty

Soheila Kian, Ph.D. University of California, Los Angeles, *Lecturer of Persian*

Raheela Maniar, M.A. University of California, Los Angeles, *Lecturer of Arabic*

Tri Chan Tran, Ph.D. University of California, Los Angeles, *Lecturer of Vietnamese; Vietnamese*

## Arabic Courses

### **ARABIC 1A. Fundamentals of Arabic. 5 Units.**

Designed for students with little or no exposure to Arabic. Using real world texts, provides a firm foundation in the orthography, grammar, syntax, and vocabulary of Modern Standard Arabic. Introduces students to Arab world cultures.

Prerequisite: Placement into ARABIC 1A.

Overlaps with ARABIC S1AB.

Restriction: ARABIC 1A and ARABIC S1AB may not be taken for full credit.

### **ARABIC 1B. Fundamentals of Arabic. 5 Units.**

Designed for students with little or no exposure to Arabic. Using real world texts, provides a firm foundation in the orthography, grammar, syntax, and vocabulary of Modern Standard Arabic. Introduces students to Arab world cultures.

Prerequisite: ARABIC 1A. ARABIC 1A with a grade of C or better. Placement into ARABIC 1B is also accepted.

Overlaps with ARABIC S1AB, ARABIC S1BC.

Restriction: ARABIC 1B and ARABIC S1AB and ARABIC S1BC may not be taken for full credit.

### **ARABIC 1C. Fundamentals of Arabic. 5 Units.**

Designed for students with little or no exposure to Arabic. Using real world texts, provides a firm foundation in the orthography, grammar, syntax, and vocabulary of Modern Standard Arabic. Introduces students to Arab world cultures.

Prerequisite: ARABIC 1B or ARABIC S1AB. ARABIC 1B with a grade of C or better. ARABIC S1AB with a grade of C or better. Placement is also accepted.

Overlaps with ARABIC S1BC.

## **(VI)**

### **ARABIC 2A. Intermediate Arabic Language and Culture. 4 Units.**

Designed for students to advance their Arabic language skills to intermediate level. Students will develop their understanding of grammar and syntax to a more sophisticated level. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: ARABIC 1C or ARABIC S1BC. ARABIC 1C with a grade of C or better. ARABIC S1BC with a grade of C or better. Placement into ARABIC 2A is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

## **(VIII)**

### **ARABIC 2B. Intermediate Arabic Language and Culture. 4 Units.**

Designed for students to advance their Arabic language skills to intermediate level. Students will develop their understanding of grammar and syntax to a more sophisticated level. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: ARABIC 2A. ARABIC 2A with a grade of C or better. Placement into ARABIC 2B is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

## **(VIII)**

### **ARABIC 2C. Intermediate Arabic Language and Culture. 4 Units.**

Designed for students to advance their Arabic language skills to intermediate level. Students will develop their understanding of grammar and syntax to a more sophisticated level. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: ARABIC 2B. ARABIC 2B with a grade of C or better. Placement into ARABIC 2C is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

## **(VIII)**

**ARABIC 10A. Arabic Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. ARABIC 10A is for language mentors.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**ARABIC 10B. Arabic Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. ARABIC 10B is for language mentees.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**ARABIC 51. Introduction to the Koran. 4 Units.**

An introduction to understanding the Koran and its significance to Muslim life, culture, and history. An overview of scholarly traditions related to the Koran, and its critics. Close readings of the Koran in English translation.

(IV, VIII)

**ARABIC 199. Independent Study. 4 Units.**

Research paper required.

Repeatability: May be repeated for credit unlimited times.

## Hebrew Courses

**HEBREW 1A. Fundamentals of Hebrew. 5 Units.**

Designed for students with little or no exposure to Hebrew. May focus on Biblical Hebrew and/or modern Hebrew. Students learn the writing system and basics of grammar via latest pedagogical materials. Topics in Jewish culture are also included.

Prerequisite: Placement into HEBREW 1A is also accepted.

**HEBREW 1C. Fundamentals of Hebrew. 5 Units.**

Designed for students with little or no exposure to Hebrew. May focus on Biblical Hebrew and/or modern Hebrew. Students learn the writing system and basics of grammar via latest pedagogical materials. Topics in Jewish culture are also included.

Prerequisite: HEBREW 1B. HEBREW 1B with a grade of C or better. Placement into HEBREW 1C is also accepted.

(VI)

**HEBREW 10A. Hebrew Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. HEBREW 10A is for language mentors.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**HEBREW 10B. Hebrew Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. HEBREW 10B is for language mentors.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**HEBREW 50. Jewish and Israeli Culture. 4 Units.**

Examination of subjects relevant to the culture of Israel and Judaism in their historical and modern day contexts through the study of film, literature, religious texts, artistic representations, etc.

(IV, VIII)

**HEBREW 199. Independent Study. 4 Units.**

Research paper required.

Repeatability: May be repeated for credit unlimited times.

## Persian Courses

**PERSIAN 1A. Fundamentals in Persian. 5 Units.**

Designed for students with little or no exposure to Persian. Students learn the modern writing system and grammar of Persian. Facilitates basic reading, writing, and speaking skills and fosters college-level literacy in Persian culture.

Prerequisite: Placement into PERSIAN 1A.

Overlaps with PERSIAN S1AB.

Restriction: PERSIAN 1A and PERSIAN S1AB may not be taken for full credit.

**PERSIAN 1B. Fundamentals in Persian. 5 Units.**

Designed for students with little or no exposure to Persian. Students learn the modern writing system and grammar of Persian. Facilitates basic reading, writing, and speaking skills and fosters college-level literacy in Persian culture.

Prerequisite: PERSIAN 1A. PERSIAN 1A with a grade of C or better. Placement into PERSIAN 1B is also accepted.

Overlaps with PERSIAN S1AB, PERSIAN S1BC.

Restriction: PERSIAN 1B and PERSIAN S1AB and PERSIAN S1BC may not be taken for full credit.

**PERSIAN 1C. Fundamentals in Persian. 5 Units.**

Designed for students with little or no exposure to Persian. Students learn the modern writing system and grammar of Persian. Facilitates basic reading, writing, and speaking skills and fosters college-level literacy in Persian culture.

Prerequisite: PERSIAN 1B or PERSIAN S1AB. PERSIAN 1B with a grade of C or better. PERSIAN S1AB with a grade of C or better. Placement into PERSIAN 1C is also accepted.

Overlaps with PERSIAN S1BC.

Restriction: PERSIAN 1C and PERSIAN S1BC may not be taken for full credit.

### (VI)

**PERSIAN 2A. Intermediate Persian. 4 Units.**

Designed for students to advance their Persian language skills from introductory to intermediate level. Student will advance their understanding of grammar and syntax. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: PERSIAN 1C or PERSIAN S1BC. PERSIAN 1C with a grade of C or better. PERSIAN S1BC with a grade of C or better. Placement into PERSIAN 2A is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

### (VIII)

**PERSIAN 2B. Intermediate Persian. 4 Units.**

Designed for students to advance their Persian language skills from introductory to intermediate level. Students will advance their understanding of grammar and syntax. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: PERSIAN 2A. PERSIAN 2A with a grade of C or better. Placement into PERSIAN 2B is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

### (VIII)

**PERSIAN 2C. Intermediate Persian. 4 Units.**

Designed for students to advance their Persian language skills from introductory to intermediate level. Students will advance their understanding of grammar and syntax. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: PERSIAN 2B. PERSIAN 2B with a grade of C or better. Placement into PERSIAN 2C is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**PERSIAN 10A. Persian Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. PERSIAN 10A is for language mentors.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**PERSIAN 10B. Persian Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. PERSIAN 10B is for language mentees.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**PERSIAN 50. Persian Culture. 4 Units.**

Study of varied topics in Persian culture, area studies, and society, both in the present and in historical perspective. Topics are not normally repeated for a two-year period.

Repeatability: Unlimited as topics vary.

(IV, VIII)

**PERSIAN 150. Topics in Advanced Persian Culture. 4 Units.**

In-depth examination of major works in premodern and modern Persian literature and/or the arts, with specific emphasis upon historical and cultural context and relevant societal issues and trends. Course is conducted in English.

Repeatability: May be taken for credit for 4 units as topics vary.

**PERSIAN 165A. Modern Iran: Cinema and the City. 4 Units.**

Exploring modern Iran through film, literature, photography, travel writing, and philosophy and social science texts that introduce students to important concepts in post-colonial studies, social thought, war culture, religion, and media as experienced through the paradigm of a non-Western modernity.

Same as ANTHRO 165A.

**PERSIAN 199. Independent Study. 4 Units.**

Independent research with Persian faculty.

Repeatability: May be repeated for credit unlimited times.

## Vietnamese Courses

**VIETMSE 1A. Fundamentals of Vietnamese. 5 Units.**

Designed for students with little or no exposure to Vietnamese. Natural approach with emphasis on four fundamental skills of listening, speaking, reading, and writing. Conducted in Vietnamese.

Prerequisite: Placement into VIETMSE 1A is required.

**VIETMSE 1B. Fundamentals of Vietnamese. 5 Units.**

Designed for students with little or no exposure to Vietnamese. Natural approach with emphasis on four fundamental skills of listening, speaking, reading, and writing. Conducted in Vietnamese.

Prerequisite: VIETMSE 1A. VIETMSE 1A with a grade of C or better. Placement into VIETMSE 1B is also accepted.

**VIETMSE 1C. Fundamentals of Vietnamese. 5 Units.**

Designed for students with little or no exposure to Vietnamese. Natural approach with emphasis on four fundamental skills of listening, speaking, reading, and writing. Conducted in Vietnamese.

Prerequisite: VIETMSE 1B or VIETMSE S1AB. VIETMSE 1B with a grade of C or better. VIETMSE S1AB with a grade of C or better. Placement into VIETMSE 1C is also accepted.

**(VI)**

**VIETMSE 2A. Intermediate Vietnamese. 4 Units.**

Designed for students to advance their Vietnamese language skills from introductory to intermediate level. Designed to develop writing and reading skills and communicative skills in authentic situations. Students are introduced to aspects of Vietnamese culture relating to lesson topics.

Prerequisite: VIETMSE 1C and VIETMSE S1BC. VIETMSE 1C with a grade of C or better. VIETMSE S1BC with a grade of C or better. Placement into VIETMSE 2A is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)**

**VIETMSE 2B. Intermediate Vietnamese. 4 Units.**

Designed for students to advance their Vietnamese language skills from introductory to intermediate level. Designed to develop writing and reading skills and communicative skills in authentic situations. Students are introduced to aspects of Vietnamese culture relating to lesson topics.

Prerequisite: VIETMSE 2A. VIETMSE 2A with a grade of C or better. Placement into VIETMSE 2B is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)**

**VIETMSE 2C. Intermediate Vietnamese. 4 Units.**

Designed for students to advance their Vietnamese language skills from introductory to intermediate level. Designed to develop writing and reading skills and communicative skills in authentic situations. Students are introduced to aspects of Vietnamese culture relating to lesson topics.

Prerequisite: VIETMSE 2B. VIETMSE 2B with a grade of C or better. Placement into VIETMSE 2C is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(VIII)**

**VIETMSE 10A. Vietnamese Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. VIETMSE 10A is for language mentors.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**VIETMSE 10B. Vietnamese Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. VIETMSE 10B is for language mentees.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**VIETMSE 50. Vietnamese Culture . 4 Units.**

Vietnamese culture and society in modern and historical contexts through the study of literary works, film, and other media. Philosophy and religious practices may also be examined. Course is taught in English.

**(IV)**

**VIETMSE 150. Vietnamese Literature and Culture in Translation. 4 Units.**

Major works in Vietnamese literature and culture in context.

Repeatability: Unlimited as topics vary.

## Special Programs

This section includes a variety of special programs that are available through the School of Humanities. Click on the tabs above for information about each program.

- Program in Academic English

## Academic English Courses

### **AC ENG 20A. Academic Writing. 5 Units.**

Grammar, sentence structure, paragraph and essay organization of formal written English.

Prerequisite: Placement into AC ENG 20A.

Grading Option: Pass/no pass only.

### **AC ENG 20B. Academic Writing. 5 Units.**

Grammar, sentence structure, paragraph and essay organization of formal written English.

Prerequisite: AC ENG 20A. Placement into AC ENG 20B is also accepted.

Grading Option: Pass/no pass only.

### **AC ENG 20C. Essentials of Academic Writing. 5 Units.**

Grammar, sentence structure, paragraph and essay organization of formal written English.

Prerequisite: AC ENG 20B. Placement into AC ENG 20C is also accepted.

Grading Option: Pass/no pass only.

### **AC ENG 20D. Academic Writing. 5 Units.**

Grammar, sentence structure, paragraph and essay organization of formal written English.

Prerequisite: AC ENG 20C

Grading Option: Pass/no pass only.

### **AC ENG 22A. Academic English Reading and Vocabulary. 2 Units.**

Intensive reading exercises with occasional practice in extensive reading, focusing on comprehension, development of vocabulary, syntax, rhetorical features, reading strategies, and study skills.

Prerequisite: Placement into AC ENG 22A is required.

### **AC ENG 22B. ESL Reading and Vocabulary. 2 Units.**

Extensive reading and discussion with emphasis on journal articles, textbook chapters, notetaking, and the interpretation of charts, diagrams, tables, and figures.

Grading Option: Pass/no pass only.

**AC ENG 23A. ESL Pronunciation I. 2 Units.**

Designed for international graduate students. Provides an emphasis on pronunciation. Development of listening and speaking skills in five fundamental areas: pronunciation, intonation, word stress, listening comprehension, and informal campus communication. Presentations of personal experiences and reports on graphs.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**AC ENG 23B. ESL Conversation II. 2 Units.**

Designed for international graduate students. Provides an emphasis on conversational fluency. Further development of listening and speaking skills: review of English sounds, sentence stress, and rhythm. Oral reports, debates, and reports on graphs and surveys.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**AC ENG 23C. ESL Advanced Communication III. 2 Units.**

Designed for international graduate students with advanced communication skills. Further development of listening and speaking skills: review of minimal pairs, consonant blends, intonation, stress and rhythm. Oral presentations emphasized utilizing graphs, syllabi, academic terms, and video presentations on academic work.

Prerequisite: AC ENG 23A or AC ENG 23B

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**AC ENG 24. ESL International TA Workshop. 2 Units.**

Designed for advanced-level international students preparing to be teaching assistants. Provides extensive practice in oral and written communication skills associated with teaching introductory-level college courses and participating in academic presentations and discussions. Review and analysis of language problems.

Prerequisite: AC ENG 23A or AC ENG 23B or AC ENG 23C

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**AC ENG 28. Grammar. 2-4 Units.**

A full review of English grammar covering the following areas: grammar terms, verb tenses, verb forms, conditionals, passive and word forms, punctuation, sentence structure. The concepts are applied in targeted sentence and paragraph writing practice.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

**AC ENG 29. Special Topics in ESL. 2 Units.**

Directed and individualized work in English as a second language not covered in the AC ENG 20, 21, 22 sequence.

Grading Option: Pass/no pass only.

Repeatability: Unlimited as topics vary.

**AC ENG 139W. Advanced Academic Writing Across the Curriculum. 4 Units.**

Designed for transfer students who speak English as a second language. Focuses on developing academic reading and writing skills including essay content, organization, vocabulary, and grammar. Academic content also covered.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Restricted to students whose first language is not English.

(Ib)

## Medical Humanities Initiative Courses

### **MED HUM 1. Health, Wellness, and Conception of the Body. 4 Units.**

Asks what is health and who gets to have it? What is considered a “healthy” or “sick” body? We analyze historical and contemporary experiences of illness, medicine, and caregiving, including how patients represent their bodies and healing.

(GE III or IV ).

### **MED HUM 3. Art and Medicine . 4 Units.**

Analyzes the relationship between medicine and the visual arts from the late medieval to modern periods, covering topics such as anatomy, optical medical technologies, gender and race in medicine, and popular representations of disease and doctors.

(GE II or IV ).

### **MED HUM 195. Capstone Seminar: The Clinical Moral Laboratory. 4 Units.**

Interdisciplinary exploration of the clinical encounter, and the importance of meaning making in these “moral laboratories.” Students enter the clinical space as participant observers, and reflect on how the clinical site informs and challenges reading practices.

Prerequisite: MED HUM 1 or MED HUM 3 or GEN&SEX 60A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only.

### **MED HUM 200. Critical Perspectives in Medical Humanities. 4 Units.**

Analyzes social and cultural understandings of the body, health, illness, medicine, and disease. Themes include critical histories of the body; non-compliant subjects interacting with medicine; racial-sexual hierarchies of health; and theories and expressions of pain and suffering.

Restriction: Graduate students only.

## Persian Courses

### **PERSIAN 1A. Fundamentals in Persian. 5 Units.**

Designed for students with little or no exposure to Persian. Students learn the modern writing system and grammar of Persian. Facilitates basic reading, writing, and speaking skills and fosters college-level literacy in Persian culture.

Prerequisite: Placement into PERSIAN 1A.

Overlaps with PERSIAN S1AB.

Restriction: PERSIAN 1A and PERSIAN S1AB may not be taken for full credit.

### **PERSIAN 1B. Fundamentals in Persian. 5 Units.**

Designed for students with little or no exposure to Persian. Students learn the modern writing system and grammar of Persian. Facilitates basic reading, writing, and speaking skills and fosters college-level literacy in Persian culture.

Prerequisite: PERSIAN 1A. PERSIAN 1A with a grade of C or better. Placement into PERSIAN 1B is also accepted.

Overlaps with PERSIAN S1AB, PERSIAN S1BC.

Restriction: PERSIAN 1B and PERSIAN S1AB and PERSIAN S1BC may not be taken for full credit.

### **PERSIAN 1C. Fundamentals in Persian. 5 Units.**

Designed for students with little or no exposure to Persian. Students learn the modern writing system and grammar of Persian. Facilitates basic reading, writing, and speaking skills and fosters college-level literacy in Persian culture.

Prerequisite: PERSIAN 1B or PERSIAN S1AB. PERSIAN 1B with a grade of C or better. PERSIAN S1AB with a grade of C or better. Placement into PERSIAN 1C is also accepted.

Overlaps with PERSIAN S1BC.

Restriction: PERSIAN 1C and PERSIAN S1BC may not be taken for full credit.

(VI)

**PERSIAN 2A. Intermediate Persian. 4 Units.**

Designed for students to advance their Persian language skills from introductory to intermediate level. Student will advance their understanding of grammar and syntax. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: PERSIAN 1C or PERSIAN S1BC. PERSIAN 1C with a grade of C or better. PERSIAN S1BC with a grade of C or better. Placement into PERSIAN 2A is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**PERSIAN 2B. Intermediate Persian. 4 Units.**

Designed for students to advance their Persian language skills from introductory to intermediate level. Students will advance their understanding of grammar and syntax. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: PERSIAN 2A. PERSIAN 2A with a grade of C or better. Placement into PERSIAN 2B is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**PERSIAN 2C. Intermediate Persian. 4 Units.**

Designed for students to advance their Persian language skills from introductory to intermediate level. Students will advance their understanding of grammar and syntax. Facilitates intermediate-level reading, writing, and speaking skills. Fosters college-level cultural literacy.

Prerequisite: PERSIAN 2B. PERSIAN 2B with a grade of C or better. Placement into PERSIAN 2C is also accepted.

Restriction: School of Humanities students have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(VIII)

**PERSIAN 10A. Persian Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. PERSIAN 10A is for language mentors.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**PERSIAN 10B. Persian Peer-to-Peer Language Mentor Program. 1 Unit.**

Peer-to-Peer Language Mentor Program in which student mentors work with student mentees to increase the language skills of both participants. One hour weekly meetings. PERSIAN 10B is for language mentees.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 4 times.

**PERSIAN 50. Persian Culture. 4 Units.**

Study of varied topics in Persian culture, area studies, and society, both in the present and in historical perspective. Topics are not normally repeated for a two-year period.

Repeatability: Unlimited as topics vary.

(IV, VIII)

**PERSIAN 150. Topics in Advanced Persian Culture. 4 Units.**

In-depth examination of major works in premodern and modern Persian literature and/or the arts, with specific emphasis upon historical and cultural context and relevant societal issues and trends. Course is conducted in English.

Repeatability: May be taken for credit for 4 units as topics vary.

**PERSIAN 165A. Modern Iran: Cinema and the City. 4 Units.**

Exploring modern Iran through film, literature, photography, travel writing, and philosophy and social science texts that introduce students to important concepts in post-colonial studies, social thought, war culture, religion, and media as experienced through the paradigm of a non-Western modernity.

Same as ANTHRO 165A.

**PERSIAN 199. Independent Study. 4 Units.**

Independent research with Persian faculty.

Repeatability: May be repeated for credit unlimited times.

## Asian Studies, Minor

**Robert Uriu, Co-Director, School of Social Sciences**

rmuriu@uci.edu

**Qitao Guo, Co-Director, School of Humanities**

guoq@uci.edu

The countries and cultures of Asia are significant participants in the world community. They present compellingly different models for social organization, historical development, and cultural commitments. The many countries of this large and complex region provide challenges and opportunities whether one plans to be a scholar, a business person, or a diplomat. The minor in Asian Studies draws upon the expertise of faculty throughout UCI to create opportunities for students to explore Asian topics in a variety of fields, to develop advanced language skills, and to acquire a broader perspective as they apply the disciplinary training of their major field to effective and informed studies of Asian subjects. The minor is open to all UCI students.

### Requirements for the Interdisciplinary Minor in Asian Studies

Students choose one country and language of specialization. At the present the Asian Studies minor focuses on China, Japan, or Korea.

Requirements for the minor are met by taking eight courses (of which no more than four may be lower-division) as specified below.

A. One upper-division History course with a focus on Asia approved by the director.

B. Three quarters of course work in one Asian language of specialization beyond the first-year level. Approved courses are:

1. Second-, third-, or fourth-year language: <sup>1</sup>

CHINESE 2A- 2B- 2C	Intermediate Mandarin Chinese and Intermediate Mandarin Chinese and Intermediate Mandarin Chinese
CHINESE 2MA- 2MB- 2MC	Intermediate Mandarin Chinese - Mandarin Background Track and Intermediate Mandarin Chinese - Mandarin Background Track and Intermediate Mandarin Chinese - Mandarin Background Track
CHINESE 3A- 3B- 3C	Advanced Mandarin Chinese and Advanced Mandarin Chinese and Advanced Mandarin Chinese
CHINESE 101A- 101B- 101C	Fourth-Year Mandarin Chinese and Fourth-Year Mandarin Chinese and Fourth-Year Mandarin Chinese
JAPANESE 2A- 2B- 2C	Intermediate Japanese and Intermediate Japanese and Intermediate Japanese
JAPANESE 3A- 3B- 3C	Advanced Japanese and Advanced Japanese and Advanced Japanese
JAPANESE 101A- 101B	Fourth Year Japanese and Fourth Year Japanese
KOREAN 2A- 2B- 2C	Intermediate Korean and Intermediate Korean and Intermediate Korean
KOREAN 2KA- 2KB- 2KC	Intermediate Korean for Students with a Previous Background in Korean and Intermediate Korean for Students with a Previous Background in Korean and Intermediate Korean for Students with a Previous Background in Korean
KOREAN 3A- 3B- 3C	Advanced Korean and Advanced Korean and Advanced Korean
KOREAN 101A	Fourth-Year Korean

Other sequences in Asian languages as available.

2. Either Classical Chinese or Classical Japanese:	
CHINESE 100A- 100B- 100C	Classical Chinese and Classical Chinese and Classical Chinese
JAPANESE 100A- 100B	Classical Japanese and Classical Japanese (plus a third quarter of Japanese language study)
3. Literature courses taught in the original language: <sup>2</sup>	
CHINESE 115	Topics in Chinese Literature: Advanced Texts
JAPANESE 115	Japanese Literature: Advanced Texts
KOREAN 115	Korean Literature: Advanced Texts
Or graduate seminars	
C. Four additional courses selected from an approved list. <sup>3</sup>	
1. At least two of these courses must be taken in one (or more) department(s) other than the student's major department.	
2. The courses must cover at least two different Asian countries, one of which is the country of language specialization.	
3. No more than two of the courses may be lower-division (and only one may be lower-division if any combination of second- or third-year East Asian language is used for the language required above).	
<sup>1</sup>	These courses require placement examinations given by the Academic Testing Center. Students who, for example, place out of CHINESE 2B would then take CHINESE 2C, CHINESE 3A-CHINESE 3B to meet the requirement.
<sup>2</sup>	These courses have a prerequisite of completion of the fourth-year language sequence or its equivalent.
<sup>3</sup>	Available at the Asian Studies Minor website ( <a href="http://www.humanities.uci.edu/asianstudies/">http://www.humanities.uci.edu/asianstudies/</a> ).

NOTE: A maximum overlap of two courses is permitted between this minor and a student's major.

**Residence Requirement for the Minor:** Four upper-division (or graduate) courses must be successfully completed at UCI. Two of the four may be taken through the UC Education Abroad Program, provided course content is approved in advance by the appropriate department chair.

## Humanities and Law, Minor

**Jeffrey Helmreich, Director**  
 85 Humanities Instructional Building  
 949-824-6525  
<http://www.humanities.uci.edu/humlaw/>

The minor in Humanities and Law is comprised of courses in the School of Humanities that UCI graduates have found to be useful in developing skills and knowledge that prepare them for law-related careers. One set of courses develops skills in critical reading, writing, and analysis that are necessary in dealing with legal issues. Another set presents theoretical and analytical perspectives on ethical, political, and social issues relevant to the law. A final set focuses on specific legal issues from a humanistic perspective. Lower-division requirements primarily develop foundational skills in the first set, whereas upper-division requirements build on these skills by addressing the concerns from the other sets. The minor does not include how-to courses on particular legal practices.

### Requirements for the Minor in Humanities and Law

A. Complete:

PHILOS 22	Introduction to Law and Society
ENGLISH 11	Society, Law, and Literature <sup>1</sup>

B. Select one of the following options:

HUMAN 1A- 1AS- 1B- 1BS- 1C- 1CS	Humanities Core Lecture and Humanities Core Writing and Humanities Core Lecture and Humanities Core Writing and Humanities Core Lecture and Humanities Core Writing
---------------------------------	---

(or the Humanities Core Alternative) <sup>2</sup>

or

PHILOS 2 or PHILOS 29 and one course, not used above, chosen from: PHILOS 22, PHILOS 133, ENGLISH 11, or GEN&SEX 60B

C. Select five upper-division courses from among a list of quarterly approved courses, at least one each from philosophy, history, and either literature or classics. <sup>1,3</sup>

- <sup>1</sup> Additional courses may be substituted with prior approval of the Director of the Humanities and Law minor.
- <sup>2</sup> The Humanities Core Alternative is also an option. Visit the School of Humanities Undergraduate Study website (<http://www.humanities.uci.edu/SOH/students/core.php>) for additional information.
- <sup>3</sup> Consult the Humanities and Law website (<http://www.humanities.uci.edu/humlaw/>) for currently approved courses.

Students considering a career in law are strongly encouraged to take advantage of other law-related courses offered across the campus and of extracurricular activities such as the Pre-Law Society.

**Residence Requirement for the Minor:** Four upper-division courses required for the minor must be successfully completed at UCI. Two of the four may be taken through the UC Education Abroad Program, provided course content is approved in advance by the appropriate department chair.

## Jewish Studies, Minor

**Matthias Lehmann, Director**

400 Murray Krieger Hall

[JewishStudies@uci.edu](mailto:JewishStudies@uci.edu)

[www.humanities.uci.edu/jewishstudies/](http://www.humanities.uci.edu/jewishstudies/) (<http://www.humanities.uci.edu/jewishstudies/>)

The minor in Jewish Studies is an interdisciplinary program that introduces students to the many facets of Jewish cultures through the study of the history, philosophy, art, literature, languages, and social and political institutions of Jews from ancient to modern times. The minor provides students with grounding in areas of fundamental importance to the Humanities and Social Sciences, supporting and enriching the students' majors. The minor may be taken in tandem with any major and prepares students for graduate programs in Jewish Studies. The interdisciplinary approach of Jewish Studies exposes students to a wide range of disciplines and, like other established liberal arts fields, provides a foundation for pursuing a range of careers.

### Requirements for the Minor in Jewish Studies

A. Complete:

HISTORY 18A

Major Jewish Texts

B. Select at least four upper-division courses from the approved list on the Jewish Studies website.<sup>1</sup>

C. Select three additional, lower- or upper-division courses from the approved list on the Jewish Studies website.<sup>1</sup>

- <sup>1</sup> Students should consult the Jewish Studies website (<http://www.humanities.uci.edu/jewishstudies/program/minor.php>). With the approval of the Director, other relevant courses may satisfy the requirements for the minor.

**Residence Requirement for the Minor:** At least four upper-division courses required for the minor must be completed successfully at UCI. By petition, two of the four may be taken through the UC Education Abroad Program, providing course content is approved in advance by the appropriate program director.

## Latin American Studies, Graduate Emphasis

The Graduate Emphasis in Latin American Studies is open to students from all fields and allows students to gain interdisciplinary knowledge about the study of Latin America and form scholarly relationships with a range of faculty and graduate students interested in Latin America from across the UCI campus. The emphasis requires one year-long foundation workshop on Latin American Studies and two graduate seminars dealing centrally with issues related to Latin America.

Applicants must first be admitted to, or currently enrolled in, a Master's or Ph.D. program at UCI and submit an application form to the director of the emphasis. Students should ideally apply while they are still engaged in coursework, but exceptions may be considered by the committee.

### Requirements

Minimum course work for the graduate emphasis in Latin American Studies consists of three courses: a three quarter course entitled Issues in Latin American Studies (HUMAN 265A, HUMAN 265B, HUMAN 265C) and two approved electives that are centrally related to the study of Latin America. Many students may elect to take one of these seminars within their home departments as course-work that also satisfies other degree requirements. One of these seminars must be from outside the student's home department (and not cross-listed with their home department). For students completing an M.A. thesis or Ph.D. dissertation, the research project will engage the study of Latin America as part of the overall project and one member of the candidate's dissertation committee should be a core or affiliate faculty in Latin American Studies.

## Latin American Studies, Minor

**Alex Borucki, Director**

322 Humanities Hall

949-824-6901

<http://www.humanities.uci.edu/latinamericanstudies/>

Latin America is a complex cultural and historical region created by Spanish and Portuguese colonization in the New World and which encompasses territories and peoples from the southernmost tip of South America to the Caribbean Islands and the United States. As an area born out of a series of conquests, migrations, contacts, and conflicts, it is transcultural, multi-lingual, and multi-ethnic. It has been a vital part of the formation of the modern world even as it has continued to function as a source for the expression of economic, political, and cultural alternatives to dominant Western formations. The minor provides deeper knowledge and expertise in this region for students interested in a variety of careers. It complements the disciplinary training of a students' major field by asking that students engage with Latin America through a variety of disciplines and by working with faculty across different schools at UCI.

## Requirements for the Minor in Latin American Studies

Requirements for the minor are met by taking seven courses (of which no more than three may be lower-division) as specified below. No more than four courses may be taken in any one single department.

A. Complete one of the following core courses:

SPANISH 50	Latin America, U.S. Latino, and Iberian Cultures
HISTORY 70D	Problems in History: Latin America
HUMAN 100	

B. One course from each of the following three categories—History, Culture, and Social Sciences—selected from the approved list on the Latin American Studies website.<sup>1</sup>

C. Three additional courses selected from the approved list.<sup>1</sup>

<sup>1</sup> The approved list is available at the Latin American Studies website (<http://www.humanities.uci.edu/latinamericanstudies/>).

With the approval of the director, other relevant courses also may satisfy the requirements for the minor.

**Residence Requirement for the Minor:** Four upper-division courses required for the minor must be completed successfully at UCI. Two of the four may be taken through the UC Education Abroad Program, provided course content is approved in advance by the appropriate department chair.

## Medical Humanities, Graduate Emphasis

### Lyle Massey, Director

2116 Humanities Gateway

949-824-6525

[https://www.humanities.uci.edu/philosophy/graduate/52\\_course.php](https://www.humanities.uci.edu/philosophy/graduate/52_course.php)

The graduate emphasis in Medical Humanities is a formal component of graduate studies at UCI in addition to the fulfillment of requirements toward a Ph.D., M.F.A., or M.A. in an array of fields in the schools of Arts, Humanities, and Medicine.

The emphasis allows students to gain interdisciplinary knowledge about the study of illness, health, healthcare, and the body. The emphasis requires three graduate seminars offered through the Medical Humanities graduate course offerings. Satisfactory completion of the emphasis is certified by the Director or Co-Directors of the Medical Humanities Emphasis and is noted at the student's dossier.

Applicants must first be admitted to, or currently enrolled in, a Ph.D. program or state-supported Master's program and submit an application form to the director of the emphasis. The application should include a signature of approval from the student's advisor or program director.

### Requirements

Minimum course work for the graduate emphasis in Medical Humanities consists of three courses chosen in consultation with the Graduate Emphasis director. Students can count courses taken to fulfill their departmental requirements toward their emphasis, if said courses are comprised of pertinent material and art approved by the Graduate Emphasis director. One of the three courses has to be core course MED HUM 200. An upper-division undergraduate course with supplemental graduate level work after consultation with the instructor and the director can count toward the emphasis.

### Course Options for the Emphasis

ANTHRO 204A	Proseminar in Medicine, Science, and Technology
ANTHRO 232B	Medical Anthropology
ASIANAM 201	Graduate Topics in Asian American Studies
CHC/LAT 210A	Cultural and Historical Precedents for Latinos and Medical Care
CHC/LAT 210B	Cultural and Historical Precedents for Latinos and Medical Care
CHC/LAT 211A	Latinos/Latinas and Medical Care: Contemporary Issues
CHC/LAT 289	Special Topics in Chicano/Latino Studies
DANCE 201	Seminar in Kinesiology for Dance

ENGLISH 210

Studies in Literary History

PHILOS 242

Topics in Philosophy of Biology

MED HUM 200

Critical Perspectives in Medical Humanities

## Medical Humanities, Minor

**Sven Bernecker, Co-Director**

**Annalisa Coliva, Co-Director**

85 Humanities Instructional Building

<http://www.humanities.uci.edu/medicalhumanities/>

Medical Humanities is an interdisciplinary, humanistic, and cultural study of illness, health, health care, and the body. In contrast to the medical sciences, the medical humanities – which include bioethics, narrative medicine, history of medicine, culture studies, science and technology studies, medical anthropology, philosophy, dance, music, literature, film, and visual and performing arts – focus more on meaning making than measurement.

Students explore the boundaries between sickness and health, and learn to see life through a patient's eyes. Topics include the authority of the physician, the role of the hospital, the doctor-patient relationship, the social dimensions of racial and gender differences, and changing conceptions of disease and healing.

The minor may be combined with any major and of particular interest to those students planning to attend medical school, nursing school, pharmacy school, and public health school, as well as students in the humanities seeking to pursue graduate work in the field of medical humanities.

### Requirements for the Minor in Medical Humanities

A. Select one of the following:

MED HUM 1	Health, Wellness, and Conception of the Body
MED HUM 3	Art and Medicine

B. Select one of the following:

CLASSIC 10	Scientific and Specialized Terminology
DANCE 3	Scientific Concepts of Health
GEN&SEX 60A	Gender and Science
PHILOS 3	Technology and Society
PHILOS 4	Introduction to Ethics
PHILOS 5	Contemporary Moral Problems

C. Select two of the following:

GEN&SEX 110D	The Politics of Health and Medicine
PHILOS 121A	Medical Epistemology
PHILOS 131C	Medical Ethics
MED HUM 195	Capstone Seminar: The Clinical Moral Laboratory

D. Select three additional courses (two of which must be upper-division) chosen from those listed above in A, B, and C, and among a list of quarterly approved courses. With the approval of the Co-Directors of the Minor in Medical Humanities, other relevant courses may satisfy the requirements for the minor.<sup>1</sup>

<sup>1</sup> The list of quarterly approved courses is available on the Medical Humanities website (<http://www.humanities.uci.edu/medicalhumanities/>).

**Residence Requirement for the Minor:** Four upper-division courses required for the minor must be successfully completed at UCI. Two of the four may be taken through the UC Education Abroad Program, provided course content is approved in advance by the Co-Directors of the Minor in Medical Humanities.

## Persian Studies, Minor

**Touraj Daryaee, Director**

400 Murray Krieger Hall

949-824-6735

[www.humanities.uci.edu/persianstudiesminor/](http://www.humanities.uci.edu/persianstudiesminor/) (<http://www.humanities.uci.edu/persianstudiesminor/>)

The interdisciplinary minor in Persian Studies offers undergraduate students an opportunity to study the Iranian and the Persianate world through the study of language, literature, history, and culture. Students who complete the minor will acquire command of the Persian language and have a grasp of the history, literature, art and architecture, cinema, and/or music of the Iranian and the Persianate world. With a minor in Persian Studies, students will

learn how to study Persian literary and historical texts and selected cultural art forms as well as the history of Iran, Afghanistan, Tajikistan, and beyond. The minor may be taken in tandem with any major.

## Requirements

Requirements for the minor are met by taking eight courses (32 units) beyond PERSIAN 2C (of which no more than four may be lower-division, excluding first and second year Persian language courses) as specified below. No more than four courses may be taken in any one single discipline.

A. Complete the following:

PERSIAN 2C	Intermediate Persian (or equivalent proficiency)
PERSIAN 50	Persian Culture

B. Complete the following:

HISTORY 131B	Ancient Persia
HISTORY 131C	Medieval Persia
HISTORY 131D	Modern Iran

C. Select four courses chosen from an approved list. <sup>1</sup>

<sup>1</sup> Consult the Persian Studies minor website (<http://www.humanities.uci.edu/persianstudiesminor/>) for a list of approved courses. With the approval of the Director, other relevant courses also may satisfy the requirements for the minor.

**Residence requirement for the minor:** Four upper-division courses required for the minor must be completed successfully at UCI.

## Program in Academic English

**Jerry Lee, Director of Program in Academic English**

**Qian Du, Associate Director of Program in Academic English**

335 Humanities Instructional Building

949-824-6781

<https://www.humanities.uci.edu/ae/>

Academic English 20A-B-C-D through 29 and 139W are for students who have been admitted to UCI and who need additional coursework in Academic English. Enrollment in a number of the Academic English classes is restricted to those students who place into that particular course based on the results from the Academic English placement test. Students required to complete AC ENG 20A, AC ENG 20B, AC ENG 20C, AC ENG 20D, and/or AC ENG 22A must complete the lower-division reading/writing requirement before their seventh quarter or they will be subject to probation. They are to enroll in WRITING 39A immediately after they are authorized to do so by the Academic English/English as a Second Language Program. Academic English courses are required to be completed as a Pass/Not Pass only grade option which will apply toward the 12 baccalaureate unit limit on P/NP only coursework. Students will receive workload credit for Academic English courses taken beyond this 12-unit limit but will not receive additional credits applicable to the bachelor's degree.

## Undergraduate Program in Global Cultures

**Andrew Zissos, Director**

[pzissos@uci.edu](mailto:pzissos@uci.edu)

322 Humanities Hall

949-824-6901

[http://www.humanities.uci.edu/global\\_cultures/](http://www.humanities.uci.edu/global_cultures/)

Global Cultures is an innovative undergraduate major and minor in the School of Humanities with an exciting mission: to explore the problems and processes of globalization from a humanistic perspective. The major provides students with 21st century analytical skills and knowledge that is critical to understanding the complexities of the diverse world in which we live. In the process, Global Cultures equips students with the knowledge and tools that lead to successful careers in a wide range of professions and fields.

Global Cultures faculty offer high-quality lectures and, in advanced courses, interactive small group seminars. The major favors a multidisciplinary approach that draws on multiple departments and programs, housed in both the Humanities (including Art History, English, Film and Media Studies, History, Philosophy, Religious Studies, Spanish and Portuguese, and many more) and the Social Sciences (Anthropology, Chicano/Latino Studies, Political Science, Sociology, among others).

Up-to-date examples of the highly diverse courses taught in the major may be found at the Global Cultures website ([http://www.humanities.uci.edu/global\\_cultures/](http://www.humanities.uci.edu/global_cultures/)). The curricular offerings of Global Cultures are extraordinarily broad. With this intellectually stimulating learning environment, the major attracts students from a wide range of backgrounds. Global Cultures faculty provide these students with a critical understanding and a strong foundation for practice in a variety of occupations, both domestic and international.

Students majoring or minoring in Global Cultures must choose a primary emphasis and a secondary emphasis from the list that can be found by clicking the major tab. Each emphasis essentially consists of a geographic focus. Students may also design their own emphasis in consultation with a program advisor and with the approval of the Global Cultures Committee. All emphases are chosen in consultation with a faculty advisor and/or the approval of the Global Cultures Committee. Examples of how current students are combining their primary and secondary emphases are available at the Global Cultures website. ([http://www.humanities.uci.edu/global\\_cultures/](http://www.humanities.uci.edu/global_cultures/))

## Core Faculty

Sharon B. Block, *Department of History*

Yong Chen, *Department of History*

James Fujii, *Departments of East Asian Studies and of Comparative Literature*

David Theo Goldberg, *Departments of Comparative Literature and of Criminology, Law and Society*

Douglas M. Haynes, *Department of History*

Laura H. Y. Kang, *Departments of Gender and Sexuality Studies and Comparative Literature*

Ketu H. Katrak, *Departments of Drama, Comparative Literature, and English*

Rodrigo Lazo, *Department of English*

Liron Mor, *Department of Comparative Literature*

Keith L. Nelson, *Department of History*

Jane O. Newman, *Departments of Comparative Literature and English*

Rachel O'Toole, *Department of History*

Brook Thomas, *Department of English*

Armin Schwegler, *Department of Spanish and Portuguese*

Jacobo Sefamí, *Department of Spanish and Portuguese*

Bert Winther-Tamaki, *Department of Art History*

- Global Cultures, B.A.
- Global Cultures, Minor

## Courses

### **GLBLCLT 103A. Global Cultures I . 4 Units.**

Introduction to the processes by which economies, cultural practices, national entities, groups, individuals, and personal identities have undergone globalization. General background and methodological tools for understanding problems and processes of globalization.

Repeatability: Unlimited as topics vary.

### **GLBLCLT 103B. Global Cultures II . 4 Units.**

Introduction to the processes by which economies, cultural practices, national entities, groups, individuals, and personal identities have undergone globalization. Explores how globalization has manifested itself in specific topics, periods, or societies.

Repeatability: Unlimited as topics vary.

### **GLBLCLT 105. Language Origins: Evolution, Genetics, and the Brain. 4 Units.**

Examines how human language(s) may have originated. Studies pertinent techniques (reconstruction) and addresses related questions, including is our language faculty inborn (i.e., genetically encoded)? Can brain imaging and population genetics research help to unlock this mystery of human evolution?.

Same as ANTHRO 152A, LSCI 175, HISTORY 135G.

**GLBLCLT 191. Senior Seminar:Topics in Global Cultures. 4 Units.**

Students explore a topic(s) concerning processes and/or problems of globalization from an interdisciplinary perspective and build on their critical and analytical skills when investigating cultural and other phenomena that cut across national borders. Research assignments, class presentations, final seminar paper.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

**GLBLCLT 199. Independent Study. 1-4 Units.**

Directed reading and research in consultation with a faculty advisor. Substantial written work required.

Repeatability: May be repeated for credit unlimited times.

## Global Cultures, B.A.

Global Cultures is an innovative undergraduate major in the School of Humanities with an exciting mission: to explore the problems and processes of globalization from a humanistic perspective. The major provides students with 21st century analytical skills and knowledge that is critical to understanding the complexities of the diverse world in which we live. In the process, Global Cultures equips students with the knowledge and tools that lead to successful careers in a wide range of professions and fields.

Global Cultures faculty offer high-quality lectures and, in advanced courses, interactive small group seminars. The major favors a multidisciplinary approach that draws on multiple departments and programs, housed in both the Humanities (including Art History, English, Film and Media Studies, History, Philosophy, Religious Studies, Spanish and Portuguese, and many more) and the Social Sciences (Anthropology, Chicano/Latino Studies, Political Science, Sociology, among others).

Up-to-date examples of the highly diverse courses taught in the major may be found at the Global Cultures website ([http://www.humanities.uci.edu/global\\_cultures/](http://www.humanities.uci.edu/global_cultures/)). The curricular offerings of Global Cultures are extraordinarily broad. With this intellectually stimulating learning environment, the major attracts students from a wide range of backgrounds. Global Cultures faculty provide these students with a critical understanding and a strong foundation for practice in a variety of occupations, both domestic and international.

Students majoring in Global Cultures must choose a primary emphasis and a secondary emphasis from the list that can be found by clicking the major tab. Each emphasis essentially consists of a geographic focus. Students may also design their own emphasis in consultation with a program advisor and with the approval of the Global Cultures Committee. All emphases are chosen in consultation with a faculty advisor and/or the approval of the Global Cultures Committee. Examples of how current students are combining their primary and secondary emphases are available at the Global Cultures website. ([http://www.humanities.uci.edu/global\\_cultures/](http://www.humanities.uci.edu/global_cultures/))

The major requires a total of 14 courses. Six of these courses are specific, and eight are electives (see below). Students are encouraged to augment their foreign language competence beyond the School minimum. Participation in the UC Education Abroad Program is strongly recommended for all Global Cultures majors.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Requirements for the Major

A. Complete the following:

HISTORY 21A	World: Innovations
HISTORY 21B	World: Empires and Revolutions
HISTORY 21C	World: Nation, War, and Rights

B. Complete the following:

GLBLCLT 103A	Global Cultures I
GLBLCLT 103B	Global Cultures II

C. Complete the following:

GLBLCLT 191	Senior Seminar:Topics in Global Cultures
-------------	--

D. Select seven upper-division courses from an approved list. <sup>1</sup>

E. Select one additional upper- or lower-division course from an approved list. <sup>2</sup>

<sup>1</sup> Five of the courses must focus on one emphasis and two on a second emphasis chosen from the approved course lists on the Global Cultures website ([http://www.humanities.uci.edu/global\\_cultures/](http://www.humanities.uci.edu/global_cultures/)). Quarterly consultation with a faculty advisor is also required.

<sup>2</sup> The selected course must focus on the primary or secondary emphasis chosen from the approved course lists on the Global Cultures website ([http://www.humanities.uci.edu/global\\_cultures/](http://www.humanities.uci.edu/global_cultures/)).

Students are encouraged to augment their language other than English competence beyond the School minimum. Participation in the UC Education Abroad Program is strongly recommended for all Global Cultures majors.

**Residence Requirement for the Major:** At least five upper-division courses required for the major must be completed successfully at UCI. By petition, two of the five may be taken through the UC Education Abroad Program, provided that course content is approved—usually in advance—by the Director of the Global Cultures Program.

**Hispanic, U.S. Latino/Latina, and Luso-Brazilian Cultures:** Examines the historical, political, and cultural formations of regions where Spanish and Portuguese are spoken, including Spain, Portugal, Spanish- and Portuguese-speaking countries in the Western Hemisphere, and the Latino/Latina population in the United States.

**Africa (Nation, Culture) and Its Diaspora:** Examines Africa as a diverse geographical and political expression, including its historical, political, and cultural formation locally, regionally, and globally.

**Asia (Nation, Culture) and Its Diaspora:** Examines Asia as a diverse geographical and political expression, including its historical and cultural formation locally, regionally, and globally.

**Europe and Its Former Colonies:** Examines Europe and its former colonies as a diverse geographical and political expression, including its historical and cultural formation locally, regionally, and globally.

**Global Middle East:** Examines the people and cultures of North Africa and the Arab world, Turkey and Iran, as well as their relationship with other regions such as sub-Saharan Africa, Central and South Asia, and the broader Muslim diaspora in Europe and the Americas.

**Atlantic Rim:** Explores the movement of people and cultures in relationship to the historical and contemporary experience of societies that are adjacent to the Atlantic Ocean, including, among others, west Africa, the Americas, the Caribbean, and western and northern Europe, as well as the British archipelago.

**Pacific Rim:** Explores the movement of people and cultures in relationship to the historical and contemporary experience of societies that are adjacent to the Pacific Ocean, including, among others, India, China, Japan, Korea, Vietnam, the United States, Central and South America, and Malaysia.

**Inter-Area Studies:** Includes comparative studies of the geographical regions outlined in the above six emphases, for instance, the analysis of Africans in Asia, or the cultural, historical, and political connections between the Atlantic and the Pacific Rim.

Students may also design their own emphasis by combining two or more regional emphases in a non-traditional fashion. For instance, a student may wish to study what is known as “Creole” (oral) literatures, found in multiple locations in Africa, Asia, and the Americas.

Students are encouraged to study abroad, and may be able to satisfy a significant portion of their major requirements abroad. For maximum number of courses allowed and other pertinent details, visit the Global Cultures website. ([http://www.humanities.uci.edu/global\\_cultures/](http://www.humanities.uci.edu/global_cultures/))

All courses taken abroad must be approved. Course approval typically involves the following: (1) presentation of syllabi and other pertinent course materials (term papers, exams, etc.) from the foreign host university, and (2) submission of a UCI Humanities Petition form (available online, and to be completed after student's return to UCI) to the Undergraduate Director of the Program in Global Cultures, and to the Office of Undergraduate Study. Students are advised to consult with the Humanities Office of Undergraduate Study (HIB 143) and the Global Cultures Director both before and after their stay abroad. NOTE: See also the residence requirement in the major and minor.

The major prepares students particularly well for careers in all fields in which analysis, judgment, argument, and a wide (global) rather than narrow perspective are important. The Global Cultures major equips students with a knowledge that is critical to understanding the complexities of the diverse world in which we live.

The following careers are especially well-suited for Global Cultures majors: business (national as well as international), law, management, education (primary and secondary teaching), politics, public policy, academia, print media, television, foreign service, tourism, travel industry, and graduate studies in a wide variety of fields (business, law, education, public policy, and others).

The UCI (<http://career.uci.edu/>) Division of Career Pathways provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on résumé preparation, job search, and interview techniques.

## Global Cultures, Minor

Global Cultures is an innovative undergraduate minor in the School of Humanities with an exciting mission: to explore the problems and processes of globalization from a humanistic perspective.

Students minoring in Global Cultures must choose a primary emphasis and a secondary emphasis from the list. Each emphasis essentially consists of a geographic focus. Students may also design their own emphasis in consultation with a program advisor and with the approval of the Global Cultures Committee. All emphases are chosen in consultation with a faculty advisor and are subject to the approval of the Global Cultures Committee or the

Program Director. Examples of how current students are combining their primary and secondary emphases are available at the Global Cultures website. ([http://www.humanities.uci.edu/global\\_cultures/](http://www.humanities.uci.edu/global_cultures/))

## Requirements for the Minor in Global Cultures

### Departmental Requirements

A. Select two of the following:

HISTORY 21A	World: Innovations
HISTORY 21B	World: Empires and Revolutions
HISTORY 21C	World: Nation, War, and Rights

B. Complete the following:

GLBLCLT 103A	Global Cultures I
GLBLCLT 103B	Global Cultures II

C. Select three upper-division courses from one emphasis.<sup>1</sup>

D. Select one upper-division course from a second emphasis.<sup>1</sup>

<sup>1</sup> List of emphases can be found on the major tab.

**Residence Requirement for the Minor:** A minimum of four upper-division courses required for the minor must be completed successfully at UCI. Two of the four may be taken through the UC Education Abroad Program, providing course content is approved in advance by the appropriate department chair.

**Emphases and Approved Courses:** The lists of approved courses are extensive and vary from quarter to quarter, depending upon course scheduling. For complete up-to-date information, consult the Global Cultures website. ([http://www.humanities.uci.edu/global\\_cultures/](http://www.humanities.uci.edu/global_cultures/))

**Hispanic, U.S. Latino/Latina, and Luso-Brazilian Cultures:** Examines the historical, political, and cultural formations of regions where Spanish and Portuguese are spoken, including Spain, Portugal, Spanish- and Portuguese-speaking countries in the Western Hemisphere, and the Latino/Latina population in the United States.

**Africa (Nation, Culture) and Its Diaspora:** Examines Africa as a diverse geographical and political expression, including its historical, political, and cultural formation locally, regionally, and globally.

**Asia (Nation, Culture) and Its Diaspora:** Examines Asia as a diverse geographical and political expression, including its historical and cultural formation locally, regionally, and globally.

**Europe and Its Former Colonies:** Examines Europe and its former colonies as a diverse geographical and political expression, including its historical and cultural formation locally, regionally, and globally.

**Global Middle East:** Examines the people and cultures of North Africa and the Arab world, Turkey and Iran, as well as their relationship with other regions such as sub-Saharan Africa, Central and South Asia, and the broader Muslim diaspora in Europe and the Americas.

**Atlantic Rim:** Explores the movement of people and cultures in relationship to the historical and contemporary experience of societies that are adjacent to the Atlantic Ocean, including, among others, west Africa, the Americas, the Caribbean, and western and northern Europe, as well as the British archipelago.

**Pacific Rim:** Explores the movement of people and cultures in relationship to the historical and contemporary experience of societies that are adjacent to the Pacific Ocean, including, among others, India, China, Japan, Korea, Vietnam, the United States, Central and South America, and Malaysia.

**Inter-Area Studies:** Includes comparative studies of the geographical regions outlined in the above six emphases, for instance, the analysis of Africans in Asia, or the cultural, historical, and political connections between the Atlantic and the Pacific Rim.

Students may also design their own emphasis by combining two or more regional emphases in a non-traditional fashion. For instance, a student may wish to study what is known as "Creole" (oral) literatures, found in multiple locations in Africa, Asia, and the Americas.

## Undergraduate Program in Religious Studies

**Susan Klein, Director**

400 Murray Krieger Hall

949-824-6735

[http://www.humanities.uci.edu/religious\\_studies/](http://www.humanities.uci.edu/religious_studies/)

Religious Studies includes an interdisciplinary major and minor that focus on the comparative understanding of the various ways different peoples, across space and through time, have developed their religious ideas, values, systems, beliefs, rituals, and traditions in response to fundamental questions of human existence. The curriculum seeks to provide a wide-ranging academic understanding and knowledge of the religious experience in

society through study in the Schools of Humanities, Social Sciences, Social Ecology, and the Claire Trevor School of the Arts. As an interdisciplinary academic discipline, the study of religion offers a rigorous, systematic, and dispassionate intellectual inquiry into various aspects of religious systems, their practitioners and outlooks, and their goals and expressions. It employs a wide variety of approaches and methods in order to understand the role of religion in both human experience and thought.

Students in the Religious Studies major complete an emphasis either in World Religious Traditions or, more particularly, in Judaism/Christianity/Islam.

## Categories and Approved Courses

The complete list of approved courses varies from quarter to quarter, depending upon course scheduling. For complete up-to-date information on approved courses, please consult the Religious Studies website ([http://www.humanities.uci.edu/religious\\_studies/](http://www.humanities.uci.edu/religious_studies/)).

- Religious Studies, B.A.
- Religious Studies, Minor

## Courses

### REL STD 5A. World Religions I. 4 Units.

An introduction to the history, doctrine, culture, and writing of Judaism, Christianity, and Islam.

Same as HISTORY 16A.

(IV and VIII ).

### REL STD 5B. World Religions II. 4 Units.

An introduction to various religious traditions in selected areas of the world—including India and South Asia, East Asia, Africa, and the Americas.

Same as HISTORY 16B.

(IV and VIII ).

### REL STD 5C. Religious Dialogue. 4 Units.

Lectures and discussion on controversial topics in religion: sexual morality; religious violence; science; treatment of women and girls; religious truth, American Constitutional matters; secularization; the future of religion, and other topics.

Same as HISTORY 16C.

(IV, VIII)

### REL STD 17. An Economic Approach to Religion. 4 Units.

Introduction to how basic economic concepts such as demand, supply, consumption, production, competition, free-riding, innovation, regulation, and rent-seeking can be applied to understand observed religious behavior.

Same as ECON 17.

(III)

### REL STD 21. Philosophy and Religion. 4 Units.

Examines the intersection of religion and philosophy from a standpoint that does not presuppose previous academic study of either. Both Western and Eastern traditions and perspectives may be explored.

Repeatability: Unlimited as topics vary.

Same as PHILOS 21.

(IV)

### REL STD 61. Gender and Religion. 4 Units.

Introduces the topic of religion in a feminist context by performing cross-cultural exploration of gender, authority, and faith in various traditions. Study includes (but is not limited to) writings of contemporary Jewish, Christian, and Muslim feminists.

Same as GEN&SEX 60C.

(III and VIII ).

**REL STD 90. Aspects of Religion. 4 Units.**

A presentation of selected issues in the study of religion.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 91. Topics in Aspects of Asian Religions. 4 Units.**

A survey course of a specific Asian religious tradition such as Hinduism, Buddhism, Jainism, Sikhism, Daoism, Confucianism, or Shinto in its manifestation in Asia or in its transmission to the Americas.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 100. Topics in the Study of Religion. 4 Units.**

The intersection of religious belief and practices with selected subjects of continuing interest.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 103. Topics in the Philosophy of Religion. 4 Units.**

Critical examination of philosophical concepts in religious scripture and theology, e.g., the nature and existence of God, miracles, the problem of evil, and divine command theories in ethics. May include any religious tradition.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 106. Topics in Gender and Religion. 4 Units.**

Critical examination of how religious beliefs and practices have shaped (and been shaped by) attitudes toward gender and sexuality in modern and/or premodern society.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 110. Thinking about Religion: Theories and Methodologies. 4 Units.**

A survey and investigation of the major thinkers, theories, and methodologies in the study of religions. Designed to develop the student's ability to analyze and articulate theoretical arguments; includes a paper on relevant Religious Studies topics.

Prerequisite: (REL STD 5A or HISTORY 16A) and (REL STD 5B or HISTORY 16B) and (REL STD 5C or HISTORY 16C)

Overlaps with REL STD 110W.

Restriction: Religious Studies Majors have first consideration for enrollment.

**REL STD 110W. Thinking about Religion: Theories and Methodologies. 4 Units.**

A survey and investigation of the major thinkers, theories, and methodologies in the study of religions. Designed to develop the student's ability to analyze and articulate theoretical arguments in writing; includes a paper on relevant Religious Studies topics.

Prerequisite: (REL STD 5A or HISTORY 16A) and (REL STD 5B or HISTORY 16B) and (REL STD 5C or HISTORY 16C). Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with REL STD 110.

Restriction: Religious Studies Majors have first consideration for enrollment.

**(Ib)**

**REL STD 115. Religion and World Politics. 4 Units.**

Examines the relationship between religion and world politics historically and today, focusing on connections with peace/war, democracy, human rights, secularism(s), and globalization. Covers major debates, scholarship, concepts, and theories through class exercises, exams, and essays.

Prerequisite: POL SCI 41A or INTL ST 11 or INTL ST 12 or REL STD 5A or REL STD 5B or REL STD 5C

Same as POL SCI 146B, INTL ST 151B.

**REL STD 120. Topics in Asian Religious Traditions. 4 Units.**

Studies involving (but not limited to) Hinduism, Buddhism, Confucianism, Jainism, Sikhism, Daoism, Shinto or Shamanism, including both elite and doctrinal aspects and forms of more popular religiosity.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 122. Ancient India. 4 Units.**

Examines the visual and religious history of the region defined as 'India' today, but necessarily encompassing modern Bangladesh and Pakistan. Culminates with the supposed Golden Age of the Gupta empire and its far-reaching legacies.

Same as HISTORY 170A, ART HIS 155A.

Concurrent with ART HIS 255A.

**REL STD 123. Medieval India. 4 Units.**

Begins with the Gupta period's aesthetic legacies in South Asia's architecture, sculpture, and painting. Explores the dispersal of Islam throughout South Asia, including the Muslim communities of southern India.

Same as HISTORY 170B, ART HIS 155B.

Concurrent with ART HIS 255B.

**REL STD 124. Topics in Modern Indian Religion. 4 Units.**

Topics in religions of the Indian subcontinent including, but not confined to, Hinduism, Jainism, Sikhism, Islam, and Buddhism from the founding of the Mughal Empire in 1526 to the creation of the several modern states of the Indian subcontinent.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 130. Jewish, Islamic, and Middle Eastern Religious Traditions. 4 Units.**

Character and evolution of Egyptian, Jewish, Zoroastrian, Muslim, and other religious communities of the region from their formative periods to the present era.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 130F. Jews and Power. 4 Units.**

Examines the relationship between the Jewish people and political power over a 3500 year period. How have Jews preserved their communal interests and personal safety? How have they defined the proper relationship of the people to political authority.

Same as HISTORY 130F, POL SCI 154J.

**REL STD 131A. History of Zoroastrianism. 4 Units.**

Reviews major trends in the history of Zoroastrianism.

Same as HISTORY 131A.

**REL STD 140. Early Western Religious Traditions. 4 Units.**

Religious perspectives of the Mediterranean and European regions from the earliest times to approximately 1500 C.E.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 141. Recent Western Religious Traditions. 4 Units.**

Studies related to Catholic, Protestant, and Orthodox Christianity as well as alternative belief systems in Europe of the early modern and modern eras.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 150. Religion in the Americas. 4 Units.**

Religious belief and social context in North and South America from the earliest human societies to the present.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 160. Diaspora Religions. 4 Units.**

Examination of what happens to belief and practice as religious communities are scattered geographically.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 170. Topics in Comparative Studies in Religion. 4 Units.**

Literary, historical, or philosophical comparison of selected religious and quasi-religious traditions, their beliefs and practices.

Repeatability: May be taken for credit 3 times as topics vary.

**REL STD 199. Independent Study. 1-4 Units.**

Directed reading and research in consultation with a faculty member. Substantial written work required.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.

**REL STD 399. University Teaching . 4 Units.**

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Religious Studies, B.A.

The Religious Studies major includes an interdisciplinary focus on the comparative understanding of the various ways different peoples, across space and through time, have developed their religious ideas, values, systems, beliefs, rituals, and traditions in response to fundamental questions of human existence. The curriculum seeks to provide a wide-ranging academic understanding and knowledge of the religious experience in society through study in the Schools of Humanities, Social Sciences, Social Ecology, and the Claire Trevor School of the Arts. As an interdisciplinary academic discipline, the study of religion offers a rigorous, systematic, and dispassionate intellectual inquiry into various aspects of religious systems, their practitioners and outlooks, and their goals and expressions. It employs a wide variety of approaches and methods in order to understand the role of religion in both human experience and thought.

Students in the Religious Studies major complete an emphasis either in World Religious Traditions or, more particularly, in Judaism/Christianity/Islam.

### Categories and Approved Courses

The complete list of approved courses varies from quarter to quarter, depending upon course scheduling. For complete up-to-date information on approved courses, please consult the Religious Studies website ([http://www.humanities.uci.edu/religious\\_studies/](http://www.humanities.uci.edu/religious_studies/)).

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

#### Requirements for the Major

A. Complete:

REL STD 5A	World Religions I
REL STD 5B	World Religions II
REL STD 5C	Religious Dialogue
REL STD 110 or REL STD 110W	Thinking about Religion: Theories and Methodologies

B. Select six upper-division electives, two in each of the following categories: <sup>1</sup>

1. Judaism/Christianity/Islam
2. World Religious Traditions
3. Thematic Approaches to Religion

C. Select two additional upper-division courses from either category 1 or 2 above in order to complete an emphasis in Judaism/Christianity/Islam or in World Religious Traditions.

<sup>1</sup> Selected from the approved lists published on the Religious Studies website ([http://www.humanities.uci.edu/religious\\_studies/](http://www.humanities.uci.edu/religious_studies/)). One relevant lower-division course may be substituted for an upper-division course, with prior approval.

**Studying Abroad:** Students are encouraged to study abroad and may be able to satisfy a significant portion of their requirements abroad. Courses taken abroad must be approved by the Director of Religious Studies in order to be applied toward major requirements.

**Residence Requirement for the Major:** A minimum of five upper-division courses required for the major must be completed successfully at UCI.

Majoring in Religious Studies is an excellent preparation for living in a multicultural society and for a variety of careers in counseling, teaching, commerce, writing, government, the arts, and professional religious leadership. The major's emphasis on broad understanding, critical thinking skills, and clear written expression provides an effective springboard for graduate study in the humanities and social science or professional schools in medicine, law, or business.

The UCI Division of Career Pathways provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques. See the UCI D (<http://career.uci.edu/>) Division of Career Pathways website (<http://career.uci.edu/>) for additional information.

## Religious Studies, Minor

The curriculum of our major and minor seeks to provide understanding and knowledge of the religious experience in society through relevant study in the Schools of Humanities, Social Sciences, Social Ecology, and the Arts. It employs a wide variety of approaches and methods in order to comprehend in the broadest sense the role of religion and its relationship to other significant human factors. Note that our faculty encourages students to take at least some of the courses for the major or minor at universities abroad, either through the University of California's Education Abroad Program, or independently.

### Requirements for the Minor

A. Complete:

REL STD 5A	World Religions I
REL STD 5B	World Religions II
REL STD 5C	Religious Dialogue
REL STD 110 or REL STD 110W	Thinking about Religion: Theories and Methodologies

B. Four upper-division electives selected from the three categories under B in the B.A. in Religious Studies, including at least one course from both categories 1 and 2. Two of the four courses must be outside of the student's major. One relevant lower-division course may be substituted for an upper-division course, with prior approval.

**Residence Requirement for the Minor:** Four upper-division courses required for the minor must be completed successfully at UCI. Two of the four may be taken through the UC Education Abroad Program, provided course content is approved by the Director of the Religious Studies program.

# School of Law

---

## L. Song Richardson, Dean

General Information

<http://www.law.uci.edu/>

[law@uci.edu](mailto:law@uci.edu)

The University of California, Irvine, School of Law offers the Juris Doctor (J.D.) degree through an innovative curriculum that includes in-depth study of legal doctrine, emphasizes experiential learning and clinical experience, and provides the professional training in lawyering skills necessary for the practice of law at the highest level of the profession. A hallmark of the School is that every student is required to have a clinical experience or equivalent in order to graduate.

The University of California, Irvine, School of Law offers the Master of Laws (LL.M.) degree program. The LL.M. program offers a first-rate legal education to lawyers, judges, government officials and others wishing to become educated about the legal system and practice of law in the United States. We offer a general LL.M. program that can be tailored to each individual's interests, thus uniquely equipping students with the knowledge and skills to excel in today's global legal community, whatever their personal and professional goals may be.

Notably, the School of Law also participates in the UC Irvine Program in Law and Graduate Studies, a concurrent degree program that enables qualified students to pursue a doctoral or master's degree in a cognate field at the same time they are pursuing their law degree. Several current students, for example, are pursuing concurrent J.D./Ph.D. degrees, J.D./M.A. degrees, or J.D./M.B.A. degrees.

The School of Law builds on UC Irvine's existing strengths in emerging technology, social policy, international business, environmental science and policy, health care, and other fields to produce leaders in law, government, and business for the 21st century. UC Irvine Law graduates are encouraged to pursue careers in public service, including non-governmental organizations and philanthropic agencies. The School works aggressively to place students on their chosen career path whether that be with a private law firm, public interest or legal services office, government agency, and/or in a judicial clerkship. A wide array of employers from both the public and private sectors come to interview students on campus for summer positions and externships.

UC Irvine School of Law is fully accredited by the American Bar Association. It seeks to enroll outstanding students who reflect a wide diversity of life experiences. Further information about admission requirements, application deadlines, tuition and fees, and curriculum is updated regularly on the School of Law website (<http://www.law.uci.edu/>).

In addition, concurrent degree study (J.D./Ph.D. and J.D./Master's) is available under the auspices of UC Irvine's Program in Law and Graduate Studies, which is described later in the School of Law section.

## First-Year Curriculum

UCI School of Law has an innovative curriculum designed to prepare students for the practice of law at the highest levels of the profession. Traditional areas of legal doctrine are covered in the first year, but in a novel way that focuses on training students in five methods of legal analysis: statutory, common law, procedural, constitutional, and international. The course on Statutory Analysis, for example, uses criminal law as the vehicle for teaching students to read and interpret statutes.

One of UCI's signature first-year courses, Legal Profession, exposes students to the economics, sociology, and psychology of a legal career. The course also emphasizes professional ethics. Panels of attorneys from a wide range of practice areas speak to students throughout the year about ethical dilemmas they confront as well as their work and careers.

Throughout both the first-year and upper-level curriculum there is great emphasis on incorporating skills training into traditional classes. The first-year Legal Skills class teaches fact investigation, interviewing, legal writing and analysis, extensive legal research, negotiation and oral advocacy. In addition, all first-year students are assigned a lawyer mentor and are required to spend a specified number of hours observing that lawyer at work.

UCI has an active pro bono program in which students engage in volunteer legal work on behalf of underserved populations as early as their first year.

All first-year students enroll in the courses below. Additional information is available at the School of Law Curriculum website (<http://www.law.uci.edu/academics/curriculum.html>).

**Common Law Analysis: Contracts (4).** This course will focus primarily on the common law of contracts to teach this method of analysis, in which the law is derived from judicial decisions rather than statutes or the Constitution.

**Statutory Analysis (3).** This course will use criminal law as a basis for teaching students the methods employed in all areas of law for analyzing statutes.

**Procedural Analysis (4).** This course will use civil procedure as the foundation for teaching students about areas of law in which there are procedural rules, and how analysis and arguments are made in such contexts.

**Lawyering Skills I (3).** This course, which will be part of both semesters, will focus on teaching skills that all lawyers use, such as fact investigation, interviewing, legal writing and analysis, legal research, negotiation and oral advocacy.

**Legal Profession I (2).** This course, which will be part of both semesters, is designed to prepare students to chart rewarding and responsible careers in law. Drawing from various disciplines, including economics, history, sociology, and psychology, we will teach students about the variety of practice settings in which lawyers work and the professional opportunities and challenges of each.

**Common Law Analysis: Torts (4).** This course will use torts as a way of further examining the common law, and how lawyers reason and develop arguments in this area.

**Constitutional Analysis (4).** This course will teach students basic areas of constitutional law such as separation of powers, federalism, and individual liberties. It will focus on how constitutional arguments are made, and how courts and lawyers analyze constitutional issues.

**International Legal Analysis (3).** This course will introduce students to international law and the ways that analyses in this area are similar to and different from analysis in other areas of law.

**Lawyering Skills II (3).** In the spring semester of this two-semester course, all students will gain experience in a legal clinic setting, where they will conduct intake interviews of actual clients at one or more legal services organization such as: The Learning Rights Center of Los Angeles, the Legal Aid Foundation of Los Angeles, the Legal Aid Society of Orange County, the Public Law Center, the United States Marines Corp Base at Camp Pendleton, and the UCI Consumer Protection Clinic.

**Legal Profession II (2).** Continuation of fall semester course.

**Legal Research (1).** This course prepares students to take on varied and challenging research assignments typically encountered at school and in the workplace.

## Upper-Level Courses

Below is an overview of the upper-level courses taught at UC Irvine School of Law. Not every course will be offered each year, and additional courses not listed may be offered. Additional information is available at School of Law Curriculum website (<http://www.law.uci.edu/academics/curriculum.html>). Course descriptions, content, and requirements are subject to change.

### General Courses

Administrative Law  
Business Associations  
Constitutional Law: First Amendment  
Criminal Procedure

Evidence  
Federal Courts  
Federal Criminal Law  
Federal Income Taxation  
Property  
Remedies  
The Federal Judge

### **Business Law**

Accounting and Finance for Lawyers  
Advanced Legal Writing: Business Drafting  
Antitrust  
Antitrust Law & IP Rights  
Bankruptcy Law  
Business and Economics of Law Firm Practice  
Business and Regulation of Fund Investors  
Business Torts  
Commercial Transactions  
Corporate Finance  
Insurance Law and Policy  
Investment Management Regulation  
Law and Theory Relating to the 2008 Financial Crisis  
Mergers and Acquisitions  
Organizations, Operations, and Tax Aspects of Public Charities and Private Foundations  
Public Companies  
Representing Business Clients  
SEC Enforcement Process  
Secured Credit  
Securities Regulation  
Statistics for Lawyers

### **Colloquium**

Writing for Publication in the Law Review  
Advanced Writing for Publication in the Law Review

### **Criminal Law**

Advanced Criminal Law, Practice, & Procedure  
Memory & The Law  
Documents and Artifacts in Socio-Legal Research  
Topics in White Collar Crime

### **Employment Law**

Employment Discrimination Law  
Employment Law  
Labor Law

### **Entertainment Law**

Entertainment Law  
Sports Law

### **Family Law**

Children and the Law  
Community Property  
Family Law  
Gifts, Wills, and Trusts  
Advocating for Vulnerable Children: From Foster Care to Juvenile Justice

### **Intellectual Property**

Copyright Law  
Digital Copyright Law  
Cross-Border Trade in IP  
Intellectual Property Law

Patent Law  
Technical Protection of Author's Rights  
Trademark and Unfair Competition Law

**International and Comparative Law**

China Law  
Comparative Law  
International Business Transactions  
International Contracts  
International Environmental Law  
International Human Rights Law  
International Trade Law  
Islamic Law  
Japanese Law  
Jewish Law  
Korean Law

**Law and Medicine**

Biomedical Ethics  
Drug Discovery, Development & Commercialization  
Health Care Law  
Reproductive Technologies

**Perspective Courses**

American Legal History  
Cause Lawyering  
Spanish for Lawyers  
Conflict of Laws  
Critical Race Theory  
Feminist Jurisprudence and the Law  
Human Rights & Protest in 20th and 21st Century China  
Jurisprudence  
Law and Economics  
Law and Literature  
Law and Social Movements  
Race and the Law  
Sexual Orientation and the Law

**Procedural Courses**

Arbitration  
Civil Rights Litigation  
Complex Litigation  
Conflicts of Law  
Dispute Resolution  
Negotiations and Mediation

**Public Law**

Animal Law  
Civil Rights Law  
Education Law  
Election Law  
Federal Public Land and Natural Resources Law  
Race and the Law  
Environmental Law  
Immigration Law  
Land Use and Development Control Law  
Legislation  
Local Government Law  
Organizations, Operations and Tax Aspects of Public Charities and Private Foundations  
Media Law  
National Security Law  
Natural Resources Law

Poverty Law  
Regulatory Design and Innovation  
White Collar Crime

### **Real Estate Law**

Land Use Law  
Real Estate Transactions

### **Skills Courses**

Advanced Legal Research  
Advanced Legal Writing  
Global Justice Summit  
Appellate Litigation  
Appellate Advocacy  
Negotiations  
Spanish for Lawyers  
Trial Advocacy

### **Tax Law**

Basic Tax  
Corporate Tax  
Estate and Gift Taxation  
Partnership & LLC Taxation  
Taxation of Business Enterprises

### **Clinical/Externships**

Appellate Litigation Clinic  
Advanced Community & Economic Development Clinic  
Advanced Environmental Law Clinic  
Advanced International Human Rights Clinic  
Advanced Immigrant Rights Clinic  
Advanced Consumer Protection Clinic  
Advanced Domestic Violence Clinic  
Advanced International Justice Clinic  
Civil Rights Litigation Clinic  
Community & Economic Development Clinic  
Consumer Protection Clinic  
Domestic Violence Clinic  
Environmental Law Clinic  
Fair Employment & Housing Clinic  
Immigrant Rights Clinic  
Intellectual Property, Arts & Technology Clinic  
International Human Rights Clinic  
International Justice Clinic  
Reproductive Justice Clinic  
Veterans Clinic  
Externships

## **Program in Law and Graduate Studies (J.D./Ph.D.; J.D./Master's)**

**Shauhin Talesh, Director**

949-824-9214

<http://www.law.uci.edu/academics/interdisciplinary-studies/concurrent-degrees.html>

stalesh@law.uci.edu (ctomlins@law.uci.edu)

Highly-qualified students interested in combining the study of law with graduate research and/or professional qualifications in cognate disciplines are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Master's or Ph.D. degree from any of the graduate professional or research degree programs at UCI that have been approved for this concurrent degree program. The objective of the program is to promote interdisciplinary study of law while also enabling students to obtain both a J.D. and a graduate degree in less time than would be required to acquire both degrees separately. The normative time for completion of the program is four years for J.D./Master's combinations and seven years for

J.D./Ph.D. combinations. Additional information is available from the PLGS Program Director's Office, 949-824-4158, or by email to [plgs@law.uci.edu](mailto:plgs@law.uci.edu). A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Program website (<http://www.law.uci.edu/academics/interdisciplinary-studies/concurrent-degrees.html>).

UC Irvine's PLGS program is well suited to students interested in professional or academic careers focused on the interdisciplinary or multidisciplinary study of law and legal institutions, policy analysis, and/or applied research in law-related fields (for example, criminal justice and criminology, urban planning and environmental issues, discrimination, human rights, urban planning, environmental protection, and intellectual property). UC Irvine is nationally known for its graduate programs in such fields as Criminology, Law and Society; Psychology and Social Behavior; Anthropology; Management and Business; Literature; History; Performing Arts; and others.

Applicants must submit separate applications for admission to the School of Law and to the graduate program of their choice. Once admitted for study into both components of their program, concurrent degree students will work with the PLGS director and the director of their graduate program to develop a program of study that will permit efficient pursuit of both degrees. Ordinarily, students will commence their studies in their chosen graduate program and begin their first year of law instruction after one or more years of graduate program study. Upon completion of the first year of law instruction, students will pursue a coordinated curriculum of upper-level law study and graduate program study and research. Concurrent degree students' law enrollments will include a required "Graduate Legal Studies" colloquium and a 3-unit "Interdisciplinary Perspectives on Law" course or its equivalent. Concurrent degree students will be eligible for financial support through their chosen graduate program while pursuing graduate degree studies, and through the law school while pursuing law studies.

## Required Colloquium

**University Studies 296 Graduate Legal Studies (.3).** Monthly faculty/student colloquium to present and discuss socio-legal related research/issues. Course convened by Law School faculty with other faculty participation. Open to graduate students and Law students; required for PLGS students enrolled in Law portion of degree. Satisfactory/Unsatisfactory only. May be repeated for credit as topics vary.

**Law 5655 Interdisciplinary Perspectives on Law.** This course is a reading and discussion seminar. Students will read a book each week. For the first class, students will read the book and come to class prepared to discuss it. For the second class each student will write a 750-word critique (analytic precis) of the book; discussion of the book will continue in that class. The seminar will be organized into four roughly equal segments. The first will present four quite distinct accounts of law—law as education, as ideology, as politics, and as organized activism. The second will consider several distinct scholarly perspectives on law—cultural, rhetorical, sociological. The third will examine applications of interdisciplinarity to legal studies—of property, recording media, citizenship, and emergency politics. The fourth will continue 'applications' and conclude the course by comparing two rather different studies of law and death.

## Faculty

Josh D. Blank, J.D. Harvard Law School, LL.M. New York University School of Law, *Professor of School of Law*

Dan L. Burk, J.D. Arizona State University, *UCI Chancellor's Professor of School of Law*

Alejandro E. Camacho, J.D., LL.M. Harvard University, Georgetown University, *Professor of School of Law; Political Science*

Elizabeth E. Cauffman, Ph.D. Temple University, *Professor of Psychological Science; Criminology, Law and Society; Education; School of Law* (adolescent development, mental health, juvenile justice, legal and social policy)

Simon A. Cole, Ph.D. Cornell University, *Professor of Criminology, Law and Society; History; School of Law* (science, technology, law, criminal justice)

Rachel E. Croskery-Roberts, J.D. University of Michigan, *Clinical Professor of Law of School of Law*

Joseph DiMento, Ph.D. University of Michigan, *Professor of School of Law; Criminology, Law and Society; Paul Merage School of Business; Urban Planning and Public Policy*

Victor Fleischer, J.D. Columbia Law School, *Professor of School of Law*

Bryant G. Garth, J.D. Stanford University, *Senior Associate Dean of Academic Affairs and Vice Dean and UCI Chancellor's Professor of School of Law*

Howard A. Gillman, Ph.D. University of California, Los Angeles, *Chancellor and Professor of Political Science; Criminology, Law and Society; History; School of Law*

Jonathan D. Glater, J.D. Yale University, *Professor of School of Law*

Michele B. Goodwin, J.D. Boston College, *Director, Center for Biotechnology and Global Health Policy and UCI's Chancellor's Professor of School of Law; Criminology, Law and Society; Gender and Sexuality Studies; Program in Public Health*

Michael R. Gottfredson, Ph.D. University at Albany, State University of New York, *Chancellor's Professor of Criminology, Law and Society; School of Law; Sociology* (criminology, juvenile delinquency, crime theory, public policy)

Kaaryn Gustafson, J.D., Ph.D. University of California, Berkeley, *Co-Director, Center on Law, Equality and Race (CLEar) and Professor of School of Law*

Sora Han, Ph.D. University of California, Santa Cruz, *Director of the Graduate Program in Culture and Theory and Associate Professor of Criminology, Law and Society; African American Studies; Culture and Theory; School of Law* (law and popular culture, critical race theory, philosophies of punishment, feminism and psychoanalysis)

Richard L. Hasen, J.D. University of California, Los Angeles, *UCI Chancellor's Professor of School of Law; Political Science*

Jeffrey S. Helmreich, Ph.D. University of California, Los Angeles, *Assistant Professor of Philosophy; School of Law*

Carrie Hempel, J.D. Yale University, *Associate Dean for Clinical Education and Service Learning and Clinical Professor of School of Law*

Paul L. Hoffman, J.D. New York University, *Adjunct Professor of School of Law*

D'lorah Hughes, J.D. Duke University School of Law, *Adjunct Professor of School of Law*

Linda Cohen Jennings, Ph.D. California Institute of Technology, *Professor of School of Law; Economics*

Dalie Jimenez, J.D. Harvard Law School, *Professor of School of Law*

David A. Kaye, J.D. University of California, Berkeley, *Clinical Professor of School of Law*

Sung Eun (Summer) Kim, J.D. Harvard University, *Assistant Professor of School of Law*

Christopher M. Klein, J.D. University of Chicago, *Lecturer of School of Law*

Anne Lai, J.D. New York University, *Assistant Clinical Professor of School of Law*

Stephen Lee, J.D. University of California, Berkeley, *Professor of School of Law; Asian American Studies*

Jack I. Lerner, J.D. Harvard University, *Clinical Professor of School of Law*

Christopher R. Leslie, J.D. University of California, Berkeley, *UCI Chancellor's Professor of School of Law*

Leah Litman, J.D. University of Michigan Law School, *Assistant Professor of School of Law*

Elizabeth F. Loftus, Ph.D. Stanford University, *UCI Distinguished Professor of Psychological Science; Cognitive Sciences; Criminology, Law and Society; School of Law* (cognitive psychology, human memory, psychology and law)

Mona Lynch, Ph.D. University of California, Santa Cruz, *Professor of Criminology, Law and Society; School of Law* (law and society, psychology and law, punishment and society, race and criminal justice)

Nicholas J. Marantz, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Urban Planning and Public Policy; School of Law*

Omri Marian, J.D., LL.M. University of Michigan Law School, *Assistant Professor of School of Law*

William M. Maurer, Ph.D. Stanford University, *Dean of the School of Social Sciences and Professor of Anthropology; Criminology, Law and Society; School of Law* (anthropology of law, globalization, Caribbean, anthropology of money and finance, gender and kinship)

Carrie Menkel-Meadow, J.D. University of Pennsylvania, *UCI Chancellor's Professor of Political Science; School of Law*

Alison Mikkor, J.D. New York University School of Law, *Assistant Professor of Lawyering Skills of School of Law*

David K. Min, J.D. Harvard University, *Assistant Professor of School of Law*

Alexandra Natapoff, J.D. Stanford Law School, *Professor of School of Law*

Katherine M. Porter, J.D. Harvard University, *Professor of School of Law*

R. Anthony Reese, J.D. Stanford University, *UCI Chancellor's Professor of School of Law*

Keramet Reiter, Ph.D. University of California, Berkeley, *Associate Professor of Criminology, Law and Society; School of Law* (prisons and extreme punishments, legal history, criminal justice policy, criminal and civil rights law, law and society)

L. Song Richardson, J.D. Yale Law School, *Dean of the School of Law and Professor of School of Law; Asian American Studies*

Michael J. Robinson-Dorn, J.D. Cornell University, *Clinical Professor of School of Law*

Trilby Robinson-Dorn, J.D. Tulane University, *Associate Dean and Professor of School of Law*

Mark Rosenbaum, J.D. Harvard University, *Adjunct Professor of School of Law*

Ezra A. Ross, J.D. Harvard University, *Professor of School of Law*

Nicholas I. Scurich, Ph.D. University of Southern California, *Associate Professor of Psychological Science; Criminology, Law and Society; School of Law* (judgment and decision making, juridical proof, violence risk assessment)

Carroll S. Seron, Ph.D. New York University, *Professor Emerita of Criminology, Law and Society; School of Law* (sociology of law, sociology of professions, law and society, sociology of legal profession, methods and police misconduct)

Gregory Shaffer, J.D. Stanford University, *Director, Center of Globalization, Law and Society and UCI Chancellor's Professor of School of Law; Political Science*

Kenneth W. Simons, J.D. University of Michigan Law School, *UCI Chancellor's Professor of School of Law*

Robert A. Solomon, J.D. George Washington University, *Clinical Professor of School of Law*

Ann Southworth, J.D. Stanford University, *Professor of School of Law; Criminology, Law and Society*

Jane K. Stoeber, J.D. Harvard University, *Clinical Professor of School of Law*

Shauhin A. Talesh, J.D., Ph.D. University of Connecticut, University of California, Berkeley, *Director, Law and Graduate Studies Program and Professor of School of Law; Criminology, Law and Society; Sociology*

William B. Tate, J.D. Stanford University, *Lecturer of School of Law*

Emily Taylor Poppe, J.D. Northwestern University School of Law, *Assistant Professor of School of Law*

William C. Thompson, Ph.D. Stanford University, *Professor Emeritus of Criminology, Law and Society; Psychological Science; School of Law* (psychology and law, criminal justice, forensic science, expert evidence, human judgment and decision making, use of social science in appellate litigation)

Beatrice Tice, J.D. Stanford University, *Associate Dean for LL.M. and International Student Programs and Professor of School of Law*

Katharine Tinto, J.D. New York University, *Assistant Clinical Professor of School of Law*

Grace Tonner, J.D. Loyola Marymount University, *Clinical Professor of Law of School of Law*

Kerry Vandell, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Paul Merage School of Business; School of Law; Urban Planning and Public Policy*

Geoff Ward, Ph.D. University of Michigan, *Associate Professor of School of Law; School of Law*

Jeffrey N. Wasserstrom, Ph.D. University of California, Berkeley, *UCI Chancellor's Professor of History; School of Law* (modern China, protest, world history)

Henry Weinstein, J.D. University of California, Berkeley, *Professor of School of Law*

Christopher A. Whytock, J.D. Georgetown University, *Professor of School of Law; Political Science*

Jessica L. Wimer, J.D. Indiana University, *Associate Dean for the Law Library and Research Professor of School of Law*

## Law (J.D.)

Our faculty has developed a cutting-edge curriculum that ensures students receive an education that is comparable to or exceeds that found at any top 20 law school, and also that addresses the changing demands of the legal profession.

Our goal is to do the best job in the country of training students for the practice of law at the highest levels of the profession. Our innovative curriculum stresses hands-on, practical training, interdisciplinary studies and public service.

### Graduation Requirements

To earn the Juris Doctor, students must complete six semesters of study, earn 86 law semester credits, pass all required classes, complete the upper-level writing requirement, and have a minimum 2.5 (C+) grade point average.

**All students must complete at least 68 credits in regularly scheduled Law School classes.**

"Regularly scheduled Law School classes" include

- Law School courses and seminars, including courses cross-listed at the Law School but originating in another school or department at the University;
- Law School clinics and clinical placements approved by the Associate Dean for Clinical Education and Service Learning;
- Credits from another ABA-approved law school or from approved study in a foreign exchange program.

'Regularly scheduled Law School classes' do not include

- independent study work;
- non-law classes;
- research tutorials;
- externships (other than those deemed to meet the Law School's clinical requirement);
- designated advanced clinics (see Course Catalogue for designations).

No more than 8 units of *optional credit/no credit* course work will count toward the 86-unit degree requirement.

## First-Year Course Work Requirements

Students must pass all UCI Law School first-year courses, or their substantial equivalents, with grades of 1.0 (D) or higher. The Assistant Dean for Student Services will determine whether classes taken at another law school are sufficient for transfer students to meet the UCI Law first-year course work requirement. If not, the student will be notified which courses are needed to complete the requirement.

## Upper-Level Academic Requirements

### 1. Writing Requirement

Students must complete at least one course where they are required to produce a major writing project with frequent feedback from a faculty member. This might include seminars, independent studies, or other work, so long as it involves substantial original analysis and research, multiple drafts, and is certified by the faculty members as meeting this requirement.

- At the completion of the first-year lawyering skills course, students will have a meeting with their professor and receive advice on the type of writing assistance they need and approaches they should consider in meeting the upper-level writing requirement.
- Students are strongly encouraged to develop a portfolio over the course of law school that will include all of their major written work and other forms of presentation.

### 2. Clinical Requirement

All students are required to complete at least one semester of clinical education, either in a Law School clinic or at a clinical placement that is approved by the Associate Dean of Clinical Education and Service Learning. This shall involve a live client or other real-life practical experience, appropriately supervised and designed to encourage reflection by students on their experiences and on the values and responsibilities of the legal profession, and the development of one's ability to assess his or her performance and level of competence.

## Master of Laws (LL.M.)

<http://www.law.uci.edu/llm/>

The UC Irvine School of Law Master of Laws (LL.M.) degree program at the University of California, Irvine School of Law offers a first-rate legal education to lawyers, judges, government officials, and others wishing to become educated about the legal system and practice of law in the United States. We offer a general LL.M. program that can be tailored to each individual's interests, thus uniquely equipping students with the knowledge and skills to excel in today's global legal community, whatever their personal and professional goals may be.

The program in a one-year, full-time, 24-credit course of study in advanced legal topics, designed for lawyers trained outside of the United States. Students are required to take one course: Introduction to American Law. For the remainder of their courses, students select from a broad range of courses across the upper-level curriculum. Dedicated staff are available to assist students in planning their course of study and, if desired, ensuring that students coursework meets the eligibility requirements of the California, New York, or other state bars.

The UC Irvine School of Law faculty seek highly-qualified candidates, who have excelled in legal training and practice in their home jurisdictions. Applications are accepted on a rolling basis for fall or spring matriculation (spring matriculation is only available for the LL.M. in American Law; the Graduate Tax LL.M. program only matriculates students in the fall). In order to begin the application process, candidates must submit the following:

- Online application and application fee
- Official copies of academic records from an ABA-accredited U.S. law school or a foreign law school with equivalent standards
- Statement of purpose
- Resume
- Two letters of recommendation
- Official proof of English competency

## Language Requirements

Applicants whose first language is not English must take one of three tests for English competency:

Test of English as a Foreign Language (TOEFL) with a minimum score of 90 on the internet-based test.  
Pearson Test of English (PTE) with a minimum score of 63.  
International English Language Testing System (IELTS) with a minimum score of 6.0.

It is not necessary to take all three tests. Applications are only considered complete upon receipt of official examination results. This requirement is waived for applicants who have completed a higher degree program at an accredited U.S. institution. Photocopies of test reports will not be accepted.

## Course Requirements

### First semester:

Introduction to American Law

### Second semester:

Elective courses from J.D. and LL.M. curriculum.

For the remainder of their courses, students select from a broad range of course across the upper-level curriculum. Dedicated staff are available to assist students in planning their course of study and, if desired, ensuring that students' coursework meets the eligibility requirements of the California, New York, or other state bars.

## LL.M. Graduate Tax Program

LL.M. students have the option to complete a specialization in tax (<https://www.law.uci.edu/gradtax/curriculum/>), allowing them the opportunity to complete courses from a broad range of advanced tax courses across the upper-level curriculum.

The School of Law's tax faculty believes strongly that every LL.M. student in the Tax Specialization should possess the same foundational knowledge of core tax topics. The program requires all students to take the following core courses as a single cohort:

12 credits of mandatory course work (most offered in the fall semester):

1. Corporate Taxation – 4 credits (fall semester)
2. International Taxation – 4 credits (fall semester)
3. Partnership Taxation – 3 credits (spring semester)
4. Tax Practice and Procedure – 1 credit (fall semester)

12 credits of elective course work, at least four of which must satisfy the Practical Tax Skills (PTS) requirement.

Students who have completed their law degree outside the United States must also complete an intensive short course Introduction to United States Taxation (offered during the orientation week, before regular classes start) and Introduction to American Law.

## Michael J. Stamos, M.D., Dean

240 Irvine Hall, 949-824-1046

Admissions and Outreach: 949-824-5388

<http://www.som.uci.edu/>

## School of Medicine Overview

The UCI School of Medicine became part of the University of California in 1965. Prior to this time it was known as the California College of Medicine which traces its roots to a private institution founded in 1896.

## Mission Statement

The mission of the University of California, Irvine, School of Medicine is to promote biomedical sciences and medicine in Orange County, California, and beyond, through excellence in research, patient care, education, and community service. This mission is achieved through programs of excellence in the following:

**Education:** The School of Medicine is committed to provide educational programs of the highest quality to medical and graduate students, residents, fellows, allied health, practicing physicians, and other healthcare professionals. Educational programs are offered along the continuum of medical education with programs in undergraduate, graduate, and continuing medical education. These programs emphasize the most current knowledge in the health sciences and reflect the changing practice of medicine. Further, the School of Medicine's educational programs are designed to stimulate life-long self-learning and critical inquiry and to exemplify those human values necessary to fulfill the professional commitments of a career in the health sciences.

**Research:** Excellence in research is an essential feature of the School of Medicine. Therefore, the School is committed to develop and maintain research programs in the health sciences which seek to advance basic scientific knowledge and the prevention, diagnosis, and treatment of human illness.

**Clinical Care:** Recognizing its responsibility to meet the educational needs of students and the diverse needs of the patient community, the School of Medicine is committed to programs of clinical excellence across the spectrum of patient care disciplines.

**Service to the Public:** As a publicly assisted institution, the School of Medicine is committed to serve the community as a vital resource of expertise and knowledge. The School further serves the public through the training of health professionals whose backgrounds reflect California's ethnic and cultural diversity and whose professional careers address California's healthcare needs.

## Degrees

Biomedical and Translational Science	M.S.
Biomedical Sciences <sup>1</sup>	M.S., Ph.D.
Genetic Counseling	M.S.
Medical Science	M.S.
Medicine	M.D.

- <sup>1</sup> The School of Medicine's basic medical science departments of Anatomy and Neurobiology, Biological Chemistry, Microbiology and Molecular Genetics, Pathology and Laboratory Medicine, and Physiology and Biophysics offer graduate instruction leading to the M.S. and Ph.D. degrees in Biomedical Sciences.

The School of Medicine also offers the Medical Scientist Training Program (M.D./Ph.D.), the Program in Medical Education for the Latino Community (PRIME-LC), Leadership Education to Advance Diversity-African, Black and Caribbean (LEAD-ABC), Health Education to Advance Leaders in Integrative Medicine (HEAL-IM), an M.D./M.B.A. program in cooperation with The Paul Merage School of Business, an M.D./M.P.H. program in cooperation with the Program in Public Health, medical residency and fellowship programs, and continuing medical education for physicians and other health care professionals.

## Vision Statement

The University of California, Irvine, School of Medicine will achieve preeminence through the creation, application, and dissemination of new knowledge in the biomedical sciences and medicine. This will be accomplished through international leadership in biomedical research, development of new therapies, delivery of state-of-the-art medical care, and innovative biomedical education.

## Health Sciences Complex

The Health Sciences Complex is a 121-acre site that houses UCI's medical school facilities. Twenty-nine acres have been developed to provide space for teaching, research, and patient care as well as offices for departmental administration.

The School's basic science instructional programs are located in modern, well-equipped, medical sciences buildings. These units provide space for first- and second-year classes, lecture halls (including the Dr. S. Jerome and Judith D. Tamkin Student Lecture Hall), offices and laboratories for various basic and clinical departments. Other buildings house the School's laboratories and administrative offices.

The Medical Education building symbolizes the University's ongoing commitment to high-quality medical education and innovation. The \$40-million, 65,000-square-foot building serves as the hub for nearly all non-hospital related educational activities for UCI medical students, and incorporates the latest technology to help prepare tomorrow's doctors for healthcare in the digital age. The School of Medicine Educational Affairs Office is located in the Medical Education building, as well as the innovative Program in Medical Education for the Latino Community (PRIME-LC), the Leadership Education to Advance Diversity - African, Black and Caribbean (LEAD-ABC) program, and the Health Education to Advance Leaders in Integrative Medicine (HEAL-IM) program.

The Medical Education building's Telemedicine Center includes a 60-seat interactive televideo auditorium where students watch UCI physicians provide expert care over the Internet to patients in rural or other remote locations. Located on the second floor, the Clinical Skills Center is a cutting-edge facility for teaching and assessment of clinical skills, communication, and professionalism. The Clinical Skills Center includes 17 fully equipped patient exam rooms, a central control room for exam administration and recording of all activities, and a computer software system that focuses on the capture, debriefing, and assessment of medical training. The building also features an advanced Medical Education Simulation Center, complete with a four-suite Simulation Lab that utilizes high-fidelity human patient simulators with physiologically accurate responses to stimuli to enhance learning and assess competency. The lab is equipped with a fully operational anesthesia suite, a trauma suite, and a general ward environment. The Simulation Lab has two debriefing rooms for immediate feedback on performance as well as a large central control room for all simulation activities.

In addition, the 40,000-square-foot Plumwood House is devoted to basic research in the fields of neurological disorders, diagnostic systems and reagents, and industrial bioreactors. In this facility, faculty from the Department of Biological Chemistry share laboratory space with corporate researchers.

Outpatient services are available on campus through the Louis A. and Helen C. Gottschalk Medical Plaza and the Beckman Laser Institute & Medical Clinic. Together these facilities capitalize upon the broad range of diagnostic and therapeutic programs of the School as well as the extensive clinical expertise of the faculty. Both primary care and specialty services are offered through these facilities, as well as special programs in diabetes, multiple sclerosis, Alzheimer's disease, and inflammatory bowel diseases. The medical plaza also houses UCI Corporate Health Services. Housing one of the world's leading programs in medical laser technology, the Beckman Laser Institute offers state-of-the-art treatment for cancer and dermatological conditions. The Institute specializes in the development and application of laser and other optical technologies for the diagnosis and treatment of disease.

For the latest in diagnostic healthcare for eye diseases, the Gavin Herbert Eye Institute, which serves as home to the UCI School of Medicine Department of Ophthalmology, provides state-of-the-art services including computerized refraction analysis, glaucoma diagnosis, and ultrasound analysis of eye disorders.

## Biomedical Research Center

UCI's Biomedical Research Center (BRC) is a landmark public-private collaboration between UCI and businesses involved in biomedical, biotechnological, and healthcare services. The Center enables UCI researchers and participating companies to work alongside one another, combining basic science, clinical study, and product development to find new approaches to the diagnosis and treatment of disease. The William J. Gillespie Neuroscience Research Facility, the first of several BRC buildings, is the home of a core group of prominent scientists investigating the causes and cures for neurological disorders, including Alzheimer's disease, Parkinson's disease, schizophrenia, and spinal cord injury. The second building is the Robert R. Sprague Family Foundation Hall, where scientists work to reveal the role of genetics in cancer treatment and prevention. The third building, the Dottie and George Hewitt Research Hall, is home to a state-of-the-art General Clinical Research Center and internationally recognized

investigators studying infectious diseases, molecular medicine, immunology, and complementary and alternative medicine. The Sue and Bill Gross Stem Cell Research Center is the fourth building in UCI's Biomedical Research Center. Opened in 2010, this state-of-the-art research and clinical building fosters a multi-pronged approach to neurodegenerative repair and basic stem cell biology by supporting basic research, regenerative medicine, and drug-development programs.

## Chao Family Comprehensive Cancer Center

The Chao Family Comprehensive Cancer Center is the only National Cancer Institute (NCI)-designated comprehensive cancer center in Orange County and one of only 49 such centers in the country. With this designation, NCI recognizes UCI's excellence in providing world-class patient care and innovative research as part of "the backbone of NCI's programs for studying and controlling cancer." The Cancer Center is headquartered at the UCI Medical Center in Orange and also operates out of Sprague Hall on the UCI campus in Irvine. The 58,000-square-foot Chao Family Comprehensive Cancer Center in Orange provides an ideal setting for the practice of all the basic and clinical subspecialties involved in oncology care, including the application of the latest techniques for the diagnosis and management of patients with cancer. The 53,000-square-foot Sprague Hall in Irvine serves as the UCI hub for multidisciplinary basic and translational cancer research, housing faculty laboratories and specialized core research support facilities. Overall, more than 200 physicians and scientists, drawn from over 32 academic departments across six schools at UCI (Medicine, Biological Sciences, Physical Sciences, Information and Computer Sciences, Engineering, and Business), work together to understand the biological mechanisms underpinning cancer and to translate these discoveries into new therapies for the diagnosis, treatment and prevention of cancer of all types and degrees of severity.

## University of California, Irvine Health

UCI Health is comprised of a devoted team of nationally regarded physicians and nurses, researchers and clinicians, educators and students united by a single calling — to improve the lives of the people in our community and beyond. As the only academic health system in Orange County, this multifaceted organization is dedicated to the discovery of new medical frontiers, to the teaching of future healers and to the delivery of the finest evidence-based care. UCI Medical Center features a 417-bed acute care hospital providing tertiary and quaternary care, ambulatory and specialty medical clinics, behavioral health, and rehabilitation. It is the primary teaching hospital for the UCI School of Medicine.

- UCI School of Medicine (<http://www.som.uci.edu>), one of the top U.S. medical schools for research, is where our groundbreaking research and treatment advances are imparted to the rising practitioners of tomorrow.
- UCI Medical Center (<http://www.ucirvinehealth.org/locations/orange/uc-irvine-medical-center/>) has been rated among the nation's best hospitals by (<http://www.ucirvinehealth.org/news/2014/07/2014-americas-best-hospitals/>) *U.S. News & World Report* for 19 consecutive years. It is also ranked among the top 50 U.S. medical centers in gynecology, gastroenterology & GI surgery, and geriatrics care.
- The Chao Family Comprehensive Cancer Center (<http://www.ucirvinehealth.org/medical-services/cancer-center/>) is one of only 51 in the nation — and the only one in Orange County — designated for excellence by the National Cancer Institute.
- UCI Medical Center is Orange County's only Level I adult and Level II pediatric trauma center, which means trauma and critical care physicians are fully equipped to treat life-threatening injuries 24 hours a day, seven days a week.
- The Comprehensive Stroke & Cerebrovascular Center is the first in Orange County to be certified as a Comprehensive Stroke Center by the nation's preeminent health care standard-setting organization.
- Numerous health providers throughout Orange County apply the most advanced medical knowledge — for diabetes, neuromuscular disease, women's health, and more.
- This union of discovery, teaching and healing has enabled UCI Health to pioneer new therapies and techniques that have been adopted by institutions across the nation.

More information is available at the UCI Health website (<http://www.ucirvinehealth.org>).

## UCI Family Health Center - Santa Ana and Anaheim Locations

The UCI Family Health Centers are designated as Federally Qualified Health Centers (UCI FQHC). The UCI FQHC Board of Directors is made up of community members and patients, who in collaboration with UCI Health, deliver primary care services to the under-served communities in Orange County. This collaboration is very unique, and although there are other FQHCs in the country with academic affiliations, the UCI FQHC and UCI Health have a co-applicant agreement that is recognized by the Health Resources and Services Administration (an agency of the U.S. Department of Health and Human Services).

UCI FQHC is the oldest FQHC in Orange County. It provides care to all patients regardless of their ability to pay. The vast majority of patients served at the UCI FQHC are Medi-Cal patients and predominantly monolingual Spanish speakers. The core services delivered at these locations are primary care - Adult, Pediatric, and Women's health. The Departments of Family Medicine, Pediatrics, Obstetrics and Gynecology, and the Sue and Bill Gross School of Nursing provide these services.

UCI FQHC serves as a training ground for both residents and medical students which gives learners a unique opportunity to manage complex medical cases while addressing the social determinants of health. In addition, the health centers offer an array of other services.

Behavioral Health is offered by Licensed Clinical Social Workers to address the social stressors affecting our patients and providing counseling for psychological and substance use disorders. Patients can also access our onsite Oral Health services that provide care for all ages and complements the medical care delivered. There are unique pharmacy services offered at the Santa Ana location. These services not only include medication dispensing

but also medication reconciliation and diabetes care management visits performed by our pharmacist. Our pregnant patients can access the various services listed above as well as specific Perinatal Education offered through our Comprehensive Perinatal Service Program (CPSP) staff.

Once a month, both health centers provide a mobile food pantry in collaboration with Second Harvest Food Bank. Patients are able to obtain fresh fruits and vegetables to improve their healthy eating habits. In addition, patients can see our certified dietitian for further counseling and monitoring of weight and eating habits. Our dietitian sees all patients including children and pregnant patients. Other collaborations have led to unique Group Medical Visits (GMV) that are offered at both locations. These GMVs provide a unique environment where patients come together to address a specific health issue they share in common, such as diabetes. The facilitators and providers work cohesively to help GMV patients to better understand their medical conditions and promote healthy lifestyle changes.

The uniqueness of having the UCI FQHC collaborate with UCI Health allows all learners to experience a comprehensive approach in dealing with healthcare. This setting takes place in an environment where the vast majority of patients are underserved and would likely not get this level of care elsewhere.

## Affiliated Hospitals and Clinics

Additional major teaching and research programs of the School of Medicine are conducted at the Veterans Affairs Long Beach Healthcare System, Children's Hospital of Orange County (CHOC), Long Beach Memorial Medical Center, and Miller Children's Hospital (Long Beach). Other academic programs are conducted in affiliation with Kaiser Foundation Hospital (Anaheim, Bellflower, Irvine, and Riverside), Children's Hospital of Los Angeles, Western Medical Center (Tustin/Santa Ana), and St. Jude's Hospital (Fullerton).

## School of Medicine Alumni Relations

The UCI School of Medicine is the oldest, continually operating medical school in the Los Angeles/Orange County area. It began as in 1896 as the Pacific College of Osteopathy (PSO) and some years later became the College of Osteopathic Physicians and Surgeons. It then evolved into the California College of Medicine in 1962 and subsequently joined the UC system in 1965. Alumni Relations provides programs and services for nearly 5,000 alumni of the School as well as for students. From financial support to Honor's Night awards, mentorship to reunions, Alumni Relations seeks to provide a cornerstone from which students and alumni can benefit from their relationships to one another and in so doing, strengthen the School of Medicine.

## Office of Medical Education

**Khanh-Van Le-Bucklin, M.D., Vice Dean for Medical Education:** 949-824-8405

**Julie Youm, Ph.D., Assistant Dean for Education Compliance and Quality:** 949-824-3913

**Shaun Langer, Chief Administrative Officer:** 949-824-1567

The Vice Dean for Medical Education, in cooperation with the Academic Senate faculty, is responsible for the administrative oversight of the educational program leading to the M.D. degree, postgraduate residency and fellowship programs, and continuing medical education programs provided for practicing physicians and allied health personnel. Housed within the Office of Medical Education are the divisions/offices of Admissions, Curricular Affairs, Student Support, Education Compliance and Quality, Educational Technology, Graduate Medical Education and Continuing Medical Education. The Office of Medical Education provides services for the M.D. program, which include curriculum development, implementation, management, and evaluation. Medical Education also offers student support services, which include academic advising, learning skills counseling, psychological/wellness counseling, career advising, financial aid, and student records. Additional student services are coordinated by Medical Education through general University offices, which include housing, student health, and disability services.

## Office of Student Support

**Megan Boysen Osborn M.D., Associate Dean, Students:** mbo@uci.edu (%20mbo@uci.edu)

**Kyle Parades, M.D., Assistant Dean, Student Affairs:** paredesk@uci.edu

**Ursula Worsham, Ed.D., Executive Director of Student Support:** uworsham@uci.edu (%20uworsham@uci.edu)

**Nancy Guirguis, Ed.D., Director of Student Affairs:** nancy.guirguis@uci.edu

**Ashley Selva-Rodriguez, Ed.D., Learning Skills Specialist:** aselvaro@uci.edu

**Tina Allee, M.D., School of Medicine Psychiatrist:** DrAllee@TMShealthandwellness.com

**Anju Hurria, M.D., Director, School of Medicine Wellness:** ahurria@uci.edu

The mission of the Office of Student Support is to create an environment within the School of Medicine community that fosters student wellbeing attainment of the School of Medicine educational objectives. This is accomplished through ensuring that student participation in the educational program occurs in a manner consistent with School of Medicine policies and regulations, and through the provision of support services that facilitate optimal student participation in the educational program. To accomplish the educational assurance mission, the Office of Student Support disseminates information regarding academic policies and regulations, provides administrative and executive support for the faculty Committee on Promotions and Honors, and facilitates the institutional recognition of student achievement through the conduct of various School of Medicine events. To accomplish the educational support mission, the Office of Student Support provides academic, personal, psychological, career, and financial counseling; academic skills assessment and learning resources support, student wellness programs, student facilities support, initiatives to enhance the learning environment, and support for a variety of student organizations and informal activities.

## Financial Aid

**Luis Medina, Director:** 949-824-6476

**May Chan, Counselor:** 949-824-6476

The UCI School of Medicine Financial Aid Office provides financial assistance and financial counseling services to entering and continuing medical students. The office secures, manages, and provides funds in the form of scholarships, grants, and loans to assist in meeting students' educational expenses. The office coordinates financial aid application materials; tracks documents needed to complete an application; reviews and evaluates information provided by applicants; awards financial aid programs; and conducts research to determine basic educational expense budgets. It also provides students with information on policies and procedures, cost of attendance, and eligibility criteria. In providing counseling services, the office advises students, reviews their individual circumstances, and provides financial assistance within financial aid program guidelines. It presents financial aid workshops for prospective and enrolled students to enhance their knowledge about financial aid programs and the application process, provides financial literacy and debt management counseling, and conducts entrance and exit interviews.

## Curricular Affairs

**Warren Wiechmann, M.D., M.B.A., Associate Dean of Curricular Affairs - Clinical Sciences:** 949-824-8358

**Jeffrey Suchard, M.D., Associate Dean of Curricular Affairs - Basic Sciences:** 949-824-4610

**Terri Dean, Director:** 949-824-4609

This office provides support related to curricular issues for the School of Medicine, departments, faculty, and students; initiates curriculum review and innovation to meet the challenges of contemporary medical education; establishes and reviews the objectives of the School of Medicine and ensures individual courses are teaching to meet the objectives; serves as facilitators of new programs and curriculum and supports working committees during curriculum development; facilitates and monitors curriculum integration; and maintains records on course materials and grading policies. This office is responsible for curriculum documentation for review by the Curriculum and Educational Policies committee; the collection of course evaluations by students; maintaining accurate information on core and elective curriculum; and assessing the success of the current programs.

## Division of Educational Technology

**Warren Wiechmann, M.D., Associate Dean of Educational Technology:** 949-824-3837

**Julie Youm, Ph.D., Director:** 949-824-3913

The Division of Educational Technology is dedicated to enhancing the medical education experience through innovation and the promotion of new technologies, including iPads, simulation, and ultrasound. The division provides quality technology support and media services for School of Medicine faculty, students, and staff, and collaborates within the Office of Medical Education to effectively integrate technology into the medical school curriculum.

## Continuing Medical Education

**Ellen Seaback, CMP, CAE, CHCP, Executive Director:** 949-824-1150

The Office of Continuing Medical Education provides educational activities to physicians and other health care professionals to reinforce basic medical knowledge, improve competency, enhance performance-in-practice, and improve patient safety and outcomes of patient care. Additionally, these activities impart practical, evidence-based updated information on clinical practice and health care delivery; introduce new ideas, skills, and technologies; and disseminate pertinent research findings. The program encompasses a broad and comprehensive range of topics based on identified gaps in the learning needs of the communities served. As an academic center of excellence that includes the UCI Medical Center, emphasis is placed on the identification of areas for improvement through the system's Patient Safety and Quality Improvement Department. UCI School of Medicine is accredited by the ACCME with commendation.

## Graduate Medical Education

**Deena Shin McRae, M.D., Associate Dean of Graduate Medical Education:** 714-456-3526

**Matthew Dolich, M.D., Assistant Dean of Graduate Medical Education:** 714-456-3526

**Courtney Strayer, Director:** 714-456-3526

The UCI School of Medicine attracts top students from prestigious medical schools and talented residents from reputable training programs nationwide, offering 63 ACGME-accredited residency and fellowship training programs with approximately 700 positions. UCI Medical Center, Tibor Rubin Veterans Affairs Medical Center, Children's Hospital of Orange County, Long Beach Memorial Medical Center and Miller Children's Hospital are the integrated training sites for the graduate medical education programs.

Residents and fellows in all programs rotate to UCI Medical Center. Residents in anesthesiology, emergency medicine, dermatology, diagnostic radiology, interventional radiology, internal medicine, subspecialties of medicine, neurology, ophthalmology, pathology, surgery, physical medicine and rehabilitation, radiation oncology, family medicine, orthopaedics, otolaryngology, plastic surgery, and urology also rotate to the Tibor Rubin Veterans Affairs Medical Center in Long Beach. Residents in medicine, medicine sub-specialties, anesthesiology, radiation oncology, obstetrics and gynecology, pathology, pediatrics, physical medicine and rehabilitation, plastic surgery, and surgery also rotate to the Long Beach Memorial Hospital Medical Center/ Miller Children's Hospital. UCI also has an established affiliation with the Children's Hospital of Orange County (CHOC), which is a major training site for the combined program in pediatrics and other specialties. Other affiliations such as Kaiser Permanente, Orange County Global Medical Center, St. Jude's Hospital, and Children's Hospital Los Angeles offer additional training in specialized fields.

Inquiries about specific programs should be directed to the Program Director as listed in the *Directory of Residency Training Programs*, published each year by the American Medical Association.

All ACGME-accredited residency and fellowship programs meet the formal standards of the Accreditation Council for Graduate Medical Education and the appropriate specialty boards. The University of California, Irvine (UCI) adheres to the Health Professions Educational Assistance Act of 1976, P.L. 94-484, Section 709, regarding shared-schedule residency training positions.

## Admissions

**University of California, Irvine**  
**School of Medicine**  
**Office of Admissions**  
**Medical Education Building**  
**Irvine, CA 92697-4089**  
**949-824-5388 or 800-UCI-5388**  
<http://www.meded.uci.edu/admissions/>

The UCI School of Medicine is a member of the American Medical College Application Service (AMCAS). All students who seek entrance to the UCI School of Medicine must complete the American Medical Colleges Application Services (AMCAS (<http://www.aamc.org/students/amcas/start.htm>)) application. Applications must be submitted between June 1 and November 1 of the year preceding anticipated admission.

Additional information for the following programs is included below:

- Medical Scientist Training Program (MSTP, M.D./Ph.D.)
- M.D./M.B.A., M.D./M.P.H.
- Health Education to Advance Leaders in Integrative Medicine (HEAL-IM)
- Leadership Education to Advance Diversity- African, Black and Caribbean (LEAD-ABC)
- Program in Medical Education for the Latino Community (PRIME-LC)

## Selection Factors

The UCI School of Medicine seeks to admit students who are highly qualified to be trained in the practice of medicine and whose backgrounds, talents, and experiences contribute to a diverse student body. The Admissions Committee carefully reviews all applicants whose academic record and MCAT scores indicate that they will be able to handle the rigorous medical school curriculum. In addition to scholastic achievement, applicants are evaluated on their extent and level of research involvement, exposure and involvement in a health care setting, and community service. Dedication, reliability, altruism, and leadership as well as interpersonal communication skills are attributes that are given high regard when considering applicants for a position in the class. Careful consideration is given to applicants from disadvantaged backgrounds and those that have demonstrated the potential to work with the medically under-served, in particular the Latino population in California.

After receipt of the AMCAS application, applicants may be invited to complete a secondary application and will be required to submit a nonrefundable application fee of \$120. Upon further review by the Admissions Committee, approximately 600 applicants will be invited to interview. Applicants are interviewed by both faculty and current medical students. Regional interviews are not available.

## Requirements for Admission

Students can be considered for admission to the School of Medicine if they meet the following requirements:

1. All applicants must complete the American Medical Colleges Application Service (AMCAS) application (<https://www.aamc.org/students/applying/amcas/>) between June 1 - November 1, of the application year. Applicants must have a minimum of three years (90 semester units) of undergraduate coursework at an accredited U.S. college or university at the time the application is submitted. All course work must be verified by AMCAS before an applicant can be advanced to the admissions process. For purposes of evaluation, letter or numerical grades are preferred for course work, particularly for the required subjects listed below. All prerequisite courses listed as "in progress" on the AMCAS application and UCI School of Medicine Secondary Application must be successfully completed by July 15 of the matriculation year. Failure to meet the requirements or falsification of information are grounds for rejection or dismissal.
2. Applicants must complete the following college course requirements prior to matriculation:
 

Subject	Requirement	Comments
Biology	1.5 Years: 3 semesters or 5 quarters.	Must include one upper-division Biology course.
Chemistry	2 Years: 4 semesters or 6 quarters.	Must include biochemistry, inorganic and organic chemistry courses.
Physics	1 Year: 2 semesters or 3 quarters.	
3. Applicants are strongly encouraged to have completed their basic science requirements at the time they submit their application. No specific major is required, however, demonstrated ability in the sciences is of great importance. In addition, applicants are advised to take advantage of the intellectual maturation afforded by a well-rounded liberal arts education. English, the humanities, and the social and behavioral sciences are considered particularly important. The following courses are also recommended but not required: molecular biology, cell biology, genetics, vertebrate embryology, psychology, biostatistics, calculus, English composition, and Spanish.
4. Medical College Admissions Test (MCAT) (<https://www.aamc.org/students/applying/mcat/>) must have been taken within the three years preceding June 1 of the application year and no later than September 30 of the application year.
5. Three to six current letters are suggested. We recommend that at least two of the letters be from senior professors who can evaluate your academic abilities. If you have been involved in research, clinical, community service, or other significant extracurricular activities, it is recommended that you submit a letter from your mentor, supervisor or advisor. The Admissions Committee will only be reviewing letters of recommendation from those applicants who received a secondary application.
6. A criminal background check is conducted on all accepted applicants.
7. All students matriculating to the UCI School of Medicine must be able to meet the Technical Standards available at the School of Medicine Admissions website (<http://www.meded.uci.edu/admissions/>).

## Outreach

Outreach efforts coordinated by the Office of Diversity and Inclusion housed in the School of Medicine are designed to introduce students to the medical profession during their high school and undergraduate education. An additional goal of this office is to create pathways of access to students with an interest in health careers through community outreach and engagement, hosting students on our campus for the annual Open Medical School event, and summer programming designed to introduce pre-medical students to the realities of medical training and the preparation desired. The UCI School of Medicine is committed to creating a health workforce that reflects and is responsive to the diverse communities we serve by recruiting students from socioeconomically disadvantaged groups with a desire to serve in the medically underserved communities in California.

## Medical Student Advisor System

The School of Medicine provides a comprehensive academic advising and assistance program that spans the full duration of the students' educational program.

### Academic and Career Advisors

**Megan Boysen Osborn, M.D., Associate Dean, Students:** mbo@uci.edu (%20mbo@uci.edu)

**Kyle Parades, M.D., Assistant Dean, Student Affairs:** paredesk@uci.edu (paredesk@uci.edu%C2%A0%C2%A0)

**Cristobal Barrios, M.D., Assistant Dean, Admissions:** cbarrios@uci.edu

**Nancy Guirguis, Ed.D., Director, Student Affairs:** nancy.guirguis@uci.edu (%20nancy.guirguis@uci.edu)

**Ashley Selva-Rodriguez, Ed.D., Learning Skills Specialist:** aselvaro@uci.edu (%20aselvaro@uci.edu)

Student academic performance is monitored on a monthly basis by the Educational Support Committee. The committee develops specific action plans for each student experiencing academic difficulty. All students are also assigned a faculty Career Advisor beginning early in their first year.

A four-year Career Advising Curriculum has been developed for all medical students. During the new student orientation, the Assistant Dean of Student Affairs leads a "Career Perspectives" workshop, which provides an overview of the career curriculum and introduces the AAMC Careers in Medicine program to the students. Monthly specialty workshops are provided to the first and second year classes during lunch at the Irvine campus and a two-year rotating schedule of specialties has been developed. Similarly, workshops are given at the Medical Center in Orange for the third year students. The assigned Career Advisor provides academic support as well as career counseling support while the student is enrolled in the school of medicine. Assigned Career Advisors provide guidance on factors such as elective selection and career path requirements. Students also have access to a group of faculty from various departments who have agreed to provide specialty-specific academic advice in their disciplines (Specialty Mentors).

In addition to the Career Advisors and Specialty Mentors, the students have access to services provided through the Learning Skills Specialist. Students can seek one-on-one counseling from the Learning Skills specialist or attend workshops that have been created to improve study skills and time management.

### Peer Review and Peer Counseling Program

**Megan Boysen Osborn, M.D., Associate Dean, Students:** mbo (%20mbo@uci.edu)@uci.edu (%20jtoohy@uci.edu)

**Anju Hurria, M.D., M.P.H., Director, SOM Wellness:** ahurria@uci.edu (%20ahurria@uci.edu)

The School of Medicine has an informal peer review process, aimed at early detection and assistance for medical students who are experiencing difficulty such as professional conduct problems, suspected impairment, violation of the honor code, or violation of any University policy, regulation, or rule. The Peer Review Committee is comprised of two representatives from each class, the student body co-presidents, and two advisory faculty members. The committee operates within guidelines set jointly by the School of Medicine administration and the student body. Cases involving serious professional misconduct are referred to the Dean's Office. The Promotions and Honor Committee conducts hearings and may impose sanctions or provide assistance to the student.

## Master of Science in Medical Science (M.S.)

The Master of Science in Medical Science is designed to prepare the next generation of leaders and researchers in health care. After obtaining a strong foundation in the medical sciences, some students may decide that they no longer wish to pursue the M.D. degree. The M.S. in Medical Science provides an innovative degree for students who wish to pursue careers in health care, but realize that direct patient care may not be the best fit for them.

## Medical Scientist Training Program (M.D./Ph.D.)

**Alan Goldin, M.D., Ph.D., Director:** 949-824-5334

Exceptionally well-qualified students interested in careers in academic medicine, and with demonstrated research accomplishments, may be considered for admission to the Medical Scientist Training Program (MSTP). Students in this program pursue a combined curriculum for an M.D. from the School of Medicine and a Ph.D. from any of the graduate programs at UCI for which they qualify. The normative time for completion of the program is eight years, and students holding either degree prior to admission are not eligible for MSTP. The maximum time for completion of the program is 10 years. Additional information is available from the MSTP Administrator's Office, 949-824-5264; mstp@uci.edu; or visit the Medical Scientist Training Program website ([www.mstp.uci.edu](http://www.mstp.uci.edu)).

Applicants for the Medical Scientist Training Program are required to answer supplementary program-specific questions on the secondary application (through the School of Medicine Office of Admissions). Students accepted into the program have the option of pursuing graduate study in any of the graduate programs at UCI for which they qualify. Although a specific graduate department need not be chosen at the time of admission, students are expected to have selected a field for their graduate studies. Financial support in the form of a fellowship, which includes a stipend as well as tuition and fees, is provided. Applicants not accepted into MSTP may be considered separately for admission to the School of Medicine.

## M.D./M.B.A. Program

**Kyle Paredes, M.D., M.B.A., Program Director:** 949-824-5932

The M.D./M.B.A. program requires five or six years for completion. It is aimed at individuals who are exceptional in ability and motivation and who seek a career as physicians with major responsibility for administration and management in health care organizations and institutions. Students in this program pursue a combined curriculum for an M.D. from the School of Medicine and an M.B.A. from The Paul Merage School of Business.

Students must be currently enrolled in the M.D. program in order to apply to the combined M.D./M.B.A. program. During their second year of medical school, interested students submit an application to The Paul Merage School of Business Admissions Committee, after review by the School of Medicine. Final acceptance to the program is granted by The Paul Merage School of Business, and M.B.A. course work begins following completion of the student's third year of medical school. Students should be aware that enrollment in the M.D. program does not guarantee acceptance into the M.B.A. program.

The MCAT, along with the completion of three years of medical school training in good standing and passage of USMLE Step 1, currently serve as a waiver for the GMAT entrance examination usually required for application to the M.B.A. program.

## **M.D./M.P.H. Program**

**Bharath Charkravarthy, M.D., M.P.H., Director**

The M.D./M.P.H. program requires five years for completion. It is aimed at individuals who are seeking a career as physicians concerned about making a significant difference in community disease prevention. Students in this program pursue a combined curriculum for an M.D. degree from the School of Medicine and an M.P.H. degree from the Program in Public Health.

Students must be currently enrolled in the M.D. program in order to apply to the dual M.D./M.P.H. program. During their second or third year of medical school, interested students submit both the Application for Graduate Admission and the School of Public Health Application Service (SOPHAS) application in order to be considered for admission. Final acceptance to the program is granted by the Program in Public Health, and M.P.H. coursework begins following the student's third year of medical school. Students should be aware that enrollment in the M.D. program does not guarantee acceptance into the M.P.H. program.

The MCAT, along with the completion of three years of medical school training in good standing, currently serve as a waiver for the GRE entrance examination usually required for application to the M.P.H. program. The total number of units required to graduate from each program separately are satisfied in the M.D./M.P.H. program.

Contact the M.D./M.P.H. Student Affairs Officer at 949-824-7095 for more information.

## **Health Education to Advance Leaders in Integrative Medicine (HEAL-IM)**

**David Kilgore, M.D., FAAFP, Director:** [dkilgore@uci.edu](mailto:dkilgore@uci.edu)

HEAL-IM is designed to provide a future generation of physicians with additional training and skills in the tools and philosophies of integrative medicine. The longitudinal curriculum supports the study of the practice of evidence-based, compassionate, whole-person care to benefit the treatment of patients and families, our community and healthcare as a whole, setting the stage for future professional study and practice. Medical students in the HEAL-IM program may also choose additional elective time completing certified integrative medicine training (in acupuncture, osteopathic manipulation therapy, medical hypnosis and culinary medicine) or spend an optional fifth year pursuing a master's degree supporting the effective implementation of future integrative medicine practices.

Applicants to the UCI School of Medicine are eligible to apply upon acceptance. The program is committed to offering a partial scholarship towards tuition and fees for the senior year for students in good standing in the program, as well as funding towards fees for an Integrative certificate program or a masters year. The program will also cover the tuition and lodging fees for the summer LEAPS into IM program, as well as attendance at the Scripps Evidence-Based Natural Supplements conference in San Diego during MS2 and MS4 years.

Learn more about the HEAL-IM Program at <https://www.meded.uci.edu/curricular-affairs/heal-im.asp>.

## **Leadership Education to Advance Diversity-African, Black, and Caribbean (LEAD-ABC)**

**Carol Major, M.D., Director:** [SOMdiversity@hs.uci.edu](mailto:SOMdiversity@hs.uci.edu)

The LEAD-ABC mission-based program is intended to develop physician leaders to address the health care needs of the African, Black, and Caribbean communities. Students in the program will receive in-depth training on the unique health care concerns in these communities. The program offers an optional year to obtain a master's degree in an area that will advance their ability to effect change in delivery of health care for these communities.

Applicants to the UCI School of Medicine are eligible to apply once they are accepted into the School of Medicine. The program selects two students per entering class who will receive tuition and fees for the four years of medical school as well as an optional fifth year for completion of a master's program.

Learn more about the LEAD-ABC Program at <https://www.meded.uci.edu/curricular-affairs/lead-abc.asp>.

## **Program in Medical Education for the Latino Community (PRIME-LC)**

**Charles Vega, M.D., Director:** 949-824-7136

The Program in Medical Education for the Latino Community (PRIME-LC) responds to the increasing demand for physician-leaders who are culturally and linguistically competent to address the health care delivery, research, and policy needs of underserved Latino communities in California. Students in PRIME-LC complete additional value-added curriculum in addition to their medical training in order to reach their goals of leading communities, and they also complete a Master's degree program of their choice. The first residency positions in any UC PRIME opened in the UCI Family Medicine program in 2010.

To be considered for PRIME-LC, students should have experience in working in disadvantaged communities, particularly Latino communities. At least conversational Spanish is required as well. The most important factor in PRIME-LC Admissions is the long-term commitment to being a physician-leader for Latino communities.

The PRIME-LC supplemental application is part of the UCI School of Medicine secondary application and must be completed to be considered for acceptance. Applicants selected for faculty and student interviews are required to undertake a third interview in Spanish to evaluate conversational skills and commitment to service. All interested applicants, including those who are not currently California residents, are encouraged to complete the PRIME-LC application. All PRIME-LC students receive a substantial financial award in their fifth year of training. Applicants not accepted into PRIME-LC may be considered separately for admission to the regular School of Medicine M.D. program. For more information contact 949-824-7136; [primelc@uci.edu](mailto:primelc@uci.edu); or visit the PRIME-LC website (<http://www.meded.uci.edu/curricular-affairs/prime-lc.asp>).

## The M.D. Curriculum

The UCI medical curriculum continues to meet the changing needs of medical education within all four years of instruction. Indeed, the School of Medicine faculty views curriculum development as a continual process and feels that medical education and teaching innovations must be encouraged and supported. The curriculum is designed to encourage medical students to become participants in their education process, to be active rather than passive learners, to become lifelong learners, and to use cooperative and team-learning principles.

UCI is dedicated to the nurturing of humanistic, caring physicians with top-notch clinical expertise and skills. The School strives for this through a curriculum that is not only anchored in the science of medicine but also provides meaningful experiences in the humanistic dimensions of medicine. In this context, the faculty endeavors to provide students with experiences in areas such as communication and empathy, ethics and professionalism, diversity awareness, and cultural sensitivity and medical humanities. The faculty also feels that the curriculum should strive to integrate basic and clinical sciences by bringing substantial clinical material into the early phases of medical education.

The School has achieved vertical integration of the curriculum with the development of a series of "Clinical Foundations" courses. The courses are longitudinal multidisciplinary experiences broadly designed to prepare students for their future careers in medicine through the application of experiential and self-directed learning principles. First- and second-year students begin to prepare for their clerkships through clinical exposures featuring standardized patients and clinical shadowing experiences. These courses also utilize small group learning sessions to reinforce core concepts of patient-physician interactions and introductory clinical reasoning skill development. During the Clinical Foundations course in the third and fourth years, students explore many of the crucial issues first presented during the introductory courses. During this segment greater emphasis is placed on advanced skill acquisition and more mature professional role development.

To satisfy the requirement for the M.D. degree, each medical student must successfully complete the full curriculum. Students must also pass both Step 1 and Step 2 of the United States Medical Licensing Examination (USMLE) and successfully pass a Clinical Performance Examination (CPX) prior to graduation.

An ongoing academic monitoring program is coordinated by the Office of Student Support, which identifies students early who might be experiencing academic difficulty and provides them with resources to successfully complete their course work. Faculty advisors are assigned to students during their first and second years. Students have advisory sessions with M.D. faculty prior to the scheduling of their fourth-year course work. A Learning Resources Program is available to provide tutorial assistance and study skills training.

## Curricular Policies

The Curriculum and Education Policy (CEP) Committee is a committee of the Academic Senate that oversees the curriculum and governs policies pertaining to the curriculum. The CEP reviews and sets the standards of achievement for courses, clerkships, and the curriculum as a whole, and their bylaws dictate graduation requirements. The Committee on Promotions and Honors (P&H) is a standing committee of the faculty and enforces the standards of achievement and curricular policies set by the CEP Committee. P&H monitors the progress of all students throughout their educational experience.

A listing of the curricular policies, as well as information regarding registration, rules and regulations, grading procedures, and requirements for academic advancement, are contained in the School of Medicine Handbook (<https://ucisom.instructure.com/courses/106/>), which is available at the School of Medicine Office of the Medical Education website (<http://www.meded.uci.edu/>).

### First and Second Years:

#### Basic Science and Pre-clinical Course Work

##### First Year

Clinical Foundations I

Anatomy and Embryology

Behavioral Science and Ethics 1  
 Histology  
 Immunology  
 Medical Biochemistry and Molecular Biology  
 Medical Genetics  
 Neuroscience  
 Patient-Centered 1 Clerkship  
 Physiology/Pathophysiology

### **Second Year**

Clinical Foundations II  
 Behavioral Science and Ethics II  
 Pathology  
 Medical Microbiology  
 Medical Pharmacology  
 Patient-Centered 2 Clerkship

### **Third and Fourth Years<sup>1</sup>:**

#### **Clinical Science Course Work**

##### **Third Year**

Clinical Foundations III  
 General Surgery Clerkship  
 Family Medicine Clerkship  
 Inpatient Medicine Clerkship  
 Neuroscience Clerkship  
 Obstetrics and Gynecology Clerkship  
 Pediatrics Clerkship  
 Psychiatry Clerkship  
 Radiology Clerkship

##### **Fourth Year**

Clinical Foundations IV  
 Emergency Medicine  
 Intensive Care Unit  
 Senior Subinternship  
 Electives

<sup>1</sup> The sequence of third and fourth years varies.

## **Curricular Descriptions**

### **First-Year Curriculum**

#### **Clinical Foundations I**

Clinical Foundations I, first of the four-part Clinical Foundations series, serves as the introductory clinical medicine course for first-year medical students. Participating students learn core skills in physician-patient communication, medical interviewing, physical examination, and health promotion. The course is horizontally integrated with the basic science curriculum. The series includes a variety of small and large group sessions facilitated by our Dean's Scholars clinical faculty. Students complete multiple medical interviews, physical examinations, and patient write-ups for which they receive feedback designed to improve proficiency. (*Med Ed 554A-B-C*)

#### **Gross Anatomy and Embryology**

The structure of the human body is taught in Gross Anatomy and Embryology. Emphasis is placed on normal structure as it relates to function, with consideration of abnormal structures that may be revealed in a clinical setting. Anatomy is taught through a regional approach, with an emphasis on laboratory dissections and demonstrations, augmented by lectures, radiographic films, discussions, and clinical correlate material. The course includes a detailed consideration of the embryologic aspects of human development. (*Anatomy 500A-B*)

### **Behavioral Science & Medical Ethics I**

This clinically oriented course will cover foundation topics in behavioral science and medical ethics, and will introduce clinically relevant social issues such as dealing with domestic violence as it presents clinically, treating minority or under-served populations and cultural competence. (*Psych 505A*)

### **Histology**

Histology is designed to provide students with knowledge of the major features of the structural organization of cells, tissues and organs, and how that organization is related to function. Emphasis is placed on normal structure and function, with consideration of abnormalities in clinical cases. (*Anatomy 503A-B*)

### **Immunology**

Immunology covers the cellular and molecular basis of immune responsiveness and the roles of the immune system in both health and disease. The material is presented in lectures and clinical correlates. (*Mic Bio 544*)

### **Medical Biochemistry and Molecular Biology**

This course covers the following topics from a biomedical perspective: protein and nucleic acid biochemistry, carbohydrates, lipids, amino acids, purines and pyrimidines, genome structure, molecular mechanisms of development, and signal transduction. (*Biochem 523*)

### **Medical Genetics**

Medical Genetics reviews the basic principles of human genetics related to disease. Assessment of patterns of genetic risk, screening for genetic diseases, and cytogenetics and biochemical diagnosis are presented. Utilization of the human gene map and DNA sequence information for molecular genetic diagnosis are discussed. Students are introduced to the use of genetic databases and bioinformatics. Approaches to treatment of genetic diseases are presented. Legal, ethical, and social aspects of diagnosis and management of genetic disease are discussed. (*Peds 511*)

### **Neuroscience**

The objective of this course is to provide students with the fundamental concepts, vocabulary, and learning strategies to attain a level of proficiency in basic integrative neurosciences so that they will develop an understanding in the clinical neurosciences throughout their careers as physicians. The course is integrative in the sense that the underlying knowledge of molecular, cellular, physiological, developmental, and neuroanatomical organization of the nervous system is brought together in each lecture block with clinical themes and examples in lectures, and which is further reinforced by clinical correlates given by clinicians. The course emphasizes knowledge of the nervous system using lessons from clinical neuroanatomy, systems neurosciences, and regional and developmental neuroanatomy. (*Anatomy 502A*)

### **Patient-Centered 1 (PACE-1) Clerkship**

This course is designed to introduce clinical skills to students and integrate basic science training through early exposure to the clinical setting. Training will be accomplished with weekly clinic sessions with a specific preceptor, with reflection sessions to reinforce clinical lessons. Students will be expected to achieve learning objectives in patient care, professionalism, interpersonal and communication skills, and medical knowledge. (*Med Ed 557*)

### **Physiology/Pathophysiology**

This course consists of lectures, clinical correlates, hands-on workshops, and small group discussions, covering the classical concepts of medical physiology. Specific topics include hemostasis, blood, neurophysiology, cardiovascular, respiratory, renal, gastrointestinal, endocrine, exercise, temperature regulation, and sexual physiology. (*Physio 543A-B*)

### **Second-Year Curriculum**

#### **Clinical Foundations II**

Clinical Foundations II, second of the Clinical Foundations series, builds second-year medical students' clinical skills. Students learn advanced skills in history-taking, physical diagnosis, and clinical reasoning. Clinical didactics sessions synthesize learning in the clinical and basic sciences. The course is comprised mostly of small-group sessions facilitated by our Dean's Scholars clinical faculty. With these faculty, students work on focused, guided practice of clinical skills that integrates basic science course work. (*Med Ed 555A-B*)

### **Behavioral Science & Medical Ethics II**

This clinically oriented course will cover foundational topics in behavioral science and medical ethics, and will introduce clinically relevant social issues such as dealing with domestic violence as it presents clinically, treating minority or underserved populations and cultural competence. (*Psych 505B*)

### **General and Systemic Pathology**

This course introduces second-year medical students to the basic pathogenesis, pathophysiology, and consequences of disease processes. It also introduces students to the proper use of the clinical laboratory for the diagnosis and management of these diseases. After an introduction to general types of disease processes and principles of laboratory medicine, disease processes are studied further in the context of specific organ systems. (*Path 598A-B*)

**Medical Microbiology**

This course covers the biology of infectious agents, including viruses, bacteria, fungi, and parasites, to provide the foundation in microbiology for the subsequent study of infectious diseases. Lectures, small group sessions with clinicians, and laboratory sessions are used to teach the molecular bases of microbial pathogenesis, diagnostic testing, antimicrobial therapy, and prevention strategies. (*Mic Bio 507A-B*)

**Medical Pharmacology**

This course covers the various classes of drugs that are used in medicine, particularly those used in specific or symptomatic treatment of disease states. Drugs of abuse are also covered. Emphasis is on the mechanisms of action of drugs at the organ and system level and on their use in medicine. The course includes lectures that illustrate pharmacologic principles, supplemented by small group problem-solving sessions. (*Med Ed 517A-B*)

**Patient-Centered 2 (PACE-2) Clerkship**

This course continues the processes of PACE-1 to build students' clinical skills and create a bridge between the basic and clinical sciences. Training will be accomplished at weekly clinic sessions with a specific preceptor, and during reflection sessions to reinforce clinical lessons. Students will be expected to achieve learning objectives in patient care, professionalism, interpersonal and communication skills, practice-based learning and improvement, and medical knowledge. (*Med Ed 558 A-B*)

**Third-Year Curriculum****Clinical Foundations III**

Clinical Foundations III, held at the beginning and Mid way through the third year, provides further preparation for third-year clinical rotations. Additionally, intersessions are planned during the third year to provide integration of clinical material across longitudinal topics that cross several disciplines. This preparation includes, but is not limited to clinical IT training with access to Electronic Medical Records, obtaining privileges at all of the primary clinical sites, discussions on team care, leadership, professionalism, management of assault behavior training, infection prevention, and basic life support. (*Med Ed 550*)

**General Surgery Clerkship**

The General Surgery clerkship provides students, as members of the surgical team, with an opportunity to study surgical patients in outpatient and hospital settings. Students acquire surgical knowledge, as well as develop skills in taking surgical histories and conducting physical examinations. Emphasis is placed on the clinical evaluation, pathogenesis, diagnosis, and treatment of surgical diseases. (*Med Ed 526*)

**Family Medicine Clerkship**

During the Family Medicine clerkship students are matched with a family physician. Students are assigned to a UCI-affiliated clinic where the principles of family medicine and primary care are taught. Emphasis is placed upon exposing students to the most common health care problems seen in family medicine. Students are exposed to the principles of community health and epidemiology, as practically applied in an ambulatory care setting. Students develop an awareness of the current health care delivery environment, including issues such as health care costs and the lifestyle of a family physician. Special tracks are available for interested students in geriatrics, integrative medicine, and under-served care. Special teaching sessions on family centered maternity care, health maintenance and nutrition, and musculoskeletal joint exams are part of the experience. A curriculum in ophthalmology is also part of the clerkship. (*Med Ed 597*)

**Internal Medicine Clerkship**

The Internal Medicine Clerkship occurs in a highly structured clinical environment in-patient setting. Students gradually assume responsibility for the care of patients, thereby enhancing their clinical, diagnostic, and procedural skills. Clinical vignettes and bedside teaching serve to round out the experience. (*Med Ed 527B*)

**Neuroscience Clerkship**

The Neuroscience clinical clerkship emphasizes the development of skills in taking a neurological history, performing a neurological examination, formulating a differential diagnosis, and proposing a course of management for neurological disorders. Students have the option of further training in Neurosurgery or pediatric sub-specialty rotations. (*Med Ed 532*)

**Obstetrics and Gynecology Clerkship**

During the Obstetrics and Gynecology clinical clerkship, students are given the opportunity to observe and handle problems in the obstetrical and gynecologic wards, outpatient clinic, labor and delivery suite, and in the operating room. (*Med Ed 524*)

**Pediatrics Clerkship**

The Pediatrics clerkship serves as an introduction to general pediatrics. Students rotate on the pediatric inpatient service, pediatric ambulatory settings, and the newborn nursery. During the clerkship, students develop their knowledge and skills in conducting age-appropriate patient histories and physical examinations and developing differential diagnoses and management plans. (*Med Ed 528*)

### Psychiatry Clerkship

The Psychiatry clerkship provides an opportunity for hands-on experience in the process of recognizing, diagnosing, and treating mental illness using the latest neuropharmacological advances, as well as more traditional psychotherapeutic approaches. Each student participates fully in patient care, clinical teaching, and conferences. (*Med Ed 529*)

### Radiology Clerkship

The Radiology clerkship offers an introduction to clinical imaging. Emphasis is given to correlate clinical findings and use the imaging modalities for problem-solving and diagnosis and treatment, including an understanding of risk/cost/benefit ration involved in daily clinical practices. (*Med Ed 533*)

### Fourth-Year Curriculum

#### Clinical Foundations IV

This is a two-week required course that all fourth-year students take during the final quarter in medical school in preparation for residency training. Intersessions are also planned during the fourth year to help prepare students further for residency. The course includes a resuscitation boot camp and provides an opportunity to obtain an ACLS certification. (*Med Ed 535*)

### Emergency Medicine

This two-week clinical clerkship introduces students to principles of acute care medicine while caring for acutely ill and injured patients. Students have the opportunity to evaluate patients, expand their directed history and physical exam skills, create a broad differential diagnosis, and formulate effective testing and treatment strategies. Active participation in patient care through refinement of procedural skills is largely emphasized and encouraged. (*Med Ed 547*)

### Intensive Care Unit Selective

This is a four-week clinical clerkship offered at one of several UC Irvine affiliated sites. ICU is offered in medicine, surgery, neurology, and pediatrics. Students function as interns, becoming integral members of the ICU team, and serve as primary caregivers under supervision. (*Med Ed 605B, 630K, 633M, 640E, 660S or 685U*)

### Senior Acting Internship Selective

Students spend four weeks as acting interns during which time they carry the full ward responsibility of an intern on one-half the number of patients usually carried by an intern. The acting internship is designed to improve clinical competence and to prepare the students for the challenges and demands of the internship. Students may choose between acting internships in family medicine, medicine, pediatrics, or surgery. (*Med Ed 536, 537, 538, 539, or 625Q*)

### Electives

Depending upon their particular interests, needs, and goals, students may take a variety of elective courses during the third and fourth years at UC Irvine Health facilities, VA Long Beach Healthcare System, Children's Hospital of Orange County, Long Beach Miller Children's Hospital, or Long Beach Memorial. Students may also take their fourth-year elective course work at other approved institutions.

A listing of elective courses and descriptions can be found online here (<http://www.meded.uci.edu/curricular-affairs/course-catalog.asp>).

**All questions regarding the curriculum, electives, or matters of records should be directed to:**

## Master of Science and Doctor of Philosophy offered by the School of Medicine

The School of Medicine offers graduate study in a wide variety of fields in both basic science and clinical departments, leading to Master of Science and Doctor of Philosophy degrees. Each department or program has a graduate advisor whom students may consult for additional details about the individual programs. Most training takes place within one of the departments, although full facilities and curricular offerings are available to all graduate students in all departments of the School of Medicine. Interdisciplinary study and research are encouraged. The normative time to degree is two years for the master's degree, and five years for the doctoral degree. A master's degree is not a prerequisite for the Ph.D. degree.

The departments evaluate applications for admission based on research experience, letters of recommendation, Graduate Record Examination scores where required by the individual program, grades, and other relevant qualifications of the applicant. Candidates for graduate admission are urged to consult the particular department or program whose faculty and expertise best fit their interests and background.

Students plan their academic program in consultation with the graduate advisor or a faculty committee. Faculty advisors may be changed to meet the needs and interests of the student. Students are encouraged to consult with faculty members with regard to their research and academic interests.

Application information may be obtained by contacting the individual graduate programs or:

**University of California, Irvine**

**Graduate Division**

**120 Aldrich Hall**

**Irvine, CA 92697-4611**

**949-824-6761**

<http://www.grad.uci.edu> (<http://www.grad.uci.edu/>)

- Biomedical and Translational Science, M.S.
- Biomedical Sciences, Ph.D.
- Genetic Counseling, M.S.

## Residency & Fellowship Programs

The School of Medicine and its affiliated hospitals offer approximately 700 residency and fellowship positions in 63 accredited programs, covering almost all areas of medicine. Training levels range from first-year residencies through seventh-year-level subspecialty fellowships. Inquiries about specific programs should be directed to the Program Director as listed in the *Directory of Residency Training Programs*, published each year by the American Medical Association.

All ACGME-accredited residency and fellowship programs meet the formal standards of the Accreditation Council for Graduate Medical Education and the appropriate specialty boards. The University of California, Irvine (UCI) adheres to the Health Professions Educational Assistance Act of 1976, P.L. 94-484, Section 709, regarding shared-schedule residency training positions.

Residents and fellows in all programs rotate to the UCI Medical Center. Trainees in dermatology, diagnostic radiology, medicine, neurology, ophthalmology, pathology, surgery, physical medicine and rehabilitation, radiation oncology, family medicine, subspecialties of medicine, orthopaedics, otolaryngology, plastic surgery, and urology also rotate to the Tibor Rubin Veterans Affairs Medical Center in Long Beach. Residents in medicine, medicine sub-specialties, anesthesiology, radiation oncology, obstetrics and gynecology, pathology, pediatrics, physical medicine and rehabilitation, plastic surgery, and surgery also rotate to the Long Beach Memorial Hospital Medical Center/Miller Children's Hospital. UCI also has an established affiliation with the Children's Hospital of Orange County (CHOC), which is a major training site for the combined program in pediatrics and other specialties. Residents and fellows may also spend periods of time at other affiliated hospitals and clinics.

### Anesthesiology

The Anesthesiology Residency Program is an ACGME-accredited, four-year categorical program. The program is dedicated to providing an exceptional educational experience to develop the next generation of board-certified physician anesthesiologists and leaders in the field. The innovative 4U Didactic Program includes Point-of-Care Ultrasound (POCUS) training, high-fidelity simulations, hands-on workshops, problem-based learning discussions, wellness series, practice management, and professional development. The PGY-1 and CA-1 (PGY-2) years cover the fundamentals of anesthesiology and perioperative medicine to provide a solid foundation on which to build advanced and subspecialty clinical knowledge and skills during the CA-2 (PGY-3) and CA-3 (PGY-4) years. Residents gain broad and diverse clinical experience through rotations at UCI Medical Center, Children's Hospital of Los Angeles (CHLA), Long Beach Memorial Medical Center, Kaiser Permanente Los Angeles, Veterans Affairs Long Beach Healthcare System, and Children's Hospital of Orange County (CHOC). Residents also have the opportunity for participation in medical missions, in partnership with faculty, through the Global Outreach Initiative.

### Anesthesiology - Pain Medicine

The Pain Medicine Fellowship is an intensive one-year ACGME-accredited multidisciplinary training program. The comprehensive training includes pain assessment, treatment, and management, covering both inpatient and outpatient care, including both adult and pediatric pain medicine, with a special focus on advanced interventional techniques. The fellowship includes hands-on training in interventional neuraxial interventions, neuromodulation techniques, intrathecal drug delivery systems, and peripheral nerve blocks, among others procedures. Fellows work closely with specialists in anesthesiology, physical medicine and rehabilitation, neuroradiology, palliative care, neurology, primary care, and psychiatry to gain a comprehensive understanding of pain management. The program includes a strong didactic curriculum and participation in scholarly activities is strongly encouraged. Fellows get exposure in practice management and business administration. For candidates with an interest in pain related research, the UCI Center for Pain Wellness has a strong complement of basic and translational researchers with active laboratories in pain related to spinal cord injury and mechanisms of chronic pain.

### Anesthesiology - Critical Care

The fellowship in Anesthesiology Critical Care Medicine (ACCM) is designed to provide fellows with the opportunity to fulfill the American Board of Anesthesiology subspecialty requirements for certification in anesthesiology critical care medicine (ACCM). This 12-month ACGME accredited fellowship commences after successful completion of residency in Anesthesiology. The ACCM fellow takes an active role in all aspects of the profession and practice of Critical Care Medicine including didactic teaching, presenting, and conducting rounds. In addition, the ACCM fellow is required to actively

participating in research projects and other scholarly activities. The major focus and uniqueness of the ACCM Fellowship is to train the fellow in bedside echocardiography and ultrasonography. In addition, the ACCM fellow will have the opportunity to participate in the cutting edge research in minimally invasive and non-invasive hemodynamic monitorings to predict fluid responsiveness and to guide goal-directed therapy for fluid resuscitation.

### **Dermatology**

The Department of Dermatology offers a three-year accredited residency which has 15 residents, five for each of three postgraduate years (PGY-2 to PGY-4). Residents rotate through clinics and consultation services at UCI and the Veteran Affairs Long Beach Healthcare System, as well as at affiliate locations at Children's Hospital of Orange County, and receive extensive training in medical and surgical dermatology. Residents rotate through specialty clinics which see patients with immunobullous disease, pigmentary disorders, vascular birthmarks, pediatric disorders, hair disorders, and melanoma. Additionally, residents receive training specific for the care of immunosuppressed patients and those with a history of solid organ transplant. Residents receive extensive training in Mohs surgery, laser techniques, excisional surgery, performance of flaps and grafts, and administration of cosmetic agents. Residents are also active in research and present at local, national, and international meetings.

### **Dermatologic Surgery**

The Department of Dermatology offers a one-year subspecialty fellowship with one fellow who rotates through clinics at UCI and Kaiser Permanente. The fellow receives extensive training in the study, diagnosis, and surgical treatment of disease of the skin and adjacent mucous membranes, cutaneous appendages, hair, nails, and subcutaneous tissue. Dermatologic Surgery is broadly categorized into the following three areas: cutaneous oncologic surgery, cutaneous reconstructive surgery, and cutaneous aesthetic surgery.

### **Emergency Medicine**

The Emergency Medicine residency was established in 1988 and has full accreditation by the Residency Review Committee. The program has 27 residents, nine for each of three postgraduate years. The UCI Medical Center Emergency Department is a high-acuity, Level I Trauma Center, treating over 55,000 patients annually. Twenty board-certified emergency medicine faculty provide 24-hour patient care and supervision of residents and medical students. The Department of Emergency Medicine is active in disaster preparedness and response, emergency uses of ultrasound, public affairs, community service, and research in the areas of prehospital care, educational technology, trauma, health policy, and infectious disease, among others.

### **Emergency Medicine - Clinical Informatics**

The School of Medicine offers a two-year ACGME-accredited Clinical Informatics fellowship program, which prepares the applicant for board certification in Clinical Informatics. By design, this fellowship is multidisciplinary with collaboration by faculty in multiple medical specialties, Donald Bren School of Information and Computer Science, Institute for Clinical and Translational Science (ICTS), Children's Hospital Orange County (CHOC), and Information Services. The fellowship goal is to create leaders in the field of Clinical Informatics with a strong background in the fundamentals of information technology, change management and process improvement. With this education, the fellow will develop the skillset needed to assess workflow needs, recommend process and technical solutions for a given challenge, and implement information technology tools to facilitate the proposed solution. The program's educational experiences will consist of rotations, didactic sessions, an independent longitudinal research project, mentorship, and ongoing practice in the fellow's primary board specialty. Additionally, all fellows are required to conduct a longitudinal research project – chosen by the fellow and with a physician faculty member acting as mentor – during the second year of their fellowship. They will select a research question to address based upon their own career objectives and any challenges discovered during their first year rotations. Resources to support fellow projects will be available from the Donald Bren School of Information and Computer Sciences (boasting advanced educational facilities with smart classrooms, a multitude of learning studios, simulation labs, and group study/conference rooms), UCI's extensive onsite and online libraries (Science Library and Grunigen Medical Library), and various product specific resources from UCI's catalog of technology solution vendor partners.

### **Family Medicine**

The Family Medicine Residency Program strives to train excellent clinicians who provide the best patient-centered compassionate medical care to our most vulnerable and underserved communities. The residency is a fully accredited program with both faculty and residents who practice out of the only academic federally qualified health center in the entire state of California. The residency incorporates technology and innovation in a unique community-academic hybrid educational setting that provides a rich and intensive clinical training environment. Residents obtain exceptional clinical skills while promoting community engagement, patient advocacy and the practice of socially responsible and culturally appropriate care. The program aims to graduate physician leaders dedicated to medically underserved communities.

### **Family Medicine - Geriatric Medicine**

The Geriatric Medicine Fellowship is a comprehensive and challenging one-year advanced training program that prepares physicians to deliver compassionate, informed care to a diverse aging population. The clinical opportunities allow Geriatric Fellows to explore both the depth and breadth of geriatric medicine through longitudinal primary care experiences and rotations in a variety of subspecialty clinical settings. The heart of the Fellowship is at UCI Medical Center's SeniorHealth Center in Orange, where Fellows have their continuity and consultation clinics. Here, Fellows work with a continuity attending on a weekly basis, learning the art and medicine of geriatric ambulatory care. Some of the subspecialty rotations at UCI include a memory disorders clinic, subacute care, neurology, dermatology, cardiology, rheumatology and more. At Tibor Rubin Veterans Affairs Medical Center in Long Beach, Fellows participate in the Geriatric Evaluation Management (GEM) clinic, an interdisciplinary program which assesses the medical and psychosocial status of frail older patients. The goal is to optimize each military veteran's health, function and ability to live with the greatest degree of independence possible. The VA offers inpatient and outpatient geropsychiatry, a Parkinson's clinic, memory and movement disorders, palliative care,

aging with disabilities and physical medicine and rehabilitation. The program is also affiliated with skilled nursing facilities, as well as the country's first Elder Abuse Forensic Center. The program offer electives in integrative medicine, community resources, or additional experiences in any of the above rotations.

### **Family Medicine - Sports Medicine**

The Primary Care Sports Medicine Fellowship at UCI is a one-year program housed within the Department of Family Medicine, with all rotations at UCI. The primary goal of the program is to train Fellows who are knowledgeable in musculoskeletal medicine as well as in medical conditions in athletes, so as to develop primary care physicians into more comprehensive, self-sufficient doctors. Fellows will work regularly in primary care and orthopedic sports medicine clinics as well as have rotational experiences in foot/ankle orthopedics, hand surgery, physical medicine and rehabilitation, MSK radiology, physical therapy and nutrition. Fellows will have regular training room coverage with UCI Athletics and work in event coverage in the community. Graduates will be well-prepared for the CAQ examination in Sports Medicine and will be ready to practice in a variety of clinical settings after graduation.

### **Internal Medicine**

The Internal Medicine Residency Program is a traditional three-year training program and also sponsors a one-year preliminary medicine program in addition the ABIM certified research pathway. The program focuses on core educational skills of the internist and offers training to ensure our residents have access to a broad array of career options including hospitalist medicine, primary care, and subspecialty training. Residents rotate through UCI Medical Center, the Veterans Affairs Long Beach Healthcare System, and Long Beach Memorial Medical Center. Core program faculty have a special interest in academic internal medicine and education. Subspecialty fellowships are offered in basic and clinical allergy/immunology, cardiology, endocrinology and metabolic diseases, gastroenterology, geriatrics, hematology/oncology, infectious disease, nephrology, palliative care, pulmonary/critical care, and rheumatology.

### **Internal Medicine - Allergy & Immunology**

The Allergy & Immunology Fellowship Program is a two-year accredited program. It offers training for fellows at the postgraduate PGY-4 to PGY-5 levels. The Fellowship training involves clinical training at the UCI Medical Center and Veterans Affairs Long Beach Healthcare System as well as rotations in affiliates at Children's Hospital of Los Angeles, and Breath Mobile at Children's Hospital Orange County. Electives in subspecialty training in Rheumatology, ENT Larynx, ENT Sinus, Sinus Radiology, General Dermatology, Dermatology patch testing, Dermatopath, Pulmonary function testing, Ophthalmology and research opportunities are available.

### **Internal Medicine - Cardiology**

The three-year teaching program provided by the ACGME-approved Cardiovascular Disease fellowship program is comprised of 18 general cardiology trainees. These fellows rotate through three institutions: UCI Medical Center, Long Beach Veterans Administration Hospital, and Long Beach Memorial Medical Center, which provides additional training and experience in various cardiology subspecialties. UCI's program in cardiovascular disease adheres to training standards according to ACGME core competencies. Cardiovascular Disease program is dedicated to teaching using didactic lectures/conferences four to five times a week by visiting cardiology physicians, faculty or fellows on recent developments in catheterization methods, electrophysiology, ECG case studies, nuclear cardiology, cardiac CT and MRI, Echocardiography, and other subspecialty topics. The fellows also take part in weekly outpatient clinics offering direct interaction between fellows with faculty members. All cardiology fellows have six-months of protected research time during their three-year fellowship. During training, many fellows will achieve advanced competencies. Many of the UCI fellows pass the nuclear cardiology and echocardiography board exams during the training period. At the end of their training, fellows function as independent and competent consultants, with level II certification in core areas of cardiology.

### **Internal Medicine - Interventional Cardiology**

The Interventional Cardiology Fellowship is a one-year ACGME-approved program designed to train fellows in the use of percutaneous interventional techniques for the management of coronary, peripheral vascular and structural heart/valvular heart disease. The training includes didactic conferences, weekly case conferences, and individual fellow and faculty clinical patient reviews (pre- and post-procedure) to discuss risk, benefit, results, treatment strategies, and complications. Fellow experience is very individualized with one-on-one faculty interactions for each procedure. Trainees also assist in teaching general cardiology fellows, medicine residents, and other student groups. The fellowship functions as an integral component of the subspecialty residency in cardiology and the categorical residency program in internal medicine. During the year of interventional training, fellows are expected to master the techniques involved in coronary intervention, while developing perspective on procedural risk and benefit, patient selection, and clinical decision-making in cardiovascular patient care. At the end of the year, fellows should function as independent operators during interventional procedures. The program adheres to the tenets outlined in the ACC COCATS guidelines document and the AHA statement on clinical competency in interventional cardiology. Fellows share their time at the UCI Medical Center, Long Beach Memorial Medical Center, and the Long Beach Veterans Administration Hospital.

### **Internal Medicine - Endocrinology**

The fellowship program in Endocrinology, Diabetes and Metabolism prepares physicians for clinical and academic practice in endocrinology. The principal training sites are the UCI Medical Center and the Long Beach VA Medical Center, and additional training is provided at the Children's Hospital of Orange County (CHOC). The fellows are exposed to a broad spectrum of patients, males and females, both in in- and out-patient settings. The patients represent a broad range of ages, spanning from pediatric to endocrine cases associated with aging. The program emphasizes the

comprehension of molecular and cellular approaches to determining the pathogenesis and diagnoses of endocrine diseases. This is a two-year accredited program, but additional years of research training can be arranged for physicians interested in academic endocrinology.

### **Internal Medicine - Gastroenterology**

The gastroenterology fellowship training program is a three-year training program. The program focuses on core skills of the gastroenterologist including endoscopy, inpatient consultations, outpatient consultations, and chronic care of GI and liver conditions. Research training is a component of the training program with an emphasis on clinical research. The program offers training to ensure residents have access to a broad array of career options including community private practice, group practice and academic medicine. Trainees rotate through UCI Medical Center and the Veterans Affairs Long Beach Healthcare System. Core program faculty have a special interest in academic gastroenterology, endoscopy, inflammatory bowel disease, high-risk colon cancer, GI motility, and education.

### **Internal Medicine - Hematology Oncology**

The Division of Hematology/Oncology offers a rigorous three-year accredited fellowship program that emphasizes intensive theoretical training and a broad spectrum of clinical experience with the goal of preparing highly skilled hematologists and oncologists for careers in both clinical and academic medicine. The division's fellowship is conducted in concert with UCI's prestigious Chao Family Comprehensive Cancer Center, one of 48 U.S. comprehensive cancer centers designated for excellence by the National Cancer Institute. The multidisciplinary cancer center at UCI Medical Center is supported by more than 100 UCI faculty members from five schools and 23 departments. The division's faculty members serve patients with hematologic and oncologic disorders at the medical center, which has been ranked among the top 50 U.S. hospitals by *U.S. News & World Report*, and at the Veterans Affairs Long Beach Healthcare System. Throughout fellowship hematology/oncology fellows function as primary longitudinal caregivers to a panel of patients and serve as consultants directing the management of large numbers of patients under the supervision and guidance of faculty physicians. The fellowship program is designed to educate and support future clinical investigators who plan to dedicate their professional careers to clinical or laboratory research in hematology and oncology. The three-year combined hem/onc program is approved by the Accreditation Council for Graduate Medical Education (ACGME) and is recognized by the American Board of Internal Medicine (ABIM).

### **Internal Medicine - Hospice and Palliative Medicine**

The Palliative Medicine Fellowship is a one-year, accredited program. The fellows spend the clinical training year at multiple sites including Hoag Memorial Hospital, community hospices, Long Beach Veterans Affairs Medical Center, and Miller Children's Hospital at Long Beach Memorial Medical Center. The training includes inpatient palliative medicine consultation, outpatient palliative care clinic, an inpatient hospice unit, community hospice, pediatric hospice and palliative care, and long-term care. Examples of available electives include interventional pain management, pediatric pain management, long-term acute care, administrative medicine, and neurocritical care.

### **Internal Medicine - Infectious Disease**

The Division of Infectious Diseases offers a two-year fellowship which is accredited by the ACGME. The Fellowship offers a wide range of experiences including inpatient consultations, outpatient clinics, research, clinical microbiology, antibiotic stewardship and infection control and prevention. The two main teaching hospitals are the UCI Medical Center and the Veterans Affairs Long Beach Healthcare System. The patient population is ethnically and socioeconomically diverse and fellows manage a wide variety of disease processes. Fellows who demonstrate an early interest in research may consider a third research year of fellowship. This well-established program began in 1971 and has graduated many successful clinicians and academicians over the past 45+ years.

### **Internal Medicine - Nephrology**

The Division of Nephrology and Hypertension is committed to providing exemplary care for patients with a variety of kidney diseases. The program has earned UCI Medical Center recognition by *U.S. News & World Report* as one of the nation's top 50 hospitals for nephrology services. The program is heavily engaged in cutting-edge research and education, and lead in kidney disease research nationally and internationally in several arenas. The two-year ACGME-approved fellowship program offers fellows, residents, and medical students valuable experience in treating patients with a broad range of renal diseases and extensive didactic core lectures, grand rounds, seminars, and journal clubs. Research experience is an integral part of the educational program. Fellows are given protected time to pursue research projects under the guidance of dedicated faculty, and many research opportunities are available for interested students and residents.

### **Internal Medicine - Occupational Medicine**

The Occupational Medicine Residency Program is based in the Division of Occupational and Environmental Medicine in the Department of Medicine. It is intended for physicians who are seeking certification by the American Board of Preventive Medicine in the field of Occupational Medicine. A prerequisite to participation is a minimum of one year of postgraduate clinical training in an accredited United States or Canadian primary care program. The program generally expects entering residents to have completed a three-year primary care residency or the equivalent. The objective of the program is to train physicians to be specialists and leaders in the fields of occupational and environmental medicine. During the two-year program, residents are provided academic foundation in occupational medicine, industrial hygiene, environmental toxicology, and epidemiology. As part of this program, residents complete a Master of Science degree program in Environmental Health Sciences and complete a research thesis as part of the residency program. The program also includes extensive didactic and clinical training and field experience in occupational health and safety, interdisciplinary seminars, and a journal club in environmental and occupational medicine. Upon completion of training, the resident is qualified to enter the specialty

practice of occupational medicine as a consultant or in an occupational medicine specialty practice, workplace setting, government agency, or academic institution.

### **Internal Medicine - Pulmonary and Critical Care**

The Pulmonary Diseases and Critical Care Medicine Fellowship is a fully accredited three-year program designed to train clinicians to deliver high-quality, skilled care to patients. The highly competitive program, run by leading interventional pulmonologists, provides selected fellows with clinical research career opportunities in academic pulmonary and critical care. In addition to assuring competency and proficiency in medical care, the program's goal is to help fellows achieve independence and confidence in all clinical, academic, and educational endeavors.

### **Internal Medicine - Rheumatology**

The Division of Rheumatology offers a highly competitive, two-year fellowship program that provides extensive clinical training in rheumatic and musculoskeletal disorders. The program's focus is to train fellows to be clinically excellent regardless of what their future career path may be. The program is accredited for six fellows by the Accreditation Council for Graduate Medical Education (ACGME) and is based at two sites: the UCI Medical Center, Orange County's only academic medical center, and the Long Beach Veterans Administrative Hospital. Fellows see a diverse and complex patient population with frequent presentations of Lupus, Myositis and Vasculitis at the University and Gout, Osteoarthritis, Rheumatoid Arthritis, Psoriatic Arthritis at the VA. All fellows are exposed to Musculoskeletal Ultrasound, and the majority of fellows have completed the Ultrasound certification course by the American College of Rheumatology.

### **Neurological Surgery**

The Residency Program in Neurosurgery is a rigorous training program designed to develop academic neurosurgeons. There are ample opportunities for both clinical and basic research within the Department and in collaboration with other laboratories or departments at UCI. Applicants are expected to have a strong academic record with a strong commitment to neurosurgery. The program participates in the NRMP match program to select two candidates every other year and one candidate the years in between. Exact order of clinical rotations may vary slightly subject to the trainee's interest in neurosurgery subspecialty; however, the rotation generally proceeds as follows: the PGY-1 year consists of thirteen (13), four (4) week blocks. There are six (6) blocks of neurosurgery rotation, one (1) block of ENT rotation, one (1) block of neurology rotation, one (1) block of ACS/trauma rotation, one (1) block of elective rotation (Neuropathology and Neuroradiology), and three (3) blocks of neurocritical care rotation; PGY-2 is one year of training at UCI Medical Center assigned to neurosurgery service; PGY-3 is a nine-month rotation at UCI Medical Center, followed by a three-month elective (Interventional Radiology or Spine) at UCI Medical Center; PGY-4 is a three-month rotation at Children's Hospital of Orange County (CHOC), a three-month rotation at Tibor Rubin Veterans Affairs Medical Center, a two-month of stereotactic radiosurgery and four-month of elective rotation at UCI Medical Center; PGY-5 has an option of either a research year or a 12-month subspecialty training (i.e. enrolled fellowship); PGY-6 is a three to six-month elective rotation (Endovascular, Spine, Pediatrics), a three-month rotation at Tibor Rubin Veterans Affairs Medical Center and last three months starts the chief resident year; PGY-7 is the chief resident year and will be at UCI Medical Center with last three months of elective rotation.

### **Neurology**

Neurology residency training focuses on the development of strong clinical skills to competently evaluate and treat the large number of disorders that afflict the nervous system. During three years of training at UCI, residents have the opportunity to see a wide variety of neurological conditions and receive progressively more responsibility. The program provides a rich, intellectually stimulating environment in which to learn. UCI Neurology faculty all have broad experience caring for neurological disorders and have special expertise in different neurological disciplines. Residents have opportunities to work in many different subspecialty areas with the faculty. The neurology residency program is big enough to provide a rich environment to learn about neurological disorders, yet remains small enough for residents to work closely with each faculty member. Residents are encouraged to learn at every opportunity: from patients, peers, the faculty, and visiting experts. There are many formats in which to learn, from bedside discussions, tutorials, to specially prepared lectures. To further stimulate intellectual growth, residents are actively encouraged to pursue research in any topic of their choosing, with the guidance of the faculty.

### **Neurology - Clinical Neurophysiology**

The one-year fellowship program in Clinical Neurophysiology is accredited by the Accreditation Council of Graduate Medical Education (ACGME). The program is a joint fellowship with CHOC (Children's Hospital of Orange County). Primary emphasis is on adult routine and inpatient video EEG, as well as electro-corticography and functional brain mapping. Fellows also spend two months rotating at CHOC, gaining experience in pediatric epilepsy and EEG. Two elective months are available, which may be used to obtain experience in electromyography (EMG) or intraoperative monitoring. Clinical research opportunities are available.

### **Neurology - Neuromuscular**

The Fellowship provides comprehensive training in neuromuscular disorders, including the diagnosis and clinical management of inherited and acquired neuromuscular disorders (general neuromuscular diseases, neuropathy, muscular dystrophies, ALS and myasthenia gravis), training in electrodiagnostic medicine (EMG, single fiber EMG, quantitative sensory testing and autonomic testing), as well as nerve and muscle biopsy analysis. Given the number of patients seen in the center and weekly half-day teaching sessions in place (didactic neuromuscular lectures, review of interesting EMG cases from the week, and muscle/nerve pathology), the fellowship provides a great opportunity for well-versed education and training in Neuromuscular medicine.

### **Neurology - Vascular Neurology**

The Vascular Neurology Fellowship program offers two one-year training positions for graduates of adult neurology residency program. The fellowship strives toward training excellent stroke clinicians capable of delivering high-quality care to patients with vascular neurologic disorders in diverse patient population. The training is primarily based at the new state-of-the-art UCI Medical Center Douglas Hospital, the site of UCI Certified Comprehensive Stroke Center, the first in Orange County, CA and one of the first in the nation. The hospital has 24/7/365 advanced multimodal neuroimaging and neuro-interventional capabilities, a dedicated 12-bed Neuroscience ICU, a Neuroscience stepdown unit, and over 600 stroke admissions a year. We have six board-certified fellowship-trained Vascular Neurology Faculty, five board-certified Neuro-intensivists, and five Endovascular or Cerebrovascular Surgeons. The fellowship consists of clinical rotations on the inpatient stroke service, outpatient stroke clinic as well as electives and protected research time. Beside UCI Medical Center serving as the main site for the training, UCI main campus also provides additional opportunities resource with further potential electives based on the trainee's interests and career goals. This ACGME-accredited program fulfills the requirements necessary for vascular neurology board eligibility. While fulfilling ACGME criteria, the faculty make a concerted effort to tailor the fellowship congruent with the individual interest and career goals of the trainees, particularly research mentorship being available to those who wish to explore clinical or basic science research. The program participates in the Electronic Residency Application Service (ERAS) and the National Resident Matching Program (NRMP) for recruitment and matriculation of applicants.

### **Obstetrics & Gynecology**

The four-year program provides a solid foundation in Obstetrics and Gynecology with emphasis in the reproductive pathophysiology in the many different areas of women's health care. Based on this foundation, training continues with progressive resident responsibility for operative and medical management and surgical techniques. While predominantly clinical in scope, the program is strongly flavored by academic and research exposure. Training is provided in general obstetrics and gynecology with rotations in the subspecialties of Maternal-Fetal Medicine, Gynecologic Oncology, Female Pelvic Medicine and Reconstructive Surgery, Minimally Invasive Surgery, Family Planning and Reproductive Endocrinology, and Infertility. There are seven resident positions available each year in this four-year training program.

### **Obstetrics & Gynecology - Female Pelvic Medicine & Reconstructive Surgery (FPMRS)**

The Female Pelvic Medicine and Reconstructive Surgery (FPMRS) Fellowship in the Division of Urogynecology in the Department of Obstetrics and Gynecology is accredited by the Accreditation Council for Graduate Medical Education (ACGME). This is a three year fellowship program with training taking place at UCI and two affiliate sites. Fellows rotate with Colorectal Surgery and Urology. Post baccalaureate courses and a Masters Degree in clinical research are offered. Fellows are given opportunities to participate in clinical, translational and basic science research. Surgical training focuses on vaginal, laproscopic, and robotic approaches to pelvic organ prolapse and incontinence, sacral nerve modulation, fistula repair, and office procedures. Global health outreach is encouraged.

### **Obstetrics & Gynecology - Gynecologic Oncology**

The Gynecologic Oncology Fellowship Training Program in the Department of Obstetrics & Gynecology is a four-year program designed to produce clinician-scientists with expertise in the surgical and oncologic management of gynecologic cancers. Additional areas of focus are on clinical trials, drug development, translational research, and population statistics. The Fellowship is in its 43rd year and has been funded by a NIH T32 grant for the past 25 years. The fellowship experience includes 18 dedicated months of translational research during which time trainees develop a thesis in either the Department of Molecular Biology & Biochemistry in the School of Biological Sciences or in the Department of Epidemiology. The remaining 30 months are dedicated to graduated responsibility in clinical training at three diverse training sites the Center for Cancer Prevention and Treatment at St. Joseph's Hospital in Orange, the Todd Cancer Institute at Long Beach Memorial Medical Center, and Douglas Hospital at the UCI Medical Center. Fellows receive extensive training in cytoreductive surgery, radical surgery, minimally invasive surgery, and restorative surgery. They are also immersed in the scheduling of chemotherapy, targeted therapy, and radiation therapy planning, often as co-investigators on NRG Oncology and industry-sponsored clinical trials. Enrichment activities include integrated experiences in palliative care, critical care, pathology, and cancer genetics. Fellows are also encouraged to establish and pursue early career interests, and assistance and support are given for academic retention. Many graduates of this program currently hold leadership positions in major academic centers throughout the country and abroad. The Fellowship is accredited by the Accreditation Council for Graduate Medical Education (ACGME).

### **Obstetrics & Gynecology - Maternal Fetal Medicine**

UCI offers a three-year fellowship in Maternal Fetal Medicine, accredited by the Accreditation Council for Graduate Medical Education (ACGME). The program provides a well-rounded curriculum that balances clinical experiences, teaching opportunities, and academic and scientific activities. The program offers variety and depth due to the diversity of the two major training sites—UCI Medical Center and Long Beach Memorial Medical Center. The care of high-risk pregnancy seen through the two hospitals represents a cross-section of racial, cultural, and socioeconomic groups from a local population of more than 2.5 million. These two sites represent a broad-spectrum of perinatal practice and offer excellent opportunities to learn and teach. Clinical and basic science research conducted by the faculty in the section gives the fellow the ability to gain skills in scientific investigation. The program's superb physical environment, extraordinary clinical services, and varied research interests permit the faculty to carry out the mission of preparing fellows for a career in clinical or academic MFM.

### **Ophthalmology**

The Ophthalmology residency program at the UCI Gavin Herbert Eye Institute is four years in duration (PGY1 year is largely with internal medicine with 12 weeks of ophthalmology) and provides extensive clinical, surgical, and research training experiences. The education includes a robust weekly didactic curriculum. Trainees are exposed to a broad spectrum of disease with high volume surgical experience in the full range of ophthalmology

subspecialties. Residents rotate in cornea and refractive surgery, vitreoretinal surgery, oculoplastic and orbital surgery, glaucoma, pediatric ophthalmology and strabismus, ophthalmic pathology, uveitis, and neuro-ophthalmology, in addition to comprehensive ophthalmology. Trainees are exposed to diverse patient populations at various sites including Long Beach Veterans Affairs, UCI Medical Center, and the Gavin Herbert Eye Institute, a 70,000 square foot facility dedicated to ophthalmic patient care, surgery, and education. For more information, please visit <http://ghei.uci.edu>.

### **Orthopaedic Surgery**

The Department of Orthopaedic Surgery offers a five-year ACGME accredited residency program and currently accepts four residents each year. The program is designed to provide intense exposure, experience, and education in the subspecialties of orthopaedics: trauma/fracture care, reconstructive/joint replacement surgery, sports medicine, pediatric orthopaedics, as well as spine, foot and ankle, shoulder, and hand surgery. Exposure to non-operative and rehabilitative orthopaedic care is also provided. The program is structured for maximum resident participation with an emphasis on mentorship, didactic teaching, and supervised graduated autonomy in both the outpatient and the surgical setting. Clinical and basic science research opportunities are available, and resident participation in these academic endeavors are an integral component of the residency. The program's primary site, UCI Medical Center, is the only Level I academic medical center in Orange County, serving over 3 million residents. Other sites include the Veterans Affairs Healthcare System in Long Beach, Long Beach Memorial Medical Center, and Miller's Children's Hospital. Following completion of the orthopaedic residency program, residents are prepared to sit for the American Board of Orthopaedic Surgery certification exams and proceed to a subspecialty fellowship or enter into orthopaedic practice.

### **Orthopaedic Surgery - Hand Surgery**

The Hand Surgery Fellowship provides comprehensive training not only in hand surgery, but also in upper extremity surgery and microsurgery. The one-year ACGME accredited fellowship is based at the UCI Medical Center, Veterans Affairs Healthcare System in Long, and Children's Hospital of Orange County. The two fellows rotate with multiple fellowship-trained hand surgeons from both the Department of Orthopaedic Surgery and the Department of Plastic and Reconstructive Surgery. These rotations provide a very high volume of acute trauma and post-traumatic reconstruction of the entire upper extremity, including the hand, wrist, elbow, and shoulder; in addition to a diverse spectrum of nerve problems, brachial plexus, congenital anomalies, arthritis, and arthroscopy. Fellows gain extensive experience not only in replantation, but also in elective microsurgical reconstruction including toe-to-hand transfers, limb salvage for malignant tumors and soft-tissue coverage, and bony reconstruction of both the upper and lower extremities. Fellows receive one-on-one supervision in the operating room and outpatient clinics, but can also develop their own independent responsibility allowing them to supervise orthopaedic surgery and plastic surgery residents rotating on a combined Hand Service. There is a weekly didactic teaching conference, a monthly journal club, anatomical dissections in a fresh frozen cadaver facility, and an introductory microsurgical course. One day per week is reserved for research and basic science projects can be facilitated in laboratories focusing on biomechanics of the upper extremity and molecular biology of peripheral nerve injury.

### **Otolaryngology - Head and Neck Surgery**

The Department of Otolaryngology—Head and Neck Surgery offers a five-year residency program providing comprehensive training in otolaryngology and prepares trainees to sit for the American Board of Otolaryngology Examinations. The five-year program provides a breadth of training in general and pediatric otolaryngology, head and neck surgery, otological surgery, rhinology (including endoscopic sinus and skull base surgery), laryngology, sleep medicine and facial plastic and reconstructive surgery as well as dedicated research time. Residents receive an extensive clinical experience at UCI Medical Center, Children's Hospital of Orange County, Veterans Affairs Long Beach Healthcare System, and Kaiser Foundation Hospital-Anaheim and Irvine. Acceptance is through application and successful matching through the National Residency Matching Program. The program follows requirements set by the Accreditation Council for Graduate Medical Education.

### **Pathology - Cytopathology**

The Department of Pathology offers a one-year accredited Cytopathology Fellowship Program. The Program is designed to provide comprehensive training in diagnostic cytology including fine needle aspiration biopsy with surgical pathology and clinical correlation. Training will be provided in both gynecologic and non-gynecologic materials including performance and interpretation of fine needle aspiration biopsies. Fellows are also responsible for the weekly cytology conference, a research project, the cytopathology review courses and workshops given by the University of California, Irvine. In addition to cytopathology responsibilities, fellows will review all surgical-pathology cases of gynecologic oncology subspecialty and present them at weekly multidisciplinary tumor boards. They are exposed to research opportunities that are available in cytopathology, immunocytochemistry, and flow cytometry/image analysis.

### **Pathology - Hematopathology**

The Department of Pathology offers a one-year accredited Fellowship position in Hematopathology. The program is designed to provide comprehensive training in diagnostic hematopathology and laboratory hematology including morphologic evaluation of peripheral blood smears, body fluids, bone marrow, lymph nodes and other tissue, performance of bone marrow procedure, interpretation of laboratory hematology, coagulation, flow cytometry, immunohistochemistry, chromosomal and molecular cytogenetics and molecular diagnostics. The fellow is trained and serves as the primary consultant for the hematology laboratory mainly in UCI Medical Center with approximately 1,400,000 hematology and coagulation tests per year and 1,600 hematopathology cases including bone marrow, flow cytometry, lymph nodes, other tissue and referral/consultation cases. The fellow is also provided with the learning opportunities at Children's Hospital of Orange County for pediatric hematopathology and NeoGenomics laboratories for cytogenetics and molecular diagnostics. The fellow participates with faculty mentors to gain experience in laboratory management, teaching medical students, residents and fellows, and developing and conducting scholarly and research activities in the broad field of hematopathology.

## Pediatrics

The Pediatric Residency Program emphasizes the interrelationship of patient care, didactic teaching, and research in the training of the pediatric resident physician. The focus is on the total care of the child from birth through young adulthood. A strong clinical and educational foundation is provided through experiences in a broad spectrum of disease and/or injury as well as training in biosocial pediatrics, preventive health care, and community resources. The program offers variety and depth due to the diversity of the Department's major teaching hospitals—Children's Hospital of Orange County, Miller Children's Hospital (located at Long Beach Memorial Medical Center), and UCI Medical Center. The faculty at these institutions provides a comprehensive teaching program in general pediatrics and cover the full range of pediatric subspecialties. The care of children seen through the three hospitals represents a cross-section of racial, cultural, and socioeconomic groups from a local population of more than 2.5 million. Thus, pediatric residents are exposed to a wide range of problems presented in settings ranging from intensive care to supervised office-based practice.

### Pediatric Child Neurology

The Child Neurology program offers a traditional three-year training program for pediatric residents who have completed two or three years of pediatric training, or have participated in the specialized child neurology research track as per the training guidelines of the ABPN. The program offers a clinically-focused curriculum with extensive didactic and bedside teaching. As per ACGME requirements, residents have 12 months of adult neurology training, 12 months of clinical child neurology, and approximately 12 months of elective rotations. Residents complete the majority of their training at the UCI Medical Center and Children's Hospital of Orange County as well as rotations at various locations including outpatient subspecialty clinics, Center for Autism and Neurodevelopmental Disabilities, and Miller Children's Hospital in Long Beach. Faculty are all board certified in child neurology and many of the faculty have subspecialty training and board certification in specialties such as epilepsy, clinical neurophysiology, sleep medicine, and neurodevelopmental disabilities. In addition to clinical emphasis, residents have the opportunity for exposure to areas of active clinical research, including epilepsy, concussion, neuromuscular disorders, and sleep.

### Pediatric Critical Care Medicine

The Pediatric Critical Care Medicine fellowship program is a three-year ACGME accredited fellowship based at the Children's Hospital of Orange County (CHOC). The fellowship program prepares highly skilled Pediatric Intensivists for careers in both clinical and academic medicine. CHOC has a long history of training excellent Pediatric Critical Care fellows, and with a 30-bed Pediatric Intensive Care Unit (PICU) ([https://urldefense.com/v3/\\_\\_https://www.choc.org/programs-services/pediatric-intensive-care-unit/\\_\\_;!!OLgoXmg!ANxn7Gpul7wD35MU7Xa1LRrRBRgo0gErVo2AKdh37MROuJhJVbUJ3YUnqlogittag\\$/](https://urldefense.com/v3/__https://www.choc.org/programs-services/pediatric-intensive-care-unit/__;!!OLgoXmg!ANxn7Gpul7wD35MU7Xa1LRrRBRgo0gErVo2AKdh37MROuJhJVbUJ3YUnqlogittag$/)) and a 12-bed Cardiovascular Intensive Care Unit (CVICU) ([https://urldefense.com/v3/\\_\\_https://www.choc.org/heart/cardiovascular-intensive-care-unit/\\_\\_;!!OLgoXmg!ANxn7Gpul7wD35MU7Xa1LRrRBRgo0gErVo2AKdh37MROuJhJVbUJ3YUnqmrQJctTQ\\$/](https://urldefense.com/v3/__https://www.choc.org/heart/cardiovascular-intensive-care-unit/__;!!OLgoXmg!ANxn7Gpul7wD35MU7Xa1LRrRBRgo0gErVo2AKdh37MROuJhJVbUJ3YUnqmrQJctTQ$/)) that jointly has over 2,000 admissions per year, CHOC provides Pediatric Critical Care fellows with a broad range of clinical exposure. For more information about the fellowship program, visit <https://www.choc.org/careers/residency-training-programs/choc-pediatric-critical-care-medicine-fellowship-program/> ([https://urldefense.com/v3/\\_\\_https://www.choc.org/careers/residency-training-programs/choc-pediatric-critical-care-medicine-fellowship-program/\\_\\_;!!OLgoXmg!ANxn7Gpul7wD35MU7Xa1LRrRBRgo0gErVo2AKdh37MROuJhJVbUJ3YUnqmaKBUBow\\$/](https://urldefense.com/v3/__https://www.choc.org/careers/residency-training-programs/choc-pediatric-critical-care-medicine-fellowship-program/__;!!OLgoXmg!ANxn7Gpul7wD35MU7Xa1LRrRBRgo0gErVo2AKdh37MROuJhJVbUJ3YUnqmaKBUBow$/)).

### Pediatric Endocrinology

The UCI/CHOC Pediatric Endocrinology Fellowship Program offers a three-year training program in a fully accredited, university-based fellowship program. CHOC Children's is a community-based hospital in the heart of Southern California (Orange, California) and serves as the main clinical teaching site. CHOC Children's is a free-standing children's hospital that has national recognition for providing patients with first-class care in state-of-the-art facilities. CHOC is an extensive healthcare system featuring the main hospital in Orange and a referral place for specialty care from at least 14 primary care health centers, community clinics, and mobile health vans. UCI/CHOC also provides top-notch medical education to students, pediatrics residents and other fellowships.

The endocrine and diabetes program aims to prepare fellows for careers as leaders in clinical or academic medicine through a superior academic and professional atmosphere. The program includes a year of largely clinical training in a high-volume inpatient and outpatient setting, followed by two years of basic science, clinical or translational research. The program is designed to meet the ACGME requirements for fellowship training, so fellows may be successful and eligible for board certification. The program aims to provide the fellow with:

- Structured one-on-one mentoring to help guide their chosen career path
- Opportunities for conducting and presenting research (basic science, translational, clinical and educational) as well as quality improvement projects
- Promoting a collaborative culture and ensuring protection to the fellow to ensure wellness and minimize "burnout" amidst creating resilience
- Experience to provide patient-centered, evidence-based, high quality and innovative care to patients and their families

For more information, visit <https://www.choc.org/careers/residency-training-programs/uci-choc-pediatric-endocrinology-fellowship-program/>.

### Pediatric - Medical Genetics and Genomics

UCI offers two ACGME-accredited Medical Genetics and Genomics clinical training programs:

- A two-year categorical Clinical Genetics/Genomics program that requires prior satisfactory completion of 24 months of ACGME-accredited residency training in a specialty other than Medical Genetics. After successful completion of the Genetics program, trainees can apply for active candidacy to take the American Board of Medical Genetics and Genomics (ABMG) examinations.

- A four-year combined Pediatrics/Clinical Genetics/Genomics residency that can be entered after completion of medical school and that devotes 24 core months to Pediatrics, 18 core months to Clinical Genetics, and 6 months applicable to both specialties. The first year is spent in pediatrics in direct patient care experiences, the next 30 months alternate between Pediatrics and Medical Genetics for periods of 6 months each, and the last 6 months comprise an individualized study curriculum applicable to both specialties and/or research. After successful completion of the combined program, trainees can apply for active candidacy to take both the Pediatrics and the Medical Genetics and Genomics board examinations.

In each of the programs, the Clinical Genetics and Genomics curriculum comprises a minimum of 18 months of broad-based, clinically-oriented medical genetics activities, including inpatient consultations; outpatient prenatal, pediatric, adult, cancer genetics, metabolic genetics, and specialty clinics, and clinical laboratory rotations in cytogenetics and molecular cytogenetics, molecular genetics, and metabolic genetics. The curriculum also includes didactic courses (basic concepts, cytogenetics and molecular cytogenetics, quantitative genetics, genetic screening, human teratology, clinical and prenatal genetics, clinical biochemical genetics, clinical molecular genetics and bioinformatics, hereditary cancer risk counseling, ethical issues in human genetics, genetic counseling, and research methods), weekly clinical teaching and patient followup conferences, and journal club. The combined program also includes additional extensive clinical and didactic curricula in Pediatrics. Training occurs in three large teaching hospitals: UCI Medical Center, Children's Hospital of Orange County, and Miller Children's Hospital/Long Beach Memorial Medical Center. Both the categorical and the combined programs include research time and, to a large extent, an individualized curriculum.

The Clinical Genetics and Genomics training programs include exceptional evaluation and management opportunities with a culturally, socioeconomically, and medically diverse patient population and extensive individual teaching interactions with faculty. Clinical and basic science research conducted by faculty provides trainees with opportunities to develop skills and gain experience in scientific investigation.

### **Pediatric Hematology Oncology**

The Pediatric Hematology Oncology fellowship program is a three-year ACGME accredited fellowship based at Children's Hospital of Orange County.

The fellowship program prepares highly skilled pediatric hematologists and oncologists for careers in both clinical and academic medicine. The fellowship program is designed to educate and support future clinical investigators who plan to dedicate their professional careers to clinical or laboratory research in hematology and oncology.

### **Pediatric Infectious Diseases**

The Pediatric Infectious Diseases Fellowship Program is supported by UCI and CHOC Children's. Applications are accepted for qualified candidates through ERAS. The three-year training program includes approximately 14 months of clinical training and 20 months of research experience. The first year is primarily clinical and primarily based at CHOC. The inpatient ID service is divided into two services, the inpatient ward service and the ICU/Hematology-Oncology service. Fellows rotate on eight 4-week blocks during the first year on these teams. Each service generally sees 12-20 patients daily. Three 4-week blocks are devoted to research in the first year to allow fellows to explore possible research topics and select a research mentor. Research mentors are available through both CHOC and UCI and opportunities for lab research are strengthened by the research excellence of the infectious diseases team from UCI. During the first year of training, fellows will also do one 4-week rotation in adult ID medicine at the UCI Medical Center, an invaluable experience exposing them to the differences, intricacies and overlap of infectious diseases in the adult vs pediatric setting. During each of second and third year, fellows spend nine 4-week blocks on research, with three 4-week blocks on the inpatient services. Fellows participate in a 2-week rotation at the Orange County Health Care Agency to train in epidemiology of infectious diseases, obtain exposure to lab techniques and diagnostics tests available through the health department, and learn about outbreak investigation and mitigation. Throughout the three years, fellows will rotate through the Pediatric Infectious Disease, Immunodeficiency and HIV/KIDS clinics at CHOC. At the successful completion of this program, candidates will be able to sit for their boards in Pediatric Infectious Diseases.

### **Pediatric Neonatal-Perinatal Medicine**

UCI offers a three-year fellowship in Neonatal-Perinatal Medicine, accredited by the Accreditation Council for Graduate Medical Education (ACGME). The program provides a well-rounded curriculum that balances between clinical experiences, teaching opportunities, and academic and scientific activities. The program offers variety and depth due to the diversity of the two major training sites—UCI Medical Center and Long Beach Memorial Medical Center/Miller Children's Hospital. The care of newborns seen through the two hospitals represents a cross-section of racial, cultural, and socioeconomic groups from a local population of more than 2.5 million. These two sites represent a broad-spectrum of neonatal practice and offer excellent opportunities to learn and teach. Clinical and basic science research conducted by the faculty in the section gives the fellow the ability to gain skills in scientific investigation. The program's superb physical environment, extraordinary clinical services, and varied research interests permit the faculty to carry out the mission of preparing neonatal fellows for a career in clinical or academic neonatology. In addition, the program collaborates clinically and through research with a superb fellowship training in Maternal-Fetal Medicine that is also based at the two institutions. The Neonatal-Perinatal Medicine Fellowship training consists of 14 months of direct patient care responsibilities, 19 months of research training, and three months of vacation.

### **Pediatric Pulmonology**

UCI partners with Miller Children's Hospital in offering one of the few pediatric pulmonology fellowship training programs in California. The program has been in existence for more than 26 years and has attracted outstanding candidates from the United States and internationally. The pulmonary fellowship offers tailored, innovative research projects for fellows, as well as a thorough and comprehensive program in pediatric and pulmonary medicine. The program offers a special track program for candidates interested in pursuing a career in academic pediatrics. This candidate will have a research focus in exercise physiology in children and will be eligible for a Masters in Clinical Science at UCI. The research interests of fellows include such topics as air

pollution and asthma in children, immunological aspects of lung disease, exercise and the impact of immunity, and growth factor in children. Research is conducted at the Translational Pulmonary & Immunology Research Center in Long Beach. The six faculty members of the pediatric pulmonology program are supported by private, federal, and NIH grants.

### **Physical Medicine & Rehabilitation**

The Department of Physical Medicine & Rehabilitation (PM&R) offers a three-year residency program for applicants who have completed a 12-month ACGME accredited internship. The residency program's focus is on the diagnosis and comprehensive treatment and care of patients of all ages with functional impairments due to conditions such as musculoskeletal disorders, neurological disorders, trauma, amputation, and congenital abnormalities. Residents rotate at the UCI Medical Center, the Tibor Rubin VA Medical Center and Long Beach Memorial Medical Center. PM&R Residents are involved in research and medical student teaching.

### **Physical Medicine & Rehabilitation - Spinal Cord Injury**

The Spinal Cord Injury Medicine Fellowship is a one-year accredited program. The fellow rotates through three teaching institutions: Tibor Rubin VA Medical Center, Rancho Los Amigos National Rehabilitation Center, and UCI Medical Center. The Spinal Cord Injury Center at the Tibor Rubin VA Medical Center is the largest SCI Center in the nation within the Veterans Healthcare System with 77 bed capacity. Inpatient units treat complex medical/surgical cases, which include ventilator-dependent spinal cord injuries. Outpatient services include general and focused primary care for geriatric patients and SCI patients with diabetes. There are specialty clinics, such as surgical care (urology and plastic surgery), upper extremity restoration (tendon transfers), annual evaluations, shoulder clinic, wheelchair clinics and driver's training. Rancho Los Amigos National Rehabilitation Center (RLANRC) is a world renowned rehabilitation hospital with unique learning opportunities including spasticity, post-polio, and orthopedic rehabilitation clinics. In addition, RLANRC provides experiences in pediatric spinal cord disorders in acute, subacute, and rehabilitation settings, care of spinal bifida patients and an opportunity to learn about problems associated with transition from childhood to adulthood in persons with SCI. UCIMC is a level 1 trauma center which offers the SCI fellow the opportunity to understand the multidisciplinary approach for the acute management of traumatic spinal cord injury. The fellow will learn the clinical pathway guidelines for the critical care management of acute traumatic spinal cord injury and to understand the role of the physiatrist consult in the care of the acute spinal cord injured patient. In addition to the academic and clinical work, our fellows are expected to participate in performance improvement projects, shadow the chief/program director to various hospital-wide administrative meetings and actively participate in teaching of other trainees and colleagues.

### **Plastic Surgery**

The Department of Plastic Surgery has a fully integrated residency program. The program currently accepts three residents for a six-year educational training experience in Plastic Surgery. The goals and objectives of this program are to educate plastic surgeons who are analytical and scholarly in their approach to surgical problem solving, broadly experienced in all fields of the specialty, safe in their application of judgment and technique, and ultimately self-educating in a lifelong continuing medical education process. The goals and teaching philosophy are based on the graduate school model, which emphasizes analytic problem solving, scholarly use of the knowledge base and scientific resources of the field, development of judgment skills, and identification of educational tools that produce the ability to self-direct one's lifelong professional education in a scholarly manner. At the successful completion of this program, candidates will be able to sit for their boards in Plastic Surgery.

### **Psychiatry**

The Psychiatry Residency Training Program is a four-year program that fosters academic excellence and broad clinical experience in general psychiatry in a balanced, evidence based and patient-centered manner. Residents receive extensive supervised training in psychopharmacology and various modalities of psychotherapy. The core curriculum includes weekly didactic seminars and supervised clinical experiences in the following areas: adult inpatient and outpatient psychiatry, psychodynamic psychotherapy, child and adolescent psychiatry, geriatric neuropsychiatry, primary care, neurology, emergency psychiatry, consultation and liaison psychiatry, forensic psychiatry, and addiction psychiatry. Our training program, including weekly didactics, emphasizes the importance of using a 'biopsychosocial' and individualized approach to patient care. Psychopharmacologic, psychotherapeutic and integrated psychiatric care (e.g. collaborative care or telepsychiatry) is presented in a way which underscores the importance of becoming expert in all of these areas upon graduation from the program. Opportunities for research abound with expert faculty available to provide guidance. Throughout their training, by treating a highly diverse patient population, residents acquire competency in culturally-sensitive psychiatric assessment and treatment, as well as with different systems-based practices. The program is based at the UCI Medical Center and includes three inpatient units, a partial hospitalization program, an expanding outpatient clinic and a new sleep center, among other sites. The flexible curriculum and supportive faculty allow residents to pursue elective interests in research, teaching, and administrative psychiatry, ensuring attainment of the residents' career goals.

### **Psychiatry - Child Psychiatry**

The Child & Adolescent Psychiatry Fellowship Training Program is a two-year program that builds on the training already completed in a General Psychiatry Residency. It provides subspecialty training in how to specifically evaluate and treat individuals younger than 18 years old by accounting for this population's unique characteristics. Fellows are able to complement their developing knowledge base and clinical decision-making skills with a compassionate, humanistic approach. Our program emphasizes training in biological, psychological, and social modalities, as we strongly believe that a multidisciplinary approach is vital to providing excellent psychiatric care to children, adolescents and their families. Clinical experiences have been developed to provide exposure to the wide variety of psychiatric diagnoses and issues facing children and adolescents, as well as prepare our fellows for the diverse populations they may encounter post-graduation. Training opportunities include: acute inpatient treatment, partial hospitalization, consult-

liaison service, emergency psychiatry, trauma-focused therapy clinic for victims of child abuse, school consultation at UCI's Child Development Center, and juvenile forensic rotations.

### **Radiation Oncology**

The Residency Training Program in Radiation Oncology is designed to prepare suitably qualified individuals for academic and clinical practice careers in Radiation Oncology. Candidates enter a four-year program which encompasses clinical service, didactic teaching, and integrated research experience. Beyond exposure to a variety of conventional and precision-oriented external beam treatment technologies such as IMRT (Intensity-Modulated Radiation Therapy), SRS (Stereotactic Radiosurgery), and SBRT (Stereotactic Body Radiation Therapy), opportunities exist for training in interstitial and intracavitary brachytherapy using special applicators. Clinical applications based on fundamental principles in Radiation Physics and Biology are emphasized, while trainees attain competence in implementing multidisciplinary cancer care based on sound judgment of evidence-based medicine. The program includes rotations at three participating hospitals: UCI Medical Center, Veterans Affairs Long Beach Healthcare System, and UCSD/Rady Children's Hospital for pediatrics rotation.

### **Radiological Sciences - Diagnostic Radiology**

The Department of Radiological Sciences offers a four-year residency training program in diagnostic radiology, including all aspects of medical imaging. Resident training is conducted primarily at the UCI Medical Center and the Veterans Affairs Long Beach Healthcare System (LBVA), supplemented by rotations in Pediatric Radiology at CHOC Children's. The LBVA is an integral component of resident education. Exceptional faculty, quality didactic conferences, and a community-based patient population at the VA strengthen resident education and broaden residents' clinical exposure. The program offers a required dedicated research rotation in addition to elective time that can be used for research. Nearly all residents have published journal articles, co-authored book chapters, and/or presented at national and local society meetings. As a whole, the program is resident-centered and offers an exceptionally well-rounded training experience designed to prepare residents for careers in either academic radiology or private practice.

### **Radiological Sciences - Interventional Radiology (Independent)**

The Department of Radiological Sciences offers a two-year residency training program in interventional radiology through an independent program. Completion of an accredited diagnostic radiology residency program is required for entry into the independent program. Both ESIR and non-ESIR candidates are welcomed. Graduates will be eligible for dual board certification in IR/DR. The well-rounded training experience is designed to prepare residents for careers in either academic radiology or private practice. Residents participate in the entire gamut of modern interventional radiology care with an emphasis on pre- and post-procedure management and clinic patient evaluations. Participation in ongoing research projects, publications, and submission to regional and national meetings is highly encouraged and supported.

### **Radiological Sciences - Interventional Radiology (Integrated)**

The Department of Radiological Sciences offers a five-year ACGME-approved residency-training program in interventional radiology through an integrated program. The first three years focus on diagnostic radiology and the last two years focus on interventional radiology. Graduates will be eligible for dual board certification in IR and DR. Resident training is conducted primarily at the UCI Medical Center and the Veterans Affairs Long Beach Healthcare System, supplemented by rotations in Pediatric Radiology at CHOC Children's. As a whole, the program is resident-centered and offers an exceptionally well-rounded training experience designed to prepare residents for careers in either academic radiology or private practice.

### **Radiological Sciences - Neuroradiology**

A one-year ACGME-approved fellowship is offered in Diagnostic Neuroradiology. The fellow will spend 10 months of the 12-month fellowship in training and experience in the interpretation of studies of brain, spine, and head and neck disorders. A dedicated month of Pediatric Neuroradiology is included in the training program, typically on assignment to Loma Linda University Medical Center. Additional time will be spent in Interventional Neuroradiology with experience and training in both diagnostic and therapeutic vascular studies, as well as time spent on relevant nuclear medicine techniques. Participation in the ongoing research projects and publications of the section is encouraged.

### **Surgery - General Surgery**

The General Surgery program places strong emphasis on provision of excellent clinical care, establishing new horizons in minimally invasive surgery, education of residents and medical students in all aspects of surgery, and high-level surgical research. The program trains and prepares some of the finest surgeons in the country for the rigors of academic or private practice as well as subsequent fellowship training. The general surgery residency program's integrated and affiliated training sites include rotations in surgical oncology, cardiothoracic, vascular, gastrointestinal, colorectal, hepatobiliary, general surgery, surgical critical care, pediatric surgery, emergency general surgery, and trauma/acute care surgery. UCI's faculty and volunteer faculty, as well as that of affiliate institutions, are committed to teaching and provide residents with a variety of resources and opportunities to engage their surgical knowledge. Surgical residents perform clinical rotations at the UCI Medical Center, the Veterans Affairs Long Beach Hospital, Long Beach Memorial Medical Center, Mission Hospital and Children's Hospital of Orange County. Residents interested in research will find a broad range of resources and mentors. While not required, research during residency imbues critical skills and exposes the resident to the an additional dimension of academic surgery. Options for one or two years of dedicated research outside of the clinical track are available. Fully accredited by the ACGME, UCI's General Surgery Residency Program emphasizes the surgeon of the future in its curriculum—providing world class surgical care while minimizing the footprint left behind. The program practices and abides by the motto coined by former chair, David Hoyt, M.D., FACS, "When you see one of us, you see all of us." Resident applications are accepted entirely through ERAS and determined via the NRMP process. All candidates interested in pursuing

a general surgery residency will have completed medical school prior to residency's June start, and have applied through ERAS with a complete application.

### **Surgery - Colon & Rectal Surgery**

The Colon and Rectal Surgery Residency Program is a one-year accredited fellowship program available for residents who have previously completed General Surgery training. Fellowship interviews are held during the autumn of the year prior to the anticipated August start date. The Colon and Rectal Surgery fellowship program participates in the NRMP match program. Presently, the fellow spends the entire year on the UCI Medical Center campus rotating with the five colon and rectal surgeons who practice there. In addition, the fellow works with Gastroenterology attending physicians during the year regarding additional endoscopy training. Fellows participate in weekly conferences that include selected educational topics, quality improvement, journal club, and multidisciplinary conference regarding complex cancer and inflammatory bowel disease management. In addition, travel to meetings is supported for a selected research project during the year. The fellow will undergo extensive training in diseases of the colon, rectum, pelvic floor and anus. Advanced surgical training will include inflammatory bowel disease, colon and rectal cancer, diverticulitis, laparoscopy and robotic surgery, anorectal surgery, pelvic floor disease management, and endoscopy. All candidates interested in pursuing a Colorectal Fellowship must be board certified/eligible graduates from an ACGME-approved surgical residency.

### **Surgical Critical Care**

The Surgical Critical Care Fellowship is a one-year ACGME-accredited program with an opportunity for an optional non-accredited second year. As a surgical critical care fellow, experience will be gained working at UCI Medical Center in the Division of Trauma, Burns, Surgical Critical Care and Acute Care Surgery. UCI has both an ACS-verified Level I Trauma Center with approximately 4500 trauma activations per year and an ACS/ABA-verified regional Burn Center with over 225 admissions per year. There are over 6,000 ICU admissions per year, and fellows gain experience with core rotations in the SICU and elective experiences in the Neuro ICU, Burn ICU, Cardiovascular ICU, Pediatric ICU, and Medicine ICU. Extensive exposure to trauma resuscitation, operative management, emergency general surgery, and bedside ICU procedures is provided. Didactics include weekly core critical care lectures, case conferences, hands-on point of care ultrasound course, and Scientific American Surgical Critical Care program. Fellows attend a variety of educational courses sponsored by the American College of Surgeons including: Advanced Surgical Skills Exposure in Trauma (ASSET), Advanced Trauma Life Support (ATLS), and Disaster Management and Emergency Preparedness (DMEP). The optional second year is individually tailored to the needs of the fellow, and may include advanced experiences in trauma surgery, acute care surgery, quality and safety, and research. Applications to the Surgical Critical Care program are accepted through SAFAS. Applicants must be board-certified/eligible graduates from an ACGME-accredited surgical residency program.

### **Urology - Urological Surgery**

The Department of Urology Residency Program is a five-year training program with three residents per year. The PGY 1 (internship) consists of six months of urology rotations and six months of non-urologic rotations including core general surgery rotations. The PGY 2-5 years provide training in all aspects of adult and pediatric urologic diseases. The residents receive extensive training in open and endoscopic procedures, laparoscopy and other minimally invasive techniques, urologic pathology, uro-radiology, and management of non-operative urologic conditions. The program's training hospitals include UCI Medical Center, Veterans Affairs Long Beach Healthcare System, Long Beach Memorial Medical Center, and Children's Hospital of Orange County. The Department of Urology encourages and supports both clinical and basic science research.

### **Urology - Pediatric**

The Pediatric Urology Fellowship program, is an ACGME accredited program, leading to qualification for the American Board of Urology's Subspecialty Certification in Pediatric Urology. This is a two-year fellowship, centered at the Children's Hospital of Orange County (CHOC), and UCI. Four Pediatric Urologists, faculty in the Department of Urology, oversee a full clinical program in which trainees are guided through all aspects of Pediatric Urology. One year is fully clinical, and a second year is split between clinical and research activities. Research projects may make full use of the robotic and surgical simulation and animal facilities at UCI. Collaborative meetings are regularly held within the Urology Department, in which the Fellows are encouraged to present materials and participate. In addition, regular meetings at CHOC, include Radiology, Nephrology, Endocrinology Rounds, DSD Rounds, and scheduled Didactics. There are opportunities for international travel for volunteer missions. The entry to the Fellowship requires the completion of a recognized Urology residency, and the application is coordinated by the Society of Pediatric Urology matching program.

## **Anesthesiology**

The Anesthesiology Residency Program is an ACGME-accredited, four-year categorical program. Our program is dedicated to providing an exceptional educational experience to develop the next generation of board-certified physician anesthesiologists and leaders in our field.

Our innovative 4U Didactic Program includes Point-of-Care Ultrasound (POCUS) training, high-fidelity simulations, hands-on workshops, problem-based learning discussions, wellness series, practice management, and professional development. The PGY-1 and CA-1 (PGY-2) years cover the fundamentals of anesthesiology and perioperative medicine to provide a solid foundation on which to build advanced and subspecialty clinical knowledge and skills during the CA-2 (PGY-3) and CA-3 (PGY-4) years. Residents gain broad and diverse clinical experience through rotations at UCI Medical Center, Children's Hospital of Los Angeles (CHLA), Long Beach Memorial Medical Center, Kaiser Permanente Los Angeles, Veterans Affairs Long Beach Healthcare System, and Children's Hospital of Orange County (CHOC). Residents also have the opportunity for participation in medical missions, in partnership with faculty, through our Global Outreach Initiative.

## Dermatology

The Department of Dermatology offers a three-year accredited residency which has 15 residents, five for each of three postgraduate years. Residents rotate through clinics at UCI and the Veteran Affairs Long Beach Healthcare System and receive extensive training in medical and surgical dermatology. Residents rotate through specialty clinics which see patients with immunobullous disease, pigmentary disorders, vascular birthmarks, pediatric disorders, hair disorders, and melanoma. Residents receive extensive training in Mohs surgery, laser techniques, excisional surgery, performance of flaps and grafts, and administration of cosmetic agents. Residents are also active in research and present at local, national, and international meetings.

## Emergency Medicine

The Emergency Medicine residency was established in 1988 and has full accreditation by the Residency Review Committee. The program has 24 residents, eight for each of three postgraduate years. The UCI Medical Center Emergency Department is a high-acuity, Level I Trauma Center, treating over 50,000 patients annually. Nineteen board-certified emergency medicine faculty provide 24-hour patient care and supervision of residents and medical students. The Department of Emergency Medicine is active in disaster preparedness and response, emergency uses of ultrasound, public affairs, community service, and research in the areas of prehospital care, educational technology, trauma, health policy, and infectious disease, among others.

## Family Medicine

The University of California, Irvine Family Medicine Residency Program strives to train excellent clinicians who provide the best patient-centered compassionate medical care to our most vulnerable and underserved communities. The residency is a fully accredited program with both faculty and residents who practice out of the only academic federally qualified health center in the entire state of California. The residency incorporates technology and innovation in a unique community-academic hybrid educational setting that provides a rich and intensive clinical training environment. Residents obtain exceptional clinical skills while promoting community engagement, patient advocacy and the practice of socially responsible and culturally appropriate care. We aim to graduate physician leaders dedicated to medically underserved communities.

## Geriatrics

The Geriatric Medicine Fellowship is a comprehensive and challenging one-year advanced training program that prepares physicians to deliver compassionate, informed care to a diverse aging population. The clinical opportunities allow geriatric fellows to explore both the depth and breadth of geriatric medicine through longitudinal primary care experiences and rotations in a variety of sub specialty clinical settings.

The heart of the fellowship is in UCI's SeniorHealth Center, where fellows have their continuity and consultation clinics. Here, fellows work with a continuity attending on a weekly basis, learning the art and medicine of geriatric ambulatory care. Some of the subspecialty rotations at UCI include a memory disorders clinic, subacute care, neurology, dermatology, cardiology, rheumatology, and more.

At the Veterans Administration Center in Long Beach, fellows participate in the Geriatric Evaluation Management (GEM) clinic, an interdisciplinary program which assesses the medical and psychosocial status of frail older patients. The goal is to optimize each military veteran's health, function, and ability to live with the greatest degree of independence possible. The VA offers inpatient and outpatient geropsychiatry, a Parkinson's clinic, memory and movement disorders, palliative care, aging with disabilities, and physical medicine and rehabilitation.

Our program is also affiliated with skilled nursing facilities, as well as the country's first Elder Abuse Forensic Center. We offer electives in integrative medicine, community resources, or additional experiences in any of the above rotations.

## Internal Medicine

The internal medicine residency program is a traditional three-year training program and also sponsors a one-year preliminary medicine program in addition the ABIM certified research pathway. The program focuses on core educational skills of the internist and offers training to ensure our residents have access to a broad array of career options including hospitalist medicine, primary care, and subspecialty training. Residents rotate through UCI Medical Center, the Veterans Affairs Long Beach Healthcare System, and Long Beach Memorial Medical Center. Core program faculty have a special interest in academic internal medicine and education. Subspecialty fellowships are offered in basic and clinical allergy/immunology, cardiology, endocrinology and metabolic diseases, gastroenterology, geriatrics, hematology/oncology, infectious disease, nephrology, palliative care, pulmonary/critical care, and rheumatology.

## Medical Genetics and Genomics

UCI offers three Medical Genetics and Genomics training programs:

1. A two-year categorical Clinical Genetics/Genomics residency that requires prior satisfactory completion of 24 months of ACGME-accredited residency training in a specialty other than Medical Genetics. After successful completion of the Genetics program, trainees can apply for active candidacy to take the American Board of Medical Genetics and Genomics (ABMG) examinations.
2. A four-year combined Pediatrics/Clinical Genetics/Genomics residency that can be entered after completion of medical school and that devotes 24 core months to Pediatrics, 18 core months to Clinical Genetics, and 6 months applicable to both specialties. The first year is spent in pediatrics in direct patient care experiences, the next 30 months alternate between Pediatrics and Medical Genetics for periods of 3 to 6 months each, and the last 6 months comprise either an individualized curriculum applicable to both specialties or research. After successful completion of the combined program, trainees can apply for active candidacy to take both the Pediatrics and the Medical Genetics and Genomics board examinations.

3. A four-year combined Maternal-Fetal Medicine/Clinical Genetics/Genomics training program that requires prior satisfactory completion of 4 years of ACGME-accredited training in Obstetrics and Gynecology. After successful completion of the combined program, trainees can apply for active candidacy to take both the Maternal-Fetal Medicine and the Medical Genetics and Genomics board examinations.

In each of the three programs, the Clinical Genetics and Genomics curriculum comprises a minimum of 18 months of broad-based, clinically-oriented medical genetics activities, including inpatient consultations, outpatient prenatal, pediatric, adult, cancer genetics, metabolic genetics, and specialty clinics, and clinical laboratory rotations in cytogenetics and molecular cytogenetics, molecular genetics, and metabolic genetics. The curriculum also includes didactic courses (basic concepts, cytogenetics and molecular cytogenetics, genetic epidemiology, clinical and prenatal genetics, clinical biochemical genetics, clinical molecular genetics and bioinformatics, cancer genetics, ethics, genetic counseling, and research methods), weekly clinical teaching and patient followup conferences, and journal club. The two combined programs include additional extensive clinical and didactic curricula in Pediatrics and Maternal-Fetal Medicine, respectively. Training occurs in three teaching hospitals: UCI Medical Center, Children's Hospital of Orange County, and Miller Children's Hospital/Long Beach Memorial Medical Center. Maternal-Fetal Medicine also utilizes St. Joseph Medical Center and Long Beach Memorial Women's Hospital.

The Clinical Genetics and Genomics training programs include exceptional evaluation and management opportunities with a diverse patient population and extensive individual teaching interactions with faculty. Clinical and basic science research conducted by faculty provides trainees with opportunities to develop skills and gain experience in scientific investigation.

## Neonatal-Perinatal Medicine

UCI offers a three-year fellowship in Neonatal-Perinatal Medicine, accredited by the Accreditation Council for Graduate Medical Education (ACGME). The program provides a well-rounded curriculum that balances between clinical experiences, teaching opportunities, and academic and scientific activities. The program offers variety and depth due to the diversity of the two major training sites—UCI Medical Center and Long Beach Memorial Medical Center/Miller Children's Hospital. The care of newborns seen through the two hospitals represents a cross-section of racial, cultural, and socioeconomic groups from a local population of more than 2.5 million. These two sites represent a broad-spectrum of neonatal practice and offer excellent opportunities to learn and teach. Clinical and basic science research conducted by the faculty in the section gives the fellow the ability to gain skills in scientific investigation. The program's superb physical environment, extraordinary clinical services, and varied research interests permit the faculty to carry out the mission of preparing neonatal fellows for a career in clinical or academic neonatology. In addition, the program collaborates clinically and through research with a superb fellowship training in Maternal-Fetal Medicine that is also based at the two institutions. The Neonatal-Perinatal Medicine Fellowship training consists of 14 months of direct patient care responsibilities, 19 months of research training, and three months of vacation.

## Neurology

Neurology residency training focuses on the development of strong clinical skills to competently evaluate and treat the large number of disorders that afflict the nervous system. During three years of training at UCI, residents have the opportunity to see a wide variety of neurological conditions and receive progressively more responsibility. The program provides a rich, intellectually stimulating environment in which to learn. UCI Neurology faculty all have broad experience caring for neurological disorders and have special expertise in different neurological disciplines. Residents have opportunities to work in many different subspecialty areas with the faculty. The neurology residency program is big enough to provide a rich environment to learn about neurological disorders, yet remains small enough for residents to work closely with each faculty member. Residents are encouraged to learn at every opportunity: from patients, peers, the faculty, and visiting experts. There are many formats in which to learn, from bedside discussions, tutorials, to specially prepared lectures. To further stimulate intellectual growth, residents are actively encouraged to pursue research in any topic of their choosing, with the guidance of the faculty.

## Neurosurgery

The UCI Residency Program in Neurosurgery is a rigorous training program designed to develop academic neurosurgeons. There are ample opportunities for both clinical and basic research within the Department and in collaboration with other laboratories or departments at UCI. Applicants are expected to have a strong academic record with a strong commitment to neurosurgery. The program participates in the NRMP match program to select two candidates every other year and one candidate the years in between. Exact order of clinical rotations may vary slightly subject to the trainee's interest in neurosurgery subspecialty; however, the rotation generally proceeds as follows: the PGY-1 year consists of thirteen (13), four (4) week blocks. There are six (6) blocks of neurosurgery rotation, one (1) block of ENT rotation, one (1) block of neurology rotation, one (1) block of ACS/trauma rotation, one (1) block of elective rotation (Neuropathology and Neuroradiology), and three (3) blocks of neurocritical care rotation; PGY-2 is one year of training at UCI Medical Center assigned to neurosurgery service; PGY-3 is a nine-month rotation at UCI Medical Center, followed by a three-month elective (Interventional Radiology or Spine) at UCI Medical Center; PGY-4 is a three-month rotation at Children's Hospital of Orange County (CHOC), a three-month rotation at Tibor Rubin Veterans Affairs Medical Center, a two-month of stereotactic radiosurgery and four-month of elective rotation at UCI Medical Center; PGY-5 has an option of either a research year or a 12-month subspecialty training (i.e. enfolded fellowship); PGY-6 is a three to six-month elective rotation (Endovascular, Spine, Pediatrics), a three months rotation at Tibor Rubin Veterans Affairs Medical Center and last three months starts the chief resident year; PGY-7 is the chief resident year and will be at UCI Medical Center with last three months of elective rotation.

## Obstetrics and Gynecology

This four-year program provides a solid foundation in Obstetrics and Gynecology with emphasis in the reproductive pathophysiology in the many different areas of women's health care. Based on this foundation, training continues with progressive resident responsibility for operative and medical management and surgical techniques. While predominantly clinical in scope, the program is strongly flavored by academic and research exposure.

Training is provided in general obstetrics and gynecology with rotations in the subspecialties of Maternal-Fetal Medicine, Gynecologic Oncology, Female Pelvic Medicine and Reconstructive Surgery, Minimally Invasive Surgery, Family Planning and Reproductive Endocrinology, and Infertility. There are seven resident positions available each year in this four-year training program. For more information, visit <https://www.obgyn.uci.edu/obgyn-residency.asp>.

## Ophthalmology

The Ophthalmology Residency Program at UCI's Gavin Herbert Eye Institute is three years in duration and provides extensive clinical and surgical training experiences. The education includes a robust weekly didactic curriculum. Trainees are exposed to a broad spectrum of ophthalmic disease management with high volume surgical experience in the full range of ophthalmology subspecialties. Residents rotate in cornea and refractive surgery, vitreoretinal surgery, oculoplastic and orbital surgery, glaucoma, pediatric ophthalmology and strabismus, ophthalmic pathology, uveitis, and neuro-ophthalmology, in addition to comprehensive ophthalmology. Trainees are exposed to diverse patient populations at various sites including Long Beach Veterans Affairs, and UCI Medical Center, as well as Gavin Herbert Eye Institute, a 70,000 square foot facility dedicated to ophthalmic patient care, surgery, and education.

## Orthopaedic Surgery

The Department of Orthopaedic Surgery at the University of California, Irvine offers a five-year ACGME accredited residency program and currently accepts four residents each year. The program is designed to provide intense exposure, experience, and education in the subspecialties of orthopaedics: trauma/fracture care, reconstructive/joint replacement surgery, sports medicine, pediatric orthopaedics, as well as spine, foot and ankle, shoulder, and hand surgery. Exposure to non-operative and rehabilitative orthopaedic care is also provided. The program is structured for maximum resident participation with an emphasis on mentorship, didactic teaching, and supervised graduated autonomy in both the outpatient and the surgical setting. Clinical and basic science research opportunities are available, and resident participation in these academic endeavors are an integral component of the residency. The program's primary site, UCI Medical Center, is the only Level I Academic medical center in Orange County, serving over 3 million residents. Other sites include the Veterans Affairs Healthcare System in Long Beach, Long Beach Memorial Medical Center, and Miller's Children's Hospital. Following completion of the orthopaedic residency program, residents are prepared to sit for the American Board of Orthopaedic Surgery certification exams and proceed to a subspecialty fellowship or enter into orthopaedic practice.

## Otolaryngology—Head and Neck Surgery

The Department of Otolaryngology—Head and Neck Surgery offers a five-year residency program providing comprehensive training in otolaryngology and prepares trainees to sit for the American Board of Otolaryngology Examinations. The five-year program provides a breadth of training in general and pediatric otolaryngology, head and neck surgery, otological surgery, rhinology (including endoscopic sinus and skull base surgery), laryngology, and facial plastic and reconstructive surgery. Residents receive an extensive clinical experience at UCI Medical Center, Children's Hospital of Orange County, Veterans Affairs Long Beach Healthcare System, and Kaiser Foundation Hospital-Anaheim and Irvine. Acceptance is through application and successful matching through the National Residency Matching Program. The program follows requirements set by the Accreditation Council for Graduate Medical Education.

## Pain Medicine Fellowship

The Pain Medicine Fellowship at UCI Health is an intensive one-year ACGME-accredited multidisciplinary training program. The comprehensive training includes pain assessment, treatment, and management, covering both inpatient and outpatient care, including both adult and pediatric pain medicine, with a special focus on advanced interventional techniques. The fellowship includes hands-on training in interventional neuraxial interventions, neuromodulation techniques, intrathecal drug delivery systems, and peripheral nerve blocks, among others procedures. Fellows work closely with specialists in anesthesiology, physical medicine and rehabilitation, neuroradiology, palliative care, neurology, primary care, and psychiatry to gain a comprehensive understanding of pain management.

The program includes a strong didactic curriculum and participation in scholarly activities is strongly encouraged. Fellows get exposure in practice management and business administration.

For candidates with an interest in pain related research, the UCI Center for Pain Wellness has a strong complement of basic and translational researchers with active laboratories in pain related to spinal cord injury and mechanisms of chronic pain.

## Pediatrics

The Pediatric Residency Program emphasizes the interrelationship of patient care, didactic teaching, and research in the training of the pediatric resident physician. The focus is on the total care of the child from birth through young adulthood. A strong clinical and educational foundation is provided through experiences in a broad spectrum of disease and/or injury as well as training in biosocial pediatrics, preventive health care, and community resources.

The program offers variety and depth due to the diversity of the Department's major teaching hospitals—Children's Hospital of Orange County, Miller Children's Hospital (located at Long Beach Memorial Medical Center), and UCI Medical Center. The faculty at these institutions provides a comprehensive teaching program in general pediatrics and cover the full range of pediatric subspecialties. The care of children seen through the three hospitals represents a cross-section of racial, cultural, and socioeconomic groups from a local population of more than 2.5 million. Thus, pediatric residents are exposed to a wide range of problems presented in settings ranging from intensive care to supervised office-based practice.

## Physical Medicine and Rehabilitation

The Department of Physical Medicine and Rehabilitation offers a three-year residency for applicants who have completed a 12-month ACGME accredited internship. The residency program focus is on the diagnosis and comprehensive treatment and care of patients with musculoskeletal, neurological problems or cardiopulmonary disabilities, from newborns to the elderly. Residents rotate at the UCI Medical Center, the Veterans Affairs Long Beach Healthcare System, Long Beach Memorial Hospital, and St. Jude Hospital. PM&R Residents are involved in research and medical student teaching.

## Plastic Surgery

The Department of Plastic Surgery at the University of California, Irvine has a fully integrated residency program. The program currently accepts three residents for a six-year educational training experience in Plastic Surgery. The goals and objectives of this program are to educate plastic surgeons who are analytical and scholarly in their approach to surgical problem solving, broadly experienced in all fields of the specialty, safe in their application of judgment and technique, and ultimately self-educating in a lifelong continuing medical education process. The goals and teaching philosophy are based on the graduate school model, which emphasizes analytic problem solving, scholarly use of the knowledge base and scientific resources of the field, development of judgment skills, and identification of educational tools that produce the ability to self-direct one's lifelong professional education in a scholarly manner. At the successful completion of this program, candidates will be able to sit for their boards in Plastic Surgery.

## Preventive Medicine - Occupational Medicine

The Occupational Medicine Residency Program is based in the Division of Occupational and Environmental Medicine, Department of Medicine. It is intended for physicians who are seeking certification by the American Board of Preventive Medicine in the field of Occupational Medicine. A prerequisite to participation is a minimum of one year of postgraduate clinical training in an accredited United States or Canadian primary care program. The program generally expects entering residents to have completed a three-year primary care residency or the equivalent. The objective of the program is to train physicians to be specialists and leaders in the fields of occupational and environmental medicine. During the two year program, residents are provided academic foundation in occupational medicine, industrial hygiene, environmental toxicology, and epidemiology. As part of this program, residents complete a Master of Science degree program in Environmental Health Sciences and complete a research thesis as part of the residency program. The program also includes extensive didactic and clinical training and field experience in occupational health and safety, interdisciplinary seminars, and a journal club in environmental and occupational medicine. Upon completion of training, the resident is qualified to enter the specialty practice of occupational medicine as a consultant or in an occupational medicine specialty practice, workplace setting, government agency, or academic institution.

## Psychiatry

The Psychiatry Residency Training Program is a four-year program that fosters academic excellence and broad clinical experience in general psychiatry in a balanced, evidence based and patient-centered manner. Residents receive extensive supervised training in psychopharmacology and various modalities of psychotherapy. The core curriculum includes weekly didactic seminars and supervised clinical experiences in the following areas: adult inpatient and outpatient psychiatry, psychodynamic psychotherapy, child and adolescent psychiatry, geriatric neuropsychiatry, primary care, neurology, emergency psychiatry, consultation and liaison psychiatry, forensic psychiatry, and addiction psychiatry. Our training program, including weekly didactics, emphasizes the importance of using a 'biopsychosocial' and individualized approach to patient care. Psychopharmacologic, psychotherapeutic and integrated psychiatric care (e.g. collaborative care or telepsychiatry) is presented in a way which underscores the importance of becoming expert in all of these areas upon graduation from the program. Opportunities for research abound with expert faculty available to provide guidance. Throughout their training, by treating a highly diverse patient population, residents acquire competency in culturally-sensitive psychiatric assessment and treatment, as well as with different systems-based practices. The program is based at the UCI Medical Center and includes three inpatient units, a partial hospitalization program, an expanding outpatient clinic and a new sleep center, among other sites. The flexible curriculum and supportive faculty allow residents to pursue elective interests in research, teaching, and administrative psychiatry, ensuring attainment of the residents' career goals.

## Radiology, Diagnostic

The Department of Radiological Sciences has an ACGME-approved four-year residency program in diagnostic radiology based at the UCI Medical Center and integrated with the Veterans Affairs Long Beach Healthcare System. There are also month-long Pediatric Radiology rotations at Children's Hospital of Orange County. The objectives of the program are (1) to train competent radiologists with a solid background in all modalities of imaging and interventional procedures, (2) to provide a conducive atmosphere and to encourage opportunities for residents to participate in translational and basic science research as well as patient care quality improvement and healthcare economics, and (3) to provide elective periods in which residents have the opportunity to increase their clinical radiology expertise or to work on research projects during their residency training. The residency program includes sub-specialized training in interventional, cardiothoracic, abdominal, pediatric, musculoskeletal radiology, as well as breast imaging, neuroradiology, and molecular imaging. Residents are exposed to a variety of modalities including radiography, fluoroscopy, computed tomography (CT), magnetic resonance imaging (MRI), ultrasonography, mammography, nuclear medicine, and molecular imaging. All residents participate in scholarly activities and are encouraged to complete at least one research project during the program. The program provides a month-long research block; residents are required to complete at least one scholarly project during residency. Candidates are accepted for six positions at the PGY-2 level for the four-year program. Fellowships are available for an additional year in specialized areas following the successful completion of the residency. The newest technologies in the field of radiological sciences are available at UCI Medical Center and affiliated institutions. The program sponsors a four-week course in radiology-pathology correlation training, as well as training in radiology physics.

## Radiation Oncology

The Residency Training Program in Radiation Oncology is designed to prepare suitably qualified individuals for academic and clinical practice careers in Radiation Oncology. Candidates enter a four-year program which encompasses clinical service, didactic teaching, and integrated research experience. Beyond exposure to a variety of conventional and precision-oriented external beam treatment technologies such as IMRT (Intensity-Modulated Radiation Therapy), SRS (Stereotactic Radiosurgery), and SBRT (Stereotactic Body Radiation Therapy), opportunities exist for training in interstitial and intracavitary brachytherapy using special applicators. Clinical applications based on fundamental principles in Radiation Physics and Biology are emphasized, while trainees attain competence in implementing multidisciplinary cancer care based on sound judgment of evidence-based medicine. The program includes rotations at three participating hospitals: UCI Medical Center, Veterans Affairs Long Beach Healthcare System, and Long Beach Memorial Medical Center.

## Surgery

The University of California, Irvine General Surgery program places strong emphasis on provision of excellent clinical care, establishing new horizons in minimally invasive surgery, education of residents and medical students in all aspects of surgery, and high-level surgical research. Our program trains and prepares some of the finest young surgeons in the country for the rigors of academic or private practice as well as subsequent fellowship training.

Our general surgery residency program's integrated and affiliated training sites include rotations in surgical oncology, cardiothoracic, vascular, gastrointestinal, colorectal, hepatobiliary, general surgery, surgical critical care, pediatric surgery, emergency general surgery, and trauma/acute care surgery. UCI's faculty and volunteer faculty, as well as that of our affiliate institutions, are committed to teaching and provide residents with a variety of resources and opportunities to engage their surgical knowledge. Surgical residents perform clinical rotations at our UCI Medical Center, the Veteran's Affairs - Long Beach Hospital, Long Beach Memorial Medical Center, Mission Hospital and Children's Hospital of Orange County.

Residents interested in research will find a broad range of resources and mentors. While not required, research during residency imbues critical skills and exposes the resident to the an additional dimension of academic surgery. Options for one or two years of dedicated research outside of the clinical track are available.

Fully accredited by the ACGME, UCI's General Surgery Residency Program emphasizes the surgeon of the future in its curriculum—providing world class surgical care while minimizing the footprint we leave behind. We practice and abide by the motto coined by our former chair, David Hoyt, M.D., FACS, "When you see one of us, you see all of us."

Resident applications are accepted entirely through ERAS and determined via the NRMP process. All candidates interested in pursuing a general surgery residency will have completed medical school prior to residency's June start, and have applied through ERAS with a complete application.

## Urology

The Department of Urology Residency Program is a five-year training program that includes a one-year internship in the Department of Surgery and four years of Urology training. The residency program provides training in all aspects of adult and pediatric urologic diseases. The residents receive extensive training in open and endoscopic procedures, laparoscopy and other minimally invasive techniques, urologic pathology, uro-radiology, and management of non-operative urologic conditions. The program's training hospitals include UCI Medical Center, Veterans Affairs Long Beach Healthcare System, Long Beach Memorial Medical Center, and Children's Hospital of Orange County. The Urology Department encourages and supports both clinical and basic science research.

## Faculty

Pablo J. Abbona, M.D. National University of Cuyo, *Health Sciences Clinical Professor of Radiological Sciences*

Geoffrey W. Abbott, Ph.D. University of London, *Senior Associate Dean for Academic Personnel and Vice Dean for Basic Science Research and Professor of Physiology and Biophysics; Physiology and Biophysics*

Hermelinda G. Abcede, M.D. Medical College of Wisconsin, *Health Sciences Assistant Clinical Professor of Neurology*

Nadine Abi-Jaoudeh, M.D. University of Montreal, *Professor of Radiological Sciences*

Munjal Acharya, Ph.D. Maharaja Sayajirao University of Baroda, *Assistant Professor in Residence of Radiation Oncology*

Felice C. Adler-Shohet, M.D. Vanderbilt University, *Health Sciences Associate Clinical Professor of Pediatrics*

Behnoosh Afghani, M.D. University of Southern California, *Health Sciences Clinical Professor of Pediatrics*

Anshu Agrawal, Ph.D. Lucknow University, *Professor in Residence of Medicine*

Thomas E. Ahlering, M.D. Saint Louis University, *Chair in Urologic Oncology and Professor of Urology*

Jane C. Ahn, M.D. City University of New York, Mount Sinai, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Kyle Ahn, M.D. New York Medical College, *Vice Chair for Academic Affairs and Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Shlomit Aizik, Ph.D. Tel Aviv University, *Associate Professor of Pediatrics*

Yama Akbari, Ph.D. University of California, Irvine, *Assistant Professor of Neurology; Neurological Surgery*

Muthana S. Al-Ghazi, Ph.D. University of Manitoba, *Health Sciences Clinical Professor of Radiation Oncology*

Bruce Albala, Ph.D. Syracuse University, *Associate Dean of Innovation of Clinical Trials and Adjunct Professor of Neurology*

Gregory C. Albers, Ph.D. University of California, Los Angeles, *Health Sciences Clinical Professor of Medicine*

Navid Alem, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Isabel M. Algaze Gonzalez, M.D. University of Puerto Rico, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Michael T. Alkire, M.D. University of California, Los Angeles, *Professor in Residence of Anesthesiology and Perioperative Care*

Byron J. Allen, M.D. University of California, Los Angeles, *Health Sciences Professor of Medicine*

Ihab B. Alomari, M.D. University of Jordan, *Health Sciences Assistant Clinical Professor of Medicine*

Alpesh N. Amin, M.D. M.B.A. Northwestern University, *Department Chair and Thomas and Mary Cesario Endowed Chair in Medicine and Professor of Medicine; Biomedical Engineering; Paul Merage School of Business; Program in Public Health; Radiological Sciences*

Arash Anavim, M.D. University of Tehran, *Health Sciences Clinical Professor of Radiological Sciences*

Bogi Andersen, M.D. University of Iceland, *Professor of Medicine; Biological Chemistry*

Aileen J. Anderson, Ph.D. University of California, Irvine, *Director of the Sue and Bill Gross Stem Cell Research Center and Professor of Physical Medicine and Rehabilitation; Anatomy and Neurobiology*

Rosa M. Andrade, M.D. Universidad Peruana Cayetano Heredia, *Assistant Professor of Medicine*

Katherine M. Andreeff, M.D. Wayne State University, *Health Sciences Associate Clinical Professor of Pediatrics*

Hoda Anton-Culver, Ph.D. University of St. Andrews, *Professor of Medicine*

Elham Arghami, M.D. Mashhad University of Medical Sciences, *Health Sciences Assistant Clinical Professor of Family Medicine*

Jeffrey Armstrong, M.D. University of South Carolina, *Health Sciences Associate Clinical Professor of Pediatrics*

William B. Armstrong, M.D. University of Washington, *Department Chair and Professor of Otolaryngology; Neurological Surgery*

Antonio C. Arrieta, M.D. Cayetano Heredia University, *Health Sciences Clinical Professor of Pediatrics*

Jeffrey S. Arroyo, M.D. University of California, Los Angeles, *Health Sciences Assistant Clinical Professor of Family Medicine*

Muhammad Aslam, M.D. Punjab University, *Health Sciences Clinical Professor of Pediatrics*

Scott Atwood, Ph.D. University of Oregon, *Assistant Professor of Developmental and Cell Biology; Dermatology*

Elizabeth Aubry, M.D. University of Toledo, *Health Sciences Associate Clinical Professor of Medicine*

Donna G. Baick, M.D. Finch University of Health Sciences, The Chicago School of Medicine, *Health Sciences Associate Clinical Professor of Obstetrics and Gynecology*

Pierre F. Baldi, Ph.D. California Institute of Technology, *Director of the Institute for Genomics and Bioinformatics and Distinguished Professor of Computer Science; Biological Chemistry; Biomedical Engineering; Developmental and Cell Biology; Mathematics* (artificial intelligence and machine learning, biomedical informatics, databases and data mining, environmental informatics, statistics and statistical theory)

Rupali R. Banker, M.D. The Ohio State University, *Health Sciences Assistant Clinical Professor of Medicine*

Fayez M. Bany-Mohammed, M.D. University of Jordan, *Health Sciences Clinical Professor of Pediatrics*

Afshan Baraghoush, M.D. Albert Einstein College of Medicine, *Health Sciences Assistant Clinical Professor of Medicine*

Tallie Z. Baram, M.D., Ph.D. University of Miami, *Weizmann Institute of Science and Danette 'Dee Dee' Shepard Chair in Neurological Studies and Distinguished Professor of Pediatrics; Anatomy and Neurobiology; Neurology; Physiology and Biophysics*

Edward Barawid, D.O. Western University of Health Sciences, *Health Sciences Assistant Clinical Professor of Physical Medicine and Rehabilitation*

Alan G. Barbour, M.D. Tufts University, *Distinguished Professor of Microbiology and Molecular Genetics; Ecology and Evolutionary Biology; Medicine*

Cristobal Barrios, M.D. University of Miami, *Assistant Dean of Admissions and Health Sciences Clinical Professor of Surgery*

James D. Barry, M.D. Uniformed Services University, *Health Sciences Clinical Professor of Emergency Medicine*

Ailin Barseghian El-Farra, M.D. New York Medical College, *Health Sciences Assistant Clinical Professor of Medicine*

Anjan S. Batra, M.D. Ohio State University, *Professor of Pediatrics*

Samuel Baz, M.D. University of Southern California, *Health Sciences Associate Clinical Professor of Medicine*

Kevin T. Beier, Ph.D. Harvard University, *Assistant Professor of Physiology and Biophysics; Pharmaceutical Sciences*

Ruth M. Benca, M.D. Ph.D. University of Chicago, *Department Chair and Professor of Psychiatry and Human Behavior; Neurobiology and Behavior*

Lbachir Benmohamed, Ph.D. Pasteur Institute, *Professor of Ophthalmology*

Rimal B. Bera, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Psychiatry and Human Behavior*

Michael W. Berman, M.D. George Washington University, *Professor Emeritus of Obstetrics and Gynecology*

Stephen M. Berman, M.D. Rush University, *Health Sciences Clinical Professor of Medicine*

Nicole P. Bernal, M.D. Case Western Reserve University, *Health Sciences Associate Clinical Professor of Surgery*

Michael W. Berns, Ph.D. Cornell University, *Arnold and Mabel Beckman Chair in Laser Biomedicine and Professor of Surgery; Biomedical Engineering; Developmental and Cell Biology*

Naveen D. Bhandarkar, M.D. Ohio State University, *Associate Clinical Professor of Otolaryngology; Neurological Surgery*

Rishi Bhargava, M.D. Indiana University, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Nitin Narain Bhatia, M.D. Baylor College of Medicine, *Department Chair and Professor of Orthopaedic Surgery*

Edna E. Bidy, M.D. Universidad Autonoma de Baja California, *Health Sciences Assistant Clinical Professor of Family Medicine*

John T. Billimek, Ph.D. University of California, Irvine, *Associate Professor of Family Medicine*

Biraj Bista, M.D. Kasturba Medical College and Hospital, *Health Sciences Assistant Clinical Professor of Radiological Sciences*

Cassiana E. Bittencourt, M.D. Universidade Metropolitana de Santos, *Health Sciences Assistant Clinical Professor of Pathology and Laboratory Medicine*

Maureen E. Bocian, M.D. University of Illinois, *Senate Emerita of Pediatrics; Genetic Counseling*

Stephen C. Bondy, Ph.D. University of Birmingham, *Professor of Medicine; Environmental Health Sciences; Program in Public Health*

Boris H. Borazjani, M.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Surgery*

Peyman Borghei, M.D. Tehran University of Medical Sciences, *Health Sciences Assistant Clinical Professor of Radiological Sciences*

Emiliana Borrelli, Ph.D. University of Strasbourg, *Chancellor's Professor of Microbiology and Molecular Genetics; Pharmaceutical Sciences*

Daniela A. Bota, M.D., Ph.D. Carol Davila University of Medicine and Pharmacy, *Chief Scientific Officer, Center for Clinical Research and Vice Dean for Clinical Research and Associate Professor of Neurology; Neurological Surgery; Pathology and Laboratory Medicine*

Robert G. Bota, M.D. Carol Davila University of Medicine and Pharmacy, *Health Sciences Clinical Professor of Psychiatry and Human Behavior*

Elliot L. Botvinick, Ph.D. University of California, San Diego, *Professor of Surgery; Biomedical Engineering*

Matthew T. Brady, M.D. Tufts University, *Health Sciences Assistant Clinical Professor of Surgery*

Alexander U. Brandt, M.D. Charite - Universitaetsmedizin Berlin, *Associate Adjunct Professor of Neurology*

Elizabeth A. Brem, M.D. SUNY Buffalo, *Health Sciences Assistant Clinical Professor of Medicine*

Matthew Brenner, M.D. University of California, San Diego, *Professor of Medicine*

Robert E. Bristow, M.D. M.B.A. University of Southern California; Johns Hopkins University, *Edward J. Quilligan Administrative Chair in Obstetrics and Gynecology and Philip J. Di Saia, M.D., Prestigious Chair in Gynecologic Oncology and Department Chair and Professor of Obstetrics and Gynecology*

Yvette Brooks, M.D. University of Cincinnati, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Ashley Broussard, M.D. Tulane University, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Donald J. Brown, Ph.D. University of Colorado Denver, *Senate Emeritus of Ophthalmology*

Andrew Browne, M.D., Ph.D. University of Cincinnati, *Health Sciences Assistant Clinical Professor of Ophthalmology; Biomedical Engineering*

Taylor J. Brueseke, M.D. Pennsylvania State University, *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

David K. Buchbinder, M.D. Medical College of Wisconsin, *Health Sciences Associate Professor of Pediatrics*

Michael J. Buchmeier, Ph.D. McMaster University, *Professor of Medicine; Microbiology and Molecular Genetics; Molecular Biology and Biochemistry*

Rémi Buisson, Ph.D. Université Laval, *Assistant Professor of Biological Chemistry; Pharmaceutical Sciences*

Steven J. Bunch, M.D. University of Utah, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

William E. Bunney, M.D. University of Pennsylvania, *Associate Dean of Research Administration and Development and Della Martin Chair in Psychiatry and Distinguished Professor Emeritus of Psychiatry and Human Behavior*

Amanda Burkhardt, Ph.D. University of California, Irvine, *Assistant Adjunct Professor of Physiology and Biophysics*

Keith R. Burnett, M.D. Creighton University, *Health Sciences Clinical Professor of Radiological Sciences*

Joseph E. Burns, M.D. McGill University, *Health Sciences Associate Clinical Professor of Radiological Sciences*

Michael J. Burns, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Emergency Medicine; Medicine*

Claudia Buss, Ph.D. McGill University, *Associate Adjunct Professor of Pediatrics*

Ani Bussel, M.D. Rosalind Franklin University of Medicine and Science, *Health Sciences Assistant Clinical Professor of Medicine*

Jennifer R. Butler, M.D. University of Virginia, *Health Sciences Associate Clinical Professor of Obstetrics and Gynecology*

John A. Butler, M.D. Loyola University Chicago, *Professor of Surgery*

Matthew J. Butteri, M.D. University of Southern California, *Health Sciences Associate Clinical Professor of Medicine*

Michael D. Cahalan, Ph.D. University of Washington, *Department Chair and Distinguished Professor of Physiology and Biophysics*

Vincent J. Caiozzo, Ph.D. University of California, Irvine, *Professor Emeritus of Orthopaedic Surgery; Environmental Health Sciences*

Anne L. Calof, Ph.D. University of California, San Francisco, *Professor of Anatomy and Neurobiology; Developmental and Cell Biology*

Joan E. Campbell, M.D. University of California, San Diego, *Health Sciences Clinical Professor of Radiological Sciences*

Belinda Campos, Ph.D. University of California, Berkeley, *Associate Professor of Chicano/Latino Studies; Family Medicine; Psychological Science (culture, relationships, positive emotion, health)*

Fabio Cappuccini, M.D. University of Bologna, *Health Sciences Clinical Professor of Obstetrics and Gynecology*

Joseph C. Carmichael, M.D. University of Missouri-Columbia, *Health Sciences Associate Clinical Professor of Surgery*

Jennifer N. Cech, Ph.D. University of Washington, *Health Sciences Assistant Clinical Professor of Pediatrics; Genetic Counseling*

Thomas C. Cesario, M.D. University of Wisconsin-Madison, *Professor Emeritus of Medicine*

Bharath Chakravarthy, M.D. Boston University, *Associate Clinical Professor of Emergency Medicine; Program in Public Health*

Mark D. Chambers, M.D. University of Illinois at Urbana-Champaign, *Health Sciences Associate Clinical Professor of Radiological Sciences*

Jefferson Chan, M.D. Ph.D. University of California, San Francisco, *Professor of Pathology and Laboratory Medicine; Environmental Health Sciences*

Joanna L. Chan, M.D. Stanford University, *Health Sciences Assistant Clinical Professor of Medicine*

Vishal S. Chandan, M.D. Maharashtra University of Health Sciences, *Health Sciences Clinical Professor of Pathology and Laboratory Medicine*

Carrie E. Chandwani, M.D. Chicago Medical School, *Health Sciences Associate Clinical Professor of Emergency Medicine*

Huiyi Chang, Ph.D. National Cheng Kung University, *Assistant Professor in Residence of Urology*

Ian Chang, D.O. Michigan State University, *Health Sciences Assistant Clinical Professor of Medicine*

Kenneth J. Chang, M.D. Brown University, *Director, H.H. Chao Comprehensive Digestive Disease Center and Vincent and Anna Kong Chair in Gastrointestinal Endoscopic Oncology and Professor of Medicine*

Melissa Chang, M.D. University of Alabama, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Pei Lin Chang, M.D. Chicago Medical School, *Health Sciences Assistant Clinical Professor of Pediatrics*

Peter Chang, M.D. Northwestern University, *Assistant Professor in Residence of Radiological Sciences; Computer Science; Pathology and Laboratory Medicine*

Wayne Wei Chung Chang, M.D. Saint Louis University, *Health Sciences Clinical Professor of Medicine; Program in Public Health*

Yongen Chang, M.D. Ph.D. Fudan University; Cornell University, *Health Sciences Assistant Clinical Professor of Medicine*

Elizabeth C. Chao, M.D. University of California, Irvine, *Assistant Adjunct Professor of Pediatrics; Genetic Counseling*

Anthony Chau, M.D. University of California, Los Angeles, *Health Sciences Assistant Clinical Professor of Surgery*

David Chaylan, M.D. University of Iowa, *Assistant Adjunct Professor of Radiological Sciences*

Allen M. Chen, M.D. Yale University, *Department Chair and Professor of Radiation Oncology*

Constance L. Chen, M.D. University of Southern California, *Health Sciences Associate Clinical Professor of Medicine*

Dongbao Chen, Ph.D. China (Beijing) Agricultural University, *Professor of Obstetrics and Gynecology*

Jefferson W. Chen, M.D. Ph.D. Johns Hopkins University, *Health Sciences Clinical Professor of Neurological Surgery*

Joline L. Chen, M.D. University of Toronto, *Health Sciences Associate Clinical Professor of Medicine*

Lily K. Chen, D.O. Western University of Health Sciences, *Health Sciences Assistant Clinical Professor of Physical Medicine and Rehabilitation*

Lulu Y. Chen, Ph.D. University of California, Irvine, *Assistant Professor of Anatomy and Neurobiology*

Phang-Lang Chen, Ph.D. University of California, San Diego, *Associate Professor of Biological Chemistry*

Tempe K. Chen, M.D. Albert Einstein College of Medicine, *Health Sciences Assistant Clinical Professor of Pediatrics*

Amy H. Cheng, M.D. Georgetown University, *Health Sciences Assistant Clinical Professor of Pediatrics*

Michael Cheng, D.O. Western University of Health Sciences, *Health Sciences Assistant Clinical Professor of Medicine*

Timmy T. Cheng, M.D. University of California, San Diego, *Health Sciences Assistant Clinical Professor of Medicine*

Steven D. Chessler, M.D., Ph.D. University of Washington, *Associate Professor of Medicine*

Theresa Lynn Chin, M.D. Virginia Commonwealth University, *Health Sciences Assistant Clinical Professor of Surgery*

Katherine Chiu, M.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Bernard H. Choi, Ph.D. University of Texas at Austin, *Professor of Surgery; Biomedical Engineering*

Ho Joon Choi, M.D. Seoul National University, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

Judy M. Choi, M.D. Cornell University, *Assistant Professor of Urology*

Yoon Jae Choi, M.D. Korea University, *Health Sciences Assistant Clinical Professor of Neurology*

Chinsui J. Chou, M.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Daniel Chow, M.D. University of California, Los Angeles, *Assistant Professor in Residence of Radiological Sciences; Neurology; Pathology and Laboratory Medicine*

Emilie L. Chow, M.D. Chicago Medical School, *Health Sciences Clinical Professor of Medicine*

Eleanor Chu, M.D. New York Medical College, *Health Sciences Assistant Clinical Professor of Radiological Sciences*

Kai-Wen Chuang, M.D. University of California, San Francisco, *Health Sciences Assistant Clinical Professor of Urology*

Nkiruka Chuba, M.D. University of California, San Francisco, *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

Judith H. Chung, M.D. Ph.D. University of Pennsylvania; University of California, Los Angeles, *Professor of Obstetrics and Gynecology*

Peter J. Chung, M.D. Columbia University, *Health Sciences Assistant Clinical Professor of Pediatrics*

Ralph V. Clayman, M.D. University of California, San Diego, *Ralph V. Clayman Endowed Chair in Endourology and Professor of Urology*

Katherine E. Coakley, M.D. Boston University, *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

Melitza J. Cobham-Browne, M.D. Universidad de Panamá, *Health Sciences Clinical Professor of Pediatrics*

Amber R. Coffey-Leis, M.D. Johns Hopkins University, *Health Sciences Assistant Clinical Professor of Orthopaedic Surgery; Plastic Surgery*

Allen J. Cohen, M.D. University of Miami, *Health Sciences Clinical Professor of Radiological Sciences*

Rebecca J. Coleman, M.D. University of California, San Francisco, *Health Sciences Associate Clinical Professor of Pediatrics*

Lisa Colosimo, D.O. Midwestern University - Arizona College of Osteopathic Medicine, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Freddie Combs, M.D. University of Arizona, *Health Sciences Associate Clinical Professor of Radiological Sciences*

Dan M. Cooper, M.D. University of California, San Francisco, *Senior Associate Dean, Clinical Translational Science and Associate Vice Chancellor, Clinical Translational Research and Professor of Pediatrics; Biomedical Engineering; Pharmaceutical Sciences*

Maria M. Corrada-Bravo, Sc.D. Johns Hopkins University, *Professor in Residence of Neurology; Epidemiology*

Carl W. Cotman, Ph.D. Indiana University, *Professor of Neurology; Neurobiology and Behavior*

Ardith Courtney, D.O. University of North Texas, *Health Sciences Associate Clinical Professor of Neurology*

Elana M. Craemer, M.D. Albert Einstein College of Medicine, *Health Sciences Assistant Clinical Professor of Family Medicine*

Katie Cramer, M.D. Stanford University, *Health Sciences Assistant Clinical Professor of Medicine*

Bridgit O. Crews, Ph.D. University of California, Santa Barbara, *Health Sciences Assistant Clinical Professor of Pathology and Laboratory Medicine*

David H. Cribbs, Ph.D. West Virginia University, *Professor Emeritus of Neurology*

Robert W. Crow, M.D. University of Southern California, *Health Sciences Associate Clinical Professor of Ophthalmology; Neurology*

Roger L. Crumley, M.D. University of Iowa, *Professor Emeritus of Otolaryngology*

Brian J. Cummings, Ph.D. University of California, Irvine, *Associate Dean of Faculty Development - Senate and Professor of Physical Medicine and Rehabilitation; Anatomy and Neurobiology*

Daniel J. Cwikla, M.D. University of Texas Health Science Center at San Antonio, *Health Sciences Assistant Clinical Professor of Urology*

Ralph W. Cygan, M.D. State University of New York Downstate Medical Center, *Health Sciences Professor of Medicine*

Jeremy Cypen, M.D. University of Miami, *Health Sciences Assistant Clinical Professor of Medicine*

James Cyriac, M.D. SUNY Upstate Medical University, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Dvora Cyrlak, M.D. Yale University, *Health Sciences Clinical Professor of Radiological Sciences*

Mudit Dabral, M.D. Allabad University, *Health Sciences Associate Clinical Professor of Medicine*

Maria G. Dacoste-Iyer, M.D. Topiwala National Medical College, *Health Sciences Clinical Professor of Pathology and Laboratory Medicine*

Donald C. Dafoe, M.D. University of Wisconsin Madison, *Professor of Surgery*

Xing Dai, Ph.D. University of Chicago, *Professor of Biological Chemistry; Dermatology*

Shaun Daly, M.D. Rush Medical College, *Health Sciences Assistant Clinical Professor of Surgery*

Amish A. Dangodara, M.D. University of Miami, *Health Sciences Clinical Professor of Medicine*

Mark W. Daniels, M.D. Stanford University, *Health Sciences Assistant Clinical Professor of Pediatrics*

Omar S. Darwish, D.O. Touro U College of Osteopathic Medicine, *Health Sciences Associate Clinical Professor of Medicine*

Cyrus Dastur, M.D. Drexel University, *Health Sciences Associate Clinical Professor of Neurology; Neurological Surgery*

David Huw Davies, Ph.D. University College London, *Assistant Adjunct Professor of Physiology and Biophysics*

Rakhi Dayal, M.D. Maulana Azad Medical College, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Farshid Dayyani, M.D. Ph.D. University of Munich, *Health Sciences Associate Clinical Professor of Medicine*

Israel De Alba, M.D. University of Guadalajara, *Health Sciences Clinical Professor of Medicine*

Luis M. De La Maza, M.D., Ph.D. University of Minnesota, *Professor of Pathology and Laboratory Medicine*

Nzola De Magalhaes, Ph.D. University of California, Irvine, *Assistant Adjunct Professor of Surgery*

Michael Demetriou, M.D. Ph.D. University of Toronto, *Professor of Neurology; Microbiology and Molecular Genetics*

Sheetal Desai, M.D. University of Southern California, *Health Sciences Associate Clinical Professor of Medicine*

Suvarna Ajay Deshmukh-Rane, M.D. Bharti Vidyapeeth Medical College, *Health Sciences Assistant Clinical Professor of Pathology and Laboratory Medicine*

Prajakta Deshpande, M.D. Seth G.S. Medical College, *Health Sciences Assistant Clinical Professor of Family Medicine*

Robert C. Detrano, M.D. Sapienza University of Rome, *Health Sciences Clinical Professor of Radiological Sciences; Medicine; Program in Public Health*

Mrinal Dhar, M.D. University of Calgary, *Health Sciences Associate Clinical Professor of Urology*

Vijay Dhar, M.D. Gauhati Medical College, *Health Sciences Clinical Professor of Pediatrics*

Taizoon Q. Dhoon, M.D. University of Utah, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Catherine Diamond, M.D. Albany Medical College, *Health Sciences Clinical Professor of Medicine*

Justin T. Diedrich, M.D. Case Western Reserve University, *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

Huanjun Ding, Ph.D. University of Rochester, *Assistant Adjunct Professor of Radiological Sciences*

Hamid Djalilian, M.D. University of Minnesota, *Professor of Otolaryngology; Biomedical Engineering*

Andrew Djunaidi, M.D. Georgetown University, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

An H. Do, M.D. University of California, Los Angeles, *Health Sciences Assistant Clinical Professor of Neurology*

Rose Quy Do, M.D. University of Arizona, *Health Sciences Assistant Clinical Professor of Medicine*

Steven Do, D.O. Touro University College of Osteopathic Medicine, *Health Sciences Assistant Clinical Professor of Medicine*

Linda Doan, M.D., Ph.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Dermatology*

Matthew O. Dolich, M.D. State University of New York at Stony Brook, *Associate Dean of Graduate Medical Education and Health Sciences Clinical Professor of Surgery*

David Donaldson, M.D. Sackler School of Medicine, *Health Sciences Associate Clinical Professor of Medicine*

Carlos E. Donayre, M.D. University of Florida, *Professor of Surgery*

Huawei Dong, M.D. Dartmouth Medical School, *Health Sciences Assistant Clinical Professor of Medicine*

Joseph H. Donnelly, M.D. Georgetown University, *Health Sciences Clinical Professor of Pediatrics*

Peter J. Donovan, Ph.D. University College London, *Professor of Biological Chemistry; Developmental and Cell Biology*

Kimberly A. Douglas, M.D. Creighton University, *Health Sciences Associate Clinical Professor of Pediatrics*

Emily E. Dow, M.D. University of Cincinnati, *Health Sciences Clinical Professor of Family Medicine*

Timothy L. Downing, Ph.D. University of California, Berkeley, *Assistant Professor of Biomedical Engineering; Microbiology and Molecular Genetics (stem cells and tissue engineering, regenerative biology, cell programming, epigenomics, mechanobiology)*

Dang Tam Duong, M.D. University of Washington, *Health Sciences Associate Clinical Professor of Medicine*

Lilangi Ediriwickrema, M.D. Yale University, *Health Sciences Assistant Clinical Professor of Ophthalmology*

Karen L. Edwards, Ph.D. University of Washington, *Department Chair and Professor of Epidemiology; Program in Public Health*

Robert A. Edwards, M.D., Ph.D. Baylor College of Medicine, *Associate Professor of Pathology and Laboratory Medicine*

Rufus D. Edwards, Ph.D. Rutgers, The State University of New Jersey, *Professor of Program in Public Health; Environmental Health Sciences; Epidemiology*

N. Tony Eissa, M.D. Tanta University, *Associate Dean of Veterans Affairs Research and Professor in Residence of Medicine*

Samuel Ejadi, M.D. Rutgers Robert Wood Johnson Medical School, *Health Sciences Associate Clinical Professor of Medicine*

Jennifer Elia, M.D. Jefferson Medical College, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Mohamed Y. Elnaggar, M.D. University of Alexandria, *Health Sciences Assistant Clinical Professor of Medicine*

Emad Elquza, M.D. Flinders University, *Health Sciences Associate Clinical Professor of Medicine*

Ahmed Aly Elrefaie, M.D. Wake Forest University, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Scott A. Engwall, M.D. University of Florida, *Department Chair and Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

Sonja Entringer, Ph.D. University of Trier, *Associate Adjunct Professor of Pediatrics*

Ashkan Etemadian, M.D. Medical College of Wisconsin, *Health Sciences Assistant Clinical Professor of Medicine*

Gregory R.D. Evans, M.D. University of Southern California, *Department Chair and Professor of Plastic Surgery; Biomedical Engineering; Surgery*

Marc-Eivind C. Evensen, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Physical Medicine and Rehabilitation*

Hamed Farid, M.D. University of California, San Diego, *Health Sciences Associate Clinical Professor of Radiological Sciences*

Marjan Farid, M.D. University of California, San Diego, *Health Sciences Clinical Professor of Ophthalmology*

Reza Farokhpay, M.D. University of California, Davis, *Health Sciences Assistant Clinical Professor of Psychiatry and Human Behavior*

Ted Farzaneh, M.D. Shaheed Beheshti University of Medical Sciences, *Health Sciences Assistant Clinical Professor of Pathology and Laboratory Medicine*

Howard J. Federoff, M.D. Ph.D. Albert Einstein College of Medicine, *Professor of Neurobiology and Behavior; Neurology*

Marion J. Fedoruk, M.D. University of Alberta, *Health Sciences Clinical Professor of Medicine*

Stephen Feig, M.D. New York University, *Fong and Jean Tsai Chair in Women's Imaging and Professor of Radiological Sciences*

Philip Felgner, Ph.D. Michigan State University, *Director of the Vaccine Research and Development Center and Professor in Residence of Physiology and Biophysics*

Amanda N. Fernandez, M.D. University of the East, Ramon Magsaysay Memorial Medical Center, *Health Sciences Associate Clinical Professor of Pediatrics*

Dayantha Fernando, M.D. Georgetown University, *Health Sciences Associate Clinical Professor of Radiological Sciences*

Antoney Ferrey, M.D. The Ohio State University, *Health Sciences Assistant Clinical Professor of Medicine*

Robert R. Field, M.D. University of Kansas, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Chanel E. Fischetti, M.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Mark J. Fisher, M.D. University of Cincinnati, *Professor of Neurology; Anatomy and Neurobiology; Political Science*

Sheila T. Fitzgibbons, M.P.A. California State University, Long Beach, *Health Sciences Associate Clinical Professor of Medicine*

Laura E. Fitzmaurice, M.D. University of California, Los Angeles, *Health Sciences Associate Clinical Professor of Obstetrics and Gynecology*

Lisa Flanagan-Monuki, Ph.D. University of California, San Diego, *Associate Professor of Neurology; Anatomy and Neurobiology; Biomedical Engineering*

Angela G. Fleischman, M.D. Stanford University, *Assistant Professor of Medicine; Biological Chemistry*

Pamela L. Flodman, M.S. University of California, Irvine, *Adjunct Professor of Pediatrics; Genetic Counseling*

David Florioli, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Radiological Sciences*

Harry C. Fornwalt, M.D. University of Southern California, *Health Sciences Assistant Clinical Professor of Medicine*

Donald N. Forthal, M.D. University of California, Irvine, *Professor of Medicine; Molecular Biology and Biochemistry*

John Christian Fox, M.D. Tufts University, *Department Chair and Professor of Emergency Medicine*

Kathryn Steinhaus French, M.S. University of Colorado Denver, *Health Sciences Clinical Professor of Pediatrics; Genetic Counseling*

John P. Fruehauf, M.D. Rush University, *Professor Emeritus of Medicine; Pharmaceutical Sciences*

Roy M. Fujitani, M.D. University of Hawaii at Manoa, *Professor of Surgery*

Cole M. Fulwider, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Dermatology*

Christine M. Gall, Ph.D. University of California, Irvine, *Department Chair and Distinguished Professor of Anatomy and Neurobiology; Neurobiology and Behavior*

Natalie M. Gallant, M.D. University of Southern California, *Health Sciences Associate Clinical Professor of Pediatrics; Genetic Counseling*

Valerie B. Galvan-Turner, M.D. University of Texas Medical Branch, *Health Sciences Clinical Instructor of Obstetrics and Gynecology*

Anand K. Ganesan, M.D., Ph.D. Medical College of Wisconsin, *Associate Professor of Dermatology; Biological Chemistry*

Sumit Garg, M.D. New York Medical College, *Health Sciences Associate Clinical Professor of Ophthalmology*

John Jay Gargus, M.D. Ph.D. Yale University, *Director of the Center for Autism Research and Translation and Professor Emeritus of Physiology and Biophysics; Genetic Counseling; Pediatrics*

Alejandra Garland Becerra, M.D. Universidad de San Martín de Porres, *Health Sciences Assistant Clinical Professor of Neurology*

Armando S. Garza, M.D. University of California, Davis, *Health Sciences Assistant Clinical Professor of Radiological Sciences*

Norman Ge, M.D. Baylor College of Medicine, *Health Sciences Clinical Professor of Otolaryngology*

Jean G. Gehricke, Ph.D. Free University of Berlin, *Associate Adjunct Professor of Pediatrics*

Mary Gendy, M.D. Wright State University, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Gamal Ghoniem, M.D. Alexandria University, *Professor of Urology*

Lisa M. Gibbs, M.D. Stanford University, *Ronald W. Reagan Chair in Geriatrics and Health Sciences Clinical Professor of Family Medicine*

Stuart C. Gilman, M.D. Rush University, *Health Sciences Clinical Professor of Medicine*

Kimberly Marie Gimenez, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

Shruti K. Gohil, M.D. Tufts University, *Assistant Professor in Residence of Medicine*

June-Anne Gold, M.B.B.S., D.C.H., M.R.C.P. University of London, *Health Sciences Clinical Professor of Pediatrics; Genetic Counseling*

Emily B. Goldenberg, M.D. Virginia Commonwealth University, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Alan L. Goldin, M.D. Ph.D. University of Michigan, *Professor of Microbiology and Molecular Genetics; Anatomy and Neurobiology; Physiology and Biophysics*

Steven A.N. Goldstein, M.D., Ph.D. Harvard University, *Vice Chancellor for Health Affairs and Distinguished Professor of Physiology and Biophysics*

Sastry V. Gollapudi, Ph.D. Dalhousie University, *Assistant Adjunct Professor of Medicine*

Maryam Golshan-Momeni, M.D. University of Tehran, *Health Sciences Associate Clinical Professor of Radiological Sciences*

Kiarash Golshani, M.D. Oregon Health & Science University, *Health Sciences Associate Clinical Professor of Neurological Surgery*

Sidney Golub, Ph.D. Temple University, *Edward A. Dickson Emeritus Professor and Professor Emeritus of Microbiology and Molecular Genetics*

Tyralee M. Goo, M.D. Icahn School of Medicine at Mount Sinai, *Health Sciences Assistant Clinical Professor of Medicine*

Deborah Goodman-Gruen, M.D., Ph.D., M.P.H. University of California, Los Angeles, *Associate Adjunct Professor of Epidemiology*

Scott C. Goodwin, M.D. Harvard University, *Hasso Brothers Endowed Chair in Radiological Sciences and Professor Emeritus of Radiological Sciences*

Charlotte Gore, M.D. University of California, San Diego, *Health Sciences Assistant Clinical Professor of Ophthalmology*

Namita Goyal, M.D. Ross University, *Health Sciences Assistant Clinical Professor of Neurology*

Irmina Gradus-Pizlo, M.D. Medical Academy in Warsaw, *Health Sciences Clinical Professor of Medicine*

Sergei A. Grando, M.D., Ph.D., D.Sc. Central Institute of Dermatology and Venereology, *Medical Institute, Kiev, Ukraine; PostGraduate Institute for Physicians, Kiev, Ukraine; Central Institute of Dermatology and Venereology, Moscow, Russia and Professor of Dermatology; Biological Chemistry*

Stuart A. Green, M.D. New York Medical College, *Health Sciences Clinical Professor of Orthopaedic Surgery*

Milton Greenberg, Ph.D. University of California, Irvine, *Assistant Adjunct Professor of Physiology and Biophysics*

Sheldon Greenfield, M.D. University of Cincinnati, *Donald Bren Professor and Professor of Medicine*

Fred S. Greensite, M.D. University of California, San Diego, *Professor Emeritus of Radiological Sciences*

Joshua Grill, Ph.D. Wake Forest University School of Medicine, *Associate Professor of Neurobiology and Behavior; Neurobiology and Behavior*

John E. Gross, M.D. University of Missouri-Columbia, *Vice Dean for Faculty and Clinical Affairs and Health Sciences Clinical Professor of Plastic Surgery*

Geeta Grover, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Pediatrics*

Leonid Groyzman, M.D. Nicolae Testemianu State University of Medicine and Pharmacy, *Health Sciences Associate Clinical Professor of Neurology; Neurological Surgery*

Gultekin Gulsen, Ph.D. Bogazici University, *Associate Professor of Radiological Sciences; Biomedical Engineering; Physics and Astronomy*

Yigit S. Guner, M.D. Rosalind Franklin University at Chicago Medical School, *Health Sciences Associate Clinical Professor of Surgery*

Geeta K. Gupta, M.D. Harvard University, *Health Sciences Clinical Professor of Medicine*

Pankaj Gupta, Ph.D. Ludwig Maximilian University of Munich, *Professor of Medicine*

Ranjan Gupta, M.D. Albany Medical College, *Professor of Orthopaedic Surgery; Biomedical Engineering*

Sudhir Gupta, M.D. Ph.D. University of Lucknow, *Professor of Medicine*

Tatyana Gurvich, Pharm.D. University of Southern California, *Assistant Adjunct Professor of Family Medicine*

Grant Gwinup, M.D. University of Colorado Boulder, *Professor Emeritus of Medicine*

Ali A. Habib, M.D. Aga Kahn University, *Health Sciences Associate Clinical Professor of Neurology*

Yarah Haidar, M.D. University of California, San Diego, *Health Sciences Assistant Clinical Professor of Otolaryngology*

James E. Hall, Ph.D. University of California, Riverside, *Professor Emeritus of Physiology and Biophysics*

Afshan B. Hameed, M.D. King Edward Medical College, *Health Sciences Clinical Professor of Obstetrics and Gynecology*

Jaesu Han, M.D. University of California, Davis, *Health Sciences Clinical Behavior of Psychiatry and Human Behavior*

Jay J. Han, M.D. University of California, San Francisco, *Professor of Physical Medicine and Rehabilitation*

Min Han, M.D. Xi'an Jiaotong University, *Health Sciences Assistant Clinical Professor of Pathology and Laboratory Medicine*

Elliot Handler, M.D. University of Colorado, *Health Sciences Assistant Clinical Professor of Psychiatry and Human Behavior*

John Wesley Hann, M.D. University of California, Los Angeles, *Health Sciences Assistant Clinical Professor of Family Medicine*

Ramy Hanna, M.D. University of California, San Diego, *Health Sciences Assistant Clinical Professor of Medicine*

Cynthia Haq, M.D. Indiana University, *Gerald B. Sinykin, M.D., Chair in Family Medicine and Department Chair and Professor of Family Medicine*

Cameron Harding, M.D. University of Kentucky, *Health Sciences Assistant Clinical Professor of Medicine*

Tabetha Ridgeway Harken, M.D. University of Colorado Boulder, *Health Sciences Associate Clinical Professor of Obstetrics and Gynecology*

Anna L. Harris, M.D. Loma Linda University, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

Jeremy P. Harris, M.D. Stanford University, *Assistant Professor of Radiation Oncology*

Ronald M. Harris, M.D. University of California, San Francisco, *Health Sciences Clinical Professor of Dermatology*

Humaira Hassan, M.D. University of Wisconsin, *Health Sciences Assistant Clinical Professor of Medicine*

Anton N. Hasso, Ph.D. Loma Linda University, *Professor of Radiological Sciences*

Dustin Hatefi, M.D. Georgetown University, *Health Sciences Assistant Clinical Professor of Neurological Surgery*

Tamera J. Hatfield, M.D. Ph.D. University of California, Irvine; University of North Carolina, *Health Sciences Associate Clinical Professor of Obstetrics and Gynecology*

David J. Haupt, M.D. California School of Podiatric Medicine, *Health Sciences Associate Clinical Professor of Medicine*

Heather T. Hawthorne, M.D. University of Arkansas at Little Rock, *Health Sciences Clinical Professor of Pediatrics*

Elizabeth Head, Ph.D. University of Toronto, *Vice Chair for Research and Professor of Pathology and Laboratory Medicine*

Bhumy Dave Heliker, M.D. University of Pittsburgh, *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

Susan M. Heller, M.D. University of Iowa, *Health Sciences Associate Clinical Professor of Medicine*

Mohammad A. Helmy, M.D. University of California, Irvine, *Associate Dean of Academic Affairs - Clinical and Health Sciences Clinical Professor of Radiological Sciences*

Theresa L. Henke, M.D. Boston University, *Health Sciences Clinical Instructor of Medicine*

June Herman, M.D. University of North Dakota, *Health Sciences Clinical Professor of Radiological Sciences*

Klemens J. Hertel, Ph.D. University of Colorado Boulder, *Associate Dean of Graduate and Postdoctoral Studies and Vice Chair and Professor of Microbiology and Molecular Genetics*

Elsie R. Hidalgo, M.D. University of California, Los Angeles, *Health Sciences Clinical Professor of Pediatrics*

Marcelo Hinojosa, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Surgery*

Jeffrey H. Ho, D.O. Touro U College of Osteopathic Medicine, *Health Sciences Assistant Clinical Professor of Pediatrics*

Jessica M. Hoffmann, M.D. Creighton University, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Heather N. Hofmann, M.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Medicine*

Christine L. Hollister, M.D. Dartmouth College, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

Todd C. Holmes, Ph.D. Massachusetts Institute of Technology, *Department Vice Chair and Professor of Physiology and Biophysics*

Christy L. Hom, M.A. University of Michigan, *Health Sciences Assistant Clinical Professor of Psychiatry and Human Behavior*

Alice J. Hon, M.D. New Jersey Medical School, *Health Sciences Assistant Clinical Professor of Physical Medicine and Rehabilitation*

Wirachin Hoonpongsimanont, M.D. Mahidol University, *Assistant Professor of Emergency Medicine*

Susan A. Hopp, M.D. City University of New York, Mount Sinai, *Health Sciences Associate Clinical Professor of Medicine*

Naoto Hoshi, Ph.D. Kanazawa University, *Associate Professor of Pharmaceutical Sciences; Physiology and Biophysics*

Roosbeh Houshyar, M.D. Ross University, *Health Sciences Associate Clinical Professor of Radiological Sciences; Urology*

Michael A. Hoyt, Ph.D. Arizona State University, *Associate Professor of Program in Public Health; Epidemiology; Psychological Science*

An-Fu Hsiao, M.D. Boston University, *Health Sciences Clinical Professor of Medicine*

Jerry Hsieh, M.D. Virginia Commonwealth University, *Health Sciences Assistant Clinical Professor of Medicine*

Lanny L. Hsieh, M.D. New York University, *Health Sciences Clinical Professor of Medicine*

Yvonne L. Hsieh, M.D. Georgetown University, *Health Sciences Associate Clinical Professor of Medicine*

Andrew R. Hsu, M.D. Stanford University, *Health Sciences Assistant Clinical Professor of Orthopaedic Surgery*

Frank P.K. Hsu, M.D. University of Maryland, College Park, *Department Chair and Department Chair of Physical Medicine and Rehabilitation and Professor of Neurological Surgery; Biomedical Engineering; Otolaryngology*

Ke-Qin Hu, M.D. Tongji Medical College, *Professor of Medicine*

Lan Huang, Ph.D. University of Florida, *Professor of Physiology and Biophysics; Biological Chemistry; Biomedical Engineering; Pharmaceutical Sciences*

Susan Huang, M.D. Johns Hopkins University, *Professor of Medicine*

Cory M. Hugen, M.D. Loyola University Chicago, *Health Sciences Assistant Clinical Professor of Urology*

Juliette L. Hunt, M.D. University of California, Davis, *Health Sciences Associate Clinical Professor of Pediatrics*

Robert F. Hunt, Ph.D. University of Kentucky, *Assistant Professor of Anatomy and Neurobiology*

Michelle C. Hure, M.D. Ross University, *Health Sciences Assistant Clinical Professor of Dermatology*

Anju Hurria, M.D. State University of New York Upstate Medical Center, *Health Sciences Assistant Clinical Professor of Psychiatry and Human Behavior*

Kevin C. Hutton, M.D. Georgetown University, *Health Sciences Associate Clinical Professor of Emergency Medicine*

Hirohito Ichii, Ph.D. Kobe University, *Associate Professor of Surgery*

Kei Igarashi, Ph.D. University of Tokyo, *Assistant Professor of Anatomy and Neurobiology*

David Imagawa, Ph.D. Johns Hopkins University, *Suzanne Dykema Endowed Chair in Pancreatic Cancer and Professor of Surgery*

Sanaz Attaripour Isfahani, M.D. Tehran University of Medical Sciences, *Health Sciences Assistant Clinical Professor of Neurology*

Heba Ismail, M.D. Alexandria University, *Health Sciences Assistant Clinical Professor of Medicine*

Leslie M. Israel, D.O. U Medical C of Kansas City, *Health Sciences Professor of Medicine*

Autumn S. Ivy, M.D., Ph.D. University of California, Irvine, *Assistant Professor of Pediatrics; Neurology; Physiology and Biophysics*

Padmini Iyer, M.D. Andhra University, *Health Sciences Clinical Professor of Medicine*

Sonali L. Iyer, M.D. Rosalind Franklin University of Medicine and Science, Chicago Medical School, *Health Sciences Assistant Clinical Professor of Medicine*

Stephanie A. Jacobs, M.D. University of Pittsburgh, *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

Behrouz Jafari, M.D. Harvard University, *Health Sciences Clinical Professor of Medicine*

Daniel Jaffurs, M.D. University of Pittsburgh, *Health Sciences Assistant Clinical Professor of Surgery*

Vivek Jain, M.D. Memorial University of Newfoundland, *Health Sciences Associate Clinical Professor of Neurology*

James G. Jakowatz, M.D. University of Kansas, *Health Sciences Clinical Professor of Surgery*

Mehrdad Jalili, M.D. University of Isfahan, *Health Sciences Professor of Pediatrics*

M. M. Jamal, M.D. University of Damascus, *Health Sciences Clinical Professor of Medicine*

Anthony A. James, Ph.D. University of California, Irvine, *Distinguished Professor and Donald Bren Professor of Microbiology and Molecular Genetics; Molecular Biology and Biochemistry*

Algimantas Jasinskis, Ph.D. , *Associate Specialist of Medicine*

Maxwell Y. Jen, M.D. University of California, San Francisco, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Brenda L. Jensen, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Psychiatry and Human Behavior*

James V. Jester, Ph.D. University of Southern California, *Jack H. Skirball Chair in Ophthalmology Research and Professor of Ophthalmology; Biomedical Engineering*

Jonathan Jewkes, M.D. Loma Linda University, *Health Sciences Clinical Instructor of Radiological Sciences*

Deepa Jeyakumar, M.D. Temple University, *Health Sciences Assistant Clinical Professor of Medicine*

Luohua Jiang, Ph.D. University of California, Los Angeles, *Associate Professor of Epidemiology*

Anna Jin, M.D. Tulane University, *Health Sciences Clinical Professor of Medicine*

Rongsheng Jin, Ph.D. Columbia University, *Professor of Physiology and Biophysics*

Victor C. Joe, M.D. Virginia Commonwealth University, *Health Sciences Associate Clinical Professor of Surgery*

Jennifer Johnson, M.D. University of Münster, *Senate Emerita of Pediatrics*

Neil Jones, M.D. Oxford University, *Professor of Orthopaedic Surgery*

Mark L. Jordan, M.D. University of Toronto, *Health Sciences Clinical Professor of Urology*

Sara M. Jordan, M.D. University of New Mexico, *Health Sciences Clinical Instructor of Obstetrics and Gynecology*

Tibor Juhasz, Ph.D. Attila József University, *Professor of Ophthalmology; Biomedical Engineering*

Pawan Juneja, M.D. PTBDS Post Graduate Medical School of Science, *Health Sciences Clinical Professor of Medicine*

Kwang M. Jung, Ph.D. Chung-Ang University, *Associate Adjunct Professor of Anatomy and Neurobiology*

Nii-Kabu Kabutey, M.D. Albany Medical College, *Health Sciences Assistant Clinical Professor of Surgery*

Kanwarpal S. Kahlon, M.D. University of Illinois Medical Center, *Health Sciences Assistant Clinical Professor of Medicine*

Tatiana Kain, M.D. Ben Gurion School of Medicine, *Health Sciences Associate Clinical Professor of Radiological Sciences*

Zeev Kain, M.D. Ben Gurion School of Medicine, *Chancellor's Professor of Anesthesiology and Perioperative Care; Medicine*

Peter Kaiser, Ph.D. University of Innsbruck, *Department Chair and Professor of Biological Chemistry*

Kamyar Kalantar-Zadeh, M.D. University of Bonn, *Professor of Medicine; Program in Public Health*

Katalin Kalman, Ph.D. Jozsef Attila University, *Associate Project Scientist of Ophthalmology*

Daniel Kang, M.D. University of Maryland, College Park, *Health Sciences Clinical Instructor of Pediatrics*

Grace Kao, M.D. National Taiwan University, *Health Sciences Associate Clinical Professor of Neurology*

Robert Kaplan, M.D. Harvard University, *Health Sciences Clinical Professor of Medicine*

Sherrie H. Kaplan, Ph.D. University of California, Los Angeles, *Professor of Medicine*

Shreya Kapoor, M.D. Ross University, *Health Sciences Clinical Professor of Medicine*

William E. Karnes, M.D. University of Minnesota, *Health Sciences Associate Clinical Professor of Medicine*

Moti L. Kashyap, M.D. National University of Singapore, *Senate Emeritus of Medicine*

Kari L. Kassir, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Pediatrics*

David Katz, M.D. Case Western Reserve University, *Non-Senate Academic Emeritus of Radiological Sciences*

Mark Katz, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Psychiatry and Human Behavior*

Mitchell Katz, M.D. State University of New York Downstate Medical Center, *Health Sciences Clinical Professor of Pediatrics*

Robert J. Katzer, M.D. Temple University, *Health Sciences Associate Clinical Professor of Emergency Medicine*

Claudia H. Kawas, M.D. University of Louisville, *Nichols Term Chair in Neuroscience and Professor of Neurology; Neurobiology and Behavior*

Kirk A. Keegan, M.D. University of Maryland, College Park, *Non-Senate Academic Emeritus of Obstetrics and Gynecology*

Kristen M. Kelly, M.D. University of California, Irvine, *Health Sciences Professor of Dermatology; Surgery*

Richard Kelly, M.D. Stanford University, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Maria Cristina Kenney, M.D., Ph.D. University of California, Los Angeles; University of Arizona, *Professor of Ophthalmology; Pathology and Laboratory Medicine*

Morton Kern, M.D. City University of New York, Mount Sinai, *Health Sciences Professor of Medicine*

Kai Kessenbrock, Ph.D. Ludwig Maximilian University of Munich, *Assistant Professor of Biological Chemistry*

Joyce H. Keyak, Ph.D. University of California, San Francisco, *Professor in Residence of Radiological Sciences; Biomedical Engineering; Mechanical and Aerospace Engineering*

Aaron Kheriaty, M.D. Georgetown University, *Health Sciences Associate Clinical Professor of Psychiatry and Human Behavior; Religious Studies*

Rostam Khoshsar, M.D. University of Tehran, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Antoine Elie Khoury, M.D. Ain Shams University, *Walter R. Schmid Chair in Pediatric Urology and Professor in Residence of Urology*

Shahira Khoury, M.D. Ain Shams University, *Health Sciences Associate Clinical Professor of Physical Medicine and Rehabilitation*

Nafiz M. Kiciman, M.D. Hacettepe University, *Health Sciences Professor of Pediatrics*

Jayashri Kidao, M.D. Christian Medical College of India, *Health Sciences Clinical Professor of Medicine*

P. Douglas Kiester, Ph.D. University of Utah, *Health Sciences Professor of Orthopaedic Surgery*

David B. Kilgore, M.D. University of Southern California, *Health Sciences Professor of Family Medicine*

Christine M. Kim, M.D. Saint Louis University, *Health Sciences Associate Clinical Professor of Obstetrics and Gynecology*

Deborah Kim, M.D. Drexel University, *Health Sciences Clinical Instructor of Ophthalmology*

Jin Kyung Kim, M.D. University of Rochester, *Health Sciences Associate Clinical Professor of Medicine*

Michael J. Kim, M.D. Northwestern University, *Health Sciences Clinical Professor of Radiological Sciences*

Moon H. Kim, M.D. Yonsei University, *Non-Senate Academic Emeritus of Obstetrics and Gynecology*

Sharon Kim, M.D. Drexel University, *Health Sciences Clinical Professor of Pediatrics*

Virginia E. Kimonis, M.D. University of Southampton, *Professor of Pediatrics; Environmental Health Sciences; Genetic Counseling; Pathology and Laboratory Medicine*

Ivan I. Kirov, M.D. Medical Academy, *Health Sciences Clinical Professor of Pediatrics*

Philip D. Kiser, Pharm.D. Ph.D. Case Western Reserve University, *Assistant Professor of Physiology and Biophysics; Ophthalmology*

Masashi Kitazawa, Ph.D. Iowa State University, *Associate Professor of Medicine; Environmental Health Sciences*

Henry John Klassen, M.D. University of Pittsburgh, *Associate Professor in Residence of Ophthalmology*

Michael T. Kleinman, Ph.D. New York University, *Adjunct Professor of Environmental Health Sciences; Program in Public Health*

Samuel J. Klempner, M.D. University of Massachusetts, *Health Sciences Assistant Clinical Professor of Medicine*

Jason M. Knight, M.D. Eastern Virginia Medical School, *Health Sciences Clinical Professor of Pediatrics*

Scott J. Koenig, M.D. New York University, *Health Sciences Clinical Instructor of Orthopaedic Surgery*

Allen P. Kong, M.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Surgery*

Elliott H. Kornhauser, M.D. University of Toronto, *Health Sciences Professor of Medicine*

Arthur Kreitenberg, M.D. University of California, San Diego, *Health Sciences Clinical Professor of Orthopaedic Surgery*

Lauren D. Krill, M.D. Thomas Jefferson University, Jefferson Medical College, *Health Sciences Clinical Instructor of Obstetrics and Gynecology*

Mayil S. Krishnam, M.D. Stanley Medical College, *Professor of Radiological Sciences*

Christopher A. Kroner, M.D. Tulane University, *Health Sciences Assistant Clinical Professor of Family Medicine*

Jeffrey V. Kuo, M.D. Thomas Jefferson University, Jefferson Medical College, *Health Sciences Professor of Radiation Oncology*

Baruch D. Kuppermann, M.D., Ph.D. University of Miami, *California Institute of Technology, Director, Gavin Herbert Eye Institute; Roger F. Steinart, M.D., Endowed Chair in Ophthalmology and Department Chair and Professor of Ophthalmology; Biomedical Engineering*

John A. Kusske, M.D. University of California, San Francisco, *Professor Emeritus of Neurological Surgery*

Frank M. LaFerla, Ph.D. University of Minnesota, *Dean of the School of Biological Sciences and Professor of Neurobiology and Behavior; Neurology*

Shadi Lahham, M.D. University of California, Irvine, *Assistant Professor of Emergency Medicine*

Kimberly Lakes, Ph.D. University of Wisconsin-Madison, *Associate Professor in Residence of Pediatrics; Education*

Jonathan Lakey, Ph.D. University of Alberta, *Professor of Surgery; Biomedical Engineering*

Chandana Lall, M.D. University College of Medical Sciences, *Health Sciences Professor of Radiological Sciences*

Jaime Landman, M.D. Columbia University College of Physicians and Surgeons, *Department Chair and Professor of Urology*

Felicia L. Lane, M.D. Georgetown University, *Health Sciences Associate Clinical Professor of Obstetrics and Gynecology*

Karen T. Lane, M.D. University of California, Los Angeles, *Health Sciences Associate Clinical Professor of Surgery*

Mark I. Langdorf, M.D. University of California, San Diego, *Professor of Emergency Medicine*

Vivian Thuy-Vy Laquer, M.D. Columbia University, *Health Sciences Assistant Clinical Professor of Dermatology*

Kathryn M. Larsen, M.D. University of Washington, *Health Sciences Professor of Family Medicine*

Wei Ling Lau, M.D. Washington University, St. Louis, *Health Sciences Assistant Clinical Professor of Medicine*

Pamela A. Lawrence, M.D. Columbia University, *Non-Senate Academic Emerita of Medicine*

George V. Lawry, M.D. Johns Hopkins University, *Health Sciences Professor of Medicine*

Devon A. Lawson, Ph.D. University of California, Los Angeles, *Assistant Professor of Physiology and Biophysics*

Chinh Duy Le, M.D. Ho Chi Minh City Medicine and Pharmacy University, *Health Sciences Associate Clinical Professor of Medicine*

Khanh-Van T. Le-Bucklin, M.D. University of California, San Francisco, *Associate Vice Chancellor for Education and Vice Dean for Medical Education and Health Sciences Clinical Professor of Pediatrics*

Eva Y. Lee, Ph.D. University of California, Berkeley, *UCI Chancellor's Professor Emerita of Biological Chemistry*

Jenny Lee, M.D. New York Medical College, *Health Sciences Clinical Professor of Medicine*

John G. Lee, M.D. University of Miami, *Professor of Medicine*

Nancy Lee, M.D. Temple University, *Health Sciences Clinical Instructor of Ophthalmology*

Patrick K. Lee, M.D. University of Southern California, *Health Sciences Clinical Professor of Dermatology*

Robert H. Lee, M.D. University of Michigan, *Health Sciences Clinical Professor of Medicine*

Se-Young Lee, M.D. New York Medical College, *Health Sciences Clinical Professor of Medicine*

Thay Q. Lee, Ph.D. Gothenburg School of Business, Economics and Law, *Professor in Residence of Orthopaedic Surgery; Physical Medicine and Rehabilitation*

Wen-Hwa Lee, Ph.D. University of California, Berkeley, *Professor Emeritus of Biological Chemistry*

Michael E. Lekawa, M.D. Thomas Jefferson University, Jefferson Medical College, *Health Sciences Professor of Surgery*

Lucille Lemus, M.D. Harvard University, *Health Sciences Clinical Professor of Dermatology*

Marc A. Lerner, M.D. City University of New York, Mount Sinai, *Health Sciences Clinical Professor of Pediatrics*

Lawrence Lerno, M.D. University of Pittsburgh, *Health Sciences Clinical Professor of Medicine*

Rebecca L. Leshay, M.S. University of North Carolina, *Health Sciences Assistant Clinical Professor of Pediatrics; Genetic Counseling*

Alvina Leung, M.D. University of California, San Diego, *Health Sciences Clinical Professor of Medicine*

Steven B. Leven, M.D. Medical College of Wisconsin, *Health Sciences Professor of Medicine*

Ellis Levin, M.D. Thomas Jefferson University, Jefferson Medical College, *Professor in Residence of Medicine; Biological Chemistry*

Mark R. Levinstein, M.D. Northwestern University, *Health Sciences Clinical Professor of Medicine*

Donald S. Levy, M.D. University at Albany, State University of New York, *Health Sciences Clinical Professor of Medicine*

Wei Li, Ph.D. Institute of Biophysics, Chinese Academy of Sciences, *Endowed Chair and Professor of Biological Chemistry*

Patricia Liao, M.D. Northwestern University, *Health Sciences Clinical Professor of Pediatrics*

Solomon S. Liao, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Medicine*

Lih-Huei Liaw, M.S. Northeastern University, *Project Scientist of Surgery*

Richard W. Light, M.D. Johns Hopkins University, *Senate Emeritus of Medicine*

Charles L. Limoli, Ph.D. University of California, San Diego, *Professor of Radiation Oncology; Environmental Health Sciences*

Estelle S. Lin, M.D. Drexel University, *Health Sciences Clinical Instructor of Medicine*

Jack J. Lin, M.D. Rush University, *Associate Professor of Neurology; Biomedical Engineering*

Jeannette Lin, M.D. University of California, San Diego, *Health Sciences Assistant Clinical Professor of Medicine*

Kenneth Linden, M.D., Ph.D. University of California, Irvine, *Health Sciences Clinical Professor of Dermatology*

Robert W. Lingua, M.D. University of Southern California, *Health Sciences Professor of Ophthalmology*

Mark E. Linskey, M.D. Columbia University, *Professor of Surgery*

Linda S. Lippa, M.D. Columbia University, *Health Sciences Professor of Ophthalmology*

Fong W. Liu, M.D. University of Alabama, *Health Sciences Clinical Instructor of Obstetrics and Gynecology*

Haoping Liu, Ph.D. Cornell University, *Professor of Biological Chemistry*

Jeffrey W. Liu, M.D. Brown University, *Health Sciences Clinical Instructor of Ophthalmology*

Feng Liu Smith, Ph.D. Iowa State University, *Assistant Professor of Epidemiology; Medicine*

Dawn M. Lombardo, D.O. Midwestern University, Chicago College of Osteopathic Medicine, *Health Sciences Associate Clinical Professor of Medicine*

Kenneth J. Longmuir, Ph.D. University of Oregon, *Professor Emeritus of Physiology and Biophysics*

Shahram Lotfipour, M.D. University of Iowa, *Professor of Emergency Medicine; Program in Public Health*

Shahrdad Lotfipour, Ph.D. University of California, Irvine, *Assistant Professor of Emergency Medicine; Pharmaceutical Sciences*

Ira T. Lott, M.D. Ohio State University, *Professor Emeritus of Pediatrics*

Kim D. Lu, M.D. Tufts University, *Health Sciences Assistant Clinical Professor of Pediatrics*

Stephanie Lu, M.D. University of California, San Diego, *Health Sciences Assistant Clinical Professor of Ophthalmology*

Paul Lubinsky, M.D. University of Capetown, *Health Sciences Associate Clinical Professor of Pediatrics*

Ulrike Luderer, M.D., Ph.D. Northwestern University, *Director of the Environmental Health Sciences Graduate Program and Professor of Medicine; Developmental and Cell Biology; Environmental Health Sciences; Program in Public Health*

Zhigang D. Luo, M.D., Ph.D. State University of New York at Buffalo, *Professor of Anesthesiology and Perioperative Care; Pharmacology*

Gary S. Lynch, Ph.D. Princeton University, *Professor of Psychiatry and Human Behavior; Anatomy and Neurobiology*

David C. Lyon, Ph.D. Vanderbilt University, *Department Vice Chair and Associate Professor of Anatomy and Neurobiology; Cognitive Sciences*

Fabio Macciardi, M.D. University of Milan, *Professor in Residence of Psychiatry and Human Behavior*

Gerald A. Maguire, M.D. Saint Louis University, *Kirkup Chair in Psychiatry and Human Behavior for the Medical Treatment of Stuttering and Professor of Psychiatry and Human Behavior*

Arash Mahajerin, M.S. Indiana University-Purdue University Indianapolis, *Health Sciences Clinical Professor of Pediatrics*

Carol A. Major, M.D. Case Western Reserve University, *Assistant Dean of Student and Inclusive Excellence and Health Sciences Professor of Obstetrics and Gynecology*

Deepika Malik, MBBS BJ Medical College, Gujarat University, *Health Sciences Clinical Instructor of Ophthalmology*

Shaista Malik, M.D. Ph.D. University of California, Irvine, *Executive Director, Susan Samueli Integrative Health Institute; Susan Samueli Chair in Integrative Medicine and Associate Vice Chancellor for Integrative Health and Professor of Medicine*

Fred M. Malkin, M.D. University of Miami, *Health Sciences Associate Clinical Professor of Pediatrics*

Dan A. Mandel, M.D. Tel Aviv University, *Health Sciences Assistant Clinical Professor of Medicine*

Alberto Manetta, M.D. University of Buenos Aires, *Professor Emeritus of Obstetrics and Gynecology*

William W. Mantulin, Ph.D. Northeastern University, *Adjunct Professor of Surgery*

Francesco Marangoni, Ph.D. Vita-Salute San Raffaele University, *Assistant Professor of Physiology and Biophysics*

Donald C. Martin, M.D. University of British Columbia, *Professor Emeritus of Surgery*

G. Robert Mason, M.D. University of Chicago, *Professor Emeritus of Surgery*

Selma Masri, Ph.D. Beckman Research Institute of the City of Hope, *Assistant Professor of Biological Chemistry*

Joshua Mauney, Ph.D. Tufts University, *Jerry D. Choate Presidential Chair in Urology Tissue and Engineering and Associate Professor of Urology; Biomedical Engineering*

Farhad Mazdisnian, M.D. Thomas Jefferson University, Jefferson Medical College, *Health Sciences Associate Clinical Professor of Medicine*

Irene M. McAleer, M.D. Ohio State University, *Health Sciences Associate Clinical Professor of Urology*

Katherine T. McCartney, M.D. Stritch School of Medicine, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Michael McClelland, Ph.D. University of Georgia, *Professor of Microbiology and Molecular Genetics*

Christopher E. McCoy, M.D. University of California, San Francisco, *Health Sciences Associate Clinical Professor of Emergency Medicine*

Jerry L. McCullough, Ph.D. Yale University, *Professor Emeritus of Dermatology*

Elsbeth M. McDougall, M.D. University of Calgary, *Professor Emerita of Urology*

Christine E. McLaren, Ph.D. Case Western Reserve University, *Professor of Medicine*

Gordon McLaren, M.D. Stanford University, *Adjunct Professor of Medicine*

Gordon McLorie, M.D. University of Toronto, *Health Sciences Professor of Urology*

Kirk McNagny, M.D. Creighton University, *Health Sciences Associate Clinical Professor of Psychiatry and Human Behavior*

Deena McRae, M.D. University of California, Irvine, *Associate Dean of Graduate Medical Education and Health Sciences Clinical Professor of Psychiatry and Human Behavior*

Rita S. Mehta, M.D. Mahatma Gandhi Memorial Medical College, *Health Sciences Associate Clinical Professor of Medicine*

Daniel B. Menzel, Ph.D. University of California, Berkeley, *Professor Emeritus of Medicine*

Dan Mercola, M.D., Ph.D. University of California, Los Angeles, *Professor of Pathology and Laboratory Medicine*

Hooshang Meshkinpour, M.D. University of Tehran, *Professor Emeritus of Medicine*

Natasha Mesinkovska, M.D., Ph.D. Mayo Medical School, *Health Sciences Assistant Clinical Professor of Dermatology; Surgery*

Frank L. Meyskens, M.D. University of California, San Francisco, *Daniel G. Aldrich, Jr. Endowed Chair and Professor of Medicine; Biological Chemistry; Program in Public Health*

David E. Michalik, D.O. College of Osteopathic Medicine of the Pacific, *Health Sciences Clinical Professor of Pediatrics*

John Middlebrooks, Ph.D. University of California, San Francisco, *Professor of Otolaryngology; Biomedical Engineering; Cognitive Sciences; Neurobiology and Behavior*

Michel Mikhael, M.D. Cairo University School of Medicine, *Health Sciences Clinical Professor of Pediatrics*

Ronald B. Miller, M.D. Columbia University, *Non-Senate Academic Emeritus of Medicine*

Jeffrey C. Milliken, M.D. University of Michigan, *Health Sciences Professor of Surgery*

Steven D. Mills, M.D. New York Medical College, *Associate Professor of Surgery*

Donald S. Minckler, M.D. University of Oregon School of Medicine, *Professor Emeritus of Ophthalmology*

Sean A. Minjares, M.D. University of California, Davis, *Health Sciences Clinical Professor of Psychiatry and Human Behavior*

Lilit Mnatsakanyan, M.D. Yerevan State Medical University, *Health Sciences Assistant Clinical Professor of Neurology*

John Moeller, M.D. University of Chicago, *Health Sciences Clinical Instructor of Emergency Medicine*

Sabee Y. Molloy, Ph.D. University of Wisconsin-Madison, *Professor of Radiological Sciences; Biomedical Engineering*

Edwin S. Monuki, M.D., Ph.D. University of California, San Diego, *Department Chair and Warren L. Bostick Chair in Pathology and Professor of Pathology and Laboratory Medicine; Developmental and Cell Biology*

Hamid Moradi, M.D. Oregon Health & Science University, *Health Sciences Assistant Clinical Professor of Medicine*

Edgar M. Moran, M.D. University of Bucharest, *Senate Emeritus of Medicine*

Timothy R. Morgan, M.D. Emory University, *Professor in Residence of Medicine*

David K. Morohashi, M.D. University of Washington, *Health Sciences Professor of Family Medicine*

Debra E. Morrison, M.D. Northwestern University, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care; Urology*

Seyed Ali Mortazavi, Ph.D. California Institute of Technology, *Professor of Developmental and Cell Biology; Biological Chemistry* (functional genomics to study transcriptional regulation in development)

Sameh Mosaed, M.D. New York Medical College, *Health Sciences Associate Clinical Professor of Ophthalmology*

Gina R. Mosich, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Psychiatry and Human Behavior*

Harry David Mosier, M.D. Johns Hopkins University, *Professor Emeritus of Pediatrics*

Ross Moskowitz, M.D. University of California, Irvine, *Health Sciences Clinical Instructor of Urology*

Peter J. Mostert, D.O. Oklahoma State University, *Health Sciences Clinical Instructor of Radiological Sciences*

Tahseen Mozaffar, MBBS Aga Khan University, *Dr. Stanley van den Noort Endowed Chair and Interim Department Chair and Professor of Neurology; Pathology and Laboratory Medicine*

Dana Mukamel, Ph.D. University of Rochester, *Professor of Medicine; Program in Public Health*

Jogeshwar Mukherjee, Ph.D. Jodhpur National University, *Professor in Residence of Radiological Sciences; Biomedical Engineering*

J. Dennis Mull, M.D. Medical College of Virginia, *Professor Emeritus of Family Medicine*

Maury Lee Ellis Mulligan, M.D. City University of New York, Mount Sinai, *Senate Emeritus of Medicine*

Penny R. Murata, M.D. Women's Medical College of Pennsylvania, *Health Sciences Professor of Pediatrics*

Yuji Murata, M.D. Osaka University, *Professor Emeritus of Obstetrics and Gynecology*

Cynthia T. Murphy, M.D. University of South Dakota, *Health Sciences Associate Clinical Professor of Physical Medicine and Rehabilitation*

Sandra Murray, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Pediatrics*

Padmaja Muthiah, M.D. University of Hawaii at Manoa, *Health Sciences Clinical Professor of Medicine*

Angela Myers, M.C.H., M.D. Stanford University, *Health Sciences Assistant Clinical Professor of Pediatrics; Genetic Counseling*

Robert Myers, Ph.D. University of Southern California, *Health Sciences Associate Clinical Professor of Psychiatry and Human Behavior*

Bavani Nadeswaran, MBBS University of the West Indies, *Health Sciences Professor of Medicine*

Ajanta Naidu, M.D., M.B.A. University of California, Irvine, *Interim Department Chair and Health Sciences Clinical Professor of Pediatrics*

Orhan Nalcioğlu, Ph.D. University of Oregon, *Professor Emeritus of Radiological Sciences*

Patricia W. Nance, M.D. University of South Florida, *Health Sciences Clinical Professor of Physical Medicine and Rehabilitation*

Andreea Nanci, M.D. Goethe University Frankfurt, *Health Sciences Associate Clinical Professor of Medicine*

Chaitali S. Nangia, M.D. Lady Hardinge Medical College, *Health Sciences Assistant Clinical Professor of Medicine*

Shoba Narayan, M.D. University of California, Los Angeles, *Health Sciences Clinical Professor of Pediatrics*

Deepika Nathan, M.S. Northwestern University, *Health Sciences Assistant Clinical Professor of Pediatrics; Genetic Counseling*

Ariana M. Nelson, M.D. University of Michigan, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Corey Nelson, M.D. Thomas Jefferson University, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Edward L. Nelson, M.D. University of Oregon, *Associate Professor of Medicine; Molecular Biology and Biochemistry*

J. Stuart Nelson, Ph.D. University of California, Irvine, *Professor of Surgery; Biomedical Engineering*

Kari J. Nelson, M.D. Medical College of Wisconsin, *Health Sciences Clinical Instructor of Radiological Sciences*

Linda D. Nelson, Ph.D. Ohio State University, *Senate Emerita of Neurology*

Thomas L. Nelson, M.D. University of California, San Francisco, *Professor Emeritus of Pediatrics*

Anthony B. Nesburn, M.D. Harvard University, *Adjunct Professor of Ophthalmology*

Robert L. Newcomb, Ph.D. University of California, Santa Barbara, *Senior Lecturer with Security of Employment Emeritus of Pediatrics; Clinical Translational Science*

Angelica T. Nguyen, M.D. University of California, Los Angeles, *Health Sciences Assistant Clinical Professor of Medicine*

Danh V. Nguyen, Ph.D. University of California, Davis, *Professor of Medicine*

Hanh T. Nguyen, M.D. Medical College of Virginia, *Health Sciences Assistant Clinical Professor of Family Medicine*

Lan T. Nguyen, M.D. University of California, San Diego, *Health Sciences Professor of Medicine*

Ninh T. Nguyen, M.D. University of Texas at San Antonio, *John E. Connolly Chair in Surgery and Department Chair and Professor of Surgery*

Tan Quoc Viet Nguyen, M.D. Michigan State University, *Health Sciences Assistant Clinical Professor of Family Medicine*

Y. Vien T. Nguyen, D.O. Western University of Health Sciences, *Health Sciences Clinical Instructor of Radiological Sciences*

Bruce Nickerson, M.D. University of California, Los Angeles, *Health Sciences Associate Clinical Professor of Pediatrics*

Delma J. Nieves, M.D. University of Washington, *Health Sciences Clinical Professor of Pediatrics*

Karen L. Noblett, M.D. University of California, Irvine, *Health Sciences Professor of Obstetrics and Gynecology*

Trina Norden-Krichmar, Ph.D. University of California, San Diego, *Assistant Professor of Epidemiology; Biological Chemistry; Computer Science; Pharmaceutical Sciences*

Diane J. Nugent, M.D. University of California, Los Angeles, *Health Sciences Clinical Professor of Pediatrics*

Eliezer Nussbaum, M.D. Tel Aviv University, *Professor of Pediatrics*

Susan M. O'Brien, M.D. University of Medicine and Dentistry of New Jersey, *Chao Family Endowed Chair for Cancer Clinical Science and Professor of Medicine*

Diane K. O'Dowd, Ph.D. University of California, San Diego, *Professor of Developmental and Cell Biology; Anatomy and Neurobiology* (regulation of activity in developing and adult nervous systems)

Andre Obenhaus, Ph.D. University of British Columbia, *Professor in Residence of Pediatrics; Anatomy and Neurobiology*

Andrew O. Odegaard, Ph.D. University of Minnesota, *Assistant Professor of Epidemiology*

Leticia Oliveros, M.D. University of Iowa, *Health Sciences Professor of Pediatrics*

Bonnie Jean Olsen, Ph.D. California School of Professional Psychology, *Health Sciences Professor of Family Medicine*

Harold G. Olson, M.D. University of California, Irvine, *Health Sciences Professor of Medicine*

Robin D. Onishi, M.D. University of Washington, *Health Sciences Clinical Professor of Medicine*

Kathryn Osann, Ph.D. University of California, Berkeley, *Adjunct Professor of Medicine; Environmental Health Sciences*

Megan Boysen Osborn, M.D. University of California, Irvine, *Associate Dean for Students and Associate Professor of Emergency Medicine*

Donald R. Ostergard, M.D. University of California, San Francisco, *Senate Emeritus of Obstetrics and Gynecology*

Sean B. Ostlund, Ph.D. University of California, Los Angeles, *Assistant Professor of Anesthesiology and Perioperative Care*

Sai-Hong Ignatius Ou, Ph.D. University of Texas at Dallas, *Health Sciences Associate Clinical Professor of Medicine*

Madeleine V. Pahl, M.D. University of California, Irvine, *Professor of Medicine*

Marilyn J. Pais, M.D. Women's Medical College of Pennsylvania, *Senior Lecturer with Security of Employment Emerita of Radiological Sciences*

Krzysztof Palczewski, Ph.D. Wroclaw University of Science and Technology, *Irving H. Leopold Chair of Ophthalmology and Professor of Ophthalmology; Physiology and Biophysics*

Mitradas M. Panicker, Ph.D. Carnegie-Mellon University, *Associate Adjunct Professor of Physiology and Biophysics*

Nicholas R. Pannunzio, Ph.D. Beckman Research Institute of City of Hope, *Assistant Professor of Medicine; Biological Chemistry*

Sara R. Paradise, M.D. George Washington University, *Health Sciences Clinical Instructor of Emergency Medicine*

Kyle P. Paredes, M.D. M.B.A. University of California, San Francisco, *Assistant Dean of Student Affairs and Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Nimisha Parekh, M.D. Tulane University, *Associate Dean of Faculty Development - Non-Senate and Health Sciences Associate Clinical Professor of Medicine*

Ellen Park, M.D. Tufts University, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Hannah L. Park, Ph.D. Stanford University, *Assistant Professor in Residence of Epidemiology*

Steven Park, M.D. New York University, *Health Sciences Associate Clinical Professor of Medicine*

Ian Parker, Ph.D. University College London, *Professor of Neurobiology and Behavior; Physiology and Biophysics*

Iris Partovi, M.D. Comenius University of Bratislava, Faculty of Medicine, *Health Sciences Clinical Professor of Medicine*

Victor Passy, M.D. University of California, Irvine, *Senior Lecturer with Security of Employment Emeritus of Otolaryngology*

Anup Patel, M.D. University of Nevada, *Health Sciences Clinical Professor of Pediatrics*

Hiren Patel, M.D. Philadelphia College of Osteopathic Medicine, *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

Pranav Patel, M.D. Saint Louis University, *Chief, Division of Cardiology; Director of Cardiac Catheterization Laboratory and Cardiac Care Unit (CCU) and Health Sciences Associate Clinical Professor of Medicine; Biomedical Engineering*

Medha Pathak, Ph.D. University of California, Berkeley, *Assistant Professor of Physiology and Biophysics*

Sameer S. Pathare, M.D. Medical College of Wisconsin, *Health Sciences Clinical Professor of Pediatrics*

Julie V. Patterson, Ph.D. University of Southern California, *Specialist of Psychiatry and Human Behavior*

Keyianoosh Paydar, M.D. University of Tennessee, *Health Sciences Associate Clinical Professor of Surgery*

Eric Pearlman, Ph.D. University of Texas Health Sciences Center at San Antonio, *Director of the Institute for Immunology and Chancellor's Professor of Physiology and Biophysics; Ophthalmology*

Daniel Pelot, M.D. Howard University, *Senior Lecturer with Security of Employment Emeritus of Medicine*

Kristine R. Penner, M.D. University of California, San Francisco, *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

Ellena Peterson, Ph.D. Georgetown University, *Professor Emerita of Pathology and Laboratory Medicine*

Parham Pezeshk, M.D. Shahid Beheshti University of Medical Sciences and Health Services, *Health Sciences Clinical Instructor of Radiological Sciences*

Robert F. Phalen, Ph.D. University of Rochester, *Professor of Medicine; Environmental Health Sciences*

Peter H. Pham, M.D. University of California, Los Angeles, *Associate Professor of Radiological Sciences*

Son Phan, M.D. University of Vermont, *Health Sciences Assistant Clinical Professor of Radiological Sciences*

Nicolas M. Phielipp, M.D. University of Buenos Aires, *Health Sciences Assistant Clinical Professor of Neurology*

Gloria J. Picking, M.A. San Diego State University, *Health Sciences Clinical Instructor of Psychiatry and Human Behavior*

Aimee Pierce, M.D. Columbia University College of Physicians and Surgeons, *Health Sciences Assistant Clinical Professor of Neurology*

Alessio Pigazzi, M.D. Boston University, *Associate Professor of Surgery*

Lauren Pinter-Brown, M.D. University of California, Los Angeles, *Health Sciences Clinical Professor of Medicine; Dermatology*

Daniele Piomelli, Ph.D. Columbia University, *Louise Turner Arnold Chair in the Neurosciences and Distinguished Professor of Anatomy and Neurobiology; Biological Chemistry; Pharmaceutical Sciences*

Alice Police, M.D. Loma Linda University, *Health Sciences Assistant Clinical Professor of Surgery*

Robert W. Porter, M.D. Northwestern University, *Senate Emeritus of Neurological Surgery*

Dmitry Portnoy, M.D. Moscow State University, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

Manuel Porto, M.D. Rutgers, the State University of New Jersey, *The Edward J. Quilligan Chair in Maternal-Fetal Medicine and Professor of Obstetrics and Gynecology*

Steven G. Potkin, M.D. Washington University, *Robert R. Sprague Chair in Brain Imaging and Professor of Psychiatry and Human Behavior*

Ilhem Messaoudi Powers, Ph.D. Weill Cornell Graduate School of Medical Sciences, *Associate Professor of Molecular Biology and Biochemistry; Microbiology and Molecular Genetics*

Adrian Preda, M.D. Carol Davila University, *Health Sciences Professor of Psychiatry and Human Behavior; Religious Studies*

Pamela E. Prete, M.D. Hahnemann University Hospital, *Senate Emerita and Professor of Medicine*

Henry W. Pribram, MB BChir Cambridge University, *Professor Emeritus of Radiological Sciences*

Douglas W. Priestly, M.D. University of Manitoba, *Health Sciences Clinical Professor of Physical Medicine and Rehabilitation*

Michael D. Prislín, M.D. Georgetown University, *Professor of Family Medicine*

Aaron Przybysz, M.D. University of Michigan, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Geetha Puthenveetil, MBBS St. Johns Medical College, *Health Sciences Clinical Professor of Pediatrics*

Feng Qiao, Ph.D. University of California, Los Angeles, *Associate Professor of Biological Chemistry*

Lisa K. Quane, M.D. University of Illinois at Urbana-Champaign, *Health Sciences Professor of Radiological Sciences*

Edward J. Quilligan, M.D. Ohio State University, *Professor Emeritus of Obstetrics and Gynecology*

W. Leslie Quinlivan, MBBS University of London, *Professor Emeritus of Obstetrics and Gynecology*

Bouchaib Rabbani, Ph.D. University of California, Irvine, *Non-Senate Academic Emeritus of Radiation Oncology*

Leslie J. Raffel, M.D. Medical College of Pennsylvania, *Health Sciences Clinical Professor of Pediatrics; Genetic Counseling*

Gregory Rafijah, M.D. Chicago Medical School, *Health Sciences Assistant Clinical Professor of Orthopaedic Surgery*

Maryam Rahimi, M.D. Indiana University, *Health Sciences Associate Clinical Professor of Medicine*

Ramin Rahimian, M.D. University of California, Los Angeles, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Govind R. Rajan, MBBS University of Delhi, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

Nilam S. Ramsinghani, MBBS Grant Medical College, *Health Sciences Professor of Radiation Oncology*

Leslie M. Randall, M.D. University of Louisville, *Assistant Professor of Obstetrics and Gynecology*

Bahram Raofi, M.D. University of Tehran, *Health Sciences Clinical Professor of Radiological Sciences*

Darren R. Raphael, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Jody M. Rawles, M.D. Albany Medical College, *Health Sciences Associate Clinical Professor of Psychiatry and Human Behavior*

Radoslav Raychev, M.D. Sofia Medical University, *Health Sciences Assistant Clinical Professor of Neurological Surgery*

Virgil S. Raymundo, M.D. University of California, Irvine, *Health Sciences Professor of Medicine*

Michael R. Recto, M.D. University of the Philippines, College of Medicine, *Health Sciences Clinical Professor of Pediatrics*

Varalakshmi Reddy, M.D. Osmania Medical College, *Health Sciences Professor of Pediatrics*

John L. Redpath, Ph.D. University of Newcastle, *Professor Emeritus of Radiation Oncology; Environmental Health Sciences*

Karin E. Reed, M.D. Wayne State University, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Christina M. Reh, M.D. Loma Linda University, *Health Sciences Clinical Professor of Pediatrics*

Andrew R. Reikes, M.D. University of California, San Diego, *Associate Dean of Primary Care and Health Sciences Professor of Medicine*

David J. Reinkensmeyer, Ph.D. University of California, Berkeley, *Professor of Anatomy and Neurobiology; Biomedical Engineering; Mechanical and Aerospace Engineering; Physical Medicine and Rehabilitation*

Christopher Reist, M.D. Medical College of Virginia, *Associate Professor in Residence of Psychiatry and Human Behavior*

Ricardo Restrepo, M.D. Institute of Health Sciences Medellin Faculty of Medicine, *Health Sciences Clinical Professor of Psychiatry and Human Behavior*

Sherif Rezk, M.D. Alexandria University, *Professor of Pathology and Laboratory Medicine*

Connie Rhee, M.D. Northwestern University, *Health Sciences Clinical Instructor of Medicine*

Jessica M. Rhee, M.D. University of Chicago, *Health Sciences Associate Clinical Professor of Medicine*

James Rick, M.D. University of Illinois at Urbana-Champaign, *Health Sciences Clinical Professor of Medicine*

Cameron Ricks, M.D. American University of the Caribbean, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Joseph Rinehart, M.D. Loyola University Chicago, *Associate Clinical Professor of Anesthesiology and Perioperative Care*

Monica B. Rivera, M.D. University of California, Los Angeles School of Medicine, *Health Sciences Clinical Professor of Radiological Sciences*

Dante Eduardo Roa, Ph.D. Florida State University, *Health Sciences Associate Clinical Professor of Radiation Oncology*

Jennifer S. Roh, M.D. Texas Technological College, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Nathan Rojek, M.D. Georgetown University, *Health Sciences Assistant Clinical Professor of Dermatology*

Leland D. Ronningen, M.D. Uniformed Services University of the Health Sciences, *Health Sciences Professor of Urology*

Abraham Rosenbaum, M.D. The Technion - Israel Institute of Technology, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

Richard I. Ross, M.D. University of Maryland, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Steven D. Ross, M.D. University of Southern California, *Health Sciences Professor of Orthopaedic Surgery*

Elyssa Rubin, M.D. Sackler School of Medicine, *Health Sciences Clinical Professor of Pediatrics*

Lloyd Rucker, M.D. University of Kentucky, *Health Sciences Clinical Professor of Medicine*

Scott E. Rudkin, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Emergency Medicine*

Elizabeth A. Runcie, D.O. Des Moines University, *Health Sciences Clinical Instructor of Emergency Medicine*

Bahman Saatian, M.D. , *Health Sciences Assistant Clinical Professor of Medicine*

Terra R. Safer, M.D. University of California, Los Angeles, *Health Sciences Associate Clinical Professor of Medicine*

Angela N. Sagar, M.D. Ross University, *Health Sciences Assistant Clinical Professor of Psychiatry and Human Behavior*

Hamid M. Said, Pharm.D., Ph.D. Baghdad University, Aston University, *Distinguished Professor of Medicine; Physiology and Biophysics*

Sangeeta S. Sakaria, M.D. Indiana University, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Naghmeah Salamat Saberi, M.D. New York Medical College, *Health Sciences Associate Clinical Professor of Obstetrics and Gynecology*

Jason B. Samarasena, M.D. Memorial University of Newfoundland, *Health Sciences Assistant Clinical Professor of Medicine*

Curt A. Sandman, Ph.D. Louisiana State University, *Senate Emeritus of Psychiatry and Human Behavior*

Suzanne B. Sandmeyer, Ph.D. University of Washington, *Grace Beekhuis Bell Chair in Biological Chemistry and Professor of Biological Chemistry; Microbiology and Molecular Genetics*

Zsuzsanna Sandor, M.D. Semmelweis University, *Health Sciences Associate Clinical Professor of Medicine*

Jose Y. Sandoval, M.D. University of California, Los Angeles, *Health Sciences Clinical Professor of Family Medicine*

Rozanne M. Sandri-Goldin, Ph.D. Johns Hopkins University, *Department Chair and Chancellor's Professor of Microbiology and Molecular Genetics*

I. James Sarfeh, M.D. Albany Medical College, *Professor Emeritus of Surgery*

Jon F. Sassin, M.D. Saint Louis University, *Professor Emeritus of Neurology*

Paolo Sassone-Corsi, Ph.D. University of Naples Federico II, *Donald Bren Professor and Distinguished Professor of Biological Chemistry; Microbiology and Molecular Genetics; Pharmaceutical Sciences*

Catherine S. Sassoon, M.D. Gadjah Mada University, *Professor in Residence of Medicine*

Mona Sazgar, M.D. McMaster University, *Health Sciences Associate Clinical Professor of Neurology*

Shira A. Schlesinger, M.D. University of California, San Diego, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Peter L. Schnall, M.D. Stanford University, *Health Sciences Clinical Professor of Medicine*

Alan L. Schneider, M.D. University of Southern California, *Health Sciences Associate Clinical Professor of Psychiatry and Human Behavior*

Sanford Schneider, M.D. New York University, *Health Sciences Clinical Professor of Pediatrics*

Merritt D. Schreiber, Ph.D. Ohio State University, *Associate Professor Emeritus of Emergency Medicine*

Steven S. Schreiber, M.D. Albany Medical College, *Professor in Residence of Neurology; Anatomy and Neurobiology; Psychiatry and Human Behavior*

Sabrina E. Schuck, Ph.D. University of California, Riverside, *Health Sciences Assistant Clinical Professor of Pediatrics; Education; Psychological Science*

Carl Schultz, M.D. University of California, Irvine, *Professor Emeritus of Emergency Medicine*

Adam J. Schwarz, M.D. Stanford University, *Health Sciences Associate Clinical Professor of Pediatrics*

Ran Schwarzkopf, M.D. Ben Gurion University of Negev, *Health Sciences Assistant Clinical Professor of Orthopaedic Surgery*

Howard Schwid, M.D. University of Wisconsin-Madison, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

John A. Scolaro, M.D. Boston College, *Health Sciences Assistant Clinical Professor of Orthopaedic Surgery*

Shruti Scott, D.O. Western University of Health Sciences, *Health Sciences Assistant Clinical Professor of Medicine*

Tara E. Seery, M.D. University College Dublin, *Health Sciences Assistant Clinical Professor of Medicine*

Gary P. Segal, M.D. University of Pennsylvania, *Health Sciences Clinical Professor of Medicine*

Sonia Sehgal, M.D. St. George's University, *Health Sciences Associate Clinical Professor of Medicine*

Varun Sehgal, Ph.D. University of Florida, *Health Sciences Associate Clinical Professor of Radiation Oncology*

Magdalene J. Seiler, Ph.D. University of Munich, *Associate Professor in Residence of Anatomy and Neurobiology; Physical Medicine and Rehabilitation*

Marcus M. Seldin, Ph.D. Johns Hopkins University, *Assistant Professor of Biological Chemistry*

Bert L. Semler, Ph.D. University of California, San Diego, *Distinguished Professor of Microbiology and Molecular Genetics*

Leonard S. Sender, M.D. University of Witwatersrand, *Health Sciences Professor of Medicine*

Stefano Sensi, M.D. Gabriele D'Annunzio University of Chieti Pescara, *Associate Adjunct Professor of Neurology*

Cagin Senturk, M.D. Hacettepe University Medical School, *Health Sciences Clinical Professor of Radiological Sciences*

Arnold H. Seto, M.D. Harvard University, *Health Sciences Assistant Clinical Professor of Medicine*

Gaurang Shah, M.D. The Maharaja Sayajirao University of Baroda, *Health Sciences Clinical Professor of Medicine*

Shalini S. Shah, M.D. St. George's University, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Joel B. Shallit, M.D. University of California, Los Angeles, *Assistant Adjunct Professor of Family Medicine*

Ronald C. Shank, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Medicine; Environmental Health Sciences*

Deane H. Shapiro, Ph.D. Stanford University, *Senate Emeritus of Psychiatry and Human Behavior*

Johanna F. Shapiro, Ph.D. Stanford University, *Professor of Family Medicine*

Ankush Sharma, M.D. American University of the Caribbean School of Medicine, *Health Sciences Assistant Clinical Professor of Medicine*

Kelli Sharp, D.P.T. Chapman University, *Assistant Professor of Dance; Physical Medicine and Rehabilitation* (somatic practices, dance science, kinesiology, physical therapy, motor learning and performance)

Lili Sheibani, M.D. University of California, Irvine, *Health Sciences Clinical Instructor of Obstetrics and Gynecology*

Jay Shen, M.D. Loma Linda University, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Lavonne Sheng, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Pediatrics*

Yongsheng Shi, Ph.D. Syracuse University, *Professor of Microbiology and Molecular Genetics*

Melissa L. Shive, M.D. University of California, San Francisco, *Health Sciences Assistant Clinical Professor of Dermatology*

Inna Shniter, M.D. University of Missouri, Columbia, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Cynthia H. Sholly, M.D. University of Utah, *Health Sciences Professor of Pediatrics*

Jordan A. Siegel, M.D. Tufts University, *Health Sciences Clinical Instructor of Urology*

Herbert C. Sier, M.D. Medical College of Virginia, *Health Sciences Professor of Medicine*

Jack H. Sills, M.D. Northwestern University, *Health Sciences Clinical Professor of Pediatrics*

Valeria B. Simon, M.D. University of Illinois at Urbana-Champaign, *Health Sciences Clinical Instructor of Obstetrics and Gynecology*

Jennifer L. Simpson, M.D. University of Michigan, *Health Sciences Professor of Ophthalmology*

Jasjit Singh, M.D. Duke University, *Health Sciences Associate Clinical Professor of Pediatrics*

Kathryn E. Singh, M.P.H., M.S. University of California, Irvine, *Health Sciences Associate Clinical Professor of Pediatrics; Genetic Counseling*

Kira Skavinski, D.O. New York Inst of Technology, *Health Sciences Assistant Clinical Professor of Family Medicine*

Harry B. Skinner, M.D. Medical University of South Carolina, *Professor Emeritus of Orthopaedic Surgery*

Dorota Skowronska-Krawczyk, Ph.D. University of Geneva, *Assistant Professor of Physiology and Biophysics*

Lewis M. Slater, M.D. University of Vermont, *Professor Emeritus of Medicine*

Brian Smith, M.D. Universidad Autonoma De Guadalajara, *Health Sciences Assistant Clinical Professor of Surgery*

Janellen Smith, M.D. University of Iowa, *Health Sciences Clinical Professor of Dermatology*

Moyra Smith, M.D., Ph.D., M.F.A. University of Pretoria, *Professor Emerita of Pediatrics; Genetic Counseling*

Kenneth Sokolski, M.D. University of California, Irvine, *Associate Adjunct Professor of Psychiatry and Human Behavior*

Antoine N. Soliman, M.D. Pennsylvania State University, *Health Sciences Clinical Professor of Pediatrics*

Charles A. Sondheim, Ph.D. University of California, Berkeley, *Professor Emeritus of Radiological Sciences*

Amit Soni, M.D. St. George's University, *Health Sciences Clinical Professor of Pediatrics*

Dara H. Sorkin, Ph.D. University of California, Irvine, *Associate Professor in Residence of Medicine; Program in Public Health; Psychological Science*

Martha G. Sosa-Johnson, M.D. University of San Diego, *Health Sciences Associate Clinical Professor of Medicine*

Marian Sowa, M.D. , *Health Sciences Associate Clinical Professor of Neurology*

M. Anne Spence, Ph.D. University of Hawaii at Manoa, *Professor Emerita of Pediatrics; Genetic Counseling*

Michael J. Stamos, M.D. Case Western Reserve University, *Dean and Professor of Surgery*

Eric J. Stanbridge, Ph.D. Stanford University, *Professor Emeritus of Microbiology and Molecular Genetics*

Robert E. Steele, Ph.D. Yale University, *Professor of Biological Chemistry*

Joan S. Steffan, Ph.D. University of California, San Diego, *Associate Professor in Residence of Psychiatry and Human Behavior*

Robin Steinberg-Epstein, M.D. University of California, Irvine, *Health Sciences Professor of Pediatrics*

Roger F. Steinert, M.D. Harvard University, *Irving H. Leopold Chair in Ophthalmology and Professor of Ophthalmology*

Barry A. Steinmetz, M.D. Baylor College of Medicine, *Health Sciences Associate Clinical Professor of Pediatrics*

Megan L. Stephenson, M.D. University of California, Irvine, *Health Sciences Clinical Instructor of Obstetrics and Gynecology*

Oswald Steward, Ph.D. University of California, Irvine, *Director, Reeve-Irvine Research Center and Reeve-Irvine Chair in Spinal Cord Injury Research and Distinguished Professor of Anatomy and Neurobiology; Neurobiology and Behavior*

Cassandra L. Stewart, M.D. Medical University of South Carolina, *Health Sciences Clinical Instructor of Pediatrics*

Svetlana R. Stivi, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Family Medicine*

Suzanne L. Strom, M.D. University of Texas, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Min-Ying Su, Ph.D. University of California, Irvine, *Professor of Radiological Sciences; Physics and Astronomy*

Mohammad A. Subeh, M.D. Oregon Health Sciences University, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Veendamali Subramanian, Ph.D. University of Madras, *Assistant Adjunct Professor of Medicine*

Jeffrey R. Suchard, M.D. University of California, Los Angeles, *Associate Dean of Basic Science Education and Professor of Emergency Medicine*

Gabriel R. Sudario, M.D. University of California, San Francisco, *Health Sciences Clinical Instructor of Emergency Medicine*

Coral Sun, M.D. University of Florida, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Laxmi A. Suthar, M.D. Oregon Health & Science University, *Health Sciences Assistant Clinical Professor of Medicine*

Shuichi Suzuki, M.D. Kitasato University, *Associate Professor of Neurological Surgery; Neurology*

Morgan L. Swank, M.D. Creighton University, *Health Sciences Clinical Instructor of Obstetrics and Gynecology*

James M. Swanson, Ph.D. Ohio State University, *Professor Emeritus of Pediatrics*

Bindu Swaroop, M.D. St. George's University, *Health Sciences Assistant Clinical Professor of Medicine*

Yona Tadir, M.D. Tel Aviv University, *Adjunct Professor of Surgery*

Ronald Takemoto, M.D. University of Southern California, *Health Sciences Clinical Professor of Physical Medicine and Rehabilitation*

Steven Tam, M.D. University of California, San Diego, *Health Sciences Assistant Clinical Professor of Medicine*

Ming Tan, M.D. Johns Hopkins University, *Professor of Microbiology and Molecular Genetics; Medicine*

Siu W. Tang, M.D. University of Hong Kong, *Senate Emeritus of Psychiatry and Human Behavior*

Sora P. Tanjasiri, Ph.D. University of California, Los Angeles, *Professor of Epidemiology*

Dawn T. Tanner, M.D. Creighton University, *Health Sciences Clinical Instructor of Radiological Sciences*

Jeremiah Tao, M.D. University of South Carolina, *Health Sciences Associate Clinical Professor of Ophthalmology*

Blanca Tapia-Zuniga, M.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Family Medicine*

Sharief K. Taraman, M.D. Wayne State University, *Health Sciences Clinical Professor of Pediatrics*

Andrzej S. Tarnawski, M.D. University Medical School, *Professor of Medicine*

Candice E. Taylor, M.D. University of Southern California School of Medicine, *Health Sciences Assistant Clinical Professor of Pediatrics*

Jamshid Tehranzadeh, M.D. Pahlavi University, *Professor Emeritus of Radiological Sciences*

Krishnansu S. Tewari, M.D. University of California, Irvine, *Professor of Obstetrics and Gynecology*

Gaby T. Thai, M.D. Tufts University, *Health Sciences Professor of Neurology*

Leslie M. Thompson, Ph.D. University of California, Irvine, *Chancellor's Professor and Donald Bren Professor of Psychiatry and Human Behavior; Biological Chemistry; Neurobiology and Behavior*

Lauri D. Thrupp, M.D. University of Washington, *Professor Emeritus of Medicine*

Jeremiah G. Tilles, M.D. Harvard University, *Professor Emeritus of Medicine*

Pornchai Tirakitsoontorn, M.D. University of California, San Diego, *Health Sciences Associate Clinical Professor of Pediatrics*

Jerome S. Tobis, M.D. Chicago Medical School, *Professor Emeritus of Physical Medicine and Rehabilitation*

Francesco Tombola, Ph.D. University of Padua, *Associate Professor of Physiology and Biophysics*

Corey Tong, M.D. Robert Wood Johnson Medical School, *Health Sciences Clinical Instructor of Anesthesiology and Perioperative Care*

Julianne S. Toohey, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Obstetrics and Gynecology*

Shannon L. Toohey Dean, M.D. University of California, Irvine, *Assistant Professor of Emergency Medicine*

Nojan Toomari, M.D. Western University of Health Sciences, *Health Sciences Clinical Instructor of Surgery*

Simin Torabzadeh, Ph.D. Universidad Central del Este, *Health Sciences Professor of Medicine*

Jason D. Toranto, M.D. University of Michigan, *Health Sciences Assistant Clinical Professor of Surgery*

Lillibeth Torno, M.D. University of Santo Tomas, *Health Sciences Associate Clinical Professor of Pediatrics*

Minodora Totoiu, M.D. University of Medicine and Pharmacy of Targu-Mures, *Health Sciences Clinical Professor of Pediatrics*

Paul E. Touchette, Ed.D. Harvard University, *Recall Non-Senate Academic of Pediatrics*

Anne E. Tournay, MBBS University College London, *Health Sciences Associate Clinical Professor of Pediatrics*

Bao Q. Tran, M.D. Creighton University, *Health Sciences Assistant Clinical Professor of Physical Medicine and Rehabilitation*

Hien T. Tran, M.D. Harvard University, *Health Sciences Clinical Professor of Dermatology*

Huy T. Tran, M.D. Western University of Health Sciences, *Health Sciences Professor of Family Medicine*

Lily H. Tran, M.D. University of Rochester, *Health Sciences Clinical Professor of Pediatrics*

Lien N. Trinh, M.D. St. George's University, *Health Sciences Clinical Professor of Pediatrics*

Sam V. Truong, M.D. University of California, San Francisco, *Health Sciences Assistant Clinical Professor of Dermatology*

Fong Y. Tsai, M.D. Taipei Medical University, *Senate Emeritus of Radiological Sciences*

Khoa M. Tu, M.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Atur V. Turakhia, M.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Psychiatry and Human Behavior*

Martin Tynan, M.D. Trinity College, *Health Sciences Professor of Orthopaedic Surgery*

Edward M. Uchio, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Urology*

Cherry C. Uy, M.D. Far Eastern University, *Health Sciences Professor of Pediatrics*

Duane J. Vajgrt, M.D. University of California, San Francisco, *Health Sciences Professor of Radiological Sciences*

Shermeen B. Vakharia, M.D. Aga Khan University, *Health Sciences Clinical Professor of Anesthesiology and Perioperative Care*

Theodorus G. Van Erp, Ph.D. Utrecht University, *Assistant Professor in Residence of Psychiatry and Human Behavior*

Richard A. Van Etten, M.D., Ph.D. Stanford University, *Director, Chao Family Comprehensive Cancer Center; Chao Family Endowed Director's Chair in Cancer Research and Treatment and Senior Associate Dean and Associate Vice Chancellor for Cancer and Professor of Medicine; Biological Chemistry*

Nicolaas-John Van Nieuwenhuysen, MBBS, *Health Sciences Clinical Professor of Psychiatry and Human Behavior*

Taya C. Varteresian, D.O. A.T. Still University, Kirksville College of Osteopathic Medicine, *Health Sciences Clinical Professor of Psychiatry and Human Behavior*

Douglas Vaughn, M.D. Drexel University, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Nosratola D. Vaziri, M.D. University of Tehran, *Professor Emeritus of Medicine; Physiology and Biophysics*

Charles P. Vega, M.D. University of Wisconsin-Madison, *Assistant Dean of Cultural and Community Education and Health Sciences Clinical Professor of Family Medicine*

Swapna Vemuri, M.D. Wayne State University, *Health Sciences Clinical Instructor of Ophthalmology*

Vasan Venugopalan, Sc.D. Massachusetts Institute of Technology, *Department Chair and Professor of Chemical and Biomolecular Engineering; Biomedical Engineering; Materials Science and Engineering; Mechanical and Aerospace Engineering; Surgery (laser-generated thermal, mechanical and radiative transport processes for application in medical diagnostics, imaging, therapeutics, biotechnology)*

Sunil P. Verma, M.D. University of Southern California, *Assistant Dean of Workforce Development and Health Sciences Associate Clinical Professor of Otolaryngology; Music*

S. Armando Villalta, Ph.D. University of California, Los Angeles, *Assistant Professor of Physiology and Biophysics; Neurology*

Anthony Vo, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Medicine*

Bao Tran N. Vo, M.D. University of California, San Francisco, *Health Sciences Assistant Clinical Professor of Family Medicine*

Trung Q. Vu, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

K. Mark Vuchinich, M.D. University of California, San Diego, *Health Sciences Professor of Obstetrics and Gynecology*

Thomas W. Waddington, M.D. Saint Louis University, *Health Sciences Clinical Professor of Medicine*

Matthew Wade, M.D. George Washington University, *Health Sciences Assistant Clinical Professor of Ophthalmology*

Pathik Wadhwa, Ph.D. University of California, Irvine, *Professor of Psychiatry and Human Behavior*

Feizal Waffarn, MBBS University of Madras, *Professor Emeritus of Pediatrics*

Howard B. Waitzkin, Ph.D. Harvard University, *Professor Emeritus of Medicine*

Akio Wakabayashi, M.D. University of Tokyo, *Professor Emeritus of Surgery*

Roger Walsh, Ph.D. University of Queensland, *Professor of Psychiatry and Human Behavior; Religious Studies*

Annabel Wang, M.D. McGill University, *Health Sciences Associate Clinical Professor of Neurology*

Beverly Wang, M.D. Jiangxi Medical College, *Professor of Pathology and Laboratory Medicine; Otolaryngology*

Ping H. Wang, M.D. Harvard University, *Professor of Medicine; Physiology and Biophysics*

Raymond Wang, M.D. University of California, Los Angeles, *Health Sciences Clinical Professor of Pediatrics*

Tommy Wang, M.D. Albany Medical College, *Health Sciences Assistant Clinical Professor of Pediatrics*

Kerry E. Wangen, M.D. University of Minnesota, *Health Sciences Clinical Professor of Psychiatry and Human Behavior*

James E. Ward, M.D. Loyola University Chicago, *Health Sciences Assistant Clinical Professor of Medicine*

Marian L. Waterman, Ph.D. University of California, San Diego, *Professor of Microbiology and Molecular Genetics*

David Webb, M.D. Tufts University, *Health Sciences Clinical Professor of Medicine*

Steven L. Wechsler, Ph.D. University of North Carolina at Chapel Hill, *Professor of Ophthalmology*

Elias Wehbi, M.D. University of Toronto, *Health Sciences Assistant Clinical Professor of Urology*

Gerald Weinstein, M.D. University of Pennsylvania, *Professor Emeritus of Dermatology*

John H. Weiss, M.D., Ph.D. Stanford University, *Professor of Neurology; Anatomy and Neurobiology*

Christopher H. Wen, M.D. Baylor College of Medicine, *Health Sciences Associate Clinical Professor of Radiological Sciences*

Li Wen, M.D. West China University of Medical Sciences, *Health Sciences Clinical Professor of Medicine*

Lari B. Wenzel, Ph.D. Arizona State University, *Professor of Medicine; Program in Public Health*

Dennis Whang, M.D. Northwestern University, *Health Sciences Clinical Instructor of Medicine*

Stephen H. White, Ph.D. University of Washington, *Professor Emeritus of Physiology and Biophysics*

Warren F. Wiechmann, M.D., M.B.A. University of California, Irvine, *Associate Dean of Clinical Science Education and Associate Dean of Education Technology and Associate Professor of Emergency Medicine*

Jamie Wikenheiser, Ph.D. Case Western Reserve University, *Associate Adjunct Professor of Anatomy and Neurobiology*

Petra E. Wilder-Smith, Ph.D. University of Bern, *Associate Professor in Residence of Surgery*

James H. Williams, M.D. Harvard University, *Health Sciences Professor of Medicine*

Richard G. Williams, M.D. University of Pittsburgh, *Health Sciences Clinical Professor of Radiation Oncology*

Russell A. Williams, MBBS University of Sydney, *Professor of Surgery*

Archie F. Wilson, M.D. University of California, San Francisco, *Professor Emeritus of Medicine*

Samuel E. Wilson, M.D. Wayne State University, *Professor of Surgery*

William C. Wilson, M.D. Temple University, *Chief Medical Officer for UCI Health and Health Sciences Professor of Anesthesiology and Perioperative Care*

Deborah A. Wing, M.D. Tulane University, *Professor in Residence of Obstetrics and Gynecology*

Sara T. Winokur, Ph.D. University of California, Irvine, *Project Scientist of Psychiatry and Human Behavior*

Garrett A. Wirth, M.D. Albany Medical College, *Health Sciences Associate Clinical Professor of Surgery*

Michael Wolf, M.D. University of California, Los Angeles, *Health Sciences Clinical Professor of Psychiatry and Human Behavior*

Brian Wong, M.D. Johns Hopkins University, *Professor of Otolaryngology; Biomedical Engineering*

Edward K. Wong, M.D. University of Southern California, *Professor Emeritus of Ophthalmology*

Nathan D. Wong, Ph.D. Yale University, *Adjunct Professor of Medicine; Epidemiology*

Waylan Wong, M.D. University of California, San Diego, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Alisa V. Wray, M.D. Tulane University, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Joseph C. Wu, M.D. University of California, Irvine, *Associate Professor in Residence of Psychiatry and Human Behavior*

Patrick Wu, M.D. University of Virginia, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Sing-Yung Wu, M.D. Johns Hopkins University, *Senate Emeritus of Radiological Sciences*

Frederic A. Wyle, M.D. University of Pennsylvania, *Senate Emeritus of Medicine*

Danli L. Xing, M.D. Robert Wood Johnson Medical School, *Health Sciences Clinical Instructor of Ophthalmology*

Xiangmin Xu, Ph.D. Vanderbilt University, *Professor of Anatomy and Neurobiology; Biomedical Engineering; Computer Science*

Vahid Yaghmai, M.D. New York Medical College, *Department and Hasso Brothers Endowed Chair in Radiological Sciences and Health Sciences Clinical Professor of Radiological Sciences*

Jing Yang, M.D. Norman Bethune Health Science Center, *Assistant Professor in Residence of Ophthalmology*

Qin Yang, M.D. Ph.D. Nanjing University of Chinese Medicine, Osaka University, *Associate Professor of Medicine; Physiology and Biophysics*

Daniel S. Yanni, M.D. University of California, San Diego, *Assistant Professor of Neurological Surgery*

Leman Yel, M.D. Hacettepe University, *Senate Emeritus of Medicine*

Brent Yeung, M.D. Georgetown University, *Assistant Professor of Anesthesiology and Perioperative Care*

Douglas B. Yim, M.D. University of Southern California, *Health Sciences Associate Clinical Professor of Radiological Sciences; Surgery*

Hong Zhen Yin, M.D. , *Specialist of Neurology*

Kyoko Yokomori, Ph.D. University of Tokyo, *Professor of Biological Chemistry*

Gregory Y. Yoshikawa, M.D. New York Medical College, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Hiroshi Yoshioka, Ph.D. University of Tsukuba, *Professor in Residence of Radiological Sciences*

Julie H. Youm, Ph.D. Columbia University, *Assistant Dean of Education Compliance and Quality and Assistant Adjunct Professor of Emergency Medicine*

Bassam Younes, M.D. Semmelweis University of Medicine, *Health Sciences Associate Clinical Professor of Pediatrics*

Christopher Young, M.D. Duke University, *Health Sciences Clinical Instructor of Obstetrics and Gynecology*

Edward M. Young, M.D. University of California, San Diego, *Health Sciences Associate Clinical Professor of Dermatology*

Robert R. Young, M.D. Harvard University, *Senate Emeritus of Neurology*

Ronald F. Young, Ph.D. State University of New York Downstate Medical Center, *Professor Emeritus of Neurological Surgery*

Julie N. Youssef, D.O. New York Institute of Technology College of Osteopathic Medicine, *Health Sciences Assistant Clinical Professor of Pediatrics*

Christopher B. Zachary, M.D. University of London, *Department Chair and Health Sciences Clinical Professor of Dermatology*

David Zamorano, M.D. University of Southern California, *Health Sciences Associate Clinical Professor of Orthopaedic Surgery*

Nicole M. Zanin, M.D. Wright State University, *Health Sciences Clinical Instructor of Medicine*

Michael V. Zaragoza, M.D., Ph.D. Case Western Reserve University, *Associate Professor of Pediatrics; Biological Chemistry; Genetic Counseling*

Sohila Zarandy, M.D. University of Tehran, *Health Sciences Associate Clinical Professor of Medicine*

Jason Zell, D.O. Nova Southeastern University, *Assistant Professor of Medicine*

Fan-Gang Zeng, Ph.D. Syracuse University, *Director of Hearing Research and Professor of Otolaryngology; Anatomy and Neurobiology; Biomedical Engineering; Cognitive Sciences*

Weian Zhao, Ph.D. McMaster University, *Associate Professor of Pharmaceutical Sciences; Biological Chemistry; Biomedical Engineering; Materials Science and Engineering* (stem cell therapy, diagnostics, biosensors, immunotherapy, single-cell analysis)

Xiaolin Zi, Ph.D. Shanghai University, *Associate Professor of Urology; Pharmaceutical Sciences*

Mary L. Zupanc, M.D. University of California, Los Angeles, *Health Sciences Clinical Professor of Pediatrics*

## Anatomy and Neurobiology

**Christine M. Gall, Department Chair**

**David C. Lyon, Department Vice Chair**

**Brian J. Cummings, Departmental Graduate Advisor**

Med Sci 1, B240

949-824-2583

[anatomy.uci.edu](http://anatomy.uci.edu) (<http://anatomy.uci.edu>)

Research programs in the Department of Anatomy and Neurobiology in the School of Medicine focus on the neurosciences. Faculty interests range across broad areas of basic and clinical neuroscience research, including cellular and molecular neurobiology, cellular mechanisms of development, ion channel electrophysiology, functional synaptic plasticity, mechanisms of learning and memory, experimental neuroanatomy, structure and function of sensory and motor systems, and response to injury and regeneration. Students performing graduate work in the Department are encouraged to become proficient in multiple areas of study using interdisciplinary techniques.

The Department offers graduate training under the auspices of the School of Medicine in conjunction with the Interdepartmental Neuroscience Program (INP) and the Medical Scientist Training Program (MSTP). Students are eligible to enter the Departmental program after meeting the specific requirements of the INP gateway curriculum or by direct application to the Department. The Departmental program leads to a Ph.D. degree in Biomedical Sciences, awarded after successful completion of all requirements.

In concert with other departments, a combined neuroscience core curriculum has been developed which includes offerings in systems neurobiology, neurophysiology, and cellular, molecular, and developmental neurobiology that may be taken as complete or partial fulfillment of the requirements of the INP. Students admitted into the INP who subsequently select a research advisor in the Department will begin to follow the departmental requirements for their Ph.D. at the beginning of their second year; whereas MSTP students, in addition to following departmental requirements for the Ph.D., will be considered as a first-year student and are required to take at least one INP course. Students may take additional elective courses at their own option, but they are required to attend departmental seminars, to participate in the Journal Club and an annual "Grad Day" symposium, and to make presentations to Progress in Neuroscience sessions when invited. The research topic for a student's dissertation is chosen by the student in close consultation with their research advisor. Students are expected to advance to candidacy by the end of the third year by presenting progress on their own research and providing a proposal for their dissertation research. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

## Faculty

Aileen J. Anderson, Ph.D. University of California, Irvine, *Director of the Sue and Bill Gross Stem Cell Research Center and Professor of Physical Medicine and Rehabilitation; Anatomy and Neurobiology*

Tallie Z. Baram, M.D., Ph.D. University of Miami, *Weizmann Institute of Science and Danette 'Dee Dee' Shepard Chair in Neurological Studies and Distinguished Professor of Pediatrics; Anatomy and Neurobiology; Neurology; Physiology and Biophysics*

Anne L. Calof, Ph.D. University of California, San Francisco, *Professor of Anatomy and Neurobiology; Developmental and Cell Biology*

Lulu Y. Chen, Ph.D. University of California, Irvine, *Assistant Professor of Anatomy and Neurobiology*

Brian J. Cummings, Ph.D. University of California, Irvine, *Associate Dean of Faculty Development - Senate and Professor of Physical Medicine and Rehabilitation; Anatomy and Neurobiology*

Mark J. Fisher, M.D. University of Cincinnati, *Professor of Neurology; Anatomy and Neurobiology; Political Science*

Lisa Flanagan-Monuki, Ph.D. University of California, San Diego, *Associate Professor of Neurology; Anatomy and Neurobiology; Biomedical Engineering*

Christine M. Gall, Ph.D. University of California, Irvine, *Department Chair and Distinguished Professor of Anatomy and Neurobiology; Neurobiology and Behavior*

Alan L. Goldin, M.D. Ph.D. University of Michigan, *Professor of Microbiology and Molecular Genetics; Anatomy and Neurobiology; Physiology and Biophysics*

Robert F. Hunt, Ph.D. University of Kentucky, *Assistant Professor of Anatomy and Neurobiology*

Kei Igarashi, Ph.D. University of Tokyo, *Assistant Professor of Anatomy and Neurobiology*

Kwang M. Jung, Ph.D. Chung-Ang University, *Associate Adjunct Professor of Anatomy and Neurobiology*

Gary S. Lynch, Ph.D. Princeton University, *Professor of Psychiatry and Human Behavior; Anatomy and Neurobiology*

David C. Lyon, Ph.D. Vanderbilt University, *Department Vice Chair and Associate Professor of Anatomy and Neurobiology; Cognitive Sciences*

Diane K. O'Dowd, Ph.D. University of California, San Diego, *Professor of Developmental and Cell Biology; Anatomy and Neurobiology* (regulation of activity in developing and adult nervous systems)

Andre Obenaus, Ph.D. University of British Columbia, *Professor in Residence of Pediatrics; Anatomy and Neurobiology*

Daniele Piomelli, Ph.D. Columbia University, *Louise Turner Arnold Chair in the Neurosciences and Distinguished Professor of Anatomy and Neurobiology; Biological Chemistry; Pharmaceutical Sciences*

David J. Reinkensmeyer, Ph.D. University of California, Berkeley, *Professor of Anatomy and Neurobiology; Biomedical Engineering; Mechanical and Aerospace Engineering; Physical Medicine and Rehabilitation*

Steven S. Schreiber, M.D. Albany Medical College, *Professor in Residence of Neurology; Anatomy and Neurobiology; Psychiatry and Human Behavior*

Magdalene J. Seiler, Ph.D. University of Munich, *Associate Professor in Residence of Anatomy and Neurobiology; Physical Medicine and Rehabilitation*

Oswald Steward, Ph.D. University of California, Irvine, *Director, Reeve-Irvine Research Center and Reeve-Irvine Chair in Spinal Cord Injury Research and Distinguished Professor of Anatomy and Neurobiology; Neurobiology and Behavior*

John H. Weiss, M.D., Ph.D. Stanford University, *Professor of Neurology; Anatomy and Neurobiology*

Jamie Wikenheiser, Ph.D. Case Western Reserve University, *Associate Adjunct Professor of Anatomy and Neurobiology*

Xiangmin Xu, Ph.D. Vanderbilt University, *Professor of Anatomy and Neurobiology; Biomedical Engineering; Computer Science*

Fan-Gang Zeng, Ph.D. Syracuse University, *Director of Hearing Research and Professor of Otolaryngology; Anatomy and Neurobiology; Biomedical Engineering; Cognitive Sciences*

## Courses

### **ANATOMY 200. Research in Anatomy. 2-12 Units.**

Individual research supervised by a particular faculty member.

Repeatability: May be repeated for credit unlimited times.

### **ANATOMY 200R. Research in Anatomy and Neurobiology for First-Year Students. 2-12 Units.**

Independent research within the laboratories of graduate training faculty in the Department of Anatomy and Neurobiology for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

### **ANATOMY 201. Human Gross Anatomy. 8 Units.**

Study and dissection of the human body, including muscular, skeletal, nervous, and cardiovascular systems. Emphasis on both normal and abnormal structure and function.

Restriction: Graduate students only.

### **ANATOMY 202B. Human Neuroscience. 4 Units.**

Study of the human nervous system at the systems level including the physiology and anatomy of sensory, motor, and integrative functions.

Prerequisite: ANATOMY 202A

**ANATOMY 203A. Human Microscopic Anatomy. 3 Units.**

Lecture and laboratory course on human microscopic anatomy. Emphasis is on functional implications of structure of cells and tissues.

Restriction: Graduate students only.

**ANATOMY 203B. Human Microscopic Anatomy. 3 Units.**

Lecture and laboratory course on human microscopic anatomy. Emphasis is on functional implications of structure of cells and tissues.

Prerequisite: ANATOMY 203A

Restriction: Graduate students only.

**ANATOMY 206. Tutorial in Anatomy. 3 Units.**

Series of tutorials on advanced topics in anatomy.

Repeatability: May be repeated for credit unlimited times.

**ANATOMY 210A. Systems Neuroscience. 5 Units.**

Study of the mammalian nervous system at the systems level. Anatomy and physiology of sensory, motor, and integrative functions.

Repeatability: May be taken for credit 2 times.

Same as NEURBIO 208.

Restriction: Graduate students only. Neurobiology and Behavior Majors only.

**ANATOMY 215. Epilepsy as a Window to Mechanisms of Neuronal Plasticity. 4 Units.**

Understanding the mechanisms of brain disorders provides novel insights into the normal function of neurons and circuits. Discusses approaches to studying mechanisms of brain function ranging from imaging, the use of models and others to study epilepsy.

Grading Option: Satisfactory/unsatisfactory only.

**ANATOMY 227A. Current Topics in Neuroscience. 1-4 Units.**

Focuses on critical reading, presentation, and discussion of current literature in neuroscience research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ANATOMY 227B. Current Topics in Neuroscience. 1-4 Units.**

Focuses on critical reading, presentation, and discussion of current literature in neuroscience research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ANATOMY 227C. Current Topics in Neuroscience. 1-4 Units.**

Focuses on critical reading, presentation, and discussion of current literature in neuroscience research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ANATOMY 230. Topics in Translational Neuroscience. 2-4 Units.**

One-hour seminar presentation by participating faculty or guest lecturer and open to the science community, followed by one-hour student discussion of the lecture topic or related topic. Students are responsible for presentations and readings.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Graduate students only. Interdepartmental Neuroscience Majors have first consideration for enrollment.

**ANATOMY 230A. Molecular, Cellular, & Developmental Neurobiology. 4 Units.**

Molecular aspects of the structure and function of neurons and glia including neurotransmission, synaptic modulation, and channels. Neural development at the cellular and molecular level including neurogenesis, pattern formation, trophic factors, axonal growth, and synaptic rearrangement.

Restriction: Graduate students only.

**ANATOMY 292A. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**ANATOMY 292B. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**ANATOMY 292C. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Biological Chemistry

**Peter Kaiser, Department Chair**

**Kyoko Yokomori, Departmental Graduate Advisor**

Building D, Room 240, Medical Sciences I

949-824-6051

<http://www.biochem.uci.edu/>

The Department of Biological Chemistry provides advanced training to individuals who are interested in understanding the fine regulation of the biological processes, structural basis of the regulation, and the identification of targets for disease managements. Faculty research interests are diverse with emphases on several areas of basic and translational research: epigenetic regulation of gene expression; circadian rhythm and metabolism; chromatin structure and function; DNA repair and DNA damage responses; telomerase and telomere regulation; ubiquitin regulation in metabolism and cell cycle; signal transduction and transcription regulation in development and disease manifestation; molecular mechanisms of stem cell regulation and tumorigenesis; genomic and bioinformatics. Students are trained and exposed to technical expertise in all facets of current biological sciences. Established core research facilities are available in which students have access to a microarray and high-throughput sequencing core facility, electron microscopy, atomic force microscopy, confocal imaging center, mass spectroscopy, flow cytometry, transgenic core laboratories, biopolymer sequencing and synthesis laboratories, and other resources.

The Department offers training to graduate students under the auspices of the School of Medicine and in conjunction with the gateway program in Cellular and Molecular Biosciences (CMB) as well as the Mathematical, Computational, and Systems Biology (MCSB) program. Students are eligible to enter the Department program after meeting the specific requirements of the CMB gateway curriculum or by direct application to the Department. The Department program leads to the M.S. or Ph.D. in Biomedical Sciences, awarded after successful completion of all requirements. Students admitted into the combined program who select a research advisor in the Department begin thesis research in the second year. Students are required to attend and participate in the departmental research seminars. In addition, students are required to complete two advanced-level graduate courses subsequent to entering the Department's Ph.D. concentration. In the third year, students take the advancement-to-candidacy examination for the Ph.D. by presenting and defending a proposal for specific dissertation research. The normative time for completion of the Ph.D. is five years; students who make exceptional progress on their thesis projects are encouraged to complete the Ph.D. sooner. The maximum time permitted is seven years.

## Faculty

Bogi Andersen, M.D. University of Iceland, *Professor of Medicine; Biological Chemistry*

Pierre F. Baldi, Ph.D. California Institute of Technology, *Director of the Institute for Genomics and Bioinformatics and Distinguished Professor of Computer Science; Biological Chemistry; Biomedical Engineering; Developmental and Cell Biology; Mathematics* (artificial intelligence and machine learning, biomedical informatics, databases and data mining, environmental informatics, statistics and statistical theory)

Rémi Buisson, Ph.D. Université Laval, *Assistant Professor of Biological Chemistry; Pharmaceutical Sciences*

Phang-Lang Chen, Ph.D. University of California, San Diego, *Associate Professor of Biological Chemistry*

Xing Dai, Ph.D. University of Chicago, *Professor of Biological Chemistry; Dermatology*

Peter J. Donovan, Ph.D. University College London, *Professor of Biological Chemistry; Developmental and Cell Biology*

Angela G. Fleischman, M.D. Stanford University, *Assistant Professor of Medicine; Biological Chemistry*

Anand K. Ganesan, M.D., Ph.D. Medical College of Wisconsin, *Associate Professor of Dermatology; Biological Chemistry*

Sergei A. Grando, M.D., Ph.D., D.Sc. Central Institute of Dermatology and Venereology, *Medical Institute, Kiev, Ukraine; PostGraduate Institute for Physicians, Kiev, Ukraine; Central Institute of Dermatology and Venereology, Moscow, Russia and Professor of Dermatology; Biological Chemistry*

Lan Huang, Ph.D. University of Florida, *Professor of Physiology and Biophysics; Biological Chemistry; Biomedical Engineering; Pharmaceutical Sciences*

Peter Kaiser, Ph.D. University of Innsbruck, *Department Chair and Professor of Biological Chemistry*

Kai Kessenbrock, Ph.D. Ludwig Maximilian University of Munich, *Assistant Professor of Biological Chemistry*

Eva Y. Lee, Ph.D. University of California, Berkeley, *UCI Chancellor's Professor Emerita of Biological Chemistry*

Wen-Hwa Lee, Ph.D. University of California, Berkeley, *Professor Emeritus of Biological Chemistry*

Ellis Levin, M.D. Thomas Jefferson University, Jefferson Medical College, *Professor in Residence of Medicine; Biological Chemistry*

Wei Li, Ph.D. Institute of Biophysics, Chinese Academy of Sciences, *Endowed Chair and Professor of Biological Chemistry*

Haoping Liu, Ph.D. Cornell University, *Professor of Biological Chemistry*

Selma Masri, Ph.D. Beckman Research Institute of the City of Hope, *Assistant Professor of Biological Chemistry*

Frank L. Meyskens, M.D. University of California, San Francisco, *Daniel G. Aldrich, Jr. Endowed Chair and Professor of Medicine; Biological Chemistry; Program in Public Health*

Seyed Ali Mortazavi, Ph.D. California Institute of Technology, *Professor of Developmental and Cell Biology; Biological Chemistry* (functional genomics to study transcriptional regulation in development)

Trina Norden-Krichmar, Ph.D. University of California, San Diego, *Assistant Professor of Epidemiology; Biological Chemistry; Computer Science; Pharmaceutical Sciences*

Nicholas R. Pannunzio, Ph.D. Beckman Research Institute of City of Hope, *Assistant Professor of Medicine; Biological Chemistry*

Daniele Piomelli, Ph.D. Columbia University, *Louise Turner Arnold Chair in the Neurosciences and Distinguished Professor of Anatomy and Neurobiology; Biological Chemistry; Pharmaceutical Sciences*

Feng Qiao, Ph.D. University of California, Los Angeles, *Associate Professor of Biological Chemistry*

Suzanne B. Sandmeyer, Ph.D. University of Washington, *Grace Beekhuis Bell Chair in Biological Chemistry and Professor of Biological Chemistry; Microbiology and Molecular Genetics*

Paolo Sassone-Corsi, Ph.D. University of Naples Federico II, *Donald Bren Professor and Distinguished Professor of Biological Chemistry; Microbiology and Molecular Genetics; Pharmaceutical Sciences*

Marcus M. Seldin, Ph.D. Johns Hopkins University, *Assistant Professor of Biological Chemistry*

Robert E. Steele, Ph.D. Yale University, *Professor of Biological Chemistry*

Leslie M. Thompson, Ph.D. University of California, Irvine, *Chancellor's Professor and Donald Bren Professor of Psychiatry and Human Behavior; Biological Chemistry; Neurobiology and Behavior*

Richard A. Van Etten, M.D., Ph.D. Stanford University, *Director, Chao Family Comprehensive Cancer Center; Chao Family Endowed Director's Chair in Cancer Research and Treatment and Senior Associate Dean and Associate Vice Chancellor for Cancer and Professor of Medicine; Biological Chemistry*

Kyoko Yokomori, Ph.D. University of Tokyo, *Professor of Biological Chemistry*

Michael V. Zaragoza, M.D., Ph.D. Case Western Reserve University, *Associate Professor of Pediatrics; Biological Chemistry; Genetic Counseling*

Weian Zhao, Ph.D. McMaster University, *Associate Professor of Pharmaceutical Sciences; Biological Chemistry; Biomedical Engineering; Materials Science and Engineering* (stem cell therapy, diagnostics, biosensors, immunotherapy, single-cell analysis)

## Courses

### BIOCHEM 200A. Research in Biological Chemistry. 2-12 Units.

Individual research under the supervision of a professor.

Repeatability: Unlimited as topics vary.

**BIOCHEM 200B. Research in Biological Chemistry. 2-12 Units.**

Individual research under the supervision of a professor.

Repeatability: Unlimited as topics vary.

**BIOCHEM 200C. Research in Biological Chemistry. 2-12 Units.**

Individual research under the supervision of a professor.

Repeatability: Unlimited as topics vary.

**BIOCHEM 200R. Research in Biological Chemistry for First-Year Students. 2-12 Units.**

Independent research within the laboratories of graduate training faculty in the Department of Biological Chemistry for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

**BIOCHEM 202A. Laboratory Seminar Series. 1 Unit.**

Study within a laboratory group including research and journal presentations.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**BIOCHEM 202B. Laboratory Seminar Series. 1 Unit.**

Study within a laboratory group including research and journal presentations.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**BIOCHEM 202C. Laboratory Seminar Series. 1 Unit.**

Study within a laboratory group including research and journal presentations.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**BIOCHEM 207. Current Topics in Cancer Genomics. 4 Units.**

Literature-based discussion of molecular principles in genetics and functional genomics, with focus on cancer and stem cell biology.

Repeatability: May be taken for credit 2 times.

**BIOCHEM 210A. Medical Biochemistry and Molecular Biology. 12 Units.**

Covers the following topics from a biomedical perspective: protein and nucleic acid biochemistry, carbohydrates, lipids, amino acids, purines and pyrimidines, genome structure, molecular mechanisms of development, and signal transduction.

Restriction: Graduate students only.

**BIOCHEM 215. Mouse Developmental Genetics. 4 Units.**

Introduction to using the mouse in contemporary biomedical research. The biology and development of the laboratory mouse, methods for manipulation of the mouse genome and embryos, and examples of application of these methods to understand mammalian development and homeostasis.

Same as DEV BIO 207.

Restriction: Graduate students only.

**BIOCHEM 217. Human Evolution and Behavior. 4 Units.**

Covers theories and empirical research concerning the evolutionary origins of human behaviors and their variations. An interdisciplinary course emphasizing both evolutionary psychology (e.g., mating strategies, kinship, and parenting) and molecular evolution (i.e., evolution of genes for various behaviors).

Same as PSCI P271.

Restriction: Graduate students only.

**BIOCHEM 225. Epigenetics in Health and Disease . 4 Units.**

Focuses on the role of chromatin/nuclear structure organization (histone and DNA modification, chromatin remodeling, higher order chromatin structure and nuclear organization) on gene regulation, DNA replication and repair, relevant to development, metabolism, learning and memory, and human disease.

Prerequisite: MOL BIO 203 or MOL BIO 204 or NEURBIO 206

Same as NEURBIO 230.

Restriction: Graduate students only.

**BIOCHEM 240. New Breakthroughs in Basic and Translational Cancer Research. 4 Units.**

Highlights breakthroughs in molecular and cellular aspects of cancer biology and emerging therapeutic approaches. Emphasis on new discoveries of critical pathways/processes in cancer etiology, progression, and metastasis. Introduces strategies used in the discovery, design of biological and small molecules-based therapies.

Prerequisite: MOL BIO 204 or PHYSIO 252. A gene regulation course is also required.

Restriction: Graduate students only.

**BIOCHEM 291. Research Seminar. 2 Units.**

Student research-based colloquium covering current topics in gene organization and expression, cell cycle and differentiation, DNA repair, checkpoint control, and the physical, chemical, and biological properties of macromolecules. Students are encouraged to read critically and analyze recent literature.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**BIOCHEM 292A. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**BIOCHEM 292B. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**BIOCHEM 292C. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Biomedical and Translational Science, M.S.

**Sherrie H. Kaplan, Director**

100 Theory, Suite 110

949-824-7286

ttp@uci.edu

<http://www.som.uci.edu/graduate-studies/education/ms-bats.asp>

The aim of the M.S.-BATS program is to train students in the conduct of high-quality multidisciplinary clinical research to facilitate the rapid transformation of basic knowledge to clinical medicine. The program is designed for students from varying levels of training, including medical students, residents, fellows, physicians, nurses, and others who are interested in conducting clinical research to maximize interdisciplinary communication and understanding sufficient to carry out high-quality clinical research. The dual degree M.D./M.S.-BATS program is intended to integrate clinical research training skills with the medical school curriculum by allowing medical students to be enrolled in both degree programs concurrently. The program provides training in core competencies required to conduct clinical research including study design reflecting the breadth and complexity of clinical research applications, critical appraisal of multidisciplinary research literature, conduct and management of clinical research, medical statistics, research

ethics, and the leadership of multidisciplinary research teams. Students who successfully complete the program receive the M.S. degree in Biomedical and Translational Science. Medical students receive two separate degrees and diplomas: An M.S.-BATS degree and an M.D. degree from the School of Medicine at the completion of School of Medicine work. The M.S.-BATS can be conferred before completion of the M.D., or concurrently with the M.D. degree.

Faculty evaluate applicants to the program on the basis of grades, previous course work, letters of recommendation, and other relevant qualifications. All graduate students, including those from public health, nursing science, and pharmaceutical science are eligible to apply, but the program has a highly clinical focus and is specifically designed for those with a sufficient background in clinical sciences. Applicants should have successfully completed a B.S. or equivalent, and may be current medical students, residents, clinical fellows, faculty, or licensed physicians in the community.

The M.S.-BATS program will initially offer training in Evidence-Based Medicine/Clinical Research, which will focus on the conduct and interpretation of clinical research, synthesis of clinical literature, and the assessment and improvement of quality of healthcare. Additional fields of emphasis will be added, including Molecular Medicine, focusing on the molecular mechanisms and molecular physiology of human disease and Population Medicine, focusing on the application of epidemiologic research and research methods and findings to clinical practice.

The M.S.-BATS program is a two-year curriculum. First-year students are required to enroll in core courses including Introduction to Clinical Epidemiology, Introduction to Medical Statistics, Design and Analysis of Clinical Trials, and Ethics in Clinical Research. Additional required courses include Comparative Effectiveness Research; Health Politics and Policy; Measurement Science; Outcomes Research and Advanced Applied Methods; Disparities in Health and Health Care; Introduction to Medical Statistics II; and Quality, Efficiency, and Cost-effectiveness. Training during the second year emphasizes research and culminates in a written thesis. Throughout the program, students enroll in the BATS Seminar Series. By exception only, medical students and some students entering the program with advanced degrees, clinical research experience, or those who have previously completed the four core courses may be able to complete the program in less than two years.

The MS-BATS admissions committee will evaluate applicants to the program on the basis of grades, previous course work, letters of recommendation, and other relevant qualifications, such as years of experience working in a clinical setting. All graduate students, including those from public health, nursing science, and pharmaceutical science are eligible to apply, but the program has a highly clinical focus and is specifically designed for those with a sufficient background in clinical sciences. Applicants should have successfully completed a B.S. degree or equivalent, and may be current medical students, residents, clinical fellows, faculty, or licensed physicians in the community.

## Graduate Program in Biomedical And Translational Science

Faculty evaluate applicants to the program on the basis of grades, previous course work, letters of recommendation, and other relevant qualifications. All graduate students, including those from public health, nursing science, and pharmaceutical science are eligible to apply, but the program has a highly clinical focus and is specifically designed for those with a sufficient background in clinical sciences. Applicants should have successfully completed a B.S. degree or equivalent, and may be current medical students, residents, clinical fellows, faculty, or licensed physicians in the community.

The M.S.-BATS program will initially offer training in Evidence-Based Medicine/Clinical Research, which will focus on the conduct and interpretation of clinical research, synthesis of clinical literature, and the assessment and improvement of quality of healthcare. Additional fields of emphasis will be added, including Molecular Medicine, focusing on the molecular mechanisms and molecular physiology of human disease and Population Medicine, focusing on the application of epidemiologic research and research methods and findings to clinical practice.

The M.S.-BATS program is a two-year curriculum. First-year students are required to enroll in core courses including Introduction to Clinical Epidemiology, Introduction to Medical Statistics, Design and Analysis of Clinical Trials, and Ethics in Clinical Research. Additional required courses include, Comparative Effectiveness Research, Health Politics and Policy, Measurement Science, Outcomes Research and Advanced Applied Methods, Disparities in Health and Health Care, Introduction to Medical Statistics II, and Quality, Efficiency, and Cost-effectiveness. Training during the second year emphasizes research and culminates in a written thesis. Throughout the program, students enroll in the BATS Seminar Series. By exception only, medical students and some students entering the program with advanced degrees, clinical research experience, or those who have previously completed the four core courses may be able to complete the program in less than two years.

## Courses

### **BATS 209A. Introduction to Medical Statistics. 4 Units.**

Provides understanding of medical statistics for clinicians and clinical researchers to read and interpret literature.

### **BATS 209B. Introduction to Medical Statistics II. 4 Units.**

Provides sufficient understanding of medical statistics to read and interpret medical literature critically, identify appropriate statistics for basic research designs used in medicine, and discriminate between appropriate and inappropriate statistical applications for common research designs.

Prerequisite: BATS 209A

### **BATS 210A. Introduction to Clinical Epidemiology. 4 Units.**

Introduces principles and practice of clinical epidemiology and the population-based approach to health and disease.

Prerequisite: BATS 209A

**BATS 232. Design and Analysis of Clinical Trials. 4 Units.**

Presents history, organization and planning, rationale for methods, limits, and ethics in conducting clinical trials.

Prerequisite: BATS 209A or STAT 250

**BATS 245A. Comparative Effectiveness Research . 4 Units.**

Provides a comprehensive overview of comparative effectiveness research (CER) with in-depth methodologic clinical practice and policy/dissemination issues related to the conduct, interpretation, and clinical applications of CER.

**BATS 247. Measurement Science, Outcomes Research, and Advanced Applied Methods. 4 Units.**

Further the understanding of methodologic issues involved in the conducting of comparative effectiveness research (CER). Topics: risk adjustment, balancing observational study designs, use of outcomes from multiple data sources, innovations clinical trial designs, the conduct of meta-analysis, and psychometric methods.

**BATS 251. Quality Efficiency and Cost Effectiveness. 4 Units.**

Introduces the principles and practice of quality of care, patient safety, and patient experience research, along with major national and statewide policy and legislative initiatives related to quality of care and patient safety.

**BATS 253. Disparities in Health and Health Care. 4 Units.**

Reviews all aspects of culture that influence health status, development of public health policy, and management and practice of health care. Explores how race and ethnicity affect health and health care, including health care services and policies governing these services.

**BATS 255. Health Politics and Policy. 4 Units.**

Offers political and analytical insights into understanding U.S. health policymaking and developing strategies that influence health policy outcomes.

**BATS 280. Biomedical and Translational Science Seminar. 2 Units.**

Students present their current research or a topic of interest and are exposed to diverse projects in the biomedical and translational science arena.

Repeatability: May be repeated for credit unlimited times.

**BATS 295. Master's Thesis Research and Writing. 2-12 Units.**

Master's thesis research and writing with Biomedical and Translational Science faculty.

Repeatability: May be repeated for credit unlimited times.

**BATS 296. Ethics in Clinical Research. 4 Units.**

Covers major frameworks and concepts of ethics in public health research as well as human subject protection issues.

**BATS 299. Independent Directed Research. 2-12 Units.**

Independent research with Biomedical and Translational Science faculty.

Repeatability: May be repeated for credit unlimited times.

## Biomedical Sciences, Ph.D.

The UCI School of Medicine offers graduate study leading to a Ph.D. degree in Biomedical Sciences. Five participating basic science departments train students in biomedical research and critical inquiry with the goal of a research-based career in academia, biomedical technology and related fields.

Entry into the Ph.D. programs is primarily through the UCI Gateway Programs (CMB and INP). Direct admission is on a case-by-case basis. Students in the Medical Scientist Training Program (MSTP) may also elect to pursue their Ph.D. in Biomedical Sciences.

**About the UCI Gateway Programs:**

- Cellular & Molecular Biosciences (CMB) [cmb.uci.edu](http://cmb.uci.edu) (<https://cmb.uci.edu>)
- Interdepartmental Neuroscience Program (INP) <https://inp.uci.edu>

Among the first-year requirements, students supervised by a faculty advisor take coursework and identify labs for rotation with the intention of selecting a potential thesis advisor, and must pass a preliminary qualifying examination.

Application information is found on the ADMISSION tab and at <https://grad.uci.edu>.

**About the Medical Scientist Training Program (MSTP):**

The MSTP is an M.D./Ph.D. program that trains individuals who can understand and contribute to advances in research, and can also apply those advances to the field of medical care. Website information is found at <https://mstp.uci.edu/>. The program is administered by Joanne Wu at [joanne.wu@uci.edu](mailto:joanne.wu@uci.edu) and directed by Dr. Alan Goldin at [agoldin@uci.edu](mailto:agoldin@uci.edu).

**Departments Offering the Ph.D. in Biomedical Sciences:**

- Anatomy & Neurobiology
- Biological Chemistry
- Microbiology & Molecular Biology (Medical Microbiology)
- Pathology & Laboratory Medicine (Experimental Pathology)
- Physiology & Biophysics

Programs are administered by each department. The School of Medicine Office of Graduate Studies oversees and enhances student and program efforts. Questions may be directed to the Director of Graduate Studies, Leora Fellus at [lfellus@uci.edu](mailto:lfellus@uci.edu), or Associate Dean for Graduate and Postdoctoral Studies, Dr. Klemens Hertel, at [khertel@uci.edu](mailto:khertel@uci.edu).

**Admission Requirements and Application for Gateway Programs and Direct Admission:**

To apply via the CMB or INP Gateway Programs, carefully review program and admission requirements and deadlines.

- Interdepartmental Neuroscience Program (INP): <https://inp.uci.edu/admissions-and-application/>
- Cellular & Molecular Biosciences (CMB): <https://cmb.uci.edu/admissions/>

Consult each program and the UCI Graduate Division website for information and instructions:

- <https://www.grad.uci.edu/admissions/index.php> (<https://www.grad.uci.edu/admissions/>)
- <https://www.grad.uci.edu/admissions/applying-to-uci/index.php> (<https://www.grad.uci.edu/admissions/applying-to-uci/>)
- Online Application: <https://apply.grad.uci.edu/apply/>

**Admission Requirements and Application for the MSTP:**

Carefully review program, admission requirements and deadlines as well as qualifications and eligibility requirements for the M.D./Ph.D. program: <https://mstp.uci.edu/admissions/application-process/>.

Application for qualifying individuals is made through the American Medical College Application Service (AMCAS).

Questions about admission should be directed to program faculty and staff.

**Master of Science in Biomedical Sciences**

The Master of Science degree in Biomedical Sciences may be completed by submission of a research thesis (plan I) or by course-work and a comprehensive exam (plan II).

**Plan I: Thesis Plan.** The student is required to complete at least four didactic graduate courses (16 units) offered by the department, and elective course work with an additional 8 units of graduate or upper-division undergraduate course work. In addition, the student will typically take additional seminar courses during the graduate study. Students in the M.S. program may be employed as teaching assistants, but units earned through enrollment in University Teaching (399) may not be counted toward degree completion. The student engages in thesis research with a faculty thesis advisor, and will prepare and submit a dissertation to the thesis committee. The final examination is an oral presentation of the thesis to the committee. The normative time to degree is two years for the thesis M.S. degree.

**Plan II: Comprehensive Examination Plan.** The plan II M.S. degree is awarded based on completion of at least 36 units of course work and a satisfactory completion of a comprehensive exam. The student is required to complete at least 16 units (four courses) of didactic graduate course work offered by the department. In addition, the student will take up to 12 units of research. An additional 8 units or more of elective course work will be completed from other graduate courses offered by the department. A maximum of 4 units of upper-division undergraduate courses may be included in the program with the approval of the Associate Dean for Graduate Studies. Students in the M.S. program may be employed as teaching assistants, but units earned through enrollment in University Teaching (399) may not be counted toward degree completion. The comprehensive exam will be administered by a committee of at least three departmental faculty, and may include written and oral sections. The comprehensive exam format will include a research presentation and may include additional portions such as a research proposal, presentation of a project, or other components. The normative time to degree is one year for the M.S. degree by comprehensive exam.

**Doctor of Philosophy**

**Comprehensive Examination-First Year.** The student must pass comprehensive oral or written examinations at the discretion of the department. The examination is generally taken at the end of the first year of graduate study.

**Advancement to Candidacy.** The advancement to candidacy examination is taken before the end of the third year of graduate study. The student is expected to have identified an important and tractable dissertation research topic. A faculty committee for the advancement to candidacy examination is proposed by the faculty mentor in consultation with the student, and approved by the Department Graduate Advisor. A majority of the committee must hold primary or joint appointments in the student's department.

Once this examination is completed, the student is advanced to candidacy for the doctoral degree and is expected to complete the degree within three years. The student must submit a dissertation on this research and defend the thesis in an oral examination during the final year of graduate study. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

Graduate-student status or consent of instructor is a prerequisite for all 200–299 courses.

- Anatomy and Neurobiology
- Biological Chemistry
- Experimental Pathology
- Microbiology and Molecular Genetics
- Physiology and Biophysics

## Experimental Pathology

**Edwin S. Monuki, Department Chair and Graduate Program Director**  
**Elizabeth Head, Departmental Graduate Advisor**

Medical Sciences I, Building D, Room D440  
 949-824-5367  
<http://www.pathology.uci.edu/>

The Department of Pathology and Laboratory Medicine offers a Ph.D. in Biomedical Sciences with a focus on Experimental Pathology. The graduate program emphasizes experimental approaches to better understand the molecular and cellular mechanisms of disease, particularly human disease. Principal areas of research investigated by faculty in Experimental Pathology include concentrating studies in microbial genomics, innate immunity, cellular stress, stem cell biology, developmental neurobiology, cancer, and neurodegenerative disease.

The Department of Pathology & Laboratory Medicine offers a graduate program in Experimental Pathology. Application to Experimental Pathology is generally through one of two 'gateway' programs, which offer multidisciplinary graduate training under the heading of Cellular and Molecular Biosciences (CMB) (<https://cmb.uci.edu>) or the Interdepartmental Neuroscience Program (INP) (<https://inp.uci.edu>). Members of the Pathology faculty participate in the CMB and INP programs.

The CMB and INP programs include a first-year curriculum and the opportunity to rotate through two or more research laboratories. For the CMB program, students select a specific area of interest from ten areas of academic study, one of which is Experimental Pathology. Experimental Pathology emphasizes experimental approaches to better understand the molecular and cellular mechanisms of disease, with a focus on human disease. After the first year in the CMB or INP program, students interested in Experimental Pathology will join the laboratories of faculty within the department or the laboratories of approved affiliated faculty.

Students should advance to candidacy by the end of their third year. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

## Faculty

Daniela A. Bota, M.D., Ph.D. Carol Davila University of Medicine and Pharmacy, *Chief Scientific Officer, Center for Clinical Research and Vice Dean for Clinical Research and Associate Professor of Neurology; Neurological Surgery; Pathology and Laboratory Medicine*

Jefferson Chan, M.D. Ph.D. University of California, San Francisco, *Professor of Pathology and Laboratory Medicine; Environmental Health Sciences*

Vishal S. Chandan, M.D. Maharashtra University of Health Sciences, *Health Sciences Clinical Professor of Pathology and Laboratory Medicine*

Peter Chang, M.D. Northwestern University, *Assistant Professor in Residence of Radiological Sciences; Computer Science; Pathology and Laboratory Medicine*

Daniel Chow, M.D. University of California, Los Angeles, *Assistant Professor in Residence of Radiological Sciences; Neurology; Pathology and Laboratory Medicine*

Bridgit O. Crews, Ph.D. University of California, Santa Barbara, *Health Sciences Assistant Clinical Professor of Pathology and Laboratory Medicine*

Maria G. Dacoste-Iyer, M.D. Topiwala National Medical College, *Health Sciences Clinical Professor of Pathology and Laboratory Medicine*

Luis M. De La Maza, M.D., Ph.D. University of Minnesota, *Professor of Pathology and Laboratory Medicine*

Suvarna Ajay Deshmukh-Rane, M.D. Bharti Vidyapeeth Medical College, *Health Sciences Assistant Clinical Professor of Pathology and Laboratory Medicine*

Robert A. Edwards, M.D., Ph.D. Baylor College of Medicine, *Associate Professor of Pathology and Laboratory Medicine*

Ted Farzaneh, M.D. Shaheed Beheshti University of Medical Sciences, *Health Sciences Assistant Clinical Professor of Pathology and Laboratory Medicine*

Min Han, M.D. Xi'an Jiaotong University, *Health Sciences Assistant Clinical Professor of Pathology and Laboratory Medicine*

Elizabeth Head, Ph.D. University of Toronto, *Vice Chair for Research and Professor of Pathology and Laboratory Medicine*

Maria Cristina Kenney, M.D., Ph.D. University of California, Los Angeles; University of Arizona, *Professor of Ophthalmology; Pathology and Laboratory Medicine*

Virginia E. Kimonis, M.D. University of Southampton, *Professor of Pediatrics; Environmental Health Sciences; Genetic Counseling; Pathology and Laboratory Medicine*

Dan Mercola, M.D., Ph.D. University of California, Los Angeles, *Professor of Pathology and Laboratory Medicine*

Edwin S. Monuki, M.D., Ph.D. University of California, San Diego, *Department Chair and Warren L. Bostick Chair in Pathology and Professor of Pathology and Laboratory Medicine; Developmental and Cell Biology*

Tahseen Mozaffar, MBBS Aga Kahn University, *Dr. Stanley van den Noort Endowed Chair and Interim Department Chair and Professor of Neurology; Pathology and Laboratory Medicine*

Ellena Peterson, Ph.D. Georgetown University, *Professor Emerita of Pathology and Laboratory Medicine*

Sherif Rezk, M.D. Alexandria University, *Professor of Pathology and Laboratory Medicine*

Beverly Wang, M.D. Jiangxi Medical College, *Professor of Pathology and Laboratory Medicine; Otolaryngology*

## Courses

### **PATH 200A. Research in Experimental Pathology. 2-12 Units.**

Independent research for the Ph.D. program within the laboratories of graduate training faculty in Experimental Pathology.

Corequisite: PATH 203A

Repeatability: Unlimited as topics vary.

### **PATH 200B. Research in Experimental Pathology. 2-12 Units.**

Independent research for the Ph.D. program within the laboratories of graduate training faculty in Experimental Pathology.

Corequisite: PATH 203B

Repeatability: Unlimited as topics vary.

### **PATH 200C. Research in Experimental Pathology. 2-12 Units.**

Independent research for the Ph.D. program within the laboratories of graduate training faculty in Experimental Pathology.

Corequisite: PATH 203C

Repeatability: Unlimited as topics vary.

### **PATH 200R. Research in Experimental Pathology for First-Year Students. 2-12 Units.**

Independent research within the laboratories of graduate training faculty in Experimental Pathology for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

### **PATH 203A. Advanced Studies in Experimental Pathology. 1 Unit.**

A tutorial course for Ph.D. students in Experimental Pathology entailing attendance at Departmental seminars and critical reading of the scientific literature.

Corequisite: PATH 200A

Repeatability: May be repeated for credit unlimited times.

**PATH 203B. Advanced Studies in Experimental Pathology. 1 Unit.**

A tutorial course for Ph.D. students in Experimental Pathology entailing attendance at Departmental seminars and critical reading of the scientific literature.

Corequisite: PATH 200B

Repeatability: May be repeated for credit unlimited times.

**PATH 203C. Advanced Studies in Experimental Pathology. 1 Unit.**

A tutorial course for Ph.D. students in Experimental Pathology entailing attendance at Departmental seminars and critical reading of the scientific literature.

Corequisite: PATH 200C

Repeatability: May be repeated for credit unlimited times.

**PATH 204A. Experimental Pathology Research Seminar. 1 Unit.**

Seminar series for graduate students in Experimental Pathology. Students attend seminars and, beginning in their third year of graduate study, present one formal seminar on their graduate research.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PATH 204B. Experimental Pathology Research Seminar. 1 Unit.**

Seminar series for graduate students in Experimental Pathology. Students attend seminars and, beginning in their third year of graduate study, present one formal seminar on their graduate research.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PATH 204C. Experimental Pathology Research Seminar. 1 Unit.**

Seminar series for graduate students in Experimental Pathology. Students attend seminars and, beginning in their third year of graduate study, present one formal seminar on their graduate research.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PATH 221. Immunopathogenic Mechanisms of Disease. 3 Units.**

Examination of the mechanisms underlying disease states mediated by immune dysregulation. Topics include mechanisms of immune evasion by cancer, diseases mediated by cytokine dysregulation, role of the microbiome of the GI tract and other disease sites, and adoptive T-cell therapy.

Prerequisite: MMG 215

Same as MMG 221.

Restriction: Graduate students only.

**PATH 225. Molecular Mechanisms of Human Disease. 3 Units.**

Provides an overview of the molecular mechanisms of human diseases, including neurologic, hematologic, neoplastic, and infectious diseases. Students gain an understanding of these mechanisms, as well as models of human diseases.

Same as MMG 225.

**PATH 227. Experimental Pathology Journal Club. 1 Unit.**

Graduate-level course, which is open to all years, will involve the reading and discussion of papers, preferably written by the invited seminar speaker. Discussions will cover advanced topics in experimental pathology as related to an understanding of human disease.

Corequisite: PATH 204A and PATH 204B and PATH 204C

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PATH 292A. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PATH 292B. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PATH 292C. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PATH 299. Dissertation in Experimental Pathology. 1-12 Units.**

Provided for the preparation and completion of the dissertation required for the Ph.D. degree.

Repeatability: May be repeated for credit unlimited times.

## Genetic Counseling, M.S.

**Pamela Flodman, Graduate Program Director**

UCI Medical Center, City Tower, Suite 800

714-456-7570 / 714-456-5789

<http://www.pediatrics.uci.edu/gcprogram/>

The Division of Genetic and Genomic Medicine in the School of Medicine's Department of Pediatrics offers a Master of Science degree program in Genetic Counseling. The program is an intensive, full-time, two-year program, and consists of didactic coursework, supervised clinical experience, and the completion of a required research project (thesis). The goal of the program is to graduate students who have developed the practice-based skills and competency of an entry-level genetic counselor. In order to develop these professional skills, students gain practical experience in a variety of clinical settings (including prenatal, cancer, pediatrics, and adult clinics), under the supervision of faculty medical geneticists and genetic counselors. Many graduates of the program join academic or hospital-based genetics teams providing clinical services, teaching, and research. Others work for local, state, or federal genetics programs, for commercial genetics laboratories, in research studies, or in education. The graduate program is fully accredited by the Accreditation Council for Genetic Counseling.

Division faculty and staff are engaged in teaching, research, and patient service. Clinical activities center on diagnostic evaluation, management, genetic test interpretation, and genetic counseling for genetic disorders, including birth defects, developmentally disabling conditions, hereditary cancers, and adult onset conditions. Faculty research interests include clinical genomics; gene mapping and identification using molecular and quantitative methods; characterization and management of malformation and chromosomal syndromes; genetic variant identification and classification; counseling for late-onset genetic conditions including familial cancers and neurogenetic disorders; factors causing chromosome abnormalities, genomic disorders, and congenital malformations; cancer genetics and cytogenetics; biochemical genetics; psychosocial and cultural issues associated with genetic conditions, prenatal diagnosis, genetic screening, testing, and genetic services delivery; treatment of genetic disease; and ethical and public policy issues in genetics.

Recommended undergraduate preparation includes course work in the biological and behavioral sciences—particularly in genetics, biochemistry, molecular biology, cell biology, psychology, statistics, and human anatomy or embryology. Fluency in Spanish or a Southeast Asian language confers an advantage, but is not required. Extracurricular or employment experiences that provide evidence of the student's maturity, interpersonal skills, and promise as a genetic counselor figure prominently in the admissions decision. References should speak to these qualities as well as to the academic qualifications of the applicant. Experience providing crisis counseling is also recommended. The GRE General Test is required of all applicants (including those who have a previous graduate degree). Subject Test scores in any area will also be considered if they are available. Since there is no GRE code for the Department of Pediatrics, applicants should use the UCI institution code: R4859.

Applications are accepted for the fall quarter only and must be complete by January 15. Because of keen competition for places in the program, a two-stage admissions process is employed. Following initial review of applications by the faculty admissions committee, approximately one-quarter of applicants are invited for interviews, which are usually conducted during February through early April. If invited, it is greatly to the candidate's advantage to have an on-site interview, although in difficult circumstances it may be possible to arrange an out-of-town interview. Any candidate planning to be in the Southern California area in February through early April is encouraged to inquire in advance regarding the likelihood of an interview. Final selection from the interviewed candidates is accomplished by way of a Genetic Counseling Admissions Match program which has been established to place

applicants into programs based on a fair process that takes into account both the applicants' and programs' preferences (similar to the process of matching physicians to residency training programs). For further information about the match program, visit the GC Admissions Match website (<https://natmatch.com/gcadmissions/>). Six to eight students are usually admitted each year.

During the six to eight academic quarters of the program, students complete a sequence of core courses covering medical, quantitative, biochemical, molecular, and cancer genetics and genomics; teratology, embryology, and development; cytogenetics; counseling theory and application; research methods; ethical issues; and community resources. All courses are taught by Division faculty specifically for students in the program. Experiential professional training occurs concurrently with formal course work in a variety of clinics at the UCI Medical Center and affiliated facilities, in the prenatal diagnosis and cancer genetics programs, in cytogenetics and molecular genetics laboratories, and in various community agencies. Students participate in divisional and departmental professional and educational activities such as lectures, seminars, and journal club; rounds including in Pediatrics, Obstetrics, and Ethics; tumor boards; and various research, counseling, and patient management conferences throughout the program. While not required, some students choose to arrange optional clinical rotations at other academic, private, or commercial genetics units.

Degree requirements include a minimum of 87 quarter units, completion of a research thesis that should be publishable, and demonstration of appropriate professional skills in genetic counseling. The program director serves as faculty advisor to students. Teaching and supervision of professional experiential training are shared by all Division faculty and staff, who frequently review student progress. In the second year, development of professional skills can be individualized according to the trainee's needs and interests. Successful completion of the program (together with an assessment that the student has achieved the practice-based competency of an entry-level genetic counselor) fulfills the curricular and clinical training requirements for eligibility to sit for examination by the American Board of Genetic Counseling.

## Faculty

Maureen E. Bocian, M.D. University of Illinois, *Senate Emerita of Pediatrics; Genetic Counseling*

Jennifer N. Cech, Ph.D. University of Washington, *Health Sciences Assistant Clinical Professor of Pediatrics; Genetic Counseling*

Elizabeth C. Chao, M.D. University of California, Irvine, *Assistant Adjunct Professor of Pediatrics; Genetic Counseling*

Pamela L. Flodman, M.S. University of California, Irvine, *Adjunct Professor of Pediatrics; Genetic Counseling*

Kathryn Steinhaus French, M.S. University of Colorado Denver, *Health Sciences Clinical Professor of Pediatrics; Genetic Counseling*

Natalie M. Gallant, M.D. University of Southern California, *Health Sciences Associate Clinical Professor of Pediatrics; Genetic Counseling*

John Jay Gargus, M.D. Ph.D. Yale University, *Director of the Center for Autism Research and Translation and Professor Emeritus of Physiology and Biophysics; Genetic Counseling; Pediatrics*

June-Anne Gold, M.B.B.S., D.C.H., M.R.C.P. University of London, *Health Sciences Clinical Professor of Pediatrics; Genetic Counseling*

Virginia E. Kimonis, M.D. University of Southampton, *Professor of Pediatrics; Environmental Health Sciences; Genetic Counseling; Pathology and Laboratory Medicine*

Rebecca L. Leshay, M.S. University of North Carolina, *Health Sciences Assistant Clinical Professor of Pediatrics; Genetic Counseling*

Angela Myers, M.C.H., M.D. Stanford University, *Health Sciences Assistant Clinical Professor of Pediatrics; Genetic Counseling*

Deepika Nathan, M.S. Northwestern University, *Health Sciences Assistant Clinical Professor of Pediatrics; Genetic Counseling*

Leslie J. Raffel, M.D. Medical College of Pennsylvania, *Health Sciences Clinical Professor of Pediatrics; Genetic Counseling*

Kathryn E. Singh, M.P.H., M.S. University of California, Irvine, *Health Sciences Associate Clinical Professor of Pediatrics; Genetic Counseling*

Moyra Smith, M.D., Ph.D., M.F.A. University of Pretoria, *Professor Emerita of Pediatrics; Genetic Counseling*

M. Anne Spence, Ph.D. University of Hawaii at Manoa, *Professor Emerita of Pediatrics; Genetic Counseling*

Michael V. Zaragoza, M.D., Ph.D. Case Western Reserve University, *Associate Professor of Pediatrics; Biological Chemistry; Genetic Counseling*

## Courses

### **PED GEN 200A. Introduction to Medical Genetics and Cytogenetics. 4 Units.**

Covers current concepts regarding mitosis, meiosis, the cell cycle, and chromosome ultrastructure and function. Clinical disorders caused by chromosomal aneuploidy, duplication, and deletion, and principles of Mendelian, chromosomal, and multifactorial and nontraditional inheritance are presented and illustrated.

Restriction: Graduate students only.

**PED GEN 200B. Genetic Screening, Prenatal Development, and Human Teratology. 4 Units.**

Principles and techniques of prenatal, neonatal, and carrier screening. Infertility, pregnancy, and delivery. Normal and abnormal prenatal growth and development. Reproductive and fetal effects of drugs, radiation, infections, and other environmental factors.

Prerequisite: PED GEN 200A

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 200C. Human Genetic Disorders. 4 Units.**

Inheritance, diagnosis, natural history, management, and counseling considerations for commonly encountered genetic diseases, birth defects, and dysmorphic syndromes.

Prerequisite: PED GEN 200B

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 200D. Disorders due to Inborn Errors of Metabolism. 4 Units.**

Aspects of biochemistry and metabolism are reviewed with special emphasis on genetic abnormalities which lead to inborn errors of metabolism. Diagnostic procedures, heterozygote detection, treatment, counseling issues, and prenatal diagnosis are reviewed.

Prerequisite: PED GEN 200A

**PED GEN 200E. Molecular Genetics, Gene Mapping, and Genetic Linkage. 4 Units.**

Derivation of different types of DNA probes and DNA libraries, restriction endonuclease polymorphisms, assignment of genes to chromosomes, and genetic linkage. Emphasis on the use of recombinant DNA technologies and genetic analysis for diagnosis of human genetic disease.

Prerequisite: PED GEN 200A and PED GEN 200D

**PED GEN 200F. Quantitative Genetics. 2 Units.**

Quantitative aspects of human genetics, including population studies, segregation analysis, linkage, mapping, and genetic risk determination.

Prerequisite or corequisite: PED GEN 200A

Overlaps with PED GEN 200B.

**PED GEN 200G. Hereditary Cancer Counseling. 4 Units.**

Issues in genetic counseling for cancer. Cancer biology; genetic mechanisms and environmental influences in carcinogenesis; tumor pathology; cancer gene mapping; epidemiology. Features natural history, diagnosis, prevention, surveillance, and management of heredity cancers. Psychosocial, ethical, legal aspects of cancer risk assessment.

Prerequisite: PED GEN 200B

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 200H. Genetic Counselin Research Design. 4 Units.**

Quantitative and qualitative methods for genetic counseling research. Reference management; statistics: sample size, power, and data analysis; reliability and validity; surveys, questionnaires, interviews, focus groups; quality of life and genetic epidemiology research; designing a research protocol; IRB issues; grant writing.

**PED GEN 200L. Cytogenetics Laboratory. 4 Units.**

Practicum introducing methods of specimen collection, short-term lymphocyte and bone marrow culture, long-term fibroblast and amniocyte culture, harvesting and slide preparation, chromosome staining, microphotography, and darkroom techniques. Microscopic chromosome analysis, photographic karyotyping, and appropriate use of cytogenetic nomenclature are emphasized.

Restriction: Graduate students only.

**PED GEN 201A. Introduction to Genetic Counseling. 4 Units.**

Through directed readings, observing patient evaluations, role-playing, and conducting intake interviews, students are introduced to the process of diagnosis, management, and counseling for genetic disease. Psychosocial issues, interviewing techniques, pedigree construction, clinical photography, and various other skills are addressed.

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 201B. Clinical Rotation I. 4 Units.**

Provides extensive supervised experience in history taking, interviewing, and psychosocial assessment in the clinical genetics setting. Students independently perform telephone, office, and home-visit intake interviews, participate in counseling, and present cases at patient management conferences.

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 201C. Clinical Rotation II. 4 Units.**

Provides further supervised experience in genetic counseling, case management, clinic administration and organization, and the use of community resources. Emphasis is on sharpening counseling skills and on developing a professional identity and code of ethics.

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 201D. Prenatal Diagnosis Counseling. 4 Units.**

A practicum with extensive supervised experience in prenatal diagnosis counseling which provides the student with the opportunity to conduct genetic counseling sessions semi-independently and to further develop clinical skills.

Prerequisite: PED GEN 200A and PED GEN 200B and PED GEN 200C

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 202A. Counseling in Human Genetics: Theory and Methods. 3 Units.**

Theoretical approaches, counseling models and methods, and bio-psychosocial assessment strategies are examined in the context of genetic counseling. Contract-setting, working alliance, the use of self and evaluation methods. Beginning counseling and peer supervision skills are practiced in class.

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 202B. Community Resources. 1-2 Units.**

Lectures, guest speakers, and community visits acquaint genetic counselors with public and private health care and funding agencies, parent support and advocacy groups, and other resources to assist individuals and families confronted with genetic disorders, developmental disabilities, and birth defects.

Repeatability: May be taken for credit 2 times.

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 202C. Ethical Issues in Human Genetics. 1-2 Units.**

Explores major social, legal, and ethical issues in genetic counseling including those arising in genetic screening, prenatal diagnosis, informed consent, privacy and confidentiality, rights of the disabled, new genetic and reproductive technologies, treatment, and access to services.

Repeatability: May be taken for credit 2 times.

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 203A. Counseling in Human Genetics: Putting Thought to Practice. 4 Units.**

Builds upon the skills learned in previous courses emphasizing advanced counseling methods such as listening, empathy, and collaboration. The counselor's own self-awareness, ethical behaviors, and limits are explored. Individual, team, and group exercises are performed.

Prerequisite: PED GEN 202A

Restriction: Medical students only. Genetic Counseling Majors only.

**PED GEN 204A. Professional Skills Development. 4 Units.**

Hones and augments existing competencies in genetic counseling through ongoing clinical experiences. Develops skills using computers for genetics applications, provision of community and professional education, and clinic administration. Further experience in genetics laboratories or specialty clinics may be elected.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**PED GEN 204B. Professional Skills Development. 4 Units.**

Hones and augments existing competencies in genetic counseling through ongoing clinical experiences. Develops skills using computers for genetics applications, provision of community and professional education, and clinic administration. Further experience in genetics laboratories or specialty clinics may be elected.

Prerequisite: PED GEN 204A

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**PED GEN 204C. Professional Skills Development. 4 Units.**

Hones and augments existing competencies in genetic counseling through ongoing clinical experiences. Develops skills using computers for genetics applications, provision of community and professional education, and clinic administration. Further experience in genetics laboratories or specialty clinics may be elected.

Prerequisite: PED GEN 204B

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

**PED GEN 295. Master's Thesis and Research Writing. 4-8 Units.**

Under the supervision of one or more faculty members, the student designs and conducts a research project or completes a case report. A problem in the cytogenetics, biochemical, clinical, psychosocial, or behavioral areas of medical genetics may be investigated.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

## Microbiology and Molecular Genetics

**Rozanne M. Sandri-Goldin, Department Chair**

**Klemens J. Hertel, Department Vice Chair and Departmental Graduate Advisor**

Building B, Room 240, Medical Sciences I

949-824-7669

<http://www.microbiology.uci.edu/>

The Department of Microbiology and Molecular Genetics provides advanced training to individuals interested in the regulation of gene expression and the structural and functional properties of proteins encoded by these genes. The research in the Department covers a wide range of topics with special emphasis on bacterial gene expression and pathogenesis; viral gene expression and host interactions; vector-borne malaria and dengue fever transmission; nuclear-cytoplasmic transport and intracellular signaling; eukaryotic gene expression; mRNA splicing, and processing; cancer genetics and tumor suppressors; ion channel expression and function; genomics and bioinformatics.

The Department offers graduate study under the auspices of the School of Medicine and in conjunction with the program in Cellular and Molecular Biosciences (CMB) and the program in Mathematical and Computational Biology (MCB), which are described in the School of Biological Sciences section. Students are eligible to enter the Department program after meeting the specific requirements of the CMB gateway curriculum or by direct application to the Department. The Department program leads to the M.S. or Ph.D. degree in Biomedical Sciences, awarded after successful completion of all requirements. Students admitted into the CMB program who select a research advisor in the Department begin following the departmental requirements for the Ph.D. at the beginning of their second year.

Participation in the Department's seminar series and completion of at least one advanced topics course per year for three years are expected of all students. All students are required to convene a pre-advancement committee meeting at the end of their second year. In their third year, students take the advancement-to-candidacy examination for the Ph.D. degree by presenting and defending an original proposal for specific dissertation research. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

## Faculty

Alan G. Barbour, M.D. Tufts University, *Distinguished Professor of Microbiology and Molecular Genetics; Ecology and Evolutionary Biology; Medicine*

Emiliana Borrelli, Ph.D. University of Strasbourg, *Chancellor's Professor of Microbiology and Molecular Genetics; Pharmaceutical Sciences*

Michael J. Buchmeier, Ph.D. McMaster University, *Professor of Medicine; Microbiology and Molecular Genetics; Molecular Biology and Biochemistry*

Michael Demetriou, M.D. Ph.D. University of Toronto, *Professor of Neurology; Microbiology and Molecular Genetics*

Timothy L. Downing, Ph.D. University of California, Berkeley, *Assistant Professor of Biomedical Engineering; Microbiology and Molecular Genetics* (stem cells and tissue engineering, regenerative biology, cell programming, epigenomics, mechanobiology)

Alan L. Goldin, M.D. Ph.D. University of Michigan, *Professor of Microbiology and Molecular Genetics; Anatomy and Neurobiology; Physiology and Biophysics*

Sidney Golub, Ph.D. Temple University, *Edward A. Dickson Emeritus Professor and Professor Emeritus of Microbiology and Molecular Genetics*

Klemens J. Hertel, Ph.D. University of Colorado Boulder, *Associate Dean of Graduate and Postdoctoral Studies and Vice Chair and Professor of Microbiology and Molecular Genetics*

Anthony A. James, Ph.D. University of California, Irvine, *Distinguished Professor and Donald Bren Professor of Microbiology and Molecular Genetics; Molecular Biology and Biochemistry*

Michael McClelland, Ph.D. University of Georgia, *Professor of Microbiology and Molecular Genetics*

Ilhem Messaoudi Powers, Ph.D. Weill Cornell Graduate School of Medical Sciences, *Associate Professor of Molecular Biology and Biochemistry; Microbiology and Molecular Genetics*

Suzanne B. Sandmeyer, Ph.D. University of Washington, *Grace Beekhuis Bell Chair in Biological Chemistry and Professor of Biological Chemistry; Microbiology and Molecular Genetics*

Rozanne M. Sandri-Goldin, Ph.D. Johns Hopkins University, *Department Chair and Chancellor's Professor of Microbiology and Molecular Genetics*

Paolo Sassone-Corsi, Ph.D. University of Naples Federico II, *Donald Bren Professor and Distinguished Professor of Biological Chemistry; Microbiology and Molecular Genetics; Pharmaceutical Sciences*

Bert L. Semler, Ph.D. University of California, San Diego, *Distinguished Professor of Microbiology and Molecular Genetics*

Yongsheng Shi, Ph.D. Syracuse University, *Professor of Microbiology and Molecular Genetics*

Eric J. Stanbridge, Ph.D. Stanford University, *Professor Emeritus of Microbiology and Molecular Genetics*

Ming Tan, M.D. Johns Hopkins University, *Professor of Microbiology and Molecular Genetics; Medicine*

Marian L. Waterman, Ph.D. University of California, San Diego, *Professor of Microbiology and Molecular Genetics*

## Courses

### **M&MG 200A. Research in Microbiology and Molecular Genetics. 2-12 Units.**

Individual research supervised by a particular professor.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

### **M&MG 200B. Research in Microbiology and Molecular Genetics. 2-12 Units.**

Individual research supervised by a particular professor.

Prerequisite: M&MG 200A

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

### **M&MG 200C. Research in Microbiology and Molecular Genetics. 2-12 Units.**

Individual research supervised by a particular professor.

Prerequisite: M&MG 200B

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**M&MG 200R. Research in Microbiology and Molecular Genetics for First-Year Students. 2-12 Units.**

Independent research within the laboratories of graduate training faculty in the Department of Microbiology and Molecular Genetics for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

**M&MG 201A. Research topics in Microbiology and Molecular Genetics. 1 Unit.**

Seminars presented by graduate students and faculty of the Department which explore research topics in specialized areas of microbiology and molecular genetics. Opportunity for students to gain experience in the organization, critical evaluation, and oral presentation of current research developments.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**M&MG 201B. Research topics in Microbiology and Molecular Genetics. 1 Unit.**

Seminars presented by graduate students and faculty of the Department which explore research topics in specialized areas of microbiology and molecular genetics. Opportunity for students to gain experience in the organization, critical evaluation, and oral presentation of current research developments.

Prerequisite: M&MG 201A

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**M&MG 201C. Research topics in Microbiology and Molecular Genetics. 1 Unit.**

Seminars presented by graduate students and faculty of the Department which explore research topics in specialized areas of microbiology and molecular genetics. Opportunity for students to gain experience in the organization, critical evaluation, and oral presentation of current research developments.

Prerequisite: M&MG 201B

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**M&MG 203A. Advanced Studies in Microbiology and Molecular Genetics. 1 Unit.**

Organized within each laboratory group, one to four hours. Advanced study in areas related to faculty research interests. Involves small group study based on readings, discussions, and guest speakers. May be conducted as journal clubs.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**M&MG 203B. Advanced Studies in Microbiology and Molecular Genetics. 1 Unit.**

Organized within each laboratory group, one to four hours. Advanced study in areas related to faculty research interests. Involves small group study based on readings, discussions, and guest speakers. May be conducted as journal clubs.

Prerequisite: M&MG 203B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**M&MG 203C. Advanced Studies in Microbiology and Molecular Genetics. 1 Unit.**

Organized within each laboratory group, one to four hours. Advanced study in areas related to faculty research interests. Involves small group study based on readings, discussions, and guest speakers. May be conducted as journal clubs.

Prerequisite: M&MG 203B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**M&MG 205A. Basic Immunology Core Lectures. 1 Unit.**

Basic concepts in human immunology including development of the immune system, innate immunity, immunoglobulin structure and genetics, antigen-antibody reactions, the major histocompatibility complex and antigen presentation, T cell and B cell development, initiation of the immune response, effector mechanisms.

Grading Option: Satisfactory/unsatisfactory only.

**M&MG 205B. Basic Immunology Core Lectures. 1 Unit.**

Basic concepts in human immunology including development of the immune system, innate immunity, immunoglobulin structure and genetics, antigen-antibody reactions, the major histocompatibility complex and antigen presentation, T cell and B cell development, initiation of the immune response, effector mechanisms.

Prerequisite: M&MG 205A

Grading Option: Satisfactory/unsatisfactory only.

**M&MG 205C. Basic Immunology Core Lectures. 1 Unit.**

Basic concepts in human immunology including development of the immune system, innate immunity, immunoglobulin structure and genetics, antigen-antibody reactions, the major histocompatibility complex and antigen presentation, T cell and B cell development, initiation of the immune response, effector mechanisms.

Prerequisite: M&MG 205C

Grading Option: Satisfactory/unsatisfactory only.

**M&MG 206. Regulation of Gene Expression. 4 Units.**

Aspects of gene expression including the organization of the eukaryotic nucleus in terms of protein-nucleic acid interaction (i.e., chromatin and chromosome structure); the enzymology and regulation of RNA transcription and pre-mRNA processing in eukaryotes; mechanisms of RNAi and translation.

**M&MG 210A. Medical Microbiology. 4-6 Units.**

Biology of microbial pathogens (viruses, bacteria, fungi, parasites) as foundation for subsequent study of infectious diseases. Topics: molecular basis of microbial pathogenesis; clinical presentation and epidemiology; diagnostic testing; antimicrobial therapy; prevention strategies. Format: lectures, laboratory, clinical cases, liveclasstech interactive questions.

**M&MG 210B. Medical Immunology. 6 Units.**

Cellular and molecular basis of immune response and roles of the immune system in both maintaining health and contributing to disease.

Prerequisite: M&MG 210A

Restriction: Medical students only.

**M&MG 215. Integrative Immunology. 4 Units.**

Lectures and student presentations of primary literature. The main goal is to achieve a basic understanding of the cellular and molecular basis of innate and adaptive immunity, and how immune function is coordinated at a systems level.

Same as MOL BIO 215.

**M&MG 216. Pathogenic Microbiology. 4 Units.**

Biochemical and genetic properties of infectious agents; identification and behavior of pathogens; activities of toxins; the chemotherapy, biochemistry, and genetics of drug resistance; and epidemiology of infectious diseases.

**M&MG 219. Medical Virology. 4 Units.**

Animal viruses as disease causing agents, including mechanisms of infection at both the cellular and organismic levels. Topics include comparative studies of different groups of viruses, viral transformation, and mechanisms of viral gene expression.

**M&MG 221. Immunopathogenic Mechanisms of Disease. 3 Units.**

Examination of the mechanisms underlying disease states mediated by immune dysregulation. Topics include mechanisms of immune evasion by cancer, diseases mediated by cytokine dysregulation, role of the microbiome of the GI tract and other disease sites, and adoptive T-cell therapy.

Prerequisite: M&MG 215

Same as PATH 221.

Restriction: Graduate students only.

**M&MG 222. Molecular Pathogenesis of Microbial Infections. 4 Units.**

Features lectures by faculty on the molecular aspects of microbial pathogenesis, highlighting both microbe and cellular functions. In addition to lectures, students review papers and discuss them. There will be two written exams, one on viruses and one on microbes.

**M&MG 225. Molecular Mechanisms of Human Disease. 3 Units.**

Provides an overview of the molecular mechanisms of human diseases, including neurologic, hematologic, neoplastic, and infectious diseases. Students gain an understanding of these mechanisms, as well as models of human diseases.

Same as PATH 225.

**M&MG 227. Immunology Journal Club. 2 Units.**

Advanced topics in immunology as related to an understanding of human disease.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**M&MG 230. Topics in Stem Cells. 2-4 Units.**

One-hour seminar presentation by participating faculty or guest lecturer and open to the science community, followed by one-hour discussion of the lecture topic or related topic. Students are responsible for presentations and readings.

**M&MG 240. M.D./PH.D. Tutorial. 1 Unit.**

Explores a variety of topics that impact careers of medical scientists (M.D./Ph.D students). Topics range from scientific, such as recent advances in particular research areas, to ethical problems brought on by increased technology and intervention in the disease process.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**M&MG 250. Responsible Conduct of Research. 2 Units.**

Each session includes a formal presentation by faculty/invited speaker followed by a discussion of case studies related to the topic under consideration.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**M&MG 270. Career Development. 2 Units.**

Topics include preparation of papers, grants and fellowships, scientific presentations, and curriculum vitae, and career opportunities.

Repeatability: May be repeated for credit unlimited times.

**M&MG 280. Tutorial in Microbiology and Molecular Genetics. 2 Units.**

Tutorial in Microbiology and Molecular Genetics. Presented by the department chair; relates current laboratory research to the literature.

Repeatability: May be repeated for credit unlimited times.

**M&MG 292A. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**M&MG 292B. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**M&MG 292C. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**M&MG 298. Independent Study. 1-12 Units.**

Provided for MSTP students to synthesize the basic science information learned during the basic science years of medical school and learn how to apply that knowledge toward graduate research directed at understanding the basis of human disease.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**M&MG 299. Dissertation—Microbiology and Molecular Genetics . 1-12 Units.**

Course provided for Ph.D. students to prepare and complete the dissertation required for a Ph.D. degree.

Repeatability: May be repeated for credit unlimited times.

## Physiology and Biophysics

**Michael D. Cahalan, Department Chair**

**Todd C. Holmes, Department Vice Chair**

**Francesco Tombola, Departmental Graduate Advisor**

Building D, Room D340, Medical Sciences I

949-824-5864

<http://www.physiology.uci.edu/>

The Department of Physiology and Biophysics offers research opportunities in molecular biophysics of membranes and proteins, ion channels and signal transduction, molecular and cell biology, structural biology, proteomics, physiological genomics, neuroscience, developmental neurobiology, stem cell biology, endocrinology, cardiac and exercise physiology, GI pathophysiology, immunology, cancer biology, and vision science.

The Department offers graduate study under the auspices of the School of Medicine and in conjunction with the graduate program in Cellular and Molecular Biosciences (CMB) and the Interdepartmental Neuroscience Program (INP), which are described in the School of Biological Sciences section. Students are eligible to enter the Department program after meeting the specific requirements of the CMB or INP gateway curriculum or by direct application to the Department. The Department program leads to an M.S. or Ph.D. in Biomedical Sciences, awarded after successful completion of all requirements. Students admitted through either gateway program who select a research advisor in the Department begin following the departmental requirements for the Ph.D. at the beginning of their second year.

The faculty conducts quarterly reviews of all continuing students to ensure that they maintain satisfactory progress within their particular academic program. Students participate in a literature review course designed to strengthen research techniques and presentation skills, and attend the monthly Department Colloquium. Students advance to candidacy during the third year; each student presents a seminar on their research projects in preparation for their Ph.D. dissertation. The candidacy committee examines the student's qualifications for the successful conduct of doctoral dissertation research. The students submit a written dissertation on an original research project and defend it in an oral final exam. The normative time for completion of the Ph.D. is five years. Students who make exceptional progress on their thesis projects are encouraged to complete the Ph.D. sooner. The maximum time permitted is seven years.

## Faculty

Geoffrey W. Abbott, Ph.D. University of London, *Senior Associate Dean for Academic Personnel and Vice Dean for Basic Science Research and Professor of Physiology and Biophysics; Physiology and Biophysics*

Tallie Z. Baram, M.D., Ph.D. University of Miami, *Weizmann Institute of Science and Danette 'Dee Dee' Shepard Chair in Neurological Studies and Distinguished Professor of Pediatrics; Anatomy and Neurobiology; Neurology; Physiology and Biophysics*

Kevin T. Beier, Ph.D. Harvard University, *Assistant Professor of Physiology and Biophysics; Pharmaceutical Sciences*

Amanda Burkhardt, Ph.D. University of California, Irvine, *Assistant Adjunct Professor of Physiology and Biophysics*

Michael D. Cahalan, Ph.D. University of Washington, *Department Chair and Distinguished Professor of Physiology and Biophysics*

David Huw Davies, Ph.D. University College London, *Assistant Adjunct Professor of Physiology and Biophysics*

Philip Felgner, Ph.D. Michigan State University, *Director of the Vaccine Research and Development Center and Professor in Residence of Physiology and Biophysics*

John Jay Gargus, M.D. Ph.D. Yale University, *Director of the Center for Autism Research and Translation and Professor Emeritus of Physiology and Biophysics; Genetic Counseling; Pediatrics*

Alan L. Goldin, M.D. Ph.D. University of Michigan, *Professor of Microbiology and Molecular Genetics; Anatomy and Neurobiology; Physiology and Biophysics*

Steven A.N. Goldstein, M.D., Ph.D. Harvard University, *Vice Chancellor for Health Affairs and Distinguished Professor of Physiology and Biophysics*

Milton Greenberg, Ph.D. University of California, Irvine, *Assistant Adjunct Professor of Physiology and Biophysics*

James E. Hall, Ph.D. University of California, Riverside, *Professor Emeritus of Physiology and Biophysics*

Todd C. Holmes, Ph.D. Massachusetts Institute of Technology, *Department Vice Chair and Professor of Physiology and Biophysics*

Naoto Hoshi, Ph.D. Kanazawa University, *Associate Professor of Pharmaceutical Sciences; Physiology and Biophysics*

Lan Huang, Ph.D. University of Florida, *Professor of Physiology and Biophysics; Biological Chemistry; Biomedical Engineering; Pharmaceutical Sciences*

Autumn S. Ivy, M.D., Ph.D. University of California, Irvine, *Assistant Professor of Pediatrics; Neurology; Physiology and Biophysics*

Rongsheng Jin, Ph.D. Columbia University, *Professor of Physiology and Biophysics*

Philip D. Kiser, Pharm.D. Ph.D. Case Western Reserve University, *Assistant Professor of Physiology and Biophysics; Ophthalmology*

Devon A. Lawson, Ph.D. University of California, Los Angeles, *Assistant Professor of Physiology and Biophysics*

Kenneth J. Longmuir, Ph.D. University of Oregon, *Professor Emeritus of Physiology and Biophysics*

Francesco Marangoni, Ph.D. Vita-Salute San Raffaele University, *Assistant Professor of Physiology and Biophysics*

Krzysztof Palczewski, Ph.D. Wroclaw University of Science and Technology, *Irving H. Leopold Chair of Ophthalmology and Professor of Ophthalmology; Physiology and Biophysics*

Mitradas M. Panicker, Ph.D. Carnegie-Mellon University, *Associate Adjunct Professor of Physiology and Biophysics*

Ian Parker, Ph.D. University College London, *Professor of Neurobiology and Behavior; Physiology and Biophysics*

Medha Pathak, Ph.D. University of California, Berkeley, *Assistant Professor of Physiology and Biophysics*

Eric Pearlman, Ph.D. University of Texas Health Sciences Center at San Antonio, *Director of the Institute for Immunology and Chancellor's Professor of Physiology and Biophysics; Ophthalmology*

Hamid M. Said, Pharm.D., Ph.D. Baghdad University, Aston University, *Distinguished Professor of Medicine; Physiology and Biophysics*

Dorota Skowronska-Krawczyk, Ph.D. University of Geneva, *Assistant Professor of Physiology and Biophysics*

Francesco Tombola, Ph.D. University of Padua, *Associate Professor of Physiology and Biophysics*

Nosratola D. Vaziri, M.D. University of Tehran, *Professor Emeritus of Medicine; Physiology and Biophysics*

S. Armando Villalta, Ph.D. University of California, Los Angeles, *Assistant Professor of Physiology and Biophysics; Neurology*

Ping H. Wang, M.D. Harvard University, *Professor of Medicine; Physiology and Biophysics*

Stephen H. White, Ph.D. University of Washington, *Professor Emeritus of Physiology and Biophysics*

Qin Yang, M.D. Ph.D. Nanjing University of Chinese Medicine, Osaka University, *Associate Professor of Medicine; Physiology and Biophysics*

## Courses

### **PHYSIO 200. Research in Physiology and Biophysics. 2-12 Units.**

Individual research directed toward doctoral dissertation and supervised by a particular professor.

Repeatability: May be repeated for credit unlimited times.

### **PHYSIO 200R. Research in Physiology and Biophysics for First-Year Students. 2-12 Units.**

Independent research within the laboratories of graduate training faculty in the Department of Physiology and Biophysics for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

### **PHYSIO 201. Introduction to Physiology Research. 1-4 Units.**

Introduction to research in physiology and related sciences. Concentrates on techniques emphasized in the various laboratories of the Department of Physiology and Biophysics.

Repeatability: May be repeated for credit unlimited times.

### **PHYSIO 204. Concepts of Biophysics. 3 Units.**

Principles of crystallography; introduction to time-resolved absorption and fluorescence spectroscopy; the concepts of kinetic order and kinetic rate theory.

Restriction: Graduate students only.

### **PHYSIO 205. Electronics for Biologists. 4 Units.**

Basic principles of electricity; properties and use of discrete components and integrated circuits; circuit analysis and design. Intended for advanced students in the life sciences.

Same as NEURBIO 249.

### **PHYSIO 206A. Introduction to Medical Physiology. 5 Units.**

Vertebrate physiology with emphasis on humans and on the relationship between the function of normal tissues and the processes of disease. Fundamental principles of physiology and the interrelationships which control organ function.

Prerequisite: A biochemistry course.

Restriction: Graduate students only.

### **PHYSIO 206B. Introduction to Medical Physiology. 6 Units.**

Vertebrate physiology with emphasis on humans and on the relationship between the function of normal tissues and the processes of disease. Fundamental principles of physiology and the interrelationships which control organ function.

Prerequisite: PHYSIO 206A

Restriction: Graduate students only.

### **PHYSIO 212. Medical Immunology. 1.5 Unit.**

One of the cornerstones of the MS1 Molecular Basis of Medicine block. Includes temporal coordination of lecture material, regular course director meetings, and combined exams with PHYSIO 544: Medical Immunology.

Restriction: Graduate students only.

### **PHYSIO 215. Integrative Immunology . 4 Units.**

Provides an introduction to immunology, but focuses on providing in-depth analysis of selected topics within the broader field of immunology, including relevant research techniques, while improving critical thinking skills.

Restriction: Graduate students only.

### **PHYSIO 232. The Physiology of Ion Channels. 4 Units.**

Discusses how ion channels work (molecular/structural biophysics level) and what ion channels do in diverse cell types (cell physiology level).

Restriction: Graduate students only.

**PHYSIO 252. Introduction to Proteomics. 4 Units.**

Introduces students to concepts and methods of proteomics including protein identification, expression proteomics, and protein-protein interactions.

Repeatability: May be taken for credit 2 times.

**PHYSIO 272. Eye: Health and Disease. 3 Units.**

Introduces the anatomic and physiological basis of vertebrate vision and disease states in which the structure and function of the eye is disrupted with emphasis on current and developing research areas.

Restriction: Graduate students only.

**PHYSIO 290. Topics in Physiology. 3 Units.**

Contemporary research problems in physiology. Students review research articles in current literature and present ideas contained therein, focusing on groundbreaking discoveries and methodologies. Students present results of their own research and attend presentations given by other students and departmental researchers.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSIO 292A. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PHYSIO 292B. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PHYSIO 292C. Scientific Communication. 2 Units.**

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PHYSIO 299. Dissertation in Physiology and Biophysics. 2-12 Units.**

Preparation and completion of the dissertation required for the Ph.D.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

### James S. Bullock, Dean

134 Rowland Hall

Undergraduate Counseling: 949-824-6507

<http://ps.uci.edu/stuaff> (<http://ps.uci.edu/>)

The School of Physical Sciences offers both professional training and general education in the Departments of Chemistry, Earth System Science, Mathematics, and Physics and Astronomy. The faculty, active in research and graduate education, are at the same time vitally concerned with undergraduate teaching. Curricula of the School are designed to meet the needs of a wide variety of students ranging from those with little technical background who seek insight into the activities and accomplishments of physical scientists to those seeking a comprehensive understanding that will prepare them for creative research in physical science.

Over the course of the past century and a half, physics, chemistry, and mathematics have evolved into interdependent but separate intellectual disciplines. This development is reflected in the departmental structure of the School of Physical Sciences. In the same period, these fundamental disciplines have moved into domains of abstraction unimagined by early scientists. This trend to abstraction with its concomitant increase in understanding of the physical universe provides the major challenge to the student of the physical sciences. Mathematics, physics, and chemistry, while providing the foundation of the technology that dominates contemporary civilization, underlie to an ever-increasing extent the new developments in the biological and social sciences. Earth system science is grounded in the traditional physical sciences while breaking new paths in the quantitative study of changes in the global environment.

## Honors

Criteria used by the School of Physical Sciences in selecting candidates for honors at graduation are as follows: Approximately 2 percent will be awarded *summa cum laude*, 4 percent *magna cum laude*, and 10 percent *cum laude*. Honors are awarded on the basis of a student's performance in research, cumulative grade point average, and performance in upper-division courses in the major. Students considered for honors at graduation must have completed 72 units in residence at the University of California. The student's cumulative record at the end of the final quarter is the basis for all decisions regarding honors at graduation. Other important factors are considered visit at **Honors Recognition**. The School of Physical Sciences also grants special honors to students who have distinguished themselves by their work in their major subject.

- Department of Chemistry
- Department of Earth System Science
- Department of Mathematics
- Department of Physics and Astronomy
- Applied Physics, B.S.
- Chemistry, B.S.
- Chemistry, Ph.D.
- Earth and Atmospheric Sciences, Minor
- Earth System Science, B.S.
- Earth System Science, Ph.D.
- Mathematics for Biology, Minor
- Mathematics, B.S.
- Mathematics, M.S.
- Mathematics, Minor
- Mathematics, Ph.D.
- Physics, B.S.
- Physics, Ph.D.

Each department offers courses that are of value to nonmajors and majors in the sciences. The programs for majors are designed to meet the needs of students planning careers in business, education, or industry; of students planning advanced professional study; and of students planning graduate work that continues their major interest. Students who wish to complete a coordinated set of courses beyond the introductory level in Mathematics and in Earth and Atmospheric Sciences may pursue minors in these areas. Students interested in mathematical and computational biology may complete the

Mathematics for Biology minor which prepares them for interdisciplinary graduate studies in this area. Introductory courses in chemistry, mathematics, and physics meet the needs of students majoring in the sciences, mathematics, and engineering and are also appropriate for students in other disciplines who seek a rigorous introduction to the physical sciences. In addition, a number of courses within the School have few or no prerequisites and are directed particularly toward students majoring in areas remote from the sciences.

## Planning a Program of Study

Students who choose a major in the School of Physical Sciences have a variety of academic advising and counseling resources available to them. In addition to faculty advisors, there is a Chief Academic Advisor in each department who is responsible for interpreting degree requirements, reviewing student petitions, and assisting with special advising problems. An academic advising and counseling staff, employed in the Associate Dean's Office, is available to serve a broad range of student advising needs. In consultation with their faculty advisor or an academic counselor, students should plan a course of study leading to a major in one of the departments of the School. In carrying out this major, students may often concentrate very heavily in a second department within the School or in some other school. Occasionally students choose to pursue a double major. Permission to do so may be sought by an online application submitted to the Office of the Associate Dean of Physical Sciences.

All initial courses of study for majors includes mathematics through calculus, and calculus is a prerequisite for much of the upper-division work in each major. A student interested in any of the physical sciences should continue mathematical training beyond these prerequisite courses. Furthermore, students interested in either physics or chemistry usually will include work in both of these subjects in their undergraduate careers.

Students in the physical sciences are urged to acquire a working knowledge of computer programming at an early stage of their University studies. This can be accomplished by taking one of the following:

CHEM 5	Scientific Mathematical and Computing Skills
EECS 10	Computational Methods in Electrical and Computer Engineering
EECS 12	Introduction to Programming
ENGRMAE 10	Introduction to Engineering Computations
I&C SCI 31	Introduction to Programming
MATH 9	Introduction to Programming for Numerical Analysis
PHYSICS 53	Introduction to Programming and Numerical Analysis

## Career Opportunities

Many of the School of Physical Sciences graduates continue their education beyond the Bachelor's degree level. Some pursue advanced academic degrees in preparation for careers in scientific or medical research, engineering, or postsecondary education. Other students will complete a secondary education credential in order to prepare for careers teaching high school mathematics and science. Some students enter professional school in areas such as medicine, dentistry, law, or business administration. Students who choose not to continue their studies beyond the baccalaureate level most frequently find employment in private business or industry. In addition to technical areas directly related to their major fields of study, students often enter careers in less obviously related fields such as computing, systems analysis, engineering, journalism, marketing, or sales.

The UCI Division of Career Pathways provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques. Visit the Division of Career Pathways website (<http://career.uci.edu/>) for additional information.

## Preparation for Teaching Science and Mathematics

### Option 1: Earn a Bachelor's Degree, Education Concentration, and Teaching Credential

Physical Sciences students who are interested in pursuing a teaching career should consider the UCI Cal Teach Science and Mathematics Program. This program offers Chemistry, Earth System Science, Environmental Science, Mathematics, and Physics majors an option to earn their bachelor's degree concurrently with a California Preliminary Single Subject Teaching Credential. Individuals who hold this credential are authorized to teach science (chemistry, geosciences, or physics) or math in a middle school or high school.

Students complete the degree requirements for their selected major, the requirements for an optional education concentration offered by the same department, and any additional teacher credentialing course requirements that are not included in the major or the concentration. The following courses are required for the Preliminary Single Subject Teaching Credential:

EDUC 55	Knowing and Learning in Mathematics and Science
EDUC 109	Reading and Writing in Mathematics and Science
EDUC 143AW	Classroom Interactions I
EDUC 143BW	Classroom Interactions II
EDUC 148	Complex Pedagogical Design
EDUC 158	Student Teaching Mathematics and Science in Middle/High School (two quarters)

LPS 60	The Making of Modern Science (for chemistry, geosciences, and physics credential candidates only)
MATH 8	Explorations in Functions and Modeling (for mathematics credential candidates only)
PHY SCI 5	California Teach 1: Introduction to Science and Mathematics Teaching
PHY SCI 105	California Teach 2: Middle School Science and Mathematics Teaching
PHYSICS 193	Research Methods
or CHEM 193	Research Methods

Beyond course work, some additional requirements for teacher certification are described below.

With careful, early planning, it is possible for students to complete their bachelor's degree and teacher certification in four years. This is a more time-efficient and cost-effective route than the traditional five-year teacher preparation model, which usually involves a full academic year of teacher education courses and clinical teaching experience after completion of a bachelor's degree.

After the School of Physical Sciences verifies the completion of all requirements for the bachelor's degree and education concentration, students are awarded their degree from UC Irvine. The Preliminary Single Subject Teaching Credential is awarded by the California Commission on Teacher Credentialing (CTC) upon completion of a bachelor's degree and the state-approved UCI teacher education program, which combines course work, student teaching, and a teaching performance assessment. The UCI School of Education must verify completion of all requirements for the teaching credential and then recommend that the credential be awarded to a candidate by the CTC.

**Additional Requirements for Teacher Certification.** In addition to the required course work for a California Preliminary Single Subject Teaching Credential, the following additional requirements must be satisfied:

1. The School of Physical Sciences requires a *cumulative* GPA of 2.0 (C) to graduate with the bachelor's degree. However, students must earn a grade of C or better in each of the following courses in order to be recommended for the Preliminary Single Subject Credential: PHY SCI 105, EDUC 55, EDUC 143AW, EDUC 143BW, EDUC 148, and EDUC 158.
2. The following must be completed and verified prior to the start of student teaching in EDUC 158:
  - a. Pass the California Basic Education Skills Test (CBEST), a basic mathematics and literacy skills test. For more information, visit the CBEST exam website (<http://www.ctcexams.nesinc.com/>).
  - b. Pass the California Subject Exam for Teachers (CSET) in the discipline in which a candidate plans to earn a Preliminary Single Subject Credential (chemistry, geosciences, mathematics, or physics). Although secondary teachers are only required to pass the CSET exam in one discipline, those who pass the CSET exam in more than one disciplinary field (e.g., physics and mathematics) can be authorized to teach classes in each of those disciplines. For more information visit the CSET exam website (<http://www.ctcexams.nesinc.com/>). Mathematics majors have an option to waive the CSET exam by completing prescribed course work, referred to as a subject-matter preparation program (SMPP). More information is available at the School of Education's Mathematics SMPP website (<https://calteach.uci.edu/>).
  - c. Secondary school science teachers in California are expected to have a broad range of general science knowledge in addition to their discipline of specialization, because their Single Subject Teaching Credential in one of the sciences also authorizes them to teach classes in general or integrated science. The general science subtests of the CSET exam cover foundational topics in astronomy, geodynamics, Earth resources, ecology, genetics and evolution, molecular biology and biochemistry, cell and organismal biology, waves, forces and motion, electricity and magnetism, heat transfer and thermodynamics, and structure and properties of matter. Although students can prepare for the CSET exam's general science subtests through independent study, Physical Sciences students can also prepare themselves by taking lower-division courses that cover this content. Some suggested courses include BIO SCI 1A or BIO SCI 93 and BIO SCI 94; CHEM 1A-CHEM 1B-CHEM 1C; EARTHSS 1 and EARTHSS 7 and PHYSICS 20A.
  - d. Obtain a Certificate of Clearance from the State of California.
  - e. Obtain a TB test with negative results.
3. The following must be completed and verified before the School of Education is able to recommend an individual for the Preliminary Single Subject Credential:
  - a. Complete a college-level course or pass an examination on the U.S. Constitution. POL SCI 21A satisfies this requirement. Contact the UCI School of Education Student Affairs Office for information about the exam.
  - b. Obtain a CPR certificate in adult, child, or infant training.

**Declaring Intention to Complete the Concentration and Teacher Certification.** Prospective teachers who want to complete their degree and a teaching credential in four years are encouraged to start planning early by reviewing the sample programs for the major and the education concentration that they have selected, and to consult with an academic counselor. Interested students are encouraged to get started on the suggested first- and second-year credentialing course work, including PHY SCI 5 and PHY SCI 105, and can do so without officially declaring their intention to complete the concentration or the credential. However, students must declare their intention to complete the optional education concentration and their intention to earn the Preliminary Single Subject Teaching Credential by the end of their second year at the latest, and prior to enrolling in EDUC 55, which they would typically take in fall of their third year. Forms for declaring a selected education concentration and for declaring an intention to complete the teaching credential are available in the Cal Teach Science and Mathematics Resource and Advising Center (137 Bison Modular).

## Option 2: Earn a Bachelor's Degree and Education Concentration or Specialization

A second option for students interested in teaching science and mathematics is to earn a teaching credential in a post-baccalaureate teacher preparation program *after* completing their bachelor's degree. UCI and other universities offer such programs, which typically require one academic year of education course work and clinical teaching experience. The Departments of Chemistry, Mathematics, and Physics and Astronomy offer the concentration in Chemistry Education, the specialization in Mathematics for Education, and the concentration in Physics Education, respectively, which are well suited for undergraduates who plan to pursue a teaching credential after finishing their degree. These programs offer strong grounding in the fundamentals of one discipline, and at the same time, emphasize the breadth in natural sciences needed by secondary science teachers. Each department's curriculum includes introductory courses on effective methods of science and mathematics teaching and provides opportunities for practical fieldwork experiences in a secondary school classroom. Detailed requirements for each program are provided in the departmental sections.

## Special Programs

### Campuswide Honors Collegium

The Campuswide Honors Collegium is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campuswide Honors Collegium, 1200 Student Services II; 949-824-5461; [honors@uci.edu](mailto:honors@uci.edu); or visit the Campuswide Honors Collegium website (<http://honors.uci.edu/>).

### UC Education Abroad Program

Upper-division students have the opportunity to experience a different culture while making progress toward degree objectives through the University's Education Abroad Program (EAP). UCEAP is an overseas study program which operates in cooperation with host universities and colleges throughout the world. Visit the Study Abroad Center website (<http://www.cie.uci.edu/>) for additional information.

### Minor in Biomedical Engineering

The minor in Biomedical Engineering is an interdisciplinary curriculum that includes courses from the Schools of Engineering, Physical Sciences, and Biological Sciences. The minor is designed to provide a student in the physical sciences with the introductory skills needed in the quantitative biomedical arena. See The Henry Samueli School of Engineering section of the *Catalogue* for more information.

### Minor in Global Sustainability

The interdisciplinary minor in Global Sustainability trains students to understand the changes that need to be made in order for the human population to live in a sustainable relationship with the resources available on this planet. See Interdisciplinary Studies section of the *Catalogue* for more information.

### Physical Sciences Undergraduate Mentoring (PSUM) Program

The Physical Sciences Undergraduate Mentoring Program pairs juniors and seniors in the School of Physical Sciences with business and science professionals in a variety of areas, careers, and industries. Interested students should contact the Student Affairs office, the summer prior to their junior year. See the PSUM website (<https://ps.uci.edu/mentors/home/>) for more information.

## Faculty

Kevork N. Abazajian, Ph.D. University of California, San Diego, *Professor of Physics and Astronomy*

Takeo Akasaki, Ph.D. University of California, Los Angeles, *Professor Emeritus of Mathematics* (ring theory)

Jun F. Allard, Ph.D. University of British Columbia, *Associate Professor of Mathematics; Physics and Astronomy* (mathematical and computational biology)

Steven D. Allison, Ph.D. Stanford University, *Professor of Ecology and Evolutionary Biology; Earth System Science*

Ioan Andricioaei, Ph.D. Boston University, *Professor of Chemistry; Physics and Astronomy* (chemical biology, physical chemistry and chemical physics, theoretical and computational)

Ara Apkarian, Ph.D. Northwestern University, *UCI Distinguished Professor of Chemistry* (physical chemistry and chemical physics)

Ramesh D. Arasasingham, Ph.D. University of California, Davis, *Professor of Teaching of Chemistry* (chemical education and inorganic chemistry)

Shane Ardo, Ph.D. Johns Hopkins University, *Associate Professor of Chemistry; Chemical and Biomolecular Engineering; Materials Science and Engineering* (inorganic and organometallic, physical chemistry and chemical physics, polymer, materials, nanoscience)

Plamen Atanasov, Ph.D. Bulgarian Academy of Sciences, *UCI Chancellor's Professor of Chemical and Biomolecular Engineering; Chemistry; Materials Science and Engineering* (electrocatalysis and electrocatalysts for energy conversion processes; bio-electrocatalysis and energy harvesting systems)

Pierre F. Baldi, Ph.D. California Institute of Technology, *Director of the Institute for Genomics and Bioinformatics and Distinguished Professor of Computer Science; Biological Chemistry; Biomedical Engineering; Developmental and Cell Biology; Mathematics* (artificial intelligence and machine learning, biomedical informatics, databases and data mining, environmental informatics, statistics and statistical theory)

- Vladimir Baranovsky, Ph.D. University of Chicago, *Professor of Mathematics* (algebra and number theory)
- Aaron J. Barth, Ph.D. University of California, Berkeley, *Professor of Physics and Astronomy*
- Christopher P.J. Barty, Ph.D. Stanford University, *Distinguished Professor of Physics and Astronomy*
- Steven W. Barwick, Ph.D. University of California, Berkeley, *Professor of Physics and Astronomy*
- Gregory A. Benford, Ph.D. University of California, San Diego, *Professor Emeritus of Physics and Astronomy*
- Elizabeth Bess, Ph.D. University of Utah, *Assistant Professor of Chemistry* (chemical biology)
- Jianming Bian, Ph.D. Chinese Academy of Sciences, *Assistant Professor of Physics and Astronomy*
- Donald R. Blake, Ph.D. University of California, Irvine, *UCI Distinguished Professor of Chemistry* (analytical, atmospheric, environmental)
- Suzanne A. Blum, Ph.D. University of California, Berkeley, *Professor of Chemistry; Chemistry* (inorganic and organometallic, organic and synthetic, physical chemistry and chemical physics, polymer, materials, nanoscience)
- Andrew Borovik, Ph.D. University of North Carolina at Chapel Hill, *Professor of Chemistry* (chemical biology, inorganic and organometallic, organic and synthetic)
- Paulo Brando, Ph.D. University of Florida, *Assistant Professor of Physics and Astronomy*
- David A. Brant, Ph.D. University of Wisconsin-Madison, *Professor Emeritus of Chemistry* (biophysical)
- James S. Bullock, Ph.D. University of California, Santa Cruz, *Dean of the School of Physical Sciences and Professor of Physics and Astronomy*
- David A. Buote, Ph.D. Massachusetts Institute of Technology, *Professor of Physics and Astronomy*
- Kieron Burke, Ph.D. University of California, Santa Barbara, *Professor of Chemistry; Physics and Astronomy* (physical chemistry and chemical physics, theoretical and computational)
- Ann Marie Carlton, Ph.D. Rutgers University, *Associate Professor of Chemistry* (atmospheric and environmental, physical chemistry and chemical physics, theoretical and computational)
- David W. Casper, Ph.D. University of Michigan, *Associate Professor of Physics and Astronomy*
- A. Richard Chamberlin, Ph.D. University of California, San Diego, *Department Chair and Professor Emeritus of Pharmaceutical Sciences; Chemistry* (chemical biology, organic and synthetic)
- Gary A. Chanan, Ph.D. University of California, Berkeley, *Professor Emeritus of Physics and Astronomy*
- John Charles Chaput, Ph.D. University of California, Riverside, *Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemical and synthetic biology)
- Liu Chen, Ph.D. University of California, Berkeley, *Research Professor and Professor Emeritus of Physics and Astronomy*
- Long Chen, Ph.D. Pennsylvania State University, *Professor of Mathematics* (applied and computational mathematics)
- Mu-Chun Chen, Ph.D. University of Colorado Boulder, *Professor of Physics and Astronomy*
- Alexander L. Chernyshev, Ph.D. Russian Academy of Sciences, *Professor of Physics and Astronomy*
- Philip Collins, Ph.D. University of California, Berkeley, *Professor of Physics and Astronomy*
- Michael Cooper, Ph.D. University of California, Berkeley, *Professor of Physics and Astronomy*
- Asantha R. Cooray, Ph.D. University of Chicago, *Professor of Physics and Astronomy*
- Robert Corn, Ph.D. University of California, Berkeley, *UCI Distinguished Professor of Chemistry; Biomedical Engineering* (analytical, chemical biology, physical chemistry and chemical physics, polymer, materials, nanoscience)
- Michael C. Cranston, Ph.D. University of Minnesota, *Department Chair and Professor of Mathematics* (probability)
- Elizabeth D. Crook, Ph.D. University of California, Santa Cruz, *Assistant Professor of Teaching of Earth System Science*
- Claudia I. Czimczik, Ph.D. Max Planck Institute, *Associate Professor of Earth System Science*

Anthony V. Daly, M.F.A. University of California, Irvine, *Lecturer of Physical Sciences*

Christopher J. Davis, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Teaching of Mathematics* (algebra and number theory)

Kristen A. Davis, Ph.D. Stanford University, *Associate Professor of Civil and Environmental Engineering; Earth System Science* (coastal oceanography, fluid mechanics, turbulent flows)

Steven J. Davis, Ph.D. Stanford University, *Associate Professor of Earth System Science; Civil and Environmental Engineering*

Michael B. Dennin, Ph.D. University of California, Santa Barbara, *Professor of Physics and Astronomy*

Robert J. Doedens, Ph.D. University of Wisconsin-Madison, *Professor Emeritus of Chemistry* (inorganic and organometallic)

Franklin Dollar, Ph.D. University of Michigan, *Associate Professor of Physics and Astronomy* (applied physics)

Neil Donaldson, Ph.D. University of Bath, *Lecturer of Mathematics* (differential geometry)

Vy M. Dong, Ph.D. California Institute of Technology, *Professor of Chemistry* (organic and synthetic)

Ellen R. Druffel, Ph.D. University of California, San Diego, *Fred Kavli Chair in Earth System Science and Distinguished Professor of Earth System Science*

Igor E. Dzyaloshinskii, Ph.D. Moscow State University, *Professor Emeritus of Physics and Astronomy*

Kimberly D. Edwards, Ph.D. University of California, Irvine, *Department Vice Chair and Professor of Teaching of Chemistry* (general chemistry, chemical education)

Benis Egoh, Ph.D. Stellenbosch University, *Assistant Professor of Earth System Science*

Paul C. Eklof, Ph.D. Cornell University, *Professor Emeritus of Mathematics* (logic and algebra)

German A. Enciso Ruiz, Ph.D. Rutgers, the State University of New Jersey, *Professor of Mathematics; Developmental and Cell Biology* (applied and computational mathematics, mathematical and computational biology)

William J. Evans, Ph.D. University of California, Los Angeles, *UCI Distinguished Professor of Chemistry* (inorganic and organometallic)

Celia Faiola, Ph.D. Washington State University, *Assistant Professor of Ecology and Evolutionary Biology; Chemistry*

Jonathan L. Feng, Ph.D. Stanford University, *Professor of Physics and Astronomy*

Asaf Ferber, Ph.D. Tel Aviv University, *Assistant Professor of Mathematics* (combinatorics and probability)

Julie E. Ferguson, Ph.D. Oxford University, *Associate Professor of Teaching of Earth System Science*

Aleksandr Figotin, Ph.D. Tashkent University of Information Technologies, *Professor of Mathematics* (applied and computational mathematics, mathematical physics)

Sarah Finkeldei, Ph.D. RWTH Aachen University, *Assistant Professor of Chemistry; Materials Science and Engineering* (nuclear chemistry)

Mark Finkelstein, Ph.D. Stanford University, *Professor Emeritus of Mathematics; Center for Educational Partnerships* (analysis)

Barbara J. Finlayson-Pitts, Ph.D. University of California, Riverside, *Director of AirUCI and UCI Distinguished Professor of Chemistry* (analytical, atmospheric and environmental, physical chemistry and chemical physics)

Zachary Fisk, Ph.D. University of California, San Diego, *UCI Distinguished Professor Emeritus of Physics and Astronomy*

Matthew Foreman, Ph.D. University of California, Berkeley, *Distinguished Professor of Mathematics; Logic and Philosophy of Science* (ergodic theory and dynamical systems, logic and foundations)

Fillmore Freeman, Ph.D. Michigan State University, *Professor of Chemistry* (organic and synthetic, theoretical and computational)

Michael D. Fried, Ph.D. University of Michigan, *Professor Emeritus of Mathematics* (arithmetic geometry and complex variables)

Filipp Furche, Ph.D. University of Karlsruhe, *Professor of Chemistry* (physical chemistry and chemical physics, theoretical and computational)

Nien-Hui Ge, Ph.D. University of California, Berkeley, *Professor of Chemistry* (analytical, chemical biology, physical chemistry and chemical physics, polymer, materials, nanoscience)

Robert B. Gerber, Ph.D. Oxford University, *Professor Emeritus of Chemistry* (atmospheric and environmental, physical chemistry and chemical physics, theoretical and computational)

Isaac Goldbring, Ph.D. University of Illinois at Urbana-Champaign, *Associate Professor of Mathematics; Logic and Philosophy of Science* (logic and foundations)

Anton Gorodetski, Ph.D. Moscow State University, *Professor of Mathematics* (ergodic theory and dynamical systems)

Alon A. Gorodetsky, Ph.D. California Institute of Technology, *Associate Professor of Chemical and Biomolecular Engineering; Chemistry; Materials Science and Engineering* (cephalopods, adaptive materials, camouflage, bioelectronics)

Michael L. Goulden, Ph.D. Stanford University, *Professor of Earth System Science; Ecology and Evolutionary Biology*

Enrico Gratton, Ph.D. University of Rome, *Distinguished Professor of Biomedical Engineering; Developmental and Cell Biology; Physics and Astronomy* (design of new fluorescence instruments, protein dynamics, single molecule, fluorescence microscopy, photon migration in tissues)

Michael T. Green, Ph.D. University of Chicago, *Professor of Molecular Biology and Biochemistry; Chemistry* (chemical, biology, inorganic and organometallic, physical chemistry and chemical physics, theoretical and computational)

Steven P. Gross, Ph.D. University of Texas at Austin, *Professor of Developmental and Cell Biology; Physics and Astronomy* (force generation by molecular motors in living cells)

Zhibin Guan, Ph.D. University of North Carolina at Chapel Hill, *Professor of Chemistry; Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (chemical biology, organic and synthetic, polymer, materials, nanoscience)

Alex Guenther, Ph.D. Washington State University, *Professor of Earth System Science*

Arnold Guerra, Ph.D. University of California, Irvine, *Lecturer of Physics and Astronomy*

Patrick Q. Guidotti, Ph.D. University of Zurich, *Professor of Mathematics* (analysis and partial differential equations, applied and computational mathematics)

Gultekin Gulsen, Ph.D. Bogazici University, *Associate Professor of Radiological Sciences; Biomedical Engineering; Physics and Astronomy*

Herbert W. Hamber, Ph.D. University of California, Santa Barbara, *Professor Emeritus of Physics and Astronomy*

Stephen Hanessian, Ph.D. Ohio State University, *Professor of Pharmaceutical Sciences; Chemistry* (organic chemistry, medicinal chemistry)

William W. Heidbrink, Ph.D. Princeton University, *Professor of Physics and Astronomy*

John C. Hemminger, Ph.D. Harvard University, *UCI Distinguished Professor of Chemistry* (analytical, atmospheric and environmental, physical chemistry and chemical physics, polymer, materials, nanoscience)

Alan F. Heyduk, Ph.D. Massachusetts Institute of Technology, *Department Vice Chair and Professor of Chemistry* (inorganic and organometallic)

Hamid Hezari, Ph.D. Johns Hopkins University, *Associate Professor of Mathematics* (analysis and partial differential equations)

Wilson Ho, Ph.D. University of Pennsylvania, *Donald Bren Professor and Professor of Physics and Astronomy; Chemistry*

Allon Hochbaum, Ph.D. University of California, Berkeley, *Associate Professor of Materials Science and Engineering; Chemical and Biomolecular Engineering; Chemistry* (nanoscale materials and hybrid bio-inorganic devices for applications in clean energy)

Amanda J. Holton, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Chemistry* (chemistry, chemical education)

Herbert J. Hopster, Ph.D. Aachen University, *Professor Emeritus of Physics and Astronomy*

Kenneth B. Huber, Ph.D. University of California, Irvine, *Lecturer of Mathematics*

Paata Ivanisvili, Ph.D. Michigan State University, *Assistant Professor of Mathematics* (analysis, probability)

Kenneth C. Janda, Ph.D. Harvard University, *Professor Emeritus of Chemistry* (physical chemistry and chemical physics)

Elizabeth R. Jarvo, Ph.D. Boston College, *Professor of Chemistry* (inorganic and organometallic, organic and synthetic)

Luis A. Jauregui, Ph.D. Purdue University, *Assistant Professor of Physics and Astronomy*

Svetlana Jitomirskaya, Ph.D. Moscow State University, *Distinguished Professor of Mathematics* (mathematical physics)

Kathleen Johnson, Ph.D. University of California, Berkeley, *Associate Professor of Earth System Science*

- Nathan Kaplan, Ph.D. Harvard University, *Associate Professor of Mathematics* (algebra and number theory)
- Manoj Kaplinghat, Ph.D. Ohio State University, *Professor of Physics and Astronomy*
- Saewung Kim, Ph.D. Georgia Institute of Technology, *Associate Professor of Earth System Science*
- Susan M. King, Ph.D. Massachusetts Institute of Technology, *Professor of Teaching of Chemistry* (organic chemistry, chemical education)
- Anne A. Kirkby, Ph.D. California Institute of Technology, *Lecturer of Physics and Astronomy*
- David P. Kirkby, Ph.D. California Institute of Technology, *Professor of Physics and Astronomy*
- Abel Klein, Ph.D. Massachusetts Institute of Technology, *Distinguished Professor of Mathematics* (mathematical physics)
- Natalia Komarova, Ph.D. University of Arizona, *UCI Chancellor's Professor of Mathematics; Ecology and Evolutionary Biology* (applied and computational mathematics, mathematical and computational biology, mathematics of complex and social phenomena)
- Ilya N. Krivorotov, Ph.D. University of Minnesota, *Professor of Physics and Astronomy*
- Jason Russell Kronewetter, Ph.D. University of California, Irvine, *Lecturer of Mathematics*
- Katsiaryna Krupchyk, Ph.D. Belarusian State University, *Professor of Mathematics* (analysis and partial differential equations, inverse problems, and imaging)
- Andrew J. Lankford, Ph.D. Yale University, *Professor of Physics and Astronomy*
- Matthew Law, Ph.D. University of California, Berkeley, *Associate Professor of Chemistry; Chemical and Biomolecular Engineering; Materials Science and Engineering* (inorganic and organometallic, physical chemistry and chemical physics, polymer, materials, nanoscience)
- Jon M. Lawrence, Ph.D. University of Rochester, *Professor Emeritus of Physics and Astronomy*
- Rachel Lehman, Ph.D. University of California, Irvine, *Lecturer of Mathematics* (mathematics education and probability)
- Peter Li, Ph.D. University of California, Berkeley, *Chancellor's Professor Emeritus of Mathematics* (geometry and topology)
- Song-Ying Li, Ph.D. University of Pittsburgh, *Professor of Mathematics* (analysis and partial differential equations)
- Zhihong Lin, Ph.D. Princeton University, *Professor of Physics and Astronomy*
- Renee Link, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Chemistry* (organic chemistry, chemical education)
- Chang C. Liu, Ph.D. Scripps Research Institute, *Assistant Professor of Biomedical Engineering; Chemistry; Molecular Biology and Biochemistry* (genetic engineering, directed evolution, synthetic biology, chemical biology)
- John S. Lowengrub, Ph.D. Courant Institute of Mathematical Sciences, *Chancellor's Professor of Mathematics; Biomedical Engineering* (applied and computational mathematics, mathematical and computational biology)
- Zhiqin Lu, Ph.D. Courant Institute of Mathematical Sciences, *Professor of Mathematics* (geometry and topology)
- Jeffrey Ludwig, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Teaching of Mathematics*
- Andrej Luptak, Ph.D. Yale University, *Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemical biology)
- Katherine Mackey, Ph.D. Stanford University, *Clare Booth Luce Assistant Professor of Earth System Science*
- Gudrun Magnusdottir, Ph.D. Colorado State University, *Professor of Earth System Science*
- Mark A. Mandelkern, Ph.D. University of California, Berkeley, *Research Professor and Professor Emeritus of Physics and Astronomy*
- Vladimir A. Mandelshtam, Ph.D. Russian Academy of Sciences, *Professor of Chemistry* (physical chemistry and chemical physics, theoretical and computational)
- Stephen Mang, Ph.D. University of California, Irvine, *Assistant Professor of Teaching of Chemistry* (chemical education, advanced laboratories)
- Alexei A. Maradudin, Ph.D. University of Bristol, *Professor Emeritus of Physics and Astronomy*
- Craig C. Martens, Ph.D. Cornell University, *Professor of Chemistry* (physical chemistry and chemical physics, polymer, materials, nanoscience, theoretical and computational)

Rachel Martin, Ph.D. Yale University, *Department Vice Chair and Professor of Chemistry; Molecular Biology and Biochemistry* (analytical, chemical biology, physical chemistry and chemical physics)

Adam Martiny, Ph.D. Technical University of Denmark, *Professor of Earth System Science; Ecology and Evolutionary Biology*

Roger D. McWilliams, Ph.D. Princeton University, *Associate Dean of the School of Physical Sciences and Professor of Physics and Astronomy*

George E. Miller, Ph.D. Oxford University, *Professor of Teaching Emeritus of Chemistry* (analytical and radioanalytical chemistry and chemical education)

Eric D. Mjolsness, Ph.D. California Institute of Technology, *Professor of Computer Science; Mathematics* (artificial intelligence and machine learning, biomedical informatics and computational biology, applied mathematics, mathematical biology, modeling languages)

David L. Mobley, Ph.D. University of California, Davis, *Vice Chair and Professor of Pharmaceutical Sciences; Chemistry* (chemical biology, physical chemistry and chemical physics, theoretical and computational)

William R. Molzon, Ph.D. University of Chicago, *Professor of Physics and Astronomy*

Connor Mooney, Ph.D. Columbia University, *Assistant Professor of Mathematics* (partial differential equations)

Jefferson Moore, Ph.D. Oregon State University, *Professor of Earth System Science*

Mathieu Morlighem, Ph.D. Ecole Centrale Paris, *Vice Chair and Associate Professor of Earth System Science*

Shaul Mukamel, Ph.D. Tel Aviv University, *UCI Distinguished Professor of Chemistry; Physics and Astronomy* (physical chemistry and chemical physics, polymer, materials, nanoscience, theoretical and computational)

Simona Murgia, Ph.D. Michigan State University, *Associate Professor of Physics and Astronomy*

Craig Murray, Ph.D. University of Edinburgh, *Associate Professor of Chemistry* (atmospheric and environmental, physical chemistry and chemical physics)

Riley D. Newman, Ph.D. University of California, Berkeley, *Professor Emeritus of Physics and Astronomy; Logic and Philosophy of Science; Physics and Astronomy*

Qing Nie, Ph.D. Ohio State University, *Director of the NSF-Simons Center for Multiscale Cell Fate Research and Chancellor's Professor of Mathematics; Biomedical Engineering* (applied and computational mathematics, mathematical and computational biology)

Sergey Nizkorodov, Ph.D. University of Basel, *Co-Director, AirUCI and Department Vice Chair and Professor of Chemistry* (analytical, atmospheric and environmental, physical chemistry and chemical physics)

James S. Nowick, Ph.D. Massachusetts Institute of Technology, *Professor of Chemistry; Pharmaceutical Sciences* (chemical biology, organic and synthetic, polymer, materials, nanoscience)

Juan Pedro Ochoa-Ricoux, Ph.D. California Institute of Technology, *Assistant Professor of Physics and Astronomy*

Larry E. Overman, Ph.D. University of Wisconsin-Madison, *UCI Distinguished Professor of Chemistry* (inorganic and organometallic, organic and synthetic)

Xiaoqing Pan, Ph.D. Saarlandes University, *Henry Samueli Endowed Chair and Director of Irvine Materials Research Institute (IMRI) and Professor of Materials Science and Engineering; Physics and Astronomy* (atomic-scale structure, properties and dynamic behaviors of advanced materials including thin films and nanostructures for memories, catalysts, and energy conversion and storage devices)

Alessandra Pantano, Ph.D. Princeton University, *Associate Professor of Teaching of Mathematics* (algebra and number theory)

William H. Parker, Ph.D. University of Pennsylvania, *Professor Emeritus of Physics and Astronomy*

Joseph Patterson, Ph.D. University of Warwick, *Assistant Professor of Chemistry; Materials Science and Engineering* (polymer, materials, nanoscience)

Roberto Pelayo, Ph.D. California Institute of Technology, *Assistant Professor of Teaching of Mathematics* (algebra and data science)

Reginald M. Penner, Ph.D. Texas A&M University, *UCI Chancellor's Professor of Chemistry* (analytical, physical chemistry and chemical physics, polymer, materials, nanoscience)

Eric Potma, Ph.D. University of Groningen, *Professor of Chemistry; Electrical Engineering and Computer Science* (analytical, chemical biology, physical chemistry and chemical physics)

Thomas L. Poulos, Ph.D. University of California, San Diego, *Distinguished Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences* (chemical biology)

Michael J. Prather, Ph.D. Yale University, *UCI Distinguished Professor of Earth System Science*

Jennifer A. Prescher, Ph.D. University of California, Berkeley, *Professor of Chemistry; Molecular Biology and Biochemistry; Pharmaceutical Sciences* (chemical biology, organic and synthetic)

Francois W. Primeau, Ph.D. Massachusetts Institute of Technology, *Professor of Earth System Science*

Michael S. Pritchard, Ph.D. University of California, San Diego, *Associate Professor of Earth System Science*

Sergey V. Pronin, Ph.D. University of Chicago, *Assistant Professor of Chemistry* (organic and synthetic chemistry)

Arvind Rajaraman, Ph.D. Stanford University, *Professor of Physics and Astronomy*

James T. Randerson, Ph.D. Stanford University, *UCI Chancellor's Professor of Earth System Science; Civil and Environmental Engineering; Ecology and Evolutionary Biology*

Michael Ratz, Ph.D. Technical University of Munich, *Professor of Physics and Astronomy*

David L. Rector, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Mathematics* (algebraic topology and computer algebra)

William S. Reeburgh, Ph.D. Johns Hopkins University, *Professor Emeritus of Earth System Science*

Markus W. Ribbe, Ph.D. University of Bayreuth, *UCI Chancellor's Professor of Molecular Biology and Biochemistry; Chemistry* (chemical biology, inorganic and organometallic)

Eric Rignot, Ph.D. University of Southern California, *Department Chair and Donald Bren Professor of Earth System Science; Civil and Environmental Engineering*

Thorsten Ritz, Ph.D. University of Ulm, *Professor of Physics and Astronomy*

Paul M. Robertson, Ph.D. University of Texas at Austin, *Assistant Professor of Physics and Astronomy*

Judit Romhanyi, Ph.D. Budapest University of Technology and Economy, *Assistant Professor of Physics and Astronomy*

Karl Rubin, Ph.D. Harvard University, *Distinguished Professor Emeritus of Mathematics* (algebra and number theory)

Bernard Russo, Ph.D. University of California, Los Angeles, *Professor Emeritus of Mathematics* (functional analysis)

James E. Rutledge, Ph.D. University of Illinois at Chicago Circle, *Professor Emeritus of Physics and Astronomy*

Scott D. Rychnovsky, Ph.D. Columbia University, *UCI Distinguished Professor of Chemistry* (chemical biology, organic and synthetic)

Nathan Rynn, Ph.D. Stanford University, *Professor Emeritus of Physics and Astronomy*

Donald G. Saari, Ph.D. Purdue University, *UCI Distinguished Professor Emeritus of Economics; Logic and Philosophy of Science; Mathematics*

Eric S. Saltzman, Ph.D. University of Miami, *UCI Distinguished Professor of Earth System Science; Chemistry*

Javier D. Sanchez-Yamagishi, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Physics and Astronomy*

Martin Schechter, Ph.D. New York University, *Professor Emeritus of Mathematics* (analysis and partial differential equations, mathematical physics)

Stephen Scheinberg, Ph.D. Princeton University, *Professor Emeritus of Mathematics*

Richard M. Schoen, Ph.D. Stanford University, *UCI Excellence in Teaching Chair in Mathematics and Distinguished Professor of Mathematics* (differential geometry, partial differential equations, general relativity)

Jonas Schultz, Ph.D. Columbia University, *Professor Emeritus of Physics and Astronomy; Logic and Philosophy of Science*

A. J. Shaka, Ph.D. Oxford University, *Professor of Chemistry* (chemical biology, physical chemistry and chemical physics)

Kenneth J. Shea, Ph.D. Pennsylvania State University, *Distinguished Professor of Chemistry* (analytical, chemical biology, organic and synthetic, polymer, materials, nanoscience)

Aomawa Shields, Ph.D. University of Washington, *Assistant Professor of Physics and Astronomy*

Manabu Shiraiwa, Ph.D. Max Planck Institute for Chemistry, *Associate Professor of Chemistry* (atmospheric and environmental, chemical biology, physical chemistry and chemical physics, theoretical and computational)

Yuri Shirman, Ph.D. University of California, Santa Cruz, *Professor of Physics and Astronomy*

Alice Silverberg, Ph.D. Princeton University, *Distinguished Professor Emerita of Mathematics; Computer Science* (algebra and number theory)

Dennis J. Silverman, Ph.D. Stanford University, *Professor Emeritus of Physics and Astronomy*

Albert Siryaporn, Ph.D. University of Pennsylvania, *Assistant Professor of Physics and Astronomy; Molecular Biology and Biochemistry*

Zuzanna S. Siwy, Ph.D. Silesian University of Technology, *Professor of Physics and Astronomy; Biomedical Engineering; Chemistry*

Tammy Ann Smecker-Hane, Ph.D. Johns Hopkins University, *Associate Professor of Physics and Astronomy*

James N. Smith, Ph.D. California Institute of Technology, *Professor of Chemistry* (analytical, atmospheric and environmental, physical chemistry and chemical physics)

William H. Smoke, Ph.D. University of California, Berkeley, *Professor Emeritus of Mathematics* (homological algebra)

Henry W. Sobel, Ph.D. Case Western Reserve University, *Professor Emeritus of Physics and Astronomy*

Knut Solna, Ph.D. Stanford University, *Professor of Mathematics* (applied and computational mathematics, inverse problems and imaging, probability)

Soroosh Sorooshian, Ph.D. University of California, Los Angeles, *Director of the Center for Hydrometeorology and Remote Sensing (CHRS) and UCI Distinguished Professor of Civil and Environmental Engineering; Earth System Science* (hydrology, hydrometeorology and hydroclimate modeling, remote sensing, water sources management)

Robert Spitale, Ph.D. University of Rochester, *Director of the UCI Transcriptomics Core and Associate Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemistry, chemical biology, RNA biology)

Ronald J. Stern, Ph.D. University of California, Los Angeles, *Professor Emeritus of Mathematics* (geometry and topology)

Jeffrey D. Streets, Ph.D. Duke University, *Professor of Mathematics* (geometry and topology)

Min-Ying Su, Ph.D. University of California, Irvine, *Professor of Radiological Sciences; Physics and Astronomy*

Peter Taborek, Ph.D. California Institute of Technology, *Professor of Physics and Astronomy*

Agnes Taffard, Ph.D. University of Liverpool, *Professor of Physics and Astronomy*

Timothy Tait, Ph.D. Michigan State University, *Department Chair and Professor of Physics and Astronomy*

Fumiko Tajima, Ph.D. University of Tokyo, *Lecturer of Physics and Astronomy*

Toshiki Tajima, Ph.D. University of California, Irvine, *UCI Endowed Chair and Adjunct Professor of Physics and Astronomy*

Chuu-Lian Terng, Ph.D. Brandeis University, *Professor Emerita of Mathematics* (differential geometry and integrable systems)

Edriss S. Titi, Ph.D. Indiana University, *Professor Emeritus of Mathematics* (analysis and partial differential equations, applied and computational mathematics)

Douglas J. Tobias, Ph.D. Carnegie Mellon University, *Department Chair and Professor of Chemistry* (atmospheric and environmental, chemical biology, physical chemistry and chemical physics, theoretical and computational)

Virginia L. Trimble, Ph.D. California Institute of Technology, *Professor of Physics and Astronomy*

Susan E. Trumbore, Ph.D. Columbia University, *Professor of Earth System Science*

Shiou-Chuan (Sheryl) Tsai, Ph.D. University of California, Berkeley, *Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences*

Li Sheng Tseng, Ph.D. University of Chicago, *Associate Professor of Mathematics* (geometry and topology, mathematical physics)

Laura Tucker, Ph.D. University of California, San Diego, *Assistant Professor of Teaching of Physics and Astronomy*

Mark Vagins, Ph.D. Yale University, *Adjunct Professor of Physics and Astronomy*

Christopher Vanderwal, Ph.D. Scripps Research Institute, *Professor of Chemistry; Pharmaceutical Sciences* (organic and synthetic)

Gerard Vanhoven, Ph.D. Stanford University, *Professor Emeritus of Physics and Astronomy*

Isabella Velicogna, Ph.D. Università degli Studi di Trieste, *UCI Chancellor's Fellow and Professor of Earth System Science*

Roman Vershynin, Ph.D. University of Missouri-Columbia, *Professor of Mathematics* (probability, data science)

Jeffrey Viaclovsky, Ph.D. Princeton University, *Professor of Mathematics* (differential geometry, geometric analysis)

David Van Vranken, Ph.D. Stanford University, *Associate Dean of the School of Physical Sciences and Professor of Chemistry* (organic and synthetic)

Jasper A. Vrugt, Ph.D. University of Amsterdam, *Associate Professor of Civil and Environmental Engineering; Earth System Science* (examining how (eco)systems work, why theories deviate from data, how scientists diagnose change, as applied to biogeosciences, ecology, geomorphology, geophysics, hydrology, soils)

Richard F. Wallis, Ph.D. Catholic University of America, *Professor Emeritus of Physics and Astronomy*

Daqing Wan, Ph.D. University of Washington, *Professor of Mathematics* (algebra and number theory)

Frederic Yui-Ming Wan, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Mathematics* (applied and computational mathematics, mathematical and computational biology)

Gregory A. Weiss, Ph.D. Harvard University, *Professor of Chemistry; Molecular Biology and Biochemistry; Pharmaceutical Sciences* (analytical, chemical biology, organic and synthetic, polymer, materials, nanoscience)

Frank J. Wessel, Ph.D. University of California, Irvine, *Project Scientist of Physics and Astronomy*

Robert W. West, Ph.D. University of Michigan, *Professor Emeritus of Mathematics* (algebraic topology)

Joel J. Westman, Ph.D. University of California, Los Angeles, *Professor Emeritus of Mathematics* (analysis)

Steven R. White, Ph.D. Cornell University, *Professor of Physics and Astronomy*

Daniel Whiteson, Ph.D. University of California, Berkeley, *Professor of Physics and Astronomy; Logic and Philosophy of Science*

Robert J. Whitley, Ph.D. New Mexico State University, *Professor Emeritus of Mathematics* (analysis)

Janet L. Williams, Ph.D. Brandeis University, *Professor Emerita of Mathematics* (probability and statistics)

Dominik Franz X. Wodarz, Ph.D. Oxford University, *Professor of Ecology and Evolutionary Biology; Mathematics*

Jesse Wolfson, Ph.D. Northwestern University, *Assistant Professor of Mathematics* (topology)

Ruqian Wu, Ph.D. Institute of Physics, Chinese Academy of Science, *Professor of Physics and Astronomy*

Jing Xia, Ph.D. Stanford University, *Professor of Physics and Astronomy*

Huolin Xin, Ph.D. Cornell University, *Assistant Professor of Physics and Astronomy; Materials Science and Engineering*

Jack Xin, Ph.D. New York University, *Chancellor's Professor of Mathematics* (applied and computational mathematics, mathematical and computational biology, probability)

Jenny Y. Yang, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Chemistry* (inorganic and organometallic, organic and synthetic, polymer, materials, nanoscience)

James J. Yeh, Ph.D. University of Minnesota, *Professor Emeritus of Mathematics* (analysis and partial differential equations, probability)

Clare C. Yu, Ph.D. Princeton University, *Professor of Physics and Astronomy*

Jin Yu, Ph.D. University of Illinois at Urbana-Champaign, *Assistant Professor of Physics and Astronomy*

Jin Yi Yu, Ph.D. University of Washington, *Vice Chair and Professor of Earth System Science*

Yifeng Yu, Ph.D. University of California, Berkeley, *Professor of Mathematics* (analysis and partial differential equations)

Martin Zeman, Ph.D. Humboldt University of Berlin, *Professor of Mathematics; Logic and Philosophy of Science* (logic and foundations)

Charles S. Zender, Ph.D. University of Colorado Boulder, *Professor of Earth System Science; Computer Science*

Xiangwen Zhang, Ph.D. McGill University, *Assistant Professor of Mathematics* (geometry and topology)

Hong-Kai Zhao, Ph.D. University of California, Los Angeles, *Chancellor's Professor of Mathematics; Computer Science* (applied and computational mathematics, inverse problems and imaging)

Weian Zheng, Ph.D. University of Strasbourg, *Professor Emeritus of Mathematics* (probability theory and financial engineering)

## Chemistry Courses

### **CHEM 1A. General Chemistry. 4 Units.**

General chemistry with applications to life sciences, physical sciences, and engineering. Atomic structure; general properties of the elements; covalent, ionic, and metallic bonding; mass relationships.

Prerequisite or corequisite: MATH 5A or MATH 2A or PHYS 7C or CHEM 1X or CHEM 1P or SAT Mathematics or ACT Mathematics or SAT Subject Chemistry or AP Chemistry or AP Calculus AB or AP Calculus BC. CHEM 1P with a grade of C- or better. SAT Mathematics with a minimum score of 600. ACT Mathematics with a minimum score of 27. SAT Subject Chemistry with a minimum score of 700. AP Chemistry with a minimum score of 3. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3

Overlaps with CHEM H2A, ENGR 1A, CHEM M2A.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

(II and VA ).

### **CHEM 1B. General Chemistry. 4 Units.**

General chemistry with applications to life sciences, physical sciences, and engineering. Properties of gases, liquids, solids; intermolecular forces; changes of state; properties of solutions; stoichiometry; thermochemistry; and thermodynamics. Course may be offered online.

Prerequisite: CHEM 1A or ENGR 1A or CHEM H2A or AP Chemistry or CHEM M2A. CHEM 1A with a grade of C- or better. ENGR 1A with a grade of C- or better. CHEM H2A with a grade of C- or better. AP Chemistry with a minimum score of 4. CHEM M2A with a grade of C- or better

Overlaps with CHEM H2B.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

(II and Va ).

### **CHEM 1C. General Chemistry . 4 Units.**

General chemistry with applications to life sciences, physical sciences, and engineering. Equilibria, aqueous acid-base equilibria, solubility equilibria, oxidation reduction reactions, electrochemistry; kinetics; special topics.

Corequisite: CHEM 1LC

Prerequisite: CHEM 1B. CHEM 1B with a grade of C- or better

Overlaps with CHEM H2C.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

(II and VA ).

### **CHEM 1LA. General Chemistry Laboratory. 2 Units.**

Training and experience in basic laboratory techniques through experiments related to lecture topics in Chemistry 1A. Materials fee.

Corequisite: CHEM 1A

Overlaps with CHEM H2LA.

**CHEM 1LC. General Chemistry Laboratory. 3 Units.**

Training and experience in basic laboratory techniques. Chemical practice and principles illustrated through experiments related to lecture topics of CHEM 1A-B-C. Materials fee.

Corequisite: CHEM 1C

Prerequisite: CHEM 1B. CHEM 1B with a grade of C- or better

Overlaps with CHEM 1LE, CHEM H2LB, CHEM M2LB.

Restriction: Div of Undergraduate Education students have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Nursing Science Majors have first consideration for enrollment. Pharmaceutical Sciences Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment.

**CHEM 1LD. General Chemistry Laboratory. 3 Units.**

Training and experience in basic laboratory techniques. Chemical practice and principles illustrated through experiments related to lecture topics in CHEM 1A-B-C. Materials fee.

Prerequisite: (CHEM 1C and CHEM 1LC) or CHEM 1LE. CHEM 1C with a grade of C- or better. CHEM 1LC with a grade of C- or better. CHEM 1LE with a grade of C- or better

Overlaps with CHEM H2LB, CHEM M2LB.

Restriction: School of Biological Sciences students only. School of Physical Sciences students only. School of Engineering students only. Program in Nursing Science students only. Pharmaceutical Sciences Majors only. Public Health Sciences Majors only. No credit for CHEM M2LA if taken after CHEM 1LD. Undecided/Undeclared students also have first consideration for enrollment.

**CHEM 1LE. Accelerated General Chemistry Lab. 3 Units.**

Lecture and experiments covering chemical concepts for accelerated students who do not plan to take organic chemistry. Properties of gases, liquids, solutions, and solids; chemical equilibrium and chemical thermodynamics; atomic and molecular structure; chemical kinetics; electrochemistry. Materials fee.

Prerequisite or corequisite: CHEM 1A or ENGR 1A or AP Chemistry. AP Chemistry with a minimum score of 3

Overlaps with CHEM 1LC.

Restriction: School of Engineering students have first consideration for enrollment. Biomedical Computing Majors have first consideration for enrollment.

**CHEM 1P. Preparation for General Chemistry . 4 Units.**

Units of measurement, dimensional analysis, significant figures; elementary concepts of volume, mass, force, pressure, energy, density, temperature, heat, work; fundamentals of atomic and molecular structure; the mole concept, stoichiometry; properties of the states of matter; gas laws; solutions concentrations.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Biomedical Computing Majors have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**CHEM 1X. General Chemistry Plus. 2 Units.**

Units of chemical measurements, dimensional analysis, significant figures; elementary physicochemical concepts; fundamentals of atomic and molecular structure; molar amounts and stoichiometry; properties of the states of matter; solutions concentrations.

Prerequisite: Students who meet the requirements for taking Chem 1A through their SAT, ACT, or AP test scores are not eligible for enrollment in Chem 1X. Specifically, the students must have ALL of the following advisory prerequisites (the inverse of the Chem 1A prerequisites): S02<600 (score below 600 on the SAT Mathematics Reasoning test) A02<27 (score below 27 on the ACT Mathematics test) Z43<700 (score below 700 on the SAT Chemistry subject exam) AP25<3 (score below 3 on the AP Chemistry exam) AP66<4 (score below 4 on the AP Calculus AB Exam) AP68<3 (score below 3 on the AP Calculus BC Exam) Students who meet Chem 1A eligibility through ALEKS-based training are permitted to enroll in Chem 1X. Chem 1X is open to interested BioEASE students.

Grading Option: Pass/no pass only.

**CHEM H2A. Honors General Chemistry. 4 Units.**

Covers the same material as CHEM 1A-CHEM 1B-CHEM M3C but in greater depth. Additional topics will also be included as time permits.

Corequisite: CHEM H2LA

Prerequisite: AP Chemistry or SAT Subject Chemistry. AP Chemistry with a minimum score of 4. SAT Subject Chemistry with a minimum score of 700

Overlaps with CHEM 1A.

Restriction: Campuswide Honors Collegium students only.

**(II and Va ).**

**CHEM H2B. Honors General Chemistry. 4 Units.**

Covers the same material as CHEM 1A-CHEM 1B-CHEM M3C but in greater depth. Additional topics are also included as time permits.

Corequisite: CHEM H2LB

Prerequisite: CHEM H2A and (CHEM H2LA or CHEM M2LA). CHEM H2A with a grade of C- or better. CHEM H2LA with a grade of C- or better. CHEM M2LA with a grade of C- or better

Overlaps with CHEM 1B.

Restriction: Campuswide Honors Collegium students only.

**(II and VA ).**

**CHEM H2C. Honors General Chemistry. 4 Units.**

Covers the same material as CHEM 1A-CHEM 1B-CHEM M3C but in greater depth. Additional topics are also included as time permits.

Prerequisite: CHEM H2B and (CHEM H2LB or CHEM M2LB). CHEM H2B with a grade of C- or better. CHEM H2LB with a grade of C- or better. CHEM M2LB with a grade of C- or better

Overlaps with CHEM 1C.

Restriction: Campuswide Honors Collegium students only.

**(II and VA ).**

**CHEM H2LA. Honors General Chemistry Laboratory. 3 Units.**

Training and experience in fundamental and analytical laboratory techniques through experiments related to lecture topics in CHEM H2A-CHEM H2B-CHEM H2C. Materials fee.

Corequisite: CHEM H2A

Prerequisite: AP Chemistry or SAT Subject Chemistry. AP Chemistry with a minimum score of 4. SAT Subject Chemistry with a minimum score of 700

Overlaps with CHEM M2LA.

Restriction: Campuswide Honors Collegium students only.

**CHEM H2LB. Honors General Chemistry Laboratory. 3 Units.**

Training and experience in fundamental and analytical laboratory techniques through experiments related to lecture topics in CHEM H2A-CHEM H2B-CHEM H2C. Materials fee.

Corequisite: CHEM H2B

Prerequisite: CHEM H2A and (CHEM H2LA or CHEM M2LA). CHEM H2A with a grade of B or better. CHEM H2LA with a grade of B or better. CHEM M2LA with a grade of B or better

Overlaps with CHEM M2LB.

Restriction: No credit for CHEM 1LC if taken after CHEM H2LB or CHEM M2LB.

**CHEM H2LC. Honors General Chemistry Laboratory. 3 Units.**

Training and experience in fundamental and analytical laboratory techniques through experiments related to lecture topics in CHEM H2A-CHEM H2B-CHEM H2C. Materials fee.

Corequisite: CHEM H2C

Prerequisite: CHEM H2B and (CHEM H2LB or CHEM M2LB). CHEM H2B with a grade of B or better. CHEM H2LB with a grade of B or better. CHEM M2LB with a grade of B or better

**CHEM M2A. Majors General Chemistry Lecture. 4 Units.**

Covers the same material as CHEM 1A but in greater depth. Additional topics are included as time permits.

Prerequisite or corequisite: MATH 5A or MATH 2A or PHYS 7C or CHEM 1X or CHEM 1P or SAT Mathematics or ACT Mathematics or SAT Subject Chemistry or AP Chemistry or AP Calculus AB or AP Calculus BC. CHEM 1P with a grade of C- or better. SAT Mathematics with a minimum score of 600. ACT Mathematics with a minimum score of 27. SAT Subject Chemistry with a minimum score of 700. AP Chemistry with a minimum score of 3. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3. Placement via a passing score on the ALEKS placement exam is also accepted.

Overlaps with CHEM 1A, CHEM H2A, ENGR 1A.

Restriction: Chemistry Majors have first consideration for enrollment.

**(II and Va ).**

**CHEM M2B. Majors General Chemistry Lecture. 4 Units.**

Covers the same material as CHEM 1B but in greater depth. Additional topics will also be included as time permits.

Prerequisite: CHEM M2A and CHEM M2LA. CHEM M2A with a grade of C- or better. CHEM M2LA with a grade of C- or better

Overlaps with CHEM H2B, CHEM 1B.

Restriction: Chemistry Majors have first consideration for enrollment.

**(II and Va ).**

**CHEM M2C. Majors General Chemistry Lecture. 4 Units.**

Covers the same material as CHEM 1C but in greater depth. Additional topics are also included as time permits.

Prerequisite: CHEM M2B and CHEM M2LB. CHEM M2B with a grade of C- or better. CHEM M2LB with a grade of C- or better

Overlaps with CHEM 1C, CHEM H2C.

Restriction: Chemistry Majors have first consideration for enrollment.

**(II and Va ).**

**CHEM M2LA. Majors General Chemistry Laboratory. 3 Units.**

Training and experience in basic laboratory techniques through experiments related to lecture topics in CHEM 1A-CHEM 1B-CHEM M3C. Materials fee.

Prerequisite or corequisite: CHEM 1A or CHEM M2A or CHEM H2A. CHEM 1A with a grade of C- or better. CHEM M2A with a grade of C- or better. CHEM H2A with a grade of C- or better. High school chemistry.

Overlaps with CHEM H2LA, CHEM 1LD.

Restriction: Chemistry Majors only. No credit for CHEM M2LA if taken after CHEM 1LD.

**CHEM M2LB. Majors General Chemistry Laboratory. 3 Units.**

Training and experience in basic laboratory techniques through experiments related to lecture topics in CHEM 1A-CHEM 1B-CHEM M3C. Materials fee.

Prerequisite or corequisite: (CHEM 1B or CHEM H2B or CHEM M2B) and (CHEM M2A or CHEM H2A) and (CHEM M2LA or CHEM H2LA). CHEM M2A with a grade of C- or better. CHEM H2A with a grade of C- or better. CHEM M2LA with a grade of C- or better. CHEM H2LA with a grade of C- or better

Overlaps with CHEM H2LB.

Restriction: Chemistry Majors only. CHEM 1LC may not be taken for credit if taken after CHEM H2LB or CHEM M2LB.

**CHEM M3C. Majors Quantitative Analytical Chemistry. 4 Units.**

Topics include equilibria, aqueous acid-base equilibria, solubility equilibria, oxidation reduction reactions, electrochemistry, and kinetics with a special emphasis on the statistical treatment of data and analytical methods of chemical analysis.

Corequisite: CHEM M3LC

Prerequisite: (CHEM 1B or CHEM H2B or CHEM M2B) and (CHEM M2LB or CHEM H2LB). CHEM 1B with a grade of C- or better. CHEM H2B with a grade of C- or better. CHEM M2B with a grade of C- or better. CHEM M2LB with a grade of C- or better. CHEM H2LB with a grade of C- or better

Restriction: Chemistry Majors only.

**(II and VA ).**

**CHEM M3LC. Majors Quantitative Analytical Chemistry Laboratory. 4 Units.**

Foundational principles of analytical chemistry and experimental methods for quantitative analysis of real samples. Materials fee.

Prerequisite: (CHEM 1B or CHEM H2B or CHEM M2B) and (CHEM M2LB or CHEM H2LB). CHEM 1B with a grade of C- or better. CHEM H2B with a grade of C- or better. CHEM M2B with a grade of C- or better. CHEM M2LB with a grade of C- or better. CHEM H2LB with a grade of C- or better

Restriction: Chemistry Majors only.

**CHEM 5. Scientific Mathematical and Computing Skills. 4 Units.**

Introduces students to mathematical skills, including complex numbers, linear algebra, differential equations, multivariable calculus, infinite series, Fourier series, and integral transforms; and computing skills, including plotting, data analysis (statistics and curve fitting), linear algebra, symbolic mathematics, and spectral analysis.

Corequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and MATH 2D.

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 11. New Chemistry Student Seminar. 1 Workload Unit.**

Seminar for students who recently joined the chemistry major. Addresses available tracks in the major, research opportunities in the chemistry department, careers in chemistry, and relevant programs and resources for students.

Grading Option: Workload Credit P/NP Only.

Restriction: Freshmen students, transfer students, and students who recently changed their major to Chemistry have first consideration for enrollment.

**CHEM 12. Chemistry Around Us. 4 Units.**

Addresses ways in which chemistry affects everyday life. Topics include pollution, global warming, water supply/demands, biodiesel fuels, foods we eat, natural/synthetic materials, common drugs, drug design. Learn and apply basic chemistry concepts. Use risk/benefit analysis for optimal solutions.

(II and Va ).

**CHEM 14. Sense and Sensibility in Science. 4 Units.**

Gives an overview of scientific methods and heuristics through group exercises and discussion. Discusses the benefits and limitations of applying rational scientific approaches to real-world examples from philosophy, cognitive and social psychology, game theory, economics, political science, law, and negotiation.

(II and V.A. ).

**CHEM H30A. Critical Analysis of Health Science Literature. 4 Units.**

Focuses on evaluation of scientific literature. Aspects of scientific inquiry include scientific method, scientific research design, statistical analysis, and publication processes. Addresses why scientific inquiry cannot be separated from sociocultural influences and concerns. Examples drawn from research on health-related issues.

Restriction: Campuswide Honors Collegium students only.

(II and Va. ).

**CHEM 51A. Organic Chemistry. 4 Units.**

Fundamental concepts relating to carbon compounds with emphasis on structural theory and the nature of chemical bonding, stereochemistry, reaction mechanisms, and stereoscopic, physical, and chemical properties of the principal classes of carbon compounds.

Prerequisite or corequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and (CHEM 1LD or CHEM H2LB or CHEM M2LB). CHEM 1C with a grade of C- or better. CHEM H2C with a grade of C- or better. CHEM M3C with a grade of C- or better. CHEM 1LD with a grade of C- or better. CHEM H2LB with a grade of C- or better. CHEM M2LB with a grade of C- or better

Overlaps with CHEM H52A.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**CHEM 51B. Organic Chemistry. 4 Units.**

Fundamental concepts relating to carbon compounds with emphasis on structural theory and the nature of chemical bonding, stereochemistry, reaction mechanisms, and stereoscopic, physical, and chemical properties of the principal classes of carbon compounds.

Prerequisite: CHEM 51A and (CHEM 1LD or CHEM M52LA or CHEM H52LA). CHEM 51A with a grade of C- or better. CHEM 1LD with a grade of C- or better. CHEM M52LA with a grade of C- or better. CHEM H52LA with a grade of C- or better

Overlaps with CHEM H52B.

Restriction: Undeclared Majors have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment.

**CHEM 51C. Organic Chemistry. 4 Units.**

Fundamental concepts relating to carbon compounds with emphasis on structural theory and the nature of chemical bonding, stereochemistry, reaction mechanisms, and stereoscopic, physical, and chemical properties of the principal classes of carbon compounds.

Prerequisite: CHEM 51B and (CHEM 51LB or CHEM M52LB or CHEM H52LB). CHEM 51B with a grade of C- or better. CHEM 51LB with a grade of C- or better. CHEM M52LB with a grade of C- or better. CHEM H52LB with a grade of C- or better

Overlaps with CHEM H52C.

Restriction: Undeclared Majors have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment.

**CHEM 51LB. Organic Chemistry Laboratory. 3 Units.**

Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-CHEM 51B-CHEM 51C. Materials fee.

Corequisite: CHEM 51B

Prerequisite: CHEM 51A and (CHEM 1LD or CHEM H2LB or CHEM M2LB). CHEM 51A with a grade of C- or better. CHEM 1LD with a grade of C- or better. CHEM H2LB with a grade of C- or better. CHEM M2LB with a grade of C- or better

Overlaps with CHEM H52LA, CHEM M52LA.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**CHEM 51LC. Organic Chemistry Laboratory. 3 Units.**

Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Materials fee.

Corequisite: CHEM 51C

Prerequisite: CHEM 51B and CHEM 51LB. CHEM 51B with a grade of C- or better. CHEM 51LB with a grade of C- or better

Overlaps with CHEM H52LB, CHEM M52LB.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**CHEM 51LD. Organic Chemistry Laboratory. 3 Units.**

Modern techniques of organic chemistry using selected experiments to illustrate topics introduced in CHEM 51A-CHEM 51B-CHEM 51C. Materials fee.

Prerequisite: CHEM 51C and CHEM 51LC. CHEM 51C with a grade of C- or better. CHEM 51LC with a grade of C- or better

Overlaps with CHEM H52LC.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**CHEM H52LA. Honors Organic Chemistry Laboratory. 3 Units.**

Fundamental techniques of modern experimental organic chemistry. Materials fee.

Corequisite: CHEM 51A

Prerequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and (CHEM M2LB or CHEM H2LB or CHEM 1LD). CHEM 1C with a grade of C- or better.

CHEM H2C with a grade of C- or better. CHEM M3C with a grade of C- or better. CHEM M2LB with a grade of C- or better. CHEM H2LB with a grade of C- or better. CHEM 1LD with a grade of C- or better

Overlaps with CHEM 51LB, CHEM M52LA.

Restriction: Campuswide Honors Collegium students only.

**CHEM H52LB. Honors Organic Chemistry Laboratory. 3 Units.**

Fundamental techniques of modern experimental organic chemistry. Materials fee.

Corequisite: CHEM 51B

Prerequisite: CHEM 51A and CHEM H52LA. CHEM 51A with a grade of C- or better. CHEM H52LA with a grade of C- or better

Overlaps with CHEM M52LB, CHEM 51LC.

**CHEM H52LC. Honors Organic Chemistry Laboratory. 3 Units.**

Fundamental techniques of modern experimental organic chemistry. Materials fee.

Prerequisite: CHEM 51B and CHEM H52LB. CHEM 51B with a grade of C- or better. CHEM H52LB with a grade of C- or better

Overlaps with CHEM 51LD, CHEM M52LC.

**CHEM M52LA. Majors Organic Chemistry Laboratory. 3 Units.**

Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Materials fee.

Corequisite: CHEM 51A

Prerequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and (CHEM H2LB or CHEM M2LB or CHEM 1LD). CHEM 1C with a grade of C- or better.

CHEM H2C with a grade of C- or better. CHEM M3C with a grade of C- or better. CHEM H2LB with a grade of C- or better. CHEM M2LB with a grade of C- or better. CHEM 1LD with a grade of C- or better

Overlaps with CHEM H52LA, CHEM 51LB.

Restriction: Chemistry Majors only.

**CHEM M52LB. Majors Organic Chemistry Laboratory. 3 Units.**

Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Materials fee.

Corequisite: CHEM 51B

Prerequisite: CHEM 51A and CHEM M52LA. CHEM 51A with a grade of C- or better. CHEM M52LA with a grade of C- or better

Overlaps with CHEM H52LB, CHEM 51LC.

Restriction: Chemistry Majors only.

**CHEM M52LC. Majors Organic Chemistry Laboratory. 3 Units.**

Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Materials fee.

Corequisite: CHEM 51C

Prerequisite: CHEM 51B and CHEM M52LB. CHEM 51B with a grade of C- or better. CHEM M52LB with a grade of C- or better

Overlaps with CHEM H52LC, CHEM 51LD.

Restriction: Chemistry Majors only.

**CHEM H90. The Idiom and Practice of Science. 4 Units.**

A series of fundamental and applied problems in the chemical sciences are addressed. Topics may include the periodic table, electronic structure of atoms, chemical bonding, molecular structure, thermodynamics, and kinetics, with applications to energy and the environment, and/or biochemistry.

Restriction: Campuswide Honors Collegium students only.

(II, Va)

**CHEM 100S. Laboratory Safety for Chemists.**

Provide students with the fundamentals of safety involved in chemical laboratory work.

Prerequisite or corequisite: CHEM 51C

Grading Option: Pass/no pass only.

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 101W. Writing in Chemical Sciences. 4 Units.**

Students receive guidance on preparing research papers, proposals, reports, and other forms of scientific writing in chemistry-related fields, on effectively searching for and using chemical information, and on communicating data in poster and platform presentations.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Chemistry Majors have first consideration for enrollment.

(Ib)

**CHEM 107. Inorganic Chemistry. 4 Units.**

Introduction to modern inorganic chemistry. Principles of structure, bonding, and chemical reactivity with application to compounds of the main group and transition elements, including organometallic chemistry.

Prerequisite: CHEM 51C or CHEM H52C

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 107L. Inorganic Chemistry Laboratory. 3 Units.**

Modern techniques of inorganic and organometallic chemistry, including experience with glove box, Schlenk line, and vacuum line methods. Materials fee.

Prerequisite or corequisite: CHEM 107 and CHEM 100S

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 125. Advanced Organic Chemistry. 4 Units.**

Rapid-paced comprehensive treatment of organic chemistry. Focuses on molecular structure, reactivity, stability, scope and mechanisms of organic reactions. Topics include: structure and bonding; theoretical organic chemistry; acidity and basicity; reactive intermediates; pericyclic reactions; stereochemistry; organic synthesis; natural products; organic photochemistry.

Prerequisite: CHEM 51C

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 127. Inorganic Chemistry II. 4 Units.**

Advanced treatment of selected fundamental topics in inorganic chemistry, building on material presented in Chemistry 107. Molecular symmetry with applications to electronic structure and spectroscopy. Reaction kinetics and mechanisms; inorganic synthesis and catalysis; bioinorganic chemistry.

Prerequisite: CHEM 107

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 128. Introduction to Chemical Biology. 4 Units.**

Introduction to the basic principles of chemical biology: structures and reactivity; chemical mechanisms of enzyme catalysis; chemistry of signalling, biosynthesis, and metabolic pathways.

Corequisite: CHEM 128L

Prerequisite: (CHEM 51C or CHEM H52C)

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 128L. Introduction to Chemical Biology Laboratory Techniques. 3 Units.**

Introduction to the basic laboratory techniques of chemical biology: electrophoresis, plasmid preparation, PCR, protein expression, isolation, and kinetics. Materials fee.

Corequisite: CHEM 128

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 132A. Chemical Thermodynamics, Kinetics, and Dynamics. 4 Units.**

Energy, entropy, and the thermodynamic potentials. Chemical equilibrium. Chemical kinetics.

Prerequisite or corequisite: MATH 2D and (PHYS 7D or PHYS 7E) and (CHEM 5 or (MATH 3D and (EECS 10 or EECS 12 or MAE 10 or ICS 31)) )

Overlaps with CHEM 131C.

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 132B. Quantum Principles, Spectroscopy, and Bonding. 4 Units.**

Principles of quantum chemistry with applications to the elements of atomic structure, energy levels, and spectroscopy.

Prerequisite: (CHEM 132A or CEMS 45C) and (PHYS 7D or PHYS 7E). CHEM 132A with a grade of C- or better

Overlaps with CHEM 131A.

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 132C. Molecular Structure and Elementary Statistical Mechanics. 4 Units.**

Principles of quantum mechanics with applications to molecular spectroscopy and structure determination, and chemical bonding in simple molecules. Elements of statistical mechanics.

Prerequisite: CHEM 132B

Overlaps with CHEM 131B.

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 133. Nuclear and Radiochemistry. 4 Units.**

Advanced treatment of nuclear structure, nuclear reactions, and radioactive-decay processes. Introduction to nuclear activation analysis, isotope effects, radiation chemistry, hot-atom chemistry, nuclear age-dating methods, nuclear reactors, and nuclear power.

Prerequisite: (CHEM M3C or CHEM 1C or CHEM H2C) and MATH 2D

Same as CBE 176.

Overlaps with CHEM 170.

Restriction: Chemistry Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment.

Concurrent with CHEM 233 and CBE 276.

**CHEM 133L. Nuclear and Radiochemistry Laboratory. 3 Units.**

Practical aspects of production, separation, safe handling, detection, and measurement of radioactive isotopes. Experiments use the UCI nuclear reactor and emphasize uses of radioisotopes in chemistry, engineering, biology, and medicine. Materials fee.

Prerequisite or corequisite: CHEM 133

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 137. Computational Chemistry. 4 Units.**

Short introduction to programming languages and to representative algorithms employed in chemical research. Students have the opportunity to devise and employ their own codes and also to employ codes which are widely used in various fields of chemistry. Materials fee.

Corequisite: CHEM 132C

Prerequisite: CHEM 51C and (CHEM 131A or CHEM 132B)

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 138. Introduction to Computational Organic Chemistry. 4 Units.**

An introduction to the use of computational chemistry to investigate reaction mechanisms, to calculate structures, and to predict properties of molecules. Students have the opportunity to perform calculations employing computational methods which are widely used in various fields of chemistry. Materials fee.

Prerequisite: CHEM 51C

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 141. Environmental Chemistry. 4 Units.**

Processes that control the fate of chemicals in the environment. Chemistry of the atmosphere, hydrosphere, and soils, especially as it pertains to pollutants.

Prerequisite: (CHEM 51C or CHEM H52C) and (MATH 2B or AP Calculus BC). AP Calculus BC with a minimum score of 4

**CHEM 145A. Gas-Phase Atmospheric Chemistry. 4 Units.**

Sources, chemistry, sinks, and measurements of key atmospheric gaseous species. Chemistry of photochemical oxidant formation, transformation of key inorganic and organic trace gases, and stratospheric ozone cycling. Applications of atmospheric chemistry models to control strategies.

Prerequisite: CHEM 132A and CHEM 132B and CHEM 132C

Concurrent with CHEM 245A.

**CHEM 145B. Multi-Phase Atmospheric Chemistry. 4 Units.**

Chemical and physical processes leading to the production, aging, and removal of atmospheric particles. Multi-phase processes involving gases, particles, water droplets, and environmental surfaces. Approaches for modeling these processes with applications to control strategies.

Prerequisite: CHEM 145A

Concurrent with CHEM 245B.

**CHEM 150. Computational Chemistry. 4 Units.**

Basic concepts, methods, and techniques in computational chemistry: density functional and wavefunction theory, molecular property calculations, analysis tools, potential energy surfaces, vibrational effects, molecular dynamics simulations.

Prerequisite or corequisite: MATH 3A and (CHEM 132A or PHYS 113A)

Restriction: Chemistry Majors have first consideration for enrollment.

Concurrent with CHEM 250.

**CHEM 150L. Computational Chemistry Laboratory. 4 Units.**

Introduction to the practice of modern computational chemistry through a series of advanced computational experiments.

Prerequisite: CHEM 150 and (CHEM 5 or PHYS 50 or EECS 12)

Restriction: Chemistry Majors have first consideration for enrollment.

Concurrent with CHEM 250L.

**CHEM 152. Advanced Analytical Chemistry. 5 Units.**

In-depth treatment of modern instrumental methods for quantitative analysis of real samples and basic principles of instrument design. Laboratory experiments using spectroscopic, chromatographic, mass spectrometric, and other instrumental methods. Materials fee.

Prerequisite: (CHEM 1C or CHEM M3C or CHEM H2C) and (CHEM M3LC or CHEM H2LC)

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 153. Physical Chemistry Laboratory. 4 Units.**

Introduction to the modern experimental approaches and software tools used in spectroscopy, kinetics, electrochemistry, and other physical chemistry experiments. Basics of interfacing with instruments using LabView. Materials fee.

Corequisite: CHEM 132C

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 156. Advanced Laboratory in Chemistry and Synthesis of Materials. 4 Units.**

Modern synthesis and characterization of organic and inorganic materials including polymers, nanomaterials, and biomaterials. State-of-the-art characterization techniques include gel permeation chromatography, dynamic light scattering, thermal analysis, mechanical analysis, electron and scanning probe microscopy, X-ray diffraction, and porosimetry. Materials fee.

Prerequisite: (CHEM 51C or CHEM H52C) and (CHEM 51LC or CHEM H52LC or CHEM M52LC) and (CHEM 131A or CHEM 132B or PHMS 171)

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 160. Organic Synthesis Laboratory. 4 Units.**

Modern experimental techniques in organic synthesis including experience with thin-layer chromatography, liquid chromatography, and gas chromatography. Modern methods of structure elucidation including FT NMR are employed in the characterization of products. Materials fee.

Prerequisite or corequisite: CHEM 51C and CHEM 100S and (CHEM 51LC or CHEM H52LC or CHEM M52LC)

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 170. Radioisotope Techniques. 4 Units.**

Basic theory and practice of production, separation, safe handling, counting, applications of radioactive isotopes with emphasis on applications in chemistry, biology, and medicine. Materials fee.

Prerequisite: (CHEM 1C or CHEM M3C or CHEM H2C) and (CHEM 1LC or CHEM M3LC or CHEM H2LC)

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 177. Medicinal Chemistry. 4 Units.**

An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-throughput screening. Relationship of molecular structure to pharmacological activity.

Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and (BIOL 98 or CHEM 128)

Same as PHMS 177.

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment.

**CHEM 177L. Medicinal Chemistry Laboratory. 3 Units.**

An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-throughput screening. Relationship of molecular structure to pharmacological activity. Materials fee.

Corequisite: PHRMSCI 177 or CHEM 177.

Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and BIOL 100 and (BIOL 98 or CHEM 128)

Same as PHMS 177L.

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment.

**(Ib)****CHEM 180. Undergraduate Research. 4 Units.**

Research for credit arranged with a faculty member to sponsor and supervise work. Student time commitment of 10 to 15 hours per week is expected, and a written research report is required at the end of each quarter.

Prerequisite or corequisite: CHEM 100S

Repeatability: May be repeated for credit unlimited times.

**CHEM 180W. Senior Thesis in Chemistry. 4 Units.**

Students receive guidance on preparing research papers, proposals, reports, and other forms of scientific writing in chemistry-related fields; on effectively searching for and using chemical information; and on communicating data in poster and platform presentations.

Prerequisite: CHEM 180 or CHEM 199 or PHYS 195 or ESS 199 or CEMS 199 or CEE 199 or MAE 199 or BIOL 199 or PUBH 199. CHEM 180 with a grade of A or better. CHEM 199 with a grade of A or better. PHYS 195 with a grade of A or better. ESS 199 with a grade of A or better. CEMS 199 with a grade of A or better. CEE 199 with a grade of A or better. MAE 199 with a grade of A or better. BIOL 199 with a grade of A or better. PUBH 199 with a grade of A or better. Consent of the instructor is also accepted. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Chemistry Majors have first consideration for enrollment.

**(Ib)****CHEM H180A. Honors Research in Chemistry. 4 Units.**

Undergraduate honors research in Chemistry. A student time commitment of 10-15 hours per week is required.

Restriction: Chemistry Honors students only. Campuswide Honors Collegium students only.

**CHEM H180B. Honors Research in Chemistry. 4 Units.**

Undergraduate honors research in Chemistry. A student time commitment of 10-15 hours per week is required.

Prerequisite: CHEM H180A

Restriction: Campuswide Honors Collegium students only.

**CHEM H180C. Honors Research in Chemistry. 4 Units.**

Undergraduate honors research in Chemistry. A student time commitment of 10-15 hours per week is required.

Prerequisite: CHEM H180B

Restriction: Chemistry Honors students only. Chemistry majors participating in the Campuswide Honors Program students only.

**CHEM H181W. Honors Seminar in Chemistry. 2 Units.**

Students will receive guidance in the preparation of oral and written research presentations. A written thesis will be prepared and a formal research seminar will be presented.

Corequisite: CHEM H180C

Prerequisite: CHEM H180A and CHEM H180B. Satisfactory completion of the Lower-Division Writing requirement.

**(Ib)**

**CHEM 191. Chemistry Outreach Program. 2 Units.**

Involves intensive participation in the UCI Chemistry Outreach Program, which performs Chemistry demonstrations at local high schools.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 6 times.

**CHEM 192. Tutoring in Chemistry. 2 Units.**

Enrollment limited to participants in the Chemistry Peer Tutoring Program.

Repeatability: May be taken for credit 9 times.

Restriction: The first eight may be taken for a letter grade. The remaining ten units must be taken Pass/Not Pass only. NOTE: No more than eight units may be counted toward the 180 units required for graduation. Satisfies no degree requirement other than contribution to the 180-unit total.

**CHEM 193. Research Methods. 4 Units.**

Explores tools of inquiry for developing and implementing science research projects. Students undertake independent projects requiring data collection, analysis, and modeling, and the organization and presentation of results. Additional topics include ethical issues and role of scientific literature.

Prerequisite: BIOL 14 or PS 5

Same as BIOL 108, PHYS 193.

**CHEM 197. Professional Internship. .5-4 Units.**

Internship program that provides students with opportunity to develop professional skills necessary for competitive placement in their chosen chemical-inspired industry. Students gain new and field-specific skills outside the classroom while participating in a supervised internship.

Prerequisite: Enrollment requires completion of an application form. Student selection is made by a selection committee.

Repeatability: May be taken for credit for 13 units.

Restriction: Upper-division students only. Chemistry Majors only.

**CHEM 199. Independent Study in Chemistry. 1-4 Units.**

Independent research with Chemistry faculty. Student time commitment of three to four hours per week per unit is expected, and a written report on the independent study is required at the end of each quarter of enrollment.

Repeatability: Unlimited as topics vary.

**CHEM 200. Conduct of Research . 2 Units.**

Introduces new graduate students to ethical conduct of scientific research, mentoring, and current research in the Department of chemistry.

Repeatability: May be taken for credit 2 times.

**CHEM 201. Organic Reaction Mechanisms I. 4 Units.**

Advanced treatment of basic mechanistic principles of modern organic chemistry. Topics include molecular orbital theory, orbital symmetry control of organic reactions, aromaticity, carbonium ion chemistry, free radical chemistry, the chemistry of carbenes and carbanions, photochemistry, electrophilic substitutions, aromatic chemistry.

Prerequisite: CHEM 132A and CHEM 132B and CHEM 132C

**CHEM 202. Organic Reaction Mechanisms II. 4 Units.**

Topics include more in-depth treatment of mechanistic concepts, kinetics, conformational analysis, computational methods, stereoelectronics, and both solution and enzymatic catalysis.

Prerequisite: CHEM 201

**CHEM 203. Organic Spectroscopy. 4 Units.**

Modern methods used in structure determination of organic molecules. Topics include mass spectrometry; ultraviolet, chiroptical, infrared, and nuclear magnetic resonance spectroscopy.

Prerequisite: (CHEM 51A and CHEM 51B and CHEM 51C) or (CHEM H52A and CHEM H52B and CHEM H52C)

Restriction: Graduate students only.

**CHEM 204. Organic Synthesis I. 4 Units.**

Fundamentals of modern synthetic organic chemistry is developed. Major emphasis is on carbon-carbon bond forming methodology. Topics include carbonyl annulations, cycloadditions, sigmatropic rearrangements, and organometallic methods.

**CHEM 205. Organic Synthesis II. 4 Units.**

Fundamentals of modern synthetic organic chemistry will be developed. Major emphasis this quarter is on natural product total synthesis and retrosynthetic (antithetic) analysis.

Prerequisite: CHEM 204

**CHEM 206. Advanced Data Acquisition and Analysis. 4-6 Units.**

Introduces students to a variety of practical laboratory techniques, including lock-in, boxcar, coincidence counting, noise filtering, PID control, properties of common transducers, computer interfacing to instruments, vacuum technology, laboratory safety, basic mechanical design, and shop skills. Materials fee.

Same as PHYS 206.

Concurrent with PHYS 106.

**CHEM 207. Applied Physical Chemistry. 4 Units.**

Introduction to fundamental concepts in molecular structure and reactivity: theory of bonding, valence and molecular orbitals; structure and reactivity in inorganic chemistry; elements in molecular group theory; nomenclature in organic chemistry; and survey of macromolecules.

Same as PHYS 207.

**CHEM 208. Math Methods. 4 Units.**

Applications of mathematics to physical and chemical problems. Calculus of special functions, complex variables and vectors; linear vector spaces and eigenvalue problems. Differential equations.

Same as PHYS 208.

**CHEM 213. Chemical Kinetics. 4 Units.**

Surveys gas phase and organic reaction mechanisms and their relationship to kinetic rate laws; treats the basic theory of elementary reaction rates. A brief presentation of modern cross-sectional kinetics is included.

Prerequisite: CHEM 132A and CHEM 132B and CHEM 132C

**CHEM 215. Inorganic Chemistry I. 4 Units.**

Principles of modern inorganic chemistry with applications to chemical systems of current interest. Inorganic phenomena are organized into general patterns which rationalize observed structures, stabilities, and physical properties.

Prerequisite: CHEM 107 and CHEM 132A and CHEM 132B and CHEM 132C

Restriction: Graduate students only.

**CHEM 216. Organometallic Chemistry. 4 Units.**

Synthesis and reactivity of organometallic complexes with an emphasis on mechanisms. Topics include bonding and fluxional properties; metal-carbon single and multiple bonds; metal  $\pi$ -complexes. Applications to homogenous catalysis and organic synthesis are incorporated throughout the course.

Prerequisite: CHEM 107 or CHEM 215

**CHEM 217. Physical Inorganic Chemistry. 4 Units.**

General principles of the spectroscopy and magnetism of inorganic compounds. Characterization of inorganic complexes by infrared, near-infrared, visible, ultraviolet, NMR, EPR, EXAFS, and Mossbauer spectroscopies. Some necessary group theory developed.

Prerequisite: CHEM 215

**CHEM 218. Metallobiochemistry . 4 Units.**

A review of the biochemistry of metallic elements emphasizing: methods for studying metals in biological systems; the chemical basis for nature's exploitation of specific elements; structures of active sites; mechanisms; solid-state structures and devices; metals in medicine.

Prerequisite or corequisite: CHEM 131C or CHEM 132C

Same as MBB 248.

**CHEM 219. Chemical and Structural Biology. 4 Units.**

A survey of the organic chemistry underlying biological function. Introduction to chemical genetics, receptor-ligand interactions, small molecule agonists and antagonists, combinatorial synthesis, high throughput assays, molecular evolution, protein and small molecule design.

Restriction: Graduate students only.

**CHEM 221A. Fundamentals of Molecular Biophysics. 4 Units.**

An overview of the principles and concepts in molecular biophysics. Topics covered include energy and entropy in biology, non-equilibrium reaction kinetics, random walks and molecular diffusion, molecular forces in biology.

Prerequisite: Undergraduate courses in physical chemistry and biochemistry.

Repeatability: May be taken for credit 3 times.

**CHEM 223. Biological Macromolecules. 4 Units.**

Introduction to nucleic acid and protein structure, dynamics, and function. Topics include analytical methods, molecular evolution, folding, and catalysis.

Same as PHMS 223.

**CHEM 224. Molecular and Cellular Biophotonics. 4 Units.**

Principles underlying the application of photonic technologies to biomolecular and cellular systems. Sample technologies Optical Tweezers, Linear and Nonlinear Optical Microscopy and Fluorescence Lifetime and Correlation Methods, and their use to investigate emergent problems in Molecular, Cellular, and Developmental Biology.

Same as BME 224.

Restriction: Graduate students only.

**CHEM 225. Polymer Chemistry: Synthesis and Characterization of Polymers. 4 Units.**

Structure of synthetic and natural polymers. Survey of modern polymer synthetic methods. Molecular weight and molecular weight distribution. Chain conformation and stereochemistry. Introduction to polymer characterization, chain models, and solution behavior.

Prerequisite: Undergraduate courses in organic and physical chemistry.

**CHEM 228. Electromagnetism. 4 Units.**

Maxwell's equations, electrodynamics, electromagnetic waves and radiation, wave propagation in media, interference and quantum optics, coherent and incoherent radiation, with practical applications in interferometry, lasers, waveguides, and optical instrumentation.

Same as PHYS 228.

**CHEM 229A. Computational Methods. 4 Units.**

Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.

Same as PHYS 229A.

Concurrent with PHYS 100.

**CHEM 230. Classical Mechanics and Electromagnetic Theory. 4 Units.**

Fundamentals of classical mechanics and electromagnetic theory are developed with specific application to molecular systems. Newtonian, Lagrangian, and Hamiltonian mechanics are developed. Boundary value problems in electrostatics are investigated. Multipole expansion and macroscopic media are discussed from a molecular viewpoint.

Prerequisite: CHEM 132A and CHEM 132B and CHEM 132C

**CHEM 231A. Fundamentals of Quantum Mechanics. 4 Units.**

The postulates of quantum mechanics are discussed and applied to a variety of model problems.

Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C

**CHEM 231B. Applications of Quantum Mechanics. 4 Units.**

Approximate methods for solving atomic and molecular structure problems are developed, and the application of quantum mechanics to spectroscopy is introduced.

Prerequisite: CHEM 231A

**CHEM 231C. Molecular Spectroscopy. 4 Units.**

Theory and techniques of spectroscopy as used for the study of molecular and condensed phase properties. Coherent time domain spectroscopies are covered.

Prerequisite: CHEM 231B

**CHEM 232A. Thermodynamics and Introduction to Statistical Mechanics. 4 Units.**

A detailed discussion from an advanced point of view of the principles of classical thermodynamics. The fundamentals of statistical mechanics. Topics include an introduction to ensemble theory, Boltzmann statistics, classical statistical mechanics, and the statistical mechanics of ideal gas systems.

Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C

**CHEM 232B. Advanced Topics in Statistical Mechanics. 4 Units.**

Continued discussion of the principles of statistical mechanics. Applications to topics of chemical interest including imperfect gases, liquids, solutions, and crystals. Modern techniques such as the use of autocorrelation function methods.

Prerequisite: CHEM 232A

**CHEM 232C. Non-Equilibrium Statistical Mechanics. 4 Units.**

Phenomenology of material processes, including: kinetic theories of transport and continuum, linear response theory, critical phenomena of phase transition, self-assembly, and nucleation.

**CHEM 233. Nuclear and Radiochemistry. 4 Units.**

Advanced treatment of nuclear structure, nuclear reactions, and radioactive-decay processes. Introduction to nuclear activation analysis, isotope effects, radiation chemistry, hot-atom chemistry, nuclear age-dating methods, nuclear reactors, and nuclear power.

Same as CBE 276.

Restriction: Graduate students only.

Concurrent with CHEM 133 and CBE 176.

**CHEM 237. Mathematical Methods in Chemistry. 4 Units.**

Survey of essential math methods in chemistry. Topics may include series and limits, complex analysis, Fourier and Laplace transforms, linear algebra and operators (theory and algorithms), differential equations, and probability concepts for stochastic processes.

**CHEM 241. Current Issues Related to Air Quality, Climate, and Energy. 4 Units.**

Current issues related to the atmosphere, climate, and air quality in the context of energy conversion and sustainability. Topics include transportation systems; building design; impacts on humans and ecosystems; modeling and meteorology; economics; and application to public policies.

Prerequisite: MAE 261 or CHEM 245 or ESS 240

Same as MAE 260.

Restriction: Graduate students only.

**CHEM 242A. Physical and Geometrical Optics. 4 Units.**

Focuses on the practical aspects of optics and optical engineering, starting at the fundamentals. Topics include geometrical optics, ray tracing, polarization optics, interferometers, and diffractive optics.

Restriction: Graduate students only.

Concurrent with PHYS 134A.

**CHEM 243. Advanced Instrumental Analysis. 4 Units.**

Theory and applications of modern advanced instrumental methods of analysis. Includes data acquisition, storage, retrieval, and analysis; Fourier transform methods; vacuum technologies; magnetic sector; quadrupole and ion trap mass spectrometry; surface science spectroscopic methods; lasers and optics.

Prerequisite: CHEM 152 and CHEM 132C. CHEM 152 with a grade of B or better. CHEM 132C with a grade of B or better

**CHEM 244. Detection and Measurement of Radiation. 4 Units.**

Basic principles of detection and measurement of ionizing radiation; both theory and practical aspects of measurement techniques for alpha, beta, gamma, and neutron radiation, properties of different detector materials, electronics and data treatments, and analysis.

Prerequisite: CHEM 233 or CBE 276

Same as CBE 277.

Restriction: Graduate students only.

**CHEM 245A. Gas-Phase Atmospheric Chemistry. 4 Units.**

Sources, chemistry, sinks, and measurements of key atmospheric gaseous species. Chemistry of photochemical oxidant formation, transformation of key inorganic and organic trace gases, and stratospheric ozone cycling. Applications of atmospheric chemistry models to control strategies.

Prerequisite: CHEM 132A and CHEM 132B and CHEM 132C

Concurrent with CHEM 145A.

**CHEM 245B. Multi-Phase Atmospheric Chemistry. 4 Units.**

Chemical and physical processes leading to the production, aging, and removal of atmospheric particles. Multi-phase processes involving gases, particles, water droplets, and environmental surfaces. Approaches for modeling these processes with applications to control strategies.

Prerequisite: CHEM 245A

Concurrent with CHEM 145B.

**CHEM 245C. Special Topics in Atmospheric Chemistry. 4 Units.**

The subjects covered vary from year to year.

Prerequisite: CHEM 245B

Repeatability: Unlimited as topics vary.

**CHEM 246. Separations and Chromatography. 4 Units.**

Introduction to modern separation techniques such as gas chromatography, high-performance liquid chromatography, supercritical fluid chromatography, capillary electrophoresis, and field flow fractionation. Applications of these separation strategies are discussed.

**CHEM 247. Current Problems in Analytical Chemistry. 4 Units.**

Surveys current research challenges in analytical chemistry. Topics include electrochemistry, chromatography, spectroscopy, and mass spectrometry.

**CHEM 248. Electrochemistry. 4 Units.**

Fundamentals of electrochemistry including thermodynamics and the electrochemical potential, charge transfer kinetics, and mass transfer. Methods based on controlled potential and controlled current are described; the effects of slow heterogeneous kinetics and the perturbation caused by homogeneous chemistry are discussed.

**CHEM 249. Analytical Spectroscopy. 4 Units.**

Advanced treatment of spectroscopic techniques and instrumentation. Atomic and molecular absorption, emission, and scattering processes and their application to quantitative chemical analysis are outlined. Puts different spectroscopic techniques in perspective and demonstrates most appropriate applications to analytical problems.

**CHEM 250. Computational Chemistry. 4 Units.**

Basic concepts, methods, and techniques in computational chemistry: density functional and wavefunction theory, molecular property calculations, analysis tools, potential energy surfaces, vibrational effects, molecular dynamics simulations.

Restriction: Graduate students only.

Concurrent with CHEM 150.

**CHEM 250L. Computational Chemistry Laboratory. 4 Units.**

Introduction to the practice of modern computational chemistry through a series of advanced computational experiments.

Prerequisite: CHEM 250

Restriction: Graduate students only.

Concurrent with CHEM 150L.

**CHEM 251. Special Topics in Organic Chemistry. 1-4 Units.**

Advanced topics in organic chemistry.

Repeatability: Unlimited as topics vary.

**CHEM 252. Special Topics in Physical Chemistry. 1-4 Units.**

Advanced topics in physical chemistry. Materials fee.

Repeatability: Unlimited as topics vary.

**CHEM 253. Special Topics in Inorganic Chemistry. 4 Units.**

Advanced topics in inorganic chemistry.

Prerequisite: CHEM 215

Repeatability: Unlimited as topics vary.

**CHEM 254. Special Topics in Computational and Theoretical Chemistry. 4 Units.**

Subjects covered vary from year to year.

Repeatability: Unlimited as topics vary.

**CHEM 263. Materials Chemistry . 4 Units.**

An introduction to crystalline solids, descriptive crystal chemistry, solid-state synthesis and characterization techniques, x-ray and electron diffraction, phase diagrams, electronic band structure of extended solids, semi conductors, and nanoscale inorganic materials.

**CHEM 266. Current Topics in Chemical, Applied, and Materials Physics. 1 Unit.**

The subjects covered vary from year to year. Connection between fundamental principles and implementations in practice in science, industry, and technology.

Repeatability: May be repeated for credit unlimited times.

Same as PHYS 266.

**CHEM 267. Photochemistry. 4 Units.**

Photochemical and photovoltaic processes in molecules and semiconductors; quantum mechanics; statistical thermodynamics; kinetics; and experimental techniques relevant to photon absorption and emission; photochemical charge separation, recombination, and transport of electrons and ions; and interfacial redox chemistry.

Restriction: Seniors only. Graduate students only.

**CHEM 268. NMR Spectroscopy . 4 Units.**

Students learn the theoretical basis of solid-state or solution NMR (alternate times), including the basics of pulse sequence design. Extensive literature reading is required.

Prerequisite: CHEM 231A

Repeatability: May be taken for credit 2 times.

**CHEM 273. Technical Communication Skills. 2 Units.**

Development of effective communication skills, oral and written presentations, through examples and practice.

Grading Option: Satisfactory/unsatisfactory only.

Same as PHYS 273.

**CHEM 280. Research. 2-12 Units.**

Supervised original research toward the preparation of a Ph.D dissertation or M.S. thesis.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CHEM 290. Seminar. 1 Unit.**

Weekly seminars and discussions on general and varied topics of current interest in chemistry.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CHEM 291. Research Seminar. 4 Units.**

Detailed discussion of research problems of current interest in the Department. Format, content, and frequency of the course are variable.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**CHEM 292. Graduate Symposium. 2 Units.**

Students present public seminars on literature-based research topics in contemporary chemistry. Topics to be chosen by student and approved by instructor.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**CHEM 299. Independent Study. 1-4 Units.**

Independent research with Chemistry faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CHEM 399. University Teaching. 1-4 Units.**

Required of and limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

## **Earth System Science Courses**

**EARTHSS 1. Introduction to Earth System Science. 4 Units.**

Covers the origin and evolution of the Earth, its atmosphere, and oceans, from the perspective of biogeochemical cycles, energy use, and human impacts on the Earth system.

(II and VA ).

**EARTHSS 3. Oceanography. 4 Units.**

Examines circulation of the world oceans and ocean chemistry as it relates to river, hydrothermal vent, and atmospheric inputs. Geological features, the wide variety of biological organisms, and global climate changes, such as greenhouse warming, are also studied.

(II, Va)

**EARTHSS 5. The Atmosphere. 4 Units.**

The composition and circulation of the atmosphere with a focus on explaining the fundamentals of weather and climate. Topics include solar and terrestrial radiation, clouds, and weather patterns.

(II and VA ).

**EARTHSS 7. Physical Geology. 4 Units.**

Introduction to Earth materials and processes. Topics include rocks and minerals, plate tectonics, volcanoes, earthquakes, Earth surface processes, Earth resources, geologic time, and Earth history. Laboratory work involves hands-on study of geologic materials, maps, and exercises pertaining to geologic processes. Materials fee.

(II and VA ).

**EARTHSS 15. Introduction to Global Climate Change. 4 Units.**

Introduction of scientific, technological, environmental, economic, and social aspects underlying the threat and understanding of global climate change. Human and natural drivers of climate. Impacts of climate on natural, managed, and human systems, including their vulnerability and ability to adapt.

(II and (VA or VIII) ).

**EARTHSS 17. Hurricanes, Tsunamis, and Other Catastrophes. 4 Units.**

Introduction to the basic science and state of predictability of various natural catastrophic events including earthquakes, volcanic eruptions, tsunamis, landslides, floods, hurricanes, fires, and asteroid impacts and their interactions and implications with human society in the U.S. and globally.

Overlaps with PUBHLTH 90.

(II and (VA or VIII) ).

**EARTHSS 19. Introduction to Modeling the Earth System. 4 Units.**

Simulate the Earth's system using computer models. Covers the interaction of the air, land, and ocean, and explores how changes to one part of the environment affect the complete Earth system. Utilizes technological tools to understand scientific principles.

(II, Vb)

**EARTHSS 21. On Thin Ice: Climate Change and the Cryosphere. 4 Units.**

Introduction of the basic science that governs the cryosphere and its interaction with the climate system. Covers some of the significant economic, sociological, and political consequences of the recent melting of the cryosphere driven by anthropogenic climate change.

(II and (VA or VIII) ).

**EARTHSS 23. Air Pollution: From Urban Smog to Global Change . 4 Units.**

Air pollution occurs on regional to global scales. A wide range of air pollution sources and physical, chemical, and meteorological sciences behind air pollution are introduced. The consequences of air pollution to our society are also discussed.

(II and (VA or VIII) ).

**EARTHSS 27. The Sustainable Ocean. 4 Units.**

An introduction to sustainability as it relates to marine resources and conservation. Topics include the scientific basis of our understanding of marine ecosystems, and the political, social, and cultural principles that govern resource protection.

(II and VIII ).

**EARTHSS H30B. Environmental Issues Affecting the Sustainability of Societies I. 4 Units.**

Focuses on several environmental challenges facing the world today, and explores the problem, possible solutions, and their scientific, technical, and social constraints. Models for systems, their assumptions, predictive uncertainty, and interpretation, play a large role.

Prerequisite: CHEM H30A. CHEM H30A with a grade of C or better

Overlaps with EARTHSS 15.

Restriction: Campuswide Honors Collegium students only.

(II and Vb ).

**EARTHSS H30C. Environmental Issues Affecting the Sustainability of Societies II. 4 Units.**

Focuses on how we can use Earth's resources, e.g., food and water, in a more sustainable way, exploring their scientific, technical, and social constraints.

Prerequisite: EARTHSS H30B. EARTHSS H30B with a grade of C or better

Restriction: Campuswide Honors Collegium students only.

(III)

**EARTHSS 40A. Earth System Chemistry. 4 Units.**

To understand the cycling of matter on Earth, we need to learn about the chemistry of elements and molecules in the environment. Introduces students to the understanding of how chemical principles apply in context to their everyday lives.

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment.

(II and VA ).

**EARTHSS 40B. Earth System Biology. 4 Units.**

Earth System Science is a highly interdisciplinary field that requires knowledge of various components of the Earth as a system, including the biosphere. Students are introduced to several fundamental principles of biology, from the smallest cells to the largest ecosystems.

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment.

(II)

**EARTHSS 40C. Earth System Physics. 4 Units.**

Covers the fundamental physical forces and laws that affect the Earth system, such as electromagnetic radiation and energy transfer, atmospheric and ocean dynamics. Also covers aspects of physics related to environmental issues, such as electricity generation and transmission.

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment.

(II and VA ).

**EARTHSS 45. New Student Seminar. 1 Unit.**

Weekly meetings led by faculty, current students, and staff, to provide information on the Department of Earth System Science, campus resources, and special programs and opportunities. Designed for students who recently joined the Earth System Science and Environmental Science majors.

Grading Option: Pass/no pass only.

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment. New students only (freshman, transfer, and change of major).

**EARTHSS 51. Land Interactions. 4 Units.**

The role of terrestrial processes in the Earth system. Provides an introduction to ecosystem processes that regulate the cycling of energy, water, carbon, and nutrients. Analysis of the impact of human activities. Materials fee.

Corequisite: CHEM 1C

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 53. Ocean Biogeochemistry. 4 Units.**

Overview of oceanography for those interested in Earth System Science. Focus is on physical, chemical, and biological processes that drive biogeochemical cycling in the oceans. Coastal systems are also reviewed, with an emphasis on California waters.

Prerequisite: CHEM 1C

Restriction: Earth System Science Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment.

**EARTHSS 55. Earth's Atmosphere. 4 Units.**

Composition, physics, and circulation of Earth's atmosphere with an emphasis on explaining the role of atmospheric processes in shaping the climate system. Topics include atmospheric composition, the global energy balance, radiative transfer and climate, atmospheric circulation, and climate sensitivity.

Prerequisite or corequisite: (MATH 2B or MATH 5B) and (PHYSICS 3B or PHYSICS 7C)

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 70A. Sustainable Energy Systems. 4 Units.**

Addresses how modern energy services can be provided sustainably and the challenges and barriers that must be overcome. Major environmental issues are discussed, such as climate change, air pollution, and resource demands.

Prerequisite or corequisite: EARTHSS 40C or PHYSICS 3C or PHYSICS 7E

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 70B. Sustainable Food and Water Systems. 4 Units.**

Explores the biophysical underpinnings of food production, the history of agricultural development, and a range of environmental issues facing agricultural systems, including water management, climate change, and land use.

Prerequisite or corequisite: EARTHSS 40B or (BIO SCI 93 and BIO SCI 94)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 100. Special Topics in Earth System Science. 1-4 Units.**

Devoted to current topics in the field of Earth System Science. Topics addressed vary each quarter.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Repeatability: May be taken for credit for 12 units as topics vary.

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 101. Paleoclimatology. 4 Units.**

Explores past changes in Earth's climate. Topics include tools and techniques used to reconstruct past climate from natural archives; records and mechanisms of past climate changes throughout Earth history; and lessons learned from the paleo-record for prediction of future climate.

Prerequisite: EARTHSS 51 and EARTHSS 53 and EARTHSS 55

Restriction: Earth System Science Majors have first consideration for enrollment.

Concurrent with EARTHSS 201.

**EARTHSS 112. Global Climate Change and Impacts. 4 Units.**

Observations over the 20th century show extensive changes in atmospheric composition, climate and weather, and biological systems that have paralleled industrial growth. Evidence of globally driven changes in these biogeochemical systems is studied, including projected impacts over the 21st century.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 114. Earth System Science Laboratory and Field Methods. 4 Units.**

Introduction to methods used to measure exchange of gases and energy between the atmosphere and terrestrial ecosystems. Laboratories include data acquisition and isotopic and chromatographic analysis. Field measurements at UCI's Marsh Reserve include microclimate, hydrology, trace-gas exchange, and plant growth. Materials fee.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 115. Aquatic Field Methods. 4 Units.**

Students design sampling plans, conduct field research techniques, and carry out data analyses that are relevant to aquatic field research. Aquatic field sites covered in the course include marine, estuarine, and fluvial systems. Materials fee.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 116. Introduction to Environmental Data Science. 4 Units.**

Analysis and interpretation of geophysical data, including functional fitting, probability density functions, and multidimensional time-series methods, with applications in atmospheric, oceanic, and biogeochemical sciences.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 118. Analysis, Modeling, and Visualization of Multidimensional Environmental Data. 4 Units.**

Students learn programming and numerical methods in Python with applications in Earth System Science and ecology. Topics include regression, uncertainty and significance, the development of simple box models, and the visualization of multi-dimensional climate and satellite datasets.

Prerequisite: I&C SCI 31 or EARTHSS 116

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 122. Atmospheric Dynamics. 4 Units.**

Fluid dynamical processes that determine the large-scale flow of the atmosphere and ocean. Most important are interactions between the density stratification and the Coriolis force associated with Earth's rotation. Topics include circulation, vorticity, planetary waves, and their role in climate.

Prerequisite: EARTHSS 55 and (PHYSICS 7C or PHYSICS 3B)

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 124. Weather Analysis. 4 Units.**

Provides an overview of weather systems in midlatitudes and tropics. The fundamental dynamics possible for these weather systems are described. Elementary weather analysis and forecasting techniques are introduced.

Prerequisite: EARTHSS 55

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 130. Physical Oceanography. 4 Units.**

Physical processes that determine the distribution of water properties such as salt and temperature. Fluid-dynamical underpinnings of physical oceanography. Wave motions. The wind-driven and thermohaline circulation. Similarities and differences between ocean and atmosphere dynamics.

Prerequisite: (PHYSICS 7C or PHYSICS 3B) and EARTHSS 53

Restriction: Earth System Science Majors have first consideration for enrollment.

**EARTHSS 132. Terrestrial Hydrology. 4 Units.**

Comprehensive treatment of modern conceptual and methodological approaches to hydrological science. Combines qualitative understanding of hydrological processes with quantitative representation, approaches to measurement, and treatment of uncertainty. Components of the hydrological cycle and their linkages within the coupled Earth system.

Prerequisite: (EARTHSS 51 and EARTHSS 55) or (EARTHSS 40C and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 133. Soil: It's the Good Dirt. 4 Units.**

An introduction to the critical role soils play in sustaining land ecosystems and humans. Covers how soils form and how human actions contribute to the pollution and loss but also the health and productivity of soils.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors only. Environmental Science Majors only. Earth System Science Majors only.

**EARTHSS 134. Fundamentals of GIS for Environmental Science. 4 Units.**

Introduction to Geographic Information Systems (GIS). Topics include fundamentals of cartography, creating/editing GIS data, linking spatial and tabular data, georeferencing, map projections, geospatial analysis, spatial statistics, and the development of GIS models. Examples from hydrology, ecology, and geology.

Prerequisite: (EARTHSS 51 and EARTHSS 53) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 138. Satellite Remote Sensing for Earth System Science. 4 Units.**

Satellite remote sensing data are increasingly used to study the Earth system. Provides an overview of the principles behind remote sensing, and the types of satellite data available for study of the oceans, land, and atmosphere.

Prerequisite: (EARTHSS 51 and EARTHSS 53) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 140. Advanced Geology. 4 Units.**

Introduces students to the geological processes which have formed and continue to shape the Earth. Topics include geological time, minerals and the rock cycle, plate tectonics and associated geological hazards, earth resources, and earth surface processes. Materials fee.

Prerequisite: EARTHSS 51 or EARTHSS 70B

Overlaps with EARTHSS 7.

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 142. Atmospheric Chemistry. 4 Units.**

Chemistry of the troposphere and stratosphere. Topics include processes controlling the lifetime and reaction pathways of chemicals in the atmosphere, the role of the atmosphere in biogeochemical cycles, and interactions between atmospheric chemistry and the physical climate system.

Prerequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and (PHYSICS 3C or PHYSICS 7E) and (MATH 2B or MATH 5B or AP Calculus BC). AP Calculus BC with a minimum score of 4

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 144. Marine Geochemistry and Biogeochemistry. 4 Units.**

Processes controlling the major and minor element composition of seawater and element distributions in the ocean. Gas exchange, carbon dioxide system, stable isotopes, radionuclides as tracers and chronometers, particle fluxes, organic geochemistry, sediment geochemistry, global cycles of biogeochemically important elements.

Prerequisite: EARTHSS 53 or CHEM 51C

Restriction: School of Physical Sciences students have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 146. Consequences of Air Pollution. 4 Units.**

From public health to the global climate system, this course explores the impacts of air pollution from the beginning of human history to current and emerging issues. Scientific concepts behind air pollution and solutions are discussed.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 40C and EARTHSS 70A)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 148. Marine Ecosystems and Global Change. 4 Units.**

Presents an overview of marine ecosystem structure, diversity, and processes in the context of global change, including the impacts of climate warming, ocean acidification, marine fisheries, and anthropogenic additions of nutrients and pollutants.

Prerequisite: EARTHSS 53 or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

Concurrent with EARTHSS 248.

**EARTHSS 154. Ecosystem Services. 4 Units.**

Covers what ecosystem services are, how to classify them, what the impacts of land degradation are on ecosystem services, how to quantify and value them, and the importance of mainstreaming ecosystem services in decision-making.

Prerequisite: (EARTHSS 70A and EARTHSS 70B) or (EARTHSS 51 and EARTHSS 53 and EARTHSS 55)

Same as BIO SCI E146.

**EARTHSS 156. The Future of Forests. 4 Units.**

Introduces students to the determinants of global forest distribution; ecosystem services associated with forest functioning; threats to forests resulting from climate and land-use change; and, opportunities for conserving natural forests in the near future.

Prerequisite: (EARTHSS 70A and EARTHSS 70B) or (EARTHSS 51 and EARTHSS 53 and EARTHSS 55)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 158. Research Methods for Sustainable Systems Analysis. 4 Units.**

Develops students' analytical skills that are necessary to engage and assess the sustainability of coupled human and natural systems and effectively communicate their findings.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment. Global Sustainability Minors have first consideration for enrollment.

**EARTHSS 162. The Impact of Climate Change on California's Landscape. 4 Units.**

Overview of anticipated impacts of climate change on California's landscape. Includes projections of future climate; anticipated impacts on ecology, hydrology, wildfire, coastal environment, and agriculture; and efforts to reduce greenhouse gas emissions or adapt to climate change through land management.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 164. Ecosystem Ecology. 4 Units.**

A mechanistic perspective on ecosystem processes. Covers ecosystem development, element cycling, and interactions with plants and microbes. The role of ecosystems in environmental change is also addressed.

Prerequisite: BIO SCI E106 or EARTHSS 51 or EARTHSS 60A or CHEM 51C

Same as BIO SCI E118.

Restriction: Earth System Science Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Ecology and Evolutionary Biol Majors have first consideration for enrollment.

Concurrent with EARTHSS 264.

**EARTHSS 168. Physiological Plant Ecology. 4 Units.**

An examination of the interactions between plants and their environment. Emphasis on the underlying physiological mechanisms of plant function, adaptations and responses to stress, and the basis of the distribution of plants and plant assemblages across the landscape.

Prerequisite: EARTHSS 51 or BIO SCI 94 or (EARTHSS 60A and EARTHSS 60C)

Same as BIO SCI E127.

Restriction: Biological Sciences Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 171. Microbial Biogeochemistry. 4 Units.**

Develops an understanding of microorganisms in the context of their environment, environmental impact, and role in the global cycles of C,N,P, etc. Focuses on tools used to evaluate microbial diversity and function, and applications of microbial ecology.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors only. Environmental Science Majors only. Earth System Science Majors only.

**EARTHSS 176W. Marine Conservation, Policy, and Society. 4 Units.**

Conservation of marine ecosystems is important yet challenging due to competing physical, ecological, social, and regulatory issues. Students explore the principles of marine conservation, the scientific basics of marine ecosystems, and political and social processes involved with resource protection.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

(Ib)

**EARTHSS 177W. Documenting and Understanding Earth System Change. 4 Units.**

Students select a time series of key environmental interest as the focus for their writing. They become familiar with common writing practices for the Earth Sciences, and exercise their ability to use the scientific method to produce reports.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Environmental Science and Policy Majors only. Environmental Science Majors only. Earth System Science Majors only.

(Ib)

**EARTHSS 179. Climate Solutions. 4 Units.**

Focuses on carbon neutrality and climate stability, addressing.

Same as ENGRMAE 119, UPPP 111.

Restriction: Upper-division students only.

**EARTHSS 190A. Senior Seminar on Global Sustainability I. 2 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum is also required. Seminar utilized to analyze forum presentations. Prepare bibliography.

Same as BIO SCI 191A, SOCECOL 186A.

Restriction: Seniors only. Global Sustainability Minors have first consideration for enrollment.

**EARTHSS 190B. Senior Seminar on Global Sustainability II. 2 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum is also required. Seminar utilized to analyze forum presentations. Prepare research proposal.

Prerequisite: BIO SCI 191A or SOCECOL 186A or EARTHSS 190A

Same as BIO SCI 191B, SOCECOL 186B.

Restriction: Seniors only.

**EARTHSS 190CW. Writing/Senior Seminar on Global Sustainability III. 4 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze Forum presentations and to prepare senior research paper. Prepare/write research paper under direction of faculty member.

Prerequisite: BIO SCI 191B or EARTHSS 190B or SOCECOL 186B. BIO SCI 191B or EARTHSS 190B or SOCECOL 186B. Satisfactory completion of the Lower-Division Writing requirement.

Same as BIO SCI 191CW, SOCECOL 186CW.

Restriction: Seniors only.

**(Ib)**

**EARTHSS 191. Introduction to Research in Earth System Science. 1 Unit.**

Weekly presentations by Earth System Science faculty describing ongoing research in their laboratories. Students are introduced to the range of research topics and methods in Earth System Science and to the research opportunities available within the Department.

Prerequisite: (EARTHSS 60A and EARTHSS 60B) or (EARTHSS 51 and EARTHSS 53)

Grading Option: Pass/no pass only.

Restriction: Earth & Atmospheric Sciences Minors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 192. Careers in Earth System Science. 1 Unit.**

A weekly seminar course designed to help students transition to post-graduation career paths. Topics include designing effective resumes, applying to graduate school, and seeking employment. Also includes presentations by faculty, business, and government leaders describing potential environmental science career trajectories.

Grading Option: Pass/no pass only.

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 197. Independent Study in Earth System Science. .5-4 Units.**

Field study, educational outreach, or other independent projects under faculty direction. Interested students should arrange with an ESS faculty member to supervise and support an independent study project. A written summary is required at the end of each quarter.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 12 units.

**EARTHSS 198W. Senior Thesis in Earth System Science. 4 Units.**

Students receive guidance on the effective oral and written communication of research results. Students prepare and present a seminar, a poster, and a written thesis describing their research in Earth System Science.

Prerequisite: Two quarters of EARTHSS 199. Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with EARTHSS H198.

**(Ib)**

**EARTHSS H198. Honors Thesis in Earth System Science. 4 Units.**

Students receive guidance on effective written and oral communication of research results. Students prepare and present a seminar, poster, and written thesis describing their honors research in Earth System Science. Submission of the thesis and successful completion of this course will also satisfy the UCI upper-division writing requirement.

Prerequisite: ESS 199A and ESS 199B

Restriction: Consent of instructor to enroll and Prerequisite required

**(Ib)**

**EARTHSS 199. Undergraduate Research. 1-4 Units.**

For undergraduates with majors in science or engineering. Interested students should arrange with an ESS faculty member to supervise and support a research project. A written summary is required at the end of each quarter.

Repeatability: May be taken for credit for 12 units.

**EARTHSS H199A. Honors Research in Earth System Science. 4 Units.**

Undergraduate honors research in Earth System Science. A student commitment of 10-15 hours a week is expected, and a written report is required at the end of the quarter.

Restriction: Earth System Science Honors students only. Campuswide Honors Collegium students only.

**EARTHSS H199B. Honors Research in Earth System Science. 4 Units.**

Undergraduate honors research in Earth System Science. A student commitment of 10-15 hours a week is expected, and a written report is required at the end of the quarter.

Restriction: Earth System Science Honors students only. Campuswide Honors Collegium students only.

**EARTHSS H199C. Honors Research in Earth System Science. 4 Units.**

Undergraduate honors research in Earth System Science. A student commitment of 10-15 hours a week is expected, and a written report is required at the end of the quarter.

Restriction: Earth System Science Honors students only. Campuswide Honors Collegium students only.

**EARTHSS 200. Global Physical Climatology. 4 Units.**

A descriptive overview of Earth's climate system and energy budget. Large-scale circulations, key physical processes, and climate sensitivity of the atmosphere, ocean, land surface, and cryosphere.

Restriction: Graduate students only.

**EARTHSS 201. Paleoclimatology . 4 Units.**

Explores past changes in Earth's climate. Topics include tools and techniques used to reconstruct past climate from natural archives; records and mechanisms of past climate changes throughout Earth history; and lessons learned from the paleo-record for predication of future climate.

Restriction: Graduate students only.

Concurrent with EARTHSS 101.

**EARTHSS 202. Climate Change. 4 Units.**

Explores past, present, and projected changes in Earth's climate. Topics include paleoclimate records and mechanisms of natural climate variability at a range of timescales (orbital to seasonal); General Circulation Models; and IPCC observations and projections of future climate change.

Restriction: Graduate students only.

**EARTHSS 204. Humans in the Earth System. 4 Units.**

Focuses on the human systems of energy and food production which have the greatest effects on the Earth system. Assess the physical mechanisms and feedbacks of human-nature interactions and consider approaches of mitigation, interventions, and adaptation.

Restriction: Graduate students only. Earth System Science Majors only.

**EARTHSS 212. Geoscience Modeling and Data Analysis. 4 Units.**

Computer-based course. Fundamental statistical techniques needed to analyze Earth system data and models. Basic numerical techniques to solve Earth system models. Focuses on linear and non-linear ordinary differential equations, as well as simple partial differential equations.

Restriction: Graduate students only.

**EARTHSS 215. Cryosphere. 4 Units.**

A global perspective of the major components of the cryosphere. Includes current extent and trends, mass balance, energetics, and physical processes. Quantitative assessment of current state, in situ and remote observations, and interactions with climate.

Restriction: Graduate students only.

**EARTHSS 224. Ocean Processes. 4 Units.**

Introduction to the physics, chemistry, and biology of the oceans. Offers a mechanistic perspective of the structure and functioning of marine ecosystems, nutrient cycles, and role of ecosystem dynamics in local and global biogeochemistry.

Restriction: Graduate students only.

**EARTHSS 225. Marine Biogeochemistry. 4 Units.**

Overview of ocean biology and biogeochemistry, with a focus on lower trophic levels and the roles of biota in the marine biogeochemical cycles of key elements.

Restriction: Doctor of Philosophy Degree students have first consideration for enrollment. Graduate students only. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 226. Land Surface Processes. 4 Units.**

A mechanistic perspective of the structure and functioning of terrestrial ecosystems. Includes processes such as nutrient cycling, biogeochemical cycling, mass balance, energetics, terrestrial hydrology, and water cycle.

Restriction: Graduate students only.

**EARTHSS 228. Geophysical Fluid Dynamics. 4 Units.**

Introduces fluid dynamical processes that determine the large-scale flow of the atmosphere and ocean, with particular emphasis on the interactions between the stable density stratification and the Coriolis force associated with Earth's rotation.

Restriction: Graduate students only.

**EARTHSS 230. Physical Oceanography. 4 Units.**

Physical processes that determine the distribution of water properties such as salt and temperature. Fluid-dynamical underpinnings of physical oceanography. Wave motions. The wind-driven and thermohaline circulation. Similarities and differences between ocean and atmosphere dynamics.

Prerequisite: MATH 2D and PHYSICS 7A and PHYSICS 7B and PHYSICS 7E

Restriction: Graduate students only.

**EARTHSS 238. Satellite Remote Sensing for Earth System Science. 4 Units.**

Satellite remote sensing data are increasingly used to study the Earth system. Provides an overview of the principles behind remote sensing, and the types of satellite data available for study of the oceans, land, and atmosphere.

**EARTHSS 240. Atmospheric Chemistry and Physics. 4 Units.**

Examines the physical/chemical processes which determine the structure and composition of Earth's atmosphere and its role in the climate system.

Restriction: Graduate students only.

**EARTHSS 242. Advanced Atmospheric Chemistry. 4 Units.**

Chemistry of the troposphere and stratosphere. Topics include: processes controlling the lifetime and reaction pathways of chemicals in the atmosphere, the role of the atmosphere in biogeochemical cycles, and interactions between atmospheric chemistry and the physical climate system.

Restriction: Graduate students only.

**EARTHSS 244. Introduction to Atmospheric Dynamics. 4 Units.**

Covers fundamentals of atmospheric dynamics including thermodynamics, quasi-geostrophy, the weak-temperature gradient of the tropics, and the turbulent boundary layer.

Restriction: Graduate students only.

**EARTHSS 248. Marine Ecosystems and Global Change. 4 Units.**

Presents an overview of marine ecosystem structure, diversity, and processes in the context of global change, including the impacts of climate warming, ocean acidification, marine fisheries, and anthropogenic additions of nutrients and pollutants.

Prerequisite: EARTHSS 224

Restriction: Graduate students only.

Concurrent with EARTHSS 148.

**EARTHSS 252. Environmental Isotope Geochemistry. 4 Units.**

Covers the fundamentals of stable, radioactive, and radiogenic isotope variability in the Earth System. Focuses on theory, measurement techniques, biogeochemistry, hydrology, ecology, and climate related applications.

Restriction: Graduate students only.

Concurrent with EARTHSS 152.

**EARTHSS 256. Paleoclimatology and Paleoceanography. 4 Units.**

Explores past changes in Earth's climate. Topics include tools and techniques used to reconstruct past climate from natural archives; records and mechanisms of past climate changes throughout Earth history; and lessons learned from the paleo-record for prediction of future climate.

Restriction: Graduate students only.

**EARTHSS 264. Ecosystem Ecology . 4 Units.**

A mechanistic perspective on ecosystem processes. Covers ecosystem development, element cycling, and interactions with plants and microbes. The role of ecosystems in environmental change is also addressed.

Prerequisite: CHEM 51C

Concurrent with EARTHSS 164 and BIO SCI E118.

**EARTHSS 266. Global Biogeochemical Cycles. 4 Units.**

Global biogeochemical cycling of the elements. Topics include global cycling of carbon, nitrogen, oxygen, and sulfur; impact of human activities on biogeochemical processes.

Restriction: Graduate students only.

**EARTHSS 280A. Special Topics in Earth System Science. 1-4 Units.**

Each quarter is devoted to current topics in the field of Earth System Science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**EARTHSS 280B. Special Topics in Earth System Science. 1-4 Units.**

Each quarter is devoted to current topics in the field of Earth System Science. Topics addressed vary each quarter.

Prerequisite: EARTHSS 280A

Repeatability: Unlimited as topics vary.

**EARTHSS 280C. Special Topics in Earth System Science. 1-4 Units.**

Each quarter is devoted to current topics in the field of Earth System Science. Topics addressed vary each quarter.

Prerequisite: EARTHSS 280B

Repeatability: Unlimited as topics vary.

**EARTHSS 282C. Special Topics in Climate. 1-4 Units.**

Each quarter is devoted to in-depth analysis of an important and rapidly developing area in the field of climate dynamics. Topics addressed vary each quarter.

Prerequisite: EARTHSS 282B

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EARTHSS 286A. Special Topics in Biogeochemistry. 1-4 Units.**

Each quarter is devoted to in-depth analysis of a subarea in biogeochemistry which is undergoing rapid development. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EARTHSS 286B. Special Topics in Biogeochemistry. 1-4 Units.**

Each quarter is devoted to in-depth analysis of a subarea in biogeochemistry which is undergoing rapid development. Topics addressed vary each quarter.

Prerequisite: EARTHSS 286A

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EARTHSS 286C. Special Topics in Biogeochemistry. 1-4 Units.**

Each quarter is devoted to in-depth analysis of a subarea in biogeochemistry which is undergoing rapid development. Topics addressed vary each quarter.

Prerequisite: EARTHSS 286B

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EARTHSS 288C. Special Topics in Ecosystems. 1-4 Units.**

Each quarter is devoted to current topics relating to Ecosystems. Topics addressed vary each quarter.

Prerequisite: EARTHSS 288B

Repeatability: Unlimited as topics vary.

**EARTHSS 290. Seminar. 1 Unit.**

Weekly seminars and discussions on topics of general and current interest in Earth System Science. Topics addressed vary each quarter.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EARTHSS 298. Practicum in Earth System Science. 4 Units.**

Designed to introduce first-year graduate students to research. Students explore research opportunities and develop a proposal for a summer research project under the direction of a faculty mentor.

Restriction: Graduate students only.

**EARTHSS 299. Research. 2-12 Units.**

Supervised original research in areas of Earth System Science.

Repeatability: May be repeated for credit unlimited times.

**EARTHSS 399. University Teaching. 1-4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Mathematics Courses

**MATH 1A. Pre-Calculus. 4 Workload Units.**

Basic equations and inequalities, linear and quadratic functions, and systems of simultaneous equations.

Grading Option: Workload Credit Letter Grade with P/NP.

**MATH 1B. Pre-Calculus. 4 Units.**

Preparation for calculus and other mathematics courses. Exponentials, logarithms, trigonometry, polynomials, and rational functions. Satisfies no requirements other than contribution to the 180 units required for graduation.

Prerequisite: MATH 1A. Placement into MATH 1B via the Calculus Placement exam, or a score of 450 or higher on the Mathematics section of the SAT Reasoning Test.

Restriction: MATH 1B may not be taken for credit if taken after MATH 2A.

**MATH 2A. Single-Variable Calculus. 4 Units.**

Introduction to derivatives, calculation of derivatives of algebraic and trigonometric functions; applications including curve sketching, related rates, and optimization. Exponential and logarithm functions.

Prerequisite: MATH 1B or AP Calculus AB or SAT Mathematics or ACT Mathematics. MATH 1B with a grade of C or better. AP Calculus AB with a minimum score of 3. SAT Mathematics with a minimum score of 650. ACT Mathematics with a minimum score of 29. Placement via the Calculus Placement exam (fee required) is also accepted.

Overlaps with MATH 5A.

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment.

**(Vb)**

**MATH 2B. Single-Variable Calculus. 4 Units.**

Definite integrals; the fundamental theorem of calculus. Applications of integration including finding areas and volumes. Techniques of integration. Infinite sequences and series.

Prerequisite: MATH 2A or MATH 5A or AP Calculus AB or AP Calculus BC. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment.

**(Vb)**

**MATH 2D. Multivariable Calculus. 4 Units.**

Differential and integral calculus of real-valued functions of several real variables, including applications. Polar coordinates.

Prerequisite: MATH 2B or MATH 5B or AP Calculus BC. AP Calculus BC with a minimum score of 4

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**(Vb)**

**MATH 2E. Multivariable Calculus. 4 Units.**

The differential and integral calculus of vector-valued functions. Implicit and inverse function theorems. Line and surface integrals, divergence and curl, theorems of Greens, Gauss, and Stokes.

Prerequisite: MATH 2D or MATH H2D

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment.

**MATH H2D. Honors Multivariable Calculus. 4 Units.**

Differential and integral calculus of real-valued functions of several real variables, including applications. Polar coordinates. Covers the same material as MATH 2D-E, but with a greater emphasis on the theoretical structure of the subject matter.

Prerequisite: MATH 2B or MATH 5B or (AP Calculus BC and (MATH H3A) or (MATH 3A and MATH 13)). MATH 2B with a grade of A or better. MATH 5B with a grade of A or better. AP Calculus BC with a minimum score of 5. MATH H3A with a grade of B- or better. MATH 3A with a grade of A or better. MATH 13 with a grade of A or better

Overlaps with MATH 2D.

**(Vb)**

**MATH H2E. Honors Multivariable Calculus. 4 Units.**

Differential and integral calculus of real-valued functions of several real variables, including applications. Polar coordinates. Covers the same material as MATH 2D-E, but with a greater emphasis on the theoretical structure of the subject matter.

Prerequisite: MATH H2D. MATH H2D with a grade of B- or better

Overlaps with MATH 2E.

**MATH 3A. Introduction to Linear Algebra. 4 Units.**

Systems of linear equations, matrix operations, determinants, eigenvalues and eigenvectors, vector spaces, subspaces, and dimension.

Prerequisite: MATH 2B or MATH 5B or AP Calculus BC. AP Calculus BC with a minimum score of 4

Overlaps with ICS 6N.

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**(Vb)**

**MATH 3D. Elementary Differential Equations. 4 Units.**

Linear differential equations, variation of parameters, constant coefficient cookbook, systems of equations, Laplace transforms, series solutions.

Prerequisite: (MATH 3A or MATH H3A) and (MATH 2D or MATH H2D) and (MATH 2B or AP Calculus BC). AP Calculus BC with a minimum score of 4

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment.

**MATH H3A. Honors Introduction to Linear Algebra. 4 Units.**

Systems of linear equations, matrix operations, determinants, eigenvalues, eigenvectors, vector spaces, subspaces, and dimension.

Prerequisite: MATH 2B or MATH 5B or AP Calculus BC. MATH 2B with a grade of A or better. MATH 5B with a grade of A or better. AP Calculus BC with a minimum score of 5

Overlaps with MATH 3A, ICS 6N.

Restriction: School of Physical Sciences students only. School of Engineering students only. Mathematics Majors only. Undeclared Majors only.

**MATH 5A. Calculus for Life Sciences. 4 Units.**

Differential calculus with applications to life sciences. Exponential, logarithmic, and trigonometric functions. Limits, differentiation techniques, optimization and difference equations.

Prerequisite: MATH 1B or AP Calculus AB or SAT Mathematics or ACT Mathematics. MATH 1B with a grade of C or better. AP Calculus AB with a minimum score of 3. SAT Mathematics with a minimum score of 650. ACT Mathematics with a minimum score of 29. Placement via the Calculus Placement exam (fee required) is also accepted.

Overlaps with MATH 2A.

Restriction: School of Biological Sciences students have first consideration for enrollment.

**(Vb)**

**MATH 5B. Calculus for Life Sciences. 4 Units.**

Integral calculus and multivariable calculus with applications to life sciences. Integration techniques, applications of the integral, phase plane methods and basic modeling, basic multivariable methods.

Prerequisite: MATH 5A or MATH 2A or AP Calculus AB or AP Calculus BC. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3

Restriction: School of Biological Sciences students have first consideration for enrollment. Cannot be taken for credit after MATH 2B.

**(Vb)**

**MATH 7A. Single-Variable Calculus I. 4 Units.**

Introduction to derivatives, calculation of derivatives of algebraic and trigonometric functions; applications including curve sketching, related rates, and optimization. Exponential and logarithm functions.

Prerequisite: MATH 1B or AP Calculus AB or SAT Mathematics or ACT Mathematics. MATH 1B with a grade of C or better. AP Calculus AB with a minimum score of 3. SAT Mathematics with a minimum score of 650. ACT Mathematics with a minimum score of 29. Placement via the Calculus Placement exam (fee required) is also accepted.

Overlaps with MATH 2A, MATH 5A.

Restriction: Mathematics Majors only.

**(Vb)**

**MATH 7B. Single-Variable Calculus II. 4 Units.**

Definite integrals; the fundamental theorem of calculus. Applications of integration including finding areas and volumes. Techniques of integration. Infinite sequences and series.

Prerequisite: MATH 2A or MATH 5A or AP Calculus AB or AP Calculus BC or MATH 7A. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3

Overlaps with MATH 2B, MATH 5B.

Restriction: Mathematics Majors only.

**(Vb)**

**MATH 8. Explorations in Functions and Modeling. 4 Units.**

Explorations of applications and connections in topics in algebra, geometry, calculus, and statistics for future secondary math educators. Emphasis on nonstandard modeling problems.

Prerequisite or corequisite: MATH 2A or AP Calculus AB or AP Calculus BC. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3

**MATH 9. Introduction to Programming for Numerical Analysis. 4 Units.**

Introduction to computers and programming using Matlab and Mathematica. Representation of numbers and precision, input/output, functions, custom data types, testing/debugging, reading exceptions, plotting data, numerical differentiation, basics of algorithms. Analysis of random processes using computer simulations.

Prerequisite: MATH 2A

Restriction: Mathematics Majors have first consideration for enrollment.

**(II and Vb ).**

**MATH 10. Introduction to Programming for Data Science. 4 Units.**

Intro to algorithms in data science using Python and R. Basic concepts of Python, store, access, and manipulate data in lists; functions, methods, and packages; NumPy, Numerical stability, and accuracy. Gradient descent and Newton's method. Basics of R Programming.

Prerequisite or corequisite: (MATH 2D or MATH H2D) and (MATH 3A or MATH H3A) and MATH 9

Restriction: Mathematics Majors have first consideration for enrollment.

**(II and VB ).**

**MATH 13. Introduction to Abstract Mathematics. 4 Units.**

Introduction to formal definition and rigorous proof writing in mathematics. Topics include basic logic, set theory, equivalence relations, and various proof techniques such as direct, induction, contradiction, contrapositive, and exhaustion.

Prerequisite: MATH 2A or ICS 6D

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 105A. Numerical Analysis I. 4 Units.**

Introduction to the theory and practice of numerical computation with an emphasis on solving equations. Solving transcendental equations; linear systems, Gaussian elimination, QR factorization, iterative methods, eigenvalue computation, power method.

Corequisite: MATH 105LA

Prerequisite: MATH 3A or MATH H3A. Familiarity with computer programming is required.

Overlaps with MAE 185.

**MATH 105B. Numerical Analysis II. 4 Units.**

Introduction to the theory and practice of numerical computation with an emphasis on topics from calculus and approximation theory. Lagrange interpolation; Gaussian quadrature; Fourier series and transforms; Methods from data science including least squares and L1 regression.

Corequisite: MATH 105LB

Prerequisite: MATH 105A

**MATH 105LA. Numerical Analysis Laboratory. 1 Unit.**

Provides practical experience to complement the theory developed in Mathematics 105A.

Corequisite: MATH 105A

**MATH 105LB. Numerical Analysis Laboratory. 1 Unit.**

Provides practical experience to complement the theory developed in Mathematics 105B.

Corequisite: MATH 105B

**MATH 107. Numerical Differential Equations. 4 Units.**

Theory and applications of numerical methods to initial and boundary-value problems for ordinary and partial differential equations.

Corequisite: MATH 107L

Prerequisite: MATH 3D and MATH 105A and MATH 105B

**MATH 107L. Numerical Differential Equations Laboratory. 1 Unit.**

Provides practical experience to complement the theory developed in Mathematics 107.

Corequisite: MATH 107

**MATH 110A. Optimization I. 4 Units.**

Introduction to optimization, linear search method, trust region method, Newton method, linear programming, linear, and non-linear least square methods.

Prerequisite or corequisite: (MATH 2D or MATH H2D) and (MATH 3A or MATH H3A) and MATH 10 and MATH 121A and MATH 121B

**MATH 110B. Optimization II. 4 Units.**

The simplex method, interior point method, penalty barrier method, primal dual method, augmented Lagrangian method, and stochastic gradient method.

Prerequisite: MATH 110A. MATH 110A with a grade of C or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 112A. Introduction to Partial Differential Equations and Applications. 4 Units.**

Introduction to ordinary and partial differential equations and their applications in engineering and science. Basic methods for classical PDEs (potential, heat, and wave equations). Classification of PDEs, separation of variables and series expansions, special functions, eigenvalue problems.

Prerequisite: (MATH 2E or MATH H2E) and MATH 3D

**MATH 112B. Introduction to Partial Differential Equations and Applications. 4 Units.**

Introduction to partial differential equations and their applications in engineering and science. Basic methods for classical PDEs (potential, heat, and wave equations). Green functions and integral representations, method of characteristics.

Prerequisite: MATH 112A

**MATH 112C. Introduction to Partial Differential Equations and Applications. 4 Units.**

Nonhomogeneous problems and Green's functions, Sturm-Liouville theory, general Fourier expansions, applications of partial differential equations in different areas of science.

Prerequisite: MATH 112B

**MATH 113A. Mathematical Modeling in Biology. 4 Units.**

Discrete mathematical and statistical models; difference equations, population dynamics, Markov chains, and statistical models in biology.

Prerequisite: MATH 2B or MATH 5B

**MATH 113B. Mathematical Modeling in Biology. 4 Units.**

Linear algebra; differential equations models; dynamical systems; stability; hysteresis; phase plane analysis; applications to cell biology, viral dynamics, and infectious diseases.

Prerequisite: MATH 2B or AP Calculus BC or MATH 5B. AP Calculus BC with a minimum score of 4

**MATH 115. Mathematical Modeling. 4 Units.**

Mathematical modeling and analysis of phenomena that arise in engineering physical sciences, biology, economics, or social sciences.

Prerequisite: MATH 112A and (MATH 2D or MATH H2D) and (MATH 3A or MATH H3A) and MATH 3D

**MATH 117. Dynamical Systems. 4 Units.**

Introduction to the modern theory of dynamical systems including contraction mapping principle, fractals and chaos, conservative systems, Kepler problem, billiard models, expanding maps, Smale's horseshoe, topological entropy.

Prerequisite: MATH 3D and MATH 140A

**MATH 118. The Theory of Differential Equations. 4 Units.**

Existence and uniqueness of solutions, continuous dependence of solutions on initial conditions and parameters, Lyapunov and asymptotic stability, Floquet theory, nonlinear systems, and bifurcations.

Prerequisite: MATH 3D and MATH 140A

**MATH 120A. Introduction to Abstract Algebra: Groups. 4 Units.**

Axioms for group theory; permutation groups, matrix groups. Isomorphisms, homomorphisms, quotient groups. Advanced topics as time permits. Special emphasis on doing proofs.

Prerequisite: (MATH 3A or MATH H3A) and MATH 13. MATH 13 with a grade of C or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 120B. Introduction to Abstract Algebra: Rings and Fields. 4 Units.**

Basic properties of rings; ideals, quotient rings; polynomial and matrix rings. Elements of field theory.

Prerequisite: MATH 120A. MATH 120A with a grade of C- or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 120C. Introduction to Abstract Algebra: Galois Theory. 4 Units.**

Galois Theory: proof of the impossibility of certain ruler-and-compass constructions (squaring the circle, trisecting angles); nonexistence of analogues to the 'quadratic formula' for polynomial equations of degree 5 or higher.

Prerequisite: MATH 120B

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH H120A. Honors Introduction to Graduate Algebra I. 5 Units.**

Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, and symmetric operators. Introduction to groups, rings, and fields, including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials, and Galois groups.

Prerequisite: (MATH 3A or MATH H3A) and MATH 13 and (MATH 120A or MATH 121A). MATH 13 with a grade of A or better. MATH 120A with a grade of A or better. MATH 121A with a grade of A or better

Restriction: Mathematics Honors students only.

Concurrent with MATH 206A.

**MATH H120B. Honors Introduction to Graduate Algebra II. 5 Units.**

Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, and symmetric operators. Introduction to groups, rings, and fields, including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials, and Galois groups.

Prerequisite: MATH H120A

Restriction: Mathematics Honors students only.

Concurrent with MATH 206B.

**MATH H120C. Honors Introduction to Graduate Algebra III. 5 Units.**

Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, and symmetric operators. Introduction to groups, rings, and fields, including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials, and Galois groups.

Prerequisite: MATH H120B

Restriction: Mathematics Honors students only.

Concurrent with MATH 206C.

**MATH 121A. Linear Algebra. 4 Units.**

Introduction to modern abstract linear algebra. Special emphasis on students doing proofs. Vector spaces, linear independence, bases, dimension. Linear transformations and their matrix representations. Theory of determinants.

Prerequisite: (MATH 3A or MATH H3A) and MATH 13. MATH 13 with a grade of C or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 121B. Linear Algebra. 4 Units.**

Introduction to modern abstract linear algebra. Special emphasis on students doing proofs. Canonical forms; inner products; similarity of matrices.

Prerequisite: MATH 121A

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 130A. Probability I. 4 Units.**

Combinatorial probability, conditional probabilities, independence, discrete and continuous random variables, expectation and variance, common probability distributions.

Prerequisite: (MATH 2A or AP Calculus BC or AP Calculus AB) and (MATH 2B or AP Calculus BC) and (MATH 3A or MATH H3A). AP Calculus BC with a minimum score of 3. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 4

**MATH 130B. Probability II. 4 Units.**

Joint distributions, sums of independent random variables, conditional distributions and conditional expectation, covariances, moment generating functions, limit theorems.

Prerequisite: MATH 130A or MATH 131A or STAT 120A

**MATH 130C. Stochastic Processes. 4 Units.**

Markov chains, Brownian motion, Gaussian processes, applications to option pricing and Markov chain Monte Carlo methods.

Prerequisite: MATH 130B

**MATH 133A. Statistical Methods with Applications to Finance. 4 Units.**

Overview of probability, statistics, and financial concepts: distribution, point estimation, confidence interval, linear regression, hypothesis testing, principal component analysis, financial applications.

Prerequisite: MATH 130A or MATH 131A or STAT 120A

**MATH 133B. Statistical Methods with Applications to Finance. 4 Units.**

Overview of markets and options: asset modeling, Brownian motion, risk neutrality, option pricing, value at risk, MC simulations.

Prerequisite: MATH 133A

**MATH 133C. Statistical Methods with Applications to Finance. 4 Units.**

Overview of interest theory, time value of money, annuities/cash flows with payments that are not contingent, loans, sinking funds, bonds, general cash flow and portfolios, immunization, duration and convexity, swaps.

Prerequisite: MATH 133B

**MATH 134A. Fixed Income. 4 Units.**

Overview of interest theory, time value of money, annuities/cash flows with payments that are not contingent, loans, sinking funds, bonds, general cash flow and portfolios, immunization, duration and convexity, swaps.

Prerequisite: MATH 130A or STAT 120A

Overlaps with MATH 133C.

**MATH 134B. Mathematics of Financial Derivatives. 4 Units.**

General derivatives; call/put options; hedging and investment strategies: spreads and collars; risk management; forwards and futures; bonds.

Prerequisite: MATH 134A or MATH 133C

Overlaps with MATH 133A.

**MATH 134C. Mathematical Models for Finance. 4 Units.**

General properties of options: option contracts (call and put options, European, American and exotic options); binomial option pricing model, Black-Scholes option pricing model; risk-neutral pricing formula using Monte-Carlo simulation; option greeks and risk management; interest rate derivatives, Markowitz portfolio theory.

Prerequisite: MATH 134B or MATH 133A

Overlaps with MATH 133B.

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 140A. Elementary Analysis. 4 Units.**

Introduction to real analysis, including convergence of sequence, infinite series, differentiation and integration, and sequences of functions. Students are expected to do proofs.

Prerequisite: (MATH 2B or AP Calculus BC) and (MATH 2D or MATH H2D) and (MATH 3A or MATH H3A) and MATH 13. AP Calculus BC with a minimum score of 4. MATH 13 with a grade of C or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 140B. Elementary Analysis. 4 Units.**

Introduction to real analysis including convergence of sequences, infinite series, differentiation and integration, and sequences of functions. Students are expected to do proofs.

Prerequisite: MATH 140A. MATH 140A with a grade of C- or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 140C. Analysis in Several Variables . 4 Units.**

Rigorous treatment of multivariable differential calculus. Jacobians, Inverse and Implicit Function theorems.

Prerequisite: MATH 140B

**MATH H140A. Honors Introduction to Graduate Analysis I. 5 Units.**

Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.

Prerequisite: (MATH 2E or MATH H2E) and (MATH 3A or MATH H3A) and MATH 13 and MATH 121A and MATH 140A and MATH 140B. MATH 2E with a grade of A or better. MATH H2E with a grade of A or better. MATH 13 with a grade of A or better. MATH 140A with a grade of A or better. MATH 140B with a grade of A or better

Restriction: Mathematics Honors students only.

Concurrent with MATH 205A.

**MATH H140B. Honors Introduction to Graduate Analysis II. 5 Units.**

Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.

Prerequisite: MATH H140A

Restriction: Mathematics Honors students only.

Concurrent with MATH 205B.

**MATH H140C. Honors Introduction to Graduate Analysis III. 5 Units.**

Construction of the real number system; topology of the real line; concepts of continuity, differential, and integral calculus; sequences and series of functions, equicontinuity, metric spaces, multivariable differential, and integral calculus; implicit functions, curves and surfaces.

Prerequisite: MATH H140B

Restriction: Mathematics Honors students only.

Concurrent with MATH 205C.

**MATH 141. Introduction to Topology. 4 Units.**

The elements of naive set theory and the basic properties of metric spaces. Introduction to topological properties.

Prerequisite: MATH 140A

**MATH 147. Complex Analysis. 4 Units.**

Rigorous treatment of basic complex analysis: analytic functions, Cauchy integral theory and its consequences, power series, residue calculus, harmonic functions, conformal mapping. Students are expected to do proofs.

Prerequisite or corequisite: MATH 140A and MATH 140B

Restriction: MATH 114A may not be taken for credit after MATH 147.

**MATH 150. Introduction to Mathematical Logic. 4 Units.**

First order logic through the Completeness Theorem for predicate logic.

Prerequisite: MATH 13 or (ICS 6B and ICS 6D). MATH 13 with a grade of C- or better

Overlaps with LPS 105B, PHIL 105B.

**MATH 161. Modern Geometry. 4 Units.**

Euclidean Geometry; Hilbert's Axioms; Absolute Geometry; Hyperbolic Geometry; the Poincare Models; and Geometric Transformations.

Prerequisite: MATH 13 or (ICS 6B and ICS 6D). MATH 13 with a grade of C- or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 162A. Introduction to Differential Geometry. 4 Units.**

Applications of advanced calculus and linear algebra to the geometry of curves and surfaces in space.

Prerequisite: (MATH 2E or MATH H2E) and (MATH 3A or MATH H3A) and MATH 3D

**MATH 162B. Introduction to Differential Geometry. 4 Units.**

Applications of advanced calculus and linear algebra to the geometry of curves and surfaces in space.

Prerequisite: MATH 162A

**MATH 173A. Introduction to Cryptology. 4 Units.**

Introduction to some of the mathematics used in the making and breaking of codes, with applications to classical ciphers and public key systems. Includes topics from number theory, probability, and abstract algebra.

Prerequisite: (MATH 2B or AP Calculus BC) and (MATH 3A or MATH H3A) and MATH 13 or (ICS 6B and ICS 6D). AP Calculus BC with a minimum score of 4. MATH 13 with a grade of C or better

**MATH 173B. Introduction to Cryptology. 4 Units.**

Introduction to some of the mathematics used in the making and breaking of codes, with applications to classical ciphers and public key systems. The mathematics which is covered includes topics from number theory, probability, and abstract algebra.

Prerequisite: MATH 173A

**MATH 175. Combinatorics . 4 Units.**

Introduction to combinatorics including basic counting principles, permutations, combinations, binomial coefficients, inclusion-exclusion, derangements, ordinary and exponential generating functions, recurrence relations, Catalan numbers, Stirling numbers, and partition numbers.

Prerequisite: (MATH 2B or AP Calculus BC) and MATH 13. AP Calculus BC with a minimum score of 4. MATH 13 with a grade of C or better

**MATH 176. Mathematics of Finance. 4 Units.**

After reviewing tools from probability, statistics, and elementary differential and partial differential equations, concepts such as hedging, arbitrage, Puts, Calls, the design of portfolios, the derivation and solution of the Blac-Scholes, and other equations are discussed.

Prerequisite: MATH 3A or MATH H3A

Same as ECON 135.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Mathematics Majors have first consideration for enrollment.

**MATH 180A. Number Theory. 4 Units.**

Introduction to number theory and applications. Divisibility, prime numbers, factorization. Arithmetic functions. Congruences. Quadratic residue. Diophantine equations. Introduction to cryptography.

Prerequisite: (MATH 3A or MATH H3A) and MATH 13. MATH 13 with a grade of C or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 180B. Number Theory. 4 Units.**

Introduction to number theory and applications. Analytic number theory, character sums, finite fields, discrete logarithm, computational complexity. Introduction to coding theory. Other topics as time permits.

Prerequisite: MATH 180A

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 184. History of Mathematics. 4 Units.**

Topics vary from year to year. Some possible topics: mathematics in ancient times; the development of modern analysis; the evolution of geometric ideas. Students will be assigned individual topics for term papers.

Corequisite: MATH 184L

Prerequisite: MATH 120A and MATH 140A

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 184L. History of Mathematics Lesson Lab. 1 Unit.**

Aspiring math teachers research, design, present, and peer review middle school or high school math lessons that draw from history of mathematics topics.

Corequisite: MATH 184

Prerequisite: PS 5

**MATH 192. Studies in the Learning and Teaching of Secondary Mathematics. 2 Units.**

Focus is on historic and current mathematical concepts related to student learning and effective math pedagogy, with fieldwork in grades 6-14.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**MATH 194. Problem Solving Seminar. 2 Units.**

Develops ability in analytical thinking and problem solving, using problems of the type found in the Mathematics Olympiad and the Putnam Mathematical Competition. Students taking the course in fall will prepare for and take the Putnam examination in December.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**MATH 195W. Mathematical Writing. 4 Units.**

Techniques of mathematical writing and communication. Covers effectively writing mathematical papers, creating effective presentations, and communicating mathematics in a variety of media. Focuses on utilizing LaTeX for typesetting mathematics.

Prerequisite: MATH 120A or MATH 121A or MATH 140A. MATH 120A with a grade of C or better. MATH 121A with a grade of C or better. MATH 140A with a grade of C or better. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Mathematics Majors have first consideration for enrollment.

**(Ib)****MATH 199A. Special Studies in Mathematics. 2-4 Units.**

Supervised reading. For outstanding undergraduate Mathematics majors in supervised but independent reading or research of mathematical topics.

Repeatability: Unlimited as topics vary.

**MATH 199B. Special Studies in Mathematics. 2-4 Units.**

Supervised reading. For outstanding undergraduate Mathematics majors in supervised but independent reading or research of mathematical topics.

Repeatability: Unlimited as topics vary.

**MATH 199C. Special Studies in Mathematics. 2-4 Units.**

Supervised reading. For outstanding undergraduate Mathematics majors in supervised but independent reading or research of mathematical topics.

Repeatability: Unlimited as topics vary.

**MATH 205A. Introduction to Graduate Analysis. 5 Units.**

Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.

Prerequisite: (MATH 2E or MATH H2E) and (MATH 3A MATH H3A) and MATH 13. MATH 2E with a grade of A or better. MATH H2E with a grade of A or better. MATH 13 with a grade of C or better

Concurrent with MATH H140A.

**MATH 205B. Introduction to Graduate Analysis. 5 Units.**

Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.

Prerequisite: MATH 205A

Concurrent with MATH H140B.

**MATH 205C. Introduction to Graduate Analysis. 5 Units.**

Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.

Prerequisite: MATH 205B

Concurrent with MATH H140C.

**MATH 206A. Introduction to Graduate Algebra. 5 Units.**

Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, symmetric operators. Introduction to groups, rings, and fields including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials, and Galois groups.

Prerequisite: MATH 3A or MATH H3A

Concurrent with MATH H120A.

**MATH 206B. Introduction to Graduate Algebra. 5 Units.**

Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, symmetric operators. Introduction to groups, rings, and fields including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials, and Galois groups.

Prerequisite: MATH 206A

Concurrent with MATH H120B.

**MATH 206C. Introduction to Graduate Algebra. 5 Units.**

Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, symmetric operators. Introduction to groups, rings, and fields including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials, and Galois groups.

Prerequisite: MATH 206B

Concurrent with MATH H120C.

**MATH 210A. Real Analysis. 4 Units.**

Measure theory, Lebesgue integral, signed measures, Radon-Nikodym theorem, functions of bounded variation and absolutely continuous functions, classical Banach spaces,  $L_p$  spaces, integration on locally compact spaces and the Riesz-Markov theorem, measure and outer measure, product measure spaces.

Prerequisite: MATH 140C

**MATH 210B. Real Analysis. 4 Units.**

Measure theory, Lebesgue integral, signed measures, Radon-Nikodym theorem, functions of bounded variation and absolutely continuous functions, classical Banach spaces,  $L_p$  spaces, integration on locally compact spaces and the Riesz-Markov theorem, measure and outer measure, product measure spaces.

Prerequisite: MATH 210A

**MATH 210C. Real Analysis. 4 Units.**

Measure theory, Lebesgue integral, signed measures, Radon-Nikodym theorem, functions of bounded variation and absolutely continuous functions, classical Banach spaces,  $L_p$  spaces, integration on locally compact spaces and the Riesz-Markov theorem, measure and outer measure, product measure spaces.

Prerequisite: MATH 210B

**MATH 218A. Introduction to Manifolds and Geometry. 4 Units.**

General topology and fundamental groups, covering space; Stokes theorem on manifolds, selected topics on abstract manifold theory.

Prerequisite: MATH 205C

**MATH 218B. Introduction to Manifolds and Geometry. 4 Units.**

General topology and fundamental groups, covering space; Stokes theorem on manifolds, selected topics on abstract manifold theory.

Prerequisite: MATH 218A

**MATH 218C. Introduction to Manifolds and Geometry. 4 Units.**

General topology and fundamental groups, covering space; Stokes theorem on manifolds, selected topics on abstract manifold theory.

Prerequisite: MATH 218B

**MATH 220A. Analytic Function Theory. 4 Units.**

Standard theorems about analytic functions. Harmonic functions. Normal families. Conformal mapping.

Prerequisite: MATH 140C

**MATH 220B. Analytic Function Theory. 4 Units.**

Standard theorems about analytic functions. Harmonic functions. Normal families. Conformal mapping.

Prerequisite: MATH 220A

**MATH 220C. Analytic Function Theory. 4 Units.**

Standard theorems about analytic functions. Harmonic functions. Normal families. Conformal mapping.

Prerequisite: MATH 220B

**MATH 222A. Several Complex Variables and Complex Geometry. 4 Units.**

Several Complex variables,  $\bar{\partial}$ -bar problems, mappings, Kaehler geometry, de Rham and Dolbeault Theorems, Chern Classes, Hodge Theorems, Calabi conjecture, Kahler-Einstein geometry, Monge-Ampere.

Prerequisite: MATH 218C and MATH 220C

**MATH 225A. Introduction to Numerical Analysis and Scientific Computing. 4 Units.**

Introduction to fundamentals of numerical analysis from an advanced viewpoint. Error analysis, approximation of functions, nonlinear equations.

Prerequisite: MATH 3D and (MATH 105A and MATH 105B) or (MATH 140A and MATH 140B) and MATH 121A and (MATH 112A or MAE 140)

Restriction: Graduate students only.

**MATH 225B. Introduction to Numerical Analysis and Scientific Computing. 4 Units.**

Introduction to fundamentals of numerical analysis from an advanced viewpoint. Numerical linear algebra, numerical solutions of differential equations; stability.

Prerequisite: MATH 225A

Restriction: Graduate students only.

**MATH 225C. Introduction to Numerical Analysis and Scientific Computing. 4 Units.**

Introduction to fundamentals of numerical analysis from an advanced viewpoint. Numerical linear algebra, numerical solutions of differential equations; stability.

Prerequisite: MATH 225B

Restriction: Graduate students only.

**MATH 226A. Computational Differential Equations. 4 Units.**

Finite difference and finite element methods. Quick treatment of functional and nonlinear analysis background: weak solution,  $L_p$  spaces, Sobolev spaces. Approximation theory. Fourier and Petrov-Galerkin methods; mesh generation. Elliptic, parabolic, hyperbolic cases in 226A-B-C, respectively.

Prerequisite: MATH 3D and (MATH 112A or MAE 140) and (MATH 140B or MATH 105B)

**MATH 226B. Computational Differential Equations. 4 Units.**

Finite difference and finite element methods. Quick treatment of functional and nonlinear analysis background: weak solution,  $L_p$  spaces, Sobolev spaces. Approximation theory. Fourier and Petrov-Galerkin methods; mesh generation. Elliptic, parabolic, hyperbolic cases in 226A-B-C, respectively.

Prerequisite: MATH 226A

**MATH 226C. Computational Differential Equations. 4 Units.**

Finite difference and finite element methods. Quick treatment of functional and nonlinear analysis background: weak solution,  $L_p$  spaces, Sobolev spaces. Approximation theory. Fourier and Petrov-Galerkin methods; mesh generation. Elliptic, parabolic, hyperbolic cases in 226A-B-C, respectively.

Prerequisite: MATH 226B

**MATH 227A. Mathematical and Computational Biology. 4 Units.**

Analytical and numerical methods for dynamical systems, temporal-spatial dynamics, steady state, stability, stochasticity. Application to life sciences: genetics, tissue growth and patterning, cancers, ion channels gating, signaling networks, morphogen gradients. Analytical methods.

Prerequisite: (MATH 2A or AP Calculus BC or AP Calculus AB) and (MATH 2B or AP Calculus BC or MATH 5B) and (MATH 3A or MATH H3A). AP Calculus BC with a minimum score of 3. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 4

**MATH 227B. Mathematical and Computational Biology. 4 Units.**

Analytical and numerical methods for dynamical systems, temporal-spatial dynamics, steady state, stability, stochasticity. Application to life sciences: genetics, tissue growth and patterning, cancers, ion channels gating, signaling networks, morphogen gradients. Numerical simulations.

Prerequisite: MATH 227A

**MATH 227C. Mathematical and Computational Biology . 4 Units.**

Analytical and numerical methods for dynamical systems, temporal-spatial dynamics, steady state, stability, stochasticity. Application to life sciences: genetics, tissue growth and patterning, cancers, ion channels gating, signaling networks, morphogen gradients. Probabilistic methods.

Prerequisite: MATH 227A

Same as CS 285.

**MATH 230A. Algebra. 4 Units.**

Elements of the theories of groups, rings, fields, modules. Galois theory. Modules over principal ideal domains. Artinian, Noetherian, and semisimple rings and modules.

Prerequisite: MATH 120A and MATH 121A and MATH 121B

**MATH 230B. Algebra. 4 Units.**

Elements of the theories of groups, rings, fields, modules. Galois theory. Modules over principal ideal domains. Artinian, Noetherian, and semisimple rings and modules.

Prerequisite: MATH 230A

**MATH 230C. Algebra. 4 Units.**

Elements of the theories of groups, rings, fields, modules. Galois theory. Modules over principal ideal domains. Artinian, Noetherian, and semisimple rings and modules.

Prerequisite: MATH 230B

**MATH 232A. Algebraic Number Theory. 4 Units.**

Algebraic integers, prime ideals, class groups, Dirichlet unit theorem, localization, completion, Cebotarev density theorem, L-functions, Gauss sums, diophantine equations, zeta functions over finite fields. Introduction to class field theory.

Prerequisite: MATH 230C

**MATH 232B. Algebraic Number Theory. 4 Units.**

Algebraic integers, prime ideals, class groups, Dirichlet unit theorem, localization, completion, Cebotarev density theorem, L-functions, Gauss sums, diophantine equations, zeta functions over finite fields. Introduction to class field theory.

Prerequisite: MATH 232A

**MATH 232C. Algebraic Number Theory. 4 Units.**

Algebraic integers, prime ideals, class groups, Dirichlet unit theorem, localization, completion, Cebotarev density theorem, L-functions, Gauss sums, diophantine equations, zeta functions over finite fields. Introduction to class field theory.

Prerequisite: MATH 232B

**MATH 233A. Algebraic Geometry. 4 Units.**

Basic commutative algebra and classical algebraic geometry. Algebraic varieties, morphisms, rational maps, blow ups. Theory of schemes, sheaves, divisors, cohomology. Algebraic curves and surfaces, Riemann-Roch theorem, Jacobians, classification of curves and surfaces.

Prerequisite: MATH 230C

**MATH 233B. Algebraic Geometry. 4 Units.**

Basic commutative algebra and classical algebraic geometry. Algebraic varieties, morphisms, rational maps, blow ups. Theory of schemes, sheaves, divisors, cohomology. Algebraic curves and surfaces, Riemann-Roch theorem, Jacobians, classification of curves and surfaces.

Prerequisite: MATH 233A

**MATH 233C. Algebraic Geometry. 4 Units.**

Basic commutative algebra and classical algebraic geometry. Algebraic varieties, morphisms, rational maps, blow ups. Theory of schemes, sheaves, divisors, cohomology. Algebraic curves and surfaces, Riemann-Roch theorem, Jacobians, classification of curves and surfaces.

Prerequisite: MATH 233B

**MATH 235A. Mathematics of Cryptography. 4 Units.**

Mathematics of public key cryptography: encryption and signature schemes; RSA; factoring; primality testing; discrete log based cryptosystems, elliptic and hyperelliptic curve cryptography and additional topics as determined by the instructor.

Prerequisite: MATH 230C

**MATH 239A. Analytic Methods in Arithmetic Geometry. 4 Units.**

Riemann zeta function, Dirichlet L-functions, prime number theorem, zeta functions over finite fields, sieve methods, zeta functions of algebraic curves, algebraic coding theory, L-Functions over number fields, L-functions of modular forms, Eisenstein series.

Prerequisite: MATH 220C and MATH 230C

**MATH 239B. Analytic Methods in Arithmetic Geometry. 4 Units.**

Riemann zeta function, Dirichlet L-functions, prime number theorem, zeta functions over finite fields, sieve methods, zeta functions of algebraic curves, algebraic coding theory, L-Functions over number fields, L-functions of modular forms, Eisenstein series.

Prerequisite: MATH 239A

**MATH 239C. Analytic Methods in Arithmetic Geometry. 4 Units.**

Riemann zeta function, Dirichlet L-functions, prime number theorem, zeta functions over finite fields, sieve methods, zeta functions of algebraic curves, algebraic coding theory, L-Functions over number fields, L-functions of modular forms, Eisenstein series.

Prerequisite: MATH 239B

**MATH 240A. Differential Geometry. 4 Units.**

Riemannian manifolds, connections, curvature and torsion. Submanifolds, mean curvature, Gauss curvature equation. Geodesics, minimal submanifolds, first and second fundamental forms, variational formulas. Comparison theorems and their geometric applications. Hodge theory applications to geometry and topology.

**MATH 240B. Differential Geometry. 4 Units.**

Riemannian manifolds, connections, curvature and torsion. Submanifolds, mean curvature, Gauss curvature equation. Geodesics, minimal submanifolds, first and second fundamental forms, variational formulas. Comparison theorems and their geometric applications. Hodge theory applications to geometry and topology.

Prerequisite: MATH 240A

**MATH 240C. Differential Geometry. 4 Units.**

Riemannian manifolds, connections, curvature and torsion. Submanifolds, mean curvature, Gauss curvature equation. Geodesics, minimal submanifolds, first and second fundamental forms, variational formulas. Comparison theorems and their geometric applications. Hodge theory applications to geometry and topology.

Prerequisite: MATH 240B

**MATH 245A. Topics in Differential Geometry. 4 Units.**

Studies in selected areas of differential geometry, a continuation of MATH 240A-MATH 240B-MATH 240C. Topics addressed vary each quarter.

Prerequisite: MATH 240C

Repeatability: Unlimited as topics vary.

**MATH 245B. Topics in Differential Geometry. 4 Units.**

Studies in selected areas of differential geometry, a continuation of MATH 240A-MATH 240B-MATH 240C. Topics addressed vary each quarter.

Prerequisite: MATH 245A

Repeatability: Unlimited as topics vary.

**MATH 245C. Topics in Differential Geometry. 4 Units.**

Studies in selected areas of differential geometry, a continuation of MATH 240A-MATH 240B-MATH 240C. Topics addressed vary each quarter.

Prerequisite: MATH 245B

Repeatability: Unlimited as topics vary.

**MATH 250A. Algebraic Topology. 4 Units.**

Provides fundamental materials in algebraic topology: fundamental group and covering space, homology and cohomology theory, and homotopy group.

Prerequisite: MATH 230A

**MATH 250B. Algebraic Topology. 4 Units.**

Provides fundamental materials in algebraic topology: fundamental group and covering space, homology and cohomology theory, and homotopy group.

Prerequisite: MATH 250A

**MATH 250C. Algebraic Topology. 4 Units.**

Provides fundamental materials in algebraic topology: fundamental group and covering space, homology and cohomology theory, and homotopy group.

Prerequisite: MATH 250B

**MATH 260A. Functional Analysis. 4 Units.**

Normed linear spaces, Hilbert spaces, Banach spaces, Stone-Weierstrass Theorem, locally convex spaces, bounded operators on Banach and Hilbert spaces, the Gelfand-Neumark Theorem for commutative  $C^*$ -algebras, the spectral theorem for bounded self-adjoint operators, unbounded operators on Hilbert spaces.

Prerequisite: MATH 210C and MATH 220C

**MATH 260B. Functional Analysis. 4 Units.**

Normed linear spaces, Hilbert spaces, Banach spaces, Stone-Weierstrass Theorem, locally convex spaces, bounded operators on Banach and Hilbert spaces, the Gelfand-Neumark Theorem for commutative  $C^*$ -algebras, the spectral theorem for bounded self-adjoint operators, unbounded operators on Hilbert spaces.

Prerequisite: MATH 260A

**MATH 260C. Functional Analysis. 4 Units.**

Normed linear spaces, Hilbert spaces, Banach spaces, Stone-Weierstrass Theorem, locally convex spaces, bounded operators on Banach and Hilbert spaces, the Gelfand-Neumark Theorem for commutative  $C^*$ -algebras, the spectral theorem for bounded self-adjoint operators, unbounded operators on Hilbert spaces.

Prerequisite: MATH 260B

**MATH 270A. Probability. 4 Units.**

Probability spaces, distribution and characteristic functions. Strong limit theorems. Limit distributions for sums of independent random variables. Conditional expectation and martingale theory. Stochastic processes.

Prerequisite: MATH 130C and MATH 210C

**MATH 270B. Probability. 4 Units.**

Probability spaces, distribution and characteristic functions. Strong limit theorems. Limit distributions for sums of independent random variables. Conditional expectation and martingale theory. Stochastic processes.

Prerequisite: MATH 270A

**MATH 270C. Probability. 4 Units.**

Probability spaces, distribution and characteristic functions. Strong limit theorems. Limit distributions for sums of independent random variables. Conditional expectation and martingale theory. Stochastic processes.

Prerequisite: MATH 270B

**MATH 271A. Stochastic Processes. 4 Units.**

Processes with independent increments, Wiener and Gaussian processes, function space integrals, stationary processes, Markov processes.

Prerequisite: MATH 210C

Overlaps with STAT 270.

**MATH 271B. Stochastic Processes. 4 Units.**

Processes with independent increments, Wiener and Gaussian processes, function space integrals, stationary processes, Markov processes.

Prerequisite: MATH 271A

Overlaps with STAT 270.

**MATH 271C. Stochastic Processes. 4 Units.**

Processes with independent increments, Wiener and Gaussian processes, function space integrals, stationary processes, Markov processes.

Prerequisite: MATH 271B

Overlaps with STAT 270.

**MATH 280A. Mathematical Logic. 4 Units.**

Basic set theory; models, compactness, and completeness; basic model theory; Incompleteness and Gödel's Theorems; basic recursion theory; constructible sets.

**MATH 280B. Mathematical Logic. 4 Units.**

Basic set theory; models, compactness, and completeness; basic model theory; Incompleteness and Gödel's Theorems; basic recursion theory; constructible sets.

Prerequisite: MATH 280A

**MATH 280C. Mathematical Logic. 4 Units.**

Basic set theory; models, compactness, and completeness; basic model theory; Incompleteness and Gödel's Theorems; basic recursion theory; constructible sets.

Prerequisite: MATH 280B

**MATH 281A. Set Theory. 4 Units.**

Ordinals, cardinals, cardinal arithmetic, combinatorial set theory, models of set theory, Gödel's constructible universe, forcing, large cardinals, iterate forcing, inner model theory, fine structure.

Prerequisite: MATH 280C

**MATH 281B. Set Theory. 4 Units.**

Ordinals, cardinals, cardinal arithmetic, combinatorial set theory, models of set theory, Gödel's constructible universe, forcing, large cardinals, iterate forcing, inner model theory, fine structure.

Prerequisite: MATH 281A

**MATH 281C. Set Theory. 4 Units.**

Ordinals, cardinals, cardinal arithmetic, combinatorial set theory, models of set theory, Gödel's constructible universe, forcing, large cardinals, iterate forcing, inner model theory, fine structure.

Prerequisite: MATH 281B

**MATH 282A. Model Theory. 4 Units.**

Languages, structures, compactness and completeness. Model-theoretic constructions. Omitting types theorems. Morley's theorem. Ranks, forking. Model completeness. O-minimality. Applications to algebra.

Prerequisite: MATH 280C

**MATH 282B. Model Theory. 4 Units.**

Languages, structures, compactness and completeness. Model-theoretic constructions. Omitting types theorems. Morley's theorem. Ranks, forking. Model completeness. O-minimality. Applications to algebra.

Prerequisite: MATH 282A

**MATH 282C. Model Theory. 4 Units.**

Languages, structures, compactness and completeness. Model-theoretic constructions. Omitting types theorems. Morley's theorem. Ranks, forking. Model completeness. O-minimality. Applications to algebra.

Prerequisite: MATH 282B

**MATH 285A. Topics in Mathematical Logic. 4 Units.**

Studies in selected areas of mathematical logic, a continuation of MATH 280A-MATH 280B-MATH 280C. Topics addressed vary each quarter.

Prerequisite: MATH 280C

Repeatability: Unlimited as topics vary.

**MATH 290A. Methods in Applied Mathematics. 4 Units.**

Introduction to ODEs and dynamical systems: existence and uniqueness. Equilibria and periodic solutions. Bifurcation theory. Perturbation methods: approximate solution of differential equations. Multiple scales and WKB. Matched asymptotic. Calculus of variations: direct methods, Euler-Lagrange equation. Second variation and Legendre condition.

**MATH 290B. Methods in Applied Mathematics. 4 Units.**

Introduction to ODEs and dynamical systems: existence and uniqueness. Equilibria and periodic solutions. Bifurcation theory. Perturbation methods: approximate solution of differential equations. Multiple scales and WKB. Matched asymptotic. Calculus of variations: direct methods, Euler-Lagrange equation. Second variation and Legendre condition.

Prerequisite: MATH 290A

**MATH 290C. Methods in Applied Mathematics. 4 Units.**

Introduction to ODEs and dynamical systems: existence and uniqueness. Equilibria and periodic solutions. Bifurcation theory. Perturbation methods: approximate solution of differential equations. Multiple scales and WKB. Matched asymptotic. Calculus of variations: direct methods, Euler-Lagrange equation. Second variation and Legendre condition.

Prerequisite: MATH 290B

**MATH 295A. Partial Differential Equations. 4 Units.**

Theory and techniques for linear and nonlinear partial differential equations. Local and global theory of partial differential equations: analytic, geometric, and functional analytic methods.

Prerequisite: MATH 210C and MATH 112B and MATH 112C

**MATH 295B. Partial Differential Equations. 4 Units.**

Theory and techniques for linear and nonlinear partial differential equations. Local and global theory of partial differential equations: analytic, geometric, and functional analytic methods.

Prerequisite: MATH 295A

**MATH 295C. Partial Differential Equations. 4 Units.**

Theory and techniques for linear and nonlinear partial differential equations. Local and global theory of partial differential equations: analytic, geometric, and functional analytic methods.

Prerequisite: MATH 295B

**MATH 296. Topics in Partial Differential Equations. 4 Units.**

Studies in selected areas of partial differential equations, a continuation of MATH 295A-MATH 295B-MATH 295C. Topics addressed vary each quarter.

Prerequisite: MATH 295C

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**MATH 297. Mathematics Colloquium. 1 Unit.**

Weekly colloquia on topics of current interest in mathematics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**MATH 298A. Seminar . 2 Units.**

Seminars organized for detailed discussion of research problems of current interest in the Department. The format, content, frequency, and course value are variable.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**MATH 298B. Seminar . 2 Units.**

Seminars organized for detailed discussion of research problems of current interest in the Department. The format, content, frequency, and course value are variable.

Prerequisite: MATH 298A

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**MATH 298C. Seminar . 2 Units.**

Seminars organized for detailed discussion of research problems of current interest in the Department. The format, content, frequency, and course value are variable.

Prerequisite: MATH 298B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**MATH 299A. Supervised Reading and Research. 1-12 Units.**

Supervised reading and research with Mathematics faculty.

Repeatability: May be repeated for credit unlimited times.

**MATH 299B. Supervised Reading and Research. 1-12 Units.**

Supervised reading and research with Mathematics faculty.

Prerequisite: MATH 299A

Repeatability: May be repeated for credit unlimited times.

**MATH 299C. Supervised Reading and Research. 1-12 Units.**

Supervised reading and research with Mathematics faculty.

Prerequisite: MATH 299B

Repeatability: May be repeated for credit unlimited times.

**MATH 399. University Teaching. 1-4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Physical Sciences Courses

**PHY SCI 5. California Teach 1: Introduction to Science and Mathematics Teaching. 3 Units.**

First in a series for students interested in becoming middle or high school teachers of mathematics or science. Students gain an understanding of effective, research-based teaching strategies. Includes supervised field experience in a K-12 classroom.

Same as BIO SCI 14.

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment. School of Engineering students have first consideration for enrollment.

**PHY SCI 80. Skills Development. 1.5 Workload Unit.**

Undergraduates identify, cultivate, and practice relevant soft skills applicable to careers in mathematics and science. The focus is on career readiness, how to market oneself to future employers, and what to expect from the professional world.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Grading Option: Workload Credit Letter Grade with P/NP.

Restriction: School of Physical Sciences students have first consideration for enrollment.

**PHY SCI 105. California Teach 2: Middle School Science and Mathematics Teaching. 3 Units.**

Second in a series for students interested in becoming middle or high school teachers of mathematics or science. Students gain an understanding of effective, research-based teaching strategies for grades 6-8. Includes supervised field experience in a middle school classroom.

Prerequisite: PHY SCI 5

Same as BIO SCI 101.

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment. School of Engineering students have first consideration for enrollment.

**PHY SCI 139W. Technical Writing and Communication Skills. 4 Units.**

Workshop in writing technical reports, journal articles, proposals. Oral presentations. Communicating with the public. May not be used in satisfaction of any School or departmental requirement.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. School of Physical Sciences students have first consideration for enrollment.

(Ib)

**PHY SCI 220. Science Communication Skills. 2 Units.**

Development of effective communication skills, oral and written presentations. Topics range from the art of creating keynote slides to strategically crafting a personal story, culminating in a live presentation to an invited audience.

## Physics and Astronomy Courses

**PHYSICS 2. Introduction to Mathematical Methods for Physics. 4 Units.**

Provides the applied mathematics and problem solving/presentation skills necessary for success in an introductory physics sequence. Focuses on practical exercises in problem solving. Covers kinematics in one and two dimensions in detail. Additional topics include vectors, differentiation, and integration.

Prerequisite or corequisite: MATH 2A or MATH 5A or AP Calculus AB or AP Calculus BC. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3

Restriction: PHYSICS 2 may not be taken for credit if taken after PHYSICS 7C.

**PHYSICS 3A. Basic Physics I. 4 Units.**

Vectors; motion, force, and energy.

Corequisite: MATH 2A or MATH 5A, or a score of 4 or higher on the AP Calculus AB exam, or a score of 3 or higher on the AP Calculus BC exam.

Restriction: PHYSICS 3A may not be taken for credit if taken after PHYSICS 7C.

(II and VA ).

**PHYSICS 3B. Basic Physics II. 4 Units.**

Fluids; heat; electricity and magnetism.

Prerequisite: PHYSICS 3A or AP Physics C: Mechanics. AP Physics C: Mechanics with a minimum score of 5

(II and VA ).

**PHYSICS 3C. Basic Physics III. 4 Units.**

Waves and sound; optics; quantum ideas; atomic and nuclear physics; relativity.

Corequisite: MATH 2B or MATH 5B, or a score of 4 or higher on the AP Calculus BC exam.

Prerequisite: PHYSICS 3A or AP Physics C: Mechanics. AP Physics C: Mechanics with a minimum score of 5

(II and Va ).

**PHYSICS 3LB. Basic Physics Laboratory. 1.5 Unit.**

Practical applications of electronics and classical physics to biology. Goals include skill to use oscilloscope and other basic instrumentation. Materials fee.

**PHYSICS 3LC. Basic Physics Laboratory. 1.5 Unit.**

Practical applications of physics to medical imaging. Topics include optics, radioactivity, and acoustics. Materials fee.

**PHYSICS 7C. Classical Physics. 4 Units.**

Topics include force, energy, momentum, rotation, and gravity.

Corequisite: MATH 2B or AP CALCULUS BC, min score = 4.

Prerequisite: PHYSICS 2 or (MATH 2D and (CHEM 1C or CHEM H2C or CHEM M3C) or CHEM M2C) or AP Physics C: Mechanics or AP Physics C: Electricity and Magnetism or SAT Mathematics or ACT Mathematics. PHYSICS 2 with a grade of C or better. AP Physics C: Mechanics with a minimum score of 4. AP Physics C: Electricity and Magnetism with a minimum score of 4. SAT Mathematics with a minimum score of 650. ACT Mathematics with a minimum score of 27. Recommended: One year of high school physics or equivalent physics background.

Restriction: Physics Majors have first consideration for enrollment.

(II and VA ).

**PHYSICS 7D. Classical Physics. 4 Units.**

Electricity and magnetism.

Corequisite: PHYSICS 7LD and MATH 2D

Prerequisite: PHYSICS 7C and (MATH 2B or AP Calculus BC). AP Calculus BC with a minimum score of 4

Restriction: Physics Majors have first consideration for enrollment.

(II and Va ).

**PHYSICS 7E. Classical Physics. 4 Units.**

Fluids; oscillations; waves; and optics.

Prerequisite: PHYSICS 7C and MATH 2B

Restriction: Physics Majors have first consideration for enrollment.

(II and VA ).

**PHYSICS 7LC. Classical Physics Laboratory. 1 Unit.**

Experiments related to lecture topics in Physics 7C. Materials fee.

Corequisite: PHYSICS 7C

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 7LD. Classical Physics Laboratory. 1 Unit.**

Electricity and magnetism.

Corequisite: PHYSICS 7D

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 12. Science Fiction and Science Fact. 4 Units.**

An introduction to fundamental physics principles, the scientific process, and the mathematical language of science, used to analyze topics drawn from superheroes, science fiction works, and current science news to distinguish science fiction and science fact.

Overlaps with PHYSICS 21.

(II and VA ).

**PHYSICS 14. Energy and the Environment. 4 Units.**

The physics of society's energy production and consumption, and of their influences on the environment. Topics include fossil and renewable energy resources; nuclear power; prospects for a hydrogen economy; efficient and environmentally benign transportation; efficient home and commercial energy usage.

(II, Va)

**PHYSICS 15. Physics of Music. 4 Units.**

Introduces basic physical principles underlying generation and properties of music, including basic properties of sound waves, musical scales and temperament, musical instruments, and acoustics of music halls. No mathematics background required, but high school algebra is recommended.

(II)

**PHYSICS 17. Physics of Athletics. 4 Units.**

Introduces basic physical principles behind motion. Examples are drawn from a range of athletic endeavors (such as ice skating, baseball, diving, and dance). No mathematics background required, but high school algebra is recommended.

(II)

**PHYSICS 18. How Things Work. 4 Units.**

Survey of the physical basis of modern technology, with an emphasis on electronics and materials. Topics include power generation and distribution, communication (radio, TV, telephone, computers, tape recorders, CD players), imaging (optics, x-rays, MRI), and modern materials (alloys, semiconductors, superconductors).

(II)

**PHYSICS 19. Great Ideas of Physics. 4 Units.**

Introduces non-science majors to physics, examining important breakthroughs and controversies. Potential topics: Einstein's Relativity; Heisenberg's Uncertainty Principle; black holes; extra-dimensions; antimatter. Case studies illustrate the essential nature of scientific review and independent confirmation of results. No mathematics background required.

(II)

**PHYSICS 20A. Introduction to Astronomy. 4 Units.**

History of astronomy. Underlying physics. Objects in the solar system and how they are studied. Properties of stars: their formation, structure, and evolution. Pulsars and black holes. Galaxies and quasars.

(II and VA ).

**PHYSICS 20B. Cosmology: Humanity's Place in the Universe. 4 Units.**

An overview of the origin, evolution, and ultimate fate of the Universe. Galaxies and dark matter. The Big Bang and dark energy. Ancient world models.

(II and VA ).

**PHYSICS 20D. Space Science. 4 Units.**

Space exploration. Human missions to the moon, Mars, and beyond. Space stations, observatories, and deep-space probes. Robots and drones on distant worlds. Propulsion mechanisms, rockets, space flight, and the dangers of solar radiation.

(II and VA ).

**PHYSICS 20E. Life in the Universe. 4 Units.**

An overview of the scientific quest to discover life elsewhere in the universe. Topics include the origin of life on Earth, Mars, extra-solar planets, interstellar travel, and extra-terrestrial intelligence.

(II, Va)

**PHYSICS 21. Special Topics in Physics. 4 Units.**

Topics addressed vary each quarter. Past topics have included physics and music, Newton, planetary science. Lectures on areas of special interest in physics used to introduce students to scientific method, fundamental laws of science, qualitative and quantitative analysis of data.

Repeatability: Unlimited as topics vary.

Overlaps with PHYSICS 12, PHYSICS XI12.

(II)

**PHYSICS 50. Introductory Mathematical Physics. 4 Units.**

Introduction to math methods for upper-division physics. Taylor and Fourier series; complex algebra; ordinary differential equations; matrices, tensors and vector spaces; eigensystems; orthogonal coordinates; vector calculus and fields. Symbolic computation with Mathematica is incorporated throughout.

Corequisite: MATH 2E

Prerequisite: MATH 3A

Overlaps with PHYSICS 100.

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 51A. Modern Physics. 4 Units.**

Wave-particle duality; quantum mechanics; special relativity; statistical mechanics.

Prerequisite: (PHYSICS 7E or PHYSICS 3C) and MATH 2D

Overlaps with PHYSICS 61A.

Restriction: No Physics Majors.

**PHYSICS 52A. Fundamentals of Experimental Physics. 2 Units.**

Optics: lenses, mirrors, polarization, lasers, optical fibers, interference, spectra. Materials fee.

Corequisite: PHYSICS 7E or PHYSICS 3C.

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 52B. Fundamentals of Experimental Physics. 2 Units.**

Circuits: oscilloscope, meters, DC and AC circuits. Materials fee.

Prerequisite: PHYSICS 7D or PHYSICS 3B

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 52C. Fundamentals of Experimental Physics. 2 Units.**

Data analysis: random and systematic errors, curve fitting; nuclear counting; quantum experiments. Error analysis: random and systematic errors, curve fitting, nuclear counting, and quantum experiments. Materials fee.

Prerequisite: PHYSICS 51A or PHYSICS 61A

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 53. Introduction to Programming and Numerical Analysis. 4 Units.**

Introduction to structured programming; in-depth training in python. Elementary numerical methods applied to physics problems.

Prerequisite: MATH 3A and MATH 3D

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 60. Thermal Physics. 4 Units.**

Introduction to thermodynamics and systems of many particles. Topics include first and second laws of thermodynamics, ideal gas laws, kinetic theory, heat engines and refrigerators, thermodynamic potentials, phase transitions, dilute solutions, chemical equilibrium, and basic statistical distributions.

Prerequisite: (PHYSICS 7E or PHYSICS 3C) and MATH 2D

Restriction: Physics Majors only.

**PHYSICS 61A. Modern Physics for Majors. 4 Units.**

Wave-particle duality; Schrödinger equation; angular momentum.

Prerequisite: (PHYSICS 7E or PHYSICS 3C) and MATH 2D

Overlaps with PHYSICS 51A.

Restriction: Physics Majors only.

**PHYSICS 61B. Modern Physics for Majors. 4 Units.**

Atomic transitions; molecules; solids; nuclei; elementary particles; cosmological models.

Prerequisite: PHYSICS 61A or PHYSICS 51A

Overlaps with PHYSICS 51B.

Restriction: Physics Majors only.

**PHYSICS 61C. Introduction to Astrophysics. 4 Units.**

Introduction to fundamental topics in astrophysics, including stellar structure and evolution; stellar remnants; detection and characterization of exoplanets; physics of interstellar gas and star-forming regions.

Prerequisite: PHYSICS 61A or PHYSICS 51A

**PHYSICS H80. Impact of World War I on Science. 4 Units.**

Introduction to science in 1914 and WWI. Participants in groups of two or three will pick a preferred science; find out what happened to it during and after the war; write reports and present what they learned.

Restriction: Campuswide Honors Collegium students only.

**(II)**

**PHYSICS H90. The Idiom and Practice of Science. 4 Units.**

A series of fundamental and applied scientific problems of social relevance. Possible topics include Newton's Law, calculus, earthquake physics, and radiation.

Restriction: Campuswide Honors Collegium students only.

**(II, Va)**

**PHYSICS 99. Current Topics in Physics. 2 Units.**

Designed to introduce undergraduate students to current topics in physics. Focus is discussion of selected readings on current research issues.

Repeatability: Unlimited as topics vary.

**PHYSICS 100. Computational Methods. 4 Units.**

Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.

Overlaps with PHYSICS 50.

Concurrent with PHYSICS 229A.

**PHYSICS 106W. Advanced Data Acquisition, Analysis, and Scientific Writing. 4 Units.**

Introduces modern practical laboratory techniques for developing data interface devices, acquiring and analyzing data, and writing up results in manuscript format. Experiments include interfacing with instruments through software and hardware development, PID controller, Fourier analysis, and lock-in amplifier.

Prerequisite: PHYSICS 52B and PHYSICS 194

Concurrent with PHYSICS 206 and CHEM 206.

(Ib)

**PHYSICS 111A. Classical Mechanics. 4 Units.**

One-dimensional motion and oscillations; three-dimensional motion, non-inertial coordinates, conservation laws, and Lagrangian and Hamiltonian dynamics; rigid body motion and relativity.

Corequisite: PHYSICS 50

Prerequisite: (PHYSICS 7E or PHYSICS 3C)

**PHYSICS 111B. Classical Mechanics. 4 Units.**

One-dimensional motion and oscillations; three-dimensional motion, non-inertial coordinates, conservation laws, and Lagrangian and Hamiltonian dynamics; rigid body motion and relativity.

Prerequisite: PHYSICS 111A

**PHYSICS 112A. Electromagnetic Theory. 4 Units.**

Electric, magnetic, and gravitational fields and potentials; electrodynamics; mechanical and electromagnetic waves and radiation.

Prerequisite: (PHYSICS 7D or PHYSICS 3B) and PHYSICS 50

**PHYSICS 112B. Electromagnetic Theory. 4 Units.**

Electric, magnetic, and gravitational fields and potentials; electrodynamics; mechanical and electromagnetic waves and radiation.

Prerequisite: PHYSICS 7E and PHYSICS 112A

**PHYSICS 113A. Quantum Physics. 4 Units.**

Inadequacy of classical physics; time independent and time dependent Schrodinger equation; systems in one, two, and three dimensions; matrices; Hermitian operators; symmetries; angular momentum; perturbation theory; scattering theory; applications to atomic structure; emphasis on phenomenology.

Prerequisite: (PHYSICS 51A or PHYSICS 61A) and PHYSICS 50

**PHYSICS 113B. Quantum Physics. 4 Units.**

Inadequacy of classical physics; time independent and time dependent Schrodinger equation; systems in one, two, and three dimensions; matrices; Hermitian operators; symmetries; angular momentum; perturbation theory; scattering theory; applications to atomic structure; emphasis on phenomenology.

Prerequisite: PHYSICS 111B and PHYSICS 112B and PHYSICS 113A

**PHYSICS 113C. Quantum Physics. 4 Units.**

Inadequacy of classical physics; time independent and time dependent Schrodinger equation; systems in one, two, and three dimensions; matrices; Hermitian operators; symmetries; angular momentum; perturbation theory; scattering theory; applications to atomic structure; emphasis on phenomenology.

Prerequisite: PHYSICS 111B and PHYSICS 112B and PHYSICS 113B

**PHYSICS 115A. Statistical Physics. 4 Units.**

Microscopic theory of temperature, heat, and entropy; kinetic theory; multicomponent systems; quantum statistics.

Prerequisite: PHYSICS 50 and (PHYSICS 60 or CHEM 1C or ENGRMAE 91)

**PHYSICS 116. Relativity and Black Holes. 4 Units.**

Introduces students to both special and general relativity; includes the formalism of four-vectors, equivalence principle, curved space-time, and modern issues with black holes.

Prerequisite: PHYSICS 50 and PHYSICS 111A

**PHYSICS 120. Electronics for Scientists. 4 Units.**

Applications of modern semiconductor devices to physical instrumentation. Characteristics of semiconductor devices, integrated circuits, analog and digital circuits. Materials fee.

Prerequisite: PHYSICS 52B

Concurrent with PHYSICS 220.

**PHYSICS 121W. Advanced Laboratory. 4 Units.**

Experiments in atomic, condensed matter, nuclear, particle, and plasma physics. Introduction to instrumentation and a first experience in the research laboratory.

Prerequisite: (PHYSICS 51B or PHYSICS 61B or PHYSICS 61C) and (PHYSICS 52C or PHYSICS 193) and (PHYSICS 194 or EDUC 143BW)

Repeatability: May be taken for credit 3 times.

Restriction: Physics Majors only.

(Ib)

**PHYSICS 125A. Mathematical Physics. 4 Units.**

Complex variables; Legendre and Bessel functions; complete sets of orthogonal functions; partial differential equations; integral equations; calculus of variations; coordinate transformations; special functions and series.

Prerequisite: PHYSICS 50 and MATH 3D

**PHYSICS 125B. Mathematical Physics. 4 Units.**

Complex variables; Legendre and Bessel functions; complete sets of orthogonal functions; partial differential equations; integral equations; calculus of variations; coordinate transformations; special functions and series.

Prerequisite: PHYSICS 125A and PHYSICS 113A

**PHYSICS 133. Introduction to Condensed Matter Physics. 4 Units.**

Phenomena of solids and their interpretation in terms of quantum theory.

Prerequisite: PHYSICS 113B and PHYSICS 115A

**PHYSICS 134A. Physical and Geometrical Optics. 4 Units.**

Focuses on the practical aspects of optics and optical engineering, starting at the fundamentals. Topics include geometrical optics, ray tracing, polarization optics, interferometers, and diffractive optics.

Corequisite: PHYSICS 112B

Prerequisite: PHYSICS 112A

Concurrent with CBEMS 242A and CHEM 242A.

**PHYSICS 135. Plasma Physics. 4 Units.**

Basic concepts, orbits, kinetic and fluid equations, Coulomb collisions, fluctuations, scattering, radiation.

Prerequisite: PHYSICS 112B

Concurrent with PHYSICS 239A.

**PHYSICS 136. Introduction to Particle Physics. 4 Units.**

Experimental techniques and theoretical concepts of high-energy phenomena: accelerators and detectors; classification of particles and interactions; particle properties; symmetries and mass multiplets; production and decay mechanisms.

Prerequisite: PHYSICS 113B

**PHYSICS 137. Introduction to Cosmology. 4 Units.**

Solution of the differential equations governing the expansion of the Universe. Observational determinations of the parameters governing the expansion. Big Bang inflation, primordial nucleosynthesis, and cosmic microwave background. Dark matter, dark energy, and large-scale structure of the Universe.

Prerequisite or corequisite: PHYSICS 111A

**PHYSICS 138. Astrophysics of Galaxies. 4 Units.**

Introduction to the solar neighborhood, Milky Way, and other galaxies. Interstellar medium. Star formation. Stellar populations. Evolution of spiral, elliptical, and irregular galaxies. Supermassive black holes, quasars, and active galaxies. Galaxies as probes of the expansion rate of the Universe.

Prerequisite: PHYSICS 111A and PHYSICS 61C

**PHYSICS 139. Observational Astrophysics. 4 Units.**

Telescopes and astronomical observations, imaging with CCD detectors and image processing techniques. Photometry and spectroscopy of stars, galaxies, and quasars. Advanced imaging techniques such as deconvolution, adaptive optics, and interferometry.

Corequisite: PHYSICS 194

Prerequisite: PHYSICS 52A and PHYSICS 52B and PHYSICS 52C and PHYSICS 53

**PHYSICS 144. Stellar Astrophysics. 4 Units.**

Stars: their structure and evolution; physical state of the interior; the Hertzsprung- Russell diagram, stellar classification, and physical principles responsible for the classification; star formation; nuclear burning; giant and dwarf stars; neutron stars and black holes.

Prerequisite: (PHYSICS 51A or PHYSICS 61A) and PHYSICS 111A and PHYSICS 112A

**PHYSICS 145. High-Energy Astrophysics. 4 Units.**

Production of radiation by high-energy particles, white dwarfs, neutron stars, and black holes. Evolution of galactic nuclei, radio galaxies, quasars, and pulsars. Cosmic rays and the cosmic background radiation.

Prerequisite: (PHYSICS 51A or PHYSICS 61A) and PHYSICS 111A and PHYSICS 112A

**PHYSICS 146A. Biophysics of Molecules and Molecular Machines. 4 Units.**

Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Prerequisite: PHYSICS 115A

Concurrent with PHYSICS 230A.

**PHYSICS 146B. Biophysics of Molecules and Molecular Machines. 4 Units.**

Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Prerequisite: PHYSICS 115A

Concurrent with PHYSICS 230B.

**PHYSICS 147B. Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging. 4 Units.**

Ionizing radiation, planar and tomographic radiographic and nuclear imaging, magnetism, NMR, MRI imaging.

Prerequisite: PHYSICS 147A

Concurrent with PHYSICS 233B and EECS 202B.

**PHYSICS 147C. Techniques in Medical Imaging II: Ultrasound, Electrophysiological, Optical. 4 Units.**

Sound and ultrasound, ultrasonic imaging, physiological electromagnetism, EEG, MEG, ECG, MCG, optical properties of tissues, fluorescence and bioluminescence, MR impedance imaging, MR spectroscopy, electron spin resonance and ESR imaging.

Prerequisite: PHYSICS 147B

Concurrent with PHYSICS 233C and EECS 202C.

**PHYSICS 150. Special Topics in Physics and Astronomy. 4 Units.**

Current topics in physics. Includes topics from nano-science, biological sciences, astrophysics, and the common use of estimation across subdisciplines within physics.

Repeatability: Unlimited as topics vary.

**PHYSICS 191. Field Experience in Physics Education. 1-4 Units.**

Students develop and perform physics assemblies at neighboring public schools.

Prerequisite: PHYSICS 7C and PHYSICS 7D and PHYSICS 7E

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.

**PHYSICS 192. Tutoring in Physics. 1-2 Units.**

Formalizes the already existing free tutoring for the lower-division physics courses that is provided by the Society of Physics Students (SPS). Includes instructions on tutoring techniques.

Prerequisite: PHYSICS 7E

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 12 units.

Restriction: Society of Physics Students (SPS) tutoring program students only.

**PHYSICS 193. Research Methods. 4 Units.**

Explores tools of inquiry for developing and implementing science research projects. Students undertake independent projects requiring data collection, analysis, and modeling, and the organization and presentation of results. Additional topics include ethical issues and role of scientific literature.

Prerequisite: BIO SCI 14 or PHY SCI 5

Same as BIO SCI 108, CHEM 193.

**PHYSICS 194. Research Communication for Physics Majors. 2 Units.**

Students learn the fundamentals of communicating about research. Topics include preparing abstracts, proposals, and literature reviews. Provides preparation for presentation of independent research projects in PHYSICS 121 and PHYSICS 196.

Prerequisite: PHYSICS 61A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Physics Majors only.

**PHYSICS 195. Undergraduate Research. 4 Units.**

Independent research under the guidance of a Physics faculty member.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Juniors only. Physics Majors only.

**PHYSICS 196A. Thesis in Physics I. 2 Units.**

Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Corequisite: PHYSICS 194

Overlaps with PHYSICS H196A.

Restriction: Physics Majors only.

**PHYSICS 196B. Thesis in Physics II. 4 Units.**

Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS 196A

Overlaps with PHYSICS H196B.

Restriction: Physics Majors only.

**PHYSICS 196C. Thesis in Physics III. 4 Units.**

Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS 196B

Overlaps with PHYSICS H196C.

Restriction: Physics Majors only.

**PHYSICS H196A. Honors Thesis in Physics I. 2 Units.**

Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Corequisite: PHYSICS 194

Overlaps with PHYSICS 196A.

Restriction: Physics Majors only. Campuswide Honors Collegium students only. Honors Program in Physics students only.

**PHYSICS H196B. Honors Thesis in Physics II. 4 Units.**

Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS H196A

Overlaps with PHYSICS 196B.

Restriction: Physics Majors only. Campuswide Honors Collegium students only. Honors Program in Physics students only.

**PHYSICS H196C. Honors Thesis in Physics III. 4 Units.**

Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS H196B

Overlaps with PHYSICS 196C.

Restriction: Physics Majors only. Campuswide Honors Collegium students only. Honors Program in Physics students only.

**PHYSICS 199. Readings on Special Topics. 1-4 Units.**

Readings in selected areas of Physics. Topics addressed vary each quarter.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**PHYSICS 206. Advanced Data Acquisition and Analysis. 4-6 Units.**

Introduces students to a variety of practical laboratory techniques, including lock-in, boxcar, coincidence counting, noise filtering, PID control, properties of common transducers, computer interfacing to instruments, vacuum technology, laboratory safety, basic mechanical design, and shop skills. Materials fee.

Same as CHEM 206.

Concurrent with PHYSICS 106.

**PHYSICS 207. Applied Physical Chemistry. 4 Units.**

Introduction to fundamental concepts in molecular structure and reactivity: theory of bonding, valence and molecular orbitals; structure and reactivity in inorganic chemistry; elements in molecular group theory; nomenclature in organic chemistry; and survey of macromolecules.

Same as CHEM 207.

**PHYSICS 208. Math Methods. 4 Units.**

Applications of mathematics to physical and chemical problems. Calculus of special functions, complex variables and vectors; linear vector spaces and eigenvalue problems. Differential equations.

Same as CHEM 208.

**PHYSICS 211. Classical Mechanics. 4 Units.**

Variational principles, Lagrange's equations; applications to two body problems, small oscillation theory, and other phenomena. Hamilton's equations. Hamilton-Jacobi theory. Canonical transformations.

Restriction: Graduate students only.

**PHYSICS 212A. Mathematical Physics. 4 Units.**

Complex variables and integration; ordinary and partial differential equations; the eigenvalue problem.

Restriction: Graduate students only.

**PHYSICS 213A. Electromagnetic Theory. 4 Units.**

Electrostatics; magnetostatics; relativity; classical electron theory; fields in vacuum and matter; retardation; radiation and absorption; dispersion; propagation of light; diffraction; geometric optics; theories of the electric and magnetic properties of materials; scattering.

**PHYSICS 213B. Electromagnetic Theory. 4 Units.**

Electrostatics; magnetostatics; relativity; classical electron theory; fields in vacuum and matter; retardation; radiation and absorption; dispersion; propagation of light; diffraction; geometric optics; theories of the electric and magnetic properties of materials; scattering.

Prerequisite: PHYSICS 213A

**PHYSICS 214A. Statistical Physics. 4 Units.**

Maxwell-Boltzmann, Bose-Einstein, Fermi-Dirac statistics; ideal and imperfect gases; thermodynamic properties of solids; transport theory.

Restriction: Graduate students only.

**PHYSICS 214C. Many Body Theory. 4 Units.**

Application of field theory methods, perturbative and non-perturbative, to many particle systems; second quantization, Feynman diagrams, linear response theory, and functional integral methods applied to the ground state and at finite temperature.

Prerequisite: PHYSICS 214A and PHYSICS 215A and PHYSICS 215B

Restriction: Graduate students only.

**PHYSICS 215A. Quantum Mechanics. 4 Units.**

Foundations; Dirac notation; basic operators and their eigenstates; perturbation theory; spin.

Restriction: Graduate students only.

**PHYSICS 215B. Quantum Mechanics. 4 Units.**

Atomic physics; scattering theory, formal collision theory; semi-classical radiation theory; many body systems.

Prerequisite: PHYSICS 215A

Restriction: Graduate students only.

**PHYSICS 220. Electronics for Scientists. 4 Units.**

Applications of modern semiconductor devices to physical instrumentation. Characteristics of semiconductor devices, integrated circuits, analog and digital circuits.

Restriction: Graduate students only.

Concurrent with PHYSICS 120.

**PHYSICS 222. Continuum Mechanics. 4 Units.**

Introduction to the continuum limit and stress and strain tensors. Hydrodynamics of perfect fluids; two-dimensional problems, motion of incompressible viscous fluids, Navier Stokes equations. Basic elasticity theory. Description of viscoelastic materials. Introduction to nonlinear behavior instabilities.

**PHYSICS 223. Numerical Methods. 4 Units.**

Introduction to theory and practice of modern numerical methods. Techniques are drawn from topics such as solution of differential equations, Monte Carlo methods, Fast Fourier transforms, and evaluation of special functions.

**PHYSICS 228. Electromagnetism. 4 Units.**

Maxwell's equations, electrodynamics, electromagnetic waves and radiation, wave propagation in media, interference and quantum optics, coherent and incoherent radiation, with practical applications in interferometry, lasers, waveguides, and optical instrumentation.

Same as CHEM 228.

**PHYSICS 229A. Computational Methods. 4 Units.**

Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.

Same as CHEM 229A.

Concurrent with PHYSICS 100.

**PHYSICS 230A. Biophysics of Molecules and Molecular Machines. 4 Units.**

Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Concurrent with PHYSICS 146A.

**PHYSICS 230B. Biophysics of Molecules and Molecular Machines. 4 Units.**

Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Concurrent with PHYSICS 146B.

**PHYSICS 233A. Principles of Imaging. 4 Units.**

Linear systems, probability and random processes, image processing, projecting imaging, tomographic imaging.

Same as EECS 202A.

Restriction: Graduate students only.

Concurrent with PHYSICS 147A.

**PHYSICS 233B. Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging. 4 Units.**

Ionizing radiation, planar and tomographic radiographic and nuclear imaging, magnetism, NMR, MRI imaging.

Prerequisite: EECS 202A

Same as EECS 202B.

Restriction: Graduate students only.

Concurrent with PHYSICS 147B.

**PHYSICS 233C. Techniques in Medical Imaging II: Ultrasound, Electrophysiological, Optical. 4 Units.**

Sound and ultrasound, ultrasonic imaging, physiological electromagnetism, EEG, MEG, ECG, MCG, optical properties of tissues, fluorescence and bioluminescence, MR impedance imaging, MR spectroscopy, electron spin resonance and ESR imaging.

Prerequisite: EECS 202B

Same as EECS 202C.

Restriction: Graduate students only.

Concurrent with PHYSICS 147C.

**PHYSICS 234A. Elementary Particle Physics. 4 Units.**

Overview of Standard Model theory and phenomenology. Electromagnetic, strong and weak forces, quark model, interactions with matter, particle detectors and accelerators.

Prerequisite: PHYSICS 215B

**PHYSICS 234B. Advanced Elementary Particle Physics. 4 Units.**

$SU(3) \times SU(2) \times U(1)$  model of strong, weak, and electromagnetic interactions. K-meson system and CP violation, neutrino masses and mixing, grand-unified theories, supersymmetry, introduction to cosmology and its connection to particle physics.

Prerequisite: PHYSICS 234A and PHYSICS 235A

**PHYSICS 234C. Advanced Elementary Particle Physics. 4 Units.**

$SU(3) \times SU(2) \times U(1)$  model of strong, weak, and electromagnetic interactions. K-meson system and CP violation, neutrino masses and mixing, grand-unified theories, supersymmetry, introduction to cosmology and its connection to particle physics.

Prerequisite: PHYSICS 234A and PHYSICS 235A

**PHYSICS 235A. Quantum Field Theory. 4 Units.**

Canonical quantization, scalar field theory, Feynman diagrams, tree-level quantum electrodynamics.

Prerequisite: PHYSICS 215B

Restriction: Graduate students only.

**PHYSICS 235B. Advanced Quantum Field Theory. 4 Units.**

Pathintegral techniques, loop diagrams, regularization and renormalization, anomalies.

Prerequisite: PHYSICS 235A

Restriction: Graduate students only.

**PHYSICS 238A. Condensed Matter Physics. 4 Units.**

Bonding in solids; crystal symmetry and group theory, elastic properties of crystals; lattice vibrations, interaction of radiation with matter; cohesion of solids; the electron gas; electron energy bands in solids; ferromagnetism; transport theory; semiconductors and superconductors; many-body perturbation theory.

Prerequisite: PHYSICS 133 and (PHYSICS 214A or CHEM 232A) and (PHYSICS 215B or CHEM 231B)

**PHYSICS 238B. Condensed Matter Physics. 4 Units.**

Bonding in solids; crystal symmetry and group theory, elastic properties of crystals; lattice vibrations, interaction of radiation with matter; cohesion of solids; the electron gas; electron energy bands in solids; ferromagnetism; transport theory; semiconductors and superconductors; many-body perturbation theory.

Prerequisite: PHYSICS 238A

**PHYSICS 238C. Condensed Matter Physics. 4 Units.**

Bonding in solids; crystal symmetry and group theory, elastic properties of crystals; lattice vibrations, interaction of radiation with matter; cohesion of solids; the electron gas; electron energy bands in solids; ferromagnetism; transport theory; semiconductors and superconductors; many-body perturbation theory.

Prerequisite: PHYSICS 238B

**PHYSICS 239A. Plasma Physics. 4 Units.**

Basic concepts, orbits, kinetic and fluid equations, Coulomb collisions, fluctuations, scattering, radiation.

Restriction: Graduate students only.

Concurrent with PHYSICS 135.

**PHYSICS 239B. Plasma Physics. 4 Units.**

Magnetic confinement, MHD equilibrium and stability, collisional transport.

Prerequisite: PHYSICS 239A

Restriction: Graduate students only.

**PHYSICS 239C. Plasma Physics. 4 Units.**

Linear waves and instabilities, uniform un-magnetized and magnetized plasmas, non-uniform plasmas.

Prerequisite: PHYSICS 239B

Restriction: Graduate students only.

**PHYSICS 240A. Galactic Astrophysics. 4 Units.**

The morphology, kinematics, and evolution of our Milky Way and other galaxies. Topics include stellar formation and stellar evolution, end states of stars (supernovae, neutron stars), the distribution of stars, interstellar gas and mass in galaxies. The Local Group.

**PHYSICS 240B. Cosmology. 4 Units.**

An introduction to modern cosmology set within the context of general relativity. Topics include the expansion history of the Universe, inflation, the cosmic microwave background, density fluctuations, structure formation, dark matter, dark energy, and gravitational lensing.

**PHYSICS 240C. Radiative Processes in Astrophysics. 4 Units.**

Exploration of radiation mechanisms (electron scattering, synchrotron emission, collisional excitation, and more) and radiative transfer through matter including absorption and emission. Includes such observational astrophysics topics as spectroscopic study of atoms and nuclei, X-rays, and cosmic rays.

**PHYSICS 241A. Solar System and Extrasolar Planets. 4 Units.**

Formation, evolution, and habitability of planetary systems. Observational and theoretical study of the origin and evolution of the Solar System, present day dynamical state of the Solar System (asteroids, Kuiper Belt Objects, Oort cloud), planetary atmospheres, processes governing planetary climate.

Corequisite: PHYSICS 242

Restriction: Graduate students only.

**PHYSICS 241B. Stellar Astrophysics. 4 Units.**

Physics of stellar interiors and equations of stellar structure. Stellar atmospheres and absorption processes. Introduction to stellar winds. Thermonuclear reactions, nucleosynthesis, and solar neutrinos. Binary stars and mass accretion. White dwarfs, supernovae, neutron stars, and black holes.

Prerequisite: PHYSICS 211 and PHYSICS 240A

**PHYSICS 241C. Extragalactic Astrophysics. 4 Units.**

The physics and phenomenology of galaxies; star formation, interstellar medium, and intergalactic medium. Galaxy structure and dynamics. Galaxy evolution, stellar populations, and scaling relations; the relationship between galaxy properties and environment. Galaxy clusters and active galactic nuclei.

Prerequisite: PHYSICS 211 and PHYSICS 240A

**PHYSICS 241D. Early Universe Physics. 4 Units.**

Includes a thorough quantum treatment of the generation of perturbations during inflation and various topics related to kinetic theory in an expanding Universe. Other topics include the astrophysics and cosmology of weakly interacting particles.

Prerequisite: PHYSICS 234A and (PHYSICS 240B or PHYSICS 255)

**PHYSICS 242. Astro Fundamentals. 4 Units.**

Introduction to topics in astrophysics including measurement of stellar properties, stellar structure and evolution, stellar remnants and supernovae, the interstellar medium, exoplanets, gravitational lensing, galactic structure, extragalactic distance measurements, and the expanding universe.

Restriction: Graduate students only.

**PHYSICS 246. Special Topics in Astrophysics. 4 Units.**

Outlines and emphasizes a subarea of astrophysics that is undergoing rapid development.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 247. Special Topics in Particle Physics. 4 Units.**

Current topics in particle non-accelerator-based research fields.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 248. Special Topics in Condensed Matter Physics. 4 Units.**

Outlines and emphasizes a subarea of condensed matter physics that is undergoing rapid development.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PHYSICS 249. Special Topics in Plasma Physics. 4 Units.**

Outlines and emphasizes a subarea of plasma physics that is undergoing rapid development.

Prerequisite: PHYSICS 239A and PHYSICS 239B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PHYSICS 250. Physics and Astronomy Communications Skills. 4 Units.**

Fundamentals of effectively communicating research through written and oral platforms. Topics include writing compelling proposals and journal articles for peer review, and the development of engaging oral presentations of science results and significance to a wide range of audiences.

Restriction: Graduate students only.

**PHYSICS 255. General Relativity. 4 Units.**

An introduction to Einstein's theory of gravitation. Tensor analysis, Einstein's field equations, astronomical tests of Einstein's theory, gravitational waves.

**PHYSICS 260A. Seminar in Condensed Matter Physics. 1 Unit.**

Seminar designed to acquaint students with recent advances in solid state physics. Lecturers from the Department of Physics and Astronomy (both faculty and graduate students), other UCI departments, and other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 260B. Seminar in Condensed Matter Physics. 1 Unit.**

Seminar designed to acquaint students with recent advances in solid state physics. Lecturers from the Department of Physics and Astronomy (both faculty and graduate students), other UCI departments, and other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 260C. Seminar in Condensed Matter Physics. 1 Unit.**

Seminar designed to acquaint students with recent advances in solid state physics. Lecturers from the Department of Physics and Astronomy (both faculty and graduate students), other UCI departments, and other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 261A. Seminar in Plasma Physics. 1 Unit.**

Advanced topics in plasma physics: wave propagation, nonlinear effects, kinetic theory and turbulence, stability problems, transport coefficients, containment, and diagnostics. Applications to controlled fusion and astrophysics.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**PHYSICS 261B. Seminar in Plasma Physics. 1 Unit.**

Advanced topics in plasma physics: wave propagation, nonlinear effects, kinetic theory and turbulence, stability problems, transport coefficients, containment, and diagnostics. Applications to controlled fusion and astrophysics.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**PHYSICS 261C. Seminar in Plasma Physics. 1 Unit.**

Advanced topics in plasma physics: wave propagation, nonlinear effects, kinetic theory and turbulence, stability problems, transport coefficients, containment, and diagnostics. Applications to controlled fusion and astrophysics.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**PHYSICS 263A. Seminar in Particle Physics. 1 Unit.**

Discussion of advanced topics and reports of current research results in theoretical and experimental particle physics and cosmic rays.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 263B. Seminar in Particle Physics. 1 Unit.**

Discussion of advanced topics and reports of current research results in theoretical and experimental particle physics and cosmic rays.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 263C. Seminar in Particle Physics. 1 Unit.**

Discussion of advanced topics and reports of current research results in theoretical and experimental particle physics and cosmic rays.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 265A. Seminar in Astrophysics. 1 Unit.**

Acquaints students with current research in astrophysics. Lecturers from the Department of Physics and Astronomy and from other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 265B. Seminar in Astrophysics. 1 Unit.**

Acquaints students with current research in astrophysics. Lecturers from the Department of Physics and Astronomy and from other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 265C. Seminar in Astrophysics. 1 Unit.**

Acquaints students with current research in astrophysics. Lecturers from the Department of Physics and Astronomy and from other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 266. Current Topics in Chemical, Applied, and Materials Physics. 1 Unit.**

The subjects covered vary from year to year. Connection between fundamental principles and implementations in practice in science, industry, and technology.

Repeatability: May be repeated for credit unlimited times.

Same as CHEM 266.

**PHYSICS 267B. Current Problems in Particle Physics. 4 Units.**

Presentation and discussion of current research and theory in particle physics. Lectures given by staff and students.

Repeatability: May be repeated for credit unlimited times.

**PHYSICS 267C. Current Problems in Particle Physics. 4 Units.**

Presentation and discussion of current research and theory in particle physics. Lectures given by staff and students.

Repeatability: May be repeated for credit unlimited times.

**PHYSICS 268. Seminar in Systems Microbiology Research. 1 Unit.**

A research and journal club seminar that covers topics on bacteria and phage using approaches and principles from biology, engineering, and physics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Same as MOL BIO 268, ENGRMSE 267.

Restriction: Upper-division students only. Graduate students only.

**PHYSICS 269. Seminar in Teaching Physics. 2 Units.**

Techniques for effective teaching. Covers active listening and student engagement, problem-solving skills, peer instruction and collaborative learning, and evaluation. Required of all new Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

**PHYSICS 273. Technical Communication Skills. 2 Units.**

Development of effective communication skills, oral and written presentations, through examples and practice.

Grading Option: Satisfactory/unsatisfactory only.

Same as CHEM 273.

**PHYSICS 291. Research Seminar. 1-4 Units.**

Detailed discussion of research problems of current interest in the Department. Format, content, and frequency of the course are variable.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 295. Experimental Research. 4-12 Units.**

With the approval of a faculty member, a student may pursue a research program in experimental physics. Typical areas include astrophysics, condensed matter physics, elementary particle physics, and plasma physics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Physical Sciences students only.

**PHYSICS 296. Theoretical Research. 4-12 Units.**

With approval of a faculty member, a student may pursue a research program in theoretical physics. Typical areas include astrophysics, condensed matter physics, elementary particle physics, and plasma physics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Physical Sciences students only.

**PHYSICS 298. Physics Colloquium. 1 Unit.**

Seminar held each week, in which a current research topic is explored. Frequently, off-campus researchers are invited to present the seminar, and on occasion a faculty member or researcher from the Department will speak.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: School of Physical Sciences students only.

**PHYSICS 299. Reading of Special Topic. 4-12 Units.**

With special consent from a faculty member who will agree to supervise the program, a student may receive course credit for individual study of some area of physics.

Restriction: Graduate students only.

**PHYSICS 395. Laboratory Teaching. 1 Unit.**

Required of and limited to teaching assistants of undergraduate laboratory courses. Designed to teach the necessary skills required of teaching assistants for these courses.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PHYSICS 399. University Teaching. 1-4 Units.**

Required of and limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Department of Chemistry

**Douglas J. Tobias, Department Chair**

1120 Natural Sciences II

949-824-6018

<http://www.chem.uci.edu/>

Chemistry is the science of molecules and materials. Chemistry plays a role in virtually all facets of life: whether you are interested in solar cells, medicines, food, personal care products, the atmosphere, minerals, your body, or even the origin of your own emotions, there is chemistry behind it. The Department of Chemistry at UCI is home to world-class faculty who engage in cutting edge research in diverse areas of chemistry, from atmospheric chemistry, to the biochemistry of cancer, to the development of new solar cell materials.

This broad perspective is also reflected in the courses offered through the Department of Chemistry, which range from general chemistry, to organic chemistry, to advanced topics such as molecular spectroscopy, nuclear chemistry, and chemical biology. On the undergraduate level, the Department offers various concentrations and tracks to majors, including programs in computational chemistry, biochemistry, chemical physics, synthesis, and chemistry education. Similarly, the Chemistry Graduate Program offers degrees and courses in all major sub-disciplines of chemistry including atmospheric chemistry, chemical biology, inorganic chemistry, organic chemistry, physical chemistry, and theoretical chemistry.

- Chemistry, B.S.
- Chemistry, Ph.D.

## Faculty

Ioan Andricioaei, Ph.D. Boston University, *Professor of Chemistry; Physics and Astronomy* (chemical biology, physical chemistry and chemical physics, theoretical and computational)

Ara Apkarian, Ph.D. Northwestern University, *UCI Distinguished Professor of Chemistry* (physical chemistry and chemical physics)

Ramesh D. Arasasingham, Ph.D. University of California, Davis, *Professor of Teaching of Chemistry* (chemical education and inorganic chemistry)

Shane Ardo, Ph.D. Johns Hopkins University, *Associate Professor of Chemistry; Chemical and Biomolecular Engineering; Materials Science and Engineering* (inorganic and organometallic, physical chemistry and chemical physics, polymer, materials, nanoscience)

Plamen Atanassov, Ph.D. Bulgarian Academy of Sciences, *UCI Chancellor's Professor of Chemical and Biomolecular Engineering; Chemistry; Materials Science and Engineering* (electrocatalysis and electrocatalysts for energy conversion processes; bio-electrocatalysis and energy harvesting systems)

Elizabeth Bess, Ph.D. University of Utah, *Assistant Professor of Chemistry* (chemical biology)

Donald R. Blake, Ph.D. University of California, Irvine, *UCI Distinguished Professor of Chemistry* (analytical, atmospheric, environmental)

Suzanne A. Blum, Ph.D. University of California, Berkeley, *Professor of Chemistry; Chemistry* (inorganic and organometallic, organic and synthetic, physical chemistry and chemical physics, polymer, materials, nanoscience)

Andrew Borovik, Ph.D. University of North Carolina at Chapel Hill, *Professor of Chemistry* (chemical biology, inorganic and organometallic, organic and synthetic)

David A. Brant, Ph.D. University of Wisconsin-Madison, *Professor Emeritus of Chemistry* (biophysical)

Kieron Burke, Ph.D. University of California, Santa Barbara, *Professor of Chemistry; Physics and Astronomy* (physical chemistry and chemical physics, theoretical and computational)

Ann Marie Carlton, Ph.D. Rutgers University, *Associate Professor of Chemistry* (atmospheric and environmental, physical chemistry and chemical physics, theoretical and computational)

A. Richard Chamberlin, Ph.D. University of California, San Diego, *Department Chair and Professor Emeritus of Pharmaceutical Sciences; Chemistry* (chemical biology, organic and synthetic)

John Charles Chaput, Ph.D. University of California, Riverside, *Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemical and synthetic biology)

Robert Corn, Ph.D. University of California, Berkeley, *UCI Distinguished Professor of Chemistry; Biomedical Engineering* (analytical, chemical biology, physical chemistry and chemical physics, polymer, materials, nanoscience)

Robert J. Doedens, Ph.D. University of Wisconsin-Madison, *Professor Emeritus of Chemistry* (inorganic and organometallic)

Vy M. Dong, Ph.D. California Institute of Technology, *Professor of Chemistry* (organic and synthetic)

Kimberly D. Edwards, Ph.D. University of California, Irvine, *Department Vice Chair and Professor of Teaching of Chemistry* (general chemistry, chemical education)

William J. Evans, Ph.D. University of California, Los Angeles, *UCI Distinguished Professor of Chemistry* (inorganic and organometallic)

Celia Faiola, Ph.D. Washington State University, *Assistant Professor of Ecology and Evolutionary Biology; Chemistry*

Sarah Finkeldei, Ph.D. RWTH Aachen University, *Assistant Professor of Chemistry; Materials Science and Engineering* (nuclear chemistry)

Barbara J. Finlayson-Pitts, Ph.D. University of California, Riverside, *Director of AirUCI and UCI Distinguished Professor of Chemistry* (analytical, atmospheric and environmental, physical chemistry and chemical physics)

Fillmore Freeman, Ph.D. Michigan State University, *Professor of Chemistry* (organic and synthetic, theoretical and computational)

Filipp Furche, Ph.D. University of Karlsruhe, *Professor of Chemistry* (physical chemistry and chemical physics, theoretical and computational)

Nien-Hui Ge, Ph.D. University of California, Berkeley, *Professor of Chemistry* (analytical, chemical biology, physical chemistry and chemical physics, polymer, materials, nanoscience)

Robert B. Gerber, Ph.D. Oxford University, *Professor Emeritus of Chemistry* (atmospheric and environmental, physical chemistry and chemical physics, theoretical and computational)

Alon A. Gorodetsky, Ph.D. California Institute of Technology, *Associate Professor of Chemical and Biomolecular Engineering; Chemistry; Materials Science and Engineering* (cephalopods, adaptive materials, camouflage, bioelectronics)

Michael T. Green, Ph.D. University of Chicago, *Professor of Molecular Biology and Biochemistry; Chemistry* (chemical, biology, inorganic and organometallic, physical chemistry and chemical physics, theoretical and computational)

Zhibin Guan, Ph.D. University of North Carolina at Chapel Hill, *Professor of Chemistry; Biomedical Engineering; Chemical and Biomolecular Engineering; Materials Science and Engineering* (chemical biology, organic and synthetic, polymer, materials, nanoscience)

Stephen Hanessian, Ph.D. Ohio State University, *Professor of Pharmaceutical Sciences; Chemistry* (organic chemistry, medicinal chemistry)

John C. Hemminger, Ph.D. Harvard University, *UCI Distinguished Professor of Chemistry* (analytical, atmospheric and environmental, physical chemistry and chemical physics, polymer, materials, nanoscience)

Alan F. Heyduk, Ph.D. Massachusetts Institute of Technology, *Department Vice Chair and Professor of Chemistry* (inorganic and organometallic)

Wilson Ho, Ph.D. University of Pennsylvania, *Donald Bren Professor and Professor of Physics and Astronomy; Chemistry*

Allon Hochbaum, Ph.D. University of California, Berkeley, *Associate Professor of Materials Science and Engineering; Chemical and Biomolecular Engineering; Chemistry* (nanoscale materials and hybrid bio-inorganic devices for applications in clean energy)

Amanda J. Holton, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Chemistry* (chemistry, chemical education)

Kenneth C. Janda, Ph.D. Harvard University, *Professor Emeritus of Chemistry* (physical chemistry and chemical physics)

Elizabeth R. Jarvo, Ph.D. Boston College, *Professor of Chemistry* (inorganic and organometallic, organic and synthetic)

Susan M. King, Ph.D. Massachusetts Institute of Technology, *Professor of Teaching of Chemistry* (organic chemistry, chemical education)

Matthew Law, Ph.D. University of California, Berkeley, *Associate Professor of Chemistry; Chemical and Biomolecular Engineering; Materials Science and Engineering* (inorganic and organometallic, physical chemistry and chemical physics, polymer, materials, nanoscience)

Renee Link, Ph.D. University of California, Irvine, *Associate Professor of Teaching of Chemistry* (organic chemistry, chemical education)

Chang C. Liu, Ph.D. Scripps Research Institute, *Assistant Professor of Biomedical Engineering; Chemistry; Molecular Biology and Biochemistry* (genetic engineering, directed evolution, synthetic biology, chemical biology)

Andrej Luptak, Ph.D. Yale University, *Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemical biology)

Vladimir A. Mandelshtam, Ph.D. Russian Academy of Sciences, *Professor of Chemistry* (physical chemistry and chemical physics, theoretical and computational)

Stephen Mang, Ph.D. University of California, Irvine, *Assistant Professor of Teaching of Chemistry* (chemical education, advanced laboratories)

Craig C. Martens, Ph.D. Cornell University, *Professor of Chemistry* (physical chemistry and chemical physics, polymer, materials, nanoscience, theoretical and computational)

Rachel Martin, Ph.D. Yale University, *Department Vice Chair and Professor of Chemistry; Molecular Biology and Biochemistry* (analytical, chemical biology, physical chemistry and chemical physics)

George E. Miller, Ph.D. Oxford University, *Professor of Teaching Emeritus of Chemistry* (analytical and radioanalytical chemistry and chemical education)

David L. Mobley, Ph.D. University of California, Davis, *Vice Chair and Professor of Pharmaceutical Sciences; Chemistry* (chemical biology, physical chemistry and chemical physics, theoretical and computational)

Shaul Mukamel, Ph.D. Tel Aviv University, *UCI Distinguished Professor of Chemistry; Physics and Astronomy* (physical chemistry and chemical physics, polymer, materials, nanoscience, theoretical and computational)

Craig Murray, Ph.D. University of Edinburgh, *Associate Professor of Chemistry* (atmospheric and environmental, physical chemistry and chemical physics)

Sergey Nizkorodov, Ph.D. University of Basel, *Co-Director, AirUCI and Department Vice Chair and Professor of Chemistry* (analytical, atmospheric and environmental, physical chemistry and chemical physics)

James S. Nowick, Ph.D. Massachusetts Institute of Technology, *Professor of Chemistry; Pharmaceutical Sciences* (chemical biology, organic and synthetic, polymer, materials, nanoscience)

Larry E. Overman, Ph.D. University of Wisconsin-Madison, *UCI Distinguished Professor of Chemistry* (inorganic and organometallic, organic and synthetic)

Joseph Patterson, Ph.D. University of Warwick, *Assistant Professor of Chemistry; Materials Science and Engineering* (polymer, materials, nanoscience)

Reginald M. Penner, Ph.D. Texas A&M University, *UCI Chancellor's Professor of Chemistry* (analytical, physical chemistry and chemical physics, polymer, materials, nanoscience)

Eric Potma, Ph.D. University of Groningen, *Professor of Chemistry; Electrical Engineering and Computer Science* (analytical, chemical biology, physical chemistry and chemical physics)

Thomas L. Poulos, Ph.D. University of California, San Diego, *Distinguished Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences* (chemical biology)

Jennifer A. Prescher, Ph.D. University of California, Berkeley, *Professor of Chemistry; Molecular Biology and Biochemistry; Pharmaceutical Sciences* (chemical biology, organic and synthetic)

Sergey V. Pronin, Ph.D. University of Chicago, *Assistant Professor of Chemistry* (organic and synthetic chemistry)

Markus W. Ribbe, Ph.D. University of Bayreuth, *UCI Chancellor's Professor of Molecular Biology and Biochemistry; Chemistry* (chemical biology, inorganic and organometallic)

Scott D. Rychnovsky, Ph.D. Columbia University, *UCI Distinguished Professor of Chemistry* (chemical biology, organic and synthetic)

Eric S. Saltzman, Ph.D. University of Miami, *UCI Distinguished Professor of Earth System Science; Chemistry*

A. J. Shaka, Ph.D. Oxford University, *Professor of Chemistry* (chemical biology, physical chemistry and chemical physics)

Kenneth J. Shea, Ph.D. Pennsylvania State University, *Distinguished Professor of Chemistry* (analytical, chemical biology, organic and synthetic, polymer, materials, nanoscience)

Manabu Shiraiwa, Ph.D. Max Planck Institute for Chemistry, *Associate Professor of Chemistry* (atmospheric and environmental, chemical biology, physical chemistry and chemical physics, theoretical and computational)

Zuzanna S. Siwy, Ph.D. Silesian University of Technology, *Professor of Physics and Astronomy; Biomedical Engineering; Chemistry*

James N. Smith, Ph.D. California Institute of Technology, *Professor of Chemistry* (analytical, atmospheric and environmental, physical chemistry and chemical physics)

Robert Spitale, Ph.D. University of Rochester, *Director of the UCI Transcriptomics Core and Associate Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemistry, chemical biology, RNA biology)

Douglas J. Tobias, Ph.D. Carnegie Mellon University, *Department Chair and Professor of Chemistry* (atmospheric and environmental, chemical biology, physical chemistry and chemical physics, theoretical and computational)

Shiou-Chuan (Sheryl) Tsai, Ph.D. University of California, Berkeley, *Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences*

Christopher Vanderwal, Ph.D. Scripps Research Institute, *Professor of Chemistry; Pharmaceutical Sciences* (organic and synthetic)

David Van Vranken, Ph.D. Stanford University, *Associate Dean of the School of Physical Sciences and Professor of Chemistry* (organic and synthetic)

Gregory A. Weiss, Ph.D. Harvard University, *Professor of Chemistry; Molecular Biology and Biochemistry; Pharmaceutical Sciences* (analytical, chemical biology, organic and synthetic, polymer, materials, nanoscience)

Jenny Y. Yang, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Chemistry* (inorganic and organometallic, organic and synthetic, polymer, materials, nanoscience)

## Courses

### **CHEM 1A. General Chemistry. 4 Units.**

General chemistry with applications to life sciences, physical sciences, and engineering. Atomic structure; general properties of the elements; covalent, ionic, and metallic bonding; mass relationships.

Prerequisite or corequisite: MATH 5A or MATH 2A or PHYS 7C or CHEM 1X or CHEM 1P or SAT Mathematics or ACT Mathematics or SAT Subject Chemistry or AP Chemistry or AP Calculus AB or AP Calculus BC. CHEM 1P with a grade of C- or better. SAT Mathematics with a minimum score of 600. ACT Mathematics with a minimum score of 27. SAT Subject Chemistry with a minimum score of 700. AP Chemistry with a minimum score of 3. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3

Overlaps with CHEM H2A, ENGR 1A, CHEM M2A.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**(II and VA ).**

### **CHEM 1B. General Chemistry. 4 Units.**

General chemistry with applications to life sciences, physical sciences, and engineering. Properties of gases, liquids, solids; intermolecular forces; changes of state; properties of solutions; stoichiometry; thermochemistry; and thermodynamics. Course may be offered online.

Prerequisite: CHEM 1A or ENGR 1A or CHEM H2A or AP Chemistry or CHEM M2A. CHEM 1A with a grade of C- or better. ENGR 1A with a grade of C- or better. CHEM H2A with a grade of C- or better. AP Chemistry with a minimum score of 4. CHEM M2A with a grade of C- or better

Overlaps with CHEM H2B.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**(II and Va ).**

**CHEM 1C. General Chemistry . 4 Units.**

General chemistry with applications to life sciences, physical sciences, and engineering. Equilibria, aqueous acid-base equilibria, solubility equilibria, oxidation reduction reactions, electrochemistry; kinetics; special topics.

Corequisite: CHEM 1LC

Prerequisite: CHEM 1B. CHEM 1B with a grade of C- or better

Overlaps with CHEM H2C.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

(II and VA ).

**CHEM 1LA. General Chemistry Laboratory. 2 Units.**

Training and experience in basic laboratory techniques through experiments related to lecture topics in Chemistry 1A. Materials fee.

Corequisite: CHEM 1A

Overlaps with CHEM H2LA.

**CHEM 1LC. General Chemistry Laboratory. 3 Units.**

Training and experience in basic laboratory techniques. Chemical practice and principles illustrated through experiments related to lecture topics of CHEM 1A-B-C. Materials fee.

Corequisite: CHEM 1C

Prerequisite: CHEM 1B. CHEM 1B with a grade of C- or better

Overlaps with CHEM 1LE, CHEM H2LB, CHEM M2LB.

Restriction: Div of Undergraduate Education students have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Nursing Science Majors have first consideration for enrollment. Pharmaceutical Sciences Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment.

**CHEM 1LD. General Chemistry Laboratory. 3 Units.**

Training and experience in basic laboratory techniques. Chemical practice and principles illustrated through experiments related to lecture topics in CHEM 1A-B-C. Materials fee.

Prerequisite: (CHEM 1C and CHEM 1LC) or CHEM 1LE. CHEM 1C with a grade of C- or better. CHEM 1LC with a grade of C- or better. CHEM 1LE with a grade of C- or better

Overlaps with CHEM H2LB, CHEM M2LB.

Restriction: School of Biological Sciences students only. School of Physical Sciences students only. School of Engineering students only. Program in Nursing Science students only. Pharmaceutical Sciences Majors only. Public Health Sciences Majors only. No credit for CHEM M2LA if taken after CHEM 1LD. Undecided/Undeclared students also have first consideration for enrollment.

**CHEM 1LE. Accelerated General Chemistry Lab. 3 Units.**

Lecture and experiments covering chemical concepts for accelerated students who do not plan to take organic chemistry. Properties of gases, liquids, solutions, and solids; chemical equilibrium and chemical thermodynamics; atomic and molecular structure; chemical kinetics; electrochemistry. Materials fee.

Prerequisite or corequisite: CHEM 1A or ENGR 1A or AP Chemistry. AP Chemistry with a minimum score of 3

Overlaps with CHEM 1LC.

Restriction: School of Engineering students have first consideration for enrollment. Biomedical Computing Majors have first consideration for enrollment.

**CHEM 1P. Preparation for General Chemistry . 4 Units.**

Units of measurement, dimensional analysis, significant figures; elementary concepts of volume, mass, force, pressure, energy, density, temperature, heat, work; fundamentals of atomic and molecular structure; the mole concept, stoichiometry; properties of the states of matter; gas laws; solutions concentrations.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Biomedical Computing Majors have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**CHEM 1X. General Chemistry Plus. 2 Units.**

Units of chemical measurements, dimensional analysis, significant figures; elementary physicochemical concepts; fundamentals of atomic and molecular structure; molar amounts and stoichiometry; properties of the states of matter; solutions concentrations.

Prerequisite: Students who meet the requirements for taking Chem 1A through their SAT, ACT, or AP test scores are not eligible for enrollment in Chem 1X. Specifically, the students must have ALL of the following advisory prerequisites (the inverse of the Chem 1A prerequisites): S02<600 (score below 600 on the SAT Mathematics Reasoning test) A02<27 (score below 27 on the ACT Mathematics test) Z43<700 (score below 700 on the SAT Chemistry subject exam) AP25<3 (score below 3 on the AP Chemistry exam) AP66<4 (score below 4 on the AP Calculus AB Exam) AP68<3 (score below 3 on the AP Calculus BC Exam) Students who meet Chem 1A eligibility through ALEKS-based training are permitted to enroll in Chem 1X. Chem 1X is open to interested BioEASE students.

Grading Option: Pass/no pass only.

**CHEM H2A. Honors General Chemistry. 4 Units.**

Covers the same material as CHEM 1A-CHEM 1B-CHEM M3C but in greater depth. Additional topics will also be included as time permits.

Corequisite: CHEM H2LA

Prerequisite: AP Chemistry or SAT Subject Chemistry. AP Chemistry with a minimum score of 4. SAT Subject Chemistry with a minimum score of 700

Overlaps with CHEM 1A.

Restriction: Campuswide Honors Collegium students only.

**(II and Va ).**

**CHEM H2B. Honors General Chemistry. 4 Units.**

Covers the same material as CHEM 1A-CHEM 1B-CHEM M3C but in greater depth. Additional topics are also included as time permits.

Corequisite: CHEM H2LB

Prerequisite: CHEM H2A and (CHEM H2LA or CHEM M2LA). CHEM H2A with a grade of C- or better. CHEM H2LA with a grade of C- or better. CHEM M2LA with a grade of C- or better

Overlaps with CHEM 1B.

Restriction: Campuswide Honors Collegium students only.

**(II and VA ).**

**CHEM H2C. Honors General Chemistry. 4 Units.**

Covers the same material as CHEM 1A-CHEM 1B-CHEM M3C but in greater depth. Additional topics are also included as time permits.

Prerequisite: CHEM H2B and (CHEM H2LB or CHEM M2LB). CHEM H2B with a grade of C- or better. CHEM H2LB with a grade of C- or better. CHEM M2LB with a grade of C- or better

Overlaps with CHEM 1C.

Restriction: Campuswide Honors Collegium students only.

**(II and VA ).**

**CHEM H2LA. Honors General Chemistry Laboratory. 3 Units.**

Training and experience in fundamental and analytical laboratory techniques through experiments related to lecture topics in CHEM H2A-CHEM H2B-CHEM H2C. Materials fee.

Corequisite: CHEM H2A

Prerequisite: AP Chemistry or SAT Subject Chemistry. AP Chemistry with a minimum score of 4. SAT Subject Chemistry with a minimum score of 700

Overlaps with CHEM M2LA.

Restriction: Campuswide Honors Collegium students only.

**CHEM H2LB. Honors General Chemistry Laboratory. 3 Units.**

Training and experience in fundamental and analytical laboratory techniques through experiments related to lecture topics in CHEM H2A-CHEM H2B-CHEM H2C. Materials fee.

Corequisite: CHEM H2B

Prerequisite: CHEM H2A and (CHEM H2LA or CHEM M2LA). CHEM H2A with a grade of B or better. CHEM H2LA with a grade of B or better.

CHEM M2LA with a grade of B or better

Overlaps with CHEM M2LB.

Restriction: No credit for CHEM 1LC if taken after CHEM H2LB or CHEM M2LB.

**CHEM H2LC. Honors General Chemistry Laboratory. 3 Units.**

Training and experience in fundamental and analytical laboratory techniques through experiments related to lecture topics in CHEM H2A-CHEM H2B-CHEM H2C. Materials fee.

Corequisite: CHEM H2C

Prerequisite: CHEM H2B and (CHEM H2LB or CHEM M2LB). CHEM H2B with a grade of B or better. CHEM H2LB with a grade of B or better.

CHEM M2LB with a grade of B or better

**CHEM M2A. Majors General Chemistry Lecture. 4 Units.**

Covers the same material as CHEM 1A but in greater depth. Additional topics are included as time permits.

Prerequisite or corequisite: MATH 5A or MATH 2A or PHYS 7C or CHEM 1X or CHEM 1P or SAT Mathematics or ACT Mathematics or SAT Subject Chemistry or AP Chemistry or AP Calculus AB or AP Calculus BC. CHEM 1P with a grade of C- or better. SAT Mathematics with a minimum score of 600. ACT Mathematics with a minimum score of 27. SAT Subject Chemistry with a minimum score of 700. AP Chemistry with a minimum score of 3. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3. Placement via a passing score on the ALEKS placement exam is also accepted.

Overlaps with CHEM 1A, CHEM H2A, ENGR 1A.

Restriction: Chemistry Majors have first consideration for enrollment.

**(II and Va ).**

**CHEM M2B. Majors General Chemistry Lecture. 4 Units.**

Covers the same material as CHEM 1B but in greater depth. Additional topics will also be included as time permits.

Prerequisite: CHEM M2A and CHEM M2LA. CHEM M2A with a grade of C- or better. CHEM M2LA with a grade of C- or better

Overlaps with CHEM H2B, CHEM 1B.

Restriction: Chemistry Majors have first consideration for enrollment.

**(II and Va ).**

**CHEM M2C. Majors General Chemistry Lecture. 4 Units.**

Covers the same material as CHEM 1C but in greater depth. Additional topics are also included as time permits.

Prerequisite: CHEM M2B and CHEM M2LB. CHEM M2B with a grade of C- or better. CHEM M2LB with a grade of C- or better

Overlaps with CHEM 1C, CHEM H2C.

Restriction: Chemistry Majors have first consideration for enrollment.

**(II and Va ).**

**CHEM M2LA. Majors General Chemistry Laboratory. 3 Units.**

Training and experience in basic laboratory techniques through experiments related to lecture topics in CHEM 1A-CHEM 1B-CHEM M3C. Materials fee.

Prerequisite or corequisite: CHEM 1A or CHEM M2A or CHEM H2A. CHEM 1A with a grade of C- or better. CHEM M2A with a grade of C- or better. CHEM H2A with a grade of C- or better. High school chemistry.

Overlaps with CHEM H2LA, CHEM 1LD.

Restriction: Chemistry Majors only. No credit for CHEM M2LA if taken after CHEM 1LD.

**CHEM M2LB. Majors General Chemistry Laboratory. 3 Units.**

Training and experience in basic laboratory techniques through experiments related to lecture topics in CHEM 1A-CHEM 1B-CHEM M3C. Materials fee.

Prerequisite or corequisite: (CHEM 1B or CHEM H2B or CHEM M2B) and (CHEM M2A or CHEM H2A) and (CHEM M2LA or CHEM H2LA). CHEM M2A with a grade of C- or better. CHEM H2A with a grade of C- or better. CHEM M2LA with a grade of C- or better. CHEM H2LA with a grade of C- or better

Overlaps with CHEM H2LB.

Restriction: Chemistry Majors only. CHEM 1LC may not be taken for credit if taken after CHEM H2LB or CHEM M2LB.

**CHEM M3C. Majors Quantitative Analytical Chemistry. 4 Units.**

Topics include equilibria, aqueous acid-base equilibria, solubility equilibria, oxidation reduction reactions, electrochemistry, and kinetics with a special emphasis on the statistical treatment of data and analytical methods of chemical analysis.

Corequisite: CHEM M3LC

Prerequisite: (CHEM 1B or CHEM H2B or CHEM M2B) and (CHEM M2LB or CHEM H2LB). CHEM 1B with a grade of C- or better. CHEM H2B with a grade of C- or better. CHEM M2B with a grade of C- or better. CHEM M2LB with a grade of C- or better. CHEM H2LB with a grade of C- or better

Restriction: Chemistry Majors only.

**(II and VA ).**

**CHEM M3LC. Majors Quantitative Analytical Chemistry Laboratory. 4 Units.**

Foundational principles of analytical chemistry and experimental methods for quantitative analysis of real samples. Materials fee.

Prerequisite: (CHEM 1B or CHEM H2B or CHEM M2B) and (CHEM M2LB or CHEM H2LB). CHEM 1B with a grade of C- or better. CHEM H2B with a grade of C- or better. CHEM M2B with a grade of C- or better. CHEM M2LB with a grade of C- or better. CHEM H2LB with a grade of C- or better

Restriction: Chemistry Majors only.

**CHEM 5. Scientific Mathematical and Computing Skills. 4 Units.**

Introduces students to mathematical skills, including complex numbers, linear algebra, differential equations, multivariable calculus, infinite series, Fourier series, and integral transforms; and computing skills, including plotting, data analysis (statistics and curve fitting), linear algebra, symbolic mathematics, and spectral analysis.

Corequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and MATH 2D.

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 11. New Chemistry Student Seminar. 1 Workload Unit.**

Seminar for students who recently joined the chemistry major. Addresses available tracks in the major, research opportunities in the chemistry department, careers in chemistry, and relevant programs and resources for students.

Grading Option: Workload Credit P/NP Only.

Restriction: Freshmen students, transfer students, and students who recently changed their major to Chemistry have first consideration for enrollment.

**CHEM 12. Chemistry Around Us. 4 Units.**

Addresses ways in which chemistry affects everyday life. Topics include pollution, global warming, water supply/demands, biodiesel fuels, foods we eat, natural/synthetic materials, common drugs, drug design. Learn and apply basic chemistry concepts. Use risk/benefit analysis for optimal solutions.

**(II and Va ).**

**CHEM 14. Sense and Sensibility in Science. 4 Units.**

Gives an overview of scientific methods and heuristics through group exercises and discussion. Discusses the benefits and limitations of applying rational scientific approaches to real-world examples from philosophy, cognitive and social psychology, game theory, economics, political science, law, and negotiation.

(II and V.A. ).

**CHEM H30A. Critical Analysis of Health Science Literature. 4 Units.**

Focuses on evaluation of scientific literature. Aspects of scientific inquiry include scientific method, scientific research design, statistical analysis, and publication processes. Addresses why scientific inquiry cannot be separated from sociocultural influences and concerns. Examples drawn from research on health-related issues.

Restriction: Campuswide Honors Collegium students only.

(II and Va. ).

**CHEM 51A. Organic Chemistry. 4 Units.**

Fundamental concepts relating to carbon compounds with emphasis on structural theory and the nature of chemical bonding, stereochemistry, reaction mechanisms, and stereoscopic, physical, and chemical properties of the principal classes of carbon compounds.

Prerequisite or corequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and (CHEM 1LD or CHEM H2LB or CHEM M2LB). CHEM 1C with a grade of C- or better. CHEM H2C with a grade of C- or better. CHEM M3C with a grade of C- or better. CHEM 1LD with a grade of C- or better. CHEM H2LB with a grade of C- or better. CHEM M2LB with a grade of C- or better

Overlaps with CHEM H52A.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**CHEM 51B. Organic Chemistry. 4 Units.**

Fundamental concepts relating to carbon compounds with emphasis on structural theory and the nature of chemical bonding, stereochemistry, reaction mechanisms, and stereoscopic, physical, and chemical properties of the principal classes of carbon compounds.

Prerequisite: CHEM 51A and (CHEM 1LD or CHEM M52LA or CHEM H52LA). CHEM 51A with a grade of C- or better. CHEM 1LD with a grade of C- or better. CHEM M52LA with a grade of C- or better. CHEM H52LA with a grade of C- or better

Overlaps with CHEM H52B.

Restriction: Undeclared Majors have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment.

**CHEM 51C. Organic Chemistry. 4 Units.**

Fundamental concepts relating to carbon compounds with emphasis on structural theory and the nature of chemical bonding, stereochemistry, reaction mechanisms, and stereoscopic, physical, and chemical properties of the principal classes of carbon compounds.

Prerequisite: CHEM 51B and (CHEM 51LB or CHEM M52LB or CHEM H52LB). CHEM 51B with a grade of C- or better. CHEM 51LB with a grade of C- or better. CHEM M52LB with a grade of C- or better. CHEM H52LB with a grade of C- or better

Overlaps with CHEM H52C.

Restriction: Undeclared Majors have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Biological Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment.

**CHEM 51LB. Organic Chemistry Laboratory. 3 Units.**

Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-CHEM 51B-CHEM 51C. Materials fee.

Corequisite: CHEM 51B

Prerequisite: CHEM 51A and (CHEM 1LD or CHEM H2LB or CHEM M2LB). CHEM 51A with a grade of C- or better. CHEM 1LD with a grade of C- or better. CHEM H2LB with a grade of C- or better. CHEM M2LB with a grade of C- or better

Overlaps with CHEM H52LA, CHEM M52LA.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**CHEM 51LC. Organic Chemistry Laboratory. 3 Units.**

Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Materials fee.

Corequisite: CHEM 51C

Prerequisite: CHEM 51B and CHEM 51LB. CHEM 51B with a grade of C- or better. CHEM 51LB with a grade of C- or better

Overlaps with CHEM H52LB, CHEM M52LB.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**CHEM 51LD. Organic Chemistry Laboratory. 3 Units.**

Modern techniques of organic chemistry using selected experiments to illustrate topics introduced in CHEM 51A-CHEM 51B-CHEM 51C. Materials fee.

Prerequisite: CHEM 51C and CHEM 51LC. CHEM 51C with a grade of C- or better. CHEM 51LC with a grade of C- or better

Overlaps with CHEM H52LC.

Restriction: School of Biological Sciences students have first consideration for enrollment. School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Program in Nursing Science students have first consideration for enrollment. Dept Pharmaceutical Sciences students have first consideration for enrollment. Program in Public Health students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

**CHEM H52LA. Honors Organic Chemistry Laboratory. 3 Units.**

Fundamental techniques of modern experimental organic chemistry. Materials fee.

Corequisite: CHEM 51A

Prerequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and (CHEM M2LB or CHEM H2LB or CHEM 1LD). CHEM 1C with a grade of C- or better. CHEM H2C with a grade of C- or better. CHEM M3C with a grade of C- or better. CHEM M2LB with a grade of C- or better. CHEM H2LB with a grade of C- or better. CHEM 1LD with a grade of C- or better

Overlaps with CHEM 51LB, CHEM M52LA.

Restriction: Campuswide Honors Collegium students only.

**CHEM H52LB. Honors Organic Chemistry Laboratory. 3 Units.**

Fundamental techniques of modern experimental organic chemistry. Materials fee.

Corequisite: CHEM 51B

Prerequisite: CHEM 51A and CHEM H52LA. CHEM 51A with a grade of C- or better. CHEM H52LA with a grade of C- or better

Overlaps with CHEM M52LB, CHEM 51LC.

**CHEM H52LC. Honors Organic Chemistry Laboratory. 3 Units.**

Fundamental techniques of modern experimental organic chemistry. Materials fee.

Prerequisite: CHEM 51B and CHEM H52LB. CHEM 51B with a grade of C- or better. CHEM H52LB with a grade of C- or better

Overlaps with CHEM 51LD, CHEM M52LC.

**CHEM M52LA. Majors Organic Chemistry Laboratory. 3 Units.**

Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Materials fee.

Corequisite: CHEM 51A

Prerequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and (CHEM H2LB or CHEM M2LB or CHEM 1LD). CHEM 1C with a grade of C- or better.

CHEM H2C with a grade of C- or better. CHEM M3C with a grade of C- or better. CHEM H2LB with a grade of C- or better. CHEM M2LB with a grade of C- or better. CHEM 1LD with a grade of C- or better

Overlaps with CHEM H52LA, CHEM 51LB.

Restriction: Chemistry Majors only.

**CHEM M52LB. Majors Organic Chemistry Laboratory. 3 Units.**

Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Materials fee.

Corequisite: CHEM 51B

Prerequisite: CHEM 51A and CHEM M52LA. CHEM 51A with a grade of C- or better. CHEM M52LA with a grade of C- or better

Overlaps with CHEM H52LB, CHEM 51LC.

Restriction: Chemistry Majors only.

**CHEM M52LC. Majors Organic Chemistry Laboratory. 3 Units.**

Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Materials fee.

Corequisite: CHEM 51C

Prerequisite: CHEM 51B and CHEM M52LB. CHEM 51B with a grade of C- or better. CHEM M52LB with a grade of C- or better

Overlaps with CHEM H52LC, CHEM 51LD.

Restriction: Chemistry Majors only.

**CHEM H90. The Idiom and Practice of Science. 4 Units.**

A series of fundamental and applied problems in the chemical sciences are addressed. Topics may include the periodic table, electronic structure of atoms, chemical bonding, molecular structure, thermodynamics, and kinetics, with applications to energy and the environment, and/or biochemistry.

Restriction: Campuswide Honors Collegium students only.

**(II, Va)****CHEM 100S. Laboratory Safety for Chemists.**

Provide students with the fundamentals of safety involved in chemical laboratory work.

Prerequisite or corequisite: CHEM 51C

Grading Option: Pass/no pass only.

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 101W. Writing in Chemical Sciences. 4 Units.**

Students receive guidance on preparing research papers, proposals, reports, and other forms of scientific writing in chemistry-related fields, on effectively searching for and using chemical information, and on communicating data in poster and platform presentations.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Chemistry Majors have first consideration for enrollment.

**(Ib)****CHEM 107. Inorganic Chemistry. 4 Units.**

Introduction to modern inorganic chemistry. Principles of structure, bonding, and chemical reactivity with application to compounds of the main group and transition elements, including organometallic chemistry.

Prerequisite: CHEM 51C or CHEM H52C

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 107L. Inorganic Chemistry Laboratory. 3 Units.**

Modern techniques of inorganic and organometallic chemistry, including experience with glove box, Schlenk line, and vacuum line methods. Materials fee.

Prerequisite or corequisite: CHEM 107 and CHEM 100S

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 125. Advanced Organic Chemistry. 4 Units.**

Rapid-paced comprehensive treatment of organic chemistry. Focuses on molecular structure, reactivity, stability, scope and mechanisms of organic reactions. Topics include: structure and bonding; theoretical organic chemistry; acidity and basicity; reactive intermediates; pericyclic reactions; stereochemistry; organic synthesis; natural products; organic photochemistry.

Prerequisite: CHEM 51C

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 127. Inorganic Chemistry II. 4 Units.**

Advanced treatment of selected fundamental topics in inorganic chemistry, building on material presented in Chemistry 107. Molecular symmetry with applications to electronic structure and spectroscopy. Reaction kinetics and mechanisms; inorganic synthesis and catalysis; bioinorganic chemistry.

Prerequisite: CHEM 107

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 128. Introduction to Chemical Biology. 4 Units.**

Introduction to the basic principles of chemical biology: structures and reactivity; chemical mechanisms of enzyme catalysis; chemistry of signalling, biosynthesis, and metabolic pathways.

Corequisite: CHEM 128L

Prerequisite: (CHEM 51C or CHEM H52C)

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 128L. Introduction to Chemical Biology Laboratory Techniques. 3 Units.**

Introduction to the basic laboratory techniques of chemical biology: electrophoresis, plasmid preparation, PCR, protein expression, isolation, and kinetics. Materials fee.

Corequisite: CHEM 128

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 132A. Chemical Thermodynamics, Kinetics, and Dynamics. 4 Units.**

Energy, entropy, and the thermodynamic potentials. Chemical equilibrium. Chemical kinetics.

Prerequisite or corequisite: MATH 2D and (PHYS 7D or PHYS 7E) and (CHEM 5 or (MATH 3D and (EECS 10 or EECS 12 or MAE 10 or ICS 31)))

Overlaps with CHEM 131C.

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 132B. Quantum Principles, Spectroscopy, and Bonding. 4 Units.**

Principles of quantum chemistry with applications to the elements of atomic structure, energy levels, and spectroscopy.

Prerequisite: (CHEM 132A or CEMS 45C) and (PHYS 7D or PHYS 7E). CHEM 132A with a grade of C- or better

Overlaps with CHEM 131A.

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 132C. Molecular Structure and Elementary Statistical Mechanics. 4 Units.**

Principles of quantum mechanics with applications to molecular spectroscopy and structure determination, and chemical bonding in simple molecules. Elements of statistical mechanics.

Prerequisite: CHEM 132B

Overlaps with CHEM 131B.

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 133. Nuclear and Radiochemistry. 4 Units.**

Advanced treatment of nuclear structure, nuclear reactions, and radioactive-decay processes. Introduction to nuclear activation analysis, isotope effects, radiation chemistry, hot-atom chemistry, nuclear age-dating methods, nuclear reactors, and nuclear power.

Prerequisite: (CHEM M3C or CHEM 1C or CHEM H2C) and MATH 2D

Same as CBE 176.

Overlaps with CHEM 170.

Restriction: Chemistry Majors have first consideration for enrollment. Chemical Engineering Majors have first consideration for enrollment.

Concurrent with CHEM 233 and CBE 276.

**CHEM 133L. Nuclear and Radiochemistry Laboratory. 3 Units.**

Practical aspects of production, separation, safe handling, detection, and measurement of radioactive isotopes. Experiments use the UCI nuclear reactor and emphasize uses of radioisotopes in chemistry, engineering, biology, and medicine. Materials fee.

Prerequisite or corequisite: CHEM 133

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 137. Computational Chemistry. 4 Units.**

Short introduction to programming languages and to representative algorithms employed in chemical research. Students have the opportunity to devise and employ their own codes and also to employ codes which are widely used in various fields of chemistry. Materials fee.

Corequisite: CHEM 132C

Prerequisite: CHEM 51C and (CHEM 131A or CHEM 132B)

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 138. Introduction to Computational Organic Chemistry. 4 Units.**

An introduction to the use of computational chemistry to investigate reaction mechanisms, to calculate structures, and to predict properties of molecules. Students have the opportunity to perform calculations employing computational methods which are widely used in various fields of chemistry. Materials fee.

Prerequisite: CHEM 51C

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 141. Environmental Chemistry. 4 Units.**

Processes that control the fate of chemicals in the environment. Chemistry of the atmosphere, hydrosphere, and soils, especially as it pertains to pollutants.

Prerequisite: (CHEM 51C or CHEM H52C) and (MATH 2B or AP Calculus BC). AP Calculus BC with a minimum score of 4

**CHEM 145A. Gas-Phase Atmospheric Chemistry. 4 Units.**

Sources, chemistry, sinks, and measurements of key atmospheric gaseous species. Chemistry of photochemical oxidant formation, transformation of key inorganic and organic trace gases, and stratospheric ozone cycling. Applications of atmospheric chemistry models to control strategies.

Prerequisite: CHEM 132A and CHEM 132B and CHEM 132C

Concurrent with CHEM 245A.

**CHEM 145B. Multi-Phase Atmospheric Chemistry. 4 Units.**

Chemical and physical processes leading to the production, aging, and removal of atmospheric particles. Multi-phase processes involving gases, particles, water droplets, and environmental surfaces. Approaches for modeling these processes with applications to control strategies.

Prerequisite: CHEM 145A

Concurrent with CHEM 245B.

**CHEM 150. Computational Chemistry. 4 Units.**

Basic concepts, methods, and techniques in computational chemistry: density functional and wavefunction theory, molecular property calculations, analysis tools, potential energy surfaces, vibrational effects, molecular dynamics simulations.

Prerequisite or corequisite: MATH 3A and (CHEM 132A or PHYS 113A)

Restriction: Chemistry Majors have first consideration for enrollment.

Concurrent with CHEM 250.

**CHEM 150L. Computational Chemistry Laboratory. 4 Units.**

Introduction to the practice of modern computational chemistry through a series of advanced computational experiments.

Prerequisite: CHEM 150 and (CHEM 5 or PHYS 50 or EECS 12)

Restriction: Chemistry Majors have first consideration for enrollment.

Concurrent with CHEM 250L.

**CHEM 152. Advanced Analytical Chemistry. 5 Units.**

In-depth treatment of modern instrumental methods for quantitative analysis of real samples and basic principles of instrument design. Laboratory experiments using spectroscopic, chromatographic, mass spectrometric, and other instrumental methods. Materials fee.

Prerequisite: (CHEM 1C or CHEM M3C or CHEM H2C) and (CHEM M3LC or CHEM H2LC)

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 153. Physical Chemistry Laboratory. 4 Units.**

Introduction to the modern experimental approaches and software tools used in spectroscopy, kinetics, electrochemistry, and other physical chemistry experiments. Basics of interfacing with instruments using LabView. Materials fee.

Corequisite: CHEM 132C

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 156. Advanced Laboratory in Chemistry and Synthesis of Materials. 4 Units.**

Modern synthesis and characterization of organic and inorganic materials including polymers, nanomaterials, and biomaterials. State-of-the-art characterization techniques include gel permeation chromatography, dynamic light scattering, thermal analysis, mechanical analysis, electron and scanning probe microscopy, X-ray diffraction, and porosimetry. Materials fee.

Prerequisite: (CHEM 51C or CHEM H52C) and (CHEM 51LC or CHEM H52LC or CHEM M52LC) and (CHEM 131A or CHEM 132B or PHMS 171)

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 160. Organic Synthesis Laboratory. 4 Units.**

Modern experimental techniques in organic synthesis including experience with thin-layer chromatography, liquid chromatography, and gas chromatography. Modern methods of structure elucidation including FT NMR are employed in the characterization of products. Materials fee.

Prerequisite or corequisite: CHEM 51C and CHEM 100S and (CHEM 51LC or CHEM H52LC or CHEM M52LC)

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 170. Radioisotope Techniques. 4 Units.**

Basic theory and practice of production, separation, safe handling, counting, applications of radioactive isotopes with emphasis on applications in chemistry, biology, and medicine. Materials fee.

Prerequisite: (CHEM 1C or CHEM M3C or CHEM H2C) and (CHEM 1LC or CHEM M3LC or CHEM H2LC)

Restriction: Chemistry Majors have first consideration for enrollment.

**CHEM 177. Medicinal Chemistry. 4 Units.**

An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-throughput screening. Relationship of molecular structure to pharmacological activity.

Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and (BIOL 98 or CHEM 128)

Same as PHMS 177.

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment.

**CHEM 177L. Medicinal Chemistry Laboratory. 3 Units.**

An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-throughput screening. Relationship of molecular structure to pharmacological activity. Materials fee.

Corequisite: PHRMSCI 177 or CHEM 177.

Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and BIOL 100 and (BIOL 98 or CHEM 128)

Same as PHMS 177L.

Restriction: Pharmaceutical Sciences Majors have first consideration for enrollment.

**(Ib)****CHEM 180. Undergraduate Research. 4 Units.**

Research for credit arranged with a faculty member to sponsor and supervise work. Student time commitment of 10 to 15 hours per week is expected, and a written research report is required at the end of each quarter.

Prerequisite or corequisite: CHEM 100S

Repeatability: May be repeated for credit unlimited times.

**CHEM 180W. Senior Thesis in Chemistry. 4 Units.**

Students receive guidance on preparing research papers, proposals, reports, and other forms of scientific writing in chemistry-related fields; on effectively searching for and using chemical information; and on communicating data in poster and platform presentations.

Prerequisite: CHEM 180 or CHEM 199 or PHYS 195 or ESS 199 or CEMS 199 or CEE 199 or MAE 199 or BIOL 199 or PUBH 199. CHEM 180 with a grade of A or better. CHEM 199 with a grade of A or better. PHYS 195 with a grade of A or better. ESS 199 with a grade of A or better. CEMS 199 with a grade of A or better. CEE 199 with a grade of A or better. MAE 199 with a grade of A or better. BIOL 199 with a grade of A or better. PUBH 199 with a grade of A or better. Consent of the instructor is also accepted. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Chemistry Majors have first consideration for enrollment.

**(Ib)****CHEM H180A. Honors Research in Chemistry. 4 Units.**

Undergraduate honors research in Chemistry. A student time commitment of 10-15 hours per week is required.

Restriction: Chemistry Honors students only. Campuswide Honors Collegium students only.

**CHEM H180B. Honors Research in Chemistry. 4 Units.**

Undergraduate honors research in Chemistry. A student time commitment of 10-15 hours per week is required.

Prerequisite: CHEM H180A

Restriction: Campuswide Honors Collegium students only.

**CHEM H180C. Honors Research in Chemistry. 4 Units.**

Undergraduate honors research in Chemistry. A student time commitment of 10-15 hours per week is required.

Prerequisite: CHEM H180B

Restriction: Chemistry Honors students only. Chemistry majors participating in the Campuswide Honors Program students only.

**CHEM H181W. Honors Seminar in Chemistry. 2 Units.**

Students will receive guidance in the preparation of oral and written research presentations. A written thesis will be prepared and a formal research seminar will be presented.

Corequisite: CHEM H180C

Prerequisite: CHEM H180A and CHEM H180B. Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**CHEM 191. Chemistry Outreach Program. 2 Units.**

Involves intensive participation in the UCI Chemistry Outreach Program, which performs Chemistry demonstrations at local high schools.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 6 times.

**CHEM 192. Tutoring in Chemistry. 2 Units.**

Enrollment limited to participants in the Chemistry Peer Tutoring Program.

Repeatability: May be taken for credit 9 times.

Restriction: The first eight may be taken for a letter grade. The remaining ten units must be taken Pass/Not Pass only. NOTE: No more than eight units may be counted toward the 180 units required for graduation. Satisfies no degree requirement other than contribution to the 180-unit total.

**CHEM 193. Research Methods. 4 Units.**

Explores tools of inquiry for developing and implementing science research projects. Students undertake independent projects requiring data collection, analysis, and modeling, and the organization and presentation of results. Additional topics include ethical issues and role of scientific literature.

Prerequisite: BIOL 14 or PS 5

Same as BIOL 108, PHYS 193.

**CHEM 197. Professional Internship. .5-4 Units.**

Internship program that provides students with opportunity to develop professional skills necessary for competitive placement in their chosen chemical-inspired industry. Students gain new and field-specific skills outside the classroom while participating in a supervised internship.

Prerequisite: Enrollment requires completion of an application form. Student selection is made by a selection committee.

Repeatability: May be taken for credit for 13 units.

Restriction: Upper-division students only. Chemistry Majors only.

**CHEM 199. Independent Study in Chemistry. 1-4 Units.**

Independent research with Chemistry faculty. Student time commitment of three to four hours per week per unit is expected, and a written report on the independent study is required at the end of each quarter of enrollment.

Repeatability: Unlimited as topics vary.

**CHEM 200. Conduct of Research . 2 Units.**

Introduces new graduate students to ethical conduct of scientific research, mentoring, and current research in the Department of chemistry.

Repeatability: May be taken for credit 2 times.

**CHEM 201. Organic Reaction Mechanisms I. 4 Units.**

Advanced treatment of basic mechanistic principles of modern organic chemistry. Topics include molecular orbital theory, orbital symmetry control of organic reactions, aromaticity, carbonium ion chemistry, free radical chemistry, the chemistry of carbenes and carbanions, photochemistry, electrophilic substitutions, aromatic chemistry.

Prerequisite: CHEM 132A and CHEM 132B and CHEM 132C

**CHEM 202. Organic Reaction Mechanisms II. 4 Units.**

Topics include more in-depth treatment of mechanistic concepts, kinetics, conformational analysis, computational methods, stereoelectronics, and both solution and enzymatic catalysis.

Prerequisite: CHEM 201

**CHEM 203. Organic Spectroscopy. 4 Units.**

Modern methods used in structure determination of organic molecules. Topics include mass spectrometry; ultraviolet, chiroptical, infrared, and nuclear magnetic resonance spectroscopy.

Prerequisite: (CHEM 51A and CHEM 51B and CHEM 51C) or (CHEM H52A and CHEM H52B and CHEM H52C)

Restriction: Graduate students only.

**CHEM 204. Organic Synthesis I. 4 Units.**

Fundamentals of modern synthetic organic chemistry is developed. Major emphasis is on carbon-carbon bond forming methodology. Topics include carbonyl annelations, cycloadditions, sigmatropic rearrangements, and organometallic methods.

**CHEM 205. Organic Synthesis II. 4 Units.**

Fundamentals of modern synthetic organic chemistry will be developed. Major emphasis this quarter is on natural product total synthesis and retrosynthetic (antithetic) analysis.

Prerequisite: CHEM 204

**CHEM 206. Advanced Data Acquisition and Analysis. 4-6 Units.**

Introduces students to a variety of practical laboratory techniques, including lock-in, boxcar, coincidence counting, noise filtering, PID control, properties of common transducers, computer interfacing to instruments, vacuum technology, laboratory safety, basic mechanical design, and shop skills. Materials fee.

Same as PHYS 206.

Concurrent with PHYS 106.

**CHEM 207. Applied Physical Chemistry. 4 Units.**

Introduction to fundamental concepts in molecular structure and reactivity: theory of bonding, valence and molecular orbitals; structure and reactivity in inorganic chemistry; elements in molecular group theory; nomenclature in organic chemistry; and survey of macromolecules.

Same as PHYS 207.

**CHEM 208. Math Methods. 4 Units.**

Applications of mathematics to physical and chemical problems. Calculus of special functions, complex variables and vectors; linear vector spaces and eigenvalue problems. Differential equations.

Same as PHYS 208.

**CHEM 213. Chemical Kinetics. 4 Units.**

Surveys gas phase and organic reaction mechanisms and their relationship to kinetic rate laws; treats the basic theory of elementary reaction rates. A brief presentation of modern cross-sectional kinetics is included.

Prerequisite: CHEM 132A and CHEM 132B and CHEM 132C

**CHEM 215. Inorganic Chemistry I. 4 Units.**

Principles of modern inorganic chemistry with applications to chemical systems of current interest. Inorganic phenomena are organized into general patterns which rationalize observed structures, stabilities, and physical properties.

Prerequisite: CHEM 107 and CHEM 132A and CHEM 132B and CHEM 132C

Restriction: Graduate students only.

**CHEM 216. Organometallic Chemistry. 4 Units.**

Synthesis and reactivity of organometallic complexes with an emphasis on mechanisms. Topics include bonding and fluxional properties; metal-carbon single and multiple bonds; metal  $\pi$ -complexes. Applications to homogenous catalysis and organic synthesis are incorporated throughout the course.

Prerequisite: CHEM 107 or CHEM 215

**CHEM 217. Physical Inorganic Chemistry. 4 Units.**

General principles of the spectroscopy and magnetism of inorganic compounds. Characterization of inorganic complexes by infrared, near-infrared, visible, ultraviolet, NMR, EPR, EXAFS, and Mossbauer spectroscopies. Some necessary group theory developed.

Prerequisite: CHEM 215

**CHEM 218. Metallobiochemistry . 4 Units.**

A review of the biochemistry of metallic elements emphasizing: methods for studying metals in biological systems; the chemical basis for nature's exploitation of specific elements; structures of active sites; mechanisms; solid-state structures and devices; metals in medicine.

Prerequisite or corequisite: CHEM 131C or CHEM 132C

Same as MBB 248.

**CHEM 219. Chemical and Structural Biology. 4 Units.**

A survey of the organic chemistry underlying biological function. Introduction to chemical genetics, receptor-ligand interactions, small molecule agonists and antagonists, combinatorial synthesis, high throughput assays, molecular evolution, protein and small molecule design.

Restriction: Graduate students only.

**CHEM 221A. Fundamentals of Molecular Biophysics. 4 Units.**

An overview of the principles and concepts in molecular biophysics. Topics covered include energy and entropy in biology, non-equilibrium reaction kinetics, random walks and molecular diffusion, molecular forces in biology.

Prerequisite: Undergraduate courses in physical chemistry and biochemistry.

Repeatability: May be taken for credit 3 times.

**CHEM 223. Biological Macromolecules. 4 Units.**

Introduction to nucleic acid and protein structure, dynamics, and function. Topics include analytical methods, molecular evolution, folding, and catalysis.

Same as PHMS 223.

**CHEM 224. Molecular and Cellular Biophotonics. 4 Units.**

Principles underlying the application of photonic technologies to biomolecular and cellular systems. Sample technologies Optical Tweezers, Linear and Nonlinear Optical Microscopy and Fluorescence Lifetime and Correlation Methods, and their use to investigate emergent problems in Molecular, Cellular, and Developmental Biology.

Same as BME 224.

Restriction: Graduate students only.

**CHEM 225. Polymer Chemistry: Synthesis and Characterization of Polymers. 4 Units.**

Structure of synthetic and natural polymers. Survey of modern polymer synthetic methods. Molecular weight and molecular weight distribution. Chain conformation and stereochemistry. Introduction to polymer characterization, chain models, and solution behavior.

Prerequisite: Undergraduate courses in organic and physical chemistry.

**CHEM 228. Electromagnetism. 4 Units.**

Maxwell's equations, electrodynamics, electromagnetic waves and radiation, wave propagation in media, interference and quantum optics, coherent and incoherent radiation, with practical applications in interferometry, lasers, waveguides, and optical instrumentation.

Same as PHYS 228.

**CHEM 229A. Computational Methods. 4 Units.**

Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.

Same as PHYS 229A.

Concurrent with PHYS 100.

**CHEM 230. Classical Mechanics and Electromagnetic Theory. 4 Units.**

Fundamentals of classical mechanics and electromagnetic theory are developed with specific application to molecular systems. Newtonian, Lagrangian, and Hamiltonian mechanics are developed. Boundary value problems in electrostatics are investigated. Multipole expansion and macroscopic media are discussed from a molecular viewpoint.

Prerequisite: CHEM 132A and CHEM 132B and CHEM 132C

**CHEM 231A. Fundamentals of Quantum Mechanics. 4 Units.**

The postulates of quantum mechanics are discussed and applied to a variety of model problems.

Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C

**CHEM 231B. Applications of Quantum Mechanics. 4 Units.**

Approximate methods for solving atomic and molecular structure problems are developed, and the application of quantum mechanics to spectroscopy is introduced.

Prerequisite: CHEM 231A

**CHEM 231C. Molecular Spectroscopy. 4 Units.**

Theory and techniques of spectroscopy as used for the study of molecular and condensed phase properties. Coherent time domain spectroscopies are covered.

Prerequisite: CHEM 231B

**CHEM 232A. Thermodynamics and Introduction to Statistical Mechanics. 4 Units.**

A detailed discussion from an advanced point of view of the principles of classical thermodynamics. The fundamentals of statistical mechanics. Topics include an introduction to ensemble theory, Boltzmann statistics, classical statistical mechanics, and the statistical mechanics of ideal gas systems.

Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C

**CHEM 232B. Advanced Topics in Statistical Mechanics. 4 Units.**

Continued discussion of the principles of statistical mechanics. Applications to topics of chemical interest including imperfect gases, liquids, solutions, and crystals. Modern techniques such as the use of autocorrelation function methods.

Prerequisite: CHEM 232A

**CHEM 232C. Non-Equilibrium Statistical Mechanics. 4 Units.**

Phenomenology of material processes, including: kinetic theories of transport and continuum, linear response theory, critical phenomena of phase transition, self-assembly, and nucleation.

**CHEM 233. Nuclear and Radiochemistry. 4 Units.**

Advanced treatment of nuclear structure, nuclear reactions, and radioactive-decay processes. Introduction to nuclear activation analysis, isotope effects, radiation chemistry, hot-atom chemistry, nuclear age-dating methods, nuclear reactors, and nuclear power.

Same as CBE 276.

Restriction: Graduate students only.

Concurrent with CHEM 133 and CBE 176.

**CHEM 237. Mathematical Methods in Chemistry. 4 Units.**

Survey of essential math methods in chemistry. Topics may include series and limits, complex analysis, Fourier and Laplace transforms, linear algebra and operators (theory and algorithms), differential equations, and probability concepts for stochastic processes.

**CHEM 241. Current Issues Related to Air Quality, Climate, and Energy. 4 Units.**

Current issues related to the atmosphere, climate, and air quality in the context of energy conversion and sustainability. Topics include transportation systems; building design; impacts on humans and ecosystems; modeling and meteorology; economics; and application to public policies.

Prerequisite: MAE 261 or CHEM 245 or ESS 240

Same as MAE 260.

Restriction: Graduate students only.

**CHEM 242A. Physical and Geometrical Optics. 4 Units.**

Focuses on the practical aspects of optics and optical engineering, starting at the fundamentals. Topics include geometrical optics, ray tracing, polarization optics, interferometers, and diffractive optics.

Restriction: Graduate students only.

Concurrent with PHYS 134A.

**CHEM 243. Advanced Instrumental Analysis. 4 Units.**

Theory and applications of modern advanced instrumental methods of analysis. Includes data acquisition, storage, retrieval, and analysis; Fourier transform methods; vacuum technologies; magnetic sector; quadrupole and ion trap mass spectrometry; surface science spectroscopic methods; lasers and optics.

Prerequisite: CHEM 152 and CHEM 132C. CHEM 152 with a grade of B or better. CHEM 132C with a grade of B or better

**CHEM 244. Detection and Measurement of Radiation. 4 Units.**

Basic principles of detection and measurement of ionizing radiation; both theory and practical aspects of measurement techniques for alpha, beta, gamma, and neutron radiation, properties of different detector materials, electronics and data treatments, and analysis.

Prerequisite: CHEM 233 or CBE 276

Same as CBE 277.

Restriction: Graduate students only.

**CHEM 245A. Gas-Phase Atmospheric Chemistry. 4 Units.**

Sources, chemistry, sinks, and measurements of key atmospheric gaseous species. Chemistry of photochemical oxidant formation, transformation of key inorganic and organic trace gases, and stratospheric ozone cycling. Applications of atmospheric chemistry models to control strategies.

Prerequisite: CHEM 132A and CHEM 132B and CHEM 132C

Concurrent with CHEM 145A.

**CHEM 245B. Multi-Phase Atmospheric Chemistry. 4 Units.**

Chemical and physical processes leading to the production, aging, and removal of atmospheric particles. Multi-phase processes involving gases, particles, water droplets, and environmental surfaces. Approaches for modeling these processes with applications to control strategies.

Prerequisite: CHEM 245A

Concurrent with CHEM 145B.

**CHEM 245C. Special Topics in Atmospheric Chemistry. 4 Units.**

The subjects covered vary from year to year.

Prerequisite: CHEM 245B

Repeatability: Unlimited as topics vary.

**CHEM 246. Separations and Chromatography. 4 Units.**

Introduction to modern separation techniques such as gas chromatography, high-performance liquid chromatography, supercritical fluid chromatography, capillary electrophoresis, and field flow fractionation. Applications of these separation strategies are discussed.

**CHEM 247. Current Problems in Analytical Chemistry. 4 Units.**

Surveys current research challenges in analytical chemistry. Topics include electrochemistry, chromatography, spectroscopy, and mass spectrometry.

**CHEM 248. Electrochemistry. 4 Units.**

Fundamentals of electrochemistry including thermodynamics and the electrochemical potential, charge transfer kinetics, and mass transfer. Methods based on controlled potential and controlled current are described; the effects of slow heterogeneous kinetics and the perturbation caused by homogeneous chemistry are discussed.

**CHEM 249. Analytical Spectroscopy. 4 Units.**

Advanced treatment of spectroscopic techniques and instrumentation. Atomic and molecular absorption, emission, and scattering processes and their application to quantitative chemical analysis are outlined. Puts different spectroscopic techniques in perspective and demonstrates most appropriate applications to analytical problems.

**CHEM 250. Computational Chemistry. 4 Units.**

Basic concepts, methods, and techniques in computational chemistry: density functional and wavefunction theory, molecular property calculations, analysis tools, potential energy surfaces, vibrational effects, molecular dynamics simulations.

Restriction: Graduate students only.

Concurrent with CHEM 150.

**CHEM 250L. Computational Chemistry Laboratory. 4 Units.**

Introduction to the practice of modern computational chemistry through a series of advanced computational experiments.

Prerequisite: CHEM 250

Restriction: Graduate students only.

Concurrent with CHEM 150L.

**CHEM 251. Special Topics in Organic Chemistry. 1-4 Units.**

Advanced topics in organic chemistry.

Repeatability: Unlimited as topics vary.

**CHEM 252. Special Topics in Physical Chemistry. 1-4 Units.**

Advanced topics in physical chemistry. Materials fee.

Repeatability: Unlimited as topics vary.

**CHEM 253. Special Topics in Inorganic Chemistry. 4 Units.**

Advanced topics in inorganic chemistry.

Prerequisite: CHEM 215

Repeatability: Unlimited as topics vary.

**CHEM 254. Special Topics in Computational and Theoretical Chemistry. 4 Units.**

Subjects covered vary from year to year.

Repeatability: Unlimited as topics vary.

**CHEM 263. Materials Chemistry . 4 Units.**

An introduction to crystalline solids, descriptive crystal chemistry, solid-state synthesis and characterization techniques, x-ray and electron diffraction, phase diagrams, electronic band structure of extended solids, semi conductors, and nanoscale inorganic materials.

**CHEM 266. Current Topics in Chemical, Applied, and Materials Physics. 1 Unit.**

The subjects covered vary from year to year. Connection between fundamental principles and implementations in practice in science, industry, and technology.

Repeatability: May be repeated for credit unlimited times.

Same as PHYS 266.

**CHEM 267. Photochemistry. 4 Units.**

Photochemical and photovoltaic processes in molecules and semiconductors; quantum mechanics; statistical thermodynamics; kinetics; and experimental techniques relevant to photon absorption and emission; photochemical charge separation, recombination, and transport of electrons and ions; and interfacial redox chemistry.

Restriction: Seniors only. Graduate students only.

**CHEM 268. NMR Spectroscopy . 4 Units.**

Students learn the theoretical basis of solid-state or solution NMR (alternate times), including the basics of pulse sequence design. Extensive literature reading is required.

Prerequisite: CHEM 231A

Repeatability: May be taken for credit 2 times.

**CHEM 273. Technical Communication Skills. 2 Units.**

Development of effective communication skills, oral and written presentations, through examples and practice.

Grading Option: Satisfactory/unsatisfactory only.

Same as PHYS 273.

**CHEM 280. Research. 2-12 Units.**

Supervised original research toward the preparation of a Ph.D dissertation or M.S. thesis.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CHEM 290. Seminar. 1 Unit.**

Weekly seminars and discussions on general and varied topics of current interest in chemistry.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CHEM 291. Research Seminar. 4 Units.**

Detailed discussion of research problems of current interest in the Department. Format, content, and frequency of the course are variable.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**CHEM 292. Graduate Symposium. 2 Units.**

Students present public seminars on literature-based research topics in contemporary chemistry. Topics to be chosen by student and approved by instructor.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**CHEM 299. Independent Study. 1-4 Units.**

Independent research with Chemistry faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CHEM 399. University Teaching. 1-4 Units.**

Required of and limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

## Chemistry, B.S.

The major in Chemistry is elected by students planning careers in the chemical sciences and frequently also by those whose interests lie in other disciplines such as biology, medicine, public health, earth sciences, ecology, secondary education, business, and law. New freshman and transfer Chemistry students are strongly encouraged to take an orientation seminar, CHEM 11, where they learn about the Chemistry major requirements, the Chemistry Department, and the career options available to students after graduation.

The curriculum of the Department is designed to satisfy the diverse needs of these students and others who may have occasion to study chemistry. The year-long lecture course sequence of CHEM M2A-CHEM M2B-CHEM M2C and laboratory course sequence of CHEM M2LA-CHEM M2LB-CHEM M3LC (or the Honors sequence of CHEM H2A-CHEM H2B-CHEM H2C and CHEM H2LA-CHEM H2LB-CHEM M3LC) cover the fundamentals of general and analytical chemistry, and serve as prerequisites to all study in the Department at more advanced levels. The subject matter of these courses also serve as a thorough introduction to the varied aspects of modern chemistry for students who do not wish to pursue their studies beyond the introductory level.

Completion of a one-year sequence in organic chemistry lectures, CHEM 51A-CHEM 51B-CHEM 51C, along with organic chemistry laboratory courses, is required for Chemistry majors and for students of the life sciences. These core organic chemistry courses are typically taken by students in their second year at UCI. All Chemistry students then take inorganic chemistry lecture and laboratory courses, CHEM 107 and CHEM 107L, an advanced instrumental analysis course, CHEM 152, and a three-quarter sequence of physical chemistry, CHEM 132A – CHEM 132B – CHEM 132C. Students will also take a mathematical and computing skill course, CHEM 5, in parallel with CHEM 132A, to help them improve their learning experience in the physical chemistry sequence.

To complete the Chemistry major requirements, the students take a minimum of five upper-division elective courses chosen from a broad menu, which includes graduate level courses. Certain advanced courses required of Chemistry majors may also be of interest to other majors. Many students elect to take a pre-defined set of elective courses in order to fulfill requirements for one of the concentrations and specializations, such as Chemical Biology, Chemistry Education, Environmental Chemistry, Medicinal Chemistry, Nuclear and Radiochemistry, Synthetic Chemistry, or Theoretical and Computational Chemistry. For example, Chemistry majors who are interested in teaching chemistry at the secondary level often complete the optional concentration in Chemistry Education.

The undergraduate program of the Chemistry Department emphasizes close contact with research, and all Chemistry majors are encouraged to engage in research or independent study under the direction of a faculty member. Research is an integral requirement of the ACS certified degree, and it greatly increases chances for admission into graduate and professional schools. Students have an opportunity to write their research thesis as part of an upper-

division writing course CHEM 180W (CHEM H181W in the Honors sequences). Information describing the procedures for arranging an undergraduate research opportunity is available on the Chemistry Department website (<http://www.chem.uci.edu/undergrad/>).

Chemistry majors who plan subsequent study in medical, dental, or other professional schools should request information concerning admission requirements directly from the schools which they seek to enter. Excellent counseling about preparation for a career in the health sciences is provided by the health science advisors in the School of Biological Sciences. Those intending to pursue graduate studies in chemistry should discuss their plans with a research area advisor no later than the fall quarter of their senior year. The current advisors for each research area are listed on the Chemistry Department website (<http://www.chem.uci.edu/undergrad/>).

Students may be admitted to the Chemistry major upon entering the University as freshmen, via change of major, or as transfer students from other colleges and universities. Information about change of major policies is available in the Physical Sciences Student Affairs Office and at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>). For transfer student admission, preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the following required courses: one year of general chemistry with laboratory and one year of approved calculus. Completion of one year of organic chemistry is strongly recommended.

**All students must meet the University Requirements.**

**School Requirements: None.**

**Departmental Requirements <sup>1</sup>**

**Basic Requirements**

MATH 2A- 2B- 2D	Single-Variable Calculus and Single-Variable Calculus and Multivariable Calculus
PHYSICS 7C- 7D- 7E	Classical Physics and Classical Physics and Classical Physics
PHYSICS 7LC- 7LD	Classical Physics Laboratory and Classical Physics Laboratory

Select one of the following sequences and accompanying labs:

CHEM M2A- M2B- M2C	Majors General Chemistry Lecture and Majors General Chemistry Lecture and Majors General Chemistry Lecture
CHEM M2LA- M2LB	Majors General Chemistry Laboratory and Majors General Chemistry Laboratory
or	
CHEM H2A- H2B- H2C	Honors General Chemistry and Honors General Chemistry and Honors General Chemistry
CHEM H2LA- H2LB	Honors General Chemistry Laboratory and Honors General Chemistry Laboratory

Complete the analytical chemistry laboratory

CHEM M3LC	Majors Quantitative Analytical Chemistry Laboratory
-----------	---

Select one of the following organic chemistry sequences and accompanying labs:

CHEM 51A- 51B- 51C	Organic Chemistry and Organic Chemistry and Organic Chemistry
CHEM M52LA- M52LB- M52LC	Majors Organic Chemistry Laboratory and Majors Organic Chemistry Laboratory and Majors Organic Chemistry Laboratory
or	
CHEM H52A-chem h52b-chem h52c	and and
CHEM H52LA- H52LB- H52LC	Honors Organic Chemistry Laboratory and Honors Organic Chemistry Laboratory and Honors Organic Chemistry Laboratory

Complete:

CHEM 5	Scientific Mathematical and Computing Skills
CHEM 107- 107L	Inorganic Chemistry and Inorganic Chemistry Laboratory

CHEM 152	Advanced Analytical Chemistry
CHEM 132A- 132B- 132C	Chemical Thermodynamics, Kinetics, and Dynamics and Quantum Principles, Spectroscopy, and Bonding and Molecular Structure and Elementary Statistical Mechanics

**Elective Requirements <sup>2</sup>**

Select at least five electives from the following lists, including at least two courses selected from the lecture list and two courses selected from the laboratory list:

**Lectures:**

BIO SCI 98	Biochemistry
BIO SCI 99	Molecular Biology
CBE 110	Reaction Kinetics and Reactor Design
CBE 161	Introduction to Biochemical Engineering
CBE 130	Separation Processes
CBE 145	Chemical Process Control
CBE 178	
CBE 181	Polymer Science and Engineering

### Optional American Chemical Society Certification

For ACS Certification, the program must include:

A. The Chemical Biology lecture and lab courses:

CHEM 128	Introduction to Chemical Biology
CHEM 128L	Introduction to Chemical Biology Laboratory Techniques

B. One course selected from the following:

CHEM 153	Physical Chemistry Laboratory
CHEM 156	Advanced Laboratory in Chemistry and Synthesis of Materials
CHEM 160	Organic Synthesis Laboratory
CHEM 180	Undergraduate Research
CHEM H180A	Honors Research in Chemistry
CHEM H180B	Honors Research in Chemistry
CHEM H180C	Honors Research in Chemistry

C. One course or the lecture/lab pair selected from:

CHEM 125	Advanced Organic Chemistry
CHEM 127	Inorganic Chemistry II
CHEM 133	Nuclear and Radiochemistry
CHEM 133L	Nuclear and Radiochemistry Laboratory
CHEM 138	Introduction to Computational Organic Chemistry
CHEM 141	Environmental Chemistry
CHEM 150	Computational Chemistry
CHEM 150L	Computational Chemistry Laboratory
CHEM 177	Medicinal Chemistry
CHEM 177L	Medicinal Chemistry Laboratory

or

CHEM 201-205, 213-249

D. One course or the lecture/lab pair selected from list B or C.

E. Independent research with a written thesis submitted as part of CHEM 180W or CHEM H181W.

### Optional Concentrations and Specializations in Chemistry

The core chemistry curriculum provides the students with the foundational knowledge of the traditional areas of chemistry. In addition, the students have an option to focus their education on one of the following areas of chemistry by completing the chemistry core requirements and strategically choosing their elective requirements as shown below. At least two quarters of undergraduate research (CHEM 180, CHEM H180A, CHEM H180B, CHEM H180C) with a research group chosen in consultation with the faculty advisors are strongly recommended but not required for all the concentrations and specializations listed below. The names of the faculty advisors for each concentration and specialization can be found on the Department of Chemistry website.

Only one specialization or concentration may appear on the transcript. If students simultaneously satisfy requirements for more than one specialization or concentration, they should choose which one will be appearing on their transcript.

#### Optional Concentration in Chemical Biology

BIO SCI 97	Genetics
BIO SCI 98	Biochemistry

BIO SCI 99	Molecular Biology
CHEM 128	Introduction to Chemical Biology
CHEM 128L	Introduction to Chemical Biology Laboratory Techniques

### Optional Specialization in Environmental Chemistry

CHEM 145A or EARTHSS 142	Gas-Phase Atmospheric Chemistry
EARTHSS 144	Atmospheric Chemistry
CHEM 141	Marine Geochemistry and Biogeochemistry
CHEM 153	Environmental Chemistry
	Physical Chemistry Laboratory

### Optional Specialization in Medicinal Chemistry

CHEM 128	Introduction to Chemical Biology
CHEM 128L	Introduction to Chemical Biology Laboratory Techniques
CHEM 160	Organic Synthesis Laboratory
CHEM 177	Medicinal Chemistry
CHEM 177L	Medicinal Chemistry Laboratory

### Optional Specialization in Nuclear and Radiochemistry

CHEM 133	Nuclear and Radiochemistry
CHEM 133L	Nuclear and Radiochemistry Laboratory
CBE 178	
CHEM 153	Physical Chemistry Laboratory

### Optional Specialization in Synthetic Chemistry

CHEM 125	Advanced Organic Chemistry
CHEM 127	Inorganic Chemistry II
CHEM 156	Advanced Laboratory in Chemistry and Synthesis of Materials
CHEM 160	Organic Synthesis Laboratory

### Optional Concentration in Chemistry Education

CHEM 193	Research Methods
EDUC 55	Knowing and Learning in Mathematics and Science
PHY SCI 5	California Teach 1: Introduction to Science and Mathematics Teaching
PHY SCI 105	California Teach 2: Middle School Science and Mathematics Teaching

### Optional Concentration in Theoretical and Computational Chemistry

The concentration in Theoretical and Computational Chemistry aims to provide a rigorous education for Chemistry majors with special interests in theory and computation. Compared to the regular Chemistry major, additional courses in mathematics, physics, and computer science are required, while upper-division laboratory courses are option. Enrolling in this concentration requires approval by a faculty advisor. The advisors will be members of the Theoretical and Computational Chemistry faculty group, and will assist the students in choosing elective courses tailored to the students' interests.

A. Complete the following:

MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
PHYSICS 50	Introductory Mathematical Physics
CHEM 150	Computational Chemistry
CHEM 150L	Computational Chemistry Laboratory

**Select at least nine courses from the following or the Chemistry major electives:**

B. Select at least one from the following:

PHYSICS 111A	Classical Mechanics
PHYSICS 112A	Electromagnetic Theory
PHYSICS 111B	Classical Mechanics
PHYSICS 112B	Electromagnetic Theory
PHYSICS 113A	Quantum Physics

PHYSICS 113B	Quantum Physics
PHYSICS 113C	Quantum Physics
PHYSICS 115A	Statistical Physics
PHYSICS 125A	Mathematical Physics
PHYSICS 125B	Mathematical Physics

C. Select at least one from the following:

MATH 105A- 105LA	Numerical Analysis I and Numerical Analysis Laboratory
MATH 105B- 105LB	Numerical Analysis II and Numerical Analysis Laboratory
STATS 7	Basic Statistics
STATS 110	Statistical Methods for Data Analysis I
STATS 111	Statistical Methods for Data Analysis II
STATS 112	Statistical Methods for Data Analysis III

D. Select at least one of the following:

EECS 12	Introduction to Programming
EECS 20	Computer Systems and C Programming
EECS 22	Advanced C Programming
EECS 22L	Software Engineering Project in C Language

Optional Courses - The following courses are required for the regular Chemistry major, but optional for the Concentration in Theoretical and Computational Chemistry:

CHEM 5	Scientific Mathematical and Computing Skills
CHEM 107L	Inorganic Chemistry Laboratory
CHEM 152	Advanced Analytical Chemistry

All electives listed under the Chemistry major.

### Sample Program - Concentration in Theoretical and Computational Chemistry

Items in parentheses are recommended choices or alternatives.

Freshman

### Secondary Teaching Certification Option

With *additional* course work and field experience offered through the UCI Cal Teach program, students who complete the concentration in Chemistry Education can also earn a California Preliminary Single Subject Teaching Credential. Completing the bachelor's degree, concentration, and teacher certification in four years is possible with careful, early planning. Additional courses required for teacher certification are:

EDUC 109	Reading and Writing in Mathematics and Science
EDUC 143AW- 143BW	Classroom Interactions I and Classroom Interactions II
EDUC 148	Complex Pedagogical Design
EDUC 158	Student Teaching Mathematics and Science in Middle/High School (two quarters)
LPS 60	The Making of Modern Science

Successful completion of EDUC 143AW-EDUC 143BW and EDUC 148 will be accepted in lieu of three electives (from the above Elective Requirements list) for students pursuing the concentration in Chemistry Education. For additional information about teacher certification requirements and enrollment procedures, see Preparation for Teaching Science and Mathematics. Interested students are strongly encouraged to contact the Cal Teach Resource and Advising Center or the Physical Sciences Student Affairs Office.

The departmental requirements leave the student a great deal of latitude in choice of courses; the student can choose to pursue interests ranging from biochemistry on the one hand to chemical physics on the other. Many of the basic requirements above coincide with those of the School of Biological Sciences. For this reason a double major in Chemistry and Biological Sciences is popular. The Department is approved by the American Chemical Society to offer an undergraduate degree certified by the Society as suitable background for a career in chemistry or for graduate study in chemistry. While it is not mandatory, it is desirable for students to pursue a course of study that the Department judges to merit a certified degree. Specifically, the following courses must be included in the program of study and must be taken for a letter grade:

CHEM 128	Introduction to Chemical Biology
or BIO SCI 98	Biochemistry

and two laboratory courses from the list of upper-division laboratory courses that are not already required for the major from the following:

CHEM 128L	Introduction to Chemical Biology Laboratory Techniques
CHEM 152	Advanced Analytical Chemistry
CHEM 153	Physical Chemistry Laboratory
CHEM 156	Advanced Laboratory in Chemistry and Synthesis of Materials
CHEM 160	Organic Synthesis Laboratory
CHEM 170	Radioisotope Techniques
CHEM 180	Undergraduate Research (or CHEM H180)

The Honors Program in Chemistry is a research-based program offered to selected Chemistry majors during their final year. Applicants to the program must have completed their junior year with a grade point average of at least 3.3 overall and in their Chemistry courses. They must also have demonstrated the potential of carrying out research of honors quality, as judged by the Chemistry faculty member who will supervise their research. Students in this program enroll in Honors Research in Chemistry (CHEM H180A-CHEM H180B-CHEM H180C) throughout their senior year and submit a formal thesis late in the spring quarter. They also enroll in the Honors Seminar in Chemistry (CHEM H181W), in which they receive instruction in scientific writing and present a formal research seminar. Successful completion of CHEM H181W satisfies the UCI upper-division writing requirement. NOTE: Students enrolled in the Honors Research in Chemistry (CHEM H180A-CHEM H180B-CHEM H180C) do not enroll in CHEM 180 (Undergraduate Research).

Students who complete these requirements, whose grade point average remains above the 3.3 standard, and whose research is judged to be of honors quality will graduate with Departmental Honors in Chemistry.

The Department also offers an Honors General Chemistry sequence, CHEM H2A-CHEM H2B-CHEM H2C. This course in general chemistry is designed for members of the Campuswide Honors Collegium (CHC) and other highly qualified students. It covers the same material as CHEM 1A-CHEM 1B-CHEM M3C, but in greater depth.

Additional information is available from the Chemistry Undergraduate Program Office.

## Chemistry, Ph.D.

The Department offers an M.S. and a Ph.D. in Chemistry. The Ph.D. is granted in recognition of breadth and depth of knowledge of the facts and theories of modern chemistry and an ability to carry out independent chemical research demonstrated through submission of an acceptable doctoral

dissertation. The M.S. may be earned either through submission of an acceptable Master's thesis (Plan I) or through an approved program of graduate course work and a comprehensive oral examination (Plan II). A Master's degree is not a prerequisite for admission to the Ph.D. program.

Students in the Ph.D. and M.S. Plan I (Thesis) programs are required to complete a minimum of seven approved four-unit courses including six graduate-level courses. The M.S. Plan II (Non-Thesis) program requires that the student complete 10 four-unit courses including eight graduate level courses and a comprehensive oral examination. Graduate students are expected to attain grades of B or better to remain in good academic standing. The comprehensive oral examination assesses the competence of the candidate in the areas of chemistry covered by the chosen course work, with unanimous agreement among the three examination committee members required for satisfactory completion.

Progress toward the Ph.D. during the first year is assessed by a written examination administered after completion of the first year of study. This examination covers either research accomplishments during the first year or comprehensive knowledge acquired in course work. The time and content of the examination depends upon the student's specific area of interest.

Training in teaching is an integral part of each graduate program, and all graduate degree candidates are expected to participate in the teaching program for at least four quarters during their graduate career.

Participants in the Ph.D. program take an oral examination for formal Advancement to Candidacy. This examination consists of an oral defense before a faculty committee of the student's dissertation research project, and an original research proposition conceived, developed, and documented by the student. The committee may examine the student at this time on any subject it deems relevant to the independent pursuit of chemical research. For students in organic chemistry, the candidacy exam must be taken by the end of the sixth quarter in residence. For students in inorganic chemistry, the candidacy exam must be taken by the end of the seventh quarter in residence.

The most important component of the Ph.D. program is the doctoral dissertation, which must describe the results of original research performed by the student under the supervision of a faculty member of the Department. The criterion for acceptability of the dissertation is that its contents be of a quality suitable for publication in a scientific journal of high editorial standards. Each Ph.D. candidate is expected to present the work described in the completed dissertation in a seminar before the Department, following which the candidate will be examined on the contents of the dissertation by a committee of the faculty. A Master's thesis presented in partial fulfillment of the requirements for the M.S. under Plan I must also describe the results of a student's original research performed under the direction of a faculty member. However, no public oral defense of the Master's thesis is required.

Residency requirements specify a minimum of six quarters in residence at UCI for Ph.D. candidates and three quarters for M.S. candidates.

The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

### **Master of Science in Chemistry Plan I (Thesis Plan)**

- Completion of a minimum of seven approved four-unit courses, including six graduate-level courses (as specified by the Department and excluding CHEM 280, CHEM 290, CHEM 291, and CHEM 399) with maintenance of a grade of B or better.
- Completion of the teaching requirement.
- Completion of three quarters in residence at UCI.
- Submission of an acceptable Master's thesis.

### **Master of Science in Chemistry Plan II (Non-Thesis Plan)**

- Completion of 10 four-unit courses including eight graduate-level courses (as specified by the department and excluding CHEM 290, CHEM 291, and CHEM 399 and counting CHEM 280 no more than once) with a grade of B or better.
- Completion of the teaching requirement.
- Completion of three quarters in residence at UCI.
- Satisfactory completion of a comprehensive oral examination.

### **Doctor of Philosophy in Chemistry**

- Completion of a minimum of seven approved four-unit courses, including six graduate-level courses (as specified by the Department and excluding CHEM 280, CHEM 290, CHEM 291, and CHEM 399) with maintenance of a grade of B or better. In addition, all students will be required to take a "Conduct of Research" course.
- Completion of the second-year Examination requirement.
- Completion of the Oral Examination requirement for Advancement to Candidacy.
- Completion of the teaching requirement.
- Completion of six quarters in residence at UCI.
- Submission of an acceptable doctoral dissertation.

### **Concentration in Chemical and Materials Physics**

This is an interdisciplinary program between condensed matter physics and physical chemistry, which is designed to eliminate the barrier between these two disciplines. Students with a B.S. in Physics, Chemistry, Materials Science and Engineering, or Chemical and Biomolecular Engineering are

encouraged to apply to the program. The goal of the concentration in Chemical and Materials Physics (ChaMP) is to provide students with a broad interdisciplinary education in the applied physical sciences that emphasizes modern laboratory and computational skills. The program accepts students for both the M.S. and the Ph.D. Upon admission to the program, students are assigned two faculty advisors, one from the Department of Physics and Astronomy, and one from the Department of Chemistry, to provide guidance on curriculum and career planning.

### Doctor of Philosophy Requirements

The curriculum for the ChaMP program includes a summer session to assimilate students with different undergraduate backgrounds; formal shop, laboratory, and computational courses; a sequence on current topics to bridge the gap between fundamental principles and applied technology; and a course to develop communication skills. The required courses include 10 core courses and three electives as follows. In certain situations, courses may be substituted by other courses with written approval of the student's research advisor and the ChaMP Chemistry graduate advisor:

#### A. Complete Core Courses:

CHEM 206	Advanced Data Acquisition and Analysis
CHEM 208	Math Methods
CHEM 266	Current Topics in Chemical, Applied, and Materials Physics

#### B. Select one of the following Computation/Machine Learning courses:

CHEM 229A	Computational Methods
CHEM 250	Computational Chemistry
PHYSICS 246	Special Topics in Astrophysics

#### C. Select one of the following Quantum Mechanics courses:

CHEM 231A	Fundamentals of Quantum Mechanics
or PHYSICS 215A	Quantum Mechanics

#### D. Select one of the following ChaMP Chemistry courses:

CHEM 231B	Applications of Quantum Mechanics
PHYSICS 215B	Quantum Mechanics
CHEM 231C	Molecular Spectroscopy
CHEM 263	Materials Chemistry

#### E. Select one of the following Statistical Mechanics/Thermodynamics courses:

CHEM 232A	Thermodynamics and Introduction to Statistical Mechanics
CHEM 232B	Advanced Topics in Statistical Mechanics
PHYSICS 214A	Statistical Physics

#### F. Select one of the following Communication courses:

CHEM 273	Technical Communication Skills
PHYSICS 273	Technical Communication Skills
PHY SCI 220	Science Communication Skills
PHYSICS 250	Physics and Astronomy Communications Skills

#### G. Select one of the following Classical Mechanics/Electromagnetism courses:

CHEM 228	Electromagnetism
CHEM 230	Classical Mechanics and Electromagnetic Theory
PHYSICS 213A	Electromagnetic Theory

#### H. Select one of the following ChaMP Physics courses:

PHYSICS 133	Introduction to Condensed Matter Physics
PHYSICS 238A	Condensed Matter Physics
PHYSICS 239A	Plasma Physics

#### Electives (three of the following must be taken)

CHEM 213	Chemical Kinetics
CHEM 225	Polymer Chemistry: Synthesis and Characterization of Polymers
CHEM 232C	Non-Equilibrium Statistical Mechanics
CHEM 233	Nuclear and Radiochemistry
CHEM 243	Advanced Instrumental Analysis
CHEM 248	Electrochemistry
CHEM 249	Analytical Spectroscopy
CHEM 267	Photochemistry
EECS 285B	Lasers and Photonics

ENGRMSE 259	Transmission Electron Microscopy
PHYSICS 134A	Physical and Geometrical Optics
PHYSICS 211	Classical Mechanics
PHYSICS 215B	Quantum Mechanics
PHYSICS 222	Continuum Mechanics
PHYSICS 230A	Biophysics of Molecules and Molecular Machines
PHYSICS 230B	Biophysics of Molecules and Molecular Machines
PHYSICS 233A- 233B	Principles of Imaging and Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging
PHYSICS 238B- 238C	Condensed Matter Physics and Condensed Matter Physics

or other courses with written approval from the student's research advisor and the ChaMP Chemistry graduate advisor.

In addition to the core ChaMP requirements listed above, students are expected to complete the following Doctor of Philosophy in Chemistry requirements:

- Completion of the second-year Examination requirement.
- Completion of the Oral Examination requirement for Advancement to Candidacy.
- Completion of the teaching requirement.
- Completion of six quarters in residence at UCI.
- Submission of an acceptable doctoral dissertation.

### Master of Science in Chemistry

- Completion of 10 core courses and three electives that make up the required coursework for the Ph.D. program with a grade of B or better.
- Completion of the teaching requirement.
- Completion of three quarters in residence at UCI.
- Satisfactory completion of a comprehensive examination.

### Graduate Gateway Program in Medicinal Chemistry and Pharmacology (MCP)

The one-year graduate Gateway Program in Medicinal Chemistry and Pharmacology (MCP) is designed to function in concert with selected department programs, including the Ph.D. in Chemistry. Detailed information is available in the Department of Pharmaceutical Sciences section and on the Pharmaceutical Sciences website. (<http://www.pharmsci.uci.edu/>)

## Department of Earth System Science

### Eric Rignot, Chair

3200 Croul Hall  
949-824-8794  
<http://www.ess.uci.edu/>

Understanding global environmental issues such as global warming, stratospheric ozone depletion, and worldwide air pollution requires the cooperation of scientists across many fields. Global change is projected to accelerate through the 21st century and will impact the ecosystems that preserve the habitability of the planet. The Department of Earth System Science focuses on the atmosphere, land, and oceans, how these interact as a system, and how the Earth will change over a human lifetime. Earth System Science (ESS) is inherently interdisciplinary in scope, linking oceanography, atmospheric and terrestrial sciences, climatology, hydrology, biology, physics, and chemistry to understand the environment. ESS faculty includes chemists, biologists, ecologists, physicists, hydrologists, geologists, meteorologists, engineers, applied mathematicians, and oceanographers. The wide-ranging expertise of ESS faculty and teaching assistants allows students to learn valuable scientific skills in the classroom, laboratory, and field experiences.

- Earth and Atmospheric Sciences, Minor
- Earth System Science, B.S.
- Earth System Science, Ph.D.

### Faculty

Steven D. Allison, Ph.D. Stanford University, *Professor of Ecology and Evolutionary Biology; Earth System Science*

Elizabeth D. Crook, Ph.D. University of California, Santa Cruz, *Assistant Professor of Teaching of Earth System Science*

Claudia I. Czimczik, Ph.D. Max Planck Institute, *Associate Professor of Earth System Science*

Kristen A. Davis, Ph.D. Stanford University, *Associate Professor of Civil and Environmental Engineering; Earth System Science* (coastal oceanography, fluid mechanics, turbulent flows)

Steven J. Davis, Ph.D. Stanford University, *Associate Professor of Earth System Science; Civil and Environmental Engineering*

Ellen R. Druffel, Ph.D. University of California, San Diego, *Fred Kavli Chair in Earth System Science and Distinguished Professor of Earth System Science*

Benis Egoh, Ph.D. Stellenbosch University, *Assistant Professor of Earth System Science*

Julie E. Ferguson, Ph.D. Oxford University, *Associate Professor of Teaching of Earth System Science*

Michael L. Goulden, Ph.D. Stanford University, *Professor of Earth System Science; Ecology and Evolutionary Biology*

Alex Guenther, Ph.D. Washington State University, *Professor of Earth System Science*

Kathleen Johnson, Ph.D. University of California, Berkeley, *Associate Professor of Earth System Science*

Saewung Kim, Ph.D. Georgia Institute of Technology, *Associate Professor of Earth System Science*

Katherine Mackey, Ph.D. Stanford University, *Clare Booth Luce Assistant Professor of Earth System Science*

Gudrun Magnusdottir, Ph.D. Colorado State University, *Professor of Earth System Science*

Adam Martiny, Ph.D. Technical University of Denmark, *Professor of Earth System Science; Ecology and Evolutionary Biology*

Jefferson Moore, Ph.D. Oregon State University, *Professor of Earth System Science*

Mathieu Morlighem, Ph.D. Ecole Centrale Paris, *Vice Chair and Associate Professor of Earth System Science*

Michael J. Prather, Ph.D. Yale University, *UCI Distinguished Professor of Earth System Science*

Francois W. Primeau, Ph.D. Massachusetts Institute of Technology, *Professor of Earth System Science*

Michael S. Pritchard, Ph.D. University of California, San Diego, *Associate Professor of Earth System Science*

James T. Randerson, Ph.D. Stanford University, *UCI Chancellor's Professor of Earth System Science; Civil and Environmental Engineering; Ecology and Evolutionary Biology*

William S. Reeburgh, Ph.D. Johns Hopkins University, *Professor Emeritus of Earth System Science*

Eric Rignot, Ph.D. University of Southern California, *Department Chair and Donald Bren Professor of Earth System Science; Civil and Environmental Engineering*

Eric S. Saltzman, Ph.D. University of Miami, *UCI Distinguished Professor of Earth System Science; Chemistry*

Soroosh Sorooshian, Ph.D. University of California, Los Angeles, *Director of the Center for Hydrometeorology and Remote Sensing (CHRS) and UCI Distinguished Professor of Civil and Environmental Engineering; Earth System Science* (hydrology, hydrometeorology and hydroclimate modeling, remote sensing, water resources management)

Susan E. Trumbore, Ph.D. Columbia University, *Professor of Earth System Science*

Isabella Velicogna, Ph.D. Università degli Studi di Trieste, *UCI Chancellor's Fellow and Professor of Earth System Science*

Jasper A. Vrugt, Ph.D. University of Amsterdam, *Associate Professor of Civil and Environmental Engineering; Earth System Science* (examining how (eco)systems work, why theories deviate from data, how scientists diagnose change, as applied to biogeosciences, ecology, geomorphology, geophysics, hydrology, soils)

Jin Yi Yu, Ph.D. University of Washington, *Vice Chair and Professor of Earth System Science*

Charles S. Zender, Ph.D. University of Colorado Boulder, *Professor of Earth System Science; Computer Science*

## Courses

### **EARTHSS 1. Introduction to Earth System Science. 4 Units.**

Covers the origin and evolution of the Earth, its atmosphere, and oceans, from the perspective of biogeochemical cycles, energy use, and human impacts on the Earth system.

(II and VA ).

### **EARTHSS 3. Oceanography. 4 Units.**

Examines circulation of the world oceans and ocean chemistry as it relates to river, hydrothermal vent, and atmospheric inputs. Geological features, the wide variety of biological organisms, and global climate changes, such as greenhouse warming, are also studied.

(II, Va)

### **EARTHSS 5. The Atmosphere. 4 Units.**

The composition and circulation of the atmosphere with a focus on explaining the fundamentals of weather and climate. Topics include solar and terrestrial radiation, clouds, and weather patterns.

(II and VA ).

### **EARTHSS 7. Physical Geology. 4 Units.**

Introduction to Earth materials and processes. Topics include rocks and minerals, plate tectonics, volcanoes, earthquakes, Earth surface processes, Earth resources, geologic time, and Earth history. Laboratory work involves hands-on study of geologic materials, maps, and exercises pertaining to geologic processes. Materials fee.

(II and VA ).

### **EARTHSS 15. Introduction to Global Climate Change. 4 Units.**

Introduction of scientific, technological, environmental, economic, and social aspects underlying the threat and understanding of global climate change. Human and natural drivers of climate. Impacts of climate on natural, managed, and human systems, including their vulnerability and ability to adapt.

(II and (VA or VIII) ).

### **EARTHSS 17. Hurricanes, Tsunamis, and Other Catastrophes. 4 Units.**

Introduction to the basic science and state of predictability of various natural catastrophic events including earthquakes, volcanic eruptions, tsunamis, landslides, floods, hurricanes, fires, and asteroid impacts and their interactions and implications with human society in the U.S. and globally.

Overlaps with PUBHLTH 90.

(II and (VA or VIII) ).

### **EARTHSS 19. Introduction to Modeling the Earth System. 4 Units.**

Simulate the Earth's system using computer models. Covers the interaction of the air, land, and ocean, and explores how changes to one part of the environment affect the complete Earth system. Utilizes technological tools to understand scientific principles.

(II, Vb)

### **EARTHSS 21. On Thin Ice: Climate Change and the Cryosphere. 4 Units.**

Introduction of the basic science that governs the cryosphere and its interaction with the climate system. Covers some of the significant economic, sociological, and political consequences of the recent melting of the cryosphere driven by anthropogenic climate change.

(II and (VA or VIII) ).

### **EARTHSS 23. Air Pollution: From Urban Smog to Global Change . 4 Units.**

Air pollution occurs on regional to global scales. A wide range of air pollution sources and physical, chemical, and meteorological sciences behind air pollution are introduced. The consequences of air pollution to our society are also discussed.

(II and (VA or VIII) ).

### **EARTHSS 27. The Sustainable Ocean. 4 Units.**

An introduction to sustainability as it relates to marine resources and conservation. Topics include the scientific basis of our understanding of marine ecosystems, and the political, social, and cultural principles that govern resource protection.

(II and VIII ).

**EARTHSS H30B. Environmental Issues Affecting the Sustainability of Societies I. 4 Units.**

Focuses on several environmental challenges facing the world today, and explores the problem, possible solutions, and their scientific, technical, and social constraints. Models for systems, their assumptions, predictive uncertainty, and interpretation, play a large role.

Prerequisite: CHEM H30A. CHEM H30A with a grade of C or better

Overlaps with EARTHSS 15.

Restriction: Campuswide Honors Collegium students only.

**(II and Vb ).**

**EARTHSS H30C. Environmental Issues Affecting the Sustainability of Societies II. 4 Units.**

Focuses on how we can use Earth's resources, e.g., food and water, in a more sustainable way, exploring their scientific, technical, and social constraints.

Prerequisite: EARTHSS H30B. EARTHSS H30B with a grade of C or better

Restriction: Campuswide Honors Collegium students only.

**(III)**

**EARTHSS 40A. Earth System Chemistry. 4 Units.**

To understand the cycling of matter on Earth, we need to learn about the chemistry of elements and molecules in the environment. Introduces students to the understanding of how chemical principles apply in context to their everyday lives.

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment.

**(II and VA ).**

**EARTHSS 40B. Earth System Biology. 4 Units.**

Earth System Science is a highly interdisciplinary field that requires knowledge of various components of the Earth as a system, including the biosphere. Students are introduced to several fundamental principles of biology, from the smallest cells to the largest ecosystems.

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment.

**(II)**

**EARTHSS 40C. Earth System Physics. 4 Units.**

Covers the fundamental physical forces and laws that affect the Earth system, such as electromagnetic radiation and energy transfer, atmospheric and ocean dynamics. Also covers aspects of physics related to environmental issues, such as electricity generation and transmission.

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment.

**(II and VA ).**

**EARTHSS 45. New Student Seminar. 1 Unit.**

Weekly meetings led by faculty, current students, and staff, to provide information on the Department of Earth System Science, campus resources, and special programs and opportunities. Designed for students who recently joined the Earth System Science and Environmental Science majors.

Grading Option: Pass/no pass only.

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment. New students only (freshman, transfer, and change of major).

**EARTHSS 51. Land Interactions. 4 Units.**

The role of terrestrial processes in the Earth system. Provides an introduction to ecosystem processes that regulate the cycling of energy, water, carbon, and nutrients. Analysis of the impact of human activities. Materials fee.

Corequisite: CHEM 1C

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 53. Ocean Biogeochemistry. 4 Units.**

Overview of oceanography for those interested in Earth System Science. Focus is on physical, chemical, and biological processes that drive biogeochemical cycling in the oceans. Coastal systems are also reviewed, with an emphasis on California waters.

Prerequisite: CHEM 1C

Restriction: Earth System Science Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment.

**EARTHSS 55. Earth's Atmosphere. 4 Units.**

Composition, physics, and circulation of Earth's atmosphere with an emphasis on explaining the role of atmospheric processes in shaping the climate system. Topics include atmospheric composition, the global energy balance, radiative transfer and climate, atmospheric circulation, and climate sensitivity.

Prerequisite or corequisite: (MATH 2B or MATH 5B) and (PHYSICS 3B or PHYSICS 7C)

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 70A. Sustainable Energy Systems. 4 Units.**

Addresses how modern energy services can be provided sustainably and the challenges and barriers that must be overcome. Major environmental issues are discussed, such as climate change, air pollution, and resource demands.

Prerequisite or corequisite: EARTHSS 40C or PHYSICS 3C or PHYSICS 7E

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 70B. Sustainable Food and Water Systems. 4 Units.**

Explores the biophysical underpinnings of food production, the history of agricultural development, and a range of environmental issues facing agricultural systems, including water management, climate change, and land use.

Prerequisite or corequisite: EARTHSS 40B or (BIO SCI 93 and BIO SCI 94)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 100. Special Topics in Earth System Science. 1-4 Units.**

Devoted to current topics in the field of Earth System Science. Topics addressed vary each quarter.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Repeatability: May be taken for credit for 12 units as topics vary.

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 101. Paleoclimatology. 4 Units.**

Explores past changes in Earth's climate. Topics include tools and techniques used to reconstruct past climate from natural archives; records and mechanisms of past climate changes throughout Earth history; and lessons learned from the paleo-record for prediction of future climate.

Prerequisite: EARTHSS 51 and EARTHSS 53 and EARTHSS 55

Restriction: Earth System Science Majors have first consideration for enrollment.

Concurrent with EARTHSS 201.

**EARTHSS 112. Global Climate Change and Impacts. 4 Units.**

Observations over the 20th century show extensive changes in atmospheric composition, climate and weather, and biological systems that have paralleled industrial growth. Evidence of globally driven changes in these biogeochemical systems is studied, including projected impacts over the 21st century.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 114. Earth System Science Laboratory and Field Methods. 4 Units.**

Introduction to methods used to measure exchange of gases and energy between the atmosphere and terrestrial ecosystems. Laboratories include data acquisition and isotopic and chromatographic analysis. Field measurements at UCI's Marsh Reserve include microclimate, hydrology, trace-gas exchange, and plant growth. Materials fee.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 115. Aquatic Field Methods. 4 Units.**

Students design sampling plans, conduct field research techniques, and carry out data analyses that are relevant to aquatic field research. Aquatic field sites covered in the course include marine, estuarine, and fluvial systems. Materials fee.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 116. Introduction to Environmental Data Science. 4 Units.**

Analysis and interpretation of geophysical data, including functional fitting, probability density functions, and multidimensional time-series methods, with applications in atmospheric, oceanic, and biogeochemical sciences.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 118. Analysis, Modeling, and Visualization of Multidimensional Environmental Data. 4 Units.**

Students learn programming and numerical methods in Python with applications in Earth System Science and ecology. Topics include regression, uncertainty and significance, the development of simple box models, and the visualization of multi-dimensional climate and satellite datasets.

Prerequisite: I&C SCI 31 or EARTHSS 116

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 122. Atmospheric Dynamics. 4 Units.**

Fluid dynamical processes that determine the large-scale flow of the atmosphere and ocean. Most important are interactions between the density stratification and the Coriolis force associated with Earth's rotation. Topics include circulation, vorticity, planetary waves, and their role in climate.

Prerequisite: EARTHSS 55 and (PHYSICS 7C or PHYSICS 3B)

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 124. Weather Analysis. 4 Units.**

Provides an overview of weather systems in midlatitudes and tropics. The fundamental dynamics possible for these weather systems are described. Elementary weather analysis and forecasting techniques are introduced.

Prerequisite: EARTHSS 55

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 130. Physical Oceanography. 4 Units.**

Physical processes that determine the distribution of water properties such as salt and temperature. Fluid-dynamical underpinnings of physical oceanography. Wave motions. The wind-driven and thermohaline circulation. Similarities and differences between ocean and atmosphere dynamics.

Prerequisite: (PHYSICS 7C or PHYSICS 3B) and EARTHSS 53

Restriction: Earth System Science Majors have first consideration for enrollment.

**EARTHSS 132. Terrestrial Hydrology. 4 Units.**

Comprehensive treatment of modern conceptual and methodological approaches to hydrological science. Combines qualitative understanding of hydrological processes with quantitative representation, approaches to measurement, and treatment of uncertainty. Components of the hydrological cycle and their linkages within the coupled Earth system.

Prerequisite: (EARTHSS 51 and EARTHSS 55) or (EARTHSS 40C and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 133. Soil: It's the Good Dirt. 4 Units.**

An introduction to the critical role soils play in sustaining land ecosystems and humans. Covers how soils form and how human actions contribute to the pollution and loss but also the health and productivity of soils.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors only. Environmental Science Majors only. Earth System Science Majors only.

**EARTHSS 134. Fundamentals of GIS for Environmental Science. 4 Units.**

Introduction to Geographic Information Systems (GIS). Topics include fundamentals of cartography, creating/editing GIS data, linking spatial and tabular data, georeferencing, map projections, geospatial analysis, spatial statistics, and the development of GIS models. Examples from hydrology, ecology, and geology.

Prerequisite: (EARTHSS 51 and EARTHSS 53) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 138. Satellite Remote Sensing for Earth System Science. 4 Units.**

Satellite remote sensing data are increasingly used to study the Earth system. Provides an overview of the principles behind remote sensing, and the types of satellite data available for study of the oceans, land, and atmosphere.

Prerequisite: (EARTHSS 51 and EARTHSS 53) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 140. Advanced Geology. 4 Units.**

Introduces students to the geological processes which have formed and continue to shape the Earth. Topics include geological time, minerals and the rock cycle, plate tectonics and associated geological hazards, earth resources, and earth surface processes. Materials fee.

Prerequisite: EARTHSS 51 or EARTHSS 70B

Overlaps with EARTHSS 7.

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 142. Atmospheric Chemistry. 4 Units.**

Chemistry of the troposphere and stratosphere. Topics include processes controlling the lifetime and reaction pathways of chemicals in the atmosphere, the role of the atmosphere in biogeochemical cycles, and interactions between atmospheric chemistry and the physical climate system.

Prerequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and (PHYSICS 3C or PHYSICS 7E) and (MATH 2B or MATH 5B or AP Calculus BC). AP Calculus BC with a minimum score of 4

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 144. Marine Geochemistry and Biogeochemistry. 4 Units.**

Processes controlling the major and minor element composition of seawater and element distributions in the ocean. Gas exchange, carbon dioxide system, stable isotopes, radionuclides as tracers and chronometers, particle fluxes, organic geochemistry, sediment geochemistry, global cycles of biogeochemically important elements.

Prerequisite: EARTHSS 53 or CHEM 51C

Restriction: School of Physical Sciences students have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 146. Consequences of Air Pollution. 4 Units.**

From public health to the global climate system, this course explores the impacts of air pollution from the beginning of human history to current and emerging issues. Scientific concepts behind air pollution and solutions are discussed.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 40C and EARTHSS 70A)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 148. Marine Ecosystems and Global Change. 4 Units.**

Presents an overview of marine ecosystem structure, diversity, and processes in the context of global change, including the impacts of climate warming, ocean acidification, marine fisheries, and anthropogenic additions of nutrients and pollutants.

Prerequisite: EARTHSS 53 or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

Concurrent with EARTHSS 248.

**EARTHSS 154. Ecosystem Services. 4 Units.**

Covers what ecosystem services are, how to classify them, what the impacts of land degradation are on ecosystem services, how to quantify and value them, and the importance of mainstreaming ecosystem services in decision-making.

Prerequisite: (EARTHSS 70A and EARTHSS 70B) or (EARTHSS 51 and EARTHSS 53 and EARTHSS 55)

Same as BIO SCI E146.

**EARTHSS 156. The Future of Forests. 4 Units.**

Introduces students to the determinants of global forest distribution; ecosystem services associated with forest functioning; threats to forests resulting from climate and land-use change; and, opportunities for conserving natural forests in the near future.

Prerequisite: (EARTHSS 70A and EARTHSS 70B) or (EARTHSS 51 and EARTHSS 53 and EARTHSS 55)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 158. Research Methods for Sustainable Systems Analysis. 4 Units.**

Develops students' analytical skills that are necessary to engage and assess the sustainability of coupled human and natural systems and effectively communicate their findings.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment. Global Sustainability Minors have first consideration for enrollment.

**EARTHSS 162. The Impact of Climate Change on California's Landscape. 4 Units.**

Overview of anticipated impacts of climate change on California's landscape. Includes projections of future climate; anticipated impacts on ecology, hydrology, wildfire, coastal environment, and agriculture; and efforts to reduce greenhouse gas emissions or adapt to climate change through land management.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 164. Ecosystem Ecology. 4 Units.**

A mechanistic perspective on ecosystem processes. Covers ecosystem development, element cycling, and interactions with plants and microbes. The role of ecosystems in environmental change is also addressed.

Prerequisite: BIO SCI E106 or EARTHSS 51 or EARTHSS 60A or CHEM 51C

Same as BIO SCI E118.

Restriction: Earth System Science Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Ecology and Evolutionary Biol Majors have first consideration for enrollment.

Concurrent with EARTHSS 264.

**EARTHSS 168. Physiological Plant Ecology. 4 Units.**

An examination of the interactions between plants and their environment. Emphasis on the underlying physiological mechanisms of plant function, adaptations and responses to stress, and the basis of the distribution of plants and plant assemblages across the landscape.

Prerequisite: EARTHSS 51 or BIO SCI 94 or (EARTHSS 60A and EARTHSS 60C)

Same as BIO SCI E127.

Restriction: Biological Sciences Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 171. Microbial Biogeochemistry. 4 Units.**

Develops an understanding of microorganisms in the context of their environment, environmental impact, and role in the global cycles of C,N,P, etc. Focuses on tools used to evaluate microbial diversity and function, and applications of microbial ecology.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B)

Restriction: Environmental Science and Policy Majors only. Environmental Science Majors only. Earth System Science Majors only.

**EARTHSS 176W. Marine Conservation, Policy, and Society. 4 Units.**

Conservation of marine ecosystems is important yet challenging due to competing physical, ecological, social, and regulatory issues. Students explore the principles of marine conservation, the scientific basics of marine ecosystems, and political and social processes involved with resource protection.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

(Ib)

**EARTHSS 177W. Documenting and Understanding Earth System Change. 4 Units.**

Students select a time series of key environmental interest as the focus for their writing. They become familiar with common writing practices for the Earth Sciences, and exercise their ability to use the scientific method to produce reports.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 70A and EARTHSS 70B). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Environmental Science and Policy Majors only. Environmental Science Majors only. Earth System Science Majors only.

(Ib)

**EARTHSS 179. Climate Solutions. 4 Units.**

Focuses on carbon neutrality and climate stability, addressing.

Same as ENGRMAE 119, UPPP 111.

Restriction: Upper-division students only.

**EARTHSS 190A. Senior Seminar on Global Sustainability I. 2 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum is also required. Seminar utilized to analyze forum presentations. Prepare bibliography.

Same as BIO SCI 191A, SOCECOL 186A.

Restriction: Seniors only. Global Sustainability Minors have first consideration for enrollment.

**EARTHSS 190B. Senior Seminar on Global Sustainability II. 2 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum is also required. Seminar utilized to analyze forum presentations. Prepare research proposal.

Prerequisite: BIO SCI 191A or SOCECOL 186A or EARTHSS 190A

Same as BIO SCI 191B, SOCECOL 186B.

Restriction: Seniors only.

**EARTHSS 190CW. Writing/Senior Seminar on Global Sustainability III. 4 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze Forum presentations and to prepare senior research paper. Prepare/write research paper under direction of faculty member.

Prerequisite: BIO SCI 191B or EARTHSS 190B or SOCECOL 186B. BIO SCI 191B or EARTHSS 190B or SOCECOL 186B. Satisfactory completion of the Lower-Division Writing requirement.

Same as BIO SCI 191CW, SOCECOL 186CW.

Restriction: Seniors only.

**(Ib)**

**EARTHSS 191. Introduction to Research in Earth System Science. 1 Unit.**

Weekly presentations by Earth System Science faculty describing ongoing research in their laboratories. Students are introduced to the range of research topics and methods in Earth System Science and to the research opportunities available within the Department.

Prerequisite: (EARTHSS 60A and EARTHSS 60B) or (EARTHSS 51 and EARTHSS 53)

Grading Option: Pass/no pass only.

Restriction: Earth & Atmospheric Sciences Minors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 192. Careers in Earth System Science. 1 Unit.**

A weekly seminar course designed to help students transition to post-graduation career paths. Topics include designing effective resumes, applying to graduate school, and seeking employment. Also includes presentations by faculty, business, and government leaders describing potential environmental science career trajectories.

Grading Option: Pass/no pass only.

Restriction: Environmental Science and Policy Majors have first consideration for enrollment. Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 197. Independent Study in Earth System Science. .5-4 Units.**

Field study, educational outreach, or other independent projects under faculty direction. Interested students should arrange with an ESS faculty member to supervise and support an independent study project. A written summary is required at the end of each quarter.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 12 units.

**EARTHSS 198W. Senior Thesis in Earth System Science. 4 Units.**

Students receive guidance on the effective oral and written communication of research results. Students prepare and present a seminar, a poster, and a written thesis describing their research in Earth System Science.

Prerequisite: Two quarters of EARTHSS 199. Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with EARTHSS H198.

(Ib)

**EARTHSS H198. Honors Thesis in Earth System Science. 4 Units.**

Students receive guidance on effective written and oral communication of research results. Students prepare and present a seminar, poster, and written thesis describing their honors research in Earth System Science. Submission of the thesis and successful completion of this course will also satisfy the UCI upper-division writing requirement.

Prerequisite: ESS 199A and ESS 199B

Restriction: Consent of instructor to enroll and Prerequisite required

(Ib)

**EARTHSS 199. Undergraduate Research. 1-4 Units.**

For undergraduates with majors in science or engineering. Interested students should arrange with an ESS faculty member to supervise and support a research project. A written summary is required at the end of each quarter.

Repeatability: May be taken for credit for 12 units.

**EARTHSS H199A. Honors Research in Earth System Science. 4 Units.**

Undergraduate honors research in Earth System Science. A student commitment of 10-15 hours a week is expected, and a written report is required at the end of the quarter.

Restriction: Earth System Science Honors students only. Campuswide Honors Collegium students only.

**EARTHSS H199B. Honors Research in Earth System Science. 4 Units.**

Undergraduate honors research in Earth System Science. A student commitment of 10-15 hours a week is expected, and a written report is required at the end of the quarter.

Restriction: Earth System Science Honors students only. Campuswide Honors Collegium students only.

**EARTHSS H199C. Honors Research in Earth System Science. 4 Units.**

Undergraduate honors research in Earth System Science. A student commitment of 10-15 hours a week is expected, and a written report is required at the end of the quarter.

Restriction: Earth System Science Honors students only. Campuswide Honors Collegium students only.

**EARTHSS 200. Global Physical Climatology. 4 Units.**

A descriptive overview of Earth's climate system and energy budget. Large-scale circulations, key physical processes, and climate sensitivity of the atmosphere, ocean, land surface, and cryosphere.

Restriction: Graduate students only.

**EARTHSS 201. Paleoclimatology. 4 Units.**

Explores past changes in Earth's climate. Topics include tools and techniques used to reconstruct past climate from natural archives; records and mechanisms of past climate changes throughout Earth history; and lessons learned from the paleo-record for predication of future climate.

Restriction: Graduate students only.

Concurrent with EARTHSS 101.

**EARTHSS 202. Climate Change. 4 Units.**

Explores past, present, and projected changes in Earth's climate. Topics include paleoclimate records and mechanisms of natural climate variability at a range of timescales (orbital to seasonal); General Circulation Models; and IPCC observations and projections of future climate change.

Restriction: Graduate students only.

**EARTHSS 204. Humans in the Earth System. 4 Units.**

Focuses on the human systems of energy and food production which have the greatest effects on the Earth system. Assess the physical mechanisms and feedbacks of human-nature interactions and consider approaches of mitigation, interventions, and adaptation.

Restriction: Graduate students only. Earth System Science Majors only.

**EARTHSS 212. Geoscience Modeling and Data Analysis. 4 Units.**

Computer-based course. Fundamental statistical techniques needed to analyze Earth system data and models. Basic numerical techniques to solve Earth system models. Focuses on linear and non-linear ordinary differential equations, as well as simple partial differential equations.

Restriction: Graduate students only.

**EARTHSS 215. Cryosphere. 4 Units.**

A global perspective of the major components of the cryosphere. Includes current extent and trends, mass balance, energetics, and physical processes. Quantitative assessment of current state, in situ and remote observations, and interactions with climate.

Restriction: Graduate students only.

**EARTHSS 224. Ocean Processes. 4 Units.**

Introduction to the physics, chemistry, and biology of the oceans. Offers a mechanistic perspective of the structure and functioning of marine ecosystems, nutrient cycles, and role of ecosystem dynamics in local and global biogeochemistry.

Restriction: Graduate students only.

**EARTHSS 225. Marine Biogeochemistry. 4 Units.**

Overview of ocean biology and biogeochemistry, with a focus on lower trophic levels and the roles of biota in the marine biogeochemical cycles of key elements.

Restriction: Doctor of Philosophy Degree students have first consideration for enrollment. Graduate students only. Earth System Science Majors have first consideration for enrollment.

**EARTHSS 226. Land Surface Processes. 4 Units.**

A mechanistic perspective of the structure and functioning of terrestrial ecosystems. Includes processes such as nutrient cycling, biogeochemical cycling, mass balance, energetics, terrestrial hydrology, and water cycle.

Restriction: Graduate students only.

**EARTHSS 228. Geophysical Fluid Dynamics. 4 Units.**

Introduces fluid dynamical processes that determine the large-scale flow of the atmosphere and ocean, with particular emphasis on the interactions between the stable density stratification and the Coriolis force associated with Earth's rotation.

Restriction: Graduate students only.

**EARTHSS 230. Physical Oceanography. 4 Units.**

Physical processes that determine the distribution of water properties such as salt and temperature. Fluid-dynamical underpinnings of physical oceanography. Wave motions. The wind-driven and thermohaline circulation. Similarities and differences between ocean and atmosphere dynamics.

Prerequisite: MATH 2D and PHYSICS 7A and PHYSICS 7B and PHYSICS 7E

Restriction: Graduate students only.

**EARTHSS 238. Satellite Remote Sensing for Earth System Science. 4 Units.**

Satellite remote sensing data are increasingly used to study the Earth system. Provides an overview of the principles behind remote sensing, and the types of satellite data available for study of the oceans, land, and atmosphere.

**EARTHSS 240. Atmospheric Chemistry and Physics. 4 Units.**

Examines the physical/chemical processes which determine the structure and composition of Earth's atmosphere and its role in the climate system.

Restriction: Graduate students only.

**EARTHSS 242. Advanced Atmospheric Chemistry. 4 Units.**

Chemistry of the troposphere and stratosphere. Topics include: processes controlling the lifetime and reaction pathways of chemicals in the atmosphere, the role of the atmosphere in biogeochemical cycles, and interactions between atmospheric chemistry and the physical climate system.

Restriction: Graduate students only.

**EARTHSS 244. Introduction to Atmospheric Dynamics. 4 Units.**

Covers fundamentals of atmospheric dynamics including thermodynamics, quasi-geostrophy, the weak-temperature gradient of the tropics, and the turbulent boundary layer.

Restriction: Graduate students only.

**EARTHSS 248. Marine Ecosystems and Global Change. 4 Units.**

Presents an overview of marine ecosystem structure, diversity, and processes in the context of global change, including the impacts of climate warming, ocean acidification, marine fisheries, and anthropogenic additions of nutrients and pollutants.

Prerequisite: EARTHSS 224

Restriction: Graduate students only.

Concurrent with EARTHSS 148.

**EARTHSS 252. Environmental Isotope Geochemistry. 4 Units.**

Covers the fundamentals of stable, radioactive, and radiogenic isotope variability in the Earth System. Focuses on theory, measurement techniques, biogeochemistry, hydrology, ecology, and climate related applications.

Restriction: Graduate students only.

Concurrent with EARTHSS 152.

**EARTHSS 256. Paleoclimatology and Paleooceanography. 4 Units.**

Explores past changes in Earth's climate. Topics include tools and techniques used to reconstruct past climate from natural archives; records and mechanisms of past climate changes throughout Earth history; and lessons learned from the paleo-record for prediction of future climate.

Restriction: Graduate students only.

**EARTHSS 264. Ecosystem Ecology . 4 Units.**

A mechanistic perspective on ecosystem processes. Covers ecosystem development, element cycling, and interactions with plants and microbes. The role of ecosystems in environmental change is also addressed.

Prerequisite: CHEM 51C

Concurrent with EARTHSS 164 and BIO SCI E118.

**EARTHSS 266. Global Biogeochemical Cycles. 4 Units.**

Global biogeochemical cycling of the elements. Topics include global cycling of carbon, nitrogen, oxygen, and sulfur; impact of human activities on biogeochemical processes.

Restriction: Graduate students only.

**EARTHSS 280A. Special Topics in Earth System Science. 1-4 Units.**

Each quarter is devoted to current topics in the field of Earth System Science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**EARTHSS 280B. Special Topics in Earth System Science. 1-4 Units.**

Each quarter is devoted to current topics in the field of Earth System Science. Topics addressed vary each quarter.

Prerequisite: EARTHSS 280A

Repeatability: Unlimited as topics vary.

**EARTHSS 280C. Special Topics in Earth System Science. 1-4 Units.**

Each quarter is devoted to current topics in the field of Earth System Science. Topics addressed vary each quarter.

Prerequisite: EARTHSS 280B

Repeatability: Unlimited as topics vary.

**EARTHSS 282C. Special Topics in Climate. 1-4 Units.**

Each quarter is devoted to in-depth analysis of an important and rapidly developing area in the field of climate dynamics. Topics addressed vary each quarter.

Prerequisite: EARTHSS 282B

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EARTHSS 286A. Special Topics in Biogeochemistry. 1-4 Units.**

Each quarter is devoted to in-depth analysis of a subarea in biogeochemistry which is undergoing rapid development. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EARTHSS 286B. Special Topics in Biogeochemistry. 1-4 Units.**

Each quarter is devoted to in-depth analysis of a subarea in biogeochemistry which is undergoing rapid development. Topics addressed vary each quarter.

Prerequisite: EARTHSS 286A

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EARTHSS 286C. Special Topics in Biogeochemistry. 1-4 Units.**

Each quarter is devoted to in-depth analysis of a subarea in biogeochemistry which is undergoing rapid development. Topics addressed vary each quarter.

Prerequisite: EARTHSS 286B

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EARTHSS 288C. Special Topics in Ecosystems. 1-4 Units.**

Each quarter is devoted to current topics relating to Ecosystems. Topics addressed vary each quarter.

Prerequisite: EARTHSS 288B

Repeatability: Unlimited as topics vary.

**EARTHSS 290. Seminar. 1 Unit.**

Weekly seminars and discussions on topics of general and current interest in Earth System Science. Topics addressed vary each quarter.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**EARTHSS 298. Practicum in Earth System Science. 4 Units.**

Designed to introduce first-year graduate students to research. Students explore research opportunities and develop a proposal for a summer research project under the direction of a faculty mentor.

Restriction: Graduate students only.

**EARTHSS 299. Research. 2-12 Units.**

Supervised original research in areas of Earth System Science.

Repeatability: May be repeated for credit unlimited times.

**EARTHSS 399. University Teaching. 1-4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Earth and Atmospheric Sciences, Minor

The science of the Earth as a system has implications for many fields of study. Students interested in understanding how the Earth's systems work can complete the requirements for a minor in Earth and Atmospheric Sciences. The program is primarily designed for students in the natural sciences and engineering who wish to explore interdisciplinary problems and broaden their studies to include the application of their fields to understanding the Earth system.

NOTE: This minor is not available to students in the Earth System Science (B.S.) or Environmental Science (B.A.) majors.

The science of the Earth as a system has implications for many fields of study. Students interested in understanding how the Earth's systems work can complete the requirements for a minor in Earth and Atmospheric Sciences. The program is primarily designed for students in the natural sciences and engineering who wish to explore interdisciplinary problems and broaden their studies to include the application of their fields to understanding the Earth system.

NOTE: This minor is not available to students in the Earth System Science (B.S.) or Environmental Science (B.A.) majors.

### Requirements for the Minor

Select one of the following series:

EARTHSS 51- 53- 55	Land Interactions and Ocean Biogeochemistry and Earth's Atmosphere
or	
EARTHSS 60A-EARTHSS 60B-EARTHSS 60C	and and

and select four electives from the approved elective list for the B.S. in Earth System Science major, at least two of which must be Earth System Science courses.

## Earth System Science, B.S.

<http://ess.uci.edu/undergrad/bs> (<http://ess.uci.edu/undergrad/bs/>)

Earth System Science is an interdisciplinary field of study that combines oceanography, atmospheric science, meteorology, geography, geology, hydrology, and environmental science. ESS students gain an understanding of how individual aspects of the environment interact, including the influence of humans on this complex system.

Examples of important questions in Earth System Science include, but are not limited to, the influence of atmospheric chemistry on climate and air quality, biological controls on the chemistry of the oceans, and physical controls on atmosphere and ocean circulation.

The Earth System Science (B.S.) program provides students with a fundamental understanding of the oceanographic, atmospheric, and terrestrial sciences. This program of study prepares students for careers in science, research, or technical fields. Students learn to apply basic sciences (physics, chemistry, mathematics, and biology) to understand the major processes and systems governing the Earth's climate, biogeochemical cycles, and global change. Central to the B.S. program is an understanding of relevant scientific literature, methods to collect/analyze data, and interpret results in the context of scientific theory. Students will learn to work collaboratively to understand and address complex problems and communicate scientific knowledge.

Through the core course work, students will learn to explain the current and projected future state of the Earth system in the context of past climate change and current human activities. Once the core course work is complete, students are encouraged to focus on a particular area within Earth System Science and to choose electives that build a coherent core of knowledge. Focus areas include but are not limited to climatology, biogeochemical cycles, oceanography, hydrology, terrestrial sciences, and atmospheric sciences. Optional specializations are available in Atmospheric Science, Hydrology and Terrestrial Ecosystems, and Oceanography.

Earth System Science students are encouraged to become directly involved in research. The Department provides excellent opportunities to learn from and work with recognized experts in the field, while fulfilling degree requirements. EARTHSS 198W may satisfy Department and UCI upper-division writing requirements.

Students may be admitted to the Earth System Science major upon entering the University as freshmen, via change of major, or as transfer students from other colleges and universities. Information about change of major policies is available in the Physical Sciences Student Affairs Office and at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu>). For transfer student admission, preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the following required courses: one year of approved calculus and one year of *either* general chemistry with laboratory (preferred) or one-year of calculus-based physics with laboratory.

NOTE: The major is open to all students except Environmental Science majors and Earth and Atmospheric Sciences minors.

**All students must meet the University Requirements.**

**School Requirements: None.**

### Major Requirements

#### A. Complete:

EARTHSS 1 or EARTHSS 3 or EARTHSS 5	Introduction to Earth System Science Oceanography The Atmosphere
EARTHSS 51	Land Interactions
EARTHSS 53	Ocean Biogeochemistry
EARTHSS 55	Earth's Atmosphere
EARTHSS 114 or EARTHSS 115	Earth System Science Laboratory and Field Methods Aquatic Field Methods
EARTHSS 116	Introduction to Environmental Data Science
EARTHSS 192	Careers in Earth System Science
MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
STATS 7	Basic Statistics

Select one of the following sequences and accompanying labs:

CHEM 1A- 1B- 1C	General Chemistry and General Chemistry and General Chemistry
CHEM 1LC- 1LD	General Chemistry Laboratory and General Chemistry Laboratory
or	
CHEM H2A- H2B- H2C	Honors General Chemistry and Honors General Chemistry and Honors General Chemistry
CHEM H2LA- H2LB- H2LC	Honors General Chemistry Laboratory and Honors General Chemistry Laboratory and Honors General Chemistry Laboratory

Select one of the following sequences and accompanying labs:

PHYSICS 3A- 3B- 3C	Basic Physics I and Basic Physics II and Basic Physics III
PHYSICS 3LB- 3LC	Basic Physics Laboratory and Basic Physics Laboratory
or	
PHYSICS 7C- 7E	Classical Physics and Classical Physics
PHYSICS 7LC	Classical Physics Laboratory

#### B. Select seven electives from the following (at least four must be Earth System Science courses):

All 4-unit upper-division EARTHSS courses except EARTHSS 114, EARTHSS 116, and EARTHSS H198 (EARTHSS 199 or one quarter of H199A-B-C may count only once toward the elective requirement)	
BIO SCI 93	From DNA to Organisms
BIO SCI 94	From Organisms to Ecosystems
BIO SCI 98	Biochemistry
BIO SCI D105	Cell, Developmental, and Molecular Biology of Plants
BIO SCI E106	Processes in Ecology and Evolution

BIO SCI E120	Marine Biology
BIO SCI E150	Conservation Biology
BIO SCI E179	Limnology and Freshwater Biology
BIO SCI E179L	Field Freshwater Ecology
BIO SCI E189	Environmental Ethics
CHEM 51A	Organic Chemistry
CHEM 51B- 51LB	Organic Chemistry and Organic Chemistry Laboratory
CHEM 51C- 51LC	Organic Chemistry and Organic Chemistry Laboratory
CHEM 141	Environmental Chemistry
ENGRCEE 162	Introduction to Environmental Chemistry
ENGRCEE 171	Water Resources Engineering
ENGRCEE 172	Groundwater Hydrology
ENGRCEE 176	Hydrology
ENGRCEE 178	Fluid Mechanics of Open Channels
ENGRMAE 91	Introduction to Thermodynamics
ENGRMAE 130A	Introduction to Fluid Mechanics
ENGRMAE 164	Air Pollution and Control
MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
MATH 105A	Numerical Analysis I
MATH 112A	Introduction to Partial Differential Equations and Applications
MATH 115	Mathematical Modeling
PHYSICS 115A	Statistical Physics
UPPP 133	Environmental Law and Policy
UPPP 139	Water Resource Policy
UPPP 145	Environmental Governance
PUBHLTH 161	Environmental Geology
PUBHLTH 163	Introduction to Environmental Health Science
PUBHLTH 167	Air Pollution, Climate, and Health
PUBHLTH 171	Human Exposure to Environmental Contaminants
PUBHLTH 172	Climate Change and Disaster Management
PUBHLTH 173	Health and Global Environmental Change

Computing Skills (one of the following may be counted toward degree): EECS 10, ENGRMAE 10, I&C SCI 31, PHYSICS 53, or an approved programming course.

## Optional Specializations

Three optional specializations are available: Atmospheric Science, Hydrology and Terrestrial Ecosystems, and Oceanography. The specializations require the completion of at least five courses from the following lists (four science courses plus one advanced tools course).

### Specialization in Atmospheric Science

#### Requirements

Three courses selected from the following:

EARTHSS 122	Atmospheric Dynamics
EARTHSS 124	Weather Analysis
EARTHSS 142	Atmospheric Chemistry
EARTHSS 199	Undergraduate Research (one 4-unit course focused on atmospheric research selected from EARTHSS 199, 198, H198, H199A-H199B-H199C)

One advanced tools courses selected from the following:

EARTHSS 118	Analysis, Modeling, and Visualization of Multidimensionnal Environmental Data
EARTHSS 134	Fundamentals of GIS for Environmental Science

**EARTHSS 138**

Satellite Remote Sensing for Earth System Science

(These courses may overlap in Major Requirements, Section B.)

**Specialization in Hydrology and Terrestrial Ecosystems****Requirements**

Three courses selected from the following:

EARTHSS 132

Terrestrial Hydrology

EARTHSS 140

Advanced Geology

or EARTHSS 133

Soil: It's the Good Dirt

EARTHSS 156

The Future of Forests

EARTHSS 199

Undergraduate Research (one 4-unit course focused on terrestrial research selected from EARTHSS 199, 198, H198, H199A-H199B-H199C)

One advanced tools course selected from the following:

EARTHSS 118

Analysis, Modeling, and Visualization of Multidimensionnal Environmental Data

EARTHSS 134

Fundamentals of GIS for Environmental Science

EARTHSS 138

Satellite Remote Sensing for Earth System Science

(These courses may overlap in Major Requirements, Section B.)

**Specialization in Oceanography****Requirements**

Three courses selected from the following:

EARTHSS 130

Physical Oceanography

EARTHSS 144

Marine Geochemistry and Biogeochemistry

EARTHSS 148

Marine Ecosystems and Global Change

EARTHSS 171

Microbial Biogeochemistry

EARTHSS 199

Undergraduate Research (one 4-unit course focused on oceanographic research selected from EARTHSS 199, 198, H198, H199A-H199B-H199C)

One advanced tools course selected from the following:

EARTHSS 118

Analysis, Modeling, and Visualization of Multidimensionnal Environmental Data

EARTHSS 138

Satellite Remote Sensing for Earth System Science

(These courses may overlap in Major Requirements, Section B.)

**Sample Program — Earth System Science****Freshman**

Some students (particularly transfer students) take EARTHSS 51, EARTHSS 53, and EARTHSS 55 in the junior year.

## Concentration in Geosciences Education with Secondary Teaching Certification

This concentration allows students pursuing the B.S. in Earth System Science to earn a bachelor's degree and complete the required course work and field experience for a California Preliminary Single Subject Teaching Credential at the same time. In addition to the requirements listed above, students must complete the following courses:

CHEM 193	Research Methods
or PHYSICS 193	Research Methods
EARTHSS 7	Physical Geology <sup>1</sup>
or EARTHSS 140	Advanced Geology
EDUC 55	Knowing and Learning in Mathematics and Science
EDUC 109	Reading and Writing in Mathematics and Science
EDUC 143AW	Classroom Interactions I
EDUC 143BW	Classroom Interactions II
EDUC 148	Complex Pedagogical Design
EDUC 158	Student Teaching Mathematics and Science in Middle/High School (two quarters)
LPS 60	The Making of Modern Science
PHY SCI 5	California Teach 1: Introduction to Science and Mathematics Teaching
PHY SCI 105	California Teach 2: Middle School Science and Mathematics Teaching
PHYSICS 20A	Introduction to Astronomy
or PHYSICS 20B	Cosmology: Humanity's Place in the Universe

<sup>1</sup> EARTHSS 140 may overlap with the major requirement in section B.

With careful, early planning, it is possible for students to complete the bachelor's degree and the secondary teaching certification in four years.

For additional information about teacher certification requirements and enrollment procedures, visit the Cal Teach website (<http://www.education.uci.edu/calteach/>). Interested students are strongly encouraged to contact the Cal Teach Resource and Advising Center or the Physical Sciences Student Affairs Office.

**Earth System Science Honors Program.** In the year-long honors course sequence, students admitted into the ESS Honors Program pursue research with faculty in the Department, and prepare a written thesis of their work. Visit the Earth System Science Honors Program website (<https://www.ess.uci.edu/undergrad/ess/honors/>) for more information.

**Teaching Certification.** Earth System Science students interested in teaching careers can earn a bachelor's degree concurrently with a California Preliminary Single Subject Teaching Credential. See the Concentration in Geosciences Education with Secondary Teaching Certification section below for more information.

Some students go on to graduate school in physical sciences, engineering, or related areas. Others begin careers as research scientists in academic, public, or private institutions (may require a graduate-level degree). Options that may be available are scientist positions in the following roles: environmental policy and planning, environmental consulting, air quality monitoring and assessment, laboratory analysis, scientific research, science education, natural resource management, wildlife management, conservation and environmental protection, and water resource management.

## Earth System Science, Ph.D.

The Earth, as a coupled system of atmosphere, ocean, land, and cryosphere, has changed in our lifetime. The observed depletion of stratospheric ozone at high latitudes has been attributed directly to industrial use of halocarbons. Global warming a result of increases in the atmospheric concentrations of greenhouse gases, such as carbon dioxide and methane, which are released by the use of fossil fuel and agricultural practices. These examples illustrate the ability of humans to alter the global environment. Understanding the sensitivity of the Earth's climate system requires a broad base of scientific knowledge, which includes detection, quantification, and prediction of the rates of change of chemical, physical, and biological variables. Our program is built around this interdisciplinary and holistic approach to the Earth System.

The Department's doctoral program is aimed at training new research scientists in the field of Earth System Science. The graduate education provides a comprehensive curriculum, along with opportunities to conduct groundbreaking research. The Department's doctoral-level students are expected to become researchers with a global perspective and broad research skills as well as a high level of expertise in specific areas. Active programs of research are underway studying the influence of human activities in the Earth System, biogeochemistry, and physical climate.

NOTE: Students are admitted to the Ph.D. program only; the master's degree is awarded upon progress to the Ph.D.

### Course Requirements

Students must complete a minimum of nine 4-unit approved graduate-level courses, including the core curriculum, with an average grade of B or better. All courses must be approved by the student's advisor.

A. Complete:

EARTHSS 200	Global Physical Climatology
EARTHSS 204	Humans in the Earth System
EARTHSS 266	Global Biogeochemical Cycles
EARTHSS 298	Practicum in Earth System Science

B. Select at least five additional graduate-level courses, two of which must be offered by the Earth System Science Department.

### Residency

Academic Senate regulations specify a minimum period of residence of six quarters for Ph.D. candidates. Enrollment in a minimum of 12 units of graduate/upper-division course work per quarter is required. Registration in every regular academic session is necessary until all requirements for the degree have been completed, unless a formal Leave of Absence is granted by the Graduate Division. All Ph.D. requirements must be completed within 15 quarters in residence (five years), excluding summer quarters. Exceptions must be put to a vote of the Earth System Science faculty. The maximum time permitted is seven years.

### Comprehensive Examination

Progress toward the degree and readiness to begin research is assessed by a comprehensive examination covering breadth, general knowledge, and the ability to integrate and use information covered in the core curriculum and other course work. At the end of the spring quarter, the ESS Comprehensive Examination Committee administers the written and oral examinations.

### Teaching and Seminar

Students are required to complete a teaching assistant training program and to have a minimum of two quarters of experience as a teaching assistant, provided opportunities are available. Students can enroll in EARTHSS 399 while serving as a teaching assistant. Students are also expected to participate in the Earth System Science seminar.

### Advance to Ph.D. Candidacy

Following completion of the Comprehensive Examination, those students who receive a recommendation to continue Ph.D. work will pursue research on a potential dissertation topic and then take the Advancement to Candidacy Examination. This oral examination is given by a faculty committee, including extra-departmental faculty. The normative time for advancement for candidacy is two years.

## Dissertation

After advancing to candidacy, students are expected to be fully involved in research toward writing their Ph.D. dissertation. Students should keep in steady contact/interaction with their Doctoral Committee. A dissertation based on original research and demonstrating critical judgment, intellectual synthesis, creativity, and clarity in written communication is required for the Ph.D. degree. The dissertation must summarize the results of original research performed by the student under the supervision of a faculty member of the Department. The dissertation will be evaluated by the Dissertation Committee, based on suitability for publication in a peer-reviewed journal of high editorial standards. The dissertation may be a compilation of published papers or manuscripts accepted for publication, so long as the candidate has produced a major proportion of the material independently. The Dissertation Committee approves the format and content, which must meet University requirements for style, format, and appearance.

## Additional Requirements

1. Completion of course work (9 courses, including core courses)
2. Six quarters in residence at UCI
3. Completion of the Comprehensive Examination, with recommendation to continue for the Ph.D.
4. Completion of the teaching and seminar requirements
5. Pass the Advancement to Candidacy Examination
6. Presentation of an open research seminar
7. Submission of an acceptable doctoral dissertation and formal defense.

## Department of Mathematics

### Michael C. Cranston, Department Chair

340E Rowland Hall

949-824-7993

<http://www.math.uci.edu/>

The Department of Mathematics is engaged in teaching and in fundamental research in a wide variety of basic mathematical disciplines, and offers undergraduate and graduate students the opportunity to fashion a thorough program of study leading to professional competence in mathematical research or in an area of application.

The curriculum in mathematics includes opportunities for supervised individual study and research and is augmented by seminars and colloquia. It is designed to be compatible with curricular structures at other collegiate institutions in California in order to enable students transferring to UCI to continue their programs of mathematics study.

- Mathematical, Computational, and Systems Biology, M.S.
- Mathematical, Computational, and Systems Biology, Ph.D.
- Mathematics for Biology, Minor
- Mathematics, B.S.
- Mathematics, M.S.
- Mathematics, Minor
- Mathematics, Ph.D.

## Faculty

Takeo Akasaki, Ph.D. University of California, Los Angeles, *Professor Emeritus of Mathematics* (ring theory)

Jun F. Allard, Ph.D. University of British Columbia, *Associate Professor of Mathematics; Physics and Astronomy* (mathematical and computational biology)

Vladimir Baranovsky, Ph.D. University of Chicago, *Professor of Mathematics* (algebra and number theory)

Long Chen, Ph.D. Pennsylvania State University, *Professor of Mathematics* (applied and computational mathematics)

Michael C. Cranston, Ph.D. University of Minnesota, *Department Chair and Professor of Mathematics* (probability)

Christopher J. Davis, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Teaching of Mathematics* (algebra and number theory)

Neil Donaldson, Ph.D. University of Bath, *Lecturer of Mathematics* (differential geometry)

Paul C. Eklof, Ph.D. Cornell University, *Professor Emeritus of Mathematics* (logic and algebra)

German A. Enciso Ruiz, Ph.D. Rutgers, the State University of New Jersey, *Professor of Mathematics; Developmental and Cell Biology* (applied and computational mathematics, mathematical and computational biology)

Asaf Ferber, Ph.D. Tel Aviv University, *Assistant Professor of Mathematics* (combinatorics and probability)

Aleksandr Figotin, Ph.D. Tashkent University of Information Technologies, *Professor of Mathematics* (applied and computational mathematics, mathematical physics)

Mark Finkelstein, Ph.D. Stanford University, *Professor Emeritus of Mathematics; Center for Educational Partnerships* (analysis)

Matthew Foreman, Ph.D. University of California, Berkeley, *Distinguished Professor of Mathematics; Logic and Philosophy of Science* (ergodic theory and dynamical systems, logic and foundations)

Michael D. Fried, Ph.D. University of Michigan, *Professor Emeritus of Mathematics* (arithmetic geometry and complex variables)

Isaac Goldbring, Ph.D. University of Illinois at Urbana-Champaign, *Associate Professor of Mathematics; Logic and Philosophy of Science* (logic and foundations)

Anton Gorodetski, Ph.D. Moscow State University, *Professor of Mathematics* (ergodic theory and dynamical systems)

Patrick Q. Guidotti, Ph.D. University of Zurich, *Professor of Mathematics* (analysis and partial differential equations, applied and computational mathematics)

Hamid Hezari, Ph.D. Johns Hopkins University, *Associate Professor of Mathematics* (analysis and partial differential equations)

Kenneth B. Huber, Ph.D. University of California, Irvine, *Lecturer of Mathematics*

Paata Ivanisvili, Ph.D. Michigan State University, *Assistant Professor of Mathematics* (analysis, probability)

Svetlana Jitomirskaya, Ph.D. Moscow State University, *Distinguished Professor of Mathematics* (mathematical physics)

Nathan Kaplan, Ph.D. Harvard University, *Associate Professor of Mathematics* (algebra and number theory)

Abel Klein, Ph.D. Massachusetts Institute of Technology, *Distinguished Professor of Mathematics* (mathematical physics)

Natalia Komarova, Ph.D. University of Arizona, *UCI Chancellor's Professor of Mathematics; Ecology and Evolutionary Biology* (applied and computational mathematics, mathematical and computational biology, mathematics of complex and social phenomena)

Jason Russell Kronewetter, Ph.D. University of California, Irvine, *Lecturer of Mathematics*

Katsiaryna Krupchyk, Ph.D. Belarusian State University, *Professor of Mathematics* (analysis and partial differential equations, inverse problems, and imaging)

Rachel Lehman, Ph.D. University of California, Irvine, *Lecturer of Mathematics* (mathematics education and probability)

Peter Li, Ph.D. University of California, Berkeley, *Chancellor's Professor Emeritus of Mathematics* (geometry and topology)

Song-Ying Li, Ph.D. University of Pittsburgh, *Professor of Mathematics* (analysis and partial differential equations)

John S. Lowengrub, Ph.D. Courant Institute of Mathematical Sciences, *Chancellor's Professor of Mathematics; Biomedical Engineering* (applied and computational mathematics, mathematical and computational biology)

Zhiqin Lu, Ph.D. Courant Institute of Mathematical Sciences, *Professor of Mathematics* (geometry and topology)

Jeffrey Ludwig, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Teaching of Mathematics*

Connor Mooney, Ph.D. Columbia University, *Assistant Professor of Mathematics* (partial differential equations)

Qing Nie, Ph.D. Ohio State University, *Director of the NSF-Simons Center for Multiscale Cell Fate Research and Chancellor's Professor of Mathematics; Biomedical Engineering* (applied and computational mathematics, mathematical and computational biology)

Alessandra Pantano, Ph.D. Princeton University, *Associate Professor of Teaching of Mathematics* (algebra and number theory)

Roberto Pelayo, Ph.D. California Institute of Technology, *Assistant Professor of Teaching of Mathematics* (algebra and data science)

David L. Rector, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Mathematics* (algebraic topology and computer algebra)

Karl Rubin, Ph.D. Harvard University, *Distinguished Professor Emeritus of Mathematics* (algebra and number theory)

- Bernard Russo, Ph.D. University of California, Los Angeles, *Professor Emeritus of Mathematics* (functional analysis)
- Donald G. Saari, Ph.D. Purdue University, *UCI Distinguished Professor Emeritus of Economics; Logic and Philosophy of Science; Mathematics*
- Martin Schechter, Ph.D. New York University, *Professor Emeritus of Mathematics* (analysis and partial differential equations, mathematical physics)
- Stephen Scheinberg, Ph.D. Princeton University, *Professor Emeritus of Mathematics*
- Richard M. Schoen, Ph.D. Stanford University, *UCI Excellence in Teaching Chair in Mathematics and Distinguished Professor of Mathematics* (differential geometry, partial differential equations, general relativity)
- Alice Silverberg, Ph.D. Princeton University, *Distinguished Professor Emerita of Mathematics; Computer Science* (algebra and number theory)
- William H. Smoke, Ph.D. University of California, Berkeley, *Professor Emeritus of Mathematics* (homological algebra)
- Knut Solna, Ph.D. Stanford University, *Professor of Mathematics* (applied and computational mathematics, inverse problems and imaging, probability)
- Ronald J. Stern, Ph.D. University of California, Los Angeles, *Professor Emeritus of Mathematics* (geometry and topology)
- Jeffrey D. Streets, Ph.D. Duke University, *Professor of Mathematics* (geometry and topology)
- Chuu-Lian Terng, Ph.D. Brandeis University, *Professor Emerita of Mathematics* (differential geometry and integrable systems)
- Edriss S. Titi, Ph.D. Indiana University, *Professor Emeritus of Mathematics* (analysis and partial differential equations, applied and computational mathematics)
- Li Sheng Tseng, Ph.D. University of Chicago, *Associate Professor of Mathematics* (geometry and topology, mathematical physics)
- Roman Vershynin, Ph.D. University of Missouri-Columbia, *Professor of Mathematics* (probability, data science)
- Jeffrey Viaclovsky, Ph.D. Princeton University, *Professor of Mathematics* (differential geometry, geometric analysis)
- Daqing Wan, Ph.D. University of Washington, *Professor of Mathematics* (algebra and number theory)
- Frederic Yui-Ming Wan, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Mathematics* (applied and computational mathematics, mathematical and computational biology)
- Robert W. West, Ph.D. University of Michigan, *Professor Emeritus of Mathematics* (algebraic topology)
- Joel J. Westman, Ph.D. University of California, Los Angeles, *Professor Emeritus of Mathematics* (analysis)
- Robert J. Whitley, Ph.D. New Mexico State University, *Professor Emeritus of Mathematics* (analysis)
- Janet L. Williams, Ph.D. Brandeis University, *Professor Emerita of Mathematics* (probability and statistics)
- Jesse Wolfson, Ph.D. Northwestern University, *Assistant Professor of Mathematics* (topology)
- Jack Xin, Ph.D. New York University, *Chancellor's Professor of Mathematics* (applied and computational mathematics, mathematical and computational biology, probability)
- James J. Yeh, Ph.D. University of Minnesota, *Professor Emeritus of Mathematics* (analysis and partial differential equations, probability)
- Yifeng Yu, Ph.D. University of California, Berkeley, *Professor of Mathematics* (analysis and partial differential equations)
- Martin Zeman, Ph.D. Humboldt University of Berlin, *Professor of Mathematics; Logic and Philosophy of Science* (logic and foundations)
- Xiangwen Zhang, Ph.D. McGill University, *Assistant Professor of Mathematics* (geometry and topology)
- Hong-Kai Zhao, Ph.D. University of California, Los Angeles, *Chancellor's Professor of Mathematics; Computer Science* (applied and computational mathematics, inverse problems and imaging)
- Weian Zheng, Ph.D. University of Strasbourg, *Professor Emeritus of Mathematics* (probability theory and financial engineering)

## Affiliate Faculty

- Pierre F. Baldi, Ph.D. California Institute of Technology, *Director of the Institute for Genomics and Bioinformatics and Distinguished Professor of Computer Science; Biological Chemistry; Biomedical Engineering; Developmental and Cell Biology; Mathematics* (artificial intelligence and machine learning, biomedical informatics, databases and data mining, environmental informatics, statistics and statistical theory)

Eric D. Mjolsness, Ph.D. California Institute of Technology, *Professor of Computer Science; Mathematics* (artificial intelligence and machine learning, biomedical informatics and computational biology, applied mathematics, mathematical biology, modeling languages)

Dominik Franz X. Wodarz, Ph.D. Oxford University, *Professor of Ecology and Evolutionary Biology; Mathematics*

## Courses

### **MATH 1A. Pre-Calculus. 4 Workload Units.**

Basic equations and inequalities, linear and quadratic functions, and systems of simultaneous equations.

Grading Option: Workload Credit Letter Grade with P/NP.

### **MATH 1B. Pre-Calculus. 4 Units.**

Preparation for calculus and other mathematics courses. Exponentials, logarithms, trigonometry, polynomials, and rational functions. Satisfies no requirements other than contribution to the 180 units required for graduation.

Prerequisite: MATH 1A. Placement into MATH 1B via the Calculus Placement exam, or a score of 450 or higher on the Mathematics section of the SAT Reasoning Test.

Restriction: MATH 1B may not be taken for credit if taken after MATH 2A.

### **MATH 2A. Single-Variable Calculus. 4 Units.**

Introduction to derivatives, calculation of derivatives of algebraic and trigonometric functions; applications including curve sketching, related rates, and optimization. Exponential and logarithm functions.

Prerequisite: MATH 1B or AP Calculus AB or SAT Mathematics or ACT Mathematics. MATH 1B with a grade of C or better. AP Calculus AB with a minimum score of 3. SAT Mathematics with a minimum score of 650. ACT Mathematics with a minimum score of 29. Placement via the Calculus Placement exam (fee required) is also accepted.

Overlaps with MATH 5A.

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment.

### **(Vb)**

### **MATH 2B. Single-Variable Calculus. 4 Units.**

Definite integrals; the fundamental theorem of calculus. Applications of integration including finding areas and volumes. Techniques of integration. Infinite sequences and series.

Prerequisite: MATH 2A or MATH 5A or AP Calculus AB or AP Calculus BC. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment.

### **(Vb)**

### **MATH 2D. Multivariable Calculus. 4 Units.**

Differential and integral calculus of real-valued functions of several real variables, including applications. Polar coordinates.

Prerequisite: MATH 2B or MATH 5B or AP Calculus BC. AP Calculus BC with a minimum score of 4

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. School of Info & Computer Sci students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

### **(Vb)**

### **MATH 2E. Multivariable Calculus. 4 Units.**

The differential and integral calculus of vector-valued functions. Implicit and inverse function theorems. Line and surface integrals, divergence and curl, theorems of Greens, Gauss, and Stokes.

Prerequisite: MATH 2D or MATH H2D

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment.

**MATH H2D. Honors Multivariable Calculus. 4 Units.**

Differential and integral calculus of real-valued functions of several real variables, including applications. Polar coordinates. Covers the same material as MATH 2D-E, but with a greater emphasis on the theoretical structure of the subject matter.

Prerequisite: MATH 2B or MATH 5B or (AP Calculus BC and (MATH H3A) or (MATH 3A and MATH 13)). MATH 2B with a grade of A or better. MATH 5B with a grade of A or better. AP Calculus BC with a minimum score of 5. MATH H3A with a grade of B- or better. MATH 3A with a grade of A or better. MATH 13 with a grade of A or better

Overlaps with MATH 2D.

(Vb)

**MATH H2E. Honors Multivariable Calculus. 4 Units.**

Differential and integral calculus of real-valued functions of several real variables, including applications. Polar coordinates. Covers the same material as MATH 2D-E, but with a greater emphasis on the theoretical structure of the subject matter.

Prerequisite: MATH H2D. MATH H2D with a grade of B- or better

Overlaps with MATH 2E.

**MATH 3A. Introduction to Linear Algebra. 4 Units.**

Systems of linear equations, matrix operations, determinants, eigenvalues and eigenvectors, vector spaces, subspaces, and dimension.

Prerequisite: MATH 2B or MATH 5B or AP Calculus BC. AP Calculus BC with a minimum score of 4

Overlaps with ICS 6N.

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment. Undeclared Majors have first consideration for enrollment.

(Vb)

**MATH 3D. Elementary Differential Equations. 4 Units.**

Linear differential equations, variation of parameters, constant coefficient cookbook, systems of equations, Laplace transforms, series solutions.

Prerequisite: (MATH 3A or MATH H3A) and (MATH 2D or MATH H2D) and (MATH 2B or AP Calculus BC). AP Calculus BC with a minimum score of 4

Restriction: School of Physical Sciences students have first consideration for enrollment. School of Engineering students have first consideration for enrollment.

**MATH H3A. Honors Introduction to Linear Algebra. 4 Units.**

Systems of linear equations, matrix operations, determinants, eigenvalues, eigenvectors, vector spaces, subspaces, and dimension.

Prerequisite: MATH 2B or MATH 5B or AP Calculus BC. MATH 2B with a grade of A or better. MATH 5B with a grade of A or better. AP Calculus BC with a minimum score of 5

Overlaps with MATH 3A, ICS 6N.

Restriction: School of Physical Sciences students only. School of Engineering students only. Mathematics Majors only. Undeclared Majors only.

**MATH 5A. Calculus for Life Sciences. 4 Units.**

Differential calculus with applications to life sciences. Exponential, logarithmic, and trigonometric functions. Limits, differentiation techniques, optimization and difference equations.

Prerequisite: MATH 1B or AP Calculus AB or SAT Mathematics or ACT Mathematics. MATH 1B with a grade of C or better. AP Calculus AB with a minimum score of 3. SAT Mathematics with a minimum score of 650. ACT Mathematics with a minimum score of 29. Placement via the Calculus Placement exam (fee required) is also accepted.

Overlaps with MATH 2A.

Restriction: School of Biological Sciences students have first consideration for enrollment.

(Vb)

**MATH 5B. Calculus for Life Sciences. 4 Units.**

Integral calculus and multivariable calculus with applications to life sciences. Integration techniques, applications of the integral, phase plane methods and basic modeling, basic multivariable methods.

Prerequisite: MATH 5A or MATH 2A or AP Calculus AB or AP Calculus BC. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3

Restriction: School of Biological Sciences students have first consideration for enrollment. Cannot be taken for credit after MATH 2B.

**(Vb)**

**MATH 7A. Single-Variable Calculus I. 4 Units.**

Introduction to derivatives, calculation of derivatives of algebraic and trigonometric functions; applications including curve sketching, related rates, and optimization. Exponential and logarithm functions.

Prerequisite: MATH 1B or AP Calculus AB or SAT Mathematics or ACT Mathematics. MATH 1B with a grade of C or better. AP Calculus AB with a minimum score of 3. SAT Mathematics with a minimum score of 650. ACT Mathematics with a minimum score of 29. Placement via the Calculus Placement exam (fee required) is also accepted.

Overlaps with MATH 2A, MATH 5A.

Restriction: Mathematics Majors only.

**(Vb)**

**MATH 7B. Single-Variable Calculus II. 4 Units.**

Definite integrals; the fundamental theorem of calculus. Applications of integration including finding areas and volumes. Techniques of integration. Infinite sequences and series.

Prerequisite: MATH 2A or MATH 5A or AP Calculus AB or AP Calculus BC or MATH 7A. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3

Overlaps with MATH 2B, MATH 5B.

Restriction: Mathematics Majors only.

**(Vb)**

**MATH 8. Explorations in Functions and Modeling. 4 Units.**

Explorations of applications and connections in topics in algebra, geometry, calculus, and statistics for future secondary math educators. Emphasis on nonstandard modeling problems.

Prerequisite or corequisite: MATH 2A or AP Calculus AB or AP Calculus BC. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3

**MATH 9. Introduction to Programming for Numerical Analysis. 4 Units.**

Introduction to computers and programming using Matlab and Mathematica. Representation of numbers and precision, input/output, functions, custom data types, testing/debugging, reading exceptions, plotting data, numerical differentiation, basics of algorithms. Analysis of random processes using computer simulations.

Prerequisite: MATH 2A

Restriction: Mathematics Majors have first consideration for enrollment.

**(II and Vb ).**

**MATH 10. Introduction to Programming for Data Science. 4 Units.**

Intro to algorithms in data science using Python and R. Basic concepts of Python, store, access, and manipulate data in lists; functions, methods, and packages; NumPy, Numerical stability, and accuracy. Gradient descent and Newton's method. Basics of R Programming.

Prerequisite or corequisite: (MATH 2D or MATH H2D) and (MATH 3A or MATH H3A) and MATH 9

Restriction: Mathematics Majors have first consideration for enrollment.

**(II and VB ).**

**MATH 13. Introduction to Abstract Mathematics. 4 Units.**

Introduction to formal definition and rigorous proof writing in mathematics. Topics include basic logic, set theory, equivalence relations, and various proof techniques such as direct, induction, contradiction, contrapositive, and exhaustion.

Prerequisite: MATH 2A or ICS 6D

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 105A. Numerical Analysis I. 4 Units.**

Introduction to the theory and practice of numerical computation with an emphasis on solving equations. Solving transcendental equations; linear systems, Gaussian elimination, QR factorization, iterative methods, eigenvalue computation, power method.

Corequisite: MATH 105LA

Prerequisite: MATH 3A or MATH H3A. Familiarity with computer programming is required.

Overlaps with MAE 185.

**MATH 105B. Numerical Analysis II. 4 Units.**

Introduction to the theory and practice of numerical computation with an emphasis on topics from calculus and approximation theory. Lagrange interpolation; Gaussian quadrature; Fourier series and transforms; Methods from data science including least squares and L1 regression.

Corequisite: MATH 105LB

Prerequisite: MATH 105A

**MATH 105LA. Numerical Analysis Laboratory. 1 Unit.**

Provides practical experience to complement the theory developed in Mathematics 105A.

Corequisite: MATH 105A

**MATH 105LB. Numerical Analysis Laboratory. 1 Unit.**

Provides practical experience to complement the theory developed in Mathematics 105B.

Corequisite: MATH 105B

**MATH 107. Numerical Differential Equations. 4 Units.**

Theory and applications of numerical methods to initial and boundary-value problems for ordinary and partial differential equations.

Corequisite: MATH 107L

Prerequisite: MATH 3D and MATH 105A and MATH 105B

**MATH 107L. Numerical Differential Equations Laboratory. 1 Unit.**

Provides practical experience to complement the theory developed in Mathematics 107.

Corequisite: MATH 107

**MATH 110A. Optimization I. 4 Units.**

Introduction to optimization, linear search method, trust region method, Newton method, linear programming, linear, and non-linear least square methods.

Prerequisite or corequisite: (MATH 2D or MATH H2D) and (MATH 3A or MATH H3A) and MATH 10 and MATH 121A and MATH 121B

**MATH 110B. Optimization II. 4 Units.**

The simplex method, interior point method, penalty barrier method, primal dual method, augmented Lagrangian method, and stochastic gradient method.

Prerequisite: MATH 110A. MATH 110A with a grade of C or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 112A. Introduction to Partial Differential Equations and Applications. 4 Units.**

Introduction to ordinary and partial differential equations and their applications in engineering and science. Basic methods for classical PDEs (potential, heat, and wave equations). Classification of PDEs, separation of variables and series expansions, special functions, eigenvalue problems.

Prerequisite: (MATH 2E or MATH H2E) and MATH 3D

**MATH 112B. Introduction to Partial Differential Equations and Applications. 4 Units.**

Introduction to partial differential equations and their applications in engineering and science. Basic methods for classical PDEs (potential, heat, and wave equations). Green functions and integral representations, method of characteristics.

Prerequisite: MATH 112A

**MATH 112C. Introduction to Partial Differential Equations and Applications. 4 Units.**

Nonhomogeneous problems and Green's functions, Sturm-Liouville theory, general Fourier expansions, applications of partial differential equations in different areas of science.

Prerequisite: MATH 112B

**MATH 113A. Mathematical Modeling in Biology. 4 Units.**

Discrete mathematical and statistical models; difference equations, population dynamics, Markov chains, and statistical models in biology.

Prerequisite: MATH 2B or MATH 5B

**MATH 113B. Mathematical Modeling in Biology. 4 Units.**

Linear algebra; differential equations models; dynamical systems; stability; hysteresis; phase plane analysis; applications to cell biology, viral dynamics, and infectious diseases.

Prerequisite: MATH 2B or AP Calculus BC or MATH 5B. AP Calculus BC with a minimum score of 4

**MATH 115. Mathematical Modeling. 4 Units.**

Mathematical modeling and analysis of phenomena that arise in engineering physical sciences, biology, economics, or social sciences.

Prerequisite: MATH 112A and (MATH 2D or MATH H2D) and (MATH 3A or MATH H3A) and MATH 3D

**MATH 117. Dynamical Systems. 4 Units.**

Introduction to the modern theory of dynamical systems including contraction mapping principle, fractals and chaos, conservative systems, Kepler problem, billiard models, expanding maps, Smale's horseshoe, topological entropy.

Prerequisite: MATH 3D and MATH 140A

**MATH 118. The Theory of Differential Equations. 4 Units.**

Existence and uniqueness of solutions, continuous dependence of solutions on initial conditions and parameters, Lyapunov and asymptotic stability, Floquet theory, nonlinear systems, and bifurcations.

Prerequisite: MATH 3D and MATH 140A

**MATH 120A. Introduction to Abstract Algebra: Groups. 4 Units.**

Axioms for group theory; permutation groups, matrix groups. Isomorphisms, homomorphisms, quotient groups. Advanced topics as time permits. Special emphasis on doing proofs.

Prerequisite: (MATH 3A or MATH H3A) and MATH 13. MATH 13 with a grade of C or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 120B. Introduction to Abstract Algebra: Rings and Fields. 4 Units.**

Basic properties of rings; ideals, quotient rings; polynomial and matrix rings. Elements of field theory.

Prerequisite: MATH 120A. MATH 120A with a grade of C- or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 120C. Introduction to Abstract Algebra: Galois Theory. 4 Units.**

Galois Theory: proof of the impossibility of certain ruler-and-compass constructions (squaring the circle, trisecting angles); nonexistence of analogues to the 'quadratic formula' for polynomial equations of degree 5 or higher.

Prerequisite: MATH 120B

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH H120A. Honors Introduction to Graduate Algebra I. 5 Units.**

Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, and symmetric operators. Introduction to groups, rings, and fields, including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials, and Galois groups.

Prerequisite: (MATH 3A or MATH H3A) and MATH 13 and (MATH 120A or MATH 121A). MATH 13 with a grade of A or better. MATH 120A with a grade of A or better. MATH 121A with a grade of A or better

Restriction: Mathematics Honors students only.

Concurrent with MATH 206A.

**MATH H120B. Honors Introduction to Graduate Algebra II. 5 Units.**

Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, and symmetric operators. Introduction to groups, rings, and fields, including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials, and Galois groups.

Prerequisite: MATH H120A

Restriction: Mathematics Honors students only.

Concurrent with MATH 206B.

**MATH H120C. Honors Introduction to Graduate Algebra III. 5 Units.**

Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, and symmetric operators. Introduction to groups, rings, and fields, including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials, and Galois groups.

Prerequisite: MATH H120B

Restriction: Mathematics Honors students only.

Concurrent with MATH 206C.

**MATH 121A. Linear Algebra. 4 Units.**

Introduction to modern abstract linear algebra. Special emphasis on students doing proofs. Vector spaces, linear independence, bases, dimension. Linear transformations and their matrix representations. Theory of determinants.

Prerequisite: (MATH 3A or MATH H3A) and MATH 13. MATH 13 with a grade of C or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 121B. Linear Algebra. 4 Units.**

Introduction to modern abstract linear algebra. Special emphasis on students doing proofs. Canonical forms; inner products; similarity of matrices.

Prerequisite: MATH 121A

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 130A. Probability I. 4 Units.**

Combinatorial probability, conditional probabilities, independence, discrete and continuous random variables, expectation and variance, common probability distributions.

Prerequisite: (MATH 2A or AP Calculus BC or AP Calculus AB) and (MATH 2B or AP Calculus BC) and (MATH 3A or MATH H3A). AP Calculus BC with a minimum score of 3. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 4

**MATH 130B. Probability II. 4 Units.**

Joint distributions, sums of independent random variables, conditional distributions and conditional expectation, covariances, moment generating functions, limit theorems.

Prerequisite: MATH 130A or MATH 131A or STAT 120A

**MATH 130C. Stochastic Processes. 4 Units.**

Markov chains, Brownian motion, Gaussian processes, applications to option pricing and Markov chain Monte Carlo methods.

Prerequisite: MATH 130B

**MATH 133A. Statistical Methods with Applications to Finance. 4 Units.**

Overview of probability, statistics, and financial concepts: distribution, point estimation, confidence interval, linear regression, hypothesis testing, principal component analysis, financial applications.

Prerequisite: MATH 130A or MATH 131A or STAT 120A

**MATH 133B. Statistical Methods with Applications to Finance. 4 Units.**

Overview of markets and options: asset modeling, Brownian motion, risk neutrality, option pricing, value at risk, MC simulations.

Prerequisite: MATH 133A

**MATH 133C. Statistical Methods with Applications to Finance. 4 Units.**

Overview of interest theory, time value of money, annuities/cash flows with payments that are not contingent, loans, sinking funds, bonds, general cash flow and portfolios, immunization, duration and convexity, swaps.

Prerequisite: MATH 133B

**MATH 134A. Fixed Income. 4 Units.**

Overview of interest theory, time value of money, annuities/cash flows with payments that are not contingent, loans, sinking funds, bonds, general cash flow and portfolios, immunization, duration and convexity, swaps.

Prerequisite: MATH 130A or STAT 120A

Overlaps with MATH 133C.

**MATH 134B. Mathematics of Financial Derivatives. 4 Units.**

General derivatives; call/put options; hedging and investment strategies: spreads and collars; risk management; forwards and futures; bonds.

Prerequisite: MATH 134A or MATH 133C

Overlaps with MATH 133A.

**MATH 134C. Mathematical Models for Finance. 4 Units.**

General properties of options: option contracts (call and put options, European, American and exotic options); binomial option pricing model, Black-Scholes option pricing model; risk-neutral pricing formula using Monte-Carlo simulation; option greeks and risk management; interest rate derivatives, Markowitz portfolio theory.

Prerequisite: MATH 134B or MATH 133A

Overlaps with MATH 133B.

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 140A. Elementary Analysis. 4 Units.**

Introduction to real analysis, including convergence of sequence, infinite series, differentiation and integration, and sequences of functions. Students are expected to do proofs.

Prerequisite: (MATH 2B or AP Calculus BC) and (MATH 2D or MATH H2D) and (MATH 3A or MATH H3A) and MATH 13. AP Calculus BC with a minimum score of 4. MATH 13 with a grade of C or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 140B. Elementary Analysis. 4 Units.**

Introduction to real analysis including convergence of sequences, infinite series, differentiation and integration, and sequences of functions. Students are expected to do proofs.

Prerequisite: MATH 140A. MATH 140A with a grade of C- or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 140C. Analysis in Several Variables . 4 Units.**

Rigorous treatment of multivariable differential calculus. Jacobians, Inverse and Implicit Function theorems.

Prerequisite: MATH 140B

**MATH H140A. Honors Introduction to Graduate Analysis I. 5 Units.**

Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.

Prerequisite: (MATH 2E or MATH H2E) and (MATH 3A or MATH H3A) and MATH 13 and MATH 121A and MATH 140A and MATH 140B. MATH 2E with a grade of A or better. MATH H2E with a grade of A or better. MATH 13 with a grade of A or better. MATH 140A with a grade of A or better. MATH 140B with a grade of A or better

Restriction: Mathematics Honors students only.

Concurrent with MATH 205A.

**MATH H140B. Honors Introduction to Graduate Analysis II. 5 Units.**

Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.

Prerequisite: MATH H140A

Restriction: Mathematics Honors students only.

Concurrent with MATH 205B.

**MATH H140C. Honors Introduction to Graduate Analysis III. 5 Units.**

Construction of the real number system; topology of the real line; concepts of continuity, differential, and integral calculus; sequences and series of functions, equicontinuity, metric spaces, multivariable differential, and integral calculus; implicit functions, curves and surfaces.

Prerequisite: MATH H140B

Restriction: Mathematics Honors students only.

Concurrent with MATH 205C.

**MATH 141. Introduction to Topology. 4 Units.**

The elements of naive set theory and the basic properties of metric spaces. Introduction to topological properties.

Prerequisite: MATH 140A

**MATH 147. Complex Analysis. 4 Units.**

Rigorous treatment of basic complex analysis: analytic functions, Cauchy integral theory and its consequences, power series, residue calculus, harmonic functions, conformal mapping. Students are expected to do proofs.

Prerequisite or corequisite: MATH 140A and MATH 140B

Restriction: MATH 114A may not be taken for credit after MATH 147.

**MATH 150. Introduction to Mathematical Logic. 4 Units.**

First order logic through the Completeness Theorem for predicate logic.

Prerequisite: MATH 13 or (ICS 6B and ICS 6D). MATH 13 with a grade of C- or better

Overlaps with LPS 105B, PHIL 105B.

**MATH 161. Modern Geometry. 4 Units.**

Euclidean Geometry; Hilbert's Axioms; Absolute Geometry; Hyperbolic Geometry; the Poincare Models; and Geometric Transformations.

Prerequisite: MATH 13 or (ICS 6B and ICS 6D). MATH 13 with a grade of C- or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 162A. Introduction to Differential Geometry. 4 Units.**

Applications of advanced calculus and linear algebra to the geometry of curves and surfaces in space.

Prerequisite: (MATH 2E or MATH H2E) and (MATH 3A or MATH H3A) and MATH 3D

**MATH 162B. Introduction to Differential Geometry. 4 Units.**

Applications of advanced calculus and linear algebra to the geometry of curves and surfaces in space.

Prerequisite: MATH 162A

**MATH 173A. Introduction to Cryptology. 4 Units.**

Introduction to some of the mathematics used in the making and breaking of codes, with applications to classical ciphers and public key systems. Includes topics from number theory, probability, and abstract algebra.

Prerequisite: (MATH 2B or AP Calculus BC) and (MATH 3A or MATH H3A) and MATH 13 or (ICS 6B and ICS 6D). AP Calculus BC with a minimum score of 4. MATH 13 with a grade of C or better

**MATH 173B. Introduction to Cryptology. 4 Units.**

Introduction to some of the mathematics used in the making and breaking of codes, with applications to classical ciphers and public key systems. The mathematics which is covered includes topics from number theory, probability, and abstract algebra.

Prerequisite: MATH 173A

**MATH 175. Combinatorics . 4 Units.**

Introduction to combinatorics including basic counting principles, permutations, combinations, binomial coefficients, inclusion-exclusion, derangements, ordinary and exponential generating functions, recurrence relations, Catalan numbers, Stirling numbers, and partition numbers.

Prerequisite: (MATH 2B or AP Calculus BC) and MATH 13. AP Calculus BC with a minimum score of 4. MATH 13 with a grade of C or better

**MATH 176. Mathematics of Finance. 4 Units.**

After reviewing tools from probability, statistics, and elementary differential and partial differential equations, concepts such as hedging, arbitrage, Puts, Calls, the design of portfolios, the derivation and solution of the Black-Scholes, and other equations are discussed.

Prerequisite: MATH 3A or MATH H3A

Same as ECON 135.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Mathematics Majors have first consideration for enrollment.

**MATH 180A. Number Theory. 4 Units.**

Introduction to number theory and applications. Divisibility, prime numbers, factorization. Arithmetic functions. Congruences. Quadratic residue. Diophantine equations. Introduction to cryptography.

Prerequisite: (MATH 3A or MATH H3A) and MATH 13. MATH 13 with a grade of C or better

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 180B. Number Theory. 4 Units.**

Introduction to number theory and applications. Analytic number theory, character sums, finite fields, discrete logarithm, computational complexity. Introduction to coding theory. Other topics as time permits.

Prerequisite: MATH 180A

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 184. History of Mathematics. 4 Units.**

Topics vary from year to year. Some possible topics: mathematics in ancient times; the development of modern analysis; the evolution of geometric ideas. Students will be assigned individual topics for term papers.

Corequisite: MATH 184L

Prerequisite: MATH 120A and MATH 140A

Restriction: Mathematics Majors have first consideration for enrollment.

**MATH 184L. History of Mathematics Lesson Lab. 1 Unit.**

Aspiring math teachers research, design, present, and peer review middle school or high school math lessons that draw from history of mathematics topics.

Corequisite: MATH 184

Prerequisite: PS 5

**MATH 192. Studies in the Learning and Teaching of Secondary Mathematics. 2 Units.**

Focus is on historic and current mathematical concepts related to student learning and effective math pedagogy, with fieldwork in grades 6-14.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**MATH 194. Problem Solving Seminar. 2 Units.**

Develops ability in analytical thinking and problem solving, using problems of the type found in the Mathematics Olympiad and the Putnam Mathematical Competition. Students taking the course in fall will prepare for and take the Putnam examination in December.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

**MATH 195W. Mathematical Writing. 4 Units.**

Techniques of mathematical writing and communication. Covers effectively writing mathematical papers, creating effective presentations, and communicating mathematics in a variety of media. Focuses on utilizing LaTeX for typesetting mathematics.

Prerequisite: MATH 120A or MATH 121A or MATH 140A. MATH 120A with a grade of C or better. MATH 121A with a grade of C or better. MATH 140A with a grade of C or better. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Mathematics Majors have first consideration for enrollment.

(Ib)

**MATH 199A. Special Studies in Mathematics. 2-4 Units.**

Supervised reading. For outstanding undergraduate Mathematics majors in supervised but independent reading or research of mathematical topics.

Repeatability: Unlimited as topics vary.

**MATH 199B. Special Studies in Mathematics. 2-4 Units.**

Supervised reading. For outstanding undergraduate Mathematics majors in supervised but independent reading or research of mathematical topics.

Repeatability: Unlimited as topics vary.

**MATH 199C. Special Studies in Mathematics. 2-4 Units.**

Supervised reading. For outstanding undergraduate Mathematics majors in supervised but independent reading or research of mathematical topics.

Repeatability: Unlimited as topics vary.

**MATH 205A. Introduction to Graduate Analysis. 5 Units.**

Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.

Prerequisite: (MATH 2E or MATH H2E) and (MATH 3A MATH H3A) and MATH 13. MATH 2E with a grade of A or better. MATH H2E with a grade of A or better. MATH 13 with a grade of C or better

Concurrent with MATH H140A.

**MATH 205B. Introduction to Graduate Analysis. 5 Units.**

Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.

Prerequisite: MATH 205A

Concurrent with MATH H140B.

**MATH 205C. Introduction to Graduate Analysis. 5 Units.**

Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.

Prerequisite: MATH 205B

Concurrent with MATH H140C.

**MATH 206A. Introduction to Graduate Algebra. 5 Units.**

Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, symmetric operators. Introduction to groups, rings, and fields including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials, and Galois groups.

Prerequisite: MATH 3A or MATH H3A

Concurrent with MATH H120A.

**MATH 206B. Introduction to Graduate Algebra. 5 Units.**

Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, symmetric operators. Introduction to groups, rings, and fields including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials, and Galois groups.

Prerequisite: MATH 206A

Concurrent with MATH H120B.

**MATH 206C. Introduction to Graduate Algebra. 5 Units.**

Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, symmetric operators. Introduction to groups, rings, and fields including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials, and Galois groups.

Prerequisite: MATH 206B

Concurrent with MATH H120C.

**MATH 210A. Real Analysis. 4 Units.**

Measure theory, Lebesgue integral, signed measures, Radon-Nikodym theorem, functions of bounded variation and absolutely continuous functions, classical Banach spaces,  $L_p$  spaces, integration on locally compact spaces and the Riesz-Markov theorem, measure and outer measure, product measure spaces.

Prerequisite: MATH 140C

**MATH 210B. Real Analysis. 4 Units.**

Measure theory, Lebesgue integral, signed measures, Radon-Nikodym theorem, functions of bounded variation and absolutely continuous functions, classical Banach spaces,  $L_p$  spaces, integration on locally compact spaces and the Riesz-Markov theorem, measure and outer measure, product measure spaces.

Prerequisite: MATH 210A

**MATH 210C. Real Analysis. 4 Units.**

Measure theory, Lebesgue integral, signed measures, Radon-Nikodym theorem, functions of bounded variation and absolutely continuous functions, classical Banach spaces,  $L_p$  spaces, integration on locally compact spaces and the Riesz-Markov theorem, measure and outer measure, product measure spaces.

Prerequisite: MATH 210B

**MATH 218A. Introduction to Manifolds and Geometry. 4 Units.**

General topology and fundamental groups, covering space; Stokes theorem on manifolds, selected topics on abstract manifold theory.

Prerequisite: MATH 205C

**MATH 218B. Introduction to Manifolds and Geometry. 4 Units.**

General topology and fundamental groups, covering space; Stokes theorem on manifolds, selected topics on abstract manifold theory.

Prerequisite: MATH 218A

**MATH 218C. Introduction to Manifolds and Geometry. 4 Units.**

General topology and fundamental groups, covering space; Stokes theorem on manifolds, selected topics on abstract manifold theory.

Prerequisite: MATH 218B

**MATH 220A. Analytic Function Theory. 4 Units.**

Standard theorems about analytic functions. Harmonic functions. Normal families. Conformal mapping.

Prerequisite: MATH 140C

**MATH 220B. Analytic Function Theory. 4 Units.**

Standard theorems about analytic functions. Harmonic functions. Normal families. Conformal mapping.

Prerequisite: MATH 220A

**MATH 220C. Analytic Function Theory. 4 Units.**

Standard theorems about analytic functions. Harmonic functions. Normal families. Conformal mapping.

Prerequisite: MATH 220B

**MATH 222A. Several Complex Variables and Complex Geometry. 4 Units.**

Several Complex variables,  $\bar{\partial}$ -problems, mappings, Kaehler geometry, de Rham and Dolbeault Theorems, Chern Classes, Hodge Theorems, Calabi conjecture, Kahler-Einstein geometry, Monge-Ampere.

Prerequisite: MATH 218C and MATH 220C

**MATH 225A. Introduction to Numerical Analysis and Scientific Computing. 4 Units.**

Introduction to fundamentals of numerical analysis from an advanced viewpoint. Error analysis, approximation of functions, nonlinear equations.

Prerequisite: MATH 3D and (MATH 105A and MATH 105B) or (MATH 140A and MATH 140B) and MATH 121A and (MATH 112A or MAE 140)

Restriction: Graduate students only.

**MATH 225B. Introduction to Numerical Analysis and Scientific Computing. 4 Units.**

Introduction to fundamentals of numerical analysis from an advanced viewpoint. Numerical linear algebra, numerical solutions of differential equations; stability.

Prerequisite: MATH 225A

Restriction: Graduate students only.

**MATH 225C. Introduction to Numerical Analysis and Scientific Computing. 4 Units.**

Introduction to fundamentals of numerical analysis from an advanced viewpoint. Numerical linear algebra, numerical solutions of differential equations; stability.

Prerequisite: MATH 225B

Restriction: Graduate students only.

**MATH 226A. Computational Differential Equations. 4 Units.**

Finite difference and finite element methods. Quick treatment of functional and nonlinear analysis background: weak solution,  $L_p$  spaces, Sobolev spaces. Approximation theory. Fourier and Petrov-Galerkin methods; mesh generation. Elliptic, parabolic, hyperbolic cases in 226A-B-C, respectively.

Prerequisite: MATH 3D and (MATH 112A or MAE 140) and (MATH 140B or MATH 105B)

**MATH 226B. Computational Differential Equations. 4 Units.**

Finite difference and finite element methods. Quick treatment of functional and nonlinear analysis background: weak solution,  $L_p$  spaces, Sobolev spaces. Approximation theory. Fourier and Petrov-Galerkin methods; mesh generation. Elliptic, parabolic, hyperbolic cases in 226A-B-C, respectively.

Prerequisite: MATH 226A

**MATH 226C. Computational Differential Equations. 4 Units.**

Finite difference and finite element methods. Quick treatment of functional and nonlinear analysis background: weak solution,  $L_p$  spaces, Sobolev spaces. Approximation theory. Fourier and Petrov-Galerkin methods; mesh generation. Elliptic, parabolic, hyperbolic cases in 226A-B-C, respectively.

Prerequisite: MATH 226B

**MATH 227A. Mathematical and Computational Biology. 4 Units.**

Analytical and numerical methods for dynamical systems, temporal-spatial dynamics, steady state, stability, stochasticity. Application to life sciences: genetics, tissue growth and patterning, cancers, ion channels gating, signaling networks, morphogen gradients. Analytical methods.

Prerequisite: (MATH 2A or AP Calculus BC or AP Calculus AB) and (MATH 2B or AP Calculus BC or MATH 5B) and (MATH 3A or MATH H3A). AP Calculus BC with a minimum score of 3. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 4

**MATH 227B. Mathematical and Computational Biology. 4 Units.**

Analytical and numerical methods for dynamical systems, temporal-spatial dynamics, steady state, stability, stochasticity. Application to life sciences: genetics, tissue growth and patterning, cancers, ion channels gating, signaling networks, morphogen gradients. Numerical simulations.

Prerequisite: MATH 227A

**MATH 227C. Mathematical and Computational Biology . 4 Units.**

Analytical and numerical methods for dynamical systems, temporal-spatial dynamics, steady state, stability, stochasticity. Application to life sciences: genetics, tissue growth and patterning, cancers, ion channels gating, signaling networks, morphogen gradients. Probabilistic methods.

Prerequisite: MATH 227A

Same as CS 285.

**MATH 230A. Algebra. 4 Units.**

Elements of the theories of groups, rings, fields, modules. Galois theory. Modules over principal ideal domains. Artinian, Noetherian, and semisimple rings and modules.

Prerequisite: MATH 120A and MATH 121A and MATH 121B

**MATH 230B. Algebra. 4 Units.**

Elements of the theories of groups, rings, fields, modules. Galois theory. Modules over principal ideal domains. Artinian, Noetherian, and semisimple rings and modules.

Prerequisite: MATH 230A

**MATH 230C. Algebra. 4 Units.**

Elements of the theories of groups, rings, fields, modules. Galois theory. Modules over principal ideal domains. Artinian, Noetherian, and semisimple rings and modules.

Prerequisite: MATH 230B

**MATH 232A. Algebraic Number Theory. 4 Units.**

Algebraic integers, prime ideals, class groups, Dirichlet unit theorem, localization, completion, Cebotarev density theorem, L-functions, Gauss sums, diophantine equations, zeta functions over finite fields. Introduction to class field theory.

Prerequisite: MATH 230C

**MATH 232B. Algebraic Number Theory. 4 Units.**

Algebraic integers, prime ideals, class groups, Dirichlet unit theorem, localization, completion, Cebotarev density theorem, L-functions, Gauss sums, diophantine equations, zeta functions over finite fields. Introduction to class field theory.

Prerequisite: MATH 232A

**MATH 232C. Algebraic Number Theory. 4 Units.**

Algebraic integers, prime ideals, class groups, Dirichlet unit theorem, localization, completion, Cebotarev density theorem, L-functions, Gauss sums, diophantine equations, zeta functions over finite fields. Introduction to class field theory.

Prerequisite: MATH 232B

**MATH 233A. Algebraic Geometry. 4 Units.**

Basic commutative algebra and classical algebraic geometry. Algebraic varieties, morphisms, rational maps, blow ups. Theory of schemes, sheaves, divisors, cohomology. Algebraic curves and surfaces, Riemann-Roch theorem, Jacobians, classification of curves and surfaces.

Prerequisite: MATH 230C

**MATH 233B. Algebraic Geometry. 4 Units.**

Basic commutative algebra and classical algebraic geometry. Algebraic varieties, morphisms, rational maps, blow ups. Theory of schemes, sheaves, divisors, cohomology. Algebraic curves and surfaces, Riemann-Roch theorem, Jacobians, classification of curves and surfaces.

Prerequisite: MATH 233A

**MATH 233C. Algebraic Geometry. 4 Units.**

Basic commutative algebra and classical algebraic geometry. Algebraic varieties, morphisms, rational maps, blow ups. Theory of schemes, sheaves, divisors, cohomology. Algebraic curves and surfaces, Riemann-Roch theorem, Jacobians, classification of curves and surfaces.

Prerequisite: MATH 233B

**MATH 235A. Mathematics of Cryptography. 4 Units.**

Mathematics of public key cryptography: encryption and signature schemes; RSA; factoring; primality testing; discrete log based cryptosystems, elliptic and hyperelliptic curve cryptography and additional topics as determined by the instructor.

Prerequisite: MATH 230C

**MATH 239A. Analytic Methods in Arithmetic Geometry. 4 Units.**

Riemann zeta function, Dirichlet L-functions, prime number theorem, zeta functions over finite fields, sieve methods, zeta functions of algebraic curves, algebraic coding theory, L-Functions over number fields, L-functions of modular forms, Eisenstein series.

Prerequisite: MATH 220C and MATH 230C

**MATH 239B. Analytic Methods in Arithmetic Geometry. 4 Units.**

Riemann zeta function, Dirichlet L-functions, prime number theorem, zeta functions over finite fields, sieve methods, zeta functions of algebraic curves, algebraic coding theory, L-Functions over number fields, L-functions of modular forms, Eisenstein series.

Prerequisite: MATH 239A

**MATH 239C. Analytic Methods in Arithmetic Geometry. 4 Units.**

Riemann zeta function, Dirichlet L-functions, prime number theorem, zeta functions over finite fields, sieve methods, zeta functions of algebraic curves, algebraic coding theory, L-Functions over number fields, L-functions of modular forms, Eisenstein series.

Prerequisite: MATH 239B

**MATH 240A. Differential Geometry. 4 Units.**

Riemannian manifolds, connections, curvature and torsion. Submanifolds, mean curvature, Gauss curvature equation. Geodesics, minimal submanifolds, first and second fundamental forms, variational formulas. Comparison theorems and their geometric applications. Hodge theory applications to geometry and topology.

**MATH 240B. Differential Geometry. 4 Units.**

Riemannian manifolds, connections, curvature and torsion. Submanifolds, mean curvature, Gauss curvature equation. Geodesics, minimal submanifolds, first and second fundamental forms, variational formulas. Comparison theorems and their geometric applications. Hodge theory applications to geometry and topology.

Prerequisite: MATH 240A

**MATH 240C. Differential Geometry. 4 Units.**

Riemannian manifolds, connections, curvature and torsion. Submanifolds, mean curvature, Gauss curvature equation. Geodesics, minimal submanifolds, first and second fundamental forms, variational formulas. Comparison theorems and their geometric applications. Hodge theory applications to geometry and topology.

Prerequisite: MATH 240B

**MATH 245A. Topics in Differential Geometry. 4 Units.**

Studies in selected areas of differential geometry, a continuation of MATH 240A-MATH 240B-MATH 240C. Topics addressed vary each quarter.

Prerequisite: MATH 240C

Repeatability: Unlimited as topics vary.

**MATH 245B. Topics in Differential Geometry. 4 Units.**

Studies in selected areas of differential geometry, a continuation of MATH 240A-MATH 240B-MATH 240C. Topics addressed vary each quarter.

Prerequisite: MATH 245A

Repeatability: Unlimited as topics vary.

**MATH 245C. Topics in Differential Geometry. 4 Units.**

Studies in selected areas of differential geometry, a continuation of MATH 240A-MATH 240B-MATH 240C. Topics addressed vary each quarter.

Prerequisite: MATH 245B

Repeatability: Unlimited as topics vary.

**MATH 250A. Algebraic Topology. 4 Units.**

Provides fundamental materials in algebraic topology: fundamental group and covering space, homology and cohomology theory, and homotopy group.

Prerequisite: MATH 230A

**MATH 250B. Algebraic Topology. 4 Units.**

Provides fundamental materials in algebraic topology: fundamental group and covering space, homology and cohomology theory, and homotopy group.

Prerequisite: MATH 250A

**MATH 250C. Algebraic Topology. 4 Units.**

Provides fundamental materials in algebraic topology: fundamental group and covering space, homology and cohomology theory, and homotopy group.

Prerequisite: MATH 250B

**MATH 260A. Functional Analysis. 4 Units.**

Normed linear spaces, Hilbert spaces, Banach spaces, Stone-Weierstrass Theorem, locally convex spaces, bounded operators on Banach and Hilbert spaces, the Gelfand-Neumark Theorem for commutative  $C^*$ -algebras, the spectral theorem for bounded self-adjoint operators, unbounded operators on Hilbert spaces.

Prerequisite: MATH 210C and MATH 220C

**MATH 260B. Functional Analysis. 4 Units.**

Normed linear spaces, Hilbert spaces, Banach spaces, Stone-Weierstrass Theorem, locally convex spaces, bounded operators on Banach and Hilbert spaces, the Gelfand-Neumark Theorem for commutative  $C^*$ -algebras, the spectral theorem for bounded self-adjoint operators, unbounded operators on Hilbert spaces.

Prerequisite: MATH 260A

**MATH 260C. Functional Analysis. 4 Units.**

Normed linear spaces, Hilbert spaces, Banach spaces, Stone-Weierstrass Theorem, locally convex spaces, bounded operators on Banach and Hilbert spaces, the Gelfand-Neumark Theorem for commutative  $C^*$ -algebras, the spectral theorem for bounded self-adjoint operators, unbounded operators on Hilbert spaces.

Prerequisite: MATH 260B

**MATH 270A. Probability. 4 Units.**

Probability spaces, distribution and characteristic functions. Strong limit theorems. Limit distributions for sums of independent random variables. Conditional expectation and martingale theory. Stochastic processes.

Prerequisite: MATH 130C and MATH 210C

**MATH 270B. Probability. 4 Units.**

Probability spaces, distribution and characteristic functions. Strong limit theorems. Limit distributions for sums of independent random variables. Conditional expectation and martingale theory. Stochastic processes.

Prerequisite: MATH 270A

**MATH 270C. Probability. 4 Units.**

Probability spaces, distribution and characteristic functions. Strong limit theorems. Limit distributions for sums of independent random variables. Conditional expectation and martingale theory. Stochastic processes.

Prerequisite: MATH 270B

**MATH 271A. Stochastic Processes. 4 Units.**

Processes with independent increments, Wiener and Gaussian processes, function space integrals, stationary processes, Markov processes.

Prerequisite: MATH 210C

Overlaps with STAT 270.

**MATH 271B. Stochastic Processes. 4 Units.**

Processes with independent increments, Wiener and Gaussian processes, function space integrals, stationary processes, Markov processes.

Prerequisite: MATH 271A

Overlaps with STAT 270.

**MATH 271C. Stochastic Processes. 4 Units.**

Processes with independent increments, Wiener and Gaussian processes, function space integrals, stationary processes, Markov processes.

Prerequisite: MATH 271B

Overlaps with STAT 270.

**MATH 280A. Mathematical Logic. 4 Units.**

Basic set theory; models, compactness, and completeness; basic model theory; Incompleteness and Gödel's Theorems; basic recursion theory; constructible sets.

**MATH 280B. Mathematical Logic. 4 Units.**

Basic set theory; models, compactness, and completeness; basic model theory; Incompleteness and Gödel's Theorems; basic recursion theory; constructible sets.

Prerequisite: MATH 280A

**MATH 280C. Mathematical Logic. 4 Units.**

Basic set theory; models, compactness, and completeness; basic model theory; Incompleteness and Gödel's Theorems; basic recursion theory; constructible sets.

Prerequisite: MATH 280B

**MATH 281A. Set Theory. 4 Units.**

Ordinals, cardinals, cardinal arithmetic, combinatorial set theory, models of set theory, Gödel's constructible universe, forcing, large cardinals, iterate forcing, inner model theory, fine structure.

Prerequisite: MATH 280C

**MATH 281B. Set Theory. 4 Units.**

Ordinals, cardinals, cardinal arithmetic, combinatorial set theory, models of set theory, Gödel's constructible universe, forcing, large cardinals, iterate forcing, inner model theory, fine structure.

Prerequisite: MATH 281A

**MATH 281C. Set Theory. 4 Units.**

Ordinals, cardinals, cardinal arithmetic, combinatorial set theory, models of set theory, Gödel's constructible universe, forcing, large cardinals, iterate forcing, inner model theory, fine structure.

Prerequisite: MATH 281B

**MATH 282A. Model Theory. 4 Units.**

Languages, structures, compactness and completeness. Model-theoretic constructions. Omitting types theorems. Morley's theorem. Ranks, forking. Model completeness. O-minimality. Applications to algebra.

Prerequisite: MATH 280C

**MATH 282B. Model Theory. 4 Units.**

Languages, structures, compactness and completeness. Model-theoretic constructions. Omitting types theorems. Morley's theorem. Ranks, forking. Model completeness. O-minimality. Applications to algebra.

Prerequisite: MATH 282A

**MATH 282C. Model Theory. 4 Units.**

Languages, structures, compactness and completeness. Model-theoretic constructions. Omitting types theorems. Morley's theorem. Ranks, forking. Model completeness. O-minimality. Applications to algebra.

Prerequisite: MATH 282B

**MATH 285A. Topics in Mathematical Logic. 4 Units.**

Studies in selected areas of mathematical logic, a continuation of MATH 280A-MATH 280B-MATH 280C. Topics addressed vary each quarter.

Prerequisite: MATH 280C

Repeatability: Unlimited as topics vary.

**MATH 290A. Methods in Applied Mathematics. 4 Units.**

Introduction to ODEs and dynamical systems: existence and uniqueness. Equilibria and periodic solutions. Bifurcation theory. Perturbation methods: approximate solution of differential equations. Multiple scales and WKB. Matched asymptotic. Calculus of variations: direct methods, Euler-Lagrange equation. Second variation and Legendre condition.

**MATH 290B. Methods in Applied Mathematics. 4 Units.**

Introduction to ODEs and dynamical systems: existence and uniqueness. Equilibria and periodic solutions. Bifurcation theory. Perturbation methods: approximate solution of differential equations. Multiple scales and WKB. Matched asymptotic. Calculus of variations: direct methods, Euler-Lagrange equation. Second variation and Legendre condition.

Prerequisite: MATH 290A

**MATH 290C. Methods in Applied Mathematics. 4 Units.**

Introduction to ODEs and dynamical systems: existence and uniqueness. Equilibria and periodic solutions. Bifurcation theory. Perturbation methods: approximate solution of differential equations. Multiple scales and WKB. Matched asymptotic. Calculus of variations: direct methods, Euler-Lagrange equation. Second variation and Legendre condition.

Prerequisite: MATH 290B

**MATH 295A. Partial Differential Equations. 4 Units.**

Theory and techniques for linear and nonlinear partial differential equations. Local and global theory of partial differential equations: analytic, geometric, and functional analytic methods.

Prerequisite: MATH 210C and MATH 112B and MATH 112C

**MATH 295B. Partial Differential Equations. 4 Units.**

Theory and techniques for linear and nonlinear partial differential equations. Local and global theory of partial differential equations: analytic, geometric, and functional analytic methods.

Prerequisite: MATH 295A

**MATH 295C. Partial Differential Equations. 4 Units.**

Theory and techniques for linear and nonlinear partial differential equations. Local and global theory of partial differential equations: analytic, geometric, and functional analytic methods.

Prerequisite: MATH 295B

**MATH 296. Topics in Partial Differential Equations. 4 Units.**

Studies in selected areas of partial differential equations, a continuation of MATH 295A-MATH 295B-MATH 295C. Topics addressed vary each quarter.

Prerequisite: MATH 295C

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**MATH 297. Mathematics Colloquium. 1 Unit.**

Weekly colloquia on topics of current interest in mathematics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**MATH 298A. Seminar . 2 Units.**

Seminars organized for detailed discussion of research problems of current interest in the Department. The format, content, frequency, and course value are variable.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**MATH 298B. Seminar . 2 Units.**

Seminars organized for detailed discussion of research problems of current interest in the Department. The format, content, frequency, and course value are variable.

Prerequisite: MATH 298A

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**MATH 298C. Seminar . 2 Units.**

Seminars organized for detailed discussion of research problems of current interest in the Department. The format, content, frequency, and course value are variable.

Prerequisite: MATH 298B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**MATH 299A. Supervised Reading and Research. 1-12 Units.**

Supervised reading and research with Mathematics faculty.

Repeatability: May be repeated for credit unlimited times.

**MATH 299B. Supervised Reading and Research. 1-12 Units.**

Supervised reading and research with Mathematics faculty.

Prerequisite: MATH 299A

Repeatability: May be repeated for credit unlimited times.

**MATH 299C. Supervised Reading and Research. 1-12 Units.**

Supervised reading and research with Mathematics faculty.

Prerequisite: MATH 299B

Repeatability: May be repeated for credit unlimited times.

**MATH 399. University Teaching. 1-4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Mathematics for Biology, Minor

The Mathematics for Biology Minor is an excellent complement to many majors; including physics, chemistry, engineering, computer science, biology, and more. The curriculum is designed to provide students with the opportunity to widen their background and skills in mathematics in order to gain a deeper understanding of the role that mathematics can play in their major coursework, with emphasis on mathematical modeling in biology.

A. Complete:

MATH 13	Introduction to Abstract Mathematics
MATH 113A- 113B	Mathematical Modeling in Biology and Mathematical Modeling in Biology

B. Select two of the following:

MATH 105A	Numerical Analysis I (plus MATH 105LA)
MATH 112A	Introduction to Partial Differential Equations and Applications
MATH 117	Dynamical Systems
MATH 118	The Theory of Differential Equations
MATH 121A	Linear Algebra
MATH 140A	Elementary Analysis

C. One additional four-unit upper-division lecture course in MATH numbered 100–189.

NOTE: Nearly all upper-division courses in Mathematics have MATH 2A-MATH 2B as prerequisites, and many courses have additional prerequisites such as MATH 2D, MATH 2E, MATH 3A, and/or MATH 3D.

## Mathematics, B.S.

The Department offers a B.S. in Mathematics. Within this program there are seven tracks; besides the standard track, there are six specializations or concentrations (in Mathematical Biology, Mathematical Finance, Data Science, Applied and Computational Mathematics, Mathematics for Education, and Mathematics for Education/Secondary Teaching Certification). In addition, the Department offers minors in Mathematics and Mathematics for Biology.

Undergraduate mathematics courses are of several kinds: courses preparatory to advanced work in mathematics, the exact sciences, and engineering; courses for students of the social and biological sciences; and courses for liberal arts students and those planning to enter the teaching field.

Students may be admitted to the Mathematics major upon entering the University as freshmen, via change of major, or as transfer students from other colleges and universities. Information about change of major policies is available in the Physical Sciences Student Affairs Office and at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>). For transfer student admission, preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the required coursework of one year of approved calculus. Additional course work in multivariable calculus, linear algebra, and differential equations is strongly recommended.

**All students must meet the University Requirements.**

**School Requirements: None.**

### Core Requirements for all Mathematics Majors

#### Lower-Division Requirements:

A. Complete the following:

MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
MATH 13	Introduction to Abstract Mathematics

B. Computing skills:

MATH 9	Introduction to Programming for Numerical Analysis
--------	--

C. Select one three-quarter lecture course sequence from the following:

CHEM 1A- 1B- 1C	General Chemistry and General Chemistry and General Chemistry
PHYSICS 7C- 7D- 7E	Classical Physics and Classical Physics and Classical Physics
STATS 7-MATH 10-PHYSICS 7C	Basic Statistics and Introduction to Programming for Data Science and Classical Physics

#### Upper-Division Requirements:

A. Complete:

MATH 120A	Introduction to Abstract Algebra: Groups
MATH 121A	Linear Algebra
MATH 130A	Probability I
MATH 140A- 140B	Elementary Analysis and Elementary Analysis

### Requirements for the Pure Mathematics Major

**Core requirements for all Mathematics majors plus:**

#### Lower-Division Requirements:

A. Complete:

MATH 2E	Multivariable Calculus
---------	------------------------

#### Upper-Division Requirements:

A. Complete:

MATH 120B	Introduction to Abstract Algebra: Rings and Fields
MATH 121B	Linear Algebra
MATH 147	Complex Analysis

B. Five additional four-unit MATH lecture courses numbered 100–189.

### Sample Program — Pure Mathematics

Freshman		
Fall	Winter	Spring
MATH 2A	MATH 2B	MATH 2D
PHYSICS 7C- 7LC (or CHEM 1A)	PHYSICS 7D- 7LD (or CHEM 1B)	PHYSICS 7E or CHEM 1C
General Education/Elective	MATH 13	General Education/Elective
General Education/Elective	General Education/Elective	General Education/Elective
Sophomore		
Fall	Winter	Spring
General Education/Elective	MATH 3A	MATH 3D
MATH 2E	MATH 9	General Education/Elective
General Education/Elective	General Education/Elective	General Education/Elective
General Education/Elective	General Education/Elective	General Education/Elective
Junior		
Fall	Winter	Spring
MATH 130A	MATH 140A	MATH 140B
MATH 120A	MATH 120B	MATH 141
General Education/Elective	General Education/Elective	General Education/Elective
General Education/Elective	General Education/Elective	General Education/Elective
Senior		
Fall	Winter	Spring
MATH 121A	MATH 121B	MATH 115
MATH 150	MATH 147	General Education/Elective
MATH 112A	MATH 180A	General Education/Elective
General Education/Elective	General Education/Elective	General Education/Elective

The Department offers two concentrations and three specializations. Note that all require the completion of an application and an interview with the faculty advisor for that concentration or specialization. **Admission into a concentration or specialization is not guaranteed.** Students must complete the basic 'Core' requirements for the B.S. in Mathematics along with the lower- and upper-division requirements specified for each concentration and specialization.

### Requirements for Mathematics Major with a Concentration in Data Science

Admission to this specialization requires approval in advance by the Mathematics Department. Students need a GPA of 3.0 in all lower-division and upper-division MATH courses to be admitted to the concentration and must maintain the GPA to remain and graduate in the concentration. The admissions process begins with completing a form at the Department office, and includes an interview with the Department's advisor for the specialization. This approval should be applied for no later than the end of the junior year.

#### Core requirements for all Mathematics majors plus:

##### Lower-Division Requirements:

A. Complete:

MATH 2E	Multivariable Calculus
---------	------------------------

B. Replace item C in the Core Requirements with the following:

MATH 10	Introduction to Programming for Data Science
STATS 7	Basic Statistics
PHYSICS 7C	Classical Physics

##### Upper-Division Requirements

A. Complete:

MATH 105A- 105B	Numerical Analysis I and Numerical Analysis II
MATH 121B	Linear Algebra
MATH 130B	Probability II
MATH 110A- 110B	Optimization I and Optimization II
MATH 120B	Introduction to Abstract Algebra: Rings and Fields

MATH 147	Complex Analysis
B. Select three electives from the following: <sup>1</sup>	
MATH 115	Mathematical Modeling
MATH 117	Dynamical Systems
MATH 118	The Theory of Differential Equations
MATH 130C	Stochastic Processes
MATH 133A- 133B	Statistical Methods with Applications to Finance and Statistical Methods with Applications to Finance
or MATH 134A & MATH 134B	Fixed Income and Mathematics of Financial Derivatives
MATH 140C	Analysis in Several Variables
MATH 162A- 162B	Introduction to Differential Geometry and Introduction to Differential Geometry
MATH 173A- 173B	Introduction to Cryptology and Introduction to Cryptology
MATH 175	Combinatorics
MATH 176	Mathematics of Finance
STATS 110	Statistical Methods for Data Analysis I
COMPSCI 171	Introduction to Artificial Intelligence
COMPSCI 172B	Neural Networks and Deep Learning
COMPSCI 177	Applications of Probability in Computer Science
COMPSCI 178	Machine Learning and Data-Mining
COMPSCI 179	Algorithms for Probabilistic and Deterministic Graphical Models
COMPSCI 183	Introduction to Computational Biology
COMPSCI 184A- 184C	Artificial Intelligence in Biology and Medicine and Computational Systems Biology
I&C SCI 105	Digital Information Systems

<sup>1</sup> At least one of the electives must be from outside the Mathematics department. Other upper-division elective courses may be chosen with the approval of the faculty advisor.

### Requirements for Mathematics Major with a Concentration in Mathematical Finance

Admission to this concentration requires approval in advance by the Mathematics Department. Students need a GPA of 3.0 in university mathematics courses to be admitted to the concentration and must maintain the GPA to remain and graduate in the concentration. The department may limit the number of students admitted into this concentration during impacted years. The admissions process begins with completing a form at the Department office and includes an interview with the Department's advisor for the concentration. This approval should be applied for after the student has completed ECON 20A-ECON 20B, but no later than the end of the junior year.

**Core requirements for all Mathematics majors plus:****Lower-Division Requirements:**

A. Complete:

MATH 2E	Multivariable Calculus
---------	------------------------

B. Replace item C in the Core Requirements with the following:

MATH 10	Introduction to Programming for Data Science
STATS 7	Basic Statistics
PHYSICS 7C	Classical Physics

**Upper-Division Requirements:**

A. Complete:

## Requirements for Mathematics Major with a Specialization in Applied and Computational Mathematics

Admission to this specialization requires approval in advance by the Mathematics Department. The admissions process begins with completing a form at the Department office, and includes an interview with the Department's advisor for the specialization. This approval should be applied for no later than the end of the junior year.

### Core requirements for all Mathematics majors plus:

#### Lower-Division Requirements:

A. Complete:

MATH 2E	Multivariable Calculus
---------	------------------------

#### Upper-Division Requirements:

A. Six required lecture courses:

MATH 105A- 105B	Numerical Analysis I and Numerical Analysis II (plus MATH 105LA-LB)
MATH 112A- 112B	Introduction to Partial Differential Equations and Applications and Introduction to Partial Differential Equations and Applications
MATH 115	Mathematical Modeling
MATH 121B	Linear Algebra

B. Select three additional Mathematics courses from the following:

MATH 107	Numerical Differential Equations (plus MATH 107L)
MATH 112C	Introduction to Partial Differential Equations and Applications
MATH 117	Dynamical Systems
MATH 118	The Theory of Differential Equations
MATH 130B- 130C	Probability II and Stochastic Processes
MATH 133A- 133B	Statistical Methods with Applications to Finance and Statistical Methods with Applications to Finance
or MATH 134A & MATH 134B	Fixed Income and Mathematics of Financial Derivatives
MATH 140C	Analysis in Several Variables
MATH 176	Mathematics of Finance

C. Two approved upper-division courses in an area of application outside of Mathematics. Approval must be obtained in advance from the advisor for this specialization. The student is responsible for satisfying any prerequisites for these courses.

## Requirements for Mathematics Major with a Specialization in Mathematics for Education

Admission to this specialization requires approval in advance by the Mathematics Department. The admission process begins with completing a form at the Department office, and includes an interview with the Department's advisor for the specialization. This approval should be applied for no later than the end of the junior year.

This specialization is designed to help prepare students for teaching mathematics. Students wishing to go on and teach at the intermediate and high school levels should also consult with an academic advisor in the School of Education. A Commission on Teacher Credentialing (CTC)-approved subject-matter program (SMP) in Mathematics can be easily satisfied in tandem with this specialization, and enables students to waive a subject matter exam for teachers. Specific SMP requirements and enrollment procedures are available from the School of Education.

### Core requirements for all Mathematics majors plus:

#### Lower-Division Requirements:

## Requirements for Mathematics Major with a Concentration in Mathematics for Education/Secondary Teaching Certification

Admission to this concentration requires approval in advance. The admission process begins with completing an Intent form at the Cal Teach Resource and Advising Center.

Following completion of the Intent form, students must complete an application in the Mathematics Department office and an interview with the Department's advisor for the concentration. These approvals should be applied for no later than the end of the sophomore year.

This concentration allows students pursuing the B.S. in Mathematics to earn a bachelor's degree and complete the required course work and field experience for a California Preliminary Single Subject Teaching Credential at the same time. With careful, early planning, it is possible for students to complete both in four years. For additional information about teacher certification requirements and enrollment procedures, see Preparation for Teaching Science and Mathematics or contact the Cal Teach Resource and Advising Center. A Commission on Teacher Credentialing (CTC)-approved subject-matter program (SMP) in Mathematics can be satisfied in tandem with this concentration, and enables students to waive a subject matter exam for teachers. Specific SMP requirements and enrollment procedures are available from the Cal Teach Resource and Advising Center or the School of Education.

### Core requirements for all Mathematics majors plus:

#### Lower-Division Requirements:

A. Complete:

MATH 8	Explorations in Functions and Modeling
--------	--

#### Upper-Division Requirements:

A. Complete:

MATH 105A- 105LA	Numerical Analysis I and Numerical Analysis Laboratory
MATH 120B	Introduction to Abstract Algebra: Rings and Fields
MATH 130B	Probability II
MATH 150	Introduction to Mathematical Logic
MATH 161	Modern Geometry
MATH 180A	Number Theory
MATH 184- 184L	History of Mathematics and History of Mathematics Lesson Lab

Plus one additional four-unit MATH course numbered 100–189.

B. Complete:

CHEM 193 or PHYSICS 193	Research Methods Research Methods
EDUC 55	Knowing and Learning in Mathematics and Science
EDUC 109	Reading and Writing in Mathematics and Science
EDUC 143AW	Classroom Interactions I
EDUC 143BW	Classroom Interactions II
EDUC 148	Complex Pedagogical Design
EDUC 158	Student Teaching Mathematics and Science in Middle/High School (two quarters)
PHY SCI 5	California Teach 1: Introduction to Science and Mathematics Teaching
PHY SCI 105	California Teach 2: Middle School Science and Mathematics Teaching

NOTE: Students may pursue either the concentration in Mathematics for Education/Secondary Teaching Certification or the specialization in Mathematics for Education, but not both.

**Sample Program - Concentration in Mathematics for Education/Secondary Teaching Certification**

<b>Freshman</b>		
<b>Fall</b>	<b>Winter</b>	<b>Spring</b>

The Honors Program in Mathematics is designed for students contemplating graduate work in mathematics. The program is open to junior and senior Mathematics majors who meet the minimum academic qualifications of a 3.5 GPA in Mathematics courses and a 3.2 GPA overall. It is highly recommended that students meet with the Honors Advisor by the beginning of their junior year to begin planning courses. Students should officially apply for the Honors Program no later than the Fall quarter of their senior year. Recognition for completing the program is conferred upon graduation.

Participants must meet the following requirements:

A. Complete the requirements for the major in Mathematics (in any one of its tracks)

B. Complete:

MATH 120B	Introduction to Abstract Algebra: Rings and Fields
MATH 121B	Linear Algebra

C. Complete one of the following series:

MATH H140A	Honors Introduction to Graduate Analysis I
MATH H140B	Honors Introduction to Graduate Analysis II
MATH H140C	Honors Introduction to Graduate Analysis III
or	
MATH H120A	Honors Introduction to Graduate Algebra I
MATH H120B	Honors Introduction to Graduate Algebra II
MATH H120C	Honors Introduction to Graduate Algebra III
or	
(MATH 120C or MATH 140C) and MATH 133A - MATH 133B	
or	
(MATH 120C or MATH 140C) and MATH 180A - MATH 180B	
or	
(MATH 120C or MATH 140C) and MATH 113A - MATH 113B	
or	
(MATH 120C or MATH 140C) and MATH 162A - MATH 162B	

D. Complete one quarter of Math 199, or a research project and thesis approved by the Honors Program Advisor.

These requirements are in addition to the Mathematics major requirements and the requirements for any specialization/concentration. However, MATH H120A-MATH H120B-MATH H120C in item C may be used to satisfy upper-division electives or taken in place of MATH 120A-MATH 120B-MATH 120C and MATH 121A-MATH 121B. Similarly, MATH H140A-MATH H140B-MATH H140C may be used to satisfy upper-division electives or taken in place of MATH 140A-MATH 140B-MATH 140C and MATH 141.

NOTE: If all requirements are completed and the student's work and final GPA satisfies the program restrictions, the student will graduate with Honors in Mathematics, and this distinction is noted on the transcript.

## Sample Program — Mathematics Major Honors Program

General Education/Elective	MATH 199	General Education/Elective
		MATH 199

In order to prepare for independent study/independent research, it is highly recommended that students take at least one course sequence in the field they are interested in studying. The following list contains the major mathematical disciplines and the course work suggested for completion prior to doing independent study in that field:

- Applied Mathematics: MATH 117 and MATH 118
- Algebra: MATH 120A-MATH 120B-MATH 120C
- Probability and Statistics: MATH 130A-MATH 130B-MATH 130C
- Analysis: MATH 140A-MATH 140B-MATH 140C
- Logic: MATH 150
- Geometry: MATH 162A-MATH 162B
- Number Theory: MATH 180A-MATH 180B

For all Mathematics majors, or prospective majors, assistance in planning a program of study is available from the School of Physical Sciences academic counselors, as well as from the Mathematics Department Undergraduate Advisor for the various tracks. The application process for the specializations and concentrations requires students to plan a program of study with the assistance of a faculty advisor (<https://www.math.uci.edu/undergraduate-studies/concentrations-and-specializations>).

Those in the specialization for Education should note that MATH 184 may not be offered more than once every other year and thus should be taken when offered.

## Mathematics, M.S.

Graduate courses are designed to meet the needs of students doing graduate work in mathematics and in those disciplines that require graduate-level mathematics for their study. Among the fields covered are analysis, algebra, applied and computational mathematics, mathematical biology, geometry and topology, probability, ordinary and partial differential equations, and mathematical logic.

To earn the Master of Science degree, the student must satisfy course and residency requirements, and achieve two passes at the M.S. level among three exams in Real Analysis, Complex Analysis, and Algebra prior to the beginning of the second year.

### Requirements

The total number of required courses for the M.S. is 12, completed with satisfactory performance, that is, with a grade of B or better. Students are required to complete at least one series of the following courses:

MATH 210A- 210B- 210C

Real Analysis  
and Real Analysis  
and Real Analysis

or

MATH 220A- 220B- 220C

Analytic Function Theory  
and Analytic Function Theory  
and Analytic Function Theory

or

MATH 230A- 230B- 230C

Algebra  
and Algebra  
and Algebra

At most one undergraduate course may count as an elective course, provided it is sponsored by rank faculty and approved by the Graduate Advisor. At most one elective course (at least three units) is allowed outside the Department.

To satisfy exam requirements, students may take the Core Assessment Exam (offered in the spring of every year), the Comprehensive Exams (offered in the spring of every year), or the Qualifying Exams (offered before the start of each fall quarter) in Real Analysis, Complex Analysis, and Algebra. Students may not attempt to pass an exam in any particular area more than three times. Some students may require additional background before entering MATH 210 or MATH 230. This will be determined by assessment prior to the start of the students' first year by the Vice Chair of Graduate Studies, upon consultation with the Graduate Studies Committee. Such students will be directed into MATH 205 and/or MATH 206 during their first year. They may pass one Comprehensive Exam in the areas of Analysis or Algebra in lieu of achieving an M.S. pass in one of the Core Assessment or Qualifying Exams that must be obtained prior to the start of their second year.

Students who fail to pass the required examinations satisfactorily within the period specified will be recommended for academic disqualification by the Graduate Dean.

MATH 199, MATH 297, MATH 298, MATH 299, and may not be used to fulfill course requirements.

The residency requirement ordinarily is satisfied by full-time enrollment for three quarters immediately preceding the award of the M.S. When appropriate, a leave of absence may be granted between matriculation and the final quarters of study.

If the candidate is not advanced before the beginning of the quarter in which all requirements are completed, the degree will not be conferred until the end of the following quarter. Deadlines for submission of the Application for Advancement to Candidacy are published on the Graduate Division website (<https://www.grad.uci.edu/academics/advancement-to-candidacy.php>) under filing fees and deadlines.

### Advancement to M.S. Candidacy

All Master's students must be advanced to candidacy for the degree prior to the beginning of their final quarter of enrollment. An application for Advancement to Candidacy must be completed by the student and submitted for approval to the Department. The approved application must be submitted to the Graduate Division by the deadline published on the Graduate Division website (<http://www.grad.uci.edu/>). Advancement to M.S.Candidacy must occur one quarter prior to the degree conferral quarter.

Filing fee information can be located on the Graduate Division website (<http://www.grad.uci.edu/>).

### Master of Science in Mathematics with a Teaching Credential

In cooperation with the UCI School of Education, the Department of Mathematics sponsors a coordinated program for the M.S. degree in Mathematics and the California Single Subject Teaching Credential. The requirements for this option are the same as the Master of Science in Mathematics requirements listed above.

The student will complete the requirements for the Master's degree with the Mathematics Department (generally a two-year commitment) and then will petition with the UCI School of Education to take the School of Education's credential courses (generally a one-year commitment). The student must meet the requirements of the School of Education for the CBEST, CSET, TB test, and Certificate of Clearance. Prospective graduate students interested in this program should so indicate on their applications. A detailed description of the program can be requested from the School of Education.

## Mathematics, Minor

The Mathematics Minor is an excellent complement to many majors; including physics, chemistry, engineering, computer science, business, economics, biology, and more. The curriculum is designed to provide students with the opportunity to widen their background and skills in mathematics in order to gain a deeper understanding of the role that mathematics can play in their major coursework.

A. Complete:

MATH 13

Introduction to Abstract Mathematics

MATH 120A

Introduction to Abstract Algebra: Groups

or MATH 140A

Elementary Analysis

B. Select five additional four-unit courses in MATH (plus the associated lab, where applicable) numbered 77–189.

NOTE: Nearly all upper-division courses in Mathematics have MATH 2A-MATH 2B as prerequisites, and many courses have additional prerequisites such as MATH 2D, MATH 2E, MATH 3A, and/or MATH 3D.

## Mathematics, Ph.D.

Graduate courses are designed to meet the needs of students doing graduate work in mathematics and in those disciplines that require graduate-level mathematics for their study. Among the fields covered are analysis, algebra, applied and computational mathematics, mathematical biology, geometry and topology, probability, ordinary and partial differential equations, and mathematical logic.

In addition to formal courses, there are seminars for advanced study toward the Ph.D. in various fields of mathematics. Topics will vary from year to year. Each seminar is conducted by a faculty member specializing in the subject studied. Enrollment will be subject to the approval of the instructor in charge.

When accepted into the doctoral program, the student embarks on a program of formal courses, seminars, and individual study courses to prepare for the Ph.D. written examinations, Advancement to Candidacy examination, and dissertation.

### Requirements

Upon entering the program, students are expected to take MATH 210A, MATH 210B, MATH 210C, MATH 220A, MATH 220B, MATH 220C, MATH 230A, MATH 230B, and MATH 230C, which must be passed with a grade of B or better. Students must complete these sequences by the end of the second year.

By the start of the second year, students must achieve at least two passes at the M.S. level among three exams in Real Analysis, Complex Analysis, and Algebra. By the start of the third year, students must achieve two Ph.D. level passes among three exams in Real Analysis, Complex Analysis, and Algebra.

To satisfy the exam requirements, students may take the Core Assessment Exams (offered in spring of every year) or the Qualifying Exams (offered before the start of the fall quarter) in these areas. Students may not attempt to take an exam in a particular subject area more than three times. A student who passes a Qualifying Examination at the Ph.D. level prior to taking the corresponding course will be exempted from taking the course.

Some students may require additional background prior to entering MATH 210A, MATH 210B, MATH 210C, MATH 230A, MATH 230B, and MATH 230C. This will be determined by assessment prior to the start of the students' first year by the Vice Chair for Graduate Studies, upon consultation with the Graduate Studies Committee. Such students will be directed into MATH 205 and/or MATH 206, or equivalent, during their first year. These students may pass one Comprehensive Exam in the areas of Algebra or Analysis in lieu of achieving an M.S. pass on one Core Assessment or Qualifying Exam that must be obtained prior to the start of the students' second year. Comprehensive Exams in Analysis and Algebra will be offered once per year in the spring quarter.

By the end of their second year, students must declare a major specialization from the following areas: Algebra, Analysis, Applied and Computational Mathematics, Geometry and Topology, Logic, or Probability. Students are required to take two series of courses from their chosen area. (Students who later decide to change their area must also take two series of courses from the new area.) Additionally, all students must take two series outside their declared major area of specialization. Special topics courses within certain areas of specialization and courses counted toward the M.S., other than MATH 205A-MATH 205B-MATH 205C and MATH 206A-MATH 206B-MATH 206C, will count toward the fulfillment of the major specialization requirement.

By the beginning of their third year, students must have an advisor specializing in their major area. With the advisor's aid, the student forms a committee for the Advancement to Candidacy oral examination. This committee will be approved by the Department on behalf of the Dean of the Graduate Division and the Graduate Council and will consist of five faculty members. At least one, and at most two, of the members must be faculty from outside the Department. Before the end of the third year, students must have a written proposal, approved by their committee, for the Advancement to Candidacy examination. The proposal should explain the role of at least two series of courses from the student's major area of specialization that will be used to satisfy the Advancement to Candidacy requirements. The proposal should also explain the role of additional research reading material as well as providing a plan for investigating specific topics under the direction of the student's advisor(s). Only one of the courses MATH 210A-MATH 210B-MATH 210C, MATH 220A-MATH 220B-MATH 220C, and MATH 230A-MATH 230B-MATH 230C may count for the course requirement for Advancement to Candidacy Examinations. After the student meets the requirements, the Graduate Studies Committee recommends to the Dean of the Graduate Division the advancement to candidacy for the Ph.D. Students should advance to candidacy by the beginning of their fourth year.

After advancing to candidacy, students are expected to be fully involved in research toward writing their Ph.D. dissertation. Ideally, students should keep in steady contact/interaction with their Doctoral Committee.

Teaching experience and training is an integral part of the Ph.D. program. All doctoral students are expected to participate in the Department's teaching program.

The candidate must demonstrate independent, creative research in Mathematics by writing and defending a dissertation that makes a new and valuable contribution to mathematics in the candidate's area of concentration. Upon Advancement to Candidacy a student must form a Thesis Committee, a subcommittee of the Advancement Examination Committee, consisting of at least three faculty members and chaired by the student's advisor. The committee guides and supervises the candidate's research, study, and writing of the dissertation; conducts an oral defense of the dissertation; and recommends that the Ph.D. be conferred upon approval of the Doctoral Dissertation. The normative time for completion of the Ph.D. is six years, and the maximum time permitted is seven years. Completion of the Ph.D. degree must occur within nine quarters of Advancement to Ph.D. candidacy.

## Examinations

Ph.D. examinations are given in Algebra, Complex Analysis, and Real Analysis. All students seeking the Ph.D. must successfully complete two examinations before the end of the third year of entering the graduate program. Only two attempts are allowed for a Ph.D. student on each exam.

## Area Requirements

Ph.D. students will choose from one of six areas of specialization in the Mathematics Department, which determines course work requirements. Each area of specialization will have a core course, which the Department will do its best to offer each year. The Department will offer other courses every other year, or more frequently depending on student demands and other Department priorities.

### Algebra

MATH 230A- 230B- 230C	Algebra and Algebra and Algebra (core)
MATH 232A- 232B- 232C	Algebraic Number Theory and Algebraic Number Theory and Algebraic Number Theory
MATH 233A- 233B- 233C	Algebraic Geometry and Algebraic Geometry and Algebraic Geometry
MATH 235A	Mathematics of Cryptography

### Analysis

MATH 210A- 210B- 210C	Real Analysis and Real Analysis and Real Analysis (core)
MATH 220A- 220B- 220C	Analytic Function Theory and Analytic Function Theory and Analytic Function Theory (core)
MATH 260A- 260B- 260C	Functional Analysis and Functional Analysis and Functional Analysis
MATH 295A- 295B- 295C	Partial Differential Equations and Partial Differential Equations and Partial Differential Equations
MATH 296	Topics in Partial Differential Equations

### Applied and Computational Mathematics

MATH 290A- 290B- 290C	Methods in Applied Mathematics and Methods in Applied Mathematics and Methods in Applied Mathematics (core)
MATH 225A- 225B- 225C	Introduction to Numerical Analysis and Scientific Computing and Introduction to Numerical Analysis and Scientific Computing and Introduction to Numerical Analysis and Scientific Computing
MATH 226A- 226B- 226C	Computational Differential Equations and Computational Differential Equations and Computational Differential Equations
MATH 227A- 227B	Mathematical and Computational Biology and Mathematical and Computational Biology
MATH 295A- 295B- 295C	Partial Differential Equations and Partial Differential Equations and Partial Differential Equations

### Geometry and Topology

MATH 218A- 218B- 218C	Introduction to Manifolds and Geometry and Introduction to Manifolds and Geometry and Introduction to Manifolds and Geometry (core)
MATH 222A	Several Complex Variables and Complex Geometry
MATH 240A- 240B- 240C	Differential Geometry and Differential Geometry and Differential Geometry
MATH 245A- 245C- 245C	Topics in Differential Geometry and Topics in Differential Geometry and Topics in Differential Geometry
MATH 250A- 250B- 250C	Algebraic Topology and Algebraic Topology and Algebraic Topology
<b>Logic</b>	
MATH 280A- 280B- 280C	Mathematical Logic and Mathematical Logic and Mathematical Logic (core)
MATH 281A- 281B- 281C	Set Theory and Set Theory and Set Theory
MATH 282A- 282B- 282C	Model Theory and Model Theory and Model Theory
MATH 285A-MATH 285B-MATH 285C	Topics in Mathematical Logic and and
<b>Probability</b>	
MATH 210A- 210B- 210C	Real Analysis and Real Analysis and Real Analysis
MATH 270A- 270B- 270C	Probability and Probability and Probability (core)
MATH 271A- 271B- 271C	Stochastic Processes and Stochastic Processes and Stochastic Processes (core)
MATH 274	

## Department of Physics and Astronomy

### Tim Tait, Department Chair

4129 Frederick Reines Hall

949-824-7727

<http://www.physics.uci.edu> (<http://www.physics.uci.edu/>)

Physics is that branch of science concerned with the study of natural phenomena at the fundamental level. Physicists study the smallest particles of matter (quarks and leptons), nuclei, and atoms; the fundamental forces; the properties of solids, liquids, gases, and plasmas; the behavior of matter on the grand scale in stars and galaxies; and even the origin and fate of the universe. Other disciplines such as chemistry, biology, medicine, and engineering often build upon the foundations laid by physics.

The Department of Physics and Astronomy offers introductory and advanced courses for students of various interests, from those in the humanities and social sciences, to those in biological sciences, and to those in physics, engineering, and other sciences. The Department offers majors in Physics and Applied Physics, with interdisciplinary concentrations and tracks that include astrophysics, engineering physics, science education, and courses taught by faculty in Biological Sciences, Chemistry, Engineering, and Medicine.

Furthermore, the faculty is vigorous, innovative, and engaged in a wide variety of research, education, and public service activities. The Department encourages student-faculty interaction and student involvement in undergraduate research. Faculty conduct active research in forefront research areas, providing students access to research opportunities in specialized areas like cosmology, particle physics, plasmas and fusion, condensed matter physics, biophysics, and medical physics.

- Applied Physics, B.S.
- Physics, B.S.
- Physics, Ph.D.

## Faculty

Kevork N. Abazajian, Ph.D. University of California, San Diego, *Professor of Physics and Astronomy*

Jun F. Allard, Ph.D. University of British Columbia, *Associate Professor of Mathematics; Physics and Astronomy* (mathematical and computational biology)

Ioan Andricioaei, Ph.D. Boston University, *Professor of Chemistry; Physics and Astronomy* (chemical biology, physical chemistry and chemical physics, theoretical and computational)

Aaron J. Barth, Ph.D. University of California, Berkeley, *Professor of Physics and Astronomy*

Christopher P.J. Barty, Ph.D. Stanford University, *Distinguished Professor of Physics and Astronomy*

Steven W. Barwick, Ph.D. University of California, Berkeley, *Professor of Physics and Astronomy*

Gregory A. Benford, Ph.D. University of California, San Diego, *Professor Emeritus of Physics and Astronomy*

Jianming Bian, Ph.D. Chinese Academy of Sciences, *Assistant Professor of Physics and Astronomy*

Paulo Brando, Ph.D. University of Florida, *Assistant Professor of Physics and Astronomy*

James S. Bullock, Ph.D. University of California, Santa Cruz, *Dean of the School of Physical Sciences and Professor of Physics and Astronomy*

David A. Buote, Ph.D. Massachusetts Institute of Technology, *Professor of Physics and Astronomy*

Kieron Burke, Ph.D. University of California, Santa Barbara, *Professor of Chemistry; Physics and Astronomy* (physical chemistry and chemical physics, theoretical and computational)

David W. Casper, Ph.D. University of Michigan, *Associate Professor of Physics and Astronomy*

Gary A. Chanan, Ph.D. University of California, Berkeley, *Professor Emeritus of Physics and Astronomy*

Liu Chen, Ph.D. University of California, Berkeley, *Research Professor and Professor Emeritus of Physics and Astronomy*

Mu-Chun Chen, Ph.D. University of Colorado Boulder, *Professor of Physics and Astronomy*

Alexander L. Chernyshev, Ph.D. Russian Academy of Sciences, *Professor of Physics and Astronomy*

Philip Collins, Ph.D. University of California, Berkeley, *Professor of Physics and Astronomy*

Michael Cooper, Ph.D. University of California, Berkeley, *Professor of Physics and Astronomy*

Asantha R. Cooray, Ph.D. University of Chicago, *Professor of Physics and Astronomy*

Michael B. Dennin, Ph.D. University of California, Santa Barbara, *Professor of Physics and Astronomy*

Franklin Dollar, Ph.D. University of Michigan, *Associate Professor of Physics and Astronomy* (applied physics)

Igor E. Dzyaloshinskii, Ph.D. Moscow State University, *Professor Emeritus of Physics and Astronomy*

Jonathan L. Feng, Ph.D. Stanford University, *Professor of Physics and Astronomy*

Zachary Fisk, Ph.D. University of California, San Diego, *UCI Distinguished Professor Emeritus of Physics and Astronomy*

Enrico Gratton, Ph.D. University of Rome, *Distinguished Professor of Biomedical Engineering; Developmental and Cell Biology; Physics and Astronomy* (design of new fluorescence instruments, protein dynamics, single molecule, fluorescence microscopy, photon migration in tissues)

Steven P. Gross, Ph.D. University of Texas at Austin, *Professor of Developmental and Cell Biology; Physics and Astronomy* (force generation by molecular motors in living cells)

Arnold Guerra, Ph.D. University of California, Irvine, *Lecturer of Physics and Astronomy*

Gultekin Gulsen, Ph.D. Bogazici University, *Associate Professor of Radiological Sciences; Biomedical Engineering; Physics and Astronomy*

Herbert W. Hamber, Ph.D. University of California, Santa Barbara, *Professor Emeritus of Physics and Astronomy*

William W. Heidbrink, Ph.D. Princeton University, *Professor of Physics and Astronomy*

Wilson Ho, Ph.D. University of Pennsylvania, *Donald Bren Professor and Professor of Physics and Astronomy; Chemistry*

Herbert J. Hopster, Ph.D. Aachen University, *Professor Emeritus of Physics and Astronomy*

Luis A. Jauregui, Ph.D. Purdue University, *Assistant Professor of Physics and Astronomy*

Manoj Kaplinghat, Ph.D. Ohio State University, *Professor of Physics and Astronomy*

Anne A. Kirkby, Ph.D. California Institute of Technology, *Lecturer of Physics and Astronomy*

David P. Kirkby, Ph.D. California Institute of Technology, *Professor of Physics and Astronomy*

Ilya N. Krivorotov, Ph.D. University of Minnesota, *Professor of Physics and Astronomy*

Andrew J. Lankford, Ph.D. Yale University, *Professor of Physics and Astronomy*

Jon M. Lawrence, Ph.D. University of Rochester, *Professor Emeritus of Physics and Astronomy*

Zhihong Lin, Ph.D. Princeton University, *Professor of Physics and Astronomy*

Mark A. Mandelkern, Ph.D. University of California, Berkeley, *Research Professor and Professor Emeritus of Physics and Astronomy*

Alexei A. Maradudin, Ph.D. University of Bristol, *Professor Emeritus of Physics and Astronomy*

Roger D. McWilliams, Ph.D. Princeton University, *Associate Dean of the School of Physical Sciences and Professor of Physics and Astronomy*

William R. Molzon, Ph.D. University of Chicago, *Professor of Physics and Astronomy*

Shaul Mukamel, Ph.D. Tel Aviv University, *UCI Distinguished Professor of Chemistry; Physics and Astronomy* (physical chemistry and chemical physics, polymer, materials, nanoscience, theoretical and computational)

Simona Murgia, Ph.D. Michigan State University, *Associate Professor of Physics and Astronomy*

Riley D. Newman, Ph.D. University of California, Berkeley, *Professor Emeritus of Physics and Astronomy; Logic and Philosophy of Science; Physics and Astronomy*

Juan Pedro Ochoa-Ricoux, Ph.D. California Institute of Technology, *Assistant Professor of Physics and Astronomy*

Xiaoqing Pan, Ph.D. Saarlandes University, *Henry Samuelli Endowed Chair and Director of Irvine Materials Research Institute (IMRI) and Professor of Materials Science and Engineering; Physics and Astronomy* (atomic-scale structure, properties and dynamic behaviors of advanced materials including thin films and nanostructures for memories, catalysts, and energy conversion and storage devices)

William H. Parker, Ph.D. University of Pennsylvania, *Professor Emeritus of Physics and Astronomy*

Arvind Rajaraman, Ph.D. Stanford University, *Professor of Physics and Astronomy*

Michael Ratz, Ph.D. Technical University of Munich, *Professor of Physics and Astronomy*

Thorsten Ritz, Ph.D. University of Ulm, *Professor of Physics and Astronomy*

Paul M. Robertson, Ph.D. University of Texas at Austin, *Assistant Professor of Physics and Astronomy*

Judit Romhányi, Ph.D. Budapest University of Technology and Economy, *Assistant Professor of Physics and Astronomy*

James E. Rutledge, Ph.D. University of Illinois at Chicago Circle, *Professor Emeritus of Physics and Astronomy*

Nathan Rynn, Ph.D. Stanford University, *Professor Emeritus of Physics and Astronomy*

Javier D. Sanchez-Yamagishi, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Physics and Astronomy*

Jonas Schultz, Ph.D. Columbia University, *Professor Emeritus of Physics and Astronomy; Logic and Philosophy of Science*

Aomawa Shields, Ph.D. University of Washington, *Assistant Professor of Physics and Astronomy*

Yuri Shirman, Ph.D. University of California, Santa Cruz, *Professor of Physics and Astronomy*

Dennis J. Silverman, Ph.D. Stanford University, *Professor Emeritus of Physics and Astronomy*

Albert Siryaporn, Ph.D. University of Pennsylvania, *Assistant Professor of Physics and Astronomy; Molecular Biology and Biochemistry*

Zuzanna S. Siwy, Ph.D. Silesian University of Technology, *Professor of Physics and Astronomy; Biomedical Engineering; Chemistry*

Tammy Ann Smecker-Hane, Ph.D. Johns Hopkins University, *Associate Professor of Physics and Astronomy*

Henry W. Sobel, Ph.D. Case Western Reserve University, *Professor Emeritus of Physics and Astronomy*

Min-Ying Su, Ph.D. University of California, Irvine, *Professor of Radiological Sciences; Physics and Astronomy*

Peter Taborek, Ph.D. California Institute of Technology, *Professor of Physics and Astronomy*

Agnes Taffard, Ph.D. University of Liverpool, *Professor of Physics and Astronomy*

Timothy Tait, Ph.D. Michigan State University, *Department Chair and Professor of Physics and Astronomy*

Fumiko Tajima, Ph.D. University of Tokyo, *Lecturer of Physics and Astronomy*

Toshiki Tajima, Ph.D. University of California, Irvine, *UCI Endowed Chair and Adjunct Professor of Physics and Astronomy*

Virginia L. Trimble, Ph.D. California Institute of Technology, *Professor of Physics and Astronomy*

Laura Tucker, Ph.D. University of California, San Diego, *Assistant Professor of Teaching of Physics and Astronomy*

Mark Vagins, Ph.D. Yale University, *Adjunct Professor of Physics and Astronomy*

Gerard Vanhoven, Ph.D. Stanford University, *Professor Emeritus of Physics and Astronomy*

Richard F. Wallis, Ph.D. Catholic University of America, *Professor Emeritus of Physics and Astronomy*

Frank J. Wessel, Ph.D. University of California, Irvine, *Project Scientist of Physics and Astronomy*

Steven R. White, Ph.D. Cornell University, *Professor of Physics and Astronomy*

Daniel Whiteson, Ph.D. University of California, Berkeley, *Professor of Physics and Astronomy; Logic and Philosophy of Science*

Ruqian Wu, Ph.D. Institute of Physics, Chinese Academy of Science, *Professor of Physics and Astronomy*

Jing Xia, Ph.D. Stanford University, *Professor of Physics and Astronomy*

Huolin Xin, Ph.D. Cornell University, *Assistant Professor of Physics and Astronomy; Materials Science and Engineering*

Clare C. Yu, Ph.D. Princeton University, *Professor of Physics and Astronomy*

Jin Yu, Ph.D. University of Illinois at Urbana-Champaign, *Assistant Professor of Physics and Astronomy*

## Courses

### **PHYSICS 2. Introduction to Mathematical Methods for Physics. 4 Units.**

Provides the applied mathematics and problem solving/presentation skills necessary for success in an introductory physics sequence. Focuses on practical exercises in problem solving. Covers kinematics in one and two dimensions in detail. Additional topics include vectors, differentiation, and integration.

Prerequisite or corequisite: MATH 2A or MATH 5A or AP Calculus AB or AP Calculus BC. AP Calculus AB with a minimum score of 4. AP Calculus BC with a minimum score of 3

Restriction: PHYSICS 2 may not be taken for credit if taken after PHYSICS 7C.

### **PHYSICS 3A. Basic Physics I. 4 Units.**

Vectors; motion, force, and energy.

Corequisite: MATH 2A or MATH 5A, or a score of 4 or higher on the AP Calculus AB exam, or a score of 3 or higher on the AP Calculus BC exam.

Restriction: PHYSICS 3A may not be taken for credit if taken after PHYSICS 7C.

(II and VA ).

**PHYSICS 3B. Basic Physics II. 4 Units.**

Fluids; heat; electricity and magnetism.

Prerequisite: PHYSICS 3A or AP Physics C: Mechanics. AP Physics C: Mechanics with a minimum score of 5

(II and VA ).

**PHYSICS 3C. Basic Physics III. 4 Units.**

Waves and sound; optics; quantum ideas; atomic and nuclear physics; relativity.

Corequisite: MATH 2B or MATH 5B, or a score of 4 or higher on the AP Calculus BC exam.

Prerequisite: PHYSICS 3A or AP Physics C: Mechanics. AP Physics C: Mechanics with a minimum score of 5

(II and Va ).

**PHYSICS 3LB. Basic Physics Laboratory. 1.5 Unit.**

Practical applications of electronics and classical physics to biology. Goals include skill to use oscilloscope and other basic instrumentation. Materials fee.

**PHYSICS 3LC. Basic Physics Laboratory. 1.5 Unit.**

Practical applications of physics to medical imaging. Topics include optics, radioactivity, and acoustics. Materials fee.

**PHYSICS 7C. Classical Physics. 4 Units.**

Topics include force, energy, momentum, rotation, and gravity.

Corequisite: MATH 2B or AP CALCULUS BC, min score = 4.

Prerequisite: PHYSICS 2 or (MATH 2D and (CHEM 1C or CHEM H2C or CHEM M3C) or CHEM M2C) or AP Physics C: Mechanics or AP Physics C: Electricity and Magnetism or SAT Mathematics or ACT Mathematics. PHYSICS 2 with a grade of C or better. AP Physics C: Mechanics with a minimum score of 4. AP Physics C: Electricity and Magnetism with a minimum score of 4. SAT Mathematics with a minimum score of 650. ACT Mathematics with a minimum score of 27. Recommended: One year of high school physics or equivalent physics background.

Restriction: Physics Majors have first consideration for enrollment.

(II and VA ).

**PHYSICS 7D. Classical Physics. 4 Units.**

Electricity and magnetism.

Corequisite: PHYSICS 7LD and MATH 2D

Prerequisite: PHYSICS 7C and (MATH 2B or AP Calculus BC). AP Calculus BC with a minimum score of 4

Restriction: Physics Majors have first consideration for enrollment.

(II and Va ).

**PHYSICS 7E. Classical Physics. 4 Units.**

Fluids; oscillations; waves; and optics.

Prerequisite: PHYSICS 7C and MATH 2B

Restriction: Physics Majors have first consideration for enrollment.

(II and VA ).

**PHYSICS 7LC. Classical Physics Laboratory. 1 Unit.**

Experiments related to lecture topics in Physics 7C. Materials fee.

Corequisite: PHYSICS 7C

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 7LD. Classical Physics Laboratory. 1 Unit.**

Electricity and magnetism.

Corequisite: PHYSICS 7D

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 12. Science Fiction and Science Fact. 4 Units.**

An introduction to fundamental physics principles, the scientific process, and the mathematical language of science, used to analyze topics drawn from superheroes, science fiction works, and current science news to distinguish science fiction and science fact.

Overlaps with PHYSICS 21.

(II and VA ).

**PHYSICS 14. Energy and the Environment. 4 Units.**

The physics of society's energy production and consumption, and of their influences on the environment. Topics include fossil and renewable energy resources; nuclear power; prospects for a hydrogen economy; efficient and environmentally benign transportation; efficient home and commercial energy usage.

(II, Va)

**PHYSICS 15. Physics of Music. 4 Units.**

Introduces basic physical principles underlying generation and properties of music, including basic properties of sound waves, musical scales and temperament, musical instruments, and acoustics of music halls. No mathematics background required, but high school algebra is recommended.

(II)

**PHYSICS 17. Physics of Athletics. 4 Units.**

Introduces basic physical principles behind motion. Examples are drawn from a range of athletic endeavors (such as ice skating, baseball, diving, and dance). No mathematics background required, but high school algebra is recommended.

(II)

**PHYSICS 18. How Things Work. 4 Units.**

Survey of the physical basis of modern technology, with an emphasis on electronics and materials. Topics include power generation and distribution, communication (radio, TV, telephone, computers, tape recorders, CD players), imaging (optics, x-rays, MRI), and modern materials (alloys, semiconductors, superconductors).

(II)

**PHYSICS 19. Great Ideas of Physics. 4 Units.**

Introduces non-science majors to physics, examining important breakthroughs and controversies. Potential topics: Einstein's Relativity; Heisenberg's Uncertainty Principle; black holes; extra-dimensions; antimatter. Case studies illustrate the essential nature of scientific review and independent confirmation of results. No mathematics background required.

(II)

**PHYSICS 20A. Introduction to Astronomy. 4 Units.**

History of astronomy. Underlying physics. Objects in the solar system and how they are studied. Properties of stars: their formation, structure, and evolution. Pulsars and black holes. Galaxies and quasars.

(II and VA ).

**PHYSICS 20B. Cosmology: Humanity's Place in the Universe. 4 Units.**

An overview of the origin, evolution, and ultimate fate of the Universe. Galaxies and dark matter. The Big Bang and dark energy. Ancient world models.

(II and VA ).

**PHYSICS 20D. Space Science. 4 Units.**

Space exploration. Human missions to the moon, Mars, and beyond. Space stations, observatories, and deep-space probes. Robots and drones on distant worlds. Propulsion mechanisms, rockets, space flight, and the dangers of solar radiation.

(II and VA ).

**PHYSICS 20E. Life in the Universe. 4 Units.**

An overview of the scientific quest to discover life elsewhere in the universe. Topics include the origin of life on Earth, Mars, extra-solar planets, interstellar travel, and extra-terrestrial intelligence.

(II, Va)

**PHYSICS 21. Special Topics in Physics. 4 Units.**

Topics addressed vary each quarter. Past topics have included physics and music, Newton, planetary science. Lectures on areas of special interest in physics used to introduce students to scientific method, fundamental laws of science, qualitative and quantitative analysis of data.

Repeatability: Unlimited as topics vary.

Overlaps with PHYSICS 12, PHYSICS XI12.

**(II)****PHYSICS 50. Introductory Mathematical Physics. 4 Units.**

Introduction to math methods for upper-division physics. Taylor and Fourier series; complex algebra; ordinary differential equations; matrices, tensors and vector spaces; eigensystems; orthogonal coordinates; vector calculus and fields. Symbolic computation with Mathematica is incorporated throughout.

Corequisite: MATH 2E

Prerequisite: MATH 3A

Overlaps with PHYSICS 100.

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 51A. Modern Physics. 4 Units.**

Wave-particle duality; quantum mechanics; special relativity; statistical mechanics.

Prerequisite: (PHYSICS 7E or PHYSICS 3C) and MATH 2D

Overlaps with PHYSICS 61A.

Restriction: No Physics Majors.

**PHYSICS 52A. Fundamentals of Experimental Physics. 2 Units.**

Optics: lenses, mirrors, polarization, lasers, optical fibers, interference, spectra. Materials fee.

Corequisite: PHYSICS 7E or PHYSICS 3C.

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 52B. Fundamentals of Experimental Physics. 2 Units.**

Circuits: oscilloscope, meters, DC and AC circuits. Materials fee.

Prerequisite: PHYSICS 7D or PHYSICS 3B

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 52C. Fundamentals of Experimental Physics. 2 Units.**

Data analysis: random and systematic errors, curve fitting; nuclear counting; quantum experiments. Error analysis: random and systematic errors, curve fitting, nuclear counting, and quantum experiments. Materials fee.

Prerequisite: PHYSICS 51A or PHYSICS 61A

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 53. Introduction to Programming and Numerical Analysis. 4 Units.**

Introduction to structured programming; in-depth training in python. Elementary numerical methods applied to physics problems.

Prerequisite: MATH 3A and MATH 3D

Restriction: Physics Majors have first consideration for enrollment.

**PHYSICS 60. Thermal Physics. 4 Units.**

Introduction to thermodynamics and systems of many particles. Topics include first and second laws of thermodynamics, ideal gas laws, kinetic theory, heat engines and refrigerators, thermodynamic potentials, phase transitions, dilute solutions, chemical equilibrium, and basic statistical distributions.

Prerequisite: (PHYSICS 7E or PHYSICS 3C) and MATH 2D

Restriction: Physics Majors only.

**PHYSICS 61A. Modern Physics for Majors. 4 Units.**

Wave-particle duality; Schrödinger equation; angular momentum.

Prerequisite: (PHYSICS 7E or PHYSICS 3C) and MATH 2D

Overlaps with PHYSICS 51A.

Restriction: Physics Majors only.

**PHYSICS 61B. Modern Physics for Majors. 4 Units.**

Atomic transitions; molecules; solids; nuclei; elementary particles; cosmological models.

Prerequisite: PHYSICS 61A or PHYSICS 51A

Overlaps with PHYSICS 51B.

Restriction: Physics Majors only.

**PHYSICS 61C. Introduction to Astrophysics. 4 Units.**

Introduction to fundamental topics in astrophysics, including stellar structure and evolution; stellar remnants; detection and characterization of exoplanets; physics of interstellar gas and star-forming regions.

Prerequisite: PHYSICS 61A or PHYSICS 51A

**PHYSICS H80. Impact of World War I on Science. 4 Units.**

Introduction to science in 1914 and WWI. Participants in groups of two or three will pick a preferred science; find out what happened to it during and after the war; write reports and present what they learned.

Restriction: Campuswide Honors Collegium students only.

**(II)**

**PHYSICS H90. The Idiom and Practice of Science. 4 Units.**

A series of fundamental and applied scientific problems of social relevance. Possible topics include Newton's Law, calculus, earthquake physics, and radiation.

Restriction: Campuswide Honors Collegium students only.

**(II, Va)**

**PHYSICS 99. Current Topics in Physics. 2 Units.**

Designed to introduce undergraduate students to current topics in physics. Focus is discussion of selected readings on current research issues.

Repeatability: Unlimited as topics vary.

**PHYSICS 100. Computational Methods. 4 Units.**

Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.

Overlaps with PHYSICS 50.

Concurrent with PHYSICS 229A.

**PHYSICS 106W. Advanced Data Acquisition, Analysis, and Scientific Writing. 4 Units.**

Introduces modern practical laboratory techniques for developing data interface devices, acquiring and analyzing data, and writing up results in manuscript format. Experiments include interfacing with instruments through software and hardware development, PID controller, Fourier analysis, and lock-in amplifier.

Prerequisite: PHYSICS 52B and PHYSICS 194

Concurrent with PHYSICS 206 and CHEM 206.

**(Ib)**

**PHYSICS 111A. Classical Mechanics. 4 Units.**

One-dimensional motion and oscillations; three-dimensional motion, non-inertial coordinates, conservation laws, and Lagrangian and Hamiltonian dynamics; rigid body motion and relativity.

Corequisite: PHYSICS 50

Prerequisite: (PHYSICS 7E or PHYSICS 3C)

**PHYSICS 111B. Classical Mechanics. 4 Units.**

One-dimensional motion and oscillations; three-dimensional motion, non-inertial coordinates, conservation laws, and Lagrangian and Hamiltonian dynamics; rigid body motion and relativity.

Prerequisite: PHYSICS 111A

**PHYSICS 112A. Electromagnetic Theory. 4 Units.**

Electric, magnetic, and gravitational fields and potentials; electrodynamics; mechanical and electromagnetic waves and radiation.

Prerequisite: (PHYSICS 7D or PHYSICS 3B) and PHYSICS 50

**PHYSICS 112B. Electromagnetic Theory. 4 Units.**

Electric, magnetic, and gravitational fields and potentials; electrodynamics; mechanical and electromagnetic waves and radiation.

Prerequisite: PHYSICS 7E and PHYSICS 112A

**PHYSICS 113A. Quantum Physics. 4 Units.**

Inadequacy of classical physics; time independent and time dependent Schrodinger equation; systems in one, two, and three dimensions; matrices; Hermitian operators; symmetries; angular momentum; perturbation theory; scattering theory; applications to atomic structure; emphasis on phenomenology.

Prerequisite: (PHYSICS 51A or PHYSICS 61A) and PHYSICS 50

**PHYSICS 113B. Quantum Physics. 4 Units.**

Inadequacy of classical physics; time independent and time dependent Schrodinger equation; systems in one, two, and three dimensions; matrices; Hermitian operators; symmetries; angular momentum; perturbation theory; scattering theory; applications to atomic structure; emphasis on phenomenology.

Prerequisite: PHYSICS 111B and PHYSICS 112B and PHYSICS 113A

**PHYSICS 113C. Quantum Physics. 4 Units.**

Inadequacy of classical physics; time independent and time dependent Schrodinger equation; systems in one, two, and three dimensions; matrices; Hermitian operators; symmetries; angular momentum; perturbation theory; scattering theory; applications to atomic structure; emphasis on phenomenology.

Prerequisite: PHYSICS 111B and PHYSICS 112B and PHYSICS 113B

**PHYSICS 115A. Statistical Physics. 4 Units.**

Microscopic theory of temperature, heat, and entropy; kinetic theory; multicomponent systems; quantum statistics.

Prerequisite: PHYSICS 50 and (PHYSICS 60 or CHEM 1C or ENGRMAE 91)

**PHYSICS 116. Relativity and Black Holes. 4 Units.**

Introduces students to both special and general relativity; includes the formalism of four-vectors, equivalence principle, curved space-time, and modern issues with black holes.

Prerequisite: PHYSICS 50 and PHYSICS 111A

**PHYSICS 120. Electronics for Scientists. 4 Units.**

Applications of modern semiconductor devices to physical instrumentation. Characteristics of semiconductor devices, integrated circuits, analog and digital circuits. Materials fee.

Prerequisite: PHYSICS 52B

Concurrent with PHYSICS 220.

**PHYSICS 121W. Advanced Laboratory. 4 Units.**

Experiments in atomic, condensed matter, nuclear, particle, and plasma physics. Introduction to instrumentation and a first experience in the research laboratory.

Prerequisite: (PHYSICS 51B or PHYSICS 61B or PHYSICS 61C) and (PHYSICS 52C or PHYSICS 193) and (PHYSICS 194 or EDUC 143BW)

Repeatability: May be taken for credit 3 times.

Restriction: Physics Majors only.

**(Ib)**

**PHYSICS 125A. Mathematical Physics. 4 Units.**

Complex variables; Legendre and Bessel functions; complete sets of orthogonal functions; partial differential equations; integral equations; calculus of variations; coordinate transformations; special functions and series.

Prerequisite: PHYSICS 50 and MATH 3D

**PHYSICS 125B. Mathematical Physics. 4 Units.**

Complex variables; Legendre and Bessel functions; complete sets of orthogonal functions; partial differential equations; integral equations; calculus of variations; coordinate transformations; special functions and series.

Prerequisite: PHYSICS 125A and PHYSICS 113A

**PHYSICS 133. Introduction to Condensed Matter Physics. 4 Units.**

Phenomena of solids and their interpretation in terms of quantum theory.

Prerequisite: PHYSICS 113B and PHYSICS 115A

**PHYSICS 134A. Physical and Geometrical Optics. 4 Units.**

Focuses on the practical aspects of optics and optical engineering, starting at the fundamentals. Topics include geometrical optics, ray tracing, polarization optics, interferometers, and diffractive optics.

Corequisite: PHYSICS 112B

Prerequisite: PHYSICS 112A

Concurrent with CBEMS 242A and CHEM 242A.

**PHYSICS 135. Plasma Physics. 4 Units.**

Basic concepts, orbits, kinetic and fluid equations, Coulomb collisions, fluctuations, scattering, radiation.

Prerequisite: PHYSICS 112B

Concurrent with PHYSICS 239A.

**PHYSICS 136. Introduction to Particle Physics. 4 Units.**

Experimental techniques and theoretical concepts of high-energy phenomena: accelerators and detectors; classification of particles and interactions; particle properties; symmetries and mass multiplets; production and decay mechanisms.

Prerequisite: PHYSICS 113B

**PHYSICS 137. Introduction to Cosmology. 4 Units.**

Solution of the differential equations governing the expansion of the Universe. Observational determinations of the parameters governing the expansion. Big Bang inflation, primordial nucleosynthesis, and cosmic microwave background. Dark matter, dark energy, and large-scale structure of the Universe.

Prerequisite or corequisite: PHYSICS 111A

**PHYSICS 138. Astrophysics of Galaxies. 4 Units.**

Introduction to the solar neighborhood, Milky Way, and other galaxies. Interstellar medium. Star formation. Stellar populations. Evolution of spiral, elliptical, and irregular galaxies. Supermassive black holes, quasars, and active galaxies. Galaxies as probes of the expansion rate of the Universe.

Prerequisite: PHYSICS 111A and PHYSICS 61C

**PHYSICS 139. Observational Astrophysics. 4 Units.**

Telescopes and astronomical observations, imaging with CCD detectors and image processing techniques. Photometry and spectroscopy of stars, galaxies, and quasars. Advanced imaging techniques such as deconvolution, adaptive optics, and interferometry.

Corequisite: PHYSICS 194

Prerequisite: PHYSICS 52A and PHYSICS 52B and PHYSICS 52C and PHYSICS 53

**PHYSICS 144. Stellar Astrophysics. 4 Units.**

Stars: their structure and evolution; physical state of the interior; the Hertzsprung- Russell diagram, stellar classification, and physical principles responsible for the classification; star formation; nuclear burning; giant and dwarf stars; neutron stars and black holes.

Prerequisite: (PHYSICS 51A or PHYSICS 61A) and PHYSICS 111A and PHYSICS 112A

**PHYSICS 145. High-Energy Astrophysics. 4 Units.**

Production of radiation by high-energy particles, white dwarfs, neutron stars, and black holes. Evolution of galactic nuclei, radio galaxies, quasars, and pulsars. Cosmic rays and the cosmic background radiation.

Prerequisite: (PHYSICS 51A or PHYSICS 61A) and PHYSICS 111A and PHYSICS 112A

**PHYSICS 146A. Biophysics of Molecules and Molecular Machines. 4 Units.**

Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Prerequisite: PHYSICS 115A

Concurrent with PHYSICS 230A.

**PHYSICS 146B. Biophysics of Molecules and Molecular Machines. 4 Units.**

Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Prerequisite: PHYSICS 115A

Concurrent with PHYSICS 230B.

**PHYSICS 147B. Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging. 4 Units.**

Ionizing radiation, planar and tomographic radiographic and nuclear imaging, magnetism, NMR, MRI imaging.

Prerequisite: PHYSICS 147A

Concurrent with PHYSICS 233B and EECS 202B.

**PHYSICS 147C. Techniques in Medical Imaging II: Ultrasound, Electrophysiological, Optical. 4 Units.**

Sound and ultrasound, ultrasonic imaging, physiological electromagnetism, EEG, MEG, ECG, MCG, optical properties of tissues, fluorescence and bioluminescence, MR impedance imaging, MR spectroscopy, electron spin resonance and ESR imaging.

Prerequisite: PHYSICS 147B

Concurrent with PHYSICS 233C and EECS 202C.

**PHYSICS 150. Special Topics in Physics and Astronomy. 4 Units.**

Current topics in physics. Includes topics from nano-science, biological sciences, astrophysics, and the common use of estimation across subdisciplines within physics.

Repeatability: Unlimited as topics vary.

**PHYSICS 191. Field Experience in Physics Education. 1-4 Units.**

Students develop and perform physics assemblies at neighboring public schools.

Prerequisite: PHYSICS 7C and PHYSICS 7D and PHYSICS 7E

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.

**PHYSICS 192. Tutoring in Physics. 1-2 Units.**

Formalizes the already existing free tutoring for the lower-division physics courses that is provided by the Society of Physics Students (SPS). Includes instructions on tutoring techniques.

Prerequisite: PHYSICS 7E

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 12 units.

Restriction: Society of Physics Students (SPS) tutoring program students only.

**PHYSICS 193. Research Methods. 4 Units.**

Explores tools of inquiry for developing and implementing science research projects. Students undertake independent projects requiring data collection, analysis, and modeling, and the organization and presentation of results. Additional topics include ethical issues and role of scientific literature.

Prerequisite: BIO SCI 14 or PHY SCI 5

Same as BIO SCI 108, CHEM 193.

**PHYSICS 194. Research Communication for Physics Majors. 2 Units.**

Students learn the fundamentals of communicating about research. Topics include preparing abstracts, proposals, and literature reviews. Provides preparation for presentation of independent research projects in PHYSICS 121 and PHYSICS 196.

Prerequisite: PHYSICS 61A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Physics Majors only.

**PHYSICS 195. Undergraduate Research. 4 Units.**

Independent research under the guidance of a Physics faculty member.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Juniors only. Physics Majors only.

**PHYSICS 196A. Thesis in Physics I. 2 Units.**

Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Corequisite: PHYSICS 194

Overlaps with PHYSICS H196A.

Restriction: Physics Majors only.

**PHYSICS 196B. Thesis in Physics II. 4 Units.**

Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS 196A

Overlaps with PHYSICS H196B.

Restriction: Physics Majors only.

**PHYSICS 196C. Thesis in Physics III. 4 Units.**

Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS 196B

Overlaps with PHYSICS H196C.

Restriction: Physics Majors only.

**PHYSICS H196A. Honors Thesis in Physics I. 2 Units.**

Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Corequisite: PHYSICS 194

Overlaps with PHYSICS 196A.

Restriction: Physics Majors only. Campuswide Honors Collegium students only. Honors Program in Physics students only.

**PHYSICS H196B. Honors Thesis in Physics II. 4 Units.**

Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS H196A

Overlaps with PHYSICS 196B.

Restriction: Physics Majors only. Campuswide Honors Collegium students only. Honors Program in Physics students only.

**PHYSICS H196C. Honors Thesis in Physics III. 4 Units.**

Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS H196B

Overlaps with PHYSICS 196C.

Restriction: Physics Majors only. Campuswide Honors Collegium students only. Honors Program in Physics students only.

**PHYSICS 199. Readings on Special Topics. 1-4 Units.**

Readings in selected areas of Physics. Topics addressed vary each quarter.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**PHYSICS 206. Advanced Data Acquisition and Analysis. 4-6 Units.**

Introduces students to a variety of practical laboratory techniques, including lock-in, boxcar, coincidence counting, noise filtering, PID control, properties of common transducers, computer interfacing to instruments, vacuum technology, laboratory safety, basic mechanical design, and shop skills. Materials fee.

Same as CHEM 206.

Concurrent with PHYSICS 106.

**PHYSICS 207. Applied Physical Chemistry. 4 Units.**

Introduction to fundamental concepts in molecular structure and reactivity: theory of bonding, valence and molecular orbitals; structure and reactivity in inorganic chemistry; elements in molecular group theory; nomenclature in organic chemistry; and survey of macromolecules.

Same as CHEM 207.

**PHYSICS 208. Math Methods. 4 Units.**

Applications of mathematics to physical and chemical problems. Calculus of special functions, complex variables and vectors; linear vector spaces and eigenvalue problems. Differential equations.

Same as CHEM 208.

**PHYSICS 211. Classical Mechanics. 4 Units.**

Variational principles, Lagrange's equations; applications to two body problems, small oscillation theory, and other phenomena. Hamilton's equations. Hamilton-Jacobi theory. Canonical transformations.

Restriction: Graduate students only.

**PHYSICS 212A. Mathematical Physics. 4 Units.**

Complex variables and integration; ordinary and partial differential equations; the eigenvalue problem.

Restriction: Graduate students only.

**PHYSICS 213A. Electromagnetic Theory. 4 Units.**

Electrostatics; magnetostatics; relativity; classical electron theory; fields in vacuum and matter; retardation; radiation and absorption; dispersion; propagation of light; diffraction; geometric optics; theories of the electric and magnetic properties of materials; scattering.

**PHYSICS 213B. Electromagnetic Theory. 4 Units.**

Electrostatics; magnetostatics; relativity; classical electron theory; fields in vacuum and matter; retardation; radiation and absorption; dispersion; propagation of light; diffraction; geometric optics; theories of the electric and magnetic properties of materials; scattering.

Prerequisite: PHYSICS 213A

**PHYSICS 214A. Statistical Physics. 4 Units.**

Maxwell-Boltzmann, Bose-Einstein, Fermi-Dirac statistics; ideal and imperfect gases; thermodynamic properties of solids; transport theory.

Restriction: Graduate students only.

**PHYSICS 214C. Many Body Theory. 4 Units.**

Application of field theory methods, perturbative and non-perturbative, to many particle systems; second quantization, Feynman diagrams, linear response theory, and functional integral methods applied to the ground state and at finite temperature.

Prerequisite: PHYSICS 214A and PHYSICS 215A and PHYSICS 215B

Restriction: Graduate students only.

**PHYSICS 215A. Quantum Mechanics. 4 Units.**

Foundations; Dirac notation; basic operators and their eigenstates; perturbation theory; spin.

Restriction: Graduate students only.

**PHYSICS 215B. Quantum Mechanics. 4 Units.**

Atomic physics; scattering theory, formal collision theory; semi-classical radiation theory; many body systems.

Prerequisite: PHYSICS 215A

Restriction: Graduate students only.

**PHYSICS 220. Electronics for Scientists. 4 Units.**

Applications of modern semiconductor devices to physical instrumentation. Characteristics of semiconductor devices, integrated circuits, analog and digital circuits.

Restriction: Graduate students only.

Concurrent with PHYSICS 120.

**PHYSICS 222. Continuum Mechanics. 4 Units.**

Introduction to the continuum limit and stress and strain tensors. Hydrodynamics of perfect fluids; two-dimensional problems, motion of incompressible viscous fluids, Navier Stokes equations. Basic elasticity theory. Description of viscoelastic materials. Introduction to nonlinear behavior instabilities.

**PHYSICS 223. Numerical Methods. 4 Units.**

Introduction to theory and practice of modern numerical methods. Techniques are drawn from topics such as solution of differential equations, Monte Carlo methods, Fast Fourier transforms, and evaluation of special functions.

**PHYSICS 228. Electromagnetism. 4 Units.**

Maxwell's equations, electrodynamics, electromagnetic waves and radiation, wave propagation in media, interference and quantum optics, coherent and incoherent radiation, with practical applications in interferometry, lasers, waveguides, and optical instrumentation.

Same as CHEM 228.

**PHYSICS 229A. Computational Methods. 4 Units.**

Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.

Same as CHEM 229A.

Concurrent with PHYSICS 100.

**PHYSICS 230A. Biophysics of Molecules and Molecular Machines. 4 Units.**

Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Concurrent with PHYSICS 146A.

**PHYSICS 230B. Biophysics of Molecules and Molecular Machines. 4 Units.**

Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Concurrent with PHYSICS 146B.

**PHYSICS 233A. Principles of Imaging. 4 Units.**

Linear systems, probability and random processes, image processing, projecting imaging, tomographic imaging.

Same as EECS 202A.

Restriction: Graduate students only.

Concurrent with PHYSICS 147A.

**PHYSICS 233B. Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging. 4 Units.**

Ionizing radiation, planar and tomographic radiographic and nuclear imaging, magnetism, NMR, MRI imaging.

Prerequisite: EECS 202A

Same as EECS 202B.

Restriction: Graduate students only.

Concurrent with PHYSICS 147B.

**PHYSICS 233C. Techniques in Medical Imaging II: Ultrasound, Electrophysiological, Optical. 4 Units.**

Sound and ultrasound, ultrasonic imaging, physiological electromagnetism, EEG, MEG, ECG, MCG, optical properties of tissues, fluorescence and bioluminescence, MR impedance imaging, MR spectroscopy, electron spin resonance and ESR imaging.

Prerequisite: EECS 202B

Same as EECS 202C.

Restriction: Graduate students only.

Concurrent with PHYSICS 147C.

**PHYSICS 234A. Elementary Particle Physics. 4 Units.**

Overview of Standard Model theory and phenomenology. Electromagnetic, strong and weak forces, quark model, interactions with matter, particle detectors and accelerators.

Prerequisite: PHYSICS 215B

**PHYSICS 234B. Advanced Elementary Particle Physics. 4 Units.**

$SU(3) \times SU(2) \times U(1)$  model of strong, weak, and electromagnetic interactions. K-meson system and CP violation, neutrino masses and mixing, grand-unified theories, supersymmetry, introduction to cosmology and its connection to particle physics.

Prerequisite: PHYSICS 234A and PHYSICS 235A

**PHYSICS 234C. Advanced Elementary Particle Physics. 4 Units.**

$SU(3) \times SU(2) \times U(1)$  model of strong, weak, and electromagnetic interactions. K-meson system and CP violation, neutrino masses and mixing, grand-unified theories, supersymmetry, introduction to cosmology and its connection to particle physics.

Prerequisite: PHYSICS 234A and PHYSICS 235A

**PHYSICS 235A. Quantum Field Theory. 4 Units.**

Canonical quantization, scalar field theory, Feynman diagrams, tree-level quantum electrodynamics.

Prerequisite: PHYSICS 215B

Restriction: Graduate students only.

**PHYSICS 235B. Advanced Quantum Field Theory. 4 Units.**

Pathintegral techniques, loop diagrams, regularization and renormalization, anomalies.

Prerequisite: PHYSICS 235A

Restriction: Graduate students only.

**PHYSICS 238A. Condensed Matter Physics. 4 Units.**

Bonding in solids; crystal symmetry and group theory, elastic properties of crystals; lattice vibrations, interaction of radiation with matter; cohesion of solids; the electron gas; electron energy bands in solids; ferromagnetism; transport theory; semiconductors and superconductors; many-body perturbation theory.

Prerequisite: PHYSICS 133 and (PHYSICS 214A or CHEM 232A) and (PHYSICS 215B or CHEM 231B)

**PHYSICS 238B. Condensed Matter Physics. 4 Units.**

Bonding in solids; crystal symmetry and group theory, elastic properties of crystals; lattice vibrations, interaction of radiation with matter; cohesion of solids; the electron gas; electron energy bands in solids; ferromagnetism; transport theory; semiconductors and superconductors; many-body perturbation theory.

Prerequisite: PHYSICS 238A

**PHYSICS 238C. Condensed Matter Physics. 4 Units.**

Bonding in solids; crystal symmetry and group theory, elastic properties of crystals; lattice vibrations, interaction of radiation with matter; cohesion of solids; the electron gas; electron energy bands in solids; ferromagnetism; transport theory; semiconductors and superconductors; many-body perturbation theory.

Prerequisite: PHYSICS 238B

**PHYSICS 239A. Plasma Physics. 4 Units.**

Basic concepts, orbits, kinetic and fluid equations, Coulomb collisions, fluctuations, scattering, radiation.

Restriction: Graduate students only.

Concurrent with PHYSICS 135.

**PHYSICS 239B. Plasma Physics. 4 Units.**

Magnetic confinement, MHD equilibrium and stability, collisional transport.

Prerequisite: PHYSICS 239A

Restriction: Graduate students only.

**PHYSICS 239C. Plasma Physics. 4 Units.**

Linear waves and instabilities, uniform un-magnetized and magnetized plasmas, non-uniform plasmas.

Prerequisite: PHYSICS 239B

Restriction: Graduate students only.

**PHYSICS 240A. Galactic Astrophysics. 4 Units.**

The morphology, kinematics, and evolution of our Milky Way and other galaxies. Topics include stellar formation and stellar evolution, end states of stars (supernovae, neutron stars), the distribution of stars, interstellar gas and mass in galaxies. The Local Group.

**PHYSICS 240B. Cosmology. 4 Units.**

An introduction to modern cosmology set within the context of general relativity. Topics include the expansion history of the Universe, inflation, the cosmic microwave background, density fluctuations, structure formation, dark matter, dark energy, and gravitational lensing.

**PHYSICS 240C. Radiative Processes in Astrophysics. 4 Units.**

Exploration of radiation mechanisms (electron scattering, synchrotron emission, collisional excitation, and more) and radiative transfer through matter including absorption and emission. Includes such observational astrophysics topics as spectroscopic study of atoms and nuclei, X-rays, and cosmic rays.

**PHYSICS 241A. Solar System and Extrasolar Planets. 4 Units.**

Formation, evolution, and habitability of planetary systems. Observational and theoretical study of the origin and evolution of the Solar System, present day dynamical state of the Solar System (asteroids, Kuiper Belt Objects, Oort cloud), planetary atmospheres, processes governing planetary climate.

Corequisite: PHYSICS 242

Restriction: Graduate students only.

**PHYSICS 241B. Stellar Astrophysics. 4 Units.**

Physics of stellar interiors and equations of stellar structure. Stellar atmospheres and absorption processes. Introduction to stellar winds. Thermonuclear reactions, nucleosynthesis, and solar neutrinos. Binary stars and mass accretion. White dwarfs, supernovae, neutron stars, and black holes.

Prerequisite: PHYSICS 211 and PHYSICS 240A

**PHYSICS 241C. Extragalactic Astrophysics. 4 Units.**

The physics and phenomenology of galaxies; star formation, interstellar medium, and intergalactic medium. Galaxy structure and dynamics. Galaxy evolution, stellar populations, and scaling relations; the relationship between galaxy properties and environment. Galaxy clusters and active galactic nuclei.

Prerequisite: PHYSICS 211 and PHYSICS 240A

**PHYSICS 241D. Early Universe Physics. 4 Units.**

Includes a thorough quantum treatment of the generation of perturbations during inflation and various topics related to kinetic theory in an expanding Universe. Other topics include the astrophysics and cosmology of weakly interacting particles.

Prerequisite: PHYSICS 234A and (PHYSICS 240B or PHYSICS 255)

**PHYSICS 242. Astro Fundamentals. 4 Units.**

Introduction to topics in astrophysics including measurement of stellar properties, stellar structure and evolution, stellar remnants and supernovae, the interstellar medium, exoplanets, gravitational lensing, galactic structure, extragalactic distance measurements, and the expanding universe.

Restriction: Graduate students only.

**PHYSICS 246. Special Topics in Astrophysics. 4 Units.**

Outlines and emphasizes a subarea of astrophysics that is undergoing rapid development.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 247. Special Topics in Particle Physics. 4 Units.**

Current topics in particle non-accelerator-based research fields.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 248. Special Topics in Condensed Matter Physics. 4 Units.**

Outlines and emphasizes a subarea of condensed matter physics that is undergoing rapid development.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PHYSICS 249. Special Topics in Plasma Physics. 4 Units.**

Outlines and emphasizes a subarea of plasma physics that is undergoing rapid development.

Prerequisite: PHYSICS 239A and PHYSICS 239B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PHYSICS 250. Physics and Astronomy Communications Skills. 4 Units.**

Fundamentals of effectively communicating research through written and oral platforms. Topics include writing compelling proposals and journal articles for peer review, and the development of engaging oral presentations of science results and significance to a wide range of audiences.

Restriction: Graduate students only.

**PHYSICS 255. General Relativity. 4 Units.**

An introduction to Einstein's theory of gravitation. Tensor analysis, Einstein's field equations, astronomical tests of Einstein's theory, gravitational waves.

**PHYSICS 260A. Seminar in Condensed Matter Physics. 1 Unit.**

Seminar designed to acquaint students with recent advances in solid state physics. Lecturers from the Department of Physics and Astronomy (both faculty and graduate students), other UCI departments, and other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 260B. Seminar in Condensed Matter Physics. 1 Unit.**

Seminar designed to acquaint students with recent advances in solid state physics. Lecturers from the Department of Physics and Astronomy (both faculty and graduate students), other UCI departments, and other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 260C. Seminar in Condensed Matter Physics. 1 Unit.**

Seminar designed to acquaint students with recent advances in solid state physics. Lecturers from the Department of Physics and Astronomy (both faculty and graduate students), other UCI departments, and other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 261A. Seminar in Plasma Physics. 1 Unit.**

Advanced topics in plasma physics: wave propagation, nonlinear effects, kinetic theory and turbulence, stability problems, transport coefficients, containment, and diagnostics. Applications to controlled fusion and astrophysics.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**PHYSICS 261B. Seminar in Plasma Physics. 1 Unit.**

Advanced topics in plasma physics: wave propagation, nonlinear effects, kinetic theory and turbulence, stability problems, transport coefficients, containment, and diagnostics. Applications to controlled fusion and astrophysics.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**PHYSICS 261C. Seminar in Plasma Physics. 1 Unit.**

Advanced topics in plasma physics: wave propagation, nonlinear effects, kinetic theory and turbulence, stability problems, transport coefficients, containment, and diagnostics. Applications to controlled fusion and astrophysics.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**PHYSICS 263A. Seminar in Particle Physics. 1 Unit.**

Discussion of advanced topics and reports of current research results in theoretical and experimental particle physics and cosmic rays.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 263B. Seminar in Particle Physics. 1 Unit.**

Discussion of advanced topics and reports of current research results in theoretical and experimental particle physics and cosmic rays.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 263C. Seminar in Particle Physics. 1 Unit.**

Discussion of advanced topics and reports of current research results in theoretical and experimental particle physics and cosmic rays.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 265A. Seminar in Astrophysics. 1 Unit.**

Acquaints students with current research in astrophysics. Lecturers from the Department of Physics and Astronomy and from other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 265B. Seminar in Astrophysics. 1 Unit.**

Acquaints students with current research in astrophysics. Lecturers from the Department of Physics and Astronomy and from other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 265C. Seminar in Astrophysics. 1 Unit.**

Acquaints students with current research in astrophysics. Lecturers from the Department of Physics and Astronomy and from other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 266. Current Topics in Chemical, Applied, and Materials Physics. 1 Unit.**

The subjects covered vary from year to year. Connection between fundamental principles and implementations in practice in science, industry, and technology.

Repeatability: May be repeated for credit unlimited times.

Same as CHEM 266.

**PHYSICS 267B. Current Problems in Particle Physics. 4 Units.**

Presentation and discussion of current research and theory in particle physics. Lectures given by staff and students.

Repeatability: May be repeated for credit unlimited times.

**PHYSICS 267C. Current Problems in Particle Physics. 4 Units.**

Presentation and discussion of current research and theory in particle physics. Lectures given by staff and students.

Repeatability: May be repeated for credit unlimited times.

**PHYSICS 268. Seminar in Systems Microbiology Research. 1 Unit.**

A research and journal club seminar that covers topics on bacteria and phage using approaches and principles from biology, engineering, and physics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Same as MOL BIO 268, ENGRMSE 267.

Restriction: Upper-division students only. Graduate students only.

**PHYSICS 269. Seminar in Teaching Physics. 2 Units.**

Techniques for effective teaching. Covers active listening and student engagement, problem-solving skills, peer instruction and collaborative learning, and evaluation. Required of all new Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

**PHYSICS 273. Technical Communication Skills. 2 Units.**

Development of effective communication skills, oral and written presentations, through examples and practice.

Grading Option: Satisfactory/unsatisfactory only.

Same as CHEM 273.

**PHYSICS 291. Research Seminar. 1-4 Units.**

Detailed discussion of research problems of current interest in the Department. Format, content, and frequency of the course are variable.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 295. Experimental Research. 4-12 Units.**

With the approval of a faculty member, a student may pursue a research program in experimental physics. Typical areas include astrophysics, condensed matter physics, elementary particle physics, and plasma physics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Physical Sciences students only.

**PHYSICS 296. Theoretical Research. 4-12 Units.**

With approval of a faculty member, a student may pursue a research program in theoretical physics. Typical areas include astrophysics, condensed matter physics, elementary particle physics, and plasma physics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. School of Physical Sciences students only.

**PHYSICS 298. Physics Colloquium. 1 Unit.**

Seminar held each week, in which a current research topic is explored. Frequently, off-campus researchers are invited to present the seminar, and on occasion a faculty member or researcher from the Department will speak.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: School of Physical Sciences students only.

**PHYSICS 299. Reading of Special Topic. 4-12 Units.**

With special consent from a faculty member who will agree to supervise the program, a student may receive course credit for individual study of some area of physics.

Restriction: Graduate students only.

**PHYSICS 395. Laboratory Teaching. 1 Unit.**

Required of and limited to teaching assistants of undergraduate laboratory courses. Designed to teach the necessary skills required of teaching assistants for these courses.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PHYSICS 399. University Teaching. 1-4 Units.**

Required of and limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

## Applied Physics, B.S.

The goal of the undergraduate majors in Physics and Applied Physics is to develop expert problem solvers with a broad understanding of physical principles. The programs are flexible and prepare students for careers in industrial research, applications programming, education, law, or business, as well as for graduate study in astronomy, biomedical physics, engineering, or physics.

Students choose a major in either pure Physics or Applied Physics. The major in Physics includes a standard track for graduate study in physics, a Specialization in Astrophysics, and Concentrations in Computational Physics, the Philosophy of Physics, and Physics Education. The major in Applied Physics allows students to combine physics courses with courses from overlapping disciplines, such as materials science, electrical engineering, geosciences, biomedical imaging, or other fields. Annual mandatory meetings with faculty advisors assist students in selecting the right program for their aptitudes and interests.

Different sequences of lower-division physics courses are distinguished by their intended audience, their mathematical prerequisites, and the extent to which they offer preparation for more advanced courses. These aspects of the introductory courses are summarized as follows:

**Physics 3:** *Intended audience:* Premedical students, Biological Sciences majors. *Prerequisites:* concurrent enrollment in MATH 2A. *Preparation for advanced courses:* PHYSICS 7D with permission.

**Physics 7:** *Intended audience:* Physical Sciences and Engineering majors. *Prerequisite:* concurrent enrollment in MATH 2B. *Preparation for advanced courses:* PHYSICS 51A or PHYSICS 61A.

**Physics 12-21:** *Intended audience:* Nonscience majors. *Prerequisites:* none. *Preparation for advanced courses:* none.

Students may be admitted to the Physics or Applied Physics majors upon entering the University as freshmen, via change of major, or as transfer students from other colleges and universities. Information about change of major policies is available in the Physical Sciences Student Affairs Office and at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>). For transfer student admission, preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the following required courses: one year of approved calculus and one year of calculus-based physics with laboratory for engineering and physics majors. Completion of multivariable calculus, linear algebra, and differential equations is recommended.

**All students must meet the University Requirements.**

**School Requirements: None**

**Departmental Requirements**

A. Complete the following:

MATH 2A or MATH 5A	Single-Variable Calculus Calculus for Life Sciences
MATH 2B	Single-Variable Calculus
MATH 2D- 2E	Multivariable Calculus and Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
PHYSICS 50	Introductory Mathematical Physics
PHYSICS 61A or PHYSICS 51A	Modern Physics for Majors Modern Physics
PHYSICS 111A	Classical Mechanics
PHYSICS 112A	Electromagnetic Theory
PHYSICS 113A	Quantum Physics

PHYSICS 115A	Statistical Physics
B. Complete one of the following series:	
PHYSICS 7C- 7LC- 7D- 7LD- 7E	Classical Physics and Classical Physics Laboratory and Classical Physics and Classical Physics Laboratory and Classical Physics
or	
PHYSICS 3A- 3B- 3LB- 3C- 3LC	Basic Physics I and Basic Physics II and Basic Physics Laboratory and Basic Physics III and Basic Physics Laboratory
C. Complete one of the following:	
PHYSICS 53	Introduction to Programming and Numerical Analysis
I&C SCI 45C	Programming in C/C++ as a Second Language
MATH 9	Introduction to Programming for Numerical Analysis
EECS 10	Computational Methods in Electrical and Computer Engineering
EECS 12	Introduction to Programming
D. Complete one of the following:	
PHYSICS 60	Thermal Physics
CHEM 1C	General Chemistry
CHEM H2C	Honors General Chemistry
CHEM M3C	Majors Quantitative Analytical Chemistry
ENGRMAE 91	Introduction to Thermodynamics
E. Complete six units of lower-division laboratory using any combination of the following courses:	
PHYSICS 52A- 52B- 52C	Fundamentals of Experimental Physics and Fundamentals of Experimental Physics and Fundamentals of Experimental Physics
CHEM 1LC- 1LD	General Chemistry Laboratory and General Chemistry Laboratory
CHEM H2LA- H2LB	Honors General Chemistry Laboratory and Honors General Chemistry Laboratory
CHEM M2LA- M2LB	Majors General Chemistry Laboratory and Majors General Chemistry Laboratory
CHEM 51LB- 51LC	Organic Chemistry Laboratory and Organic Chemistry Laboratory
CHEM H52LA- H52LB	Honors Organic Chemistry Laboratory and Honors Organic Chemistry Laboratory
CHEM M52LA- M52LB	Majors Organic Chemistry Laboratory and Majors Organic Chemistry Laboratory
ENGR 7A- 7B	Introduction to Engineering I and Introduction to Engineering II
EECS 70LA- 70LB	Network Analysis I Laboratory and Network Analysis II Laboratory
F. Complete eight units of upper-division laboratory using any combination of the following courses:	
PHYSICS 106W	Advanced Data Acquisition, Analysis, and Scientific Writing
PHYSICS 120	Electronics for Scientists
PHYSICS 121W	Advanced Laboratory
PHYSICS 139	Observational Astrophysics
PHYSICS 193	Research Methods
PHYSICS 196C	Thesis in Physics III
or one approved upper-division laboratory course outside of Physics	
G. Complete two units of writing communication from the following courses:	
PHYSICS 194	Research Communication for Physics Majors <sup>1</sup>

PHY SCI 139W	Technical Writing and Communication Skills
EDUC 143BW	Classroom Interactions II
or alternate upper-division writing course with department approval	
H. Complete 32 additional units of coherently-related electives in accord with the following rules:	
- Up to eight units may be lower-division electives in physics such as PHYSICS 20, PHYSICS 61B, or PHYSICS H90	
- Any upper-division physics courses PHYSICS 100-150	
- Any graduate level physics courses PHYSICS 200-299 with approval of the Department Undergraduate Advisor	
- Any combination of physics and non-physics courses pre-approved as a formal Concentration or Specialization	
- Any other combination of physics and non-physics courses approved by the Physics Department Undergraduate Committee.	

- <sup>1</sup> PHYSICS 194 does not satisfy the University's upper-division writing requirement. It is a prerequisite course for PHYSICS 121W, which does satisfy the upper-division writing requirement.

**NOTE:** Students may not double major in Physics and Applied Physics.

## Concentration in Biomedical Physics

The **Biomedical Physics Concentration** in Applied Physics is designed for the student who anticipates a career in physics applied to biology and medicine, such as health physics or radiological physics, or who intends to work in a scholarly field which deals with the physical aspects of biology or medicine, such as molecular biology or physiology. Completion of requirements for the Physics major is required, as are nine quarters of basic courses in biology and chemistry. Students who wish to follow the Biomedical Physics Concentration are advised to seek guidance early in their college careers. The requirements are such that coordination of a program in the second year is essential.

A. Complete the following:

BIO SCI 97	Genetics
BIO SCI 98	Biochemistry
BIO SCI 99	Molecular Biology

B. Select one of the following:

CHEM 1A- 1B- 1C	General Chemistry and General Chemistry and General Chemistry
-----------------	---

or

CHEM H2A- H2B- H2C	Honors General Chemistry and Honors General Chemistry and Honors General Chemistry
--------------------	--

C. Select one of the following:

CHEM 1LC- 1LD	General Chemistry Laboratory and General Chemistry Laboratory
---------------	--

or

CHEM H2LA- H2LB	Honors General Chemistry Laboratory and Honors General Chemistry Laboratory
-----------------	--

or

CHEM M2LA- M2LB	Majors General Chemistry Laboratory and Majors General Chemistry Laboratory
-----------------	--

D. Select one of the following:

CHEM 51A- 51B	Organic Chemistry and Organic Chemistry
---------------	--

or

CHEM H52A-CHEM H52B	and
---------------------	-----

## Sample Program - Biomedical Physics Concentration in Applied Physics

## Concentration in Engineering Physics

The **Engineering Physics Concentration** in Applied Physics is designed to provide appropriate education to students who anticipate a career in industrial or technological research. It combines the fundamental knowledge of physical processes obtained from physics courses with the technical knowledge obtained from engineering courses.

Students in the Engineering Physics Concentration must complete 32 units of coherently related electives, with at least 24 of these units from courses in the Henry Samueli School of Engineering. Students may propose any sequence for approval by the Department Undergraduate Advisor. Pre-approved courses include:

EECS 70A	Network Analysis I
EECS 70B- 70LB	Network Analysis II and Network Analysis II Laboratory
EECS 170A- 170LA	Electronics I and Electronics I Laboratory
EECS 170B- 170LB	Electronics II and Electronics II Laboratory
EECS 170C- 170LC	Electronics III and Electronics III Laboratory
EECS 174	Semiconductor Devices
EECS 188	Optical Electronics
ENGRMAE 120	Heat and Mass Transfer
ENGRMAE 130A	Introduction to Fluid Mechanics
ENGRMAE 147	Vibrations

## Sample Program - Engineering Physics Concentration in Applied Physics

Junior		
Fall	Winter	Spring
N/A	EECS 70A	EECS 70B- 70LB
Senior		
Fall	Winter	Spring
EECS 170A- 170LA	EECS 170B- 170LB EECS 188	PHYSICS 106W EECS 170C- 170LC

The Honors Program in Physics provides an opportunity for selected students majoring in Physics or Applied Physics to pursue advanced work in one of the research areas of the Department. Admission to the program is based on an application normally submitted by the sixth week of the spring quarter of the junior year. Applicants must have an overall grade point average of at least 3.4 and a grade point average in physics courses of 3.5 or better. (Exceptions to these procedures and standards may be granted in unusual circumstances.) In selecting students for the program, the Department considers evidence of ability and interest in research.

Students admitted to the program participate in a year-long course, PHYSICS H196A-PHYSICS H196B-PHYSICS H196C, which includes two quarters of research and a final quarter in which a written thesis is submitted. If this work and the student's final GPA are deemed of honors quality by the program advisor, the student then graduates with Departmental Honors in Physics.

Physics 3 is a one-year course suitable for premedical students, students majoring in Biological Sciences, and nonscience majors. It surveys most of the important branches of physics. Laboratory work accompanies the course. Nonscience majors with some mathematical skill may wish to consider Physics 3 as an alternative to PHYSICS 12 through PHYSICS 21.

A student who decides to major in Physics after completing Physics 3 should meet with the Department Undergraduate Advisor for placement information.

Physics 7 is an intensive three-quarter course for students in Physical Sciences and Engineering who are interested in a more quantitative approach to introductory physics. Two units of laboratory work accompany the course.

Physics courses numbered between 12 and 21 are general education courses intended for nonscience majors. The content and format of PHYSICS 21 may vary from year to year.

The introduction to mathematical methods (MATH 2E, MATH 3A, MATH 3D, and PHYSICS 50), microscopic physics (PHYSICS 61A-PHYSICS 61B), and experimental physics (PHYSICS 52A-PHYSICS 52B-PHYSICS 52C) are normally taken in the sophomore year.

Courses numbered 100 and above are for Physics majors and other qualified students. Courses numbered between 111 and 115 emphasize the mathematical and theoretical structures that have unified our understanding of nature. It should be noted that multi-quarter courses such as 111A-B must be taken and passed in sequential order. Any student who is so inclined may take more than the minimum one quarter of advanced laboratory work. Courses numbered between 133 and 149 introduce active subdisciplines in current research. Independent research (PHYSICS 195, PHYSICS 196) is strongly encouraged. In PHYSICS 194, students learn the basics of writing about science, proper use of references and background material, presentation of research proposals, and more.

Transfer students are specifically advised to seek individual consultation with the Department Undergraduate Advisor before deciding on a program of courses.

All Physics and Applied Physics majors must complete the core courses listed with the sample programs. By the end of the junior year, each student is encouraged to select a concentration or track.

Note that alternatives to Physics major requirements can be approved upon petition to the Department and the Office of the Associate Dean. Furthermore, exceptionally prepared students are allowed to enroll in graduate-level courses; to do so requires the approval of the Department Undergraduate Advisor.

Students preparing for graduate school in atmospheric science or physical oceanography should complete the minor in Earth and Atmospheric Sciences.

## Physics, B.S.

The goal of the undergraduate majors in Physics and Applied Physics is to develop expert problem solvers with a broad understanding of physical principles. The programs are flexible and prepare students for careers in industrial research, applications programming, education, law, or business, as well as for graduate study in astronomy, biomedical physics, engineering, or physics.

Students choose a major in either pure Physics or Applied Physics. The major in Physics includes a standard track for graduate study in physics, a Specialization in Astrophysics, and Concentrations in Computational Physics, the Philosophy of Physics, and Physics Education. The major in Applied Physics allows students to combine physics courses with courses from overlapping disciplines, such as materials science, electrical engineering, geosciences, biomedical imaging, or other fields. Annual mandatory meetings with faculty advisors assist students in selecting the right program for their aptitudes and interests.

Different sequences of lower-division physics courses are distinguished by their intended audience, their mathematical prerequisites, and the extent to which they offer preparation for more advanced courses. These aspects of the introductory courses are summarized as follows:

**Physics 3:** *Intended audience:* Premedical students, Biological Sciences majors. *Prerequisites:* concurrent enrollment in MATH 2A. *Preparation for advanced courses:* PHYSICS 7D with permission.

**Physics 7:** *Intended audience:* Physical Sciences and Engineering majors. *Prerequisite:* concurrent enrollment in MATH 2B. *Preparation for advanced courses:* PHYSICS 51A or PHYSICS 61A.

**Physics 12-21:** *Intended audience:* Nonscience majors. *Prerequisites:* none. *Preparation for advanced courses:* none.

Students may be admitted to the Physics or Applied Physics majors upon entering the University as freshmen, via change of major, or as transfer students from other colleges and universities. Information about change of major policies is available in the Physical Sciences Student Affairs Office and at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>). For transfer student admission, preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the following required courses: one year of approved calculus and one

year of calculus-based physics with laboratory for engineering and physics majors. Completion of multivariable calculus, linear algebra, and differential equations is recommended.

**All students must meet the University Requirements.**

**School Requirements: None.**

### Departmental Requirements

MATH 2A or MATH 5A	Single-Variable Calculus Calculus for Life Sciences
MATH 2B	Single-Variable Calculus
MATH 2D- 2E	Multivariable Calculus and Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
PHYSICS 7C- 7D- 7E	Classical Physics and Classical Physics and Classical Physics
PHYSICS 7LC- 7LD	Classical Physics Laboratory and Classical Physics Laboratory
PHYSICS 50	Introductory Mathematical Physics
PHYSICS 52A- 52B- 52C	Fundamentals of Experimental Physics and Fundamentals of Experimental Physics and Fundamentals of Experimental Physics
PHYSICS 53	Introduction to Programming and Numerical Analysis (or another programming course)
PHYSICS 60	Thermal Physics
PHYSICS 61A	Modern Physics for Majors <sup>1</sup>
PHYSICS 61B or PHYSICS 61C	Modern Physics for Majors Introduction to Astrophysics
PHYSICS 111A- 111B	Classical Mechanics and Classical Mechanics
PHYSICS 112A- 112B	Electromagnetic Theory and Electromagnetic Theory
PHYSICS 113A	Quantum Physics
PHYSICS 115A	Statistical Physics
PHYSICS 121W	Advanced Laboratory
PHYSICS 125A	Mathematical Physics
PHYSICS 194	Research Communication for Physics Majors

And select five additional coherently related four-unit courses. (This requirement is normally satisfied by concentrations, specializations, and tracks, as listed below.)

<sup>1</sup> For students transferring into the major after taking PHYSICS 51A-PHYSICS 51B, PHYSICS 51A-PHYSICS 51B will be accepted in place of PHYSICS 61A-PHYSICS 61B.

*Upper-Division Writing Requirement.* Physics majors are required to satisfy the upper-division writing requirement by completing PHYSICS 194 with a grade of C or better, followed by PHYSICS 121W with a grade of C or better.

### Sample Program — Physics Core Curriculum

Freshman		
Fall	Winter	Spring
MATH 2B	MATH 2D	MATH 2E
PHYSICS 7C- 7LC	PHYSICS 7D- 7LD	PHYSICS 7E
(PHYSICS 99)		
Sophomore		
Fall	Winter	Spring
MATH 3A	MATH 3D	PHYSICS 52C
PHYSICS 52A	PHYSICS 52B	PHYSICS 53

PHYSICS 60	PHYSICS 61A	PHYSICS 61B or 61C
------------	-------------	--------------------

**Junior**

<b>Fall</b>	<b>Winter</b>	<b>Spring</b>
-------------	---------------	---------------

PHYSICS 111A	PHYSICS 111B	PHYSICS 112B
PHYSICS 50	PHYSICS 112A	PHYSICS 113A

**Senior**

<b>Fall</b>	<b>Winter</b>
-------------	---------------

PHYSICS 115A	PHYSICS 121W
PHYSICS 194	PHYSICS 125A

For a student planning graduate study in physics, additional courses in advanced physics are strongly recommended.

## Concentration in Computational Physics

The **Computational Physics concentration** provides training for positions in software development in a wide variety of high-technology fields. For example, consider medical imaging software for magnetic resonance imaging. To write a first-rate program, one must understand the apparatus and analysis techniques (physics), use appropriate numerical techniques (numerical analysis), and employ a convenient object-oriented interface (computer science). The concentration develops this unique set of skills: physical and mathematical insight through the Physics curriculum, knowledge of modern computer programming techniques, and knowledge of numerical analysis.

**Requirements:**

Three courses in computer science:

I&C SCI 31	Introduction to Programming
I&C SCI 32	Programming with Software Libraries
I&C SCI 33	Intermediate Programming

Two courses in numerical analysis plus the accompanying laboratories:

MATH 105A- 105B	Numerical Analysis I and Numerical Analysis II
MATH 105LA- 105LB	Numerical Analysis Laboratory and Numerical Analysis Laboratory

One advanced computational course and accompanying laboratory:

MATH 107- 107L	Numerical Differential Equations and Numerical Differential Equations Laboratory
----------------	---

## Sample Program — Computational Physics Concentration

**Junior**

<b>Fall</b>	<b>Winter</b>	<b>Spring</b>
I&C SCI 31	I&C SCI 32	I&C SCI 33

**Senior**

<b>Fall</b>	<b>Winter</b>	<b>Spring</b>
MATH 105A- 105LA	MATH 105B- 105LB	MATH 107- 107L

## Concentration in Philosophy of Physics

The **Philosophy of Physics concentration** is concerned with the study of the conceptual history of physics, the method of inquiry that has led to our best physical theories, and the structure and interpretation of the theories themselves. Students take courses in deductive and inductive logic, the philosophy and history of physics, and quantum mechanics. The emphasis on careful argument makes this concentration useful for anyone who wishes to pursue a graduate degree in philosophy or law, or for other careers that employ both verbal and quantitative analysis.

**Requirements:**

Select one from the following:

LPS 40	The Nature of Scientific Inquiry
LPS 60	The Making of Modern Science
SOC SCI H1G	Honors: Critical Issues on the Social Sciences
LPS H125	What Is Time?
LPS H80	Scientific Realism and Instrumentalism

or another approved Campuswide Honors course

Select one of the following:

LPS 30	Introduction to Symbolic Logic
--------	--------------------------------

LPS 104	Introduction to Logic
LPS 105A- 105B- 105C	Elementary Set Theory and Metalogic and Undecidability and Incompleteness
MATH 150	Introduction to Mathematical Logic
Complete:	
LPS 31	Introduction to Inductive Logic
Select one from the following:	
LPS 104	Introduction to Logic
LPS 105A- 105B- 105C	Elementary Set Theory and Metalogic and Undecidability and Incompleteness
LPS 140	Topics in Philosophy of Science
MATH 150	Introduction to Mathematical Logic
Complete:	
PHYSICS 113B	Quantum Physics
Select three from the following:	
LPS 141A	Topics in Philosophy of Physics
LPS 141B	Geometry and Spacetime
LPS 141C	Philosophy of Quantum Mechanics
LPS 141D	Probability and Determinism
or other approved Philosophy of Physics course	

## Concentration in Physics Education

The **Physics Education concentration** is for students who plan a career in secondary education. An Education course, four general science courses, a research methods course, and two quarters of classroom experience complete the requirements for the concentration. Students are encouraged to take PHYSICS 191 (outreach).

### Requirements:

EDUC 55	Knowing and Learning in Mathematics and Science
PHY SCI 5	California Teach 1: Introduction to Science and Mathematics Teaching
PHY SCI 105	California Teach 2: Middle School Science and Mathematics Teaching
PHYSICS 193	Research Methods
Select four courses from the following:	
BIO SCI 1A	Life Sciences
BIO SCI 93	From DNA to Organisms
BIO SCI 94	From Organisms to Ecosystems
CHEM 1A- 1B- 1C	General Chemistry and General Chemistry and General Chemistry
EARTHSS 1	Introduction to Earth System Science
EARTHSS 7	Physical Geology
PHYSICS 20A- 20B	Introduction to Astronomy and Cosmology: Humanity's Place in the Universe

NOTE: With this concentration, a Secondary Teaching Certification option is available.

*Secondary Teaching Certification Option:* With *additional* course work and field experience offered through the UCI Cal Teach program, students who complete the concentration in Physics Education can also earn a California Preliminary Single Subject Teaching Credential. Completing the bachelor's degree, concentration, and teacher certification in four years is possible with careful, early planning. Additional courses required for teacher certification are:

LPS 60	The Making of Modern Science
EDUC 109	Reading and Writing in Mathematics and Science
EDUC 143AW	Classroom Interactions I
EDUC 143BW	Classroom Interactions II

EDUC 148	Complex Pedagogical Design <sup>1</sup>
EDUC 158	Student Teaching Mathematics and Science in Middle/High School (two quarters)

<sup>1</sup> Successful completion of EDUC 143AW-EDUC 143BW and EDUC 148 will be accepted in lieu of PHYSICS 125A and PHYSICS 194 for Cal Teach students.

For additional information about teacher certification requirements and enrollment procedures, see Preparation for Teaching Science and Mathematics. Interested students are strongly encouraged to contact the Cal Teach Resource and Advising Center or the Physical Sciences Student Affairs Office.

### Specialization in Astrophysics

The **Astrophysics specialization** is primarily taken by two types of students, those planning on going on to graduate school in astronomy or astrophysics and those planning to work in aeronautics or astrophysics-related industries or government research laboratories after receiving their bachelor's degree. It also is an excellent focus for students who anticipate careers in science journalism, teaching, science administration, or public relations. The course work includes:

A. Complete:

PHYSICS 61C	Introduction to Astrophysics
PHYSICS 139	Observational Astrophysics

B. Select three courses from the following:

PHYSICS 137	Introduction to Cosmology
PHYSICS 138	Astrophysics of Galaxies
PHYSICS 144	Stellar Astrophysics
PHYSICS 145	High-Energy Astrophysics

C. Two or more upper-division Physics courses. Of the Physics electives, students bound for graduate school are strongly advised to include:

PHYSICS 113B	Quantum Physics
PHYSICS 125B	Mathematical Physics

Other recommended electives include:

PHYSICS 116	Relativity and Black Holes
PHYSICS 134A	Physical and Geometrical Optics
PHYSICS 135	Plasma Physics
PHYSICS 136	Introduction to Particle Physics

Students preparing for graduate school in atmospheric science or physical oceanography should complete the minor in Earth and Atmospheric Sciences.

## Physics, Ph.D.

The Department offers and M.S. and a Ph.D. in Physics. These degrees are awarded in recognition of demonstrated knowledge of the basic facts and theories of physics and of a demonstrated capacity for independent research. Active programs of research are underway in particle physics, nanophysics, biophysics, medical physics, condensed matter physics, low-temperature physics, plasma physics, gravitational physics, astrophysics, and cosmology.

In general, graduate study in the physics Ph.D. program is expected to be a full-time activity. Other proposed arrangements should be approved by the Graduate Committee. The normative time for completion of the Ph.D. is six years of full-time study, and the maximum time permitted is seven years. Students may pursue the M.S. on either a full-time or part-time basis.

Complementing the formal courses, the Department offers regular colloquia and informal seminars. Graduate students are members of an intellectual community and are expected to participate fully in departmental activities. Attendance at colloquia is considered an essential part of graduate study. In addition, there are regular weekly research seminars in condensed matter, particle, and plasma physics, and astrophysics.

Sources of support available to graduate students include teaching assistantships, research assistantships, and fellowships. Students planning to pursue graduate work in Physics should visit the Physics Department website (<http://www.physics.uci.edu/>).

Students admitted into the graduate program in Physics and Astronomy may elect to pursue the M.S. or Ph.D. with a concentration in Chemical and Materials Physics, as described in a later section.

The principal requirements for the Ph.D. are a minimum of six quarters of residence, passage of a written and an oral examination, and successful completion and defense of a dissertation reporting results of original research. In addition, the Ph.D. candidate must complete certain graduate course requirements. There is no foreign language requirement.

### Course Requirements

Students are required to exhibit mastery of the basic sequences—Classical Mechanics, Electromagnetic Theory, Quantum Mechanics, Mathematical Physics, and Statistical Physics.

All courses must be passed with a grade of B or better.

Students who do not have a prior Master's degree (or other equivalent degree) in Physics from UCI or another institution must take a minimum of 11 quarter courses including:

PHYSICS 211	Classical Mechanics
PHYSICS 212A	Mathematical Physics
PHYSICS 213A	Electromagnetic Theory
PHYSICS 213B	Electromagnetic Theory
or PHYSICS 240C	Radiative Processes in Astrophysics
PHYSICS 214A	Statistical Physics
PHYSICS 215A- 215B	Quantum Mechanics and Quantum Mechanics

and select at least two other courses numbered between 200 and 259;

and select two other courses approved by the graduate advisor.

or

Students who have obtained a prior Master's degree (or other equivalent degree) in Physics from UCI or another institution:

Take a minimum of 4 quarter courses including: two courses numbered between 200 and 259 and two other courses approved by the graduate advisor. These students are strongly encouraged to take the qualifying exam in the Fall quarter of entrance.

Students are strongly encouraged to take PHYSICS 211, PHYSICS 212A, PHYSICS 213A, PHYSICS 214A, PHYSICS 215A-PHYSICS 215B, and either PHYSICS 213B or PHYSICS 240C in their first year of study. It is expected that students, having selected a research specialty, will ordinarily take the core courses in that subject in their second year of study. Students pursuing research in elementary particle physics ordinarily complete PHYSICS 234A-PHYSICS 234B-PHYSICS 234C and PHYSICS 235A-PHYSICS 235B during their second year. Students pursuing research in plasma physics ordinarily complete PHYSICS 239A during their first year and PHYSICS 239B-PHYSICS 239C their second year; PHYSICS 249 is also recommended. Students pursuing research in condensed-matter physics ordinarily take PHYSICS 238A-PHYSICS 238B-PHYSICS 238C

during their second year; PHYSICS 133 should be taken in the first year by those students who have not had an equivalent course. Students pursuing research in astrophysics/cosmology ordinarily complete PHYSICS 240A during spring of their first year; PHYSICS 240B, PHYSICS 240C in their second year; and one or more of PHYSICS 241B, PHYSICS 241C, PHYSICS 241D in their second or subsequent years. Students interested in medical imaging should take PHYSICS 233A-PHYSICS 233B-PHYSICS 233C in the second year. Students pursuing research in biological physics should take PHYSICS 230A-PHYSICS 230B in the second year. Students who have earned grades of B or better in equivalent graduate-level courses prior to entering UCI may be exempted from required courses by the graduate advisor. Equivalency will be determined by the instructor of each course for which an exemption is sought.

NOTE: The requirements for the Ph.D. with a concentration in Chemical and Materials Physics (ChAMP) differ from these and are outlined in a later section.

### Comprehensive Examination

Progress toward the degree is assessed by a written comprehensive examination covering a broad range of fundamentals of physics at the graduate and advanced undergraduate levels. It is offered twice a year, and a student is allowed a maximum of three attempts. The first attempt must occur before the end of the fall quarter of the student's second year, and the examination must be passed by the end of spring quarter of the student's second year.

### Advancement to Ph.D. Candidacy

For advancement to Ph.D. candidacy, a student must pass an oral advancement examination. It is typically taken within one year of successful completion of the comprehensive examination. To satisfy normative progress toward the degree, it must be taken by the end of the student's third year. The candidacy committee that administers this examination will contain one or two faculty members from outside the Department. This oral examination will cover material principally related to the broad and general features of the student's dissertation area.

### Teaching Program

Experience in teaching is an integral part of the graduate program, and all Ph.D. students are required to participate in the teaching program for at least one quarter during their graduate careers. All new teaching assistants are required to enroll in PHYSICS 269 and must pass in order to be allowed to TA in future quarters. Students are required to enroll in PHYSICS 399 while serving as a TA. Lab TAs are required to enroll in PHYSICS 395 as well as PHYSICS 399.

Students who are not citizens from countries where English is either the primary or dominant language as approved by the UCI Graduate Council must pass either the Test of Spoken English (TSE) or the UCI SPEAK (Speaking Proficiency English Assessment Kit) examination. One of these tests must be passed before such a student can qualify for a teaching assistantship in order to fulfill the Department's teaching requirement. The Department expects one of these tests to be passed by the end of the student's second year at UCI.

### Dissertation

A dissertation summarizing the results of original research performed by the student under the supervision of a doctoral committee, appointed by the Department Chair on behalf of the Dean of the Graduate Division and the Graduate Council, will be required for the Ph.D. A criterion for the acceptability of a dissertation by the Department is that it be suitable for publication in a scientific journal. The dissertation must not have been submitted to any other institution prior to its submission to the UCI Physics and Astronomy Department.

**Defense of Dissertation.** Upon completion of the dissertation, the student will take an oral examination, open to the public, before the doctoral committee.

### Concentration in Chemical and Materials Physics

This is an interdisciplinary program between condensed matter physics and physical chemistry, which is designed to eliminate the barrier between these two disciplines. Students with a B.S. in Physics, Chemistry, or Materials Science and Engineering, are encouraged to apply to the program. The goal of the concentration in Chemical and Materials Physics (ChAMP) is to provide students with a broad interdisciplinary education in the applied physical sciences that emphasizes modern laboratory and computational skills. The program accepts students for both the M.S. and the Ph.D. Upon admission to the program, students are assigned two faculty advisors, one from the Department of Physics and Astronomy, and one from the Department of Chemistry, to provide guidance on curriculum and career planning.

The curriculum for the M.S. and Ph.D. programs includes a summer session to assimilate students with different undergraduate backgrounds; formal shop, laboratory, and computational courses; a sequence on current topics to bridge the gap between fundamental principles and applied technology; and a course to develop communication skills. The required courses include 10 core courses and three electives (subject to advisor approval) as follows:

#### Core

A. Complete:

PHYSICS 206	Advanced Data Acquisition and Analysis
PHYSICS 207	Applied Physical Chemistry
PHYSICS 266	Current Topics in Chemical, Applied, and Materials Physics

B. Select one course from the following two Quantum Mechanics courses:

CHEM 231A	Fundamentals of Quantum Mechanics
-----------	-----------------------------------

PHYSICS 215A	Quantum Mechanics
C. Select one course from the following ChaMP Chemistry courses:	
CHEM 231B	Applications of Quantum Mechanics
CHEM 231C	Molecular Spectroscopy
CHEM 247	Current Problems in Analytical Chemistry
CHEM 263	Materials Chemistry
D. Select one course from the following Statistical Mechanics/Thermodynamics courses:	
CHEM 232A	Thermodynamics and Introduction to Statistical Mechanics
CHEM 232B	Advanced Topics in Statistical Mechanics
PHYSICS 214A	Statistical Physics
E. Select one course from the following Electromagnetism courses:	
PHYSICS 228	Electromagnetism
PHYSICS 213A	Electromagnetic Theory
F. Select one course from the following Computation/Machine Learning courses:	
PHYSICS 229A	Computational Methods
PHYSICS 246	Special Topics in Astrophysics
CHEM 250	Computational Chemistry
G. Select one course from the following Communication courses:	
PHYSICS 273	Technical Communication Skills
PHY SCI 220	Science Communication Skills
PHYSICS 250	Physics and Astronomy Communications Skills
H. Select one course from the following ChaMP Physics courses:	
PHYSICS 133	Introduction to Condensed Matter Physics
PHYSICS 238A	Condensed Matter Physics
PHYSICS 239A	Plasma Physics
<b>Electives</b>	
CHEM 213	Chemical Kinetics
CHEM 225	Polymer Chemistry: Synthesis and Characterization of Polymers
CHEM 232C	Non-Equilibrium Statistical Mechanics
CHEM 233	Nuclear and Radiochemistry
CHEM 243	Advanced Instrumental Analysis
CHEM 248	Electrochemistry
CHEM 249	Analytical Spectroscopy
CHEM 267	Photochemistry
EECS 285B	Lasers and Photonics
ENGRMSE 259	Transmission Electron Microscopy
PHYSICS 134A	Physical and Geometrical Optics
PHYSICS 211	Classical Mechanics
PHYSICS 215B	Quantum Mechanics
PHYSICS 222	Continuum Mechanics
PHYSICS 230A	Biophysics of Molecules and Molecular Machines
PHYSICS 230B	Biophysics of Molecules and Molecular Machines
PHYSICS 233A	Principles of Imaging
PHYSICS 233B	Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging
PHYSICS 238B	Condensed Matter Physics
PHYSICS 238C	Condensed Matter Physics
PHYSICS 239B	Plasma Physics
PHYSICS 239C	Plasma Physics
Electives may be chosen from other courses with the approval of the student's research advisor and ChaMP graduate advisor.	

In addition to the required courses, M.S. students complete a master's thesis. Students are required to advance to candidacy for the master's degree at least one quarter prior to filing the master's thesis. There is no examination associated with this advancement, but the thesis committee needs to be

selected and appropriate forms need to be filed. The M.S. program prepares students to compete for high-tech jobs or to begin research toward a Ph.D. The master's thesis requirement is waived for students who complete the requirements for advancement to Ph.D. candidacy.

Successful completion of the M.S. requirements may qualify students for the Ph.D. program. Progress toward the Ph.D. is assessed by a written comprehensive examination that is typically administered in the summer after completion of the first year of study. This examination covers comprehensive knowledge acquired in course work, and the content of the examination depends upon the student's specific area of interest.

Participants in the Ph.D. program take an examination for formal advancement to candidacy. It is typically taken within one year of successful completion of the comprehensive examination. To satisfy normative progress toward the degree, it must be taken by the end of the student's third year. The examination is comprised of two parts: (a) a written report on a topic to be determined in consultation with the research advisor and (b) an oral report on research accomplished and plans for completion of the Ph.D. dissertation.

## Concentration in Astronomy and Astrophysics

This program is focused on astronomical and astrophysical study and research. The course requirements are matched to excel in these disciplines. Students with a B.S. in Physics, Mathematics, Engineering, or other Physical Sciences are encouraged to apply to the program. The goal of the concentration in Astronomy and Astrophysics (A&A) is to provide students with a broad interdisciplinary education in the astronomical sciences that emphasizes modern computational and data analysis skills. The program accepts students for both the M.S. and the Ph.D. studies.

### Requirements for the M.S.

The curriculum includes traditional astronomical courses; computational and data analysis courses; a research writing course to develop skills related to astronomical research and communication. The students are required to exhibit mastery of key concepts and demonstrate a clear understanding of astrophysical concepts.

#### A. Complete:

PHYSICS 215A	Quantum Mechanics
PHYSICS 213A	Electromagnetic Theory
PHYSICS 240C	Radiative Processes in Astrophysics
PHYSICS 242	Astro Fundamentals
PHYSICS 250	Physics and Astronomy Communications Skills

#### B. Select six courses from the following list of electives, with at least two courses from PHYSICS 240A-PHYSICS 241E:

PHYSICS 211	Classical Mechanics
PHYSICS 214A	Statistical Physics
PHYSICS 215B	Quantum Mechanics
PHYSICS 223	Numerical Methods
PHYSICS 234A	Elementary Particle Physics
PHYSICS 234B	Advanced Elementary Particle Physics
PHYSICS 235A	Quantum Field Theory
PHYSICS 235B	Advanced Quantum Field Theory
PHYSICS 239A	Plasma Physics
PHYSICS 240A	Galactic Astrophysics
PHYSICS 240B	Cosmology
PHYSICS 241A	Solar System and Extrasolar Planets
PHYSICS 241B	Stellar Astrophysics
PHYSICS 241C	Extragalactic Astrophysics
PHYSICS 241D	Early Universe Physics
PHYSICS 255	General Relativity

#### C. Select Option A or Option B below:

##### Option A

Research project and written thesis (three quarters)	
PHYSICS 295	Experimental Research
or PHYSICS 296	Theoretical Research

##### Option B

Comprehensive examination in the astronomy and astrophysics concentration

Three quarters of residence are required.

Students interested in astro-particle physics, theoretical cosmology, and early universe physics are advised to take PHYSICS 215B as the first elective during the winter quarter of first year of study. More advanced electives can be chosen in consultation with the Program Director and/or research advisor.

Students interested in observational astronomy and experimental cosmology are advised to take the astronomy series beginning with either PHYSICS 240A and PHYSICS 241C. More advanced electives can be chosen in consultation with the Program Director and/or research advisor.

### Requirements for the Ph.D.

The principal requirements for the Ph.D. are a minimum of six quarter of residence, passage of a written and an oral examination, and successful completion and defense of a dissertation reporting results of original research. In addition, the Ph.D. candidate must complete certain graduate course requirements. There is no foreign language requirement.

Students who do not have a prior Master's degree (or other equivalent degree) in Physics or Astronomy from UCI or another institution must take a minimum of 11 quarter courses. The required courses include five core courses and six electives as follows:

#### A. Complete:

PHYSICS 215A	Quantum Mechanics
PHYSICS 213A	Electromagnetic Theory
PHYSICS 240C	Radiative Processes in Astrophysics
PHYSICS 242	Astro Fundamentals
PHYSICS 250	Physics and Astronomy Communications Skills

#### B. Select six courses from the following, with at least two courses from PHYSICS 240A-PHYSICS 241E

PHYSICS 211	Classical Mechanics
PHYSICS 214A	Statistical Physics
PHYSICS 215B	Quantum Mechanics
PHYSICS 223	Numerical Methods
PHYSICS 234A	Elementary Particle Physics
PHYSICS 234B	Advanced Elementary Particle Physics
PHYSICS 235A	Quantum Field Theory
PHYSICS 235B	Advanced Quantum Field Theory
PHYSICS 239A	Plasma Physics
PHYSICS 240A	Galactic Astrophysics
PHYSICS 240B	Cosmology
PHYSICS 241A	Solar System and Extrasolar Planets
PHYSICS 241B	Stellar Astrophysics
PHYSICS 241C	Extragalactic Astrophysics
PHYSICS 241D	Early Universe Physics
PHYSICS 255	General Relativity

Three quarters of residence are required. All courses must be passed with a B or better.

Students interested in astroparticle physics, theoretical cosmology, and early universe physics are advised to take PHYSICS 215B as the first elective during the winter quarter of the first year of study. More advanced electives can be chosen in consultation with the Program Director and research advisor.

Students interested in observational astronomy and experimental cosmology are advised to take the astronomy series beginning with either PHYSICS 240A or PHYSICS 241C. More advanced electives can be chosen in consultation with the Program Director and research advisor.

Progress toward the Ph.D. is assessed by a comprehensive examination usually taken during the second year of studies. The comprehensive examination covers broad knowledge in astronomy and astrophysics, based on a written project of a topic in astronomy and astrophysics chosen by the Program Director in consultation with the Departmental Committee on Astrophysics Qualifying Exam, and an oral examination of the written document by a committee.

Participants in the Ph.D. program also take an examination for formal advancement to candidacy. It is typically taken within one year of successful completion of the comprehensive examination. To satisfy normative progress toward the degree, it must be taken by the end of the student's third year. The examination is an oral report on research accomplished and plans for completion of the Ph.D. dissertation.

# School of Social Ecology

## Nancy Guerra, Dean

5300 Social & Behavioral Sciences Gateway  
 Undergraduate Student Services: 949-824-6861  
 Graduate Student Services: 949-824-5918  
<http://socialecology.uci.edu/>

The School of Social Ecology is an academic unit committed to solving important social and environmental problems through interdisciplinary, community-engaged scholarship. Just as the field of ecology focuses on the relationships between organisms and their environments, social ecology is concerned with the relationships between humans and their environment. A key premise is that complex problems can only be understood by considering how people impact and are impacted by the multiple contexts they navigate. These contexts include families, schools, social networks, the workplace, culture, communities and the environment.

Faculty and students in the School of Social Ecology apply scientific methods to the study of a wide array of pressing issues. These issues cluster into three primary research hubs: Healthy People and Places; Crime Prevention and Social Justice; and Technology and Human Potential. Specific problems addressed cover a broad range of topics including stress and coping, the effects of trauma on children and adults, healthy aging, flood risk management, poverty alleviation, sustainable cities, juvenile justice and correctional reform, eyewitness testimony, jury decision making, youth violence and delinquency prevention, policing, crime mapping, and the impact of social media on children's lives.

The School is home to three academic departments: Criminology, Law and Society; Urban Planning and Public Policy; and Psychological Science; offers five undergraduate and nine graduate degrees; and has approximately 2700 undergraduate majors, 400 graduate students, 77 faculty, and more than 24,000 alumni. Although faculty are affiliated with an academic department, they are trained in a broad range of disciplines including anthropology, criminology, environmental studies, law, political science, psychology, public policy, sociology, and urban planning. Their research and teaching is distinguished by an emphasis on the integration of the concepts and perspectives from these multiple disciplines. This interdisciplinary focus is based on the School's core belief that the analysis and amelioration of complex societal problems requires coordinated efforts from several disciplines.

The School of Social Ecology is a leader in community-engaged scholarship, not only in Southern California, but around the United States and internationally. Undergraduates are afforded opportunities to engage in laboratory-based learning as well as field-based learning through the School's well-established and highly regarded Field Study Program that includes local, regional, national and international placement opportunities. Graduate training in the School of Social Ecology is organized around the study of contemporary problems and their solutions in the social and physical environment. Emphasis is placed upon theory and research that have implications for policy and intervention. Graduate students work closely with faculty in the classroom, in laboratories, and in the field on important projects that enhance their research skills while advancing knowledge and finding solutions to important societal problems.

## Research Facilities

Social Ecology I and II and the nearby Social & Behavioral Sciences Gateway building are wireless environments that feature experimental research facilities for studying social phenomena such as parent-child interaction, prosocial behavior, memory functions, stress and health, social support processes, and mock jury discussions. The School also operates wet laboratory facilities to support innovative research in the field of salivary bioscience, as well as behavioral assessment laboratories. Students take advantage of up-to-date computing facilities and assistance to ensure that their skills prepare them for either advanced study or for the changing needs of today's workplace.

## Centers for Research

The **Institute for Interdisciplinary Salivary Bioscience Research (IISBR)** pushes the cutting edge of knowledge related to the discovery and application of oral fluid (saliva) as a research and diagnostic specimen. Specific aims are to: (a) incorporate the measurement of indicators found in oral fluids into research—developmental, social, behavioral, health, clinical, prevention, and rehabilitative sciences—and determine whether understanding in those areas can be advanced using unique, minimally invasive measurements of biological systems through saliva; (b) open windows of opportunity for researchers in economics, psychology, sociology, anthropology, gerontology, nursing, social work, preventive medicine, medicine, occupational science, sports medicine, psychiatry, and neuroscience among others, and (c) serve as a world stage for investigators to meet, discuss, and refine their ideas

about the role of saliva as a research and diagnostic specimen. Researchers from universities and institutions across the country and internationally collaborate with IISBR. More information is available at the Institute for Interdisciplinary Salivary Bioscience Research website (<https://iisbr.uci.edu/>).

The **Center for Evidence-Based Corrections (CEBC)** has administered millions of dollars in state-funded research on juvenile and adult correctional programs, including research on rehabilitation, parole and reentry programs, monitoring of sex offenders, and correctional options for female offenders. CEBC, which consists primarily of Criminology, Law and Society faculty, is a nexus for policy-oriented research and graduate training. CEBC is also developing close ties with UCI's School of Law. More information is available at the Center for Evidence-Based Corrections website (<http://ucicorrections.seweb.uci.edu/>).

The **Blum Center for Poverty Alleviation** was founded as part of a system-wide consortium that began with the Blum Center for Developing Economies at UC Berkeley, and now includes all ten of the University of California campuses. This federation of Blum Centers is united by the idea that world-class universities must play a leadership role in tackling the world's most daunting challenge – poverty. UCI's Blum Center undertakes collaborative interdisciplinary research focused on understanding and alleviating the contemporary challenges of low-resource communities. It also has developed innovative courses to introduce students to the many dimensions of poverty in the 21st century and to provide them with opportunities to make meaningful contributions to alleviating poverty at home and abroad. The School of Social Ecology works collaboratively with the UCI Division of Teaching & Learning to support Blum Center activities. More information is available at the UCI Blum Center website (<http://blumcenter.uci.edu/>).

The **Newkirk Center for Science and Society** develops and shares research knowledge with the public and policymakers so they can make informed decisions on vital policy issues of law, education, environment, health care, crime, and public infrastructure. The Center carries out its mission in several ways: through workshops, colloquia, town hall meetings, distinguished visitors, and communication programs. One area in which the interests of several faculty members overlap with the focus of the Newkirk Center relates to expert testimony and, more broadly, the use (and misuse) of science in legal proceedings. More information is available at the Newkirk Center for Science and Society website (<http://newkirkcenter.uci.edu/>).

The **Center for Psychology and Law (CPL)** draws together faculty from the Department of Criminology, Law and Society and the Department of Psychological Science. UC Irvine is one of the world's leading centers for research in the field of psychology and law. The Center's primary goals are to foster collaboration and communication among academics, legal professionals, policy makers, and the general public, and to address areas of inquiry where social sciences and legal systems intersect. CPL's mission is to bridge the gap between scientific evidence and public policy. More information is available at the Center for Psychology and Law website (<http://psychlaw.soceco.uci.edu/>).

The **Center in Law, Society and Culture (CLSC)** brings together faculty in the Schools of Social Ecology, Social Sciences, and Humanities who share an interest in the role of social, cultural, and historical factors in the development of law and the importance of social and cultural assumptions in understanding and interpreting law. Law and culture has emerged as an exciting area of legal scholarship and UC Irvine has significant strength in this area. More information is available at the Center in Law, Society, and Culture website (<http://clsc.soceco.uci.edu/>).

**Water UCI** serves as a coordinating vehicle to facilitate seamless collaboration across schools, departments, and existing research centers around questions of fundamental and applied water science, technology, management, and policy. Water UCI builds on existing campus-wide strengths by affording a plan for responding to the many "grand challenges" facing water resources, and for which UCI is well-equipped. More information is available at the Water UCI website (<http://water.uci.edu/>).

## In the Community

**UCI Engage** embodies our campus commitment to being a great partner by supporting campus-community partnerships that align the resources and expertise of our world-class university with the knowledge and strengths of our local communities. It serves as a campuswide hub to support, amplify, and celebrate civic and community engagement and to foster partnerships that are collaborative, empowering, and transformative. Core activities include coordinating and communicating campus engagement activities on- and off-campus, building capacity among campus and community partners to fuel meaningful engagement, and supporting and fostering emerging collaborations. More information is available at the UCI Engage website (<https://engage.uci.edu/>).

The School of Social Ecology was the first school on campus to require community engagement as a key component of undergraduate education through its signature **Field Study** program. Through direct participation in a community organization, Field Study students develop their communication, critical thinking, analytical, methodological, professional, technological, and interpersonal skills. These tools prepare students to be the leaders of tomorrow as they tackle the pressing issues confronting business and community leaders locally, regionally, nationally, and globally. The **Field Study** requirement for students seeking a baccalaureate degree from the School of Social Ecology or in Environmental Science and Policy (ENSP) may be fulfilled in a number of ways including: Traditional Field Study (SOCECOL 195), Field Study Writing Seminar (SOCECOL 195W), a year-long Advanced Field Study (SOCECOL 195A-SOCECOL 195B-SOCECOL 195CW), the UC Capital Intern Programs in Sacramento and Washington DC, and the Blum Center/Living Peace/Social Ecology Global Service Scholars (GSS) program (PSCI 192B, SOCECOL 189 along with an summer international service trip). *Important note for ENSP students: The GSS program is not an option for satisfying the Field Study requirement for ENSP majors. If ENSP students are interested in the program, they are strongly encouraged to meet with an academic counselor to incorporate the program into their academic plan.* More information is available at the Field Study Program website (<https://fieldstudy.soceco.uci.edu/>).

The **Metropolitan Futures Initiative (MFI)** aims to develop an improved understanding of communities and their potential for integrative and collaborative planning and action to ensure a bright future for the region. With initial focus on Orange County and its location within the larger Southern California area, the MFI is a commitment to build communities that are economically vibrant, environmentally sustainable, and socially just by partnering

Social Ecology's world-class, boundary-crossing scholarship with expertise throughout Southern California. More information is available at the Metropolitan Futures Initiative site (<http://socialecology.uci.edu/mfi/>).

## Honors, Awards, and Scholarships

### Social Ecology Honors Program

The Social Ecology Honors Program provides the opportunity for selected School of Social Ecology students to pursue advanced independent study. Students may apply in the spring quarter of their junior year. In order to be considered, a student must have satisfied the following requirements: completion of all lower-division Social Ecology courses required for the major; completion of at least five upper-division Social Ecology courses with a grade point average of at least 3.5 in these courses; and achievement of an overall grade point average at UCI of at least 3.2. Acceptance into the program is based upon evidence of the student's ability, interest in research, proposed thesis project and support from a faculty mentor. Successful completion of the program requires three quarters, including supervised independent work on a thesis research project (SOCECOL H190A-SOCECOL H190B) and written and oral presentation of an honors thesis (SOCECOL H190W).

### Excellence in Research in Social Ecology

High-achieving students majoring in the School of Social Ecology can earn Excellence in Research in Social Ecology by participating in a two-part program consisting of faculty-supervised research in the junior and senior years and courses in methodology and statistics. To be eligible for the program, students must have earned an overall 3.2 UC GPA in their junior year, with grades of B or above in the required methodology and statistics courses (SOCECOL 10, SOCECOL 13, SOCECOL 111W, and SOCECOL 190). Students will work with a faculty mentor during at least one quarter by the end of their junior year in PSCI 196 or SOCECOL 198 or SOCECOL 199. Successful completion of the program also requires faculty-mentored Honors research (SOCECOL H190A-SOCECOL H190B) and completion of a senior research thesis or a report at a research conference (SOCECOL H190W). Students who have successfully completed all requirements may submit applications for the Excellence in Research in Social Ecology distinction in the spring quarter of their senior year.

**Graduation with Latin Honors.** Latin Honors at graduation will be awarded to approximately 16 percent of the graduating seniors based on units completed and GPA. To be eligible, students must have completed at least 72 units at a UC campus by the end of the final quarter prior to graduation. Approximately 2 percent of all majors will graduate summa cum laude, 4 percent magna cum laude, and 10 percent cum laude. The student's cumulative record at the end of the final quarter is the basis for consideration for awarding Latin Honors. For more information about Latin Honors criteria contact the Social Ecology Student Services Office at 949-824-6861 or visit the Social Ecology website (<http://students.soceco.uci.edu/pages/frequently-asked-questions-faqs/>). Other important factors are also considered and can be reviewed at Honors Recognition.

**Dean's Honor List.** Quarterly recognition for students who earned a 3.5 grade point average while carrying a minimum of 12 graded units. Quarterly recognition is noted on the student's transcript.

**Dean's Award for Community Engagement.** This award recognizes highly-engaged students who demonstrate both scholarly achievement and community service participation.

**Fudge Family Foundation Scholarship.** Two scholarships are awarded to outstanding students who have a strong academic record and who have established financial need because they are self-supporting or have other personal hardships that would make it difficult for them to complete their studies without this assistance.

**School Awards.** The School of Social Ecology recognizes the most outstanding undergraduate and graduate students for their academic achievements, contributions to the School, and service to the campus and community.

**Excellence in Undergraduate Research Award in Honor of Gilbert Geis.** This award encourages and supports undergraduate students who excel in research related to Criminology, Law and Society.

**Michelle Smith Pontell Memorial Fellowship.** This award is given annually to a graduate student in the Department of Criminology, Law and Society for excellence in both research and course work.

**Excellence in Field Study.** This award recognizes students who have gone above and beyond in their field study placements or who have completed an exceptional academic project as part of their field study.

**Dean's Award for Exceptional Achievement in Field Study.** This award recognizes the top one or two students who made exceptional contributions to their field study community partner and excelled in the field study course.

**Strauss Scholarship.** This scholarship is awarded to an outstanding junior who has been active in service and is planning for a career in public service.

- Department of Criminology, Law and Society
- Department of Psychological Science
- Department of Urban Planning and Public Policy

## Requirements for the Bachelor's Degree

All students must meet the University Requirements.

### School Requirements

A. Basic knowledge and fundamental concepts of the core disciplines in Social Ecology. This requirement is met by taking an introductory course from each of the disciplines below, three courses total.

1. Criminology, Law and Society - complete:

CRM/LAW C7	Introduction to Criminology, Law and Society
------------	--

2. Psychological Science - select one from the following:

PSCI 9	Introduction to Psychology
PSCI 11B	Psychology Fundamentals
PSCI 11C	Psychology Fundamentals

3. Urban Planning and Public Policy - select one from the following:

UPPP 4	Introduction to Urban Studies
UPPP 5	Introduction to Urban Planning and Policy
UPPP 8	Introduction to Environmental Analysis and Design

B. An understanding of fundamental concepts, analytical tools, and methods of Social Ecology - complete:

SOCECOL 10	Research Design <sup>1</sup>
------------	------------------------------

SOCECOL 13	Statistical Analysis in Social Ecology <sup>2</sup>
------------	---

C. An understanding of the complex and multifaceted perspectives and approaches to examining social issues where they occur, coupled with developing interpersonal and professional skills. This is satisfied through completing a minimum of 4 units (100 hours) of field study. Students may select to fulfill this requirement through one of the following:

SOCECOL 195	Field Study
SOCECOL 195W	Field Study Writing Seminar
SOCECOL 195B	Advanced Field Study
SOCECOL 195CW	Advanced Field Study
PUBHLTH 195W	Public Health Practicum and Culminating Experience
UC Washington, D.C. (UCDC) Academic Internship Program (see Field Study website for more information. Specific coursework required)	
UC Center Sacramento Academic Internship Program (see Field Study website for more information. Specific coursework required)	
PSCI 192B-SOCECOL 189	The Science and Practice of Compassion and Global Service Scholars Advanced Seminar (plus confirmed 100 hours of international service)

E. One additional upper-division course

One additional upper-division course (four units) chosen from any department in the School of Social Ecology or an additional four units of SOCECOL 195 or SOCECOL 195W, SOCECOL 195B and SOCECOL 195CW. <sup>3</sup>

<sup>1</sup> The following course is an approved alternative for SOCECOL 10: EDUC 10.

<sup>2</sup> The following statistic courses are approved alternatives for SOCECOL 13: EDUC 15, STATS 7, STATS 8, STATS 67, ENGRCEE 11, MGMT 7, PUBHLTH 7B, ANTHRO 10C, ECON 15B, POL SCI 10C, PSYCH 10C, SOC SCI 10C, SOCIOL 10C.

<sup>3</sup> SOCECOL 198 and SOCECOL 199 may not be used to fulfill this requirement.

### School requirements for Psychological Science majors:

A. Basic knowledge and fundamental concepts of the core disciplines in Social Ecology. This requirement is met by taking an introductory course from each of the disciplines below, three courses total.

1. Criminology, Law and Society - complete:

CRM/LAW C7	Introduction to Criminology, Law and Society
------------	--

2. Urban Planning and Public Policy - select one of the following:

UPPP 4	Introduction to Urban Studies
UPPP 5	Introduction to Urban Planning and Policy
UPPP 8	Introduction to Environmental Analysis and Design

B. An understanding of fundamental concepts, analytical tools, and methods of Social Ecology. Two courses total:

SOCECOL 10	Research Design <sup>4</sup>
------------	------------------------------

SOCECOL 13	Statistical Analysis in Social Ecology <sup>5</sup>
------------	---

C. An understanding of the complex and multifaceted perspectives and approaches to examining social issues where they occur, coupled with developing interpersonal and professional skills. This is satisfied through completing a minimum of 4 units (100 hours) of field study. Students may select to fulfill this requirement through one of the following:

SOCECOL 195	Field Study (four units)
SOCECOL 195W	Field Study Writing Seminar
SOCECOL 195B	Advanced Field Study
SOCECOL 195CW	Advanced Field Study
PUBHLTH 195W	Public Health Practicum and Culminating Experience
UC Washington, D.C. (UCDC) Academic Internship Program (see Field Study website for more information. Specific coursework required)	
UC Center Sacramento Academic Internship Program (see Field Study website for more information. Specific coursework required)	
PSCI 192B-SOCECOL 189	The Science and Practice of Compassion and Global Service Scholars Advanced Seminar (plus confirmed 100 hours of international service)

<sup>4</sup> The following course is an approved alternative for SOCECOL 10: EDUC 10.

<sup>5</sup> The following statistic courses are approved alternatives for SOCECOL 13: EDUC 15, STATS 7, STATS 8, STATS 67, ENGRCEE 11, MGMT 7, PUBHLTH 7B, ANTHRO 10C, ECON 15B, POL SCI 10C, PSYCH 10C, SOC SCI 10C, SOCIOL 10C.

### Departmental Requirements: Refer to individual departments.

#### Grade Requirement

A minimum grade average of at least C (2.0) is required (1) overall; (2) in all courses required for the major program, including the School requirements; and (3) in the upper-division courses required for the major.

#### Overlap Restrictions

**Double Majors.** In order to double major within the School of Social Ecology, major requirements must be met for both majors without any overlap of upper-division courses.

**Other Double Majors.** In fulfilling degree requirements for multiple majors, a maximum of two courses may overlap between any two majors.

**Major and Minor Requirements:** In fulfilling minor requirements, a maximum of two courses may overlap between a major and a minor. No course overlap is permitted between minors.

- Criminology, Law and Society, B.A.
- Criminology, Law and Society, Master of Advanced Study
- Criminology, Law and Society, Minor
- Criminology, Law and Society, Ph.D.
- Master of Legal and Forensic Psychology
- Master of Public Policy
- Master of Urban and Regional Planning
- Psychological Science, B.A.
- Psychological Science, Minor
- Psychological Science, Ph.D.
- Race and Justice Studies, Graduate Emphasis
- Social Ecology, B.A.
- Social Ecology, Minor
- Social Ecology, Ph.D.
- Urban and Environmental Planning and Policy, Ph.D.
- Urban and Regional Planning, Minor
- Urban Studies, B.A.
- Urban Studies, Minor

---

## Undergraduate Program

The School of Social Ecology offers either a general interdisciplinary degree in Social Ecology or a more focused course of study through degree programs in Criminology, Law and Society; Environmental Science and Policy; Psychological Science; and Urban Studies.

**Change of Major.** Students who wish to change their major to one offered by the School should contact the Social Ecology Undergraduate Advising Office for information about change-of-major requirements, procedures and policies. Information is also available at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu>).

## Career Opportunities

Graduates of the School of Social Ecology bring a distinctive interdisciplinary perspective to the job market. Students graduate with a wealth of knowledge as well as marketable skills in communication, leadership, critical-thinking, and problem-solving. The School provides an excellent foundation for those students who seek jobs in social services, planning departments, mental health settings, educational institutions, and a variety of community and governmental agencies. Many Social Ecology students find that their interdisciplinary training also is useful for careers in public management, law, consulting, and business.

Through its dynamic courses and signature Field Study program, the School of Social Ecology provides useful preparation for students who wish to apply to graduate and professional schools and programs of law, public policy/public administration, public health, social work, psychology, sociology, criminology, sociolegal studies, environmental studies, and urban planning.

The Division of Career Pathways provides services to students and alumni including career counseling, information about job opportunities, a career library and workshops on resume preparation, job search, and interview techniques.

## Field Study

Field Study is the signature program of the School of Social Ecology. All majors within the School, along with Environmental Science and Policy majors, participate in the program, which is designed to provide students with the opportunity to examine social problems first-hand and apply theories and empirical findings learned in courses, effectively serving our communities and enhancing the value of their education. The Field Study program is a unique experiential learning program and a key element of the School's commitment to fostering civic engagement and training future leaders.

Field Study promotes community engagement to facilitate civic education through field research experience, social intervention and professionalization. This aim is based on evidence that learning is maximized when it is active, when students are engaged and when theories and research are informed by their application to "real world" problems and solutions. Students reflect on how to apply what they have learned in their courses to address societal and global challenges in a seminar led by ladder rank faculty. At the same time, through placements with one or more of the School's 225-plus community partners, students gain pre-professional experience and develop their resume along with their academic and research skills. The settings provided for field study include a wide range of problem-oriented institutions and agencies in the non/not for-profit, public and private sectors.

Within Social Ecology, students may pursue one of three options to meet the Field Study requirement: Field Study (traditional/quarterly), Field Study Writing Seminar (quarterly/also fulfills upper division writing), Advanced Field Study (full academic year), or Global Service Scholars (two academic courses, followed by a global service trip). Environmental Science and Policy majors may choose from either Field Study (traditional/quarterly), Field Study Writing Seminar (quarterly/also fulfills upper division writing), or Advanced Field Study (full academic year)

**Traditional Field Study.** In SOCECOL 195, students participate in day-to-day activities with a community partner selected from those listed and approved by the School of Social Ecology. Students have the opportunity to participate in the ongoing activities of an organization and develop personal, professional, and technical competencies. While completing their 100 hours at a community-based placement, students meet in a small group seminar with a faculty member to discuss the issues in the field and to develop a project to apply and hone their scholarship. Students may opt to fulfill upper-division writing through taking SOCECOL 195W, similar to SOCECOL 195, but with a strong emphasis on developing writing skills.

**Advanced Field Study** ( (<http://catalogue.uci.edu/search/?P=SOCECOL%20195A>)SOCECOL 195A, SOCECOL 195B, SOCECOL 195CW) provides a select number of School of Social Ecology students and Environmental Science and Policy major juniors and seniors with a deeper engaged learning experience over the course of an academic year (three quarters, October - June). During this time they are placed with an agency for 10 hours/week. In addition to working with their agency on day-to-day services and operations, they also engage in variety of activities in collaboration with their agency. These may include conducting research that enhances the work of the organization, developing new activities or programs, working intensively with clients, engaging in outreach and community organization, participating in organizational development and advancement efforts, and more. The third quarter of the AFS year is designated as satisfying the UCI upper division writing requirement for undergraduates. With that in mind, students will, in addition to the work they do with their community partner, produce an analytical and reflective paper that distills the lessons they have learned from their

community placement and, in the process, hones and deepens their writing skills. Students whose work includes original research may be selected to share their work at the UCI Undergraduate Research Symposium held during the spring quarter.

**Global Service Scholars:** Building upon the Field Study program, this multi-part program offers students a unique opportunity to make a difference in the world by learning to approach issues with empathy and compassion. Through classroom work (PSCI 192B and SOCECOL 189) and a service trip abroad, students tackle poverty problems and bring their ingenuity to those in need. When they return to campus, they share their experience through participating in the classroom portion of field study. Funding for this program is provided in large part by the Living Peace Foundation and the UCI Blum Center for Poverty Alleviation. To keep the costs neutral for students, additional funds may be available, based on financial need, to cover airfare, housing expenses and program fees. Not approved for Environmental Science and Policy (ENSP). ENSP students interested in Global Service Scholars are encouraged to meet with an advisor on the field study team to discuss further.

In addition to the school-sponsored programs, students may fulfill the field study requirement through participation in one of the following programs: Public Health Practicum, UCDC Summer and Academic Internship Programs, UC Sacramento Summer and Academic Internship Programs. Students pursuing these programs should seek advising prior to enrolling in the programs.

Field Study embodies the School's commitment to engaged scholarship, developing interdisciplinary approaches to social problems, and improving and making positive and lasting contributions to communities. Unlisted or inappropriate placements, as well as those that could give the appearance of nepotism or preferential treatment, will not be approved. Departmental approval for field study will be determined by the Field Study Director. Further information, including field study sign-up procedures and prerequisites, program applications, and placement opportunities is available at the Field Study Program website (<http://fieldstudy.soceco.uci.edu/>).

## Planning a Program of Study

Because there are many alternative ways to plan a program, some of which may require careful attention to specific major requirements, students should consult with the Social Ecology Undergraduate Advising Office, 143 Social Ecology I, to design an appropriate program of study.

Students who elect one of the majors in the School of Social Ecology in their freshman year might begin by taking the introductory courses required by their major. It is a good idea to take these courses early because they include fundamental concepts that are widely applicable in more advanced courses. In addition, the lower-division writing requirement of the general education requirement (category I) should be completed during the first year. In the sophomore year, the student might complete three courses toward the general education requirement, four courses in their major, and four electives. Students who are planning to go on to graduate school can use their freshman and sophomore years to advantage by taking courses in theory, research methods, statistics and other areas important to graduate study. In the junior and senior years, the student should take courses in the major area and should create an individualized program of study through a combination of courses and course modules that fall in an area of interest. Particular attention should be paid to planning a program of study that will ensure that major requirements are met prior to graduation. In the plan, students should include core courses for their major in their junior or early in their senior year. Students should fully familiarize themselves with the Field Study requirements and options by the middle of their junior year to position themselves to find an opportunity that is best suited to them. Students are encouraged to consider one of the many options for enriching their education through intensive involvement in research and/or community engagement through, for example, the Social Ecology Honors, Excellence in Research, and Field Study Programs.

## Additional Curricular Options

Students in the School of Social Ecology may combine their course work with the following University programs and should consult an academic counselor for further information.

### Campuswide Honors Collegium

The Campuswide Honors Collegium is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campuswide Honors Collegium, 1200 Student Services II; 949-824-5461; [honors@uci.edu](mailto:honors@uci.edu); or visit the Campuswide Honors Collegium website (<http://www.honors.uci.edu/>).

### School of Education

Students who plan to obtain a teaching credential or a higher degree in the field of education should consult with counselors in the UCI School of Education early in their college career. Students completing a degree program in the School of Social Ecology may qualify for a waiver of the Single Subject Credential Examination. For additional information about teaching credentials, refer to the School of Education section.

### UC Education Abroad Program

Upper-division students have the opportunity to experience a different culture while making progress toward degree objectives through the UC Education Abroad Program (EAP). UCEAP is an overseas study program which operates in cooperation with host universities and colleges in countries throughout the world. Visit the Study Abroad Program website (<http://www.studyabroad.uci.edu/>) for additional information.

### Interdisciplinary Minors

These minors are available to all UCI students. Information is available in other sections of the *Catalogue*, as noted.

The **minor in Civic and Community Engagement** seeks to provide students with the knowledge, skills, attitudes and values to engage as citizens and active community members in the 21st century. The minor is distinguished both by *what* students learn, and by *how* they learn it. See the Interdisciplinary Studies section for information.

The **minor in Global Sustainability** trains students to understand the changes that need to be made in order for the human population to live in a sustainable relationship with the resources available on this planet. See the Interdisciplinary Studies section for information.

The **minor in Native American Studies** is an interdisciplinary, interschool program which focuses on history, culture, religion and the environment. See the Interdisciplinary Studies section for information.

## Graduate Programs

Graduate training is organized around the strengths of the School of Social Ecology's individual departments (Criminology, Law and Society; Psychological Science; Urban Planning and Public Policy). The graduate curriculum in Social Ecology is distinguished by its interdisciplinary orientation both within and between departments. Students are trained to integrate the knowledge offered by traditional academic fields in order to examine important social, legal, and environmental problems from a perspective of breadth as well as depth. Faculty and graduate students share a commitment to study contemporary problems in the social and physical environments and to pursue empirically-based solutions to these problems. Problems and solutions are investigated from the complementary perspectives of a multidisciplinary faculty that include specialists in social, developmental, clinical, health, and cross-cultural psychology; emotion and memory; urban and regional planning, public policy, environmental planning, design, and sustainability; law and society; criminology; criminal justice policy, and race, social inequality, and justice.

The School offers five master's degree programs. Master's degrees include; the online Master of Advanced Studies (M.A.S.) in Criminology, Law and Society; the online Master of Legal and Forensic Psychology (M.L.F.P.); the Master of Public Policy (M.P.P.), and the accredited Master of Urban and Regional Planning (M.U.R.P.). In addition, many students in our doctoral programs obtain an M.A. in Social Ecology on the way to their Ph.D. The School also offers four Ph.D. degree programs. Doctoral students have the opportunity to earn a Ph.D. in Criminology, Law and Society; Ph.D. in Psychological Science; or a Ph.D. in Urban and Environmental Planning and Policy. Our fourth doctoral program, Ph.D. in Social Ecology-Core, emphasizes interdisciplinarity and encourages students to pursue an individualized course of study.

Social Ecology faculty members apply diverse methods of scientific inquiry to study social, behavioral, and environmental problems. Evaluation research, legal research, questionnaire and survey methods, field research, naturalistic observation, physiological measures, and quasi-experimental techniques receive emphasis along with behavioral laboratory experimentation. Collaborative research with faculty members across the university is an important component of graduate education in the School.

## Admission

To be considered for one of our graduate programs, students should submit their complete application file by the deadline listed on the UCI Graduate Division Admissions website: <https://grad.uci.edu/academics/degree-programs/index.php> (<https://grad.uci.edu/academics/degree-programs/>). For a full description of application requirements and updated deadlines, please refer to the specific program website, which can be found here: <https://grads.soceco.uci.edu>.

## Faculty

Richard Arum, Ph.D. University of California, Berkeley, *Dean of the School of Education and Professor of Education; Criminology, Law and Society; Sociology*

Drew Bailey, Ph.D. University of Missouri, *Associate Professor of Education; Cognitive Sciences; Psychological Science*

Victoria Basolo, Ph.D. University of North Carolina at Chapel Hill, *Professor of Urban Planning and Public Policy*

Hillary Berk, Ph.D. University of California, Berkeley, *Assistant Professor of Teaching of Criminology, Law and Society* (sociology of law/law and society, gender, family, reproduction and surrogacy, law and emotion, civil rights, dispute resolution)

Arnold Binder, Ph.D. Stanford University, *Professor Emeritus of Criminology, Law and Society* (research methodology, juvenile delinquency, police organization and methods)

Scott A. Bollens, Ph.D. University of North Carolina at Chapel Hill, *Drew, Chace and Erin Warmington Chair in the Social Ecology of Peace and International Cooperation and Professor of Urban Planning and Public Policy*

Jessica Borelli, Ph.D. Yale University, *Associate Professor of Psychological Science* (developmental psychopathology, attachment, emotion, prevention on mental health problems in children and adolescents)

Graeme T. Boushey, Ph.D. University of Washington, *Associate Professor of Political Science; Urban Planning and Public Policy* (California politics and statewide elections, American politics, state and federal policy-making, ballot measures and the initiative process)

Tim-Allen Bruckner, Ph.D. University of California, Berkeley, *Associate Professor of Program in Public Health; Urban Planning and Public Policy*

Jan K. Brueckner, Ph.D. Stanford University, *Distinguished Professor of Economics; Urban Planning and Public Policy*

Lee Cabatingan, Ph.D. University of Chicago, *Assistant Professor of Criminology, Law and Society; Anthropology* (Caribbean law and sovereignty; construction of authority at the Caribbean Court of Justice)

Lawrence F. Cahill, Ph.D. University of California, Irvine, *Professor of Neurobiology and Behavior; Psychological Science*

Kitty C. Calavita, Ph.D. University of Delaware, *Professor Emerita of Criminology, Law and Society* (sociology of law, criminology, social deviance, immigration, inequality)

Belinda Campos, Ph.D. University of California, Berkeley, *Associate Professor of Chicano/Latino Studies; Family Medicine; Psychological Science* (culture, relationships, positive emotion, health)

Elizabeth E. Cauffman, Ph.D. Temple University, *Professor of Psychological Science; Criminology, Law and Society; Education; School of Law* (adolescent development, mental health, juvenile justice, legal and social policy)

Susan T. Charles, Ph.D. University of Southern California, *Department Chair and Professor of Psychological Science* (emotional processes across the adult life span, subjective experience and cognitive processes, health and emotion)

Chuansheng Chen, Ph.D. University of Michigan, *UCI Chancellor's Professor of Psychological Science; Education* (cross-cultural psychology, adolescent development, cognitive neuroscience, genes and behavior)

Kenneth S. Chew, Ph.D. University of California, Berkeley, *Professor of Teaching of Urban Planning and Public Policy*

Damon Clark, Ph.D. Oxford University, *Associate Professor of Economics; Urban Planning and Public Policy*

Simon A. Cole, Ph.D. Cornell University, *Professor of Criminology, Law and Society; History; School of Law* (science, technology, law, criminal justice)

Ross F. Conner, Ph.D. Northwestern University, *Professor Emeritus of Urban Planning and Public Policy*

William J. Cooper, Ph.D. University of Miami, *Professor Emeritus of Civil and Environmental Engineering; Urban Planning and Public Policy* (environmental chemistry, advanced oxidation processes for water treatment, aquatic photochemistry of carbon cycling)

N. Edward Coulson, Ph.D. University of California, San Diego, *Professor of Paul Merage School of Business; Economics; Psychological Science*

Susan B. Coutin, Ph.D. Stanford University, *Professor of Criminology, Law and Society; Anthropology; Religious Studies* (law, culture, immigration, human rights, citizenship, political activism, Central America)

Thomas J. Crawford, Ph.D. Harvard University, *Professor of Teaching Emeritus of Psychological Science* (attitude theory and social problems research)

Elliott P. Currie, Ph.D. University of California, Berkeley, *Professor of Criminology, Law and Society* (criminal justice policy in the U.S. and other countries, causes of violent crime, social context of delinquency and youth violence, etiology of drug abuse and assessment of drug policy, race and criminal justice)

Teresa A. Dalton, Ph.D. University of Denver, *Associate Professor of Teaching of Criminology, Law and Society* (quantitative methodology, criminology, law and social sciences)

Eve Darian-Smith, Ph.D. University of Chicago, *Department Chair and Professor of Global and International Studies; Anthropology; Criminology, Law and Society*

Amy Dent, Ph.D. Duke University, *Assistant Professor of Teaching of Psychological Science* (meta- analysis, academic context and consequences of self-regulation, educational and developmental psychology of academic learning)

Joseph DiMento, Ph.D. University of Michigan, *Professor of School of Law; Criminology, Law and Society; Paul Merage School of Business; Urban Planning and Public Policy*

Peter H. Ditto, Ph.D. Princeton University, *Professor of Psychological Science* (social psychology, judgment and decision making, political and moral reasoning)

John D. Dombrink, Ph.D. University of California, Berkeley, *Professor Emeritus of Criminology, Law and Society* (crime and criminal justice, deviance and social control)

C. David Dooley, Ph.D. University of California, Los Angeles, *Professor Emeritus of Psychological Science* (community psychology, epidemiology, economic change)

Greg Duncan, Ph.D. University of Michigan, *UCI Distinguished Professor of Education; Economics; Psychological Science* (economics of education, program evaluation, child development)

Jacquelynne S. Eccles, Ph.D. University of California, Los Angeles, *UCI Distinguished Professor of Education; Psychological Science* (academic motivation and achievement, school and family influences on adolescent development, gender and ethnicity in STEM fields)

David Feldman, Ph.D. University of Missouri-Columbia, *Professor of Urban Planning and Public Policy; Political Science*

Martha S. Feldman, Ph.D. Stanford University, *Roger W. and Janice M. Johnson Chair in Civic Governance and Public Management and Professor of Urban Planning and Public Policy; Paul Merage School of Business; Sociology* (organization theory and behavior, stability and change in organizations, decision-making and information processing, public management, qualitative research methods)

Michelle A. Fortier, Ph.D. University of Nebraska Lincoln, *Associate Professor of Nursing; Nursing; Psychological Science*

Ajay Garde, Ph.D. University of Southern California, *Associate Professor of Urban Planning and Public Policy*

Howard A. Gillman, Ph.D. University of California, Los Angeles, *Chancellor and Professor of Political Science; Criminology, Law and Society; History; School of Law*

David Theo Goldberg, Ph.D. The Graduate Center, City University of New York, *Director of the UC Humanities Research Institute and Professor of Comparative Literature; Anthropology; Criminology, Law and Society* (race, racism, race and the law, political theory, South Africa, digital humanities)

Wendy A. Goldberg, Ph.D. University of Michigan, *Professor Emerita of Psychological Science; Education* (developmental psychology, work and family, infant sleep, transition to parenthood, autism)

Brandon Golob, Ph.D. University of Southern California, *Assistant Professor of Teaching of Criminology, Law and Society* (law-related educational programs; social media and online privacy; inclusive pedagogy; media effects; law and popular culture)

Michele B. Goodwin, J.D. Boston College, *Director, Center for Biotechnology and Global Health Policy and UCI's Chancellor's Professor of School of Law; Criminology, Law and Society; Gender and Sexuality Studies; Program in Public Health*

Michael R. Gottfredson, Ph.D. University at Albany, State University of New York, *Chancellor's Professor of Criminology, Law and Society; School of Law; Sociology* (criminology, juvenile delinquency, crime theory, public policy)

Douglas A. Granger, Ph.D. University of California, Irvine, *Director of the Institute for Interdisciplinary Salivary Bioscience and Professor of Psychological Science* (psychoneuroendocrinology, salivary bioscience, hormone-behavior relationships across the lifespan, in high- and low-risk populations)

Ellen Greenberger, Ph.D. Harvard University, *Professor Emerita of Psychological Science* (developmental psychology, social and cultural influences on adolescent and young adult development, family relationships and consequences throughout the lifespan)

Nancy Guerra, Ed.D. Harvard University, *Dean of the School of Social Ecology and Professor of Psychological Science; Criminology, Law and Society* (children's aggression and behavior problems, prevention of youth violence, promotion of healthy youth development)

Sora Han, Ph.D. University of California, Santa Cruz, *Director of the Graduate Program in Culture and Theory and Associate Professor of Criminology, Law and Society; African American Studies; Culture and Theory; School of Law* (law and popular culture, critical race theory, philosophies of punishment, feminism and psychoanalysis)

Jutta Heckhausen, Ph.D. University of Strathclyde, *Professor of Psychological Science; Education* (life-span developmental psychology, motivation, individual agency and social context)

John R. Hipp, Ph.D. University of North Carolina at Chapel Hill, *Professor of Criminology, Law and Society; Sociology; Urban Planning and Public Policy* (community context of crime, household decisions and neighborhood change, research methods)

Douglas Houston, Ph.D. University of California, Los Angeles, *Associate Professor of Urban Planning and Public Policy*

Michael A. Hoyt, Ph.D. Arizona State University, *Associate Professor of Program in Public Health; Epidemiology; Psychological Science*

Helen Ingram, Ph.D. Columbia University, *Professor Emerita of Urban Planning and Public Policy*

Larry D. Jamner, Ph.D. State University of New York at Stony Brook, *Professor of Psychological Science* (health psychology, psychophysiology, pain, mHealth)

Valerie Jenness, Ph.D. University of California, Santa Barbara, *Distinguished Professor of Criminology, Law and Society; Sociology* (links between deviance and social control [especially law], the politics of crime control and criminalization, social movements and social change, corrections and public policy)

Jae Hong Kim, Ph.D. University of Illinois at Urbana-Champaign, *Assistant Professor of Urban Planning and Public Policy*

J. Zoe Klemfuss, Ph.D. Cornell University, *Assistant Professor of Psychological Science; Language Science* (narrative development, children's autobiographical memory, sociocontextual influences on children's narrative, memory and well-being, children's eyewitness abilities)

Charis E. Kubrin, Ph.D. University of Washington, *Professor of Criminology, Law and Society; Sociology* (crime, neighborhood effects and social processes, race/ethnicity and violence, immigration and crime)

Kate Kuhlman, Ph.D. University of Michigan, *Assistant Professor of Psychological Science* (developmental psychopathology, psychoneuroimmunology, psychoneuroendocrinology, early life stress, and adolescent depression)

Raul P. Lejano, Ph.D. University of California, Los Angeles, *Professor Emeritus of Urban Planning and Public Policy*

Linda J. Levine, Ph.D. University of Chicago, *Professor of Psychological Science* (bias in predicted and remembered emotion, memory and emotion, the development of children's ability to regulate emotion)

Elizabeth F. Loftus, Ph.D. Stanford University, *UCI Distinguished Professor of Psychological Science; Cognitive Sciences; Criminology, Law and Society; School of Law* (cognitive psychology, human memory, psychology and law)

Angela F. Lukowski, Ph.D. University of Minnesota, *Associate Professor of Psychological Science* (contextual influences on cognitive development in infancy and early childhood)

Mona Lynch, Ph.D. University of California, Santa Cruz, *Professor of Criminology, Law and Society; School of Law* (law and society, psychology and law, punishment and society, race and criminal justice)

Salvatore R. Maddi, Ph.D. Harvard University, *Professor Emeritus of Psychological Science* (personality, psychopathology, health psychology, creativity)

Nicholas J. Marantz, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Urban Planning and Public Policy; School of Law*

Elizabeth Martin, Ph.D., University of Missouri, *Assistant Professor of Psychological Science* (adult psychopathology, schizotypy and schizophrenia, social anhedonia, emotional and social dysfunction)

Richard Matthew, Ph.D. Princeton University, *Professor of Urban Planning and Public Policy; Political Science*

William M. Maurer, Ph.D. Stanford University, *Dean of the School of Social Sciences and Professor of Anthropology; Criminology, Law and Society; School of Law* (anthropology of law, globalization, Caribbean, anthropology of money and finance, gender and kinship)

Cheryl Lee Maxson, Ph.D. University of Southern California, *Professor Emerita of Criminology, Law and Society* (crime and delinquency, youth violence, street gangs, juvenile justice system and policing)

Sanjoy Mazumdar, Ph.D. Massachusetts Institute of Technology, *Professor of Urban Planning and Public Policy; Religious Studies*

Richard D. McCleary, Ph.D. Northwestern University, *Professor of Criminology, Law and Society; Urban Planning and Public Policy* (criminal justice, research methodology, statistics)

Michael G. McNally, Ph.D. University of California, Irvine, *Professor of Civil and Environmental Engineering; Urban Planning and Public Policy* (travel behavior, transportation systems analysis)

James W. Meeker, J.D., Ph.D. State University of New York at Buffalo, *Professor Emeritus of Criminology, Law and Society; Sociology* (sociology of law, criminal justice, research methodology, statistics, access to civil justice)

David S. Meyer, Ph.D. Boston University, *Professor of Sociology; Political Science; Urban Planning and Public Policy* (social movements, public policy, peace and war, social justice)

Kristine Molina, Ph.D. University of Michigan, *Associate Professor of Psychological Science* (racism and discrimination, social inequality, health disparities, Latinx health)

Ana Muñiz, Ph.D. University of California, Los Angeles, *Assistant Professor of Criminology, Law and Society* (gang profiling, youth justice, gang injunctions and databases, immigration enforcement, policing, race, state violence)

Sylvia Nam, Ph.D. University of California, Berkeley, *Assistant Professor of Anthropology; Biological Chemistry; Urban Planning and Public Policy* (urban studies, property, transnational expertise, Southeast Asia)

Daniel Nation, Ph.D. University of Miami, *Associate Professor of Psychological Science* (clinical neuropsychology)

Walter Nicholls, Ph.D. University of California, Los Angeles, *Associate Professor of Urban Planning and Public Policy; Sociology* (urban sociology, politics and policy, social movements, immigration, comparative urbanism, theory, planning conflicts)

Raymond W. Novaco, Ph.D. Indiana University, *Professor of Psychological Science* (anger, violence, stress, trauma, and interventions)

Candice Odgers, Ph.D. University of Virginia, *Professor of Psychological Science; Criminology, Law and Society* (developmental and quantitative psychology; social inequalities and child health; new technologies and adolescent development)

Judith Olson, Ph.D. University of Michigan, *Professor Emeritus of Informatics; Paul Merage School of Business; Urban Planning and Public Policy* (interactive and collaborative technology, human-computer interaction, computer-supported cooperative work)

Emily Owens, Ph.D. University of Maryland at College Park, *Professor of Criminology, Law and Society; Economics* (how government policies affect the prevalence of criminal activity as well as how agents within the criminal justice system, particularly police, prosecutors, and judges, respond to policy changes)

Paul Piff, Ph.D. University of California, Berkeley, *Assistant Professor of Psychological Science* (social psychology, group processes, altruism and cooperation, socioeconomic status, inequality, social emotion, moral judgment, ethics, uncertainty)

Seth D. Pipkin, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Urban Planning and Public Policy*

Henry N. Pontell, Ph.D. State University of New York at Stony Brook, *Professor Emeritus of Criminology, Law and Society; Sociology* (white-collar and corporate crime, criminology, criminal justice, deviance and social control, sociology of law)

Joann Prause, Ph.D. University of California, Irvine, *Professor of Teaching Emerita of Psychological Science* (statistics, quantitative epidemiology, employment typology)

Sarah D. Pressman, Ph.D. Carnegie Mellon University, *Associate Professor of Psychological Science* (health psychology, positive emotions, stress physiology, psychosocial effects on physiology and health)

Jodi A. Quas, Ph.D. University of California, Davis, *Professor of Psychological Science* (memory development, children's involvement in the legal system)

Vibhuti Ramachandran, Ph.D. New York University, *Assistant Professor of Global and International Studies; Criminology, Law and Society*

Stephanie Reich, Ph.D. Vanderbilt University, *Associate Professor of Education; Informatics; Psychological Science* (child development, parenting, peer interactions, media, program evaluation)

Keramet Reiter, Ph.D. University of California, Berkeley, *Associate Professor of Criminology, Law and Society; School of Law* (prisons and extreme punishments, legal history, criminal justice policy, criminal and civil rights law, law and society)

Maria G. Rendón, Ph.D. Harvard University, *Assistant Professor of Urban Planning and Public Policy; Sociology* (urban sociology, immigration, race/ethnicity, sociology of education and social policy)

Jenna Riis, Ph.D. Johns Hopkins University, *Assistant Professor of Psychological Science* (early life adversity; stress; salivary bioscience; neuroendocrine-immune relations; program implementation and evaluation)

Jenny K. Rinehart, Ph.D. University of New Mexico, *Assistant Professor of Teaching of Psychological Science* (health psychology, clinical psychology, sexual victimization prevention, risk perception)

Nancy Rodriguez, Ph.D. Washington State University, *Professor of Criminology, Law and Society* (race, crime, and justice; juvenile justice; collateral consequences of imprisonment; criminal justice policy)

Karen S. Rook, Ph.D. University of California, Los Angeles, *Distinguished Professor of Psychological Science* (gerontology, social relationships and health)

Michael Ruane, M.A. University of California, Los Angeles, *Lecturer of Urban Planning and Public Policy*

Ruben G. Rumbaut, Ph.D. Brandeis University, *Distinguished Professor of Sociology; Chicano/Latino Studies; Criminology, Law and Society; Education* (international migration, immigration laws, criminalization, incarceration, social inequality and mobility, race and ethnicity)

Maritza Salazar, Ph.D. New York University, *Assistant Professor of Paul Merage School of Business; Psychological Science* (team science, group dynamics and processes, team-based organizations, global teams, impact of culture on work behavior, international management, management of innovation and learning)

Brett F. Sanders, Ph.D. University of Michigan, *Professor of Civil and Environmental Engineering; Urban Planning and Public Policy* (urban flooding, coastal flooding, dam-break flooding, flood hazard modeling, flood risk management, sediment management, shallow-water hydrodynamics and morphodynamics, computational methods, remote-sensing with drones, translational research for flood modeling targeting community resilience, population health and poverty alleviation)

Jean-Daniel M. Saphores, Ph.D. Cornell University, *Professor of Civil and Environmental Engineering; Economics; Urban Planning and Public Policy* (transportation and environmental systems (with a focus on air pollution and energy use), travel behavior analysis, alternative fuel vehicles, automated vehicles, transit use, sustainable infrastructure management, and decision making under uncertainty using real options)

Sabrina E. Schuck, Ph.D. University of California, Riverside, *Health Sciences Assistant Clinical Professor of Pediatrics; Education; Psychological Science*

Stephen Schueller, Ph.D. University of Pennsylvania, *Assistant Professor of Psychological Science* (clinical psychology, depression, mHealth, technology, implementation science, treatment and prevention, positive psychology)

Nicholas I. Scurich, Ph.D. University of Southern California, *Associate Professor of Psychological Science; Criminology, Law and Society; School of Law* (judgment and decision making, juridical proof, violence risk assessment)

Christopher Seeds, Ph.D. New York University, *Assistant Professor of Criminology, Law and Society* (punishment and social control, law and society, criminal justice, social theory, life sentencing and capital punishment)

Carroll S. Seron, Ph.D. New York University, *Professor Emerita of Criminology, Law and Society; School of Law* (sociology of law, sociology of professions, law and society, sociology of legal profession, methods and police misconduct)

Roxane C. Silver, Ph.D. Northwestern University, *Professor of Psychological Science; Program in Public Health* (coping with traumatic life events (personal losses and collective traumas), stress, social psychology, health psychology)

Charles Smith, Ph.D. University of California, San Diego, *Professor of Political Science; Criminology, Law and Society* (law and legal institutions, comparative and international law)

David A. Smith, Ph.D. University of North Carolina at Chapel Hill, *Professor of Sociology; Urban Planning and Public Policy* (world systems analysis, urbanization, development, comparative-historical sociology, dependent development in east Asia)

David M. Snow, J.D. Loyola Marymount University, *Lecturer of Urban Planning and Public Policy*

Dara H. Sorkin, Ph.D. University of California, Irvine, *Associate Professor in Residence of Medicine; Program in Public Health; Psychological Science*

Ann Southworth, J.D. Stanford University, *Professor of School of Law; Criminology, Law and Society*

Eric Spangenberg, Ph.D. University of Washington, M.B.A. Portland State University, *Dean of The Paul Merage School of Business and Professor of Paul Merage School of Business; Psychological Science* (sensory cues in the retail environment and the effects of self-prediction on behavior)

Mark Steyvers, Ph.D. Indiana University, *Professor of Cognitive Sciences; Computer Science; Psychological Science* (higher-order cognition, cognitive neuroscience, computational modeling, collective intelligence)

Daniel Stokols, Ph.D. University of North Carolina, Chapel Hill, *Professor Emeritus of Psychological Science; Religious Studies; Urban Planning and Public Policy*

Luis Suarez-Villa, Ph.D. Cornell University, *Professor Emeritus of Urban Planning and Public Policy*

Naomi Sugie, Ph.D. Princeton University, *Associate Professor of Criminology, Law and Society; Sociology* (sociology of crime and punishment, inequality, families, demography, methods, new technologies for data collection)

Bryan Sykes, Ph.D. University of California, Berkeley, *Associate Professor of Criminology, Law and Society; Program in Public Health; Sociology* (demography, criminology, research methods, health, social inequality, statistics)

Shauhin A. Talesh, J.D., Ph.D. University of Connecticut, University of California, Berkeley, *Director, Law and Graduate Studies Program and Professor of School of Law; Criminology, Law and Society; Sociology*

Julian F. Thayer, Ph.D. New York University, *Professor of Psychological Science* (health psychology, psychopathology, health disparities, heart rate variability, emotions, stress)

William C. Thompson, Ph.D. Stanford University, *Professor Emeritus of Criminology, Law and Society; Psychological Science; School of Law* (psychology and law, criminal justice, forensic science, expert evidence, human judgment and decision making, use of social science in appellate litigation)

Kara L. Thorsen, Ph.D. University of California, Irvine, *Lecturer of Social Ecology*

George E. Tita, Ph.D. Carnegie Mellon University, *Professor of Criminology, Law and Society; Urban Planning and Public Policy* (criminology, community context of violence, urban youth gangs, homicide studies)

Rodolfo D. Torres, Ph.D. Claremont Graduate University, *Professor of Urban Planning and Public Policy; Political Science*

Susan F. Turner, Ph.D. University of North Carolina at Chapel Hill, *Professor of Criminology, Law and Society* (sentencing and corrections, applied research methods)

Kristin E. Turney, Ph.D. University of Pennsylvania, *Associate Professor of Sociology; Criminology, Law and Society* (social inequality, family demography, population health, incarceration and punishment, intergenerational transmission of disadvantage, child well-being)

Deborah Lowe Vandell, Ph.D. Boston University, *Chancellor's Professor Emerita of Education; Psychological Science* (longitudinal studies of development, early childhood education, after-school programs, summer learning, child development, adolescent development)

Kerry Vandell, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Paul Merage School of Business; School of Law; Urban Planning and Public Policy*

James D. Vigil, Ph.D. University of California, Los Angeles, *Professor Emeritus of Criminology, Law and Society* (urban research, urban poverty, culture change, socialization and education, psychological anthropology, street gangs in cross-cultural perspective, Mexico and U.S. southwestern ethnohistory, comparative ethnicity)

Linda T. Vö, Ph.D. University of California, San Diego, *Professor of Asian American Studies; Culture and Theory; Sociology; Urban Planning and Public Policy* (race and ethnic relations, immigrants and refugees, gender relations, community and urban studies)

Kirk Williams, Ph.D. University of Arizona, *Professor of Criminology, Law and Society; Sociology* (family violence, youth violence, homicide studies, risk assessment, violence prevention program evaluation)

Ilona S. Yim, Ph.D. University of Trier, *Associate Professor of Psychological Science* (stress, pregnancy and postpartum depression, biopsychology of stress, developmental psychobiology)

Alyson K. Zalta, Ph.D. University of Pennsylvania, *Assistant Professor of Psychological Science* (clinical psychology, trauma, posttraumatic stress disorder, resilience, prevention, treatment, cognitive behavioral therapy)

Joanne F. Zinger, Ph.D. University of California, Riverside, *Associate Professor of Teaching of Psychological Science* (expressive writing, meta-analysis, positive psychology, health psychology, preventive medicine, educational psychology)

## Criminology, Law and Society Courses

### **CRM/LAW C7. Introduction to Criminology, Law and Society . 4 Units.**

Introduces characteristics of the U.S. criminal justice system, including responses to crime, components of the system, and current challenges to the system. Examines structure and function of police and courts, criminal procedure, and sentencing and incarceration policies.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

(III)

### **CRM/LAW C10. Fundamentals of Criminology, Law and Society . 4 Units.**

Introduces three interdisciplinary literatures: criminology, socio-legal studies, and justice studies. Focuses on theoretical and empirical work addressing law making, law breaking, and legal systems.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

(III)

### **CRM/LAW H80. The Properties of Property. 4 Units.**

Develops an understanding and critique of private property. Draws from interdisciplinary sources to explore the foundations of private property, the institutions that support it over time, and possible alternatives to it.

Restriction: Campuswide Honors Collegium students only.

(III)

### **CRM/LAW C100. Special Topics in Criminology, Law and Society. 4 Units.**

Course content varies with interest of the instructor.

Repeatability: Unlimited as topics vary.

### **CRM/LAW C101. American Law. 4 Units.**

Introduction to substantive and procedural law governing private dispute resolution, including common law (tort, property, contracts), lawsuits (civil procedure), and alternative dispute resolution; emphasis on the socio-legal ramifications of private disputes, particularly the modern tort system and tort reform movement.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C102. Introduction to the Comparative Study of Legal Cultures. 4 Units.**

Traces the anthropological and comparative cultural study of law from the nineteenth century to the present; briefly surveys the diversity of recorded legal cultures and critically examines key concepts which have been used to describe and classify them.

Same as INTL ST 124A.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**CRM/LAW C103. US Legal Thought. 4 Units.**

Evolution of legal thought in socio-historical context from 19th century to present; emphasizes the rise and fall of legal classicism and modern socio-legal critiques, including the law and society movement, critical legal studies, feminist legal theory, and critical race studies.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C104. Sociology of Law. 4 Units.**

Examines law creation and law enforcement in their social and political context. Discusses the major theories of law and the modern state, and presents case studies in order to evaluate the strengths and weaknesses of these theoretical perspectives.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C105. Psychology and the Law. 4 Units.**

Psychological assumptions of the American legal system and mental health aspects of provision of criminal justice services. Civil commitment, insanity defense, competence to stand trial, jury selection, eyewitness identification. Use of police, courts, correctional institutions in prevention of behavior disorder.

Same as PSCI 193E.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment.

**CRM/LAW C106. Crime and Public Policy. 4 Units.**

Explores nature and dimensions of crime in America and uses and limits of various strategies to control it. Topics include growth of imprisonment, the problem of domestic violence, the death penalty, gun control, and the potential of crime prevention programs.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C107. Deviance. 4 Units.**

Perspectives on deviance and criminality in behavior, institution, community, and myth. The suitability of contemporary theories of deviant behavior.

Same as SOCIOL 156, PSYCH 177D.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**CRM/LAW C108. Criminological Theory. 4 Units.**

Explores the question of crime causation from a number of theoretical perspectives in the social sciences. Schools of thought examined include utilitarianism, positivism, human ecology, social structural approaches, social process (learning) theories, labeling, and radical-critical (political) perspectives.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C109. Juvenile Delinquency. 4 Units.**

Patterns of delinquent behavior, theories that explain behavior, current research aimed at enhancing exploratory power. Attempts to prevent and control delinquency are put in historical perspective. Development of the current juvenile justice system and evolution of modern juvenile law.

Same as PSCI 193B.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment.

**CRM/LAW C110. Community Context of Crime. 4 Units.**

Examines the social context of high-crime communities, with special emphasis on the problems of poverty, joblessness, economic inequality, and racial discrimination. Assesses debates on the causes of these problems, and on the most effective policies to combat them.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C111. Theories of Punishment. 4 Units.**

Survey of the various schools of thought regarding formal punishment theory. The purposes of legal sanctions are examined, including those of deterrence, rehabilitation, retribution, and incapacitation. Considers problems in realizing formal goals of punishment in practice.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C112. Legal Sanctions and Social Control. 4 Units.**

Examination of criminal sanctions as mechanisms of social control. Includes the nature, function, and organization of courts as sanction generating institutions, and problems associated with punishing white-collar and corporate illegalities.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C113. Gender and Social Control. 4 Units.**

Examines the legal system's use of sex as an organizing characteristic, focusing particularly on sameness and difference feminism, and tracing the evolution of equal treatment of men and women in the areas of constitutional rights, employment, education, and military service.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C114. Miscarriages of Justice. 4 Units.**

Systematically describes, explains, and analyzes the causes and consequences of the wrongful accusation, prosecution, incarceration, and sometimes even execution, of the innocent in the American criminal justice system.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C115. Prisons, Punishment, and Corrections. 4 Units.**

A review of how the U.S. punishes and rehabilitates convicted law violators. The conflicts among the major purposes of sentencing—rehabilitation, deterrence, incapacitation—are discussed, as well as the effects of different sanctions on public safety, offender rehabilitation, and justice system costs.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C116. Race, Ethnicity, and Social Control. 4 Units.**

Provides a historical and sociological survey of racial and ethnic group relations in contexts of crime control, emphasizing the roles of racial ideology, structural racism, and social movements in shaping these dynamic relations, and their significance to American liberal democracy.

Same as CHC/LAT 152A.

**CRM/LAW C117. Imprisonment and Reentry. 4 Units.**

Offers an overview of imprisonment and reentry in the contemporary United States. Examines the development of the prison in the United States and explores changes in its composition, structure, and purpose over time.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C118. Domestic Violence. 4 Units.**

General perspectives about domestic violence and theoretical accounts about what causes such behavior.

Same as SOCECOL 118.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C119. Violence in Intimate Relationships. 4 Units.**

Responses to various forms of domestic violence, such as intimate partner violence and child abuse. Covers barriers to reporting to the police, and prosecutors and courts. Human services, such as safety planning for victims, treatment programs, and restorative justice approaches.

Corequisite:

Same as SOCECOL 119.

**CRM/LAW C120. Law and Inequality. 4 Units.**

Various aspects of the law as related to three specific areas of inequality: immigration and immigrants, race, and gender. The role of law as a tool of social reform and limitations of the legal system historically in resolving inequality issues.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C122. Constitutional Law. 4 Units.**

Examines the evolution of civil liberties and individual rights in the United States, focusing on how Constitutional Amendments and U.S. Supreme Court decision-making have shaped the ongoing political and legal struggles over issues such as privacy, abortion, and free speech.

Overlaps with POL SCI 174A.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C123. Family Law. 4 Units.**

Examines legal issues surrounding marriage, cohabitation, divorce, child custody and support, adoption, and the rights of parents and children in the family context. The findings of social science research are used to illuminate the legal issues.

Same as PSCI 193F.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C124. Mental Health and the Justice System. 4 Units.**

Covers the history of criminalization of persons with mental illness; challenges and needs; civil and outpatient commitment; law enforcement responses; mentally ill in jails and prisons; community supervision strategies; and reentry strategies for offenders with mental illness.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C127. Hate Crimes. 4 Units.**

Examines the causes, manifestations, and consequences of hate crimes and the larger social context within which they occur. The politics and dynamics of intergroup violence born of bigotry and manifested as discrimination; social policy designed to control bias-motivated violence.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C128. Environmental Law and Policy . 4 Units.**

Environmental law as a combination of traditional legal principles and newly created statutes, rules, and decisions applied to environmental protection. Investigates roles of courts, legislature, executive branch and administrative agencies, and private citizens attempting to regulate environmental quality.

Same as UPPP 133.

Restriction: Criminology, Law and Society Majors only. Planning, Policy, and Design Majors only.

**CRM/LAW C130. Seminar on Gangs. 4 Units.**

An overview of gangs, including the nature and definition of gangs; types of gangs; diversity of membership; theoretical explanations; criminal behavior; drug use and sales; law enforcement responses; gangs in correctional institutions; intervention and prevention strategies; and public policy issues.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C131. Organized Crime and American Society. 4 Units.**

Examination of the phenomenon of American organized crime from a sociological perspective. Explanation of methods by which organized crime is tolerated at various levels of society. Emphasis on ways in which 'underworld' interests interact with legitimate economic and political institutions.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C132. Forensic Science, Law, and Society. 4 Units.**

Examines use of 'forensic science' to resolve issues arising in criminal cases including crime scene analysis, DNA testing, fingerprints, trace evidence comparisons, profiling, lie detectors, other forensic techniques; evaluation, statistical characterization, and legal admissibility of evidence; regulation of forensic laboratories.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C133. Homicide and Suicide. 4 Units.**

Examines similarities and differences among homicide and suicide, two major causes of death.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C134. Victimless Crimes. 4 Units.**

Examines major theoretical, empirical, and policy-oriented research related to the design, implementation, and analysis of government intervention, through the criminal sanction, in the spheres of vice and morality.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C135. Mass Incarceration and Social Inequality in America. 4 Units.**

Explores the origins and consequences of mass incarceration; extraordinarily high incarceration rates within particular demographic groups above and beyond historical levels in the U.S. Theoretical explanations for, and current policy debates around, mass incarceration are covered.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C136. Forensic Psychology: Advanced Seminar. 4 Units.**

Focuses on the psychology of criminal offending, particularly violent behavior. Examines violence, sexual offending, and mental disorder related to crime with regard to clinical assessment and treatment; mental health services within forensic institutions.

Prerequisite: (PSCI 9 or PSCI 11C or PSYCH 7A or PSYCH 9C) and PSCI 102C and (PSCI 178S or CRM/LAW C149)

Same as PSCI 156C, PSYCH 177F.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C139. Police and Change. 4 Units.**

Organizational efforts to modify police conduct are addressed by focusing on the history of policing in the United States including training, education, and the contributions of women.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C140. Surveillance and Society. 4 Units.**

Explores the development and deployment of surveillance technologies in contemporary society. The social and legal impact of surveillance technologies, in such areas as crime control, privacy, trust, community, democracy, and the war on terror.

Restriction: Criminology, Law and Society Majors only.

**CRM/LAW C142. White-Collar Crime. 4 Units.**

Examines criminal activity in business and corporate enterprise, organizations, and the professions. Theories regarding the causes and control of white-collar and corporate crime are covered as well as the numerous definitions of these terms.

Same as SOCIOL 142.

Restriction: Sociology Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C144. Criminal Law. 4 Units.**

Deals specifically with the substantive nature of criminal law and its historical development. Focuses on understanding the development of fundamental doctrinal principles upon which criminal law is based, including mens rea, actus reus, homicide, causation, group criminality, and exculpation.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C145. Government Crime. 4 Units.**

Examines the legal, organizational, and political issues involved in the generation and control of government lawlessness. Readings present historical and theoretical perspectives in the abuse of government authority and the ability of the legal system to control such behavior.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C149. Violence in Society. 4 Units.**

Current theory and research on aggression; anger and violence as problems in individual and social functioning. Process and functions of anger examined with regard to normal behavior and psychopathology. The determinants, prevalence, and implications of violence in society are analyzed.

Prerequisite: PSCI 9 or PSCI 11C or PSYCH 7A or PSYCH 9C

Same as PSCI 178S.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment.

**CRM/LAW C150. The Legal Profession. 4 Units.**

Role of the legal profession in modern society, the diverse professional roles lawyers play, the American legal profession compared with that of other societies. 'Litigation explosion,' ethical problems, interactions between lawyers and other professionals, training and socialization of new lawyers.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C156. Cross-Cultural Research on Urban Gangs. 4 Units.**

Taking an urban policy approach, examines the background and contemporary traditions of gangs in several ethnic groups including African-, Asian-, and Mexican-Americans. Cross-cultural exploration of the varied facets of gang life. The major social-control institutions affecting them.

Same as CHC/LAT 153.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment. Chicano/Latino Studies Majors have first consideration for enrollment.

**(VII)**

**CRM/LAW C160. Forensic Psychology . 4 Units.**

Forensic psychology is the interface between clinical psychology and the law. Emphasizes clinically relevant legal topics (insanity defense; competency to stand trial) and includes critical thinking about issues that arise when psychologists are involved in legal proceedings.

Prerequisite: PSCI 9 or PSCI 11B or PSCI 11C

Same as PSCI 161C.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C162. Crime Hotspots. 4 Units.**

Criminological theories of local public safety hazards or hotspots are introduced. Spatial statistics are developed for different types of hotspots. Hotspot policing theories are introduced and research on the effectiveness of policing strategies is reviewed.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C163. Ethics and Politics of Justice. 4 Units.**

Theoretical perspective on how ethics and politics relate to criminal justice through an introduction to moral philosophy; consideration of specific theories of punishment and justice; and consideration of practical and empirical illustrations of the intersection of ethics, politics, and justice.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C164. Social Control of Delinquency. 4 Units.**

Assumes familiarity with theories of delinquency, the juvenile justice system, and elements of juvenile law. Explores socio-historical origins and evolution of juvenile justice, current research and policy on delinquency prevention and treatment, and future directions of law, policy, and practice.

Prerequisite: Recommended: CRM/LAW C109.

Same as PSCI 193C.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C165. The Death Penalty. 4 Units.**

Examines why the U.S. continues to have a death penalty when so many other countries have abandoned it. Arguments for and against the death penalty are covered.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C167. Crime Measurement. 4 Units.**

The strengths and weaknesses of three crime measures (police reports, victim surveys, and offender self-reports) are illustrated through analyses of research articles. Common measurement problems are analyzed with a focus on reliability and validity.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C168. Extreme Punishment . 4 Units.**

Explores the history and law of America's Eighth Amendment prohibition against cruel and unusual punishment, examining the death penalty, long prison sentences, harsh confinement conditions, and other punishments. Students debate practical, legal, and moral arguments for and against these punishments.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C169W. Advanced Research Methods. 4 Units.**

For students planning to conduct senior research projects or apply to graduate school in social research fields. Topics include reviewing literature, preparing a research proposal, protecting human subjects, citing scholarly work, building measures, estimating sample size, interview and presentation skills.

Prerequisite: SOCECOL 10 and SOCECOL 13. Satisfactory completion of the Lower-Division Writing requirement.

Same as SOCECOL 111W, PSCI 111W, UPPP 114W.

(Ib)

**CRM/LAW C172. Culture Change and the Mexican People. 4 Units.**

Reviews culture contact and colonization, innovation diffusion, acculturation, assimilation, culture conflict and marginality, modernization, urbanization, legal transformations. Mexico and the Southwestern U.S. are reviewed through several centuries to better appreciate the indigenous base of the Mexican people.

Same as CHC/LAT 155.

**CRM/LAW C173. Maritime Piracy, Law and Society. 4 Units.**

Explores the historical and contemporary images and reality of pirates and piracy since the 16th century across the globe through an analysis of primary sources, key historiographical and legal debates, and criminological theories.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C174. Immigration and Crime. 4 Units.**

Examines immigration and crime in the global context, highlighting immigrants as criminals and victims; immigration and crime control; immigrants' perceptions of the criminal justice system; public discourse and public perception on immigration and crime; and human rights issues.

**CRM/LAW C175. Issues in Policing. 4 Units.**

Lectures and readings focus on the history and strategies of policing, measuring the quality of policing, and police misconduct. Strategies for enhancing the quality of policing for controlling misconduct are covered.

**CRM/LAW C176. Classics in Crime Cinema. 4 Units.**

A multidimensional understanding of crime films and how they shape public thinking about crime and criminals.

Restriction: CRM/LAW C176 and CRM/LAW C20 may not be taken for credit.

**CRM/LAW C177. Eyewitness Testimony. 4 Units.**

Faulty eyewitness testimony is a major cause of wrongful convictions. Covers the fast-growing topic of eyewitness testimony and memory for real-world events, both how psychologists study eyewitness capacity, and how the legal system has dealt with eyewitness issues.

Prerequisite: SOCECOL 10

Same as PSCI 193G.

Restriction: Seniors only. Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

Concurrent with CRM/LAW C263.

**CRM/LAW C178. Critical Race Theory. 4 Units.**

Introduction to Critical Race Theory and key American cases on racial inequality. Using this literature, examines the possibilities and pitfalls of legal claims of race, gender, and sexuality discrimination in the age of colorblindness.

Same as AFAM 157.

Restriction: Upper-division students only.

**CRM/LAW C179. Race and Incarceration. 4 Units.**

Examines the racial politics of mass incarceration through historical, empirical, theoretical, and legal frameworks. Focuses on race, gender, and sexual differences to develop a critique on policing, incarceration, and other forms of punishment.

**CRM/LAW C180. Power, Constructions of Deviance, and Social Control . 4 Units.**

Examines the forms and limits of power in the construction of social deviants. Theories of state power are covered to understand the prison system as a contemporary driver of social inequality. The collateral consequences of mass incarceration are discussed.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment.

**CRM/LAW C182. Illegal Economics. 4 Units.**

How illegal firms function in illegal markets, why individuals participate in these groups and markets, and what federal, state, and local governments do to disrupt organized illegal activity.

Same as ECON 146A.

Restriction: Business Economics Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C183. Controversies, Courts, Cultures: The Anthropology of Law. 4 Units.**

Assesses the contributions anthropology has made to legal scholarship, reviewing historical and contemporary themes. Considers both comparative questions of law's norms, structures, and practices around the globe, and the specific insights anthropology offers about contemporary U.S. law.

Same as ANTHRO 127.

(III)

**CRM/LAW C186. Social Media and The Law. 4 Units.**

Examines legal and policy issues raised by the rise of social media. Surveys how social networking platforms and other emerging technologies impact the right to privacy, public perceptions of judicial systems, and the law generally.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C187. Undocumented Immigrant Experiences. 4 Units.**

Examines the experiences of undocumented immigrants and the policies that structure their educational, economic, social, and political participation.

Same as ASIANAM 130, CHC/LAT 164A, SOCIOL 177C.

(III and VII ).

**CRM/LAW C190. Applied Statistics in Social and Behavioral Research. 4 Units.**

Covers statistical techniques used to describe and make generalizations about phenomena represented by data. Hands-on experience in data analysis and interpretation using statistical software (SPSS, STATA) is emphasized. Topics include data visualization, ANOVA, multiple regression, and categorical data analyses.

Prerequisite: SOCECOL 13

Same as PSCI 190, SOCECOL 190, UPPP 190.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**CRM/LAW C191. Law and Modernity. 4 Units.**

The rise and spread of Enlightenment legal traditions, social contract theory, individual rights, ideologies of 'liberty, equality, fraternity'; contradictions of liberal law, its understandings of 'primitive' and 'civilized'; pervasive myths of property, difference, race, and rights. Reading- and writing-intensive.

Same as ANTHRO 127A.

**CRM/LAW C196. Research Seminar in Criminology, Law and Society. 4 Units.**

Special topics research seminar. Content varies with interest of instructor. Capstone research opportunity with Criminology, Law and Society faculty members.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. Anthropology Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C201. Research Methods. 4 Units.**

An introduction to techniques of inductive methodologies, including qualitative interviewing and participant observation, and deductive methodologies, including survey research and experimental and quasi-experimental design. Provides a sound overview of research methodology with tools to pursue specific methods in greater depth.

Restriction: Graduate students only.

**CRM/LAW C202. Research Methods II. 4 Units.**

Covers qualitative approaches (interview strategies, varieties of ethnography, archival and historical methods, etc.) and quantitative approaches (survey methods, experimental designs, secondary data sets, comparative and international data, etc.), and concludes with mixed-method approaches.

Prerequisite: CRM/LAW C201. CRM/LAW C201 with a grade of B or better

Restriction: Graduate students only.

**CRM/LAW C203A. Qualitative Methods Practicum. 4 Units.**

Designed to deepen students' familiarity with qualitative research strategies and to guide them through the initial stages of their Second Year Project requirement, such as the development of an original research proposal and/or a research instrument.

Prerequisite: CRM/LAW C202. CRM/LAW C202 with a grade of B or better

Restriction: Graduate students only.

**CRM/LAW C203B. Quantitative Methods Practicum. 4 Units.**

Deepens familiarity with quantitative research and provides a foundation for the second-year paper, e.g., initial models for data analysis and/or a replication study. Students evaluate what assumptions are necessary for credible inference in different evaluation approaches.

Prerequisite: CRM/LAW C202. CRM/LAW C202 with a grade of B or better

Restriction: Graduate students only.

**CRM/LAW C207. Land-Use Law. 4 Units.**

Investigates legal and institutional frameworks for development control. Review of constitutional issues implicated in land-use regulation. Traces development control historically and analyzes contemporary approaches to land-use control which reflect environmental and economic development concerns.

Same as UPPP 207.

Restriction: Graduate students only.

**CRM/LAW C210. Introduction to Criminology, Law and Society. 4 Units.**

Familiarizes students with the interrelated fields of criminology, law and society studies, and criminal justice studies. Organized around three well-established interdisciplinary literatures: criminology, sociolegal studies, and criminal justice studies.

Restriction: Graduate students only. Criminology, Law and Society Majors only.

**CRM/LAW C211. Legal Institutions and Society. 4 Units.**

Acquaints students with the institutions of U.S. legal system and its operations, as well as with the constitutional framework undergirding this system, and defines the relationship between U.S. citizens and government at a variety of levels.

Restriction: Graduate students only.

**CRM/LAW C212. Police, Courts, and Corrections. 4 Units.**

Focuses on basic policy issues in the administration of the criminal justice system. The key elements of the criminal justice system are police, courts, and corrections. Prepares students for continued study of these organizations.

Restriction: Graduate students only.

**CRM/LAW C213. Crime and Social Deviance. 4 Units.**

Examines the major social scientific perspectives on criminal and deviant behavior. Specific deviant and criminal activities are described and explained using established theoretical frameworks.

Restriction: Graduate students only.

**CRM/LAW C214. Research Methods. 4 Units.**

Structures research methodology, the approach to developing and evaluating knowledge of the sciences for use in criminal justice professional activities. Special emphasis on differentiating scientific approaches from pseudo-science.

Restriction: Graduate students only.

**CRM/LAW C215. Applied Statistics. 4 Units.**

Provides a basis for the use of fundamental statistical analysis techniques for solving public policy and management problems through a series of assignments, examinations, and online discussions and demonstrations.

Restriction: Graduate students only.

**CRM/LAW C216. Public Policy, Crime, and Criminal Justice. 4 Units.**

Increases understanding of crime, violence, and the criminal justice system. Assesses the state of knowledge on key policy issues of our time. Discusses the contribution of communities, schools, employment, drugs, guns, and alcohol to crime and violence.

Restriction: Graduate students only.

**CRM/LAW C217. Leadership. 4 Units.**

Introduces concepts, ideas, and theories about leadership and its operation. Explores leadership concepts through interviews with leaders from the community and fellow classmates.

Restriction: Graduate students only.

**CRM/LAW C218. Social Problems, Law, and Policy. 4 Units.**

Capstone course for M.A.S. program in Criminology, Law and Society. Students choose a social problem related to crime, criminal justice, and law; relate the problem to legal and social issues; and devise a plan of action to research the problem.

Restriction: Graduate students only. Criminology, Law and Society Majors only.

**CRM/LAW C219. Hate Crime. 4 Units.**

Examines the causes, manifestations, and consequences of hate crimes, as well as the larger social context within which they occur, are reacted to, and seem to be proliferating.

Restriction: Graduate students only.

**CRM/LAW C221. Sentencing and Corrections. 4 Units.**

Reviews U.S. attempts to punish and rehabilitate convicted law violators. Conflicts among major purposes of sentencing (rehabilitation, deterrence, incapacitation, and retribution) are discussed, as well as effects of different sanctions on public safety, offender rehabilitation, and justice system costs.

Restriction: Graduate students only.

**CRM/LAW C222. Ethnography. 4 Units.**

Explores the theory and practice of ethnography with a focus on anthropology, the discipline most associated with ethnography. Students are exposed to the theoretical underpinnings of ethnographic work, traditional and innovative practices, and sample ethnographies.

Same as ANTHRO 230F, CHC/LAT 217.

Restriction: Graduate students only.

**CRM/LAW C224. Organizational Perspectives on the Legal System. 4 Units.**

Familiarizes students with organization theory and research as ways to make sense of, navigate, and act on the legal system. Acquaints students with major frameworks in organization theory and their application to the system of legal organizations.

Restriction: Graduate students only.

**CRM/LAW C226. Causal Methods for Policy Analysis. 4 Units.**

Provides students with hands-on experience using existing data to estimate the impact of policy and law on individual behavior or aggregate social outcomes. Covers different econometric strategies used to identify causal effects in the absence of an experiment.

Restriction: Graduate students only.

**CRM/LAW C228. Criminology: Micro Approaches. 4 Units.**

Introduces students to the dominant theories in modern criminology, their theoretical antecedents and extensions, major empirical tests and implications for programs, policy and practice, and focuses on micro-level, individual theories of crime causation. Formerly Criminology, Law and Society C233A.

**CRM/LAW C229. Criminology: Macro Approaches. 4 Units.**

Introduces students to the dominant theories in modern criminology, their theoretical antecedents and extensions, major empirical tests and implications for programs, policy and practices, and addresses macro-level theories of crime causation. Formerly Criminology, Law and Society C233B.

**CRM/LAW C231. Crime and Gender . 4 Units.**

Examines the legal, political, social, economic, and policy implications of making gender (primarily) and race (secondarily) the focus in the study of crime, criminal law, and the criminal justice system.

Restriction: Graduate students only.

**CRM/LAW C232. Juvenile Delinquency. 4 Units.**

Examines the major theoretical perspectives regarding the onset, persistence, and desistance of juvenile delinquency, and examines empirical evidence for each perspective.

Restriction: Graduate students only.

**CRM/LAW C234. Anthropology of Law. 4 Units.**

Law has been a key site of anthropological inquiry since the discipline's nineteenth-century origins. Course introduces and critically assesses the contributions anthropology has made to sociolegal lytic trends.

Restriction: Graduate students only.

**CRM/LAW C238. White-Collar Crime. 4 Units.**

Examines the illegal behavior of individuals who commit crimes in the course of their employment. Special attention will be paid to ways in which power and organizational structure affect the behavior of the white-collar offenders.

Restriction: Graduate students only.

**CRM/LAW C239A. Law and Society I. 4 Units.**

Provides an introduction to the law and society field from its origins in social scientific, legal, and philosophical scholarship during the eighteenth, nineteenth, and early-twentieth centuries. Formerly Criminology, Law, and Society C239.

Restriction: Graduate students only.

**CRM/LAW C239B. Law and Society II. 4 Units.**

Building on Law and Society I, addresses contemporary issues in the field from mid-twentieth century to the present with emphasis on the degree to which the field's foundational assumptions are being challenged, refined, or confirmed through current research.

Prerequisite: CRM/LAW C239A

Restriction: Graduate students only.

**CRM/LAW C240A. Socio-Legal Workshop.**

Designed to foster intellectual discussion, encourage practice and skill-building in providing feedback, and build substantive knowledge of legal scholarship, this workshop is for both law and doctoral students across campus who are interested in interdisciplinary approaches to studying law.

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**CRM/LAW C240B. Socio-Legal Workshop.**

Designed to foster intellectual discussion, encourage practice and skill-building in providing feedback, and build substantive knowledge of legal scholarship, this workshop is for both law and doctoral students across campus who are interested in interdisciplinary approaches to studying law.

Prerequisite: CRM/LAW C240A

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**CRM/LAW C240C. Socio-Legal Workshop. 4 Units.**

Designed to foster intellectual discussion, encourage practice and skill-building in providing feedback, and build substantive knowledge of legal scholarship, this workshop is for both law and doctoral students across campus who are interested in interdisciplinary approaches to studying law.

Prerequisite: CRM/LAW C240B. CRM/LAW C240B with a grade of B or better

Restriction: Graduate students only.

**CRM/LAW C242. Crime Hotspots. 4 Units.**

Focuses on the criminological theory of hotspots, beginning with the “when, where, and why” questions and ending with the practical policing strategies that have been developed to mitigate hotspot public safety hazards.

Restriction: Graduate students only.

**CRM/LAW C248. Geographic Information Systems. 4 Units.**

Prepares students to become proficient in the basic GIS functionality including visualization, data management, and spatial analysis.

Restriction: Graduate students only.

**CRM/LAW C250. Preventing Errors of Justice. 4 Units.**

Examines the types of errors that are made in the U.S. criminal justice system and how we might prevent these errors, including failures to convict guilty offenders as well as wrongful convictions of the innocent.

Restriction: Graduate students only.

**CRM/LAW C252. Issues in Environmental Law and Policy. 4 Units.**

Treatment of legal and policy strategies for promoting environmental protection and deterring environmental degradation within the context of other societal objectives. Topical approach with a focus on problems of special interest to criminologists and to environmental policy specialists.

Same as UPPP 252.

Restriction: Graduate students only.

**CRM/LAW C253. Cybercrime, Cybersecurity, and Society. 4 Units.**

Introduces students to the world of cybercrime in the age of globally networked digital, and information and communication technologies (ICT). Presents a socio-legal approach to the study of cybercrime, cybersecurity, and how it relates to society.

Restriction: Graduate students only. Criminology, Law and Society M.A.S. students only.

**CRM/LAW C254. Immigration in the US: Economic, Fiscal, and Social Outcomes. 4 Units.**

The changing patterns of immigration in the U.S. and the role that immigrants play in our society. In particular, the economic and social outcomes of immigration, as well as the relationship between immigration, crime, and criminal justice policy.

Restriction: Graduate students only. Criminology, Law and Society Majors only.

**CRM/LAW C255. Public Policy. 4 Units.**

Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Same as UPPP 221, POL SCI 221A.

Restriction: Graduate students only.

**CRM/LAW C258. Crimmigration. 4 Units.**

Examines the criminalization of immigration, with an emphasis on U.S. enforcement procedures and outcomes. Analyzes the devolution of federal immigration law to local authorities, the rise in immigrant detention and deportation, and the militarization of the U.S.-Mexico border.

Same as CHC/LAT 225, SOCIOL 268.

Restriction: Graduate students only.

**CRM/LAW C260A. Race and Justice Studies Proseminar .**

A year-long proseminar conducted by a team of instructors specializing in race and justice studies. Conceived as a reading and peer mentor group focusing on intellectual and professional development. Required for students pursuing the Race and Justice Studies emphasis.

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**CRM/LAW C260B. Race and Justice Studies Proseminar.**

A year-long proseminar conducted by a team of instructors specializing in race and justice studies. Conceived as a reading and peer mentor group focusing on intellectual and professional development. Required for students pursuing the Race and Justice Studies emphasis.

Prerequisite: CRM/LAW C260A

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**CRM/LAW C260C. Race and Justice Studies Proseminar. 4 Units.**

A year-long proseminar conducted by a team of instructors specializing in race and justice studies. Conceived as a reading and peer mentor group focusing on intellectual and professional development. Required for students pursuing the Race and Justice Studies emphasis.

Prerequisite: CRM/LAW C260B

Restriction: Graduate students only.

**CRM/LAW C261. Race and Justice Studies Writing Seminar . 4 Units.**

A required writing-intensive seminar conducted by an instructor affiliated with the Race and Justice Studies emphasis. Students with manuscripts on relevant topics will read and critique peer manuscripts, and revise manuscripts toward completion of articles, dissertation chapters, and other publications.

Prerequisite: CRM/LAW C260C

Same as HUMAN 261, SOC SCI 253K.

Restriction: Graduate students only.

**CRM/LAW C262. Special Topics in Race and Justice Studies. 4 Units.**

A seminar focused on special issues in race and justice studies.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**CRM/LAW C263. Eyewitness Testimony. 4 Units.**

Examines the evidence that shows that faulty eyewitness memory is the major cause of wrongful convictions. Explores what the legal system thinks of eyewitness testimony and how the legal system has dealt with eyewitness issues.

Same as PSCI P263.

Restriction: Graduate students only.

**CRM/LAW C265. Memory and the Law. 4 Units.**

Examines the controversial topic of repressed memory, or perception and memory of real-world events.

Same as PSCI P265.

Restriction: Graduate students only.

**CRM/LAW C266. Psychology and the Law. 4 Units.**

Overview of how psychology is applied to the civil and criminal justice systems, how case law shapes this application, and how legal decisions affect the direction of psychological research. Interdisciplinary approach to research in psychology, law, and/or criminology.

Same as PSCI P266.

Restriction: Graduate students only.

**CRM/LAW C268. Contemporary Issues in Crime and Justice. 4 Units.**

Intensive reading and discussion of several recent works that raise critical issues for criminology and criminal justice policy, with a special emphasis on issues of inequality, diversity, and social justice.

Restriction: Graduate students only.

**CRM/LAW C275. Special Topics in Criminology, Law and Society. 4 Units.**

Topics covered vary with interests of instructor.

Repeatability: Unlimited as topics vary.

**CRM/LAW C280A. Professionalization Proseminar.**

Focuses on two areas that are key to scholarly and professional success in graduate school but are rarely discussed in a structured setting: 1) publishing in peer-reviewed academic journals; and 2) preparing for the academic job market.

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**CRM/LAW C280B. Professionalization Proseminar.**

Focuses on two areas that are key to scholarly and professional success in graduate school but are rarely discussed in a structured setting: 1) publishing in peer-reviewed academic journals; and 2) preparing for the academic job market.

Prerequisite: CRM/LAW C280A

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**CRM/LAW C280C. Professionalization Proseminar. 4 Units.**

Focuses on two areas that are key to scholarly and professional success in graduate school but are rarely discussed in a structured setting: 1) publishing in peer-reviewed academic journals; and 2) preparing for the academic job market.

Prerequisite: CRM/LAW C280B

Restriction: Graduate students only.

**CRM/LAW C296. Doctoral Dissertation Research and Writing. 2-12 Units.**

Dissertation research with Criminology, Law and Society faculty.

Prerequisite: Advancement to candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**CRM/LAW C298. Directed Study. 2-4 Units.**

Directed study with Criminology, Law and Society faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CRM/LAW C299. Independent Study . 2-8 Units.**

Independent research with Criminology, Law and Society faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Planning, Policy, and Design Courses

**PP&D 221. Public Policy . 4 Units.**

Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Repeatability: May be taken for credit 2 times.

Same as PUB POL 221.

Restriction: Public Policy Majors have first consideration for enrollment.

## Psychological Science Courses

**PSCI 9. Introduction to Psychology. 4 Units.**

Introduction to field of psychology, addressing the application of scientific methods to the study of human development, learning, memory, problem solving, perception, biological mechanisms, emotions and motivation, personality, psychopathology, and effects of diverse social and cultural contexts on human behavior.

Same as PSYC 7A.

Overlaps with PSYC 9A, PSYC 9B, PSYC 9C, PSCI 11A, PSCI 11B.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment. PSCI 9 and PSYCH 7A may not be taken for credit if taken concurrently with or after PSCI 11A, PSCI 11B, PSCI 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

**PSCI 11A. Psychology Fundamentals. 4 Units.**

Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSYC 9A.

Restriction: Lower-division students only. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. PSCI 9 and PSYCH 7A may not be taken for credit if taken after PSCI 11A, PSCI 11B, PSCI 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

**PSCI 11B. Psychology Fundamentals. 4 Units.**

Designed to provide freshmen with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSYC 9B.

Restriction: Lower-division students only. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

(III)

**PSCI 11C. Psychology Fundamentals. 4 Units.**

Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSYC 9C.

Restriction: Lower-division students only. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**(III)****PSCI 100. Special Topics in Social Behavior. 4 Units.**

Course content varies with interest of instructor.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Repeatability: Unlimited as topics vary.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 101D. Life Span Developmental Psychology. 4 Units.**

Addresses the major issues, concepts, and methods of life span developmental psychology. The fundamental theories, distinctive methods, and the physical, perceptual, cognitive, social, motivational, and emotional development for each developmental phase of the life course are considered.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment.

**PSCI 102C. Abnormal Psychology. 4 Units.**

Survey of disorders organized by the diagnostic categories of the American Psychiatric Association. Interdisciplinary orientation combines environmental, psychological, and organic perspectives on etiology and treatment.

Prerequisite: (PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C) and SE 10

Overlaps with PSYC 120A.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment.

**PSCI 103H. Health Psychology. 4 Units.**

Theory and research are considered as they contribute to an understanding of the role of psychological processes in health and illness. The distinction between prevention and treatment of illness is established, and a variety of psychosocial interventions are elaborated.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment.

**PSCI 104S. Social Animal: An Introduction to Social Psychology. 4 Units.**

Theories and research exploring social behavior and social influences on behavior. Topics include methods of social research, attitude formation and change, social perception, the social self, stereotypes and prejudice, conformity, obedience, altruism, aggression, interpersonal relationships and love, and group behavior.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment.

**PSCI 110D. Infant Development. 4 Units.**

Study of human development from conception through the first two years of life, covering processes and events in the domains of physical, social, and cognitive development.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 111D. Child Development. 4 Units.**

Examines social, emotional, and intellectual growth and development between the ages of 2 and 12 years.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Overlaps with PSYC 120D.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 111W. Advanced Research Methods. 4 Units.**

For students planning to conduct senior research projects or apply to graduate school in social research fields. Topics include reviewing literature, preparing a research proposal, protecting human subjects, citing scholarly work, building measures, estimating sample size, interview and presentation skills.

Prerequisite: SE 10 and SE 13. Satisfactory completion of the Lower-Division Writing requirement.

Same as CLS C169W, SE 111W, UPPP 114W.

**(Ib)****PSCI 112D. Adolescent Development. 4 Units.**

Examines current research on the biological, social, and cultural contexts of adolescent development. Topics include the impacts of puberty, adolescents' decision-making competencies, changes in family and peer relationships, identity development, and psychosocial problems such as depression and problem behavior.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Overlaps with PSYC 21A.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 113D. Adult Development. 4 Units.**

Examines why and how we change (with attention to gains as well as losses) from ages 18-65 and the nature and sources of continuity over time. Topics include physical and intellectual functioning, personality, coping strategies, and social roles and relationships.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 115D. Cognitive Development. 4 Units.**

Examines theories on nature of cognitive development. Discusses behaviorist theories on role of the environment including those of Vygotsky and Piaget, and recent evidence from cognitive psychologists stressing the importance of knowledge and skills within specific domains.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 116D. Human Development and Cross-Cultural Perspectives. 4 Units.**

Human development in diverse cultures (e.g., Asian, American, and African). Special emphasis on East-West contrasts and when East meets West (i.e., Asian-American experiences). Topics include parenting, family relations, language and cognition, schooling and academic achievement, and morality.

Prerequisite: (PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B) and SE 10

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 117D. The Psychology of Gender. 4 Units.**

Discussion of gender identity development and examination of gender differences and similarities across the life span. Consideration of the biology and psychology of gender in relation to physical, behavioral, personality, and intellectual capabilities.

Prerequisite: PSCI 9 or PSYC 9B or PSCI 11B or PSYC 7A

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 118D. Human Sexuality. 4 Units.**

A broad survey of human sexuality encompassing genetic factors, physiological and anatomical development, customary and atypical forms of behavior, reproductive processes, and cultural determinants.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 121D. Work and Family. 4 Units.**

Effects of employment and unemployment on mental health and marital quality; effects of work on parenting and child development; corporate and social policies for 'families that work'; young adults' decision-making about work and family.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Upper-division students only. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 126D. Development of Motivation Across the Lifespan. 4 Units.**

Introduces major concepts in life-span development of motivation and self-regulation, and discusses exemplar empirical findings pertaining to these concepts during the various phases of life. Students participate in discussion, present findings from research articles, and write a paper.

Restriction: Psychological Science Majors only. Psychology and Social Behavior Majors only. Social Ecology Majors only.

**PSCI 127D. Attachment Relationships. 4 Units.**

Students learn about the development of attachment-related needs throughout development, as well as the links between attachment and emotion, psychopathology and treatment. Lectures emphasize classic as well as cutting-edge research and are supplemented by primary source readings.

Prerequisite: PSCI 9 or PSYC 7A or PSCI 11A or PSYC 9A or PSCI 11B or PSYC 9B

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 134H. The Science and Practice of Wellness and Resilience . 4 Units.**

Wellness is a common, but elusive goal. Covers the history, theory, psychology, and behavioral science behind skills for wellness and resilience. Provides opportunities to practice the strategies to help further understanding of the behavioral nature of each of the areas.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors only. Psychology and Social Behavior Majors only. Social Ecology Majors only.

**PSCI 136H. Behavioral Medicine. 4 Units.**

Examines biobehavioral aspects of health and illness, focusing on how stress contributes to or exacerbates disease processes. Background information on psychosomatic medicine and stress models and detailed examination of specific organ systems emphasizing the reactivity of these systems to stress.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 137H. Human Stress. 4 Units.**

Stress as a multidisciplinary topic. Biological, psychological, and sociological approaches to adaptation-related disorders. Effects of acute and chronic stress on emotions, physiology, and behavior. Methods of stress assessment, stress reduction, and intervention.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 138H. Child Health Psychology. 4 Units.**

Exploration of psychological antecedents, concomitants, and consequences of medical illnesses in children. Children's beliefs about health, illness, and medication; the role of stress; coronary-prone behavior; therapeutic adherence and physician-patient interaction; coping with chronic illness; effects of child's illness on family.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 9C or PSYC 7A. Recommended: SE 10.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 139H. Clinical Sport Psychology. 4 Units.**

An interdisciplinary introduction to clinical sport psychology, that includes, among other things, an introduction to psychopathology in sport; plus the use of psychological skills training, including anxiety reduction techniques, visualization, self-efficacy, coping skills, concentration, and goal-setting in sports.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Overlaps with PSYC 124S.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 140H. The Hardiness Approach to Stress Management. 4 Units.**

New development within psychology involving a combination of motivations and skills that extensive research has shown enhances performance, conduct, morale, stamina, and health. Combines study of hardiness research with strategies for improvement of personal hardiness through a series of exercises.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 141H. Clinical Health Psychology. 4 Units.**

Behavioral role in etiology, treatment, and prevention of certain diseases. Behavioral intervention including biofeedback, stress-, pain-management, health habit counseling, and other skills to assist patients make cognitive, emotional, and behavioral changes needed to cope with disease or achieve better health.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Same as PUBH 141.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 142H. Introduction to Interdisciplinary Salivary Bioscience . 4 Units.**

Introduction to the integration of salivary analytes into developmental, social, behavioral, and health sciences. Lectures cover theoretical perspectives; oral fluid as a biological specimen; saliva collection and study design; basics of salivary assay methods; and research findings across multiple fields.

Restriction: Psychological Science Majors only. Psychology and Social Behavior Majors only. Social Ecology Majors only.

**PSCI 150C. Clinical Psychology. 4 Units.**

Overview of theories, assessment techniques, research methodologies, and intervention approaches in clinical psychology. Psychodynamic, behavioral, humanistic, and cognitive perspectives are examined along with ethical and professional issues.

Prerequisite: (PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C) and PSCI 102C

Overlaps with PSYC 122C.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 152C. Clinical Child Psychology. 4 Units.**

Examines research and theory concerning childhood psychopathology behavior disorders. Diagnosis and assessment, early identification of high-risk children, fears and phobias, antisocial behavior, childhood psychoses, autism, depression, attention deficit/hyperactivity disorders, and ethical and policy implications of identifying children who are different.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 153C. Developmental Psychopathology. 4 Units.**

Research and theory of origins, course, and outcomes of disordered behavior. Continuity and change in patterns of behavior; environmental challenges and buffers; stress/competence in children; vulnerable/invincible children; children of mentally ill parents; families at risk; childhood antecedents of adult disorders.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C. Recommended: SE 10.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 154C. Cognitive Behavior Therapy. 4 Units.**

Presentation of principles and procedures of therapeutic interventions based on cognitive-behavior methods. Cognitive factors in learning, emotional arousal, psychological disorder, and psychotherapy reviewed. Introduces the application of cognitive behavioral methods to problems of depression, anxiety, anger, pain, and impulsivity.

Prerequisite: PSCI 9 or (PSCI 11A and PSCI 11C) or PSYC 7A or (PSYC 9A and PSYC 9C)

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 155C. Child Therapies. 4 Units.**

Examines research methodologies, empirical data, and implications of diverse intervention strategies. Primary topics include psychotherapy process and outcome, family therapies, behavioral intervention, cognitive behavior modification, pediatric psychopharmacology, and ethical and social policy implications of intervening in other people's lives.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 156C. Forensic Psychology: Advanced Seminar. 4 Units.**

Focuses on the psychology of criminal offending, particularly violent behavior. Examines violence, sexual offending, and mental disorder related to crime with regard to clinical assessment and treatment; mental health services within forensic institutions.

Prerequisite: (PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C) and PSCI 102C and (PSCI 178S or CLS C149)

Same as CLS C136, PSYC 177F.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 160C. Clinical Neuroscience. 4 Units.**

An introduction to the neuroclinical bases of human behavior, including neuropsychological approaches to mental disorders. Also includes case formulations, research articles, therapeutic approaches, and other discussions related to select psychopathology and other neurobehavioral topics.

Prerequisite: PSCI 9 or PSYC 7A or PSCI 11A or PSYC 9A or BIOL 99

Same as BIOL N170.

Restriction: Psychological Science Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 161C. Forensic Psychology . 4 Units.**

Forensic psychology is the interface between clinical psychology and the law. Emphasizes clinically relevant legal topics (insanity defense; competency to stand trial) and includes critical thinking about issues that arise when psychologists are involved in legal proceedings.

Prerequisite: PSCI 9 or PSCI 11B or PSCI 11C

Same as CLS C160.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 162C. Psychodynamic Studies. 4 Units.**

Introduction to contemporary psychodynamic studies. Emphasis on clinical concepts associated with psychodynamic psychotherapy, including unconscious determinants of behavior, typical defenses, life experiences, and techniques. Exploration of links between psychodynamic-oriented psychotherapy and other disciplines (e.g., psychology, music, medicine, neuroscience, film).

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 163C. Human Neuropsychology. 4 Units.**

A survey of human brain disorders using a clinical case study approach to illustrate fundamental issues in studying brain and behavior. Topics include sensory deficits, attentional neglect, amnesia, cortical organization, clinical psychopathology, and more.

Prerequisite: BIOL N110 or BIOL N115A or PSYC 9A or PSCI 11A

Same as BIOL N173, PSYC 162N.

Restriction: School of Biological Sciences students have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSCI 164C. Addiction. 4 Units.**

Designed for those with an interest in the nature and treatment of addiction. Focuses on the etiology and treatment of addiction, but does not prepare students to treat substance abuse disorders.

Prerequisite: PSCI 11A and PSCI 11B and PSCI 11C and PSCI 102C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 165C. Adult Psychopathology. 4 Units.**

Advanced course in abnormal psychology, focusing on adult psychopathology. Covers historical and fundamental issues about psychiatric disorders, clinical research on disorders of anxiety, PTSD, mood, psychoses, personality, and dementia, and their biopsychosocial features, and attends to assessment and treatment.

Prerequisite: PSCI 102C. Equivalent to PSCI 102C is also accepted.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 166S. Chicano/Latino Families. 4 Units.**

Introduction to the research, literature, and issues surrounding the topic of Chicano/Latino families including cultural history, contemporary issues, organization of family, traditions, lifestyles, values, beliefs, generational differences, gender issues, ethnic identity, evolution of demographic patterns, current economic and political standings.

Same as CHLT 170, SSCI 165, PSYC 174H.

**PSCI 170S. Personality. 4 Units.**

Comparison of the major theories of personality. Provides a frame of reference for understanding lifestyles, development, maturity, and psychopathology. Emerging research themes are used to identify promising lines of personality theorizing.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Overlaps with PSYC 120P.

Restriction: Upper-division students only. Sophomores only. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 171S. Environmental Psychology. 4 Units.**

Impact of the physical environment on individual and group behavior. Three basic concerns examined: (a) environmental determinants of behavior at the individual and interpersonal level; (b) social planning and urban design; (c) methodological approaches to the study of environmental issues.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 173S. Social Relationships. 4 Units.**

Examines major issues, concepts, and methods in the scientific study of social relationships. Topics include relationship formation and dissolution, friendships and love relationships, loneliness, bereavement, societal influences on close relationships, significance of close relationships for health and well-being.

Prerequisite: (PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C) and SE 10

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 174S. Error and Bias in Social Judgement. 4 Units.**

Examines how people encode, reason about, and remember social information and explores how biases and shortcomings in social perception, judgment, and memory are central to understanding both effective social functioning and many forms of maladaptive behavior and social conflict.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 176S. Motivation. 4 Units.**

History, major theories, methods, and applications of motivational psychology, with emphasis on European approaches. Origins of the field in personality, learning, cognition, and activation research. Recent innovations in motivational and volitional self-recognition. Current approaches, major debates, empirical research programs.

Prerequisite: (PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C) and PSCI 101D and (PSCI 104S or UPPP 151)

Overlaps with PSYC 121M.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 178S. Violence in Society. 4 Units.**

Current theory and research on aggression; anger and violence as problems in individual and social functioning. Process and functions of anger examined with regard to normal behavior and psychopathology. The determinants, prevalence, and implications of violence in society are analyzed.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Same as CLS C149.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment.

**PSCI 179S. Cultural Psychology. 4 Units.**

An examination of culture's influence on human minds. Topics include culture's impact on perception, cognition, motivation, emotion, moral reasoning, communication, and health. Addresses cultural psychology's methods, history, and place within psychology and related fields.

Prerequisite: PSCI 9 or PSCI 11B or PSCI 11C or PSYC 7A or PSYC 9B or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 183S. Social Epidemiology. 4 Units.**

Overviews evidence linking environmental factors to mental and physical disorders including such variables as socioeconomic status, income inequality, work stress, job loss, social capital, location, and other demographic characteristics. Measurement and research design issues of both individual and aggregate levels.

Prerequisite: (PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C) and SE 10 and SE 13

Same as PUBH 102.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 184S. Positive Psychology . 4 Units.**

The field of positive psychology focuses on what is right and positive about people and institutions. Introduces findings associated with human strengths and positive emotions, and provides clinical and personal applications and implications.

Prerequisite: PSCI 9 or PSCI 11C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 185S. Industrial-Organizational Psychology. 4 Units.**

Examines the application of social psychology to organizational settings. Topics include motivation of workers, group decision-making, leadership styles, career management, and organizational development.

Prerequisite: PSCI 9 or PSCI 11A or PSCI 11B or PSCI 11C or PSYC 7A or PSYC 9A or PSYC 9B or PSYC 9C

Overlaps with PSYC 122I.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 187S. Psychology of Inequality. 4 Units.**

Focuses on the psychological dimensions of poverty, wealth, and economic inequality.

Prerequisite: PSCI 104S and PSCI 11C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 188S. Evolutionary Psychology. 4 Units.**

Understanding our evolutionary origins is critical to truly understanding the complexities of human psychology. Explores how Darwinian principles, applied to both genes and culture, can help us understand not just how the mind works, but why.

Prerequisite: PSCI 11C or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 190. Applied Statistics in Social and Behavioral Research. 4 Units.**

Covers statistical techniques used to describe and make generalizations about phenomena represented by data. Hands-on experience in data analysis and interpretation using statistical software (SPSS, STATA) is emphasized. Topics include data visualization, ANOVA, multiple regression, and categorical data analyses.

Prerequisite: SE 13

Same as CLS C190, SE 190, UPPP 190.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**PSCI 192B. The Science and Practice of Compassion. 4 Units.**

Explores the latest scientific research on compassion and its correlates, and considers practical strategies for increasing compassion in everyday life. Students discover how cutting-edge research is yielding insights into kindness, empathy, altruism, and compassion.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 192Q. Chicano/Latino Social Psychology. 4 Units.**

Examines theories, research, and major issues of relevance to understanding social psychological processes in Chicano/Latino populations. Topics include social development, cultural orientations, gender and sexuality, close relationships, happiness and well-being, stereotyping, prejudice and discrimination, and mental and physical health.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as CHLT 168.

Restriction: Psychological Science Majors have first consideration for enrollment. Chicano/Latino Studies Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**(VII)**

**PSCI 192T. Cognition and Learning in Educational Settings. 4 Units.**

Foundational concepts in cognition and development as applied to student learning. Primary topics include historical behaviorism, basic cognitive structure and processes, complex cognition, cognitive development, and motivation.

Same as EDUC 173.

Restriction: Psychological Science Majors have first consideration for enrollment. Education Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 192U. Psychology of Learning, Abilities, and Intelligence. 4 Units.**

Overview of classic positions on the mind, human abilities, and intelligence, especially as related to academic achievement. Contrasting views: psychometric versus information processing; experimental versus correlational research.

Prerequisite: PSYC 7A or PSCI 9 or PSCI 11A or PSCI 11B or PSCI 11C

Same as EDUC 176.

Restriction: Psychological Science Majors have first consideration for enrollment. Education Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 192V. Language and Literacy. 4 Units.**

Addresses the linguistic principles and processes that underlie oral and written language proficiency. Emphasis is on how to use phonology, morphology, orthography, semantics, syntax, and pragmatics to support literacy and oral language development for K-12 students.

Same as EDUC 151, LSCI 182V.

Restriction: Language Science Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Education Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 193B. Juvenile Delinquency. 4 Units.**

Patterns of delinquent behavior, theories that explain behavior, current research aimed at enhancing exploratory power. Attempts to prevent and control delinquency are put in historical perspective. Development of the current juvenile justice system and evolution of modern juvenile law.

Same as CLS C109.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment.

**PSCI 193C. Social Control of Delinquency. 4 Units.**

Assumes familiarity with theories of delinquency, the juvenile justice system, and elements of juvenile law. Explores socio-historical origins and evolution of juvenile justice, current research and policy on delinquency prevention and treatment, and future directions of law, policy, and practice.

Prerequisite: Recommended: CLS C109.

Same as CLS C164.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 193E. Psychology and the Law. 4 Units.**

Psychological assumptions of the American legal system and mental health aspects of provision of criminal justice services. Civil commitment, insanity defense, competence to stand trial, jury selection, eyewitness identification. Use of police, courts, correctional institutions in prevention of behavior disorder.

Same as CLS C105.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment.

**PSCI 193F. Family Law. 4 Units.**

Examines legal issues surrounding marriage, cohabitation, divorce, child custody and support, adoption, and the rights of parents and children in the family context. The findings of social science research are used to illuminate the legal issues.

Same as CLS C123.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 193G. Eyewitness Testimony. 4 Units.**

Faulty eyewitness testimony is a major cause of wrongful convictions. Covers the fast-growing topic of eyewitness testimony and memory for real-world events, both how psychologists study eyewitness capacity, and how the legal system has dealt with eyewitness issues.

Prerequisite: SE 10

Same as CLS C177.

Restriction: Seniors only. Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

Concurrent with CLS C263.

**PSCI 196. Research Seminar in Psychological Science . 4 Units.**

Special topics research seminar. Content varies with interest of instructor. Capstone seminar for students who have conducted research with, or have a background in, the research topics of the PSCI faculty member offering this seminar in a given quarter.

Prerequisite: PSCI 11C

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**PSCI P200. Introduction to Legal and Forensic Psychology . 4 Units.**

Familiarizes students with the interrelated fields of psychology, law, and forensic studies. Emphasizes clinically relevant legal topics (insanity defense; competency to stand trial) and includes critical thinking about issues that arise when psychologists are involved in legal proceedings.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P201. Research Methods in Psychology. 4 Units.**

In-depth examination of the conceptualization of research problems and linkages between theory and the design of appropriate strategies for empirical research in psychological science. Topics include experimental and quasi-experimental designs, reliability and validity of measurement and non-experimental procedures.

Restriction: Graduate students only. Psychological Science Majors only. Psychology and Social Behavior Majors only.

**PSCI P202. Data Analysis and Statistics . 4 Units.**

Statistical techniques to facilitate inferences in psychological research, including fundamentals of statistical inference and methods for analyzing data.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P204. Adolescence. 4 Units.**

Considers pubertal and cognitive changes and their social consequences; the family, peer group, school, and cultural contexts in which adolescence is embedded; and selected psychosocial issues including autonomy, identity, health, and well-being.

Restriction: Graduate students only.

**PSCI P208. Research Methods. 4 Units.**

In-depth examination of issues relevant to designing and evaluating research in psychological science. Topics address casual inference, ethical issues surrounding the responsible conduct of research, experimental and quasi-experimental designs, reliability and validity of measurement, and non-experimental procedures.

Overlaps with PSCI P201.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P209A. Applied Psychological Research. 4 Units.**

Focuses on scientific and professional issues in the field of psychology. Topics include communication skills; intervention approaches; collaboration, consultation, and referral; and ethical issues associated with at-risk populations research.

Restriction: Graduate students only.

**PSCI P214. Seminar in Social Psychology. 4 Units.**

Presents an overview of selected theoretical and empirical topics in social psychology including social influence and conformity, altruism and aggression, persuasion and attitude change, self and social perception, and social cognition.

Restriction: Graduate students only.

**PSCI P215. Psychology and Law . 4 Units.**

An interdisciplinary approach to research in psychology, law, and/or criminology. Examines how psychology is applied to the civil and criminal justice systems, how case law shapes this application, and how legal decisions affect the direction of psychological research.

Overlaps with PSCI P266.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P217. Life-Span Development. 4 Units.**

Introduces the major concepts of life-span development and discusses those with regard to some key topics of developmental psychology. For example, change and continuity, evolutionary and inherited nature, culture, society, and family-based nurture, and their dynamic interaction.

Restriction: Graduate students only.

**PSCI P220. Developmental Psychology: Theories and History. 4 Units.**

Examines key concepts, theories, and the historical and philosophical roots of research in human life span development. Focuses on biological and environmental causation, universalism and cultural relativism, continuity and change.

Restriction: Graduate students only.

**PSCI P222. Forensic Assessment . 4 Units.**

Explores the various ways in which clinical psychology is relevant to the law, and how forensic psychologists can meaningfully contribute to the adjudicatory process. Examines legal, scientific, and ethical issues that arise when psychologists are involved in legal proceedings.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P223. Cross-Cultural Developmental Psychology. 4 Units.**

Examines human development in diverse cultures (e.g., Asian, American, and African). Cultural diversity within the U.S. and acculturation of various ethnic groups is also discussed. Topics include parenting, family relations, language, and cognition, schooling and academic achievement, and morality.

Restriction: Graduate students only.

**PSCI P224. Children and the Law. 4 Units.**

Examines how psychology research and practice can inform several areas of law and social policy affecting children, adolescents, and families. Topics include education, mental health, reproductive rights, and delinquency.

Overlaps with PSCI 120D.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P226. Emotion in Psychology. 4 Units.**

Covers original and recent theories of emotions and how they guide current research. Specific topics include neuroanatomical structure of emotion, life-span emotional development, and health and emotion.

Restriction: Graduate students only.

**PSCI P231. Professional Issues in Psychology. 4 Units.**

Examines a variety of issues related to the professional socialization and development of graduate students in psychology. Topics include the publication process, sources of research funding, alternative employment options, competitiveness on the job market, and the academic career route.

Restriction: Graduate students only.

**PSCI P232. Trauma and Resilience. 4 Units.**

Psychological impact of trauma; biopsychosocial factors affecting development of traumatic stress, treatment, and preventive interventions for traumatic stress; define and measure resilience; moral injury and post traumatic growth; ethics of studying trauma.

Restriction: Graduate students only.

**PSCI P234. Childhood. 4 Units.**

Provides graduate students with an overview of traditional and emerging theories, models, and research designed to understand children's development in the domains of cognitive, social, and emotional functioning.

Restriction: Graduate students only.

**PSCI P238. Child Psychopathology. 4 Units.**

Examination of etiology, classification, and developmental pathways of disorders, as well as risk and resilience factors, during the childhood/adolescent years. Discussion of genetic influences and contextual risk factors as well as internalizing and externalizing disorders.

Restriction: Graduate students only.

**PSCI P242. Legal Reasoning and Jurisprudence. 4 Units.**

Overview of the law and legal process as well as the history and assumptions underlying modern legal reasoning. Issues related to procedure and evidence as well as key jurisprudential perspectives are discussed.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P246. Affective Neuroscience. 4 Units.**

Provides an overview of the emerging field of affective neuroscience. Emphasis is placed on mapping affective experience and behavior to brain function, including cross-level integration of anatomical, chemical, fMRI, and electrical data.

Restriction: Graduate students only.

**PSCI P247. EEG Methods . 4 Units.**

Provides an in-depth training of the electroencephalogram (EEG) methodology with a specific focus on the event-related potential technique. Emphasis is on learning how to use this methodology and how to analyze data, with a focus on emotional stimuli.

Restriction: Graduate students only.

**PSCI P249. Advanced Social Psychology . 4 Units.**

Conveys an appreciation of the flavors of contemporary social psychology, an understanding of empirical approaches to problems in this area, and a sense of the array of theoretical orientations in the field.

Restriction: Graduate students only.

**PSCI P250. Emotion, Reasoning, and Memory. 4 Units.**

Examines research and theory on emotion from the perspective of cognitive psychology. Topics include the effects of emotions on attention, memory, and problem solving; the relations between emotional and cognitive development; flash-bulb memories of intense emotional experiences; eyewitness testimony.

Restriction: Graduate students only.

**PSCI P251. Clinical Interviewing and Treatment in a Forensic Setting. 4 Units.**

Students receive an introduction to clinical interviewing, learn details of strategic, solution-focused therapy, and think critically about issues that come at the interaction of psychology and the law. Students are not 'license-eligible' at end of this course.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P252. Law and Behavior: Compliance and Enforcement. 4 Units.**

Provides sophisticated insight into the different ways through which law shapes behavior. Addresses both the economic amoral rational choice theories, as well as ideas from social psychology, criminology, and sociology about the moral, social, and and unconscious dimensions of compliance.

Restriction: Graduate students only. Psychological Science Majors only. Psychology and Social Behavior Majors only.

**PSCI P253. Master of Legal and Forensic Psychology Capstone. 4 Units.**

Focuses on macro-level writing topics such as developing a meaningful research question, conducting a thorough review of relevant literature, and presenting a clear and convincing research-based argument.

Restriction: Graduate students only.

**PSCI P254. Mental Health and the Law . 4 Units.**

Explores the history of criminalization of persons with mental illness. Topics include challenges and needs of persons with mental illness; civil and outpatient commitment; law enforcement responses to persons with mental illness; and mentally ill offenders in jails and prisons.

Restriction: Master of Legal & Forensic Psy Degree students only. Graduate students only.

**PSCI P255. Violence, Anger, and Psychopathology. 4 Units.**

Overviews the prevalence of violence as a criminal and public health problem. Topics include violence within families and intimate partner relationships, traumatic origins of violence, the development of a violence-prone personality, the association of anger and violence with psychopathology.

Restriction: Master of Legal & Forensic Psy Degree students only. Graduate students only.

**PSCI P256. Family and the Law . 4 Units.**

Examines sociological and legal perspectives on the relationship between family life and law, with a focus on three distinct but sometimes interconnected domains: the child welfare system, the criminal justice system, and the immigration system.

Restriction: Master of Legal & Forensic Psy Degree students only. Graduate students only.

**PSCI P258. Health Psychology. 4 Units.**

Interdisciplinary exploration of emerging fields of health psychology and behavioral medicine. Topics: role of stress in development/treatment of medical problems; sociocognitive determinants of health and illness; interpersonal health transactions; behavioral approaches to medical problems such as diabetes, obesity, hypertension.

Restriction: Graduate students only.

**PSCI P260. Technology and Health. 4 Units.**

Explores the growing intersection of health and technology, including electronic Health ("eHealth"), mobile health ("mHealth"), and digital health and medicine. Specifically, it focuses on the implications and uses of technologies for behavioral and emotional health, and behavioral change.

Restriction: Graduate students only.

**PSCI P261. Intensive Longitudinal Data Analysis. 4 Units.**

Fundamentals of Intensive Longitudinal Study designs, gain first-hand experience collecting ILD using web and/or mobile-based platforms, and learn.

Prerequisite: SE 264A and SE 264B

Restriction: Graduate students only.

**PSCI P262. Interpersonal Processes and Health. 4 Units.**

Examines traditions of research linking interpersonal processes to emotional or physical health. Topics include: role of social support in ameliorating stress, effects of social control on health-compromising behaviors, adverse effects of social relationships on health, causes of deficient social relationships.

Restriction: Graduate students only.

**PSCI P263. Eyewitness Testimony. 4 Units.**

Examines the evidence that shows that faulty eyewitness memory is the major cause of wrongful convictions. Explores what the legal system thinks of eyewitness testimony and how the legal system has dealt with eyewitness issues.

Same as CLS C263.

Restriction: Graduate students only.

**PSCI P265. Memory and the Law. 4 Units.**

Examines the controversial topic of repressed memory, or perception and memory of real-world events.

Same as CLS C265.

Restriction: Graduate students only.

**PSCI P266. Psychology and the Law. 4 Units.**

Overview of how psychology is applied to the civil and criminal justice systems, how case law shapes this application, and how legal decisions affect the direction of psychological research. Interdisciplinary approach to research in psychology, law, and/or criminology.

Same as CLS C266.

Restriction: Graduate students only.

**PSCI P271. Human Evolution and Behavior. 4 Units.**

Covers theories and empirical research concerning the evolutionary origins of human behaviors and their variations. An interdisciplinary course emphasizing both evolutionary psychology (e.g., mating strategies, kinship, and parenting) and molecular evolution (i.e., evolution of genes for various behaviors).

Same as BIOC 217.

Restriction: Graduate students only.

**PSCI P273. Biobehavioral Aspects of Health and Illness. 4 Units.**

Examines the behavior-physiology interactions of some major bodily systems: the nervous, cardiovascular, gastrointestinal, and endocrine systems. Analysis of normal and abnormal states of these systems as they relate to tissue injury, disease, and rehabilitation.

Restriction: Graduate students only.

**PSCI P275. Special Topics in Psychological Science . 4 Units.**

Topics covered vary with interests of instructor.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSCI P276. Meta Analysis. 4 Units.**

The process of synthesizing results from a number of studies that address a common research question is often referred to as meta-analysis. Explores the meta-analysis process from the coding of retrieved studies to the final research synthesis.

Restriction: Graduate students only.

**PSCI P280A. Interdisciplinary Salivary Bioscience. 4 Units.**

Theory and research on the integration of salivary analytes into developmental, social, behavioral, and health sciences. Topics include oral fluid as biological specimens; practical aspects of sample handling, collection, and study design; basics of laboratory methods used for assaying saliva.

Restriction: Graduate students only.

**PSCI P280B. Interdisciplinary Salivary Bioscience Lab. 4 Units.**

Laboratory sequel to the P280A seminar. Provides laboratory-based hands-on experience integrating salivary analytes into developmental, social, behavioral, and health sciences that also includes supervised training on sample processing.

Prerequisite or corequisite: PCSI P280A. PCSI P280A with a grade of B or better

Restriction: Graduate students only.

**PSCI P281. Race and the Law. 4 Units.**

Explores how race and other markers of social identity shape outcomes within the criminal justice system. Students examine how race, ethnicity, and national origin intersect with rules governing the policing, trials, and punishment.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P282. Salivary Bioscience Data Analysis . 4 Units.**

A salivary bioscience statistical research working group. Students conduct guided data analyses with salivary biomarker data. Special topics related to salivary bioscience analytic strategies and the interpretation and dissemination of research findings are discussed.

Restriction: Graduate students only.

**PSCI P283H. Psychoneuroimmunology. 4 Units.**

Introduces students to the field of psychoneuroimmunology and helps them develop the conceptual and methodological skills necessary for designing and interpreting research on the bidirectional relationship between the immune system and psychological processes.

Restriction: Graduate students only.

**PSCI P284. Health and Emotion. 4 Units.**

Overview of research focused on understanding how emotional processes influence physical health. Provides students with a deeper understanding of how emotions play into the health of others as well.

Restriction: Graduate students only.

**PSCI P285. Anger: A Turbulent Emotion. 4 Units.**

Provides an enriched perspective on anger beginning with its understanding in classical antiquity. Topics include developmental processes and trauma, anger physiology and neuroscience, anger-related physical health impairments, and the involvement of anger in psychopathology and violence.

Restriction: Graduate students only.

**PSCI P286. Motivation. 4 Units.**

Introduces major concepts of motivational psychology, theory, and history. Application of motivational concepts to phenomena from social psychology and affective science. Development of own research proposal in a motivational framework and/or conceptualizing or expanding an ongoing or planned research project.

Restriction: Graduate students only.

**PSCI P288. Human Neuropsychology . 4 Units.**

Focuses on clinical, neuroanatomical, and neuropathological studies that have contributed to our understanding of brain-behavior relationships in the context of normal brain function and disease-associated neuropsychiatric syndromes.

Restriction: Graduate students only.

**PSCI P289. The Teaching of Psychology. 4 Units.**

Provides students with the theory and skills needed to teach undergraduate psychology courses. Covers research on theories and methods of teaching, curriculum design, and evaluation. Students also gain practical experience preparing and presenting material.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Psychological Science Majors only. Psychology and Social Behavior Majors only.

**PSCI P290. Research in Developmental Psychology. 4 Units.**

Introduces graduate students to research conducted by individual faculty members in the area of developmental psychology. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P291. Research in Health Psychology. 4 Units.**

Introduces graduate students to research conducted by individual faculty members in the area of health psychology. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P292. Research in Psychopathology and Behavior Disorder. 4 Units.**

Introduces graduate students to research conducted by individual faculty members in the area of psychopathology and behavior disorder. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P293. Research in Social and Personality Psychology. 4 Units.**

Introduces graduate students to research conducted by individual faculty members in the area of social and personality psychology. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P294A. Research Directions in Psychological Science I. 2 Units.**

Introduces students to the current research of faculty, graduate students, and visitors to the Department of Psychological Science. Includes examination of contemporary research issues and controversies, as well as issues related to students' development as professionals.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PSCI P294B. Research Directions in Psychological Science II. 2 Units.**

Introduces students to the current research of faculty, graduate students, and visitors to the Department of Psychological Science. Includes examination of contemporary research issues and controversies, as well as issues related to students' development as professionals.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PSCI P294C. Research Directions in Psychological Science III. 2 Units.**

Introduces students to the current research of faculty, graduate students, and visitors to the Department of Psychological Science. Includes examination of contemporary research issues and controversies, as well as issues related to students' development as professionals.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PSCI P295. Research in Psychology and Law. 4 Units.**

Introduces graduate students to research conducted by individual faculty members in the area of psychology and law. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P296. Doctoral Dissertation Research and Writing. 4-12 Units.**

Dissertation research with Psychological Science faculty.

Prerequisite: Advancement to candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P298. Directed Studies in Psychological Science. 2-4 Units.**

Directed study with Psychological Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P299. Independent Studies in Psychological Science. 2-8 Units.**

Independent research with Psychological Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Public Policy Courses

**PUB POL 215. Statistics and Methods for Public Policy. 4 Units.**

Introductory course with focus on gaining a sound understanding of what constitutes credible evidence in support of policy arguments and management decisions.

Restriction: Graduate students only.

**PUB POL 219. Information and Public Policy. 4 Units.**

Evaluates strengths and weaknesses of qualitative and quantitative methods and the data used in making public policy claims. Looks at the bases of certain widely accepted measures of poverty, growth, environmental quality, and the like.

Repeatability: May be taken for credit 2 times.

Restriction: Public Policy Majors have first consideration for enrollment.

**PUB POL 221. Public Policy . 4 Units.**

Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Repeatability: May be taken for credit 2 times.

Same as PP&D 221.

Restriction: Public Policy Majors have first consideration for enrollment.

**PUB POL 225. Qualitative Methods . 4 Units.**

Fieldwork, data collections techniques, and related issues for anti-positivistic research. Data collection techniques include observation, physical traces, participation, in-depth interview. Data checks include veracity, detail, completeness, rigor.

Repeatability: May be taken for credit 2 times.

Restriction: Public Policy Majors only.

**PUB POL 227. Economics of Government. 4 Units.**

Prepares students to analyze public policy questions with tools from economics. By the end, students should be able to identify important economic issues in public policy debates and consume and critique economic research on these topics.

Same as ECON 275.

**PUB POL 240. Microeconomics and Public Policy. 4 Units.**

Introduces the fundamental principles of microeconomics that are required for applied policy analysis. Provides students with an intuitive understanding of the microeconomic approach, and familiarizes them with concepts used in applied public policy analysis.

Repeatability: May be taken for credit 2 times.

Same as ECON 255.

Restriction: Graduate students only.

**PUB POL 260. Policy and Ethics . 4 Units.**

Examines the challenge of identifying ethical principles that can guide us in formulating and assessing public policy, the public policy process from an ethical perspective, and the ethics of the individual engaged in the public policy arena.

Restriction: Public Policy Majors only.

**PUB POL 283. Collaborative Governance and Public Management. 4 Units.**

Introduction to inclusive management. To make effective use of public resources, public managers are inventing ways of managing that alter relationships within organizations, between organizations, between sectors, and with the public. Requires rethinking fundamentals such as leadership and motivation.

Same as UPPP 283.

Restriction: Public Policy Majors have first consideration for enrollment.

## Social Ecology Courses

**SOCECOL 10. Research Design. 4 Units.**

An introduction to the logic behind and methods of designing and conducting research studies in Social Ecology. Topics include how to measure variables of interest, identifying causal relationships, sampling, survey research methods, experiments, quasi-experimental designs, and ethics in research.

Overlaps with EDUC 10.

Restriction: School of Social Ecology students only. Environmental Science and Policy Majors only.

**SOCECOL 13. Statistical Analysis in Social Ecology. 4 Units.**

Introduction to the techniques of statistical analysis in Social Ecology. Topics include probability, statistical inference, significance testing, univariate descriptive statistics, and multivariate analysis from an interdisciplinary perspective.

Overlaps with PSYCH 10A, SOCIOL 10A, SOC SCI 10A, POL SCI 10A, STATS 7, STATS 8.

Restriction: School of Social Ecology students have first consideration for enrollment. Environmental Science and Policy Majors have first consideration for enrollment. No credit for SOCECOL 13 if taken concurrently with or after PSYCH 10A, SOCIOL 10A, POL SCI 10A, SOC SCI 10A, STATS 7, STATS 8, STATS 67, EDUC 15

(Va)

**SOCECOL H20A. Honors: Critical Issues on the Social Sciences. 6 Units.**

Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Same as SOC SCI H1E.

Restriction: Campuswide Honors Collegium students only.

(III)

**SOCECOL H20B. Honors: Critical Issues on the Social Sciences. 6 Units.**

Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Prerequisite: SOC SCI H1E or SOCECOL H20A

Same as SOC SCI H1F.

Restriction: Campuswide Honors Collegium students only.

**(III)**

**SOCECOL H20C. Honors: Critical Issues on the Social Sciences. 6 Units.**

Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Prerequisite: SOC SCI H1F or SOCECOL H20B

Same as SOC SCI H1G.

Restriction: Campuswide Honors Collegium students only.

**(III)**

**SOCECOL 74A. Moral Development and Just Communities. 4 Units.**

A three-quarter sequence exploring interpersonal, personal, and social issues based on principles of fairness and justice. Both the living environment of a University residence hall and selected institutions of society are analyzed in terms of moral development theory.

Grading Option: Pass/no pass only.

**SOCECOL 74B. Moral Development and Just Communities. 4 Units.**

A three-quarter sequence exploring interpersonal, personal, and social issues based on principles of fairness and justice. Both the living environment of a University residence hall and selected institutions of society are analyzed in terms of moral development theory.

Prerequisite: SOCECOL 74A

Grading Option: Pass/no pass only.

**SOCECOL 74C. Moral Development and Just Communities. 4 Units.**

A three-quarter sequence exploring interpersonal, personal, and social issues based on principles of fairness and justice. Both the living environment of a University residence hall and selected institutions of society are analyzed in terms of moral development theory.

Prerequisite: SOCECOL 74B

Grading Option: Pass/no pass only.

**SOCECOL 100. Special Topics in Social Ecology. 4 Units.**

Special topics courses are offered from time to time. In general they will focus on a topic from interdisciplinary perspectives. Course content varies with the interest of the instructor.

Repeatability: Unlimited as topics vary.

Restriction: School of Social Ecology students only.

**SOCECOL 111W. Advanced Research Methods. 4 Units.**

For students planning to conduct senior research projects or apply to graduate school in social research fields. Topics include reviewing literature, preparing a research proposal, protecting human subjects, citing scholarly work, building measures, estimating sample size, interview and presentation skills.

Prerequisite: SOCECOL 10 and SOCECOL 13. Satisfactory completion of the Lower-Division Writing requirement.

Same as CRM/LAW C169W, PSCI 111W, UPPP 114W.

**(Ib)**

**SOCECOL 118. Domestic Violence. 4 Units.**

General perspectives about domestic violence and theoretical accounts about what causes such behavior.

Same as CRM/LAW C118.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**SOCECOL 119. Violence in Intimate Relationships. 4 Units.**

Responses to various forms of domestic violence, such as intimate partner violence and child abuse. Covers barriers to reporting to the police, and prosecutors and courts. Human services, such as safety planning for victims, treatment programs, and restorative justice approaches.

Corequisite:

Same as CRM/LAW C119.

**SOCECOL E127. Nuclear Environments. 4 Units.**

Understanding the impact of the nuclear age on the environment and human health through interrelated developments of nuclear power and nuclear weapons. The early years of weapon development, catastrophic environmental pollution, perils of nuclear power in the U.S. and Russia.

Same as INTL ST 122, PUBHLTH 168.

**(VIII)****SOCECOL 183A. Global and International Studies Forum. 4 Units.**

A faculty-student forum featuring lectures from a variety of institutions with discussion issues related to Global and International Studies.

Repeatability: May be taken for credit 4 times.

Same as INTL ST 183A, SOC SCI 183A.

**SOCECOL 183B. Seminar in Mediation. 4 Units.**

Student develop mediation skills and refine knowledge in the practice and theory of conflict resolution. Students who complete this course may serve as mediators in the Campus Mediation Program. Course is a prerequisite to completing Indep Study as an intern.

Same as INTL ST 183B, SOC SCI 183B.

Restriction: International Studies Majors have first consideration for enrollment. School of Humanities students have first consideration for enrollment. School of Social Ecology students have first consideration for enrollment. School of Social Sciences students have first consideration for enrollment.

**SOCECOL 183CW. Seminar Conflict Resolution. 4 Units.**

Designed for seniors who are pursuing the minor in Conflict Resolution and/or International Studies major. Provides a forum in which students will refine skills and theory in the study of cooperation and conflict, from local to global arenas.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOC SCI 183CW, INTL ST 183CW.

**(Ib)****SOCECOL 186A. Senior Seminar on Global Sustainability I. 2 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum is also required. Seminar utilized to analyze forum presentations. Prepare bibliography.

Same as BIO SCI 191A, EARTHSS 190A.

Restriction: Seniors only. Global Sustainability Minors have first consideration for enrollment.

**SOCECOL 186B. Senior Seminar on Global Sustainability II. 2 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum is also required. Seminar utilized to analyze forum presentations. Prepare research proposal.

Prerequisite: BIO SCI 191A or SOCECOL 186A or EARTHSS 190A

Same as BIO SCI 191B, EARTHSS 190B.

Restriction: Seniors only.

**SOCECOL 186CW. Writing/Senior Seminar on Global Sustainability III. 4 Units.**

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze Forum presentations and to prepare senior research paper. Prepare/write research paper under direction of faculty member.

Prerequisite: BIO SCI 191B or EARTHSS 190B or SOCECOL 186B. BIO SCI 191B or EARTHSS 190B or SOCECOL 186B. Satisfactory completion of the Lower-Division Writing requirement.

Same as BIO SCI 191CW, EARTHSS 190CW.

Restriction: Seniors only.

**(Ib)**

**SOCECOL 189. Global Service Scholars Advanced Seminar. 4 Units.**

For students who are accepted into the Global Service Scholars Program. Provides advanced training in empathy and compassion, and prepares students for their summer international field experience.

Prerequisite: PSCI 192B

**SOCECOL 190. Applied Statistics in Social and Behavioral Research. 4 Units.**

Covers statistical techniques used to describe and make generalizations about phenomena represented by data. Hands-on experience in data analysis and interpretation using statistical software (SPSS, STATA) is emphasized. Topics include data visualization, ANOVA, multiple regression, and categorical data analyses.

Prerequisite: SOCECOL 13

Same as CRM/LAW C190, PSCI 190, UPPP 190.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**SOCECOL H190A. Honors Research. 4 Units.**

Independent work on an individual research project in addition to participation in a mini proseminar in which faculty discuss their ongoing research. Students prepare a written proposal for a research project.

Restriction: Seniors only.

**SOCECOL H190B. Honors Research. 4 Units.**

Independent work on an individual research project in addition to participation in a mini proseminar in which faculty discuss their ongoing research. Students prepare a written proposal for a research project.

Prerequisite: SOCECOL H190A

Grading Option: Pass/no pass only.

Restriction: Seniors only.

**SOCECOL H190W. Honors Research. 4 Units.**

Students write up their honors research project (H190A-B) and prepare an oral report which is presented at the honors seminar.

Prerequisite: SOCECOL H190B

Restriction: Seniors only.

**(Ib)**

**SOCECOL 194W. Naturalistic Field Research. 4 Units.**

Introduction to alternative models of experiential learning and to various methods of observation, assessment, and evaluation. Introduction to the nature of organizations and ethical issues that emerge from research and intervention in natural settings.

Prerequisite: SOCECOL 10. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Social Ecology students only.

**(Ib)**

**SOCECOL 195. Field Study. 2-8 Units.**

Community engagement to facilitate civic education through field research experience, social intervention, and professionalization. Small group instruction, discussion, writing, and presentations synthesizing students' experiences in the field with theory, paradigms, and ideas learned about in their course work.

Prerequisite: SOCECOL 10

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 12 units.

Restriction: Upper-division students only. School of Social Ecology students only.

**SOCECOL 195A. Advanced Field Study. 4 Units.**

While completing 10 hours of field work per week, students become acquainted with the goals and activities of their placement and will work closely with the placement supervisor and AFS instructor to identify the scope of a research project.

Prerequisite: SOCECOL 10 and SOCECOL 13. Acceptance to Advanced Field Study required.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Upper-division students only. School of Social Ecology students only.

**SOCECOL 195B. Advanced Field Study. 4 Units.**

While completing 10 hours of field work per week, students implement their research project through data collection and observations which allow them to reflect on, apply, and synthesize their academic training through observations and experiences at the placement.

Prerequisite: SOCECOL 195A. Acceptance to Advanced Field Study required.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Upper-division students only. School of Social Ecology students only.

**SOCECOL 195CW. Advanced Field Study. 4 Units.**

While completing 10 hours per week of field work, students write and finalize their AFS Client Project in consultation with the placement and the FS instructor, and make a final written and oral presentation to the placement and invited guests.

Prerequisite: SOCECOL 195B. Acceptance to Advanced Field Study required. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times.

Restriction: Upper-division students only. School of Social Ecology students only.

**(Ib)****SOCECOL 195W. Field Study Writing Seminar. 4-8 Units.**

Community engagement to promote civic education through field research experience, and the opportunity to study social issues and the environments where they occur. Develop discipline-specific writing and communication skills, methodology, and integrate information from multiple sources. Course may be offered online.

Prerequisite: SOCECOL 10. Cumulative UC GPA of 2.0. Authorization is required. Successful completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit for 8 units.

Restriction: Upper-division students only. Criminology, Law and Society Majors only. Psychology and Social Behavior Majors only. Social Ecology Majors only. Urban Studies Majors only.

**(Ib)**

**SOCECOL 198. Directed Studies. 2-4 Units.**

Directed study with Social Ecology faculty.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**SOCECOL 199. Special Studies. 1-4 Units.**

Special Studies with Social Ecology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**SOCECOL 200. Seminar in Social Ecology. 4 Units.**

Students are introduced to the classic and contemporary literature of human and social ecology and are expected to use the ecological paradigm to analyze social phenomena of interest to the differing subprograms.

Restriction: Graduate students only.

**SOCECOL 261. Strategies of Theory Development. 4 Units.**

Examines key issues and controversies facing the development of social ecological theory, and encourages students to develop their own abilities as theorists. Strategies for enhancing creative hypothesis formation are emphasized.

Restriction: Graduate students only.

**SOCECOL 264A. Data Analysis. 4 Units.**

Provides an appreciation and understanding of statistics necessary to conduct applied research. Topics include approaches to and presentation of data, robust statistics, standardization techniques, multivariate regression, and analysis of variance.

Restriction: Graduate students only.

**SOCECOL 264B. Data Analysis. 4 Units.**

Provides an appreciation and understanding of statistics necessary to conduct applied research. Topics include approaches to and presentation of data, robust statistics, standardization techniques, multivariate regression, and analysis of variance.

Prerequisite: SOCECOL 264A

Restriction: Graduate students only.

**SOCECOL 266D. Analysis of Survival Data. 4 Units.**

Provides an introduction to survival analysis methods for the analysis of change in discrete dependent variables. Focuses on data collection strategies for obtaining longitudinal data and continuous-time hazards models. Communicates the variety and power of multivariate hazard models.

**SOCECOL 272A. Structural Equation Modeling I. 4 Units.**

The general structural equation model is developed including path models, recursive and nonrecursive structural models, multiple indicator models, and confirmatory factor models. Use of LISREL and other software for estimating model parameters is covered.

Prerequisite: SOCECOL 264A and SOCECOL 264B

**SOCECOL 272B. Structural Equation Modeling II: Longitudinal and Advanced Topics. 4 Units.**

Provides hands-on experience with longitudinal and advanced structural equation models and is of interest to students from a range of disciplines. Topics covered include confirmatory factor, latent growth curve, general growth mixture, and multi-level modeling.

Prerequisite: SOCECOL 272A

Restriction: Graduate students only.

**SOCECOL 275. Special Topics in Social Ecology. 2-4 Units.**

Topics covered vary with interests of the instructor.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**SOCECOL 291. Program Evaluation. 4 Units.**

Students are introduced to the use of research techniques and statistical methods in assessing the effectiveness of social programs. Different evaluative models are discussed using examples of actual program evaluations.

Restriction: Graduate students only.

**SOCECOL 295. Masters Thesis Research & Writing. 1-8 Units.**

Independent research with Social Ecology faculty.

Prerequisite: Advancement to candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SOCECOL 296. Doctoral Dissertation Research & Writing. 1-12 Units.**

Dissertation research with Social Ecology faculty.

Prerequisite: Advancement to Candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SOCECOL 297. Field Study. 2-4 Units.**

Field studies in Social Ecology.

Restriction: Graduate students only.

**SOCECOL 298. Directed Studies. 2-4 Units.**

Directed study with Social Ecology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SOCECOL 299. Independent Study. 1-8 Units.**

Independent study with Social Ecology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**SOCECOL 399. University Supervised Teaching. 2-4 Units.**

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Urban Planning and Public Policy Courses

**UPPP 4. Introduction to Urban Studies. 4 Units.**

Introduces the substantive areas, concepts, and tools in the field of urban studies. Acquaints students with physical, environmental, social, economic, and political dimensions of cities. Examines the challenges facing cities, including poverty, sustainability, development, globalization, and others.

Restriction: School of Social Ecology students have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

(III)

**UPPP 5. Introduction to Urban Planning and Policy. 4 Units.**

Introduces students to the basic issues in urban planning and public policy.

(III)

**UPPP 8. Introduction to Environmental Analysis and Design. 4 Units.**

Overview of general concepts, theoretical principles, and analytical techniques for investigating environmental systems. Integrates tools from natural and social sciences to analyze contemporary environmental challenges such as pollution, resource acquisition, facility and ecosystem design, impact assessments, formulation of environmental policy.

(III)

**UPPP H30E. Cities: Focal Point for Sustainability Problems and Solutions I. 4 Units.**

Explores the nature of cities, focusing on the challenges facing cities today, their possible solutions, and the technical and social constraints on those solutions.

Prerequisite: SSCI H30D

Restriction: Campuswide Honors Collegium students only.

(III)

**UPPP H30F. Cities: Focal Point for Sustainability Problems and Solutions II. 4 Units.**

Explores the nature of cities, focusing on the challenges facing cities today, their possible solutions, and the technical and social constraints on those solutions.

Prerequisite: UPPP H30E

Restriction: Campuswide Honors Collegium students only.

(II)

**UPPP 40. Urban Sociology. 4 Units.**

Overview of theoretical, substantive, and policy issues in urban sociology. History of urbanization, the school of human ecology, and recent trends regarding urbanism. Time is devoted to understanding the causes and possible solutions to urban problems.

Overlaps with SOCL 43.

**UPPP 100. Special Topics in Urban Studies. 4 Units.**

Course content varies with interest of the instructor.

Repeatability: Unlimited as topics vary.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 101. History of Cities. 4 Units.**

Surveys the global and historical co-evolution of cities and social institutions, including religion, the economy, governance, the arts, technology, and family life.

**UPPP 102. Urban Inequality. 4 Units.**

Examines structural inequality and the influence that urbanization has in affecting race, ethnic, and class relations. Explores how race/ethnicity, class, urban space, housing, economic development, public education, and land policy intersect in cities, both historically and today.

Restriction: Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 103. Comparative Approaches to Urban Regions. 4 Units.**

An introduction to comparative urbanization in developing countries. Introduces students to the geography, history, and theories of urbanization, and then reviews urban planning, public policy, and governance.

Restriction: Public Health Policy Majors only. Social Ecology Majors only. Urban Studies Majors only.

**UPPP 104. Urban America . 4 Units.**

Students examine the historical, social, political, and economic factors that contributed to the construction of the American urban context, one that is poverty concentrated and racially/ethnically segregated. Students also critically assess the consequence of growing up in America's urban neighborhoods.

Same as CHLT 162A, SSCI 163A.

**UPPP 107. Urban and Regional Planning. 4 Units.**

Important substantive areas, concepts, tools in the field of urban and regional planning. Topics include: forces that have historically guided and are currently guiding U.S. urbanization; land use, economic development, housing and community development, environmental planning; legal, environmental, governmental contexts.

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 108. Cities and Transportation. 4 Units.**

The relationship between urban areas and transportation systems. Economic analysis of cities, transportation and urban form, highway congestion, environmental impacts of transportation, public transit, land use and transportation, and political influences on transportation planning.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 109. Housing and Urban Development Policy. 4 Units.**

Surveys public policy issues and develops analytic techniques in the areas of housing and urban development. Examines a range of policy topics including housing assistance to low- and moderate-income families, housing finance system, incentives for economic development, and neighborhood preservation.

Prerequisite: Recommended: Previous course work in economics.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 110. Urban Economic Development Policy. 4 Units.**

Theoretical and practical perspectives on local economic development policy. Integrates economic, planning, and political perspectives. Overview of economic role of cities and metropolitan areas. Specific development issues include: link between taxes, regulation, job growth; redevelopment planning; evaluation economic development policy.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 111. Climate Solutions. 4 Units.**

Focuses on carbon neutrality and climate stability, addressing.

Same as ESS 179, MAE 119.

Restriction: Upper-division students only.

**UPPP 112. Foundations of Community Health. 4 Units.**

A social ecological framework for understanding community health is presented. Measures of individual and community health are compared, and the influence of personal and environmental factors on individual, group, and population health is examined. Community health promotion strategies are discussed.

Same as PUBH 125.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 113. Poverty and Change in Developing Countries. 4 Units.**

Focuses on poverty in developing countries. Analyzes the magnitude and changing nature of poverty in the global south. Critically examines poverty conceptualized in terms of economic deprivation, well-being, and social exclusion.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 114W. Advanced Research Methods. 4 Units.**

For students planning to conduct senior research projects or apply to graduate school in social research fields. Topics include reviewing literature, preparing a research proposal, protecting human subjects, citing scholarly work, building measures, estimating sample size, interview and presentation skills.

Prerequisite: SE 10 and SE 13. Satisfactory completion of the Lower-Division Writing requirement.

Same as CLS C169W, PSCI 111W, SE 111W.

**(Ib)**

**UPPP 115. Global Poverty and Inequality in the 21st Century. 4 Units.**

Explores a multidisciplinary understanding of poverty and inequality in the 21st century and assesses impact of education, health, technology, and other interventions. Course offered online only.

Same as IS 115.

**UPPP 117. Environmental Justice. 4 Units.**

Engages students to critically analyze and evaluate environmental problems, environmental responses, and planning and policy debates regarding 'environmental justice' - essentially the race, class, and equity implications of environmental problems and policies.

**UPPP 118. Gentrification. 4 Units.**

Gentrification is a complex process that changes the makeup of neighborhoods and fuels political and policy conflicts. Students are provided with tools to understand the process and conceive of policies to ensure more inclusive and equitable cities.

**UPPP 120. Introduction to GIS for Planning and Policy. 4 Units.**

Provides hands-on experience creating, visualizing, and interpreting spatial data, with a focus on Geographic Information Systems (GIS) applications for urban planning and public policy.

**UPPP 129. American Public Policy. 4 Units.**

Focuses on the development and implementation of public policy in the United States. Lectures cover theoretical models of the policy process as well as significant problems facing contemporary American decision-makers.

Same as PUBH 132, SSCI 152C, PLSC 121G.

**UPPP 130. Cities and Food . 4 Units.**

Explores the role of cities in transforming global diets: how urbanization has shaped what and how we eat, and what the co-evolution of diets and city life portend for the future.

**UPPP 131. Environmental Sustainability I. 4 Units.**

Provides an introduction to sustainability from different points of view; historical, scientific, political, ethical, and economic.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 132. Environmental Sustainability II. 4 Units.**

Investigates how sustainability can be implemented in a variety of contexts including water, energy, non-renewable resources, biodiversity, and urban policy, and also how it could be measured.

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 133. Environmental Law and Policy . 4 Units.**

Environmental law as a combination of traditional legal principles and newly created statutes, rules, and decisions applied to environmental protection. Investigates roles of courts, legislature, executive branch and administrative agencies, and private citizens attempting to regulate environmental quality.

Same as CLS C128.

Restriction: Criminology, Law and Society Majors only. Planning, Policy, and Design Majors only.

**UPPP 139. Water Resource Policy. 4 Units.**

Examination of contemporary water problems worldwide, with particular attention to the competing water demands in the western U.S., and water demand by the poor in developing countries. History and analysis of U.S. water policies at local, state, and federal levels.

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 142. Environmental Hazards in an Urbanizing World. 4 Units.**

Development patterns, including urbanization, can contribute to environmental hazard severity. Humans can plan, mitigate, and prepare to reduce costly hazard losses. Students learn about environmental hazards and human response to these threats.

(III)

**UPPP 145. Environmental Governance. 4 Units.**

How should the environment be managed and who should be responsible? What is effective environmental management, and for whom? These questions are answered by exploring traditional and emerging theoretical frameworks and applying them to real world environmental challenges.

**UPPP 146. Principles of Economics for Planning and Policy. 4 Units.**

Provides an introduction into economics for planning and policy students.

**UPPP 152. Cultural Ecology and Environmental Design. 4 Units.**

Introduction to cultural ecology and environmental and architectural design. Addresses the understanding of people's relationships with their built environments, the basic elements of architecture, architectural analysis, and cultural analysis are covered. Examines values in design and design for multicultural societies.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 153. Elements of Environmental Design. 4 Units.**

Basic elements of environmental design such as scale, proportion, rhythm, color, sound, lighting, surfaces, texture, architectural definition of spaces, volumes, massing volumetric analysis, solids and voids, and cultural aspects of design. Excitement and creativity in design, imageability.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 155. Urban Design Principles. 4 Units.**

Introduction to principles of urban design and its applications. Study of contemporary and traditional theories of urban design formulated to improve physical characteristics of built environment to facilitate an enhanced quality of life. A variety of case studies are discussed.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 166. Urban Politics and Policy . 4 Units.**

Examines why and how urban policies are enacted and carried out in contemporary U.S. cities and regions. Topics include evolution and organization of city governments and policymaking over the past century; who directs public policy and controls how cities develop.

(III)

**UPPP 167. Public Policy and Management. 4 Units.**

Exposes students to best management practices that assure effective planning and implementation of policies and programs in government, business, and nonprofit sectors. Includes guest lecturers who are proven leaders in four principal institutions of community: business, education, government, and nonprofit.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 170. Health Policy. 4 Units.**

Considers social and economic aspects of health and disease in the United States. What are the proper roles of the individual, community, and government in improving health and health care? International comparisons will be made wherever possible.

Same as PUBH 122.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 172. Latino Metropolis. 4 Units.**

Explores the processes of Latino urbanization in the United States and the spatialization of Latino identities, particularly in the context of Southern California with selected comparisons drawing from other cities.

Same as CHLT 154.

(VII)

**UPPP 177. Chicano Movement. 4 Units.**

Explores the history of Mexicans in the U.S. with particular attention paid to their integration into the U.S. capitalist economy. Examines this economic history and the Chicano movement, 'El Movimiento,' within the wide context of socio-economic change.

Same as CHLT 166.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 178. International Divided Cities. 4 Units.**

Investigates urban divisions in international cities where deep-seated nationalistic ethnic differences create pressures for intergroup conflicts, autonomy, or territorial separation, and can incite violence. Urban political polarization as it is manifest in the urban setting.

Same as PLSC 157B, SOCL 176.

**UPPP 190. Applied Statistics in Social and Behavioral Research. 4 Units.**

Covers statistical techniques used to describe and make generalizations about phenomena represented by data. Hands-on experience in data analysis and interpretation using statistical software (SPSS, STATA) is emphasized. Topics include data visualization, ANOVA, multiple regression, and categorical data analyses.

Prerequisite: SE 13

Same as CLS C190, SE 190, PSCI 190.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 202. History of Urban Planning. 4 Units.**

Introduction to the historical roots and fundamental perspectives of urban and regional planning. Exploration of the significant historical phases and personalities which have shaped the profession. The roles and responsibilities, the limitations and potential, of urban planning.

Restriction: Graduate students only.

**UPPP 203. Theoretical Foundations of Planning. 4 Units.**

Intellectual excursion into central themes in policy and planning, including philosophy of the market, institutionalization of space, hypostatizations of policy, constructions of communities, logics of spatial analysis. Objective is engagement of the professional in thoughtful reflections on practice and institutions.

Restriction: Graduate students only.

**UPPP 204. Plan Development and Communication . 4 Units.**

Graphic representation and communication of physical place characteristics, design and physical planning ideas, and concepts using a variety of graphic techniques of free hand drawing, sketching, orthographic representations, scale drawings, 3D representations, maps, photo-documentation, and various media.

Restriction: Urban and Regional Planning Majors only.

**UPPP 205. Environmental Economics and Policy. 4 Units.**

Provides a broad introduction to environmental economics and to environmental policy. Environmental problems facing the United States and Europe are analyzed, and whenever possible, the environmental problems facing developing countries.

Restriction: Graduate students only.

**UPPP 206. Microeconomic Analysis for Urban Planning. 4 Units.**

Provides students with a working knowledge of basic microeconomic concepts. Emphasizes applications related to urban planning and policy analysis. Topics covered include demand analysis, firm behavior, market structure, public goods, externalities, and the role of economics in land markets.

Restriction: Graduate students only.

**UPPP 207. Land-Use Law. 4 Units.**

Investigates legal and institutional frameworks for development control. Review of constitutional issues implicated in land-use regulation. Traces development control historically and analyzes contemporary approaches to land-use control which reflect environmental and economic development concerns.

Same as CLS C207.

Restriction: Graduate students only.

**UPPP 209. Qualitative Research Methods: Overview. 4 Units.**

Introduction to fundamentals of "qualitative" research and non-positivistic inquiry. Formulation of research questions, selection of method, data collection techniques, and analysis (briefly). Overview of selected methods from ethnography, naturalistic field research, phenomenology, ethnoarchaeology, critical approaches, and others.

Restriction: Graduate students only.

**UPPP 210. Practice Experience . 4 Units.**

Provides Master of Urban and Regional Planning students an opportunity to link classroom knowledge with real planning situations through a 10-week unpaid practice experience.

Restriction: Urban and Regional Planning Majors only.

**UPPP 212. Transportation Planning and Policy. 4 Units.**

Introduces current topics in transportation planning. Includes an analysis of the economic role of transportation in urban areas, land-use impacts of transportation projects, traffic congestion, air quality, alternatives to the automobile, and other transportation topics.

Restriction: Graduate students only.

**UPPP 213. Advanced Qualitative Methods: Analyzing Qualitative Data. 4 Units.**

Introduction to the theory and practice of analyzing qualitative data. Students must have already learned about data collection and research design for qualitative research and must have qualitative data they can analyze.

Same as MPHD 297K, PLSC 273A.

Restriction: Graduate students only.

**UPPP 214. Quantitative Analysis for Planners. 4 Units.**

Introduces students to the basic statistical concepts used to address issues of public concern. Prepares students to perform, interpret, and evaluate quantitative data analyses commonly used in professional studies.

Restriction: Graduate students only.

**UPPP 215. Analytical Methods for Planning. 4 Units.**

Emphasizes the development of analytical techniques proven useful in the fields of management and administration. Topics include multiple regression, cost-benefit analysis and discounting, decision trees, and other techniques useful for the purposes of community analysis and planning.

Restriction: Graduate students only.

**UPPP 220. Qualitative Methods: Fieldwork and Data Collection. 4 Units.**

Covers fieldwork, data collections techniques, and related issues for anti-positivistic research. Data collection techniques include observation, physical traces, participation, in-depth interview. Data checks include veracity, detail, completeness, rigor.

Restriction: Graduate students only.

**UPPP 221. Public Policy. 4 Units.**

Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Same as CLS C255, PLSC 221A.

Restriction: Graduate students only.

**UPPP 224. Environmental Politics and Policy. 4 Units.**

Reviews and critiques literature on discussion topics including: the nature and effectiveness of environmental movements and policies; the role of science and technology; the use of economic incentives in policy; decentralization of decision making; and creating arenas for public involvement.

Restriction: Graduate students only.

**UPPP 228. Demographics for Planning and Policy. 4 Units.**

Provides planning and policy practitioners with a condensed, nonspecialist orientation to the sources, applications, and interpretation of population statistics, and conveys the steps used in constructing local-area population forecasts and projections.

Restriction: Graduate students only.

**UPPP 231. Transportation and Environmental Health. 4 Units.**

Critically evaluates how transportation can promote sustainable, healthy, and equitable cities. Examines the interaction of transportation systems with urban form, land use, community health, and environmental quality.

Restriction: Graduate students only.

**UPPP 235. Geographic Information Systems (GIS) Problem Solving in Planning. 4 Units.**

Explores the application of geographic information systems (GIS) in urban planning. Steps through a GIS-based planning procedure that balances housing, jobs, tax base, utilities, transportation, and the natural environment.

Restriction: Graduate students only.

**UPPP 237. Introduction to Geographic Information Systems. 4 Units.**

Application of Geographic Information Systems (GIS) to the field of urban and regional planning. Emphasizes current issues that occur in actual implementation settings. Lecture/discussion followed by laboratory demonstrating the area of GIS discussed. Offers 'hands-on' student usage of GIS software.

**UPPP 239. Urban Design Theories and Applications. 4 Units.**

Introduction to contemporary and traditional theories of urban design and their applications. Organized around one question: How might planning and design of built environment contribute to making a good city? National and international case studies are introduced.

Restriction: Graduate students only.

**UPPP 243. Health Policy and Management. 4 Units.**

Multidisciplinary inquiry into theory and practice concerned with delivery, quantity, costs of health care for individuals and populations. Explores managerial and policy concerns regarding structure, process, outcomes of health services including the costs, financing, organization, outcomes, and accessibility of care.

Same as PUBH 222.

Restriction: Master of Public Health Degree students have first consideration for enrollment. Master of Public Policy Degree students have first consideration for enrollment. Graduate students only. Public Health Majors have first consideration for enrollment. Urban and Regional Planning Majors have first consideration for enrollment.

**UPPP 244. Land-Use Policy. 4 Units.**

Examination of the role of public policy in guiding growth and development in urban and suburban environments. Description of a wide-ranging set of growth policies, the rationales underlying their use, controversies and legal constraints, and evaluation of their effectiveness.

Restriction: Graduate students only.

**UPPP 246. Housing Policy. 4 Units.**

Examines theories and practices of housing policy and the relationship of housing to larger neighborhood, community, and regional development issues. Considers the roles of private for-profit and not-for-profit developers, lenders, and all levels of government in the provision of housing.

Prerequisite: Familiarity with basic statistics is required.

**UPPP 251. Poverty and Development . 4 Units.**

Examines competing conceptualizations, methods of measurement, and poverty alleviation strategies widely used in developing countries. Focuses on poverty conceptualized as economic deprivation, well-being, vulnerability, and social exclusion.

Same as SOCL 235.

Restriction: Graduate students only.

**UPPP 252. Issues in Environmental Law and Policy. 4 Units.**

Treatment of legal and policy strategies for promoting environmental protection and deterring environmental degradation within the context of other societal objectives. Topical approach with a focus on problems of special interest to criminologists and to environmental policy specialists.

Same as CLS C252.

Restriction: Graduate students only.

**UPPP 266. Economic Democracy . 4 Units.**

Explores a wide range of radical democratic and egalitarian visions (including but not limited to the Marxist tradition) for a more sane, just, and sustainable future.

Restriction: Graduate students only.

**UPPP 273. Global Urbanization. 4 Units.**

Examines the spread of cities worldwide in the 20th century. What are the political and economic causes of this process? What are the social-cultural, political, and economic effects? How is contemporary urbanization linked to global restructuring of other kinds.

Same as SOCL 252A.

Restriction: Graduate students only.

**UPPP 275. Special Topics in Urban Planning. 4 Units.**

Special topics in urban and regional planning are offered from time to time, but not on a regular basis. Course content varies with interest of the instructor.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**UPPP 279. Theories of Power and Empowerment. 4 Units.**

Studies different ways of thinking about power and its uses. Explores theories of power that inform various notions of empowerment, including resistance, participatory democracy, and workplace empowerment.

Same as MPPH 297R, PLSC 223A.

Restriction: Graduate students only.

**UPPP 281. Advanced Theory. 4 Units.**

Provides urban planning and public policy students with an introduction to advanced theory. Addresses broad theoretical approaches that cut across disciplinary and topical boundaries. Designed primarily for Ph.D. students.

**UPPP 282. Urban Design Studio for Planners: An Introduction. 4 Units.**

Introductory urban design for planners. Organized around a variety of assignments to encourage learning by design in a studio setting. Students work on design projects and drawing assignments to learn practical aspects of urban design.

Restriction: Graduate students only.

**UPPP 283. Collaborative Governance and Public Management. 4 Units.**

Introduction to inclusive management. To make effective use of public resources, public managers are inventing ways of managing that alter relationships within organizations, between organizations, between sectors, and with the public. Requires rethinking fundamentals such as leadership and motivation.

Same as PPOL 283.

Restriction: Public Policy Majors have first consideration for enrollment.

**UPPP 292. Professional Report. 4 Units.**

Workshop designed to assist M.U.R.P. students in conducting their professional reports. Students select topics, design projects, conduct professional investigations, and write up reports.

**UPPP 294A. Urban Planning Practicum I. 4 Units.**

Engages students in practical planning projects in the community under a central theme within Planning. Students take a problem-solving approach and employ and further develop data gathering, analysis, graphic and oral communication, public engagement, and report writing skills.

Restriction: Graduate students only.

**UPPP 294B. Urban Planning Practicum II. 4 Units.**

Engages students in practical planning projects in the community under a central theme within Planning. Students take a problem-solving approach and employ and further develop data gathering, analysis, graphic and oral communication, public engagement, and report writing skills.

Prerequisite: PPD 294A

Restriction: Graduate students only.

**UPPP 296. Doctoral Dissertation Research and Writing. 2-12 Units.**

Dissertation research with Urban Planning and Public Policy faculty.

Prerequisite: Advancement to candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**UPPP 297. Research Design. 4 Units.**

Provides training in research design and methods. Students learn how to evaluate the strength of research findings based on the methods used by a researcher and learn to use lessons from the course to develop a research proposal.

Restriction: Graduate students only.

**UPPP 298. Directed Studies in Urban Planning. 2-4 Units.**

Directed studies in Urban Planning.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**UPPP 299. Independent Study in Urban Planning. 2-8 Units.**

Independent Study in Urban Planning.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

## Department of Criminology, Law and Society

**Mona Lynch, Department Chair**

2340 Social Ecology II

949-824-0047

<http://cls.soceco.uci.edu/>

The Department of Criminology, Law and Society focuses on the problem of crime and on understanding the social, cultural, political, and economic forces that interact with the law. Basic courses present overviews of American legal systems with particular emphasis on criminal and juvenile justice, forms of criminal behavior, the role of law in understanding social and psychological phenomena, and the applications of sociological theory in understanding law and legal systems. Subsequent course work provides a deeper understanding of the causes and consequences of crime, criminal justice policy, and socio-legal theory, including how legal institutions can both address problems of inequality and exacerbate those problems.

Students are provided with opportunities to become acquainted with the varieties of behavior that society chooses to control or regulate, the methods and institutions used to achieve that control or regulation, and the approaches aimed specifically at altering behavior deemed unacceptable. In addition, there is provision for students to use their increasing knowledge of the law, its procedures, and institutions to enhance their understanding of the social sciences.

The course of study provides excellent preparation for law school and for graduate study in sociology, criminology, and criminal justice. Careers for students who terminate their University education at the baccalaureate level may be developed through placements in criminal justice and regulatory agencies, in organizations determining public policy, and in programs that deliver services to people who have difficulties with some aspect of the legal system.

Field study placements are available in police departments, public defenders' offices, probation and parole agencies, the Orange County District Attorney's Office, the State juvenile detention system, the Orange County Victim/Witness Assistance Program, juvenile shelters, legislative offices, and in private legal firms.

- Criminology, Law and Society, B.A.
- Criminology, Law and Society, Master of Advanced Study
- Criminology, Law and Society, Minor
- Criminology, Law and Society, Ph.D.
- Master of Legal and Forensic Psychology
- Race and Justice Studies, Graduate Emphasis

## Faculty

Hillary Berk, Ph.D. University of California, Berkeley, *Assistant Professor of Teaching of Criminology, Law and Society* (sociology of law/law and society, gender, family, reproduction and surrogacy, law and emotion, civil rights, dispute resolution)

Arnold Binder, Ph.D. Stanford University, *Professor Emeritus of Criminology, Law and Society* (research methodology, juvenile delinquency, police organization and methods)

Lee Cabatingan, Ph.D. University of Chicago, *Assistant Professor of Criminology, Law and Society; Anthropology* (Caribbean law and sovereignty; construction of authority at the Caribbean Court of Justice)

Kitty C. Calavita, Ph.D. University of Delaware, *Professor Emerita of Criminology, Law and Society* (sociology of law, criminology, social deviance, immigration, inequality)

Simon A. Cole, Ph.D. Cornell University, *Professor of Criminology, Law and Society; History; School of Law* (science, technology, law, criminal justice)

Susan B. Coutin, Ph.D. Stanford University, *Professor of Criminology, Law and Society; Anthropology; Religious Studies* (law, culture, immigration, human rights, citizenship, political activism, Central America)

Elliott P. Currie, Ph.D. University of California, Berkeley, *Professor of Criminology, Law and Society* (criminal justice policy in the U.S. and other countries, causes of violent crime, social context of delinquency and youth violence, etiology of drug abuse and assessment of drug policy, race and criminal justice)

Teresa A. Dalton, Ph.D. University of Denver, *Associate Professor of Teaching of Criminology, Law and Society* (quantitative methodology, criminology, law and social sciences)

John D. Dombrink, Ph.D. University of California, Berkeley, *Professor Emeritus of Criminology, Law and Society* (crime and criminal justice, deviance and social control)

Brandon Golob, Ph.D. University of Southern California, *Assistant Professor of Teaching of Criminology, Law and Society* (law-related educational programs; social media and online privacy; inclusive pedagogy; media effects; law and popular culture)

Michael R. Gottfredson, Ph.D. University at Albany, State University of New York, *Chancellor's Professor of Criminology, Law and Society; School of Law; Sociology* (criminology, juvenile delinquency, crime theory, public policy)

Sora Han, Ph.D. University of California, Santa Cruz, *Director of the Graduate Program in Culture and Theory and Associate Professor of Criminology, Law and Society; African American Studies; Culture and Theory; School of Law* (law and popular culture, critical race theory, philosophies of punishment, feminism and psychoanalysis)

John R. Hipp, Ph.D. University of North Carolina at Chapel Hill, *Professor of Criminology, Law and Society; Sociology; Urban Planning and Public Policy* (community context of crime, household decisions and neighborhood change, research methods)

Valerie Jenness, Ph.D. University of California, Santa Barbara, *Distinguished Professor of Criminology, Law and Society; Sociology* (links between deviance and social control [especially law], the politics of crime control and criminalization, social movements and social change, corrections and public policy)

Charis E. Kubrin, Ph.D. University of Washington, *Professor of Criminology, Law and Society; Sociology* (crime, neighborhood effects and social processes, race/ethnicity and violence, immigration and crime)

Elizabeth F. Loftus, Ph.D. Stanford University, *UCI Distinguished Professor of Psychological Science; Cognitive Sciences; Criminology, Law and Society; School of Law* (cognitive psychology, human memory, psychology and law)

Mona Lynch, Ph.D. University of California, Santa Cruz, *Professor of Criminology, Law and Society; School of Law* (law and society, psychology and law, punishment and society, race and criminal justice)

Cheryl Lee Maxson, Ph.D. University of Southern California, *Professor Emerita of Criminology, Law and Society* (crime and delinquency, youth violence, street gangs, juvenile justice system and policing)

Richard D. McCleary, Ph.D. Northwestern University, *Professor of Criminology, Law and Society; Urban Planning and Public Policy* (criminal justice, research methodology, statistics)

James W. Meeker, J.D., Ph.D. State University of New York at Buffalo, *Professor Emeritus of Criminology, Law and Society; Sociology* (sociology of law, criminal justice, research methodology, statistics, access to civil justice)

Ana Muñoz, Ph.D. University of California, Los Angeles, *Assistant Professor of Criminology, Law and Society* (gang profiling, youth justice, gang injunctions and databases, immigration enforcement, policing, race, state violence)

Emily Owens, Ph.D. University of Maryland at College Park, *Professor of Criminology, Law and Society; Economics* (how government policies affect the prevalence of criminal activity as well as how agents within the criminal justice system, particularly police, prosecutors, and judges, respond to policy changes)

Henry N. Pontell, Ph.D. State University of New York at Stony Brook, *Professor Emeritus of Criminology, Law and Society; Sociology* (white-collar and corporate crime, criminology, criminal justice, deviance and social control, sociology of law)

Keramet Reiter, Ph.D. University of California, Berkeley, *Associate Professor of Criminology, Law and Society; School of Law* (prisons and extreme punishments, legal history, criminal justice policy, criminal and civil rights law, law and society)

Nancy Rodriguez, Ph.D. Washington State University, *Professor of Criminology, Law and Society* (race, crime, and justice; juvenile justice; collateral consequences of imprisonment; criminal justice policy)

Nicholas I. Scurich, Ph.D. University of Southern California, *Associate Professor of Psychological Science; Criminology, Law and Society; School of Law* (judgment and decision making, juridical proof, violence risk assessment)

Christopher Seeds, Ph.D. New York University, *Assistant Professor of Criminology, Law and Society* (punishment and social control, law and society, criminal justice, social theory, life sentencing and capital punishment)

Carroll S. Seron, Ph.D. New York University, *Professor Emerita of Criminology, Law and Society; School of Law* (sociology of law, sociology of professions, law and society, sociology of legal profession, methods and police misconduct)

Naomi Sugie, Ph.D. Princeton University, *Associate Professor of Criminology, Law and Society; Sociology* (sociology of crime and punishment, inequality, families, demography, methods, new technologies for data collection)

Bryan Sykes, Ph.D. University of California, Berkeley, *Associate Professor of Criminology, Law and Society; Program in Public Health; Sociology* (demography, criminology, research methods, health, social inequality, statistics)

William C. Thompson, Ph.D. Stanford University, *Professor Emeritus of Criminology, Law and Society; Psychological Science; School of Law* (psychology and law, criminal justice, forensic science, expert evidence, human judgment and decision making, use of social science in appellate litigation)

George E. Tita, Ph.D. Carnegie Mellon University, *Professor of Criminology, Law and Society; Urban Planning and Public Policy* (criminology, community context of violence, urban youth gangs, homicide studies)

Susan F. Turner, Ph.D. University of North Carolina at Chapel Hill, *Professor of Criminology, Law and Society* (sentencing and corrections, applied research methods)

James D. Vigil, Ph.D. University of California, Los Angeles, *Professor Emeritus of Criminology, Law and Society* (urban research, urban poverty, culture change, socialization and education, psychological anthropology, street gangs in cross-cultural perspective, Mexico and U.S. southwestern ethnohistory, comparative ethnicity)

Kirk Williams, Ph.D. University of Arizona, *Professor of Criminology, Law and Society; Sociology* (family violence, youth violence, homicide studies, risk assessment, violence prevention program evaluation)

## Affiliate Faculty

Richard Arum, Ph.D. University of California, Berkeley, *Dean of the School of Education and Professor of Education; Criminology, Law and Society; Sociology*

Elizabeth E. Cauffman, Ph.D. Temple University, *Professor of Psychological Science; Criminology, Law and Society; Education; School of Law* (adolescent development, mental health, juvenile justice, legal and social policy)

Eve Darian-Smith, Ph.D. University of Chicago, *Department Chair and Professor of Global and International Studies; Anthropology; Criminology, Law and Society*

Joseph DiMento, Ph.D. University of Michigan, *Professor of School of Law; Criminology, Law and Society; Paul Merage School of Business; Urban Planning and Public Policy*

Howard A. Gillman, Ph.D. University of California, Los Angeles, *Chancellor and Professor of Political Science; Criminology, Law and Society; History; School of Law*

David Theo Goldberg, Ph.D. The Graduate Center, City University of New York, *Director of the UC Humanities Research Institute and Professor of Comparative Literature; Anthropology; Criminology, Law and Society* (race, racism, race and the law, political theory, South Africa, digital humanities)

Michele B. Goodwin, J.D. Boston College, *Director, Center for Biotechnology and Global Health Policy and UCI's Chancellor's Professor of School of Law; Criminology, Law and Society; Gender and Sexuality Studies; Program in Public Health*

Nancy Guerra, Ed.D. Harvard University, *Dean of the School of Social Ecology and Professor of Psychological Science; Criminology, Law and Society* (childrens' aggression and behavior problems, prevention of youth violence, promotion of healthy youth development)

William M. Maurer, Ph.D. Stanford University, *Dean of the School of Social Sciences and Professor of Anthropology; Criminology, Law and Society; School of Law* (anthropology of law, globalization, Caribbean, anthropology of money and finance, gender and kinship)

Candice Odgers, Ph.D. University of Virginia, *Professor of Psychological Science; Criminology, Law and Society* (developmental and quantitative psychology; social inequalities and child health; new technologies and adolescent development)

Vibhuti Ramachandran, Ph.D. New York University, *Assistant Professor of Global and International Studies; Criminology, Law and Society*

Ruben G. Rumbaut, Ph.D. Brandeis University, *Distinguished Professor of Sociology; Chicano/Latino Studies; Criminology, Law and Society; Education* (international migration, immigration laws, criminalization, incarceration, social inequality and mobility, race and ethnicity)

Charles Smith, Ph.D. University of California, San Diego, *Professor of Political Science; Criminology, Law and Society* (law and legal institutions, comparative and international law)

Ann Southworth, J.D. Stanford University, *Professor of School of Law; Criminology, Law and Society*

Shauhin A. Talesh, J.D., Ph.D. University of Connecticut, University of California, Berkeley, *Director, Law and Graduate Studies Program and Professor of School of Law; Criminology, Law and Society; Sociology*

Kristin E. Turney, Ph.D. University of Pennsylvania, *Associate Professor of Sociology; Criminology, Law and Society* (social inequality, family demography, population health, incarceration and punishment, intergenerational transmission of disadvantage, child well-being)

## Courses

### **CRM/LAW C7. Introduction to Criminology, Law and Society . 4 Units.**

Introduces characteristics of the U.S. criminal justice system, including responses to crime, components of the system, and current challenges to the system. Examines structure and function of police and courts, criminal procedure, and sentencing and incarceration policies.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

(III)

### **CRM/LAW C10. Fundamentals of Criminology, Law and Society . 4 Units.**

Introduces three interdisciplinary literatures: criminology, socio-legal studies, and justice studies. Focuses on theoretical and empirical work addressing law making, law breaking, and legal systems.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

(III)

### **CRM/LAW H80. The Properties of Property. 4 Units.**

Develops an understanding and critique of private property. Draws from interdisciplinary sources to explore the foundations of private property, the institutions that support it over time, and possible alternatives to it.

Restriction: Campuswide Honors Collegium students only.

(III)

### **CRM/LAW C100. Special Topics in Criminology, Law and Society. 4 Units.**

Course content varies with interest of the instructor.

Repeatability: Unlimited as topics vary.

### **CRM/LAW C101. American Law. 4 Units.**

Introduction to substantive and procedural law governing private dispute resolution, including common law (tort, property, contracts), lawsuits (civil procedure), and alternative dispute resolution; emphasis on the socio-legal ramifications of private disputes, particularly the modern tort system and tort reform movement.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C102. Introduction to the Comparative Study of Legal Cultures. 4 Units.**

Traces the anthropological and comparative cultural study of law from the nineteenth century to the present; briefly surveys the diversity of recorded legal cultures and critically examines key concepts which have been used to describe and classify them.

Same as INTL ST 124A.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**CRM/LAW C103. US Legal Thought. 4 Units.**

Evolution of legal thought in socio-historical context from 19th century to present; emphasizes the rise and fall of legal classicism and modern socio-legal critiques, including the law and society movement, critical legal studies, feminist legal theory, and critical race studies.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C104. Sociology of Law. 4 Units.**

Examines law creation and law enforcement in their social and political context. Discusses the major theories of law and the modern state, and presents case studies in order to evaluate the strengths and weaknesses of these theoretical perspectives.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C105. Psychology and the Law. 4 Units.**

Psychological assumptions of the American legal system and mental health aspects of provision of criminal justice services. Civil commitment, insanity defense, competence to stand trial, jury selection, eyewitness identification. Use of police, courts, correctional institutions in prevention of behavior disorder.

Same as PSCI 193E.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment.

**CRM/LAW C106. Crime and Public Policy. 4 Units.**

Explores nature and dimensions of crime in America and uses and limits of various strategies to control it. Topics include growth of imprisonment, the problem of domestic violence, the death penalty, gun control, and the potential of crime prevention programs.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C107. Deviance. 4 Units.**

Perspectives on deviance and criminality in behavior, institution, community, and myth. The suitability of contemporary theories of deviant behavior.

Same as SOCIOL 156, PSYCH 177D.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**CRM/LAW C108. Criminological Theory. 4 Units.**

Explores the question of crime causation from a number of theoretical perspectives in the social sciences. Schools of thought examined include utilitarianism, positivism, human ecology, social structural approaches, social process (learning) theories, labeling, and radical-critical (political) perspectives.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C109. Juvenile Delinquency. 4 Units.**

Patterns of delinquent behavior, theories that explain behavior, current research aimed at enhancing exploratory power. Attempts to prevent and control delinquency are put in historical perspective. Development of the current juvenile justice system and evolution of modern juvenile law.

Same as PSCI 193B.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment.

**CRM/LAW C110. Community Context of Crime. 4 Units.**

Examines the social context of high-crime communities, with special emphasis on the problems of poverty, joblessness, economic inequality, and racial discrimination. Assesses debates on the causes of these problems, and on the most effective policies to combat them.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C111. Theories of Punishment. 4 Units.**

Survey of the various schools of thought regarding formal punishment theory. The purposes of legal sanctions are examined, including those of deterrence, rehabilitation, retribution, and incapacitation. Considers problems in realizing formal goals of punishment in practice.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C112. Legal Sanctions and Social Control. 4 Units.**

Examination of criminal sanctions as mechanisms of social control. Includes the nature, function, and organization of courts as sanction generating institutions, and problems associated with punishing white-collar and corporate illegalities.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C113. Gender and Social Control. 4 Units.**

Examines the legal system's use of sex as an organizing characteristic, focusing particularly on sameness and difference feminism, and tracing the evolution of equal treatment of men and women in the areas of constitutional rights, employment, education, and military service.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C114. Miscarriages of Justice. 4 Units.**

Systematically describes, explains, and analyzes the causes and consequences of the wrongful accusation, prosecution, incarceration, and sometimes even execution, of the innocent in the American criminal justice system.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C115. Prisons, Punishment, and Corrections. 4 Units.**

A review of how the U.S. punishes and rehabilitates convicted law violators. The conflicts among the major purposes of sentencing—rehabilitation, deterrence, incapacitation—are discussed, as well as the effects of different sanctions on public safety, offender rehabilitation, and justice system costs.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C116. Race, Ethnicity, and Social Control. 4 Units.**

Provides a historical and sociological survey of racial and ethnic group relations in contexts of crime control, emphasizing the roles of racial ideology, structural racism, and social movements in shaping these dynamic relations, and their significance to American liberal democracy.

Same as CHC/LAT 152A.

**CRM/LAW C117. Imprisonment and Reentry. 4 Units.**

Offers an overview of imprisonment and reentry in the contemporary United States. Examines the development of the prison in the United States and explores changes in its composition, structure, and purpose over time.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C118. Domestic Violence. 4 Units.**

General perspectives about domestic violence and theoretical accounts about what causes such behavior.

Same as SOCECOL 118.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C119. Violence in Intimate Relationships. 4 Units.**

Responses to various forms of domestic violence, such as intimate partner violence and child abuse. Covers barriers to reporting to the police, and prosecutors and courts. Human services, such as safety planning for victims, treatment programs, and restorative justice approaches.

Corequisite:

Same as SOCECOL 119.

**CRM/LAW C120. Law and Inequality. 4 Units.**

Various aspects of the law as related to three specific areas of inequality: immigration and immigrants, race, and gender. The role of law as a tool of social reform and limitations of the legal system historically in resolving inequality issues.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C122. Constitutional Law. 4 Units.**

Examines the evolution of civil liberties and individual rights in the United States, focusing on how Constitutional Amendments and U.S. Supreme Court decision-making have shaped the ongoing political and legal struggles over issues such as privacy, abortion, and free speech.

Overlaps with POL SCI 174A.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C123. Family Law. 4 Units.**

Examines legal issues surrounding marriage, cohabitation, divorce, child custody and support, adoption, and the rights of parents and children in the family context. The findings of social science research are used to illuminate the legal issues.

Same as PSCI 193F.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C124. Mental Health and the Justice System. 4 Units.**

Covers the history of criminalization of persons with mental illness; challenges and needs; civil and outpatient commitment; law enforcement responses; mentally ill in jails and prisons; community supervision strategies; and reentry strategies for offenders with mental illness.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C127. Hate Crimes. 4 Units.**

Examines the causes, manifestations, and consequences of hate crimes and the larger social context within which they occur. The politics and dynamics of intergroup violence born of bigotry and manifested as discrimination; social policy designed to control bias-motivated violence.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C128. Environmental Law and Policy . 4 Units.**

Environmental law as a combination of traditional legal principles and newly created statutes, rules, and decisions applied to environmental protection. Investigates roles of courts, legislature, executive branch and administrative agencies, and private citizens attempting to regulate environmental quality.

Same as UPPP 133.

Restriction: Criminology, Law and Society Majors only. Planning, Policy, and Design Majors only.

**CRM/LAW C130. Seminar on Gangs. 4 Units.**

An overview of gangs, including the nature and definition of gangs; types of gangs; diversity of membership; theoretical explanations; criminal behavior; drug use and sales; law enforcement responses; gangs in correctional institutions; intervention and prevention strategies; and public policy issues.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C131. Organized Crime and American Society. 4 Units.**

Examination of the phenomenon of American organized crime from a sociological perspective. Explanation of methods by which organized crime is tolerated at various levels of society. Emphasis on ways in which 'underworld' interests interact with legitimate economic and political institutions.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C132. Forensic Science, Law, and Society. 4 Units.**

Examines use of 'forensic science' to resolve issues arising in criminal cases including crime scene analysis, DNA testing, fingerprints, trace evidence comparisons, profiling, lie detectors, other forensic techniques; evaluation, statistical characterization, and legal admissibility of evidence; regulation of forensic laboratories.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C133. Homicide and Suicide. 4 Units.**

Examines similarities and differences among homicide and suicide, two major causes of death.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C134. Victimless Crimes. 4 Units.**

Examines major theoretical, empirical, and policy-oriented research related to the design, implementation, and analysis of government intervention, through the criminal sanction, in the spheres of vice and morality.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C135. Mass Incarceration and Social Inequality in America. 4 Units.**

Explores the origins and consequences of mass incarceration; extraordinarily high incarceration rates within particular demographic groups above and beyond historical levels in the U.S. Theoretical explanations for, and current policy debates around, mass incarceration are covered.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C136. Forensic Psychology: Advanced Seminar. 4 Units.**

Focuses on the psychology of criminal offending, particularly violent behavior. Examines violence, sexual offending, and mental disorder related to crime with regard to clinical assessment and treatment; mental health services within forensic institutions.

Prerequisite: (PSCI 9 or PSCI 11C or PSYCH 7A or PSYCH 9C) and PSCI 102C and (PSCI 178S or CRM/LAW C149)

Same as PSCI 156C, PSYCH 177F.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C139. Police and Change. 4 Units.**

Organizational efforts to modify police conduct are addressed by focusing on the history of policing in the United States including training, education, and the contributions of women.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C140. Surveillance and Society. 4 Units.**

Explores the development and deployment of surveillance technologies in contemporary society. The social and legal impact of surveillance technologies, in such areas as crime control, privacy, trust, community, democracy, and the war on terror.

Restriction: Criminology, Law and Society Majors only.

**CRM/LAW C142. White-Collar Crime. 4 Units.**

Examines criminal activity in business and corporate enterprise, organizations, and the professions. Theories regarding the causes and control of white-collar and corporate crime are covered as well as the numerous definitions of these terms.

Same as SOCIOL 142.

Restriction: Sociology Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C144. Criminal Law. 4 Units.**

Deals specifically with the substantive nature of criminal law and its historical development. Focuses on understanding the development of fundamental doctrinal principles upon which criminal law is based, including mens rea, actus reus, homicide, causation, group criminality, and exculpation.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C145. Government Crime. 4 Units.**

Examines the legal, organizational, and political issues involved in the generation and control of government lawlessness. Readings present historical and theoretical perspectives in the abuse of government authority and the ability of the legal system to control such behavior.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C149. Violence in Society. 4 Units.**

Current theory and research on aggression; anger and violence as problems in individual and social functioning. Process and functions of anger examined with regard to normal behavior and psychopathology. The determinants, prevalence, and implications of violence in society are analyzed.

Prerequisite: PSCI 9 or PSCI 11C or PSYCH 7A or PSYCH 9C

Same as PSCI 178S.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment.

**CRM/LAW C150. The Legal Profession. 4 Units.**

Role of the legal profession in modern society, the diverse professional roles lawyers play, the American legal profession compared with that of other societies. 'Litigation explosion,' ethical problems, interactions between lawyers and other professionals, training and socialization of new lawyers.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C156. Cross-Cultural Research on Urban Gangs. 4 Units.**

Taking an urban policy approach, examines the background and contemporary traditions of gangs in several ethnic groups including African-, Asian-, and Mexican-Americans. Cross-cultural exploration of the varied facets of gang life. The major social-control institutions affecting them.

Same as CHC/LAT 153.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment. Chicano/Latino Studies Majors have first consideration for enrollment.

**(VII)**

**CRM/LAW C160. Forensic Psychology . 4 Units.**

Forensic psychology is the interface between clinical psychology and the law. Emphasizes clinically relevant legal topics (insanity defense; competency to stand trial) and includes critical thinking about issues that arise when psychologists are involved in legal proceedings.

Prerequisite: PSCI 9 or PSCI 11B or PSCI 11C

Same as PSCI 161C.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C162. Crime Hotspots. 4 Units.**

Criminological theories of local public safety hazards or hotspots are introduced. Spatial statistics are developed for different types of hotspots. Hotspot policing theories are introduced and research on the effectiveness of policing strategies is reviewed.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C163. Ethics and Politics of Justice. 4 Units.**

Theoretical perspective on how ethics and politics relate to criminal justice through an introduction to moral philosophy; consideration of specific theories of punishment and justice; and consideration of practical and empirical illustrations of the intersection of ethics, politics, and justice.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C164. Social Control of Delinquency. 4 Units.**

Assumes familiarity with theories of delinquency, the juvenile justice system, and elements of juvenile law. Explores socio-historical origins and evolution of juvenile justice, current research and policy on delinquency prevention and treatment, and future directions of law, policy, and practice.

Prerequisite: Recommended: CRM/LAW C109.

Same as PSCI 193C.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C165. The Death Penalty. 4 Units.**

Examines why the U.S. continues to have a death penalty when so many other countries have abandoned it. Arguments for and against the death penalty are covered.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C167. Crime Measurement. 4 Units.**

The strengths and weaknesses of three crime measures (police reports, victim surveys, and offender self-reports) are illustrated through analyses of research articles. Common measurement problems are analyzed with a focus on reliability and validity.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C168. Extreme Punishment . 4 Units.**

Explores the history and law of America's Eighth Amendment prohibition against cruel and unusual punishment, examining the death penalty, long prison sentences, harsh confinement conditions, and other punishments. Students debate practical, legal, and moral arguments for and against these punishments.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C169W. Advanced Research Methods. 4 Units.**

For students planning to conduct senior research projects or apply to graduate school in social research fields. Topics include reviewing literature, preparing a research proposal, protecting human subjects, citing scholarly work, building measures, estimating sample size, interview and presentation skills.

Prerequisite: SOCECOL 10 and SOCECOL 13. Satisfactory completion of the Lower-Division Writing requirement.

Same as SOCECOL 111W, PSCI 111W, UPPP 114W.

(Ib)

**CRM/LAW C172. Culture Change and the Mexican People. 4 Units.**

Reviews culture contact and colonization, innovation diffusion, acculturation, assimilation, culture conflict and marginality, modernization, urbanization, legal transformations. Mexico and the Southwestern U.S. are reviewed through several centuries to better appreciate the indigenous base of the Mexican people.

Same as CHC/LAT 155.

**CRM/LAW C173. Maritime Piracy, Law and Society. 4 Units.**

Explores the historical and contemporary images and reality of pirates and piracy since the 16th century across the globe through an analysis of primary sources, key historiographical and legal debates, and criminological theories.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C174. Immigration and Crime. 4 Units.**

Examines immigration and crime in the global context, highlighting immigrants as criminals and victims; immigration and crime control; immigrants' perceptions of the criminal justice system; public discourse and public perception on immigration and crime; and human rights issues.

**CRM/LAW C175. Issues in Policing. 4 Units.**

Lectures and readings focus on the history and strategies of policing, measuring the quality of policing, and police misconduct. Strategies for enhancing the quality of policing for controlling misconduct are covered.

**CRM/LAW C176. Classics in Crime Cinema. 4 Units.**

A multidimensional understanding of crime films and how they shape public thinking about crime and criminals.

Restriction: CRM/LAW C176 and CRM/LAW C20 may not be taken for credit.

**CRM/LAW C177. Eyewitness Testimony. 4 Units.**

Faulty eyewitness testimony is a major cause of wrongful convictions. Covers the fast-growing topic of eyewitness testimony and memory for real-world events, both how psychologists study eyewitness capacity, and how the legal system has dealt with eyewitness issues.

Prerequisite: SOCECOL 10

Same as PSCI 193G.

Restriction: Seniors only. Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

Concurrent with CRM/LAW C263.

**CRM/LAW C178. Critical Race Theory. 4 Units.**

Introduction to Critical Race Theory and key American cases on racial inequality. Using this literature, examines the possibilities and pitfalls of legal claims of race, gender, and sexuality discrimination in the age of colorblindness.

Same as AFAM 157.

Restriction: Upper-division students only.

**CRM/LAW C179. Race and Incarceration. 4 Units.**

Examines the racial politics of mass incarceration through historical, empirical, theoretical, and legal frameworks. Focuses on race, gender, and sexual differences to develop a critique on policing, incarceration, and other forms of punishment.

**CRM/LAW C180. Power, Constructions of Deviance, and Social Control . 4 Units.**

Examines the forms and limits of power in the construction of social deviants. Theories of state power are covered to understand the prison system as a contemporary driver of social inequality. The collateral consequences of mass incarceration are discussed.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment.

**CRM/LAW C182. Illegal Economics. 4 Units.**

How illegal firms function in illegal markets, why individuals participate in these groups and markets, and what federal, state, and local governments do to disrupt organized illegal activity.

Same as ECON 146A.

Restriction: Business Economics Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C183. Controversies, Courts, Cultures: The Anthropology of Law. 4 Units.**

Assesses the contributions anthropology has made to legal scholarship, reviewing historical and contemporary themes. Considers both comparative questions of law's norms, structures, and practices around the globe, and the specific insights anthropology offers about contemporary U.S. law.

Same as ANTHRO 127.

(III)

**CRM/LAW C186. Social Media and The Law. 4 Units.**

Examines legal and policy issues raised by the rise of social media. Surveys how social networking platforms and other emerging technologies impact the right to privacy, public perceptions of judicial systems, and the law generally.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C187. Undocumented Immigrant Experiences. 4 Units.**

Examines the experiences of undocumented immigrants and the policies that structure their educational, economic, social, and political participation.

Same as ASIANAM 130, CHC/LAT 164A, SOCIOL 177C.

(III and VII ).

**CRM/LAW C190. Applied Statistics in Social and Behavioral Research. 4 Units.**

Covers statistical techniques used to describe and make generalizations about phenomena represented by data. Hands-on experience in data analysis and interpretation using statistical software (SPSS, STATA) is emphasized. Topics include data visualization, ANOVA, multiple regression, and categorical data analyses.

Prerequisite: SOCECOL 13

Same as PSCI 190, SOCECOL 190, UPPP 190.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**CRM/LAW C191. Law and Modernity. 4 Units.**

The rise and spread of Enlightenment legal traditions, social contract theory, individual rights, ideologies of 'liberty, equality, fraternity'; contradictions of liberal law, its understandings of 'primitive' and 'civilized'; pervasive myths of property, difference, race, and rights. Reading- and writing-intensive.

Same as ANTHRO 127A.

**CRM/LAW C196. Research Seminar in Criminology, Law and Society. 4 Units.**

Special topics research seminar. Content varies with interest of instructor. Capstone research opportunity with Criminology, Law and Society faculty members.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only. Anthropology Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**CRM/LAW C201. Research Methods. 4 Units.**

An introduction to techniques of inductive methodologies, including qualitative interviewing and participant observation, and deductive methodologies, including survey research and experimental and quasi-experimental design. Provides a sound overview of research methodology with tools to pursue specific methods in greater depth.

Restriction: Graduate students only.

**CRM/LAW C202. Research Methods II. 4 Units.**

Covers qualitative approaches (interview strategies, varieties of ethnography, archival and historical methods, etc.) and quantitative approaches (survey methods, experimental designs, secondary data sets, comparative and international data, etc.), and concludes with mixed-method approaches.

Prerequisite: CRM/LAW C201. CRM/LAW C201 with a grade of B or better

Restriction: Graduate students only.

**CRM/LAW C203A. Qualitative Methods Practicum. 4 Units.**

Designed to deepen students' familiarity with qualitative research strategies and to guide them through the initial stages of their Second Year Project requirement, such as the development of an original research proposal and/or a research instrument.

Prerequisite: CRM/LAW C202. CRM/LAW C202 with a grade of B or better

Restriction: Graduate students only.

**CRM/LAW C203B. Quantitative Methods Practicum. 4 Units.**

Deepens familiarity with quantitative research and provides a foundation for the second-year paper, e.g., initial models for data analysis and/or a replication study. Students evaluate what assumptions are necessary for credible inference in different evaluation approaches.

Prerequisite: CRM/LAW C202. CRM/LAW C202 with a grade of B or better

Restriction: Graduate students only.

**CRM/LAW C207. Land-Use Law. 4 Units.**

Investigates legal and institutional frameworks for development control. Review of constitutional issues implicated in land-use regulation. Traces development control historically and analyzes contemporary approaches to land-use control which reflect environmental and economic development concerns.

Same as UPPP 207.

Restriction: Graduate students only.

**CRM/LAW C210. Introduction to Criminology, Law and Society. 4 Units.**

Familiarizes students with the interrelated fields of criminology, law and society studies, and criminal justice studies. Organized around three well-established interdisciplinary literatures: criminology, sociolegal studies, and criminal justice studies.

Restriction: Graduate students only. Criminology, Law and Society Majors only.

**CRM/LAW C211. Legal Institutions and Society. 4 Units.**

Acquaints students with the institutions of U.S. legal system and its operations, as well as with the constitutional framework undergirding this system, and defines the relationship between U.S. citizens and government at a variety of levels.

Restriction: Graduate students only.

**CRM/LAW C212. Police, Courts, and Corrections. 4 Units.**

Focuses on basic policy issues in the administration of the criminal justice system. The key elements of the criminal justice system are police, courts, and corrections. Prepares students for continued study of these organizations.

Restriction: Graduate students only.

**CRM/LAW C213. Crime and Social Deviance. 4 Units.**

Examines the major social scientific perspectives on criminal and deviant behavior. Specific deviant and criminal activities are described and explained using established theoretical frameworks.

Restriction: Graduate students only.

**CRM/LAW C214. Research Methods. 4 Units.**

Structures research methodology, the approach to developing and evaluating knowledge of the sciences for use in criminal justice professional activities. Special emphasis on differentiating scientific approaches from pseudo-science.

Restriction: Graduate students only.

**CRM/LAW C215. Applied Statistics. 4 Units.**

Provides a basis for the use of fundamental statistical analysis techniques for solving public policy and management problems through a series of assignments, examinations, and online discussions and demonstrations.

Restriction: Graduate students only.

**CRM/LAW C216. Public Policy, Crime, and Criminal Justice. 4 Units.**

Increases understanding of crime, violence, and the criminal justice system. Assesses the state of knowledge on key policy issues of our time. Discusses the contribution of communities, schools, employment, drugs, guns, and alcohol to crime and violence.

Restriction: Graduate students only.

**CRM/LAW C217. Leadership. 4 Units.**

Introduces concepts, ideas, and theories about leadership and its operation. Explores leadership concepts through interviews with leaders from the community and fellow classmates.

Restriction: Graduate students only.

**CRM/LAW C218. Social Problems, Law, and Policy. 4 Units.**

Capstone course for M.A.S. program in Criminology, Law and Society. Students choose a social problem related to crime, criminal justice, and law; relate the problem to legal and social issues; and devise a plan of action to research the problem.

Restriction: Graduate students only. Criminology, Law and Society Majors only.

**CRM/LAW C219. Hate Crime. 4 Units.**

Examines the causes, manifestations, and consequences of hate crimes, as well as the larger social context within which they occur, are reacted to, and seem to be proliferating.

Restriction: Graduate students only.

**CRM/LAW C221. Sentencing and Corrections. 4 Units.**

Reviews U.S. attempts to punish and rehabilitate convicted law violators. Conflicts among major purposes of sentencing (rehabilitation, deterrence, incapacitation, and retribution) are discussed, as well as effects of different sanctions on public safety, offender rehabilitation, and justice system costs.

Restriction: Graduate students only.

**CRM/LAW C222. Ethnography. 4 Units.**

Explores the theory and practice of ethnography with a focus on anthropology, the discipline most associated with ethnography. Students are exposed to the theoretical underpinnings of ethnographic work, traditional and innovative practices, and sample ethnographies.

Same as ANTHRO 230F, CHC/LAT 217.

Restriction: Graduate students only.

**CRM/LAW C224. Organizational Perspectives on the Legal System. 4 Units.**

Familiarizes students with organization theory and research as ways to make sense of, navigate, and act on the legal system. Acquaints students with major frameworks in organization theory and their application to the system of legal organizations.

Restriction: Graduate students only.

**CRM/LAW C226. Causal Methods for Policy Analysis. 4 Units.**

Provides students with hands-on experience using existing data to estimate the impact of policy and law on individual behavior or aggregate social outcomes. Covers different econometric strategies used to identify causal effects in the absence of an experiment.

Restriction: Graduate students only.

**CRM/LAW C228. Criminology: Micro Approaches. 4 Units.**

Introduces students to the dominant theories in modern criminology, their theoretical antecedents and extensions, major empirical tests and implications for programs, policy and practice, and focuses on micro-level, individual theories of crime causation. Formerly Criminology, Law and Society C233A.

**CRM/LAW C229. Criminology: Macro Approaches. 4 Units.**

Introduces students to the dominant theories in modern criminology, their theoretical antecedents and extensions, major empirical tests and implications for programs, policy and practices, and addresses macro-level theories of crime causation. Formerly Criminology, Law and Society C233B.

**CRM/LAW C231. Crime and Gender . 4 Units.**

Examines the legal, political, social, economic, and policy implications of making gender (primarily) and race (secondarily) the focus in the study of crime, criminal law, and the criminal justice system.

Restriction: Graduate students only.

**CRM/LAW C232. Juvenile Delinquency. 4 Units.**

Examines the major theoretical perspectives regarding the onset, persistence, and desistance of juvenile delinquency, and examines empirical evidence for each perspective.

Restriction: Graduate students only.

**CRM/LAW C234. Anthropology of Law. 4 Units.**

Law has been a key site of anthropological inquiry since the discipline's nineteenth-century origins. Course introduces and critically assesses the contributions anthropology has made to sociolegal lytic trends.

Restriction: Graduate students only.

**CRM/LAW C238. White-Collar Crime. 4 Units.**

Examines the illegal behavior of individuals who commit crimes in the course of their employment. Special attention will be paid to ways in which power and organizational structure affect the behavior of the white-collar offenders.

Restriction: Graduate students only.

**CRM/LAW C239A. Law and Society I. 4 Units.**

Provides an introduction to the law and society field from its origins in social scientific, legal, and philosophical scholarship during the eighteenth, nineteenth, and early-twentieth centuries. Formerly Criminology, Law, and Society C239.

Restriction: Graduate students only.

**CRM/LAW C239B. Law and Society II. 4 Units.**

Building on Law and Society I, addresses contemporary issues in the field from mid-twentieth century to the present with emphasis on the degree to which the field's foundational assumptions are being challenged, refined, or confirmed through current research.

Prerequisite: CRM/LAW C239A

Restriction: Graduate students only.

**CRM/LAW C240A. Socio-Legal Workshop.**

Designed to foster intellectual discussion, encourage practice and skill-building in providing feedback, and build substantive knowledge of legal scholarship, this workshop is for both law and doctoral students across campus who are interested in interdisciplinary approaches to studying law.

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**CRM/LAW C240B. Socio-Legal Workshop.**

Designed to foster intellectual discussion, encourage practice and skill-building in providing feedback, and build substantive knowledge of legal scholarship, this workshop is for both law and doctoral students across campus who are interested in interdisciplinary approaches to studying law.

Prerequisite: CRM/LAW C240A

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**CRM/LAW C240C. Socio-Legal Workshop. 4 Units.**

Designed to foster intellectual discussion, encourage practice and skill-building in providing feedback, and build substantive knowledge of legal scholarship, this workshop is for both law and doctoral students across campus who are interested in interdisciplinary approaches to studying law.

Prerequisite: CRM/LAW C240B. CRM/LAW C240B with a grade of B or better

Restriction: Graduate students only.

**CRM/LAW C242. Crime Hotspots. 4 Units.**

Focuses on the criminological theory of hotspots, beginning with the “when, where, and why” questions and ending with the practical policing strategies that have been developed to mitigate hotspot public safety hazards.

Restriction: Graduate students only.

**CRM/LAW C248. Geographic Information Systems. 4 Units.**

Prepares students to become proficient in the basic GIS functionality including visualization, data management, and spatial analysis.

Restriction: Graduate students only.

**CRM/LAW C250. Preventing Errors of Justice. 4 Units.**

Examines the types of errors that are made in the U.S. criminal justice system and how we might prevent these errors, including failures to convict guilty offenders as well as wrongful convictions of the innocent.

Restriction: Graduate students only.

**CRM/LAW C252. Issues in Environmental Law and Policy. 4 Units.**

Treatment of legal and policy strategies for promoting environmental protection and deterring environmental degradation within the context of other societal objectives. Topical approach with a focus on problems of special interest to criminologists and to environmental policy specialists.

Same as UPPP 252.

Restriction: Graduate students only.

**CRM/LAW C253. Cybercrime, Cybersecurity, and Society. 4 Units.**

Introduces students to the world of cybercrime in the age of globally networked digital, and information and communication technologies (ICT). Presents a socio-legal approach to the study of cybercrime, cybersecurity, and how it relates to society.

Restriction: Graduate students only. Criminology, Law and Society M.A.S. students only.

**CRM/LAW C254. Immigration in the US: Economic, Fiscal, and Social Outcomes. 4 Units.**

The changing patterns of immigration in the U.S. and the role that immigrants play in our society. In particular, the economic and social outcomes of immigration, as well as the relationship between immigration, crime, and criminal justice policy.

Restriction: Graduate students only. Criminology, Law and Society Majors only.

**CRM/LAW C255. Public Policy. 4 Units.**

Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Same as UPPP 221, POL SCI 221A.

Restriction: Graduate students only.

**CRM/LAW C258. Crimmigration. 4 Units.**

Examines the criminalization of immigration, with an emphasis on U.S. enforcement procedures and outcomes. Analyzes the devolution of federal immigration law to local authorities, the rise in immigrant detention and deportation, and the militarization of the U.S.-Mexico border.

Same as CHC/LAT 225, SOCIOL 268.

Restriction: Graduate students only.

**CRM/LAW C260A. Race and Justice Studies Proseminar .**

A year-long proseminar conducted by a team of instructors specializing in race and justice studies. Conceived as a reading and peer mentor group focusing on intellectual and professional development. Required for students pursuing the Race and Justice Studies emphasis.

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**CRM/LAW C260B. Race and Justice Studies Proseminar.**

A year-long proseminar conducted by a team of instructors specializing in race and justice studies. Conceived as a reading and peer mentor group focusing on intellectual and professional development. Required for students pursuing the Race and Justice Studies emphasis.

Prerequisite: CRM/LAW C260A

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**CRM/LAW C260C. Race and Justice Studies Proseminar. 4 Units.**

A year-long proseminar conducted by a team of instructors specializing in race and justice studies. Conceived as a reading and peer mentor group focusing on intellectual and professional development. Required for students pursuing the Race and Justice Studies emphasis.

Prerequisite: CRM/LAW C260B

Restriction: Graduate students only.

**CRM/LAW C261. Race and Justice Studies Writing Seminar . 4 Units.**

A required writing-intensive seminar conducted by an instructor affiliated with the Race and Justice Studies emphasis. Students with manuscripts on relevant topics will read and critique peer manuscripts, and revise manuscripts toward completion of articles, dissertation chapters, and other publications.

Prerequisite: CRM/LAW C260C

Same as HUMAN 261, SOC SCI 253K.

Restriction: Graduate students only.

**CRM/LAW C262. Special Topics in Race and Justice Studies. 4 Units.**

A seminar focused on special issues in race and justice studies.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**CRM/LAW C263. Eyewitness Testimony. 4 Units.**

Examines the evidence that shows that faulty eyewitness memory is the major cause of wrongful convictions. Explores what the legal system thinks of eyewitness testimony and how the legal system has dealt with eyewitness issues.

Same as PSCI P263.

Restriction: Graduate students only.

**CRM/LAW C265. Memory and the Law. 4 Units.**

Examines the controversial topic of repressed memory, or perception and memory of real-world events.

Same as PSCI P265.

Restriction: Graduate students only.

**CRM/LAW C266. Psychology and the Law. 4 Units.**

Overview of how psychology is applied to the civil and criminal justice systems, how case law shapes this application, and how legal decisions affect the direction of psychological research. Interdisciplinary approach to research in psychology, law, and/or criminology.

Same as PSCI P266.

Restriction: Graduate students only.

**CRM/LAW C268. Contemporary Issues in Crime and Justice. 4 Units.**

Intensive reading and discussion of several recent works that raise critical issues for criminology and criminal justice policy, with a special emphasis on issues of inequality, diversity, and social justice.

Restriction: Graduate students only.

**CRM/LAW C275. Special Topics in Criminology, Law and Society. 4 Units.**

Topics covered vary with interests of instructor.

Repeatability: Unlimited as topics vary.

**CRM/LAW C280A. Professionalization Proseminar.**

Focuses on two areas that are key to scholarly and professional success in graduate school but are rarely discussed in a structured setting: 1) publishing in peer-reviewed academic journals; and 2) preparing for the academic job market.

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**CRM/LAW C280B. Professionalization Proseminar.**

Focuses on two areas that are key to scholarly and professional success in graduate school but are rarely discussed in a structured setting: 1) publishing in peer-reviewed academic journals; and 2) preparing for the academic job market.

Prerequisite: CRM/LAW C280A

Grading Option: In Progress (Letter Grade with S/U).

Restriction: Graduate students only.

**CRM/LAW C280C. Professionalization Proseminar. 4 Units.**

Focuses on two areas that are key to scholarly and professional success in graduate school but are rarely discussed in a structured setting: 1) publishing in peer-reviewed academic journals; and 2) preparing for the academic job market.

Prerequisite: CRM/LAW C280B

Restriction: Graduate students only.

**CRM/LAW C296. Doctoral Dissertation Research and Writing. 2-12 Units.**

Dissertation research with Criminology, Law and Society faculty.

Prerequisite: Advancement to candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**CRM/LAW C298. Directed Study. 2-4 Units.**

Directed study with Criminology, Law and Society faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**CRM/LAW C299. Independent Study . 2-8 Units.**

Independent research with Criminology, Law and Society faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Criminology, Law and Society, B.A.

The major in Criminology, Law and Society is designed to provide students with an overview of the American legal system and in-depth focus on the regulation of behavior, the problem of crime, and responses to crime within this system. Students explore these topics through multiple disciplinary perspectives, including anthropological, economic, historical, political, and sociological approaches to the study of law, behavior, and institutions of social control. In addition to learning to apply social science techniques to analyzing social problems, students in this course of study will be especially well-prepared for careers in criminal justice and regulatory agencies, public policy organizations, and direct service provision to people involved with the legal system as well as for pursuing graduate studies in law, sociology, criminology, and criminal justice.

### Undergraduate Program

#### Requirements for the B.A. in Criminology, Law and Society

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

#### Departmental Requirements

Eleven courses (44 units) as specified below:

A. Complete one lower-division gateway course:

CRM/LAW C10	Fundamentals of Criminology, Law and Society
-------------	--

B. Select one course from each of the following four groups:

<b>(1) The Legal System, Law and Society</b>	
CRM/LAW C101	American Law
CRM/LAW C102	Introduction to the Comparative Study of Legal Cultures
CRM/LAW C103	US Legal Thought
CRM/LAW C104	Sociology of Law
CRM/LAW C105	Psychology and the Law
CRM/LAW C122	Constitutional Law
CRM/LAW C123	Family Law
<b>(2) Crime and Criminology</b>	
CRM/LAW C106	Crime and Public Policy
CRM/LAW C107	Deviance
CRM/LAW C108	Criminological Theory
CRM/LAW C109	Juvenile Delinquency
CRM/LAW C110	Community Context of Crime
CRM/LAW C134	Victimless Crimes
<b>(3) Formal Institutions of Social Control</b>	
CRM/LAW C111	Theories of Punishment
CRM/LAW C112	Legal Sanctions and Social Control
CRM/LAW C114	Miscarriages of Justice
CRM/LAW C115	Prisons, Punishment, and Corrections
CRM/LAW C124	Mental Health and the Justice System
CRM/LAW C139	Police and Change
CRM/LAW C164	Social Control of Delinquency
CRM/LAW C180	Power, Constructions of Deviance, and Social Control
<b>(4) Justice and Inequalities</b>	
CRM/LAW C113	Gender and Social Control
CRM/LAW C116	Race, Ethnicity, and Social Control
CRM/LAW C120	Law and Inequality
CRM/LAW C127	Hate Crimes

CRM/LAW C135	Mass Incarceration and Social Inequality in America
CRM/LAW C178	Critical Race Theory
CRM/LAW C174	Immigration and Crime

**C. Six upper-division elective courses (24 units).<sup>1</sup>**

Select from courses numbered CRM/LAW C100–C191.

<sup>1</sup> Courses taken to satisfy requirement B may not also be used to satisfy requirement C.

## Criminology, Law and Society, Master of Advanced Study

The Master of Advanced Study (M.A.S.) in Criminology, Law and Society, the first online degree program at the University of California, prepares professionals for leadership positions in criminal justice and the legal professions. The curriculum emphasizes theoretical and practical applications central to crime and its control, social policy, and the law. In keeping with one of the main tenets of the School of Social Ecology, students approach topics from a multidisciplinary perspective.

### Program Details

This program is ideally suited for professionals interested in obtaining positions in or currently working in the criminal justice or legal fields and who are seeking a graduate degree for career advancement. The program consists of 52 units of course work which is completed sequentially in two years (6 quarters). An optional one-week in-residence introductory course is scheduled right before fall quarter. In lieu of a thesis, students are required to take a capstone course. In addition to the capstone course, students take two other required courses (CRM/LAW C214 and CRM/LAW C215) and choose from elective courses to fulfill the remaining 40 units. The M.A.S. is awarded upon completion of 13 courses (52 units).

### Course Requirements

A. Complete:

CRM/LAW C214	Research Methods
CRM/LAW C215	Applied Statistics
CRM/LAW C218	Social Problems, Law, and Policy

B. Complete 40 units of electives, selected from:

CRM/LAW C210	Introduction to Criminology, Law and Society
CRM/LAW C211	Legal Institutions and Society
CRM/LAW C212	Police, Courts, and Corrections
CRM/LAW C213	Crime and Social Deviance
CRM/LAW C216	Public Policy, Crime, and Criminal Justice
CRM/LAW C217	Leadership
CRM/LAW C219	Hate Crime
CRM/LAW C221	Sentencing and Corrections
CRM/LAW C224	Organizational Perspectives on the Legal System
CRM/LAW C238	White-Collar Crime
CRM/LAW C242	Crime Hotspots
CRM/LAW C250	Preventing Errors of Justice
CRM/LAW C253	Cybercrime, Cybersecurity, and Society
CRM/LAW C254	Immigration in the US: Economic, Fiscal, and Social Outcomes

## Criminology, Law and Society, Minor

The minor in Criminology, Law and Society is designed to provide students with an overview of the American legal system and in-depth focus on the regulation of behavior, the problem of crime, and responses to crime within this system. Students explore these topics through multiple disciplinary perspectives, including anthropological, economic, historical, political, and sociological approaches to the study of law, behavior, and institutions of social control. In addition to learning to apply social science techniques to analyzing social problems, students in this course of study will be especially well-prepared for careers in criminal justice and regulatory agencies, public policy organizations, and direct service provision to people involved with the legal system as well as for pursuing graduate studies in law, sociology, criminology, and criminal justice.

### Minor Requirements

Eight courses (32 units) as specified below:

A. Complete the following:

CRM/LAW C7	Introduction to Criminology, Law and Society
------------	--

CRM/LAW C10

Fundamentals of Criminology, Law and Society

and six upper-division courses selected from CRM/LAW C100–C191.

NOTE: SOCECOL 198 and SOCECOL 199 may not be applied toward the minor.

## Criminology, Law and Society, Ph.D.

The study of crime, institutional responses to illegal behavior, and the interaction of law and society are the foci of the doctoral program in Criminology, Law and Society. Students examine issues related to the etiology of crime, the process of changing criminal behavior, social regulation, the civil justice system, and the social and cultural context of law.

Students gain familiarity with a number of subjects including sentencing; crime rates; modes of modifying criminal behavior; police behavior; policies against hate crimes; race and social inequality; behavior of courts, juries, and regulatory agencies; immigration lawmaking and application; and the interaction among law, culture, and identity. In general, students are introduced to the leading classical and contemporary issues in criminology, law and society and to ways of understanding them through interdisciplinary research. The program aims to develop theoretical sophistication and to prepare the graduate student for faculty positions at major universities; and for research and administrative work in institutions in the legal system, the criminal justice system, and related organizations.

### Requirements

#### A. Complete:

CRM/LAW C201	Research Methods
CRM/LAW C202	Research Methods II
SOCECOL 264A	Data Analysis
SOCECOL 264B	Data Analysis

#### B. One additional graduate research methods course, selected from the following:

CRM/LAW C203A	Qualitative Methods Practicum
CRM/LAW C203B	Quantitative Methods Practicum

#### C. Students in the Criminology, Law and Society program must additionally complete:

CRM/LAW C228	Criminology: Micro Approaches
CRM/LAW C229	Criminology: Macro Approaches
CRM/LAW C239A	Law and Society I
CRM/LAW C239B	Law and Society II

#### D. Four elective courses in Criminology, Law and Society.<sup>1</sup>

<sup>1</sup> One of these elective courses can be the opposing CRM/LAW C203A or CRM/LAW C203B not taken as part of the three-course methods sequence. These elective courses should be chosen according to a plan that best meets the needs of the individual student, as determined in consultation with the student's faculty advisor. Students should satisfy the elective requirement with regularly scheduled courses (with rare exceptions).

(NOTE: An initial faculty advisor for each new Criminology, Law and Society student is assigned by the Criminology, Law and Society Associate Director. Students, however, are free to change their faculty advisor during their first year of study (or later) based on research interests. Students must notify the Criminology, Law and Society Faculty Graduate Director and the Departmental Graduate Coordinator of any changes in advisors.)

Students become involved in research activities from the earliest stages of their training and complete an independent, supervised research project during the second year of graduate study.

### Advancement and Completion

Students complete a written comprehensive examination during year three, which requires them to demonstrate mastery of major issues in criminology, and law and society. The normative time for advancement to candidacy is four years (three years for students who entered with a master's degree). Students are required to advance to candidacy by the end of fall quarter of their fifth year of study, adjusted for any approved leaves of absence. The fourth and, possibly, fifth years of study are devoted to developing and defending a dissertation proposal and completing dissertation research. The normative time for completion of the Ph.D. is six years, and the maximum time permitted is seven years. (For students who have waived two required courses and the second-year project based upon master's-level work completed at another institution, the time to degree is five years, with a maximum of six years.) All Ph.D. students in the Criminology, Law and Society program are required to pass a final oral defense of the dissertation.

### Program in Law and Graduate Studies (J.D./Ph.D.)

Highly qualified students interested in combining the study of law and graduate qualifications in Criminology, Law and Society are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Ph.D. degree in Criminology, Law and Society. Additional information is available from the PLGS Director's office, 949-824-4158, or by email at [plgs@law.uci.edu](mailto:plgs@law.uci.edu). A full description of the program, with links

to all relevant application information, can be found at the School of Law Concurrent Degree Programs website (<http://www.law.uci.edu/academics/interdisciplinary-studies/concurrent-degrees.html>).

## Race and Justice Studies, Graduate Emphasis

Students from any UCI state-supported graduate or professional program, including J.D., Master's, and M.F.A. students, are eligible to apply to the Emphasis in Race and Justice Studies, housed in the Department of Criminology, Law and Society. The Emphasis in Race and Justice Studies is comprised of three interconnected components that promote inclusive excellence: 1) A first-year mentorship proseminar; 2) Interdisciplinary coursework and writing that emphasizes cross-departmental interests and perspectives on critical studies of race, crime, and law; 3) Engagement with diverse audiences through traditional and innovative forms of research presentation.

Students may apply for admission into the Emphasis upon completion of CRM/LAW C260A-CRM/LAW C260B-CRM/LAW C260C, Race and Justice Studies Proseminar. Admitted students who satisfactorily complete program requirements (see below) will be awarded a letter signed by the Director noting that the student has incorporated Race and Justice studies into their research and professional activities. Each student will be assigned a peer and faculty mentor to discuss the student's ongoing research and the value of inclusive excellence.

The following is needed to apply for admission

1. Satisfactory completion of CRM/LAW C260A-CRM/LAW C260B-CRM/LAW C260C, the first-year mentorship proseminar.
2. A statement of interest.
3. An unofficial transcript.
4. One faculty reference letter that speaks to the student's capabilities.
5. Endorsement of the student's application by the student's advisor. The student's advisor may provide the reference letter. The deadline for this application is week 10 of the spring quarter of the student's first year of graduate study.

### Requirements

1. CRM/LAW C260A-CRM/LAW C260B-CRM/LAW C260C, Race and Justice Studies Proseminar, a first-year mentorship proseminar, consisting of 10 workshops, discussions, and presentations offered over three quarters. Students will receive a grade for this proseminar in the spring quarter.
2. CRM/LAW C262, Special Topics in Race and Justice Studies, or other emphasis-approved seminars on race and justice. Students should consult with the Director about approved courses.
3. CRM/LAW C261, Race and Justice Studies Writing Seminar in which a paper developed through Race and Justice Studies coursework and programming will be workshopped and revised toward publication.
4. A public presentation which translates the student's Race and Justice Studies-influenced research for an interdisciplinary audience, which can include but is not limited to those found through professional associate conferences, small symposia and colloquia, social media publications, community-based collaborations, program and policy consultations, and artistic or alternative media formats.

### Admission

The following is needed to apply for admission

1. Satisfactory completion of the first-year mentorship proseminar.
2. A statement of interest.
3. An unofficial transcript.
4. One faculty reference letter that speaks to the student's capabilities.
5. Endorsement of the student's application by the student's advisor. The student's advisor may provide the reference letter. The deadline for this application is week 10 of the spring quarter of the student's first year of graduate study.

### Petition for Formal Letter of Completion

A transcript showing satisfactory completion of coursework, a writing seminar paper, and a one-page report of public presentation is required for the petition for a formal letter of completion. The deadline for this petition is week 10 of the spring quarter of the student's third year of graduate study.

For students admitted to graduate study before fall 2016, prerequisites must be fulfilled between fall 2016 and spring 2019 and requirements must be fulfilled between fall 2016 and spring 2021. Upon approval by the Director, students may use prior coursework to satisfy one of the requirements of the Emphasis.

## Department of Psychological Science

**Susan Charles, Department Chair**

4201 Social & Behavioral Sciences Gateway

949-824-5574

<https://ps.sococo.uci.edu/>

The Department of Psychological Science emphasizes the investigation of human behavior as it develops across the life span in diverse contexts. The faculty share a strong commitment to interdisciplinary research aimed at advancing our understanding of the determinants of human health, well-being, and functioning in a broad range of developmental, social, cultural, and environmental contexts. The faculty are also dedicated to research that has the potential to address important societal problems. Undergraduate students begin with basic course work in developmental psychology, health and preclinical (abnormal) psychology, and social psychology. Subsequent courses cover such topics as social, emotional, and cognitive development in children, adolescents, adults, and the elderly; behavioral disorders and developmental psychopathology; counseling and therapy; cultural, social, and personality influences on behavior; attitude formation and change; cognition and emotion; health psychology; stress and coping; environmental psychology; and psychology and the law. Opportunities are available to work with faculty members on research in these and other areas. Obtaining research experience as an undergraduate also provides a valuable background for entry into many graduate programs.

Students receive a foundation that will enable them to pursue graduate work in psychology, public health, health services, social work, counseling, law, education, and related fields, or to work after graduation in both the private and public sectors. Field study opportunities exist in hospitals, community health clinics, counseling centers, legal settings, environmental programs, social service agencies, schools and after-school programs, child care settings, and a wide variety of other community programs that offer a broad range of services.

Students should be aware that psychology courses are offered in several different departments and programs at UCI. Students interested in developmental, clinical, social, emotional, health, cross-cultural, or environmental psychology, or in psychology and the law, are advised to consult the course listings for the Department of Psychological Science. These courses offer students a solid foundation in general psychology. Students interested in perception, sensorimotor integration, and mathematical psychology are advised to consult course listings for the Department of Cognitive Sciences.

- Master of Legal and Forensic Psychology
- Psychological Science, B.A.
- Psychological Science, Minor
- Psychological Science, Ph.D.

## Faculty

Jessica Borelli, Ph.D. Yale University, *Associate Professor of Psychological Science* (developmental psychopathology, attachment, emotion, prevention on mental health problems in children and adolescents)

Elizabeth E. Cauffman, Ph.D. Temple University, *Professor of Psychological Science; Criminology, Law and Society; Education; School of Law* (adolescent development, mental health, juvenile justice, legal and social policy)

Susan T. Charles, Ph.D. University of Southern California, *Department Chair and Professor of Psychological Science* (emotional processes across the adult life span, subjective experience and cognitive processes, health and emotion)

Chuansheng Chen, Ph.D. University of Michigan, *UCI Chancellor's Professor of Psychological Science; Education* (cross-cultural psychology, adolescent development, cognitive neuroscience, genes and behavior)

Thomas J. Crawford, Ph.D. Harvard University, *Professor of Teaching Emeritus of Psychological Science* (attitude theory and social problems research)

Amy Dent, Ph.D. Duke University, *Assistant Professor of Teaching of Psychological Science* (meta-analysis, academic context and consequences of self-regulation, educational and developmental psychology of academic learning)

Peter H. Ditto, Ph.D. Princeton University, *Professor of Psychological Science* (social psychology, judgment and decision making, political and moral reasoning)

C. David Dooley, Ph.D. University of California, Los Angeles, *Professor Emeritus of Psychological Science* (community psychology, epidemiology, economic change)

Wendy A. Goldberg, Ph.D. University of Michigan, *Professor Emerita of Psychological Science; Education* (developmental psychology, work and family, infant sleep, transition to parenthood, autism)

Douglas A. Granger, Ph.D. University of California, Irvine, *Director of the Institute for Interdisciplinary Salivary Bioscience and Professor of Psychological Science* (psychoneuroendocrinology, salivary bioscience, hormone-behavior relationships across the lifespan, in high- and low-risk populations)

Ellen Greenberger, Ph.D. Harvard University, *Professor Emerita of Psychological Science* (developmental psychology, social and cultural influences on adolescent and young adult development, family relationships and consequences throughout the lifespan)

Nancy Guerra, Ed.D. Harvard University, *Dean of the School of Social Ecology and Professor of Psychological Science; Criminology, Law and Society* (children's aggression and behavior problems, prevention of youth violence, promotion of healthy youth development)

Jutta Heckhausen, Ph.D. University of Strathclyde, *Professor of Psychological Science; Education* (life-span developmental psychology, motivation, individual agency and social context)

Larry D. Jamner, Ph.D. State University of New York at Stony Brook, *Professor of Psychological Science* (health psychology, psychophysiology, pain, mHealth)

J. Zoe Klemfuss, Ph.D. Cornell University, *Assistant Professor of Psychological Science; Language Science* (narrative development, children's autobiographical memory, sociocontextual influences on children's narrative, memory and well-being, children's eyewitness abilities)

Kate Kuhlman, Ph.D. University of Michigan, *Assistant Professor of Psychological Science* (developmental psychopathology, psychoneuroimmunology, psychoneuroendocrinology, early life stress, and adolescent depression)

Linda J. Levine, Ph.D. University of Chicago, *Professor of Psychological Science* (bias in predicted and remembered emotion, memory and emotion, the development of children's ability to regulate emotion)

Elizabeth F. Loftus, Ph.D. Stanford University, *UCI Distinguished Professor of Psychological Science; Cognitive Sciences; Criminology, Law and Society; School of Law* (cognitive psychology, human memory, psychology and law)

Angela F. Lukowski, Ph.D. University of Minnesota, *Associate Professor of Psychological Science* (contextual influences on cognitive development in infancy and early childhood)

Salvatore R. Maddi, Ph.D. Harvard University, *Professor Emeritus of Psychological Science* (personality, psychopathology, health psychology, creativity)

Elizabeth Martin, Ph.D., University of Missouri, *Assistant Professor of Psychological Science* (adult psychopathology, schizotypy and schizophrenia, social anhedonia, emotional and social dysfunction)

Kristine Molina, Ph.D. University of Michigan, *Associate Professor of Psychological Science* (racism and discrimination, social inequality, health disparities, Latinx health)

Daniel Nation, Ph.D. University of Miami, *Associate Professor of Psychological Science* (clinical neuropsychology)

Raymond W. Novaco, Ph.D. Indiana University, *Professor of Psychological Science* (anger, violence, stress, trauma, and interventions)

Candice Odgers, Ph.D. University of Virginia, *Professor of Psychological Science; Criminology, Law and Society* (developmental and quantitative psychology; social inequalities and child health; new technologies and adolescent development)

Paul Piff, Ph.D. University of California, Berkeley, *Assistant Professor of Psychological Science* (social psychology, group processes, altruism and cooperation, socioeconomic status, inequality, social emotion, moral judgment, ethics, uncertainty)

Joann Prause, Ph.D. University of California, Irvine, *Professor of Teaching Emerita of Psychological Science* (statistics, quantitative epidemiology, employment typology)

Sarah D. Pressman, Ph.D. Carnegie Mellon University, *Associate Professor of Psychological Science* (health psychology, positive emotions, stress physiology, psychosocial effects on physiology and health)

Jodi A. Quas, Ph.D. University of California, Davis, *Professor of Psychological Science* (memory development, children's involvement in the legal system)

Jenna Riis, Ph.D. Johns Hopkins University, *Assistant Professor of Psychological Science* (early life adversity; stress; salivary bioscience; neuroendocrine-immune relations; program implementation and evaluation)

Jenny K. Rinehart, Ph.D. University of New Mexico, *Assistant Professor of Teaching of Psychological Science* (health psychology, clinical psychology, sexual victimization prevention, risk perception)

Karen S. Rook, Ph.D. University of California, Los Angeles, *Distinguished Professor of Psychological Science* (gerontology, social relationships and health)

Stephen Schueller, Ph.D. University of Pennsylvania, *Assistant Professor of Psychological Science* (clinical psychology, depression, mHealth, technology, implementation science, treatment and prevention, positive psychology)

Nicholas I. Scurich, Ph.D. University of Southern California, *Associate Professor of Psychological Science; Criminology, Law and Society; School of Law* (judgment and decision making, juridical proof, violence risk assessment)

Roxane C. Silver, Ph.D. Northwestern University, *Professor of Psychological Science; Program in Public Health* (coping with traumatic life events (personal losses and collective traumas), stress, social psychology, health psychology)

Daniel Stokols, Ph.D. University of North Carolina, Chapel Hill, *Professor Emeritus of Psychological Science; Religious Studies; Urban Planning and Public Policy*

Julian F. Thayer, Ph.D. New York University, *Professor of Psychological Science* (health psychology, psychopathology, health disparities, heart rate variability, emotions, stress)

Ilona S. Yim, Ph.D. University of Trier, *Associate Professor of Psychological Science* (stress, pregnancy and postpartum depression, biopsychology of stress, developmental psychobiology)

Alyson K. Zalta, Ph.D. University of Pennsylvania, *Assistant Professor of Psychological Science* (clinical psychology, trauma, posttraumatic stress disorder, resilience, prevention, treatment, cognitive behavioral therapy)

Joanne F. Zinger, Ph.D. University of California, Riverside, *Associate Professor of Teaching of Psychological Science* (expressive writing, meta-analysis, positive psychology, health psychology, preventive medicine, educational psychology)

## Affiliate Faculty

Drew Bailey, Ph.D. University of Missouri, *Associate Professor of Education; Cognitive Sciences; Psychological Science*

Lawrence F. Cahill, Ph.D. University of California, Irvine, *Professor of Neurobiology and Behavior; Psychological Science*

Belinda Campos, Ph.D. University of California, Berkeley, *Associate Professor of Chicano/Latino Studies; Family Medicine; Psychological Science* (culture, relationships, positive emotion, health)

N. Edward Coulson, Ph.D. University of California, San Diego, *Professor of Paul Merage School of Business; Economics; Psychological Science*

Greg Duncan, Ph.D. University of Michigan, *UCI Distinguished Professor of Education; Economics; Psychological Science* (economics of education, program evaluation, child development)

Jacquelynne S. Eccles, Ph.D. University of California, Los Angeles, *UCI Distinguished Professor of Education; Psychological Science* (academic motivation and achievement, school and family influences on adolescent development, gender and ethnicity in STEM fields)

Michelle A. Fortier, Ph.D. University of Nebraska Lincoln, *Associate Professor of Nursing; Nursing; Psychological Science*

Michael A. Hoyt, Ph.D. Arizona State University, *Associate Professor of Program in Public Health; Epidemiology; Psychological Science*

Stephanie Reich, Ph.D. Vanderbilt University, *Associate Professor of Education; Informatics; Psychological Science* (child development, parenting, peer interactions, media, program evaluation)

Maritza Salazar, Ph.D. New York University, *Assistant Professor of Paul Merage School of Business; Psychological Science* (team science, group dynamics and processes, team-based organizations, global teams, impact of culture on work behavior, international management, management of innovation and learning)

Sabrina E. Schuck, Ph.D. University of California, Riverside, *Health Sciences Assistant Clinical Professor of Pediatrics; Education; Psychological Science*

Dara H. Sorkin, Ph.D. University of California, Irvine, *Associate Professor in Residence of Medicine; Program in Public Health; Psychological Science*

Eric Spangenberg, Ph.D. University of Washington, M.B.A. Portland State University, *Dean of The Paul Merage School of Business and Professor of Paul Merage School of Business; Psychological Science* (sensory cues in the retail environment and the effects of self-prediction on behavior)

Mark Steyvers, Ph.D. Indiana University, *Professor of Cognitive Sciences; Computer Science; Psychological Science* (higher-order cognition, cognitive neuroscience, computational modeling, collective intelligence)

William C. Thompson, Ph.D. Stanford University, *Professor Emeritus of Criminology, Law and Society; Psychological Science; School of Law* (psychology and law, criminal justice, forensic science, expert evidence, human judgment and decision making, use of social science in appellate litigation)

Deborah Lowe Vandell, Ph.D. Boston University, *Chancellor's Professor Emerita of Education; Psychological Science* (longitudinal studies of development, early childhood education, after-school programs, summer learning, child development, adolescent development)

## Courses

### **PSCI 9. Introduction to Psychology. 4 Units.**

Introduction to field of psychology, addressing the application of scientific methods to the study of human development, learning, memory, problem solving, perception, biological mechanisms, emotions and motivation, personality, psychopathology, and effects of diverse social and cultural contexts on human behavior.

Same as PSYC 7A.

Overlaps with PSYC 9A, PSYC 9B, PSYC 9C, PSCI 11A, PSCI 11B.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment. PSCI 9 and PSYCH 7A may not be taken for credit if taken concurrently with or after PSCI 11A, PSCI 11B, PSCI 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

### **PSCI 11A. Psychology Fundamentals. 4 Units.**

Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSYC 9A.

Restriction: Lower-division students only. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. PSCI 9 and PSYCH 7A may not be taken for credit if taken after PSCI 11A, PSCI 11B, PSCI 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

### **PSCI 11B. Psychology Fundamentals. 4 Units.**

Designed to provide freshmen with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSYC 9B.

Restriction: Lower-division students only. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

(III)

### **PSCI 11C. Psychology Fundamentals. 4 Units.**

Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSYC 9C.

Restriction: Lower-division students only. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

(III)

### **PSCI 100. Special Topics in Social Behavior. 4 Units.**

Course content varies with interest of instructor.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Repeatability: Unlimited as topics vary.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 101D. Life Span Developmental Psychology. 4 Units.**

Addresses the major issues, concepts, and methods of life span developmental psychology. The fundamental theories, distinctive methods, and the physical, perceptual, cognitive, social, motivational, and emotional development for each developmental phase of the life course are considered.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment.

**PSCI 102C. Abnormal Psychology. 4 Units.**

Survey of disorders organized by the diagnostic categories of the American Psychiatric Association. Interdisciplinary orientation combines environmental, psychological, and organic perspectives on etiology and treatment.

Prerequisite: (PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C) and SE 10

Overlaps with PSYC 120A.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment.

**PSCI 103H. Health Psychology. 4 Units.**

Theory and research are considered as they contribute to an understanding of the role of psychological processes in health and illness. The distinction between prevention and treatment of illness is established, and a variety of psychosocial interventions are elaborated.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment.

**PSCI 104S. Social Animal: An Introduction to Social Psychology. 4 Units.**

Theories and research exploring social behavior and social influences on behavior. Topics include methods of social research, attitude formation and change, social perception, the social self, stereotypes and prejudice, conformity, obedience, altruism, aggression, interpersonal relationships and love, and group behavior.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment.

**PSCI 110D. Infant Development. 4 Units.**

Study of human development from conception through the first two years of life, covering processes and events in the domains of physical, social, and cognitive development.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 111D. Child Development. 4 Units.**

Examines social, emotional, and intellectual growth and development between the ages of 2 and 12 years.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Overlaps with PSYC 120D.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 111W. Advanced Research Methods. 4 Units.**

For students planning to conduct senior research projects or apply to graduate school in social research fields. Topics include reviewing literature, preparing a research proposal, protecting human subjects, citing scholarly work, building measures, estimating sample size, interview and presentation skills.

Prerequisite: SE 10 and SE 13. Satisfactory completion of the Lower-Division Writing requirement.

Same as CLS C169W, SE 111W, UPPP 114W.

**(Ib)****PSCI 112D. Adolescent Development. 4 Units.**

Examines current research on the biological, social, and cultural contexts of adolescent development. Topics include the impacts of puberty, adolescents' decision-making competencies, changes in family and peer relationships, identity development, and psychosocial problems such as depression and problem behavior.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Overlaps with PSYC 21A.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 113D. Adult Development. 4 Units.**

Examines why and how we change (with attention to gains as well as losses) from ages 18-65 and the nature and sources of continuity over time. Topics include physical and intellectual functioning, personality, coping strategies, and social roles and relationships.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 115D. Cognitive Development. 4 Units.**

Examines theories on nature of cognitive development. Discusses behaviorist theories on role of the environment including those of Vygotsky and Piaget, and recent evidence from cognitive psychologists stressing the importance of knowledge and skills within specific domains.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 116D. Human Development and Cross-Cultural Perspectives. 4 Units.**

Human development in diverse cultures (e.g., Asian, American, and African). Special emphasis on East-West contrasts and when East meets West (i.e., Asian-American experiences). Topics include parenting, family relations, language and cognition, schooling and academic achievement, and morality.

Prerequisite: (PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B) and SE 10

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 117D. The Psychology of Gender. 4 Units.**

Discussion of gender identity development and examination of gender differences and similarities across the life span. Consideration of the biology and psychology of gender in relation to physical, behavioral, personality, and intellectual capabilities.

Prerequisite: PSCI 9 or PSYC 9B or PSCI 11B or PSYC 7A

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 118D. Human Sexuality. 4 Units.**

A broad survey of human sexuality encompassing genetic factors, physiological and anatomical development, customary and atypical forms of behavior, reproductive processes, and cultural determinants.

Prerequisite: PSCI 9 or PSCI 11B or PSYC 7A or PSYC 9B

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 121D. Work and Family. 4 Units.**

Effects of employment and unemployment on mental health and marital quality; effects of work on parenting and child development; corporate and social policies for 'families that work'; young adults' decision-making about work and family.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Upper-division students only. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 126D. Development of Motivation Across the Lifespan. 4 Units.**

Introduces major concepts in life-span development of motivation and self-regulation, and discusses exemplar empirical findings pertaining to these concepts during the various phases of life. Students participate in discussion, present findings from research articles, and write a paper.

Restriction: Psychological Science Majors only. Psychology and Social Behavior Majors only. Social Ecology Majors only.

**PSCI 127D. Attachment Relationships. 4 Units.**

Students learn about the development of attachment-related needs throughout development, as well as the links between attachment and emotion, psychopathology and treatment. Lectures emphasize classic as well as cutting-edge research and are supplemented by primary source readings.

Prerequisite: PSCI 9 or PSYC 7A or PSCI 11A or PSYC 9A or PSCI 11B or PSYC 9B

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 134H. The Science and Practice of Wellness and Resilience . 4 Units.**

Wellness is a common, but elusive goal. Covers the history, theory, psychology, and behavioral science behind skills for wellness and resilience. Provides opportunities to practice the strategies to help further understanding of the behavioral nature of each of the areas.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors only. Psychology and Social Behavior Majors only. Social Ecology Majors only.

**PSCI 136H. Behavioral Medicine. 4 Units.**

Examines biobehavioral aspects of health and illness, focusing on how stress contributes to or exacerbates disease processes. Background information on psychosomatic medicine and stress models and detailed examination of specific organ systems emphasizing the reactivity of these systems to stress.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 137H. Human Stress. 4 Units.**

Stress as a multidisciplinary topic. Biological, psychological, and sociological approaches to adaptation-related disorders. Effects of acute and chronic stress on emotions, physiology, and behavior. Methods of stress assessment, stress reduction, and intervention.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 138H. Child Health Psychology. 4 Units.**

Exploration of psychological antecedents, concomitants, and consequences of medical illnesses in children. Children's beliefs about health, illness, and medication; the role of stress; coronary-prone behavior; therapeutic adherence and physician-patient interaction; coping with chronic illness; effects of child's illness on family.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 9C or PSYC 7A. Recommended: SE 10.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 139H. Clinical Sport Psychology. 4 Units.**

An interdisciplinary introduction to clinical sport psychology, that includes, among other things, an introduction to psychopathology in sport; plus the use of psychological skills training, including anxiety reduction techniques, visualization, self-efficacy, coping skills, concentration, and goal-setting in sports.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Overlaps with PSYC 124S.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 140H. The Hardiness Approach to Stress Management. 4 Units.**

New development within psychology involving a combination of motivations and skills that extensive research has shown enhances performance, conduct, morale, stamina, and health. Combines study of hardiness research with strategies for improvement of personal hardiness through a series of exercises.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 141H. Clinical Health Psychology. 4 Units.**

Behavioral role in etiology, treatment, and prevention of certain diseases. Behavioral intervention including biofeedback, stress-, pain-management, health habit counseling, and other skills to assist patients make cognitive, emotional, and behavioral changes needed to cope with disease or achieve better health.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Same as PUBH 141.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 142H. Introduction to Interdisciplinary Salivary Bioscience . 4 Units.**

Introduction to the integration of salivary analytes into developmental, social, behavioral, and health sciences. Lectures cover theoretical perspectives; oral fluid as a biological specimen; saliva collection and study design; basics of salivary assay methods; and research findings across multiple fields.

Restriction: Psychological Science Majors only. Psychology and Social Behavior Majors only. Social Ecology Majors only.

**PSCI 150C. Clinical Psychology. 4 Units.**

Overview of theories, assessment techniques, research methodologies, and intervention approaches in clinical psychology. Psychodynamic, behavioral, humanistic, and cognitive perspectives are examined along with ethical and professional issues.

Prerequisite: (PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C) and PSCI 102C

Overlaps with PSYC 122C.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 152C. Clinical Child Psychology. 4 Units.**

Examines research and theory concerning childhood psychopathology behavior disorders. Diagnosis and assessment, early identification of high-risk children, fears and phobias, antisocial behavior, childhood psychoses, autism, depression, attention deficit/hyperactivity disorders, and ethical and policy implications of identifying children who are different.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 153C. Developmental Psychopathology. 4 Units.**

Research and theory of origins, course, and outcomes of disordered behavior. Continuity and change in patterns of behavior; environmental challenges and buffers; stress/competence in children; vulnerable/invincible children; children of mentally ill parents; families at risk; childhood antecedents of adult disorders.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C. Recommended: SE 10.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 154C. Cognitive Behavior Therapy. 4 Units.**

Presentation of principles and procedures of therapeutic interventions based on cognitive-behavior methods. Cognitive factors in learning, emotional arousal, psychological disorder, and psychotherapy reviewed. Introduces the application of cognitive behavioral methods to problems of depression, anxiety, anger, pain, and impulsivity.

Prerequisite: PSCI 9 or (PSCI 11A and PSCI 11C) or PSYC 7A or (PSYC 9A and PSYC 9C)

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 155C. Child Therapies. 4 Units.**

Examines research methodologies, empirical data, and implications of diverse intervention strategies. Primary topics include psychotherapy process and outcome, family therapies, behavioral intervention, cognitive behavior modification, pediatric psychopharmacology, and ethical and social policy implications of intervening in other people's lives.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 156C. Forensic Psychology: Advanced Seminar. 4 Units.**

Focuses on the psychology of criminal offending, particularly violent behavior. Examines violence, sexual offending, and mental disorder related to crime with regard to clinical assessment and treatment; mental health services within forensic institutions.

Prerequisite: (PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C) and PSCI 102C and (PSCI 178S or CLS C149)

Same as CLS C136, PSYC 177F.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 160C. Clinical Neuroscience. 4 Units.**

An introduction to the neuroclinical bases of human behavior, including neuropsychological approaches to mental disorders. Also includes case formulations, research articles, therapeutic approaches, and other discussions related to select psychopathology and other neurobehavioral topics.

Prerequisite: PSCI 9 or PSYC 7A or PSCI 11A or PSYC 9A or BIOL 99

Same as BIOL N170.

Restriction: Psychological Science Majors have first consideration for enrollment. Biological Sciences Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 161C. Forensic Psychology . 4 Units.**

Forensic psychology is the interface between clinical psychology and the law. Emphasizes clinically relevant legal topics (insanity defense; competency to stand trial) and includes critical thinking about issues that arise when psychologists are involved in legal proceedings.

Prerequisite: PSCI 9 or PSCI 11B or PSCI 11C

Same as CLS C160.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 162C. Psychodynamic Studies. 4 Units.**

Introduction to contemporary psychodynamic studies. Emphasis on clinical concepts associated with psychodynamic psychotherapy, including unconscious determinants of behavior, typical defenses, life experiences, and techniques. Exploration of links between psychodynamic-oriented psychotherapy and other disciplines (e.g., psychology, music, medicine, neuroscience, film).

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 163C. Human Neuropsychology. 4 Units.**

A survey of human brain disorders using a clinical case study approach to illustrate fundamental issues in studying brain and behavior. Topics include sensory deficits, attentional neglect, amnesia, cortical organization, clinical psychopathology, and more.

Prerequisite: BIOL N110 or BIOL N115A or PSYC 9A or PSCI 11A

Same as BIOL N173, PSYC 162N.

Restriction: School of Biological Sciences students have first consideration for enrollment. Cognitive Sciences Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**PSCI 164C. Addiction. 4 Units.**

Designed for those with an interest in the nature and treatment of addiction. Focuses on the etiology and treatment of addiction, but does not prepare students to treat substance abuse disorders.

Prerequisite: PSCI 11A and PSCI 11B and PSCI 11C and PSCI 102C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 165C. Adult Psychopathology. 4 Units.**

Advanced course in abnormal psychology, focusing on adult psychopathology. Covers historical and fundamental issues about psychiatric disorders, clinical research on disorders of anxiety, PTSD, mood, psychoses, personality, and dementia, and their biopsychosocial features, and attends to assessment and treatment.

Prerequisite: PSCI 102C. Equivalent to PSCI 102C is also accepted.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 166S. Chicano/Latino Families. 4 Units.**

Introduction to the research, literature, and issues surrounding the topic of Chicano/Latino families including cultural history, contemporary issues, organization of family, traditions, lifestyles, values, beliefs, generational differences, gender issues, ethnic identity, evolution of demographic patterns, current economic and political standings.

Same as CHLT 170, SSCI 165, PSYC 174H.

**PSCI 170S. Personality. 4 Units.**

Comparison of the major theories of personality. Provides a frame of reference for understanding lifestyles, development, maturity, and psychopathology. Emerging research themes are used to identify promising lines of personality theorizing.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Overlaps with PSYC 120P.

Restriction: Upper-division students only. Sophomores only. Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 171S. Environmental Psychology. 4 Units.**

Impact of the physical environment on individual and group behavior. Three basic concerns examined: (a) environmental determinants of behavior at the individual and interpersonal level; (b) social planning and urban design; (c) methodological approaches to the study of environmental issues.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 173S. Social Relationships. 4 Units.**

Examines major issues, concepts, and methods in the scientific study of social relationships. Topics include relationship formation and dissolution, friendships and love relationships, loneliness, bereavement, societal influences on close relationships, significance of close relationships for health and well-being.

Prerequisite: (PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C) and SE 10

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 174S. Error and Bias in Social Judgement. 4 Units.**

Examines how people encode, reason about, and remember social information and explores how biases and shortcomings in social perception, judgment, and memory are central to understanding both effective social functioning and many forms of maladaptive behavior and social conflict.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 176S. Motivation. 4 Units.**

History, major theories, methods, and applications of motivational psychology, with emphasis on European approaches. Origins of the field in personality, learning, cognition, and activation research. Recent innovations in motivational and volitional self-recognition. Current approaches, major debates, empirical research programs.

Prerequisite: (PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C) and PSCI 101D and (PSCI 104S or UPPP 151)

Overlaps with PSYC 121M.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 178S. Violence in Society. 4 Units.**

Current theory and research on aggression; anger and violence as problems in individual and social functioning. Process and functions of anger examined with regard to normal behavior and psychopathology. The determinants, prevalence, and implications of violence in society are analyzed.

Prerequisite: PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C

Same as CLS C149.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment.

**PSCI 179S. Cultural Psychology. 4 Units.**

An examination of culture's influence on human minds. Topics include culture's impact on perception, cognition, motivation, emotion, moral reasoning, communication, and health. Addresses cultural psychology's methods, history, and place within psychology and related fields.

Prerequisite: PSCI 9 or PSCI 11B or PSCI 11C or PSYC 7A or PSYC 9B or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 183S. Social Epidemiology. 4 Units.**

Overviews evidence linking environmental factors to mental and physical disorders including such variables as socioeconomic status, income inequality, work stress, job loss, social capital, location, and other demographic characteristics. Measurement and research design issues of both individual and aggregate levels.

Prerequisite: (PSCI 9 or PSCI 11C or PSYC 7A or PSYC 9C) and SE 10 and SE 13

Same as PUBH 102.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 184S. Positive Psychology . 4 Units.**

The field of positive psychology focuses on what is right and positive about people and institutions. Introduces findings associated with human strengths and positive emotions, and provides clinical and personal applications and implications.

Prerequisite: PSCI 9 or PSCI 11C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 185S. Industrial-Organizational Psychology. 4 Units.**

Examines the application of social psychology to organizational settings. Topics include motivation of workers, group decision-making, leadership styles, career management, and organizational development.

Prerequisite: PSCI 9 or PSCI 11A or PSCI 11B or PSCI 11C or PSYC 7A or PSYC 9A or PSYC 9B or PSYC 9C

Overlaps with PSYC 122I.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 187S. Psychology of Inequality. 4 Units.**

Focuses on the psychological dimensions of poverty, wealth, and economic inequality.

Prerequisite: PSCI 104S and PSCI 11C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 188S. Evolutionary Psychology. 4 Units.**

Understanding our evolutionary origins is critical to truly understanding the complexities of human psychology. Explores how Darwinian principles, applied to both genes and culture, can help us understand not just how the mind works, but why.

Prerequisite: PSCI 11C or PSYC 9C

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 190. Applied Statistics in Social and Behavioral Research. 4 Units.**

Covers statistical techniques used to describe and make generalizations about phenomena represented by data. Hands-on experience in data analysis and interpretation using statistical software (SPSS, STATA) is emphasized. Topics include data visualization, ANOVA, multiple regression, and categorical data analyses.

Prerequisite: SE 13

Same as CLS C190, SE 190, UPPP 190.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**PSCI 192B. The Science and Practice of Compassion. 4 Units.**

Explores the latest scientific research on compassion and its correlates, and considers practical strategies for increasing compassion in everyday life. Students discover how cutting-edge research is yielding insights into kindness, empathy, altruism, and compassion.

Restriction: Psychological Science Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 192Q. Chicano/Latino Social Psychology. 4 Units.**

Examines theories, research, and major issues of relevance to understanding social psychological processes in Chicano/Latino populations. Topics include social development, cultural orientations, gender and sexuality, close relationships, happiness and well-being, stereotyping, prejudice and discrimination, and mental and physical health.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as CHLT 168.

Restriction: Psychological Science Majors have first consideration for enrollment. Chicano/Latino Studies Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**(VII)****PSCI 192T. Cognition and Learning in Educational Settings. 4 Units.**

Foundational concepts in cognition and development as applied to student learning. Primary topics include historical behaviorism, basic cognitive structure and processes, complex cognition, cognitive development, and motivation.

Same as EDUC 173.

Restriction: Psychological Science Majors have first consideration for enrollment. Education Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 192U. Psychology of Learning, Abilities, and Intelligence. 4 Units.**

Overview of classic positions on the mind, human abilities, and intelligence, especially as related to academic achievement. Contrasting views: psychometric versus information processing; experimental versus correlational research.

Prerequisite: PSYC 7A or PSCI 9 or PSCI 11A or PSCI 11B or PSCI 11C

Same as EDUC 176.

Restriction: Psychological Science Majors have first consideration for enrollment. Education Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 192V. Language and Literacy. 4 Units.**

Addresses the linguistic principles and processes that underlie oral and written language proficiency. Emphasis is on how to use phonology, morphology, orthography, semantics, syntax, and pragmatics to support literacy and oral language development for K-12 students.

Same as EDUC 151, LSCI 182V.

Restriction: Language Science Majors have first consideration for enrollment. Psychological Science Majors have first consideration for enrollment. Education Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 193B. Juvenile Delinquency. 4 Units.**

Patterns of delinquent behavior, theories that explain behavior, current research aimed at enhancing exploratory power. Attempts to prevent and control delinquency are put in historical perspective. Development of the current juvenile justice system and evolution of modern juvenile law.

Same as CLS C109.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment.

**PSCI 193C. Social Control of Delinquency. 4 Units.**

Assumes familiarity with theories of delinquency, the juvenile justice system, and elements of juvenile law. Explores socio-historical origins and evolution of juvenile justice, current research and policy on delinquency prevention and treatment, and future directions of law, policy, and practice.

Prerequisite: Recommended: CLS C109.

Same as CLS C164.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 193E. Psychology and the Law. 4 Units.**

Psychological assumptions of the American legal system and mental health aspects of provision of criminal justice services. Civil commitment, insanity defense, competence to stand trial, jury selection, eyewitness identification. Use of police, courts, correctional institutions in prevention of behavior disorder.

Same as CLS C105.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment.

**PSCI 193F. Family Law. 4 Units.**

Examines legal issues surrounding marriage, cohabitation, divorce, child custody and support, adoption, and the rights of parents and children in the family context. The findings of social science research are used to illuminate the legal issues.

Same as CLS C123.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**PSCI 193G. Eyewitness Testimony. 4 Units.**

Faulty eyewitness testimony is a major cause of wrongful convictions. Covers the fast-growing topic of eyewitness testimony and memory for real-world events, both how psychologists study eyewitness capacity, and how the legal system has dealt with eyewitness issues.

Prerequisite: SE 10

Same as CLS C177.

Restriction: Seniors only. Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

Concurrent with CLS C263.

**PSCI 196. Research Seminar in Psychological Science . 4 Units.**

Special topics research seminar. Content varies with interest of instructor. Capstone seminar for students who have conducted research with, or have a background in, the research topics of the PSCI faculty member offering this seminar in a given quarter.

Prerequisite: PSCI 11C

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

**PSCI P200. Introduction to Legal and Forensic Psychology . 4 Units.**

Familiarizes students with the interrelated fields of psychology, law, and forensic studies. Emphasizes clinically relevant legal topics (insanity defense; competency to stand trial) and includes critical thinking about issues that arise when psychologists are involved in legal proceedings.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P201. Research Methods in Psychology. 4 Units.**

In-depth examination of the conceptualization of research problems and linkages between theory and the design of appropriate strategies for empirical research in psychological science. Topics include experimental and quasi-experimental designs, reliability and validity of measurement and non-experimental procedures.

Restriction: Graduate students only. Psychological Science Majors only. Psychology and Social Behavior Majors only.

**PSCI P202. Data Analysis and Statistics . 4 Units.**

Statistical techniques to facilitate inferences in psychological research, including fundamentals of statistical inference and methods for analyzing data.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P204. Adolescence. 4 Units.**

Considers pubertal and cognitive changes and their social consequences; the family, peer group, school, and cultural contexts in which adolescence is embedded; and selected psychosocial issues including autonomy, identity, health, and well-being.

Restriction: Graduate students only.

**PSCI P208. Research Methods. 4 Units.**

In-depth examination of issues relevant to designing and evaluating research in psychological science. Topics address casual inference, ethical issues surrounding the responsible conduct of research, experimental and quasi-experimental designs, reliability and validity of measurement, and non-experimental procedures.

Overlaps with PSCI P201.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P209A. Applied Psychological Research. 4 Units.**

Focuses on scientific and professional issues in the field of psychology. Topics include communication skills; intervention approaches; collaboration, consultation, and referral; and ethical issues associated with at-risk populations research.

Restriction: Graduate students only.

**PSCI P214. Seminar in Social Psychology. 4 Units.**

Presents an overview of selected theoretical and empirical topics in social psychology including social influence and conformity, altruism and aggression, persuasion and attitude change, self and social perception, and social cognition.

Restriction: Graduate students only.

**PSCI P215. Psychology and Law . 4 Units.**

An interdisciplinary approach to research in psychology, law, and/or criminology. Examines how psychology is applied to the civil and criminal justice systems, how case law shapes this application, and how legal decisions affect the direction of psychological research.

Overlaps with PSCI P266.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P217. Life-Span Development. 4 Units.**

Introduces the major concepts of life-span development and discusses those with regard to some key topics of developmental psychology. For example, change and continuity, evolutionary and inherited nature, culture, society, and family-based nurture, and their dynamic interaction.

Restriction: Graduate students only.

**PSCI P220. Developmental Psychology: Theories and History. 4 Units.**

Examines key concepts, theories, and the historical and philosophical roots of research in human life span development. Focuses on biological and environmental causation, universalism and cultural relativism, continuity and change.

Restriction: Graduate students only.

**PSCI P222. Forensic Assessment . 4 Units.**

Explores the various ways in which clinical psychology is relevant to the law, and how forensic psychologists can meaningfully contribute to the adjudicatory process. Examines legal, scientific, and ethical issues that arise when psychologists are involved in legal proceedings.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P223. Cross-Cultural Developmental Psychology. 4 Units.**

Examines human development in diverse cultures (e.g., Asian, American, and African). Cultural diversity within the U.S. and acculturation of various ethnic groups is also discussed. Topics include parenting, family relations, language, and cognition, schooling and academic achievement, and morality.

Restriction: Graduate students only.

**PSCI P224. Children and the Law. 4 Units.**

Examines how psychology research and practice can inform several areas of law and social policy affecting children, adolescents, and families. Topics include education, mental health, reproductive rights, and delinquency.

Overlaps with PSCI 120D.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P226. Emotion in Psychology. 4 Units.**

Covers original and recent theories of emotions and how they guide current research. Specific topics include neuroanatomical structure of emotion, life-span emotional development, and health and emotion.

Restriction: Graduate students only.

**PSCI P231. Professional Issues in Psychology. 4 Units.**

Examines a variety of issues related to the professional socialization and development of graduate students in psychology. Topics include the publication process, sources of research funding, alternative employment options, competitiveness on the job market, and the academic career route.

Restriction: Graduate students only.

**PSCI P232. Trauma and Resilience. 4 Units.**

Psychological impact of trauma; biopsychosocial factors affecting development of traumatic stress, treatment, and preventive interventions for traumatic stress; define and measure resilience; moral injury and post traumatic growth; ethics of studying trauma.

Restriction: Graduate students only.

**PSCI P234. Childhood. 4 Units.**

Provides graduate students with an overview of traditional and emerging theories, models, and research designed to understand children's development in the domains of cognitive, social, and emotional functioning.

Restriction: Graduate students only.

**PSCI P238. Child Psychopathology. 4 Units.**

Examination of etiology, classification, and developmental pathways of disorders, as well as risk and resilience factors, during the childhood/adolescent years. Discussion of genetic influences and contextual risk factors as well as internalizing and externalizing disorders.

Restriction: Graduate students only.

**PSCI P242. Legal Reasoning and Jurisprudence. 4 Units.**

Overview of the law and legal process as well as the history and assumptions underlying modern legal reasoning. Issues related to procedure and evidence as well as key jurisprudential perspectives are discussed.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P246. Affective Neuroscience. 4 Units.**

Provides an overview of the emerging field of affective neuroscience. Emphasis is placed on mapping affective experience and behavior to brain function, including cross-level integration of anatomical, chemical, fMRI, and electrical data.

Restriction: Graduate students only.

**PSCI P247. EEG Methods . 4 Units.**

Provides an in-depth training of the electroencephalogram (EEG) methodology with a specific focus on the event-related potential technique. Emphasis is on learning how to use this methodology and how to analyze data, with a focus on emotional stimuli.

Restriction: Graduate students only.

**PSCI P249. Advanced Social Psychology . 4 Units.**

Conveys an appreciation of the flavors of contemporary social psychology, an understanding of empirical approaches to problems in this area, and a sense of the array of theoretical orientations in the field.

Restriction: Graduate students only.

**PSCI P250. Emotion, Reasoning, and Memory. 4 Units.**

Examines research and theory on emotion from the perspective of cognitive psychology. Topics include the effects of emotions on attention, memory, and problem solving; the relations between emotional and cognitive development; flash-bulb memories of intense emotional experiences; eyewitness testimony.

Restriction: Graduate students only.

**PSCI P251. Clinical Interviewing and Treatment in a Forensic Setting. 4 Units.**

Students receive an introduction to clinical interviewing, learn details of strategic, solution-focused therapy, and think critically about issues that come at the interaction of psychology and the law. Students are not 'license-eligible' at end of this course.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P252. Law and Behavior: Compliance and Enforcement. 4 Units.**

Provides sophisticated insight into the different ways through which law shapes behavior. Addresses both the economic amoral rational choice theories, as well as ideas from social psychology, criminology, and sociology about the moral, social, and and unconscious dimensions of compliance.

Restriction: Graduate students only. Psychological Science Majors only. Psychology and Social Behavior Majors only.

**PSCI P253. Master of Legal and Forensic Psychology Capstone. 4 Units.**

Focuses on macro-level writing topics such as developing a meaningful research question, conducting a thorough review of relevant literature, and presenting a clear and convincing research-based argument.

Restriction: Graduate students only.

**PSCI P254. Mental Health and the Law . 4 Units.**

Explores the history of criminalization of persons with mental illness. Topics include challenges and needs of persons with mental illness; civil and outpatient commitment; law enforcement responses to persons with mental illness; and mentally ill offenders in jails and prisons.

Restriction: Master of Legal & Forensic Psy Degree students only. Graduate students only.

**PSCI P255. Violence, Anger, and Psychopathology. 4 Units.**

Overviews the prevalence of violence as a criminal and public health problem. Topics include violence within families and intimate partner relationships, traumatic origins of violence, the development of a violence-prone personality, the association of anger and violence with psychopathology.

Restriction: Master of Legal & Forensic Psy Degree students only. Graduate students only.

**PSCI P256. Family and the Law . 4 Units.**

Examines sociological and legal perspectives on the relationship between family life and law, with a focus on three distinct but sometimes interconnected domains: the child welfare system, the criminal justice system, and the immigration system.

Restriction: Master of Legal & Forensic Psy Degree students only. Graduate students only.

**PSCI P258. Health Psychology. 4 Units.**

Interdisciplinary exploration of emerging fields of health psychology and behavioral medicine. Topics: role of stress in development/treatment of medical problems; sociocognitive determinants of health and illness; interpersonal health transactions; behavioral approaches to medical problems such as diabetes, obesity, hypertension.

Restriction: Graduate students only.

**PSCI P260. Technology and Health. 4 Units.**

Explores the growing intersection of health and technology, including electronic Health ("eHealth"), mobile health ("mHealth"), and digital health and medicine. Specifically, it focuses on the implications and uses of technologies for behavioral and emotional health, and behavioral change.

Restriction: Graduate students only.

**PSCI P261. Intensive Longitudinal Data Analysis. 4 Units.**

Fundamentals of Intensive Longitudinal Study designs, gain first-hand experience collecting ILD using web and/or mobile-based platforms, and learn.

Prerequisite: SE 264A and SE 264B

Restriction: Graduate students only.

**PSCI P262. Interpersonal Processes and Health. 4 Units.**

Examines traditions of research linking interpersonal processes to emotional or physical health. Topics include: role of social support in ameliorating stress, effects of social control on health-compromising behaviors, adverse effects of social relationships on health, causes of deficient social relationships.

Restriction: Graduate students only.

**PSCI P263. Eyewitness Testimony. 4 Units.**

Examines the evidence that shows that faulty eyewitness memory is the major cause of wrongful convictions. Explores what the legal system thinks of eyewitness testimony and how the legal system has dealt with eyewitness issues.

Same as CLS C263.

Restriction: Graduate students only.

**PSCI P265. Memory and the Law. 4 Units.**

Examines the controversial topic of repressed memory, or perception and memory of real-world events.

Same as CLS C265.

Restriction: Graduate students only.

**PSCI P266. Psychology and the Law. 4 Units.**

Overview of how psychology is applied to the civil and criminal justice systems, how case law shapes this application, and how legal decisions affect the direction of psychological research. Interdisciplinary approach to research in psychology, law, and/or criminology.

Same as CLS C266.

Restriction: Graduate students only.

**PSCI P271. Human Evolution and Behavior. 4 Units.**

Covers theories and empirical research concerning the evolutionary origins of human behaviors and their variations. An interdisciplinary course emphasizing both evolutionary psychology (e.g., mating strategies, kinship, and parenting) and molecular evolution (i.e., evolution of genes for various behaviors).

Same as BIOC 217.

Restriction: Graduate students only.

**PSCI P273. Biobehavioral Aspects of Health and Illness. 4 Units.**

Examines the behavior-physiology interactions of some major bodily systems: the nervous, cardiovascular, gastrointestinal, and endocrine systems. Analysis of normal and abnormal states of these systems as they relate to tissue injury, disease, and rehabilitation.

Restriction: Graduate students only.

**PSCI P275. Special Topics in Psychological Science . 4 Units.**

Topics covered vary with interests of instructor.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**PSCI P276. Meta Analysis. 4 Units.**

The process of synthesizing results from a number of studies that address a common research question is often referred to as meta-analysis. Explores the meta-analysis process from the coding of retrieved studies to the final research synthesis.

Restriction: Graduate students only.

**PSCI P280A. Interdisciplinary Salivary Bioscience. 4 Units.**

Theory and research on the integration of salivary analytes into developmental, social, behavioral, and health sciences. Topics include oral fluid as biological specimens; practical aspects of sample handling, collection, and study design; basics of laboratory methods used for assaying saliva.

Restriction: Graduate students only.

**PSCI P280B. Interdisciplinary Salivary Bioscience Lab. 4 Units.**

Laboratory sequel to the P280A seminar. Provides laboratory-based hands-on experience integrating salivary analytes into developmental, social, behavioral, and health sciences that also includes supervised training on sample processing.

Prerequisite or corequisite: PCSI P280A. PCSI P280A with a grade of B or better

Restriction: Graduate students only.

**PSCI P281. Race and the Law. 4 Units.**

Explores how race and other markers of social identity shape outcomes within the criminal justice system. Students examine how race, ethnicity, and national origin intersect with rules governing the policing, trials, and punishment.

Restriction: Master of Legal & Forensic Psy Degree students only.

**PSCI P282. Salivary Bioscience Data Analysis . 4 Units.**

A salivary bioscience statistical research working group. Students conduct guided data analyses with salivary biomarker data. Special topics related to salivary bioscience analytic strategies and the interpretation and dissemination of research findings are discussed.

Restriction: Graduate students only.

**PSCI P283H. Psychoneuroimmunology. 4 Units.**

Introduces students to the field of psychoneuroimmunology and helps them develop the conceptual and methodological skills necessary for designing and interpreting research on the bidirectional relationship between the immune system and psychological processes.

Restriction: Graduate students only.

**PSCI P284. Health and Emotion. 4 Units.**

Overview of research focused on understanding how emotional processes influence physical health. Provides students with a deeper understanding of how emotions play into the health of others as well.

Restriction: Graduate students only.

**PSCI P285. Anger: A Turbulent Emotion. 4 Units.**

Provides an enriched perspective on anger beginning with its understanding in classical antiquity. Topics include developmental processes and trauma, anger physiology and neuroscience, anger-related physical health impairments, and the involvement of anger in psychopathology and violence.

Restriction: Graduate students only.

**PSCI P286. Motivation. 4 Units.**

Introduces major concepts of motivational psychology, theory, and history. Application of motivational concepts to phenomena from social psychology and affective science. Development of own research proposal in a motivational framework and/or conceptualizing or expanding an ongoing or planned research project.

Restriction: Graduate students only.

**PSCI P288. Human Neuropsychology . 4 Units.**

Focuses on clinical, neuroanatomical, and neuropathological studies that have contributed to our understanding of brain-behavior relationships in the context of normal brain function and disease-associated neuropsychiatric syndromes.

Restriction: Graduate students only.

**PSCI P289. The Teaching of Psychology. 4 Units.**

Provides students with the theory and skills needed to teach undergraduate psychology courses. Covers research on theories and methods of teaching, curriculum design, and evaluation. Students also gain practical experience preparing and presenting material.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Psychological Science Majors only. Psychology and Social Behavior Majors only.

**PSCI P290. Research in Developmental Psychology. 4 Units.**

Introduces graduate students to research conducted by individual faculty members in the area of developmental psychology. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P291. Research in Health Psychology. 4 Units.**

Introduces graduate students to research conducted by individual faculty members in the area of health psychology. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P292. Research in Psychopathology and Behavior Disorder. 4 Units.**

Introduces graduate students to research conducted by individual faculty members in the area of psychopathology and behavior disorder. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P293. Research in Social and Personality Psychology. 4 Units.**

Introduces graduate students to research conducted by individual faculty members in the area of social and personality psychology. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P294A. Research Directions in Psychological Science I. 2 Units.**

Introduces students to the current research of faculty, graduate students, and visitors to the Department of Psychological Science. Includes examination of contemporary research issues and controversies, as well as issues related to students' development as professionals.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PSCI P294B. Research Directions in Psychological Science II. 2 Units.**

Introduces students to the current research of faculty, graduate students, and visitors to the Department of Psychological Science. Includes examination of contemporary research issues and controversies, as well as issues related to students' development as professionals.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PSCI P294C. Research Directions in Psychological Science III. 2 Units.**

Introduces students to the current research of faculty, graduate students, and visitors to the Department of Psychological Science. Includes examination of contemporary research issues and controversies, as well as issues related to students' development as professionals.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**PSCI P295. Research in Psychology and Law. 4 Units.**

Introduces graduate students to research conducted by individual faculty members in the area of psychology and law. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P296. Doctoral Dissertation Research and Writing. 4-12 Units.**

Dissertation research with Psychological Science faculty.

Prerequisite: Advancement to candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P298. Directed Studies in Psychological Science. 2-4 Units.**

Directed study with Psychological Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PSCI P299. Independent Studies in Psychological Science. 2-8 Units.**

Independent research with Psychological Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Master of Legal and Forensic Psychology

The Master of Legal and Forensic Psychology is designed for professionals or recent graduates who wish to further their education and gain skills that will help them obtain careers in the field of legal and forensic psychology. Students will be immersed in an interdisciplinary field devoted to advancing scholarship, testing theories, and engaging in public service relevant to individuals' participation and experiences in legal contexts. For example, students will learn about interpretation of scientific evidence and psychological assessment, protection of child witnesses, the accuracy of human memory, assessment and treatment of juvenile offenders, and the role of human and organizational factors associated with miscarriages of justice.

## Program Details

To achieve this goal, the program consists of six quarters (total of two years) and students are required to complete a 13-course curriculum (two online courses per quarter during the regular academic year and one mandatory week-long introductory in-residence course).

## Course Requirements

A. Complete:

PSCI P200	Introduction to Legal and Forensic Psychology
PSCI P202	Data Analysis and Statistics
PSCI P208	Research Methods
PSCI P215	Psychology and Law
PSCI P222	Forensic Assessment
PSCI P242	Legal Reasoning and Jurisprudence
PSCI P253	Master of Legal and Forensic Psychology Capstone

B. Complete six electives

In lieu of a thesis, students complete a capstone project, where they are required to synthesize the knowledge they obtained over the course of their studies and analyze an area where psychology can inform legal policy and/or practice. Graduates from the program will be well-prepared for careers as jury consultants, court liaisons, victims' advocates, probation officers, law enforcement advocates, case managers, and program directors; able to secure employment in a wide range of settings, including correctional institutions, psychiatric facilities, community-based agencies, jury consulting agencies, mental health centers, child welfare agencies, social service agencies, and law enforcement; and, once employed, well-suited to advance in an array of related fields such that they ultimately become leaders in the field of law and psychology.

For more information, visit the Master of Legal and Forensic Psychology website. (<http://mlfp.soccco.uci.edu/>)

## Psychological Science, B.A.

The Psychological Science major provides students a foundation to pursue graduate work in psychology, or to find employment after graduation in the areas of public health, health services, human resources, marketing, social work, counseling, law, education, and related fields. The major focuses on determinants of human health, well-being, and functioning in a broad range of developmental, social, cultural, and environmental contexts. Undergraduate students begin with basic course work in developmental psychology, health and preclinical (abnormal) psychology, and social psychology. Subsequent courses cover such topics as social, emotional, and cognitive development in children, adolescents, adults; behavioral disorders and developmental psychopathology; counseling and therapy; cultural, social, and personality influences on behavior; attitude formation and change; health psychology; stress and coping; and psychology and the law. Opportunities are available to work with faculty members on research in these and other areas. Undergraduate research experience provides a valuable background for entry into many graduate programs.

Field study opportunities exist in hospitals, community health clinics, counseling centers, legal settings, environmental programs, social service agencies, schools and after-school programs, child care settings, and a wide variety of other community programs that offer a broad range of services.

Students should be aware that psychology courses are offered in several different departments and programs at UCI. Students interested in developmental, clinical, social, emotional, health, cross-cultural, or environmental psychology, or in psychology and the law, are advised to consult the course listings for the Department of Psychological Science.

These courses offer students a solid foundation in general psychology.

Students interested in perception, sensorimotor integration, and mathematical psychology are advised to consult course listings for the Department of Cognitive Sciences.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Departmental Requirements

Thirteen courses (52 units) as specified below:

#### A. Psychology Fundamentals (12 units):

PSCI 11A	Psychology Fundamentals
PSCI 11B	Psychology Fundamentals
PSCI 11C	Psychology Fundamentals

#### B. Four upper-division core courses (16 units):

PSCI 101D	Life Span Developmental Psychology
PSCI 102C	Abnormal Psychology
PSCI 103H	Health Psychology

PSCI 104S

Social Animal: An Introduction to Social Psychology

**C. Six upper-division courses (24 units) chosen from the following:****C-1. Choose one course from three different groups:**

Group 1: Developmental Psychology (PSCI 110D–134D)

Group 2: Health Psychology (PSCI 118D, 135H–149H)

Group 3: Pre-Clinical/Psychopathology (PSCI 139H, 150C–169C)

Group 4: Social, Personality, and Environmental Psychology (PSCI 170S–189S)

**C-2. Three additional upper-division courses chosen from the specialty areas in C-1 above or from: <sup>1</sup>**

PSCI 100 Special Topics in Social Behavior

PSCI 190A–193Z

PSCI 196 Research Seminar in Psychological Science

SOCECOL 190 Applied Statistics in Social and Behavioral Research

SOCECOL H190A Honors Research

SOCECOL H190W Honors Research

<sup>1</sup> Three additional upper-division courses chosen from the specialty areas in C-1 above or from courses numbered PSCI 100, 190-193Z, 196, Social Ecology H190A, and H190W. NOTE: Courses used to satisfy requirement C-1 cannot be used to satisfy C-2; a maximum of two courses from 192A-Z and one 196 course may be counted toward the major.

## Psychological Science, Minor

The minor in Psychological Science focuses on determinants of human health, well-being, and functioning in a broad range of developmental, social, cultural, and environmental contexts. Students begin with basic course work in developmental psychology, health psychology, clinical/abnormal psychology, and social psychology. Subsequent courses cover such topics as social, emotional, and cognitive development in children, adolescents, adults; behavioral disorders and developmental psychopathology; counseling and therapy; cultural, social, and personality influences on behavior; attitude formation and change; health psychology; stress and coping; and psychology and the law.

### Minor Requirements

The minor in Psychological Science is met by completing eight courses (32 units). Students have the option of choosing between two versions of the minor as specified below:

#### Version 1:

PSCI 11A Psychology Fundamentals

PSCI 11B Psychology Fundamentals

PSCI 11C Psychology Fundamentals

SOCECOL 10 Research Design

Select four courses from PSCI 100–193Z.

or

#### Version 2:

PSCI 9 Introduction to Psychology

SOCECOL 10 Research Design

Select six courses from PSCI 100–193Z.

**Residence Requirement for the Minor:** Six courses required for the minor must be completed successfully at UCI.

## Psychological Science, Ph.D.

The Department of Psychological Science offers a Ph.D. program in Psychological Science. The main goal of this program is to train behavioral scientists to apply theory and methods in psychology, together with perspectives and knowledge from allied disciplines, to the analysis of human behavior and health across the life span and in diverse sociocultural contexts. This program values both basic and applied research that is relevant to the improvement of individual, community, and societal functioning. Emphasis is placed on the integration of knowledge from several subspecialties in psychology in order to understand the antecedents and developmental course of adaptive or maladaptive behavior and on the conduct of research that has implications for social policies, programs, and interventions.

## Program Requirements

All students take seven required core courses:

PSCI P201	Research Methods in Psychology
SOCECOL 264A	Data Analysis
SOCECOL 264B	Data Analysis
SOCECOL 200	Seminar in Social Ecology
An additional research methods/data analysis course from an approved list	
PSCI P209A	Applied Psychological Research
PSCI P294A- P294B- P294C	Research Directions in Psychological Science I and Research Directions in Psychological Science II and Research Directions in Psychological Science III

The course on Applied Research PSCI P209A introduces students to the scientific, professional, and ethical issues involved in conducting and translating psychological research in a variety of applied settings. The three-quarter course Research Directions in Psychological Science (PSCI P294A-PSCI P294B-PSCI P294C) allows students to increase their breadth of knowledge regarding contemporary issues and controversies in psychology by participating in the Department's weekly colloquium series and interacting with visiting scholars and other speakers.

Students must select one of four core specialization areas in which to further focus their graduate training. Additional course requirements vary across each specialization.

### Health Psychology Specialization

PSCI P258	Health Psychology
-----------	-------------------

and three additional courses from approved health electives

### Social and Personality Specialization

PSCI P214 or PSCI P233	Seminar in Social Psychology
---------------------------	------------------------------

and three additional courses from an approved list

### Affective Science Specialization

PSCI P226 or PSCI P250	Emotion in Psychology Emotion, Reasoning, and Memory
---------------------------	---

and three additional courses from an approved list of Affective Science electives

### Developmental Psychology Specialization

PSCI P220	Developmental Psychology: Theories and History
-----------	--

and three additional courses from approved developmental electives

In addition to selecting a core specialization area, students are also required to select a minor specialization and complete one required specialization course and one elective course in this area. The minor specialization and elective courses should be chosen according to the plan that best meets the needs of the individual student, as determined in consultation with the student's faculty advisor and the departmental graduate advisor. In addition to courses offered by the Department of Psychological Science and the School of Social Ecology, students may take courses offered by other departments in other schools such as the Departments of Cognitive Science, Anthropology, and Sociology in the School of Social Sciences and the Department of Neurobiology and Behavior in the School of Biological Sciences. Approval from instructors is required to enroll in these courses.

Students who are interested can pursue an optional training track in psychology and law. This track is supplemental to the requirements associated with the required specializations and supplemental to the required minor. That is, all students must complete the above-listed requirements for their specialization and minor. Then, if the student decides to complete the training track in psychology and law, this training is in addition to the requirements listed above. For the training track, a total of four courses must be taken, one required (PSCI P266) and three electives. The electives must be approved by the student's faculty mentor and departmental advisor and can be a course in PS, or in the School of Social Ecology or School of Law, with instructor and school approval.

Training in this program emphasizes four core areas of psychology. The specialization in **Developmental Psychology** focuses on the development of individuals at various periods in the life course and the effects of varying social and cultural contexts on cognitive, social, and health outcomes. **Health Psychology** focuses on identifying, evaluating, and enhancing the psychosocial and behavioral factors that promote mental and physical health, prevent disease, and optimize medical treatments. The specialization in **Affective Science** focuses on the effects of emotion, motivation, and values on human reasoning, behavior, and health in typical and atypical populations, across the life span, and across cultures. **Social and Personality Psychology** focuses on the interrelations among attitudes, perceptions, motives, emotions, and personality characteristics as they affect individual functioning, interpersonal processes, and intergroup relations. In addition, several faculty offer courses and conduct research in the area of **Psychology and Law**,

dealing with such issues as the malleability of memory processes, the ability of jurors to understand scientific evidence, the impact on children and adolescents of contact with the legal system, and the response of the legal system to individuals with severe personality disorders.

Students will learn to understand human behavior from a social ecological, contextual perspective. They will be exposed to the major theories in each specialization and learn various social science research methods. All students are encouraged to become actively involved in research from the earliest stage of their training. Through close association with faculty members and participation in the faculty's research projects, students learn to conduct methodologically sophisticated research that addresses contemporary psychological and social issues. Current research teams are investigating stress, coping, and social support; biobehavioral mechanisms of cardiovascular reactivity; psychobiology of stress; personality factors that increase resilience to health threats; parent-child relations; work and family; transitions across the life course; adaptive aging; end-of-life medical decision making; culture and adolescent psychosocial development; cultural influences on social judgment; relations between cognitive and emotional development; emotion regulation; memory and eyewitness testimony; violence and anger management; the development of health-risking and health-protecting behaviors during childhood and adolescence; economic stress and psychopathology/behavioral disorders; health impacts of environmental stressors; mental health and psychopathy; juvenile and criminal justice; positive psychology; and person-environment fit.

### **Program in Law and Graduate Studies (J.D./Ph.D.)**

Highly qualified students interested in combining the study of law with graduate research and/or research qualifications in cognate disciplines are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students approved for this concurrent degree program may pursue a coordinated curriculum leading to a J.D. from the School of Law in conjunction with a Ph.D. in Psychological Science. The objective of the program is to promote interdisciplinary study of law while also enabling students to obtain both a J.D. and a graduate degree in less time than would be required to acquire both degrees separately. The normative time for completion is seven years for the J.D./Ph.D. combination.

Applicants must submit separate applications for admission to the School of Law and to Psychological Science. Once admitted for study into both components of their program, concurrent degree students will work with the PLGS director and the PS graduate advisor to develop a program of study that will permit efficient pursuit of both degrees. Ordinarily, students will commence their studies in PS and begin their first year of law school instruction after one or more years of graduate program training. Upon completion of the first year of law instruction, students will pursue a coordinated curriculum of upper-level law study and PS graduate program courses and research. Concurrent degree students' law enrollments will include a required 1-unit "Graduate Legal Studies" colloquium and 3-unit "Interdisciplinary Perspectives on Law" course. Concurrent degree students will be eligible for financial support through PS while pursuing the Ph.D. and through the law school while pursuing law studies.

## **Department of Urban Planning and Public Policy**

**Virginia L. Parks, Department Chair**

300 Social Ecology I

949-824-0563

<https://uppp.sococo.uci.edu/>

The Department of Urban Planning and Public Policy utilizes an interdisciplinary approach to the study of urban and regional planning, public policy issues, and the built environment. The Department faculty devote their scholarly and teaching efforts to theory-driven and empirically oriented urban research and their interests include urban and community development, environmental policy, health promotion and policy, and urban design and behavior. The faculty focuses on education in urban, social, public policy, and environmental problems.

The Department offers the B.A. in Urban Studies; undergraduate minors in Urban Studies and Urban and Regional Planning; the Ph.D. in Urban and Environmental Planning and Policy; the Master of Public Policy; and the Master of Urban and Regional Planning professional degree (fully accredited by the national Planning Accreditation Board). The Department's graduate degree programs feature innovative teaching often involving students in community projects, and a significant degree of accessibility by students to faculty members.

The faculty members in the Department are productive and influential scholars. The Department's teaching, research, and graduate training utilize UCI's proximity to both urban centers and planned communities, as well as the University's location within the dynamic and multicultural Southern California and Pacific Rim regions. Collaborative academic and research ties are maintained with UCI's Blum Center for Poverty Alleviation, Metropolitan Future Initiatives, Institute of Transportation Studies, Center for Global Peace and Conflict Studies, Newkirk Center for Science and Society, Environment Institute, Center for Unconventional Security Affairs, Center for Organizational Research, and Water UCI.

The common mission linking the Department's undergraduate, master's, and doctorate-level instruction and faculty research efforts is to bring applied research to the cause of bettering individuals, neighborhoods, communities, and regions. Southern California has grown dramatically over the past four decades and will soon become the nation's largest urban corridor. The challenges to maintain the quality of life, provide employment opportunities, and reduce the deep socioeconomic disparities of this bi-national and multicultural metropolitan region are enormous. Extremely diverse, multiethnic communities face the necessity of solving their problems in ways that are acceptable to their populations. Older central city areas that are vital to the region face issues of social and economic sustainability. The need to create employment opportunities, through the application of new technologies in industries and services, will be a constant feature of an urban region undergoing such population increases. At the same time, urban growth and transportation will have to meet increasingly stringent environmental regulations that can safeguard the population's health and quality of the diverse

natural environments. The urban design and landscape of most communities stand to be reshaped as never before, as the building stock ages and the need to redevelop intensifies.

Faculty members and students who study urban and community development examine contemporary planning approaches to managing local, community, and regional development and explore the spatial dynamics of urbanization in diverse settings and how public policy can guide urban and regional growth to balance environmental and economic concerns. Faculty members and students engaged in design-behavior research investigate the interrelationships of people and their socio-physical environments at all scales, from micro to macro, with emphasis on urban design and community-scale issues. Faculty members and students who examine environmental policy focus on the environment and natural resources as important policy and planning issues and provide a clear understanding about how politics, economics, ethics, and institutions affect planning and policy choices. Finally, faculty members and students who study health promotion and policy examine the public welfare, psychological, and health implications of social and physical planning, and the techniques and goals of public health policy making.

- Environmental Science and Policy, B.A.
- Master of Public Policy
- Master of Urban and Regional Planning
- Urban and Environmental Planning and Policy, Ph.D.
- Urban and Regional Planning, Minor
- Urban Studies, B.A.
- Urban Studies, Minor

## Faculty

Victoria Basolo, Ph.D. University of North Carolina at Chapel Hill, *Professor of Urban Planning and Public Policy*

Scott A. Bollens, Ph.D. University of North Carolina at Chapel Hill, *Drew, Chace and Erin Warmington Chair in the Social Ecology of Peace and International Cooperation and Professor of Urban Planning and Public Policy*

Kenneth S. Chew, Ph.D. University of California, Berkeley, *Professor of Teaching of Urban Planning and Public Policy*

Ross F. Conner, Ph.D. Northwestern University, *Professor Emeritus of Urban Planning and Public Policy*

William J. Cooper, Ph.D. University of Miami, *Professor Emeritus of Civil and Environmental Engineering; Urban Planning and Public Policy* (environmental chemistry, advanced oxidation processes for water treatment, aquatic photochemistry of carbon cycling)

David Feldman, Ph.D. University of Missouri-Columbia, *Professor of Urban Planning and Public Policy; Political Science*

Martha S. Feldman, Ph.D. Stanford University, *Roger W. and Janice M. Johnson Chair in Civic Governance and Public Management and Professor of Urban Planning and Public Policy; Paul Merage School of Business; Sociology* (organization theory and behavior, stability and change in organizations, decision-making and information processing, public management, qualitative research methods)

Ajay Garde, Ph.D. University of Southern California, *Associate Professor of Urban Planning and Public Policy*

Douglas Houston, Ph.D. University of California, Los Angeles, *Associate Professor of Urban Planning and Public Policy*

Helen Ingram, Ph.D. Columbia University, *Professor Emerita of Urban Planning and Public Policy*

Jae Hong Kim, Ph.D. University of Illinois at Urbana-Champaign, *Assistant Professor of Urban Planning and Public Policy*

Raul P. Lejano, Ph.D. University of California, Los Angeles, *Professor Emeritus of Urban Planning and Public Policy*

Nicholas J. Marantz, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Urban Planning and Public Policy; School of Law*

Richard Matthew, Ph.D. Princeton University, *Professor of Urban Planning and Public Policy; Political Science*

Sanjoy Mazumdar, Ph.D. Massachusetts Institute of Technology, *Professor of Urban Planning and Public Policy; Religious Studies*

Walter Nicholls, Ph.D. University of California, Los Angeles, *Associate Professor of Urban Planning and Public Policy; Sociology* (urban sociology, politics and policy, social movements, immigration, comparative urbanism, theory, planning conflicts)

Judith Olson, Ph.D. University of Michigan, *Professor Emeritus of Informatics; Paul Merage School of Business; Urban Planning and Public Policy* (interactive and collaborative technology, human-computer interaction, computer-supported cooperative work)

Seth D. Pipkin, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Urban Planning and Public Policy*

Maria G. Rendón, Ph.D. Harvard University, *Assistant Professor of Urban Planning and Public Policy; Sociology* (urban sociology, immigration, race/ethnicity, sociology of education and social policy)

Michael Ruane, M.A. University of California, Los Angeles, *Lecturer of Urban Planning and Public Policy*

David M. Snow, J.D. Loyola Marymount University, *Lecturer of Urban Planning and Public Policy*

Daniel Stokols, Ph.D. University of North Carolina, Chapel Hill, *Professor Emeritus of Psychological Science; Religious Studies; Urban Planning and Public Policy*

Luis Suarez-Villa, Ph.D. Cornell University, *Professor Emeritus of Urban Planning and Public Policy*

Rodolfo D. Torres, Ph.D. Claremont Graduate University, *Professor of Urban Planning and Public Policy; Political Science*

## **Affiliate Faculty**

Graeme T. Boushey, Ph.D. University of Washington, *Associate Professor of Political Science; Urban Planning and Public Policy* (California politics and statewide elections, American politics, state and federal policy-making, ballot measures and the initiative process)

Tim-Allen Bruckner, Ph.D. University of California, Berkeley, *Associate Professor of Program in Public Health; Urban Planning and Public Policy*

Jan K. Brueckner, Ph.D. Stanford University, *Distinguished Professor of Economics; Urban Planning and Public Policy*

Damon Clark, Ph.D. Oxford University, *Associate Professor of Economics; Urban Planning and Public Policy*

Joseph DiMento, Ph.D. University of Michigan, *Professor of School of Law; Criminology, Law and Society; Paul Merage School of Business; Urban Planning and Public Policy*

John R. Hipp, Ph.D. University of North Carolina at Chapel Hill, *Professor of Criminology, Law and Society; Sociology; Urban Planning and Public Policy* (community context of crime, household decisions and neighborhood change, research methods)

Richard D. McCleary, Ph.D. Northwestern University, *Professor of Criminology, Law and Society; Urban Planning and Public Policy* (criminal justice, research methodology, statistics)

Michael G. McNally, Ph.D. University of California, Irvine, *Professor of Civil and Environmental Engineering; Urban Planning and Public Policy* (travel behavior, transportation systems analysis)

David S. Meyer, Ph.D. Boston University, *Professor of Sociology; Political Science; Urban Planning and Public Policy* (social movements, public policy, peace and war, social justice)

Sylvia Nam, Ph.D. University of California, Berkeley, *Assistant Professor of Anthropology; Biological Chemistry; Urban Planning and Public Policy* (urban studies, property, transnational expertise, Southeast Asia)

Brett F. Sanders, Ph.D. University of Michigan, *Professor of Civil and Environmental Engineering; Urban Planning and Public Policy* (urban flooding, coastal flooding, dam-break flooding, flood hazard modeling, flood risk management, sediment management, shallow-water hydrodynamics and morphodynamics, computational methods, remote-sensing with drones, translational research for flood modeling targeting community resilience, population health and poverty alleviation)

Jean-Daniel M. Saphores, Ph.D. Cornell University, *Professor of Civil and Environmental Engineering; Economics; Urban Planning and Public Policy* (transportation and environmental systems (with a focus on air pollution and energy use), travel behavior analysis, alternative fuel vehicles, automated vehicles, transit use, sustainable infrastructure management, and decision making under uncertainty using real options)

David A. Smith, Ph.D. University of North Carolina at Chapel Hill, *Professor of Sociology; Urban Planning and Public Policy* (world systems analysis, urbanization, development, comparative-historical sociology, dependent development in east Asia)

George E. Tita, Ph.D. Carnegie Mellon University, *Professor of Criminology, Law and Society; Urban Planning and Public Policy* (criminology, community context of violence, urban youth gangs, homicide studies)

Kerry Vandell, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Paul Merage School of Business; School of Law; Urban Planning and Public Policy*

Linda T. Vö, Ph.D. University of California, San Diego, *Professor of Asian American Studies; Culture and Theory; Sociology; Urban Planning and Public Policy* (race and ethnic relations, immigrants and refugees, gender relations, community and urban studies)

## Public Policy Courses

### **PUB POL 215. Statistics and Methods for Public Policy. 4 Units.**

Introductory course with focus on gaining a sound understanding of what constitutes credible evidence in support of policy arguments and management decisions.

Restriction: Graduate students only.

### **PUB POL 219. Information and Public Policy. 4 Units.**

Evaluates strengths and weaknesses of qualitative and quantitative methods and the data used in making public policy claims. Looks at the bases of certain widely accepted measures of poverty, growth, environmental quality, and the like.

Repeatability: May be taken for credit 2 times.

Restriction: Public Policy Majors have first consideration for enrollment.

### **PUB POL 221. Public Policy . 4 Units.**

Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Repeatability: May be taken for credit 2 times.

Same as PP&D 221.

Restriction: Public Policy Majors have first consideration for enrollment.

### **PUB POL 225. Qualitative Methods . 4 Units.**

Fieldwork, data collections techniques, and related issues for anti-positivistic research. Data collection techniques include observation, physical traces, participation, in-depth interview. Data checks include veracity, detail, completeness, rigor.

Repeatability: May be taken for credit 2 times.

Restriction: Public Policy Majors only.

### **PUB POL 227. Economics of Government. 4 Units.**

Prepares students to analyze public policy questions with tools from economics. By the end, students should be able to identify important economic issues in public policy debates and consume and critique economic research on these topics.

Same as ECON 275.

### **PUB POL 240. Microeconomics and Public Policy. 4 Units.**

Introduces the fundamental principles of microeconomics that are required for applied policy analysis. Provides students with an intuitive understanding of the microeconomic approach, and familiarizes them with concepts used in applied public policy analysis.

Repeatability: May be taken for credit 2 times.

Same as ECON 255.

Restriction: Graduate students only.

### **PUB POL 260. Policy and Ethics . 4 Units.**

Examines the challenge of identifying ethical principles that can guide us in formulating and assessing public policy, the public policy process from an ethical perspective, and the ethics of the individual engaged in the public policy arena.

Restriction: Public Policy Majors only.

### **PUB POL 283. Collaborative Governance and Public Management. 4 Units.**

Introduction to inclusive management. To make effective use of public resources, public managers are inventing ways of managing that alter relationships within organizations, between organizations, between sectors, and with the public. Requires rethinking fundamentals such as leadership and motivation.

Same as UPPP 283.

Restriction: Public Policy Majors have first consideration for enrollment.

## Urban Planning and Public Policy Courses

### **UPPP 4. Introduction to Urban Studies. 4 Units.**

Introduces the substantive areas, concepts, and tools in the field of urban studies. Acquaints students with physical, environmental, social, economic, and political dimensions of cities. Examines the challenges facing cities, including poverty, sustainability, development, globalization, and others.

Restriction: School of Social Ecology students have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

(III)

### **UPPP 5. Introduction to Urban Planning and Policy. 4 Units.**

Introduces students to the basic issues in urban planning and public policy.

(III)

### **UPPP 8. Introduction to Environmental Analysis and Design. 4 Units.**

Overview of general concepts, theoretical principles, and analytical techniques for investigating environmental systems. Integrates tools from natural and social sciences to analyze contemporary environmental challenges such as pollution, resource acquisition, facility and ecosystem design, impact assessments, formulation of environmental policy.

(III)

### **UPPP H30E. Cities: Focal Point for Sustainability Problems and Solutions I. 4 Units.**

Explores the nature of cities, focusing on the challenges facing cities today, their possible solutions, and the technical and social constraints on those solutions.

Prerequisite: SSCI H30D

Restriction: Campuswide Honors Collegium students only.

(III)

### **UPPP H30F. Cities: Focal Point for Sustainability Problems and Solutions II. 4 Units.**

Explores the nature of cities, focusing on the challenges facing cities today, their possible solutions, and the technical and social constraints on those solutions.

Prerequisite: UPPP H30E

Restriction: Campuswide Honors Collegium students only.

(II)

### **UPPP 40. Urban Sociology. 4 Units.**

Overview of theoretical, substantive, and policy issues in urban sociology. History of urbanization, the school of human ecology, and recent trends regarding urbanism. Time is devoted to understanding the causes and possible solutions to urban problems.

Overlaps with SOCL 43.

### **UPPP 100. Special Topics in Urban Studies. 4 Units.**

Course content varies with interest of the instructor.

Repeatability: Unlimited as topics vary.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

### **UPPP 101. History of Cities. 4 Units.**

Surveys the global and historical co-evolution of cities and social institutions, including religion, the economy, governance, the arts, technology, and family life.

### **UPPP 102. Urban Inequality. 4 Units.**

Examines structural inequality and the influence that urbanization has in affecting race, ethnic, and class relations. Explores how race/ethnicity, class, urban space, housing, economic development, public education, and land policy intersect in cities, both historically and today.

Restriction: Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 103. Comparative Approaches to Urban Regions. 4 Units.**

An introduction to comparative urbanization in developing countries. Introduces students to the geography, history, and theories of urbanization, and then reviews urban planning, public policy, and governance.

Restriction: Public Health Policy Majors only. Social Ecology Majors only. Urban Studies Majors only.

**UPPP 104. Urban America . 4 Units.**

Students examine the historical, social, political, and economic factors that contributed to the construction of the American urban context, one that is poverty concentrated and racially/ethnically segregated. Students also critically assess the consequence of growing up in America's urban neighborhoods.

Same as CHLT 162A, SSCI 163A.

**UPPP 107. Urban and Regional Planning. 4 Units.**

Important substantive areas, concepts, tools in the field of urban and regional planning. Topics include: forces that have historically guided and are currently guiding U.S. urbanization; land use, economic development, housing and community development, environmental planning; legal, environmental, governmental contexts.

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 108. Cities and Transportation. 4 Units.**

The relationship between urban areas and transportation systems. Economic analysis of cities, transportation and urban form, highway congestion, environmental impacts of transportation, public transit, land use and transportation, and political influences on transportation planning.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 109. Housing and Urban Development Policy. 4 Units.**

Surveys public policy issues and develops analytic techniques in the areas of housing and urban development. Examines a range of policy topics including housing assistance to low- and moderate-income families, housing finance system, incentives for economic development, and neighborhood preservation.

Prerequisite: Recommended: Previous course work in economics.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 110. Urban Economic Development Policy. 4 Units.**

Theoretical and practical perspectives on local economic development policy. Integrates economic, planning, and political perspectives. Overview of economic role of cities and metropolitan areas. Specific development issues include: link between taxes, regulation, job growth; redevelopment planning; evaluation economic development policy.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 111. Climate Solutions. 4 Units.**

Focuses on carbon neutrality and climate stability, addressing.

Same as ESS 179, MAE 119.

Restriction: Upper-division students only.

**UPPP 112. Foundations of Community Health. 4 Units.**

A social ecological framework for understanding community health is presented. Measures of individual and community health are compared, and the influence of personal and environmental factors on individual, group, and population health is examined. Community health promotion strategies are discussed.

Same as PUBH 125.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 113. Poverty and Change in Developing Countries. 4 Units.**

Focuses on poverty in developing countries. Analyzes the magnitude and changing nature of poverty in the global south. Critically examines poverty conceptualized in terms of economic deprivation, well-being, and social exclusion.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 114W. Advanced Research Methods. 4 Units.**

For students planning to conduct senior research projects or apply to graduate school in social research fields. Topics include reviewing literature, preparing a research proposal, protecting human subjects, citing scholarly work, building measures, estimating sample size, interview and presentation skills.

Prerequisite: SE 10 and SE 13. Satisfactory completion of the Lower-Division Writing requirement.

Same as CLS C169W, PSCI 111W, SE 111W.

**(Ib)**

**UPPP 115. Global Poverty and Inequality in the 21st Century. 4 Units.**

Explores a multidisciplinary understanding of poverty and inequality in the 21st century and assesses impact of education, health, technology, and other interventions. Course offered online only.

Same as IS 115.

**UPPP 117. Environmental Justice. 4 Units.**

Engages students to critically analyze and evaluate environmental problems, environmental responses, and planning and policy debates regarding 'environmental justice' - essentially the race, class, and equity implications of environmental problems and policies.

**UPPP 118. Gentrification. 4 Units.**

Gentrification is a complex process that changes the makeup of neighborhoods and fuels political and policy conflicts. Students are provided with tools to understand the process and conceive of policies to ensure more inclusive and equitable cities.

**UPPP 120. Introduction to GIS for Planning and Policy. 4 Units.**

Provides hands-on experience creating, visualizing, and interpreting spatial data, with a focus on Geographic Information Systems (GIS) applications for urban planning and public policy.

**UPPP 129. American Public Policy. 4 Units.**

Focuses on the development and implementation of public policy in the United States. Lectures cover theoretical models of the policy process as well as significant problems facing contemporary American decision-makers.

Same as PUBH 132, SSCI 152C, PLSC 121G.

**UPPP 130. Cities and Food . 4 Units.**

Explores the role of cities in transforming global diets: how urbanization has shaped what and how we eat, and what the co-evolution of diets and city life portend for the future.

**UPPP 131. Environmental Sustainability I. 4 Units.**

Provides an introduction to sustainability from different points of view; historical, scientific, political, ethical, and economic.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 132. Environmental Sustainability II. 4 Units.**

Investigates how sustainability can be implemented in a variety of contexts including water, energy, non-renewable resources, biodiversity, and urban policy, and also how it could be measured.

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 133. Environmental Law and Policy . 4 Units.**

Environmental law as a combination of traditional legal principles and newly created statutes, rules, and decisions applied to environmental protection. Investigates roles of courts, legislature, executive branch and administrative agencies, and private citizens attempting to regulate environmental quality.

Same as CLS C128.

Restriction: Criminology, Law and Society Majors only. Planning, Policy, and Design Majors only.

**UPPP 139. Water Resource Policy. 4 Units.**

Examination of contemporary water problems worldwide, with particular attention to the competing water demands in the western U.S., and water demand by the poor in developing countries. History and analysis of U.S. water policies at local, state, and federal levels.

Restriction: Environmental Science Majors have first consideration for enrollment. Earth System Science Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 142. Environmental Hazards in an Urbanizing World. 4 Units.**

Development patterns, including urbanization, can contribute to environmental hazard severity. Humans can plan, mitigate, and prepare to reduce costly hazard losses. Students learn about environmental hazards and human response to these threats.

(III)

**UPPP 145. Environmental Governance. 4 Units.**

How should the environment be managed and who should be responsible? What is effective environmental management, and for whom? These questions are answered by exploring traditional and emerging theoretical frameworks and applying them to real world environmental challenges.

**UPPP 146. Principles of Economics for Planning and Policy. 4 Units.**

Provides an introduction into economics for planning and policy students.

**UPPP 152. Cultural Ecology and Environmental Design. 4 Units.**

Introduction to cultural ecology and environmental and architectural design. Addresses the understanding of people's relationships with their built environments, the basic elements of architecture, architectural analysis, and cultural analysis are covered. Examines values in design and design for multicultural societies.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 153. Elements of Environmental Design. 4 Units.**

Basic elements of environmental design such as scale, proportion, rhythm, color, sound, lighting, surfaces, texture, architectural definition of spaces, volumes, massing volumetric analysis, solids and voids, and cultural aspects of design. Excitement and creativity in design, imageability.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 155. Urban Design Principles. 4 Units.**

Introduction to principles of urban design and its applications. Study of contemporary and traditional theories of urban design formulated to improve physical characteristics of built environment to facilitate an enhanced quality of life. A variety of case studies are discussed.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 166. Urban Politics and Policy . 4 Units.**

Examines why and how urban policies are enacted and carried out in contemporary U.S. cities and regions. Topics include evolution and organization of city governments and policymaking over the past century; who directs public policy and controls how cities develop.

(III)

**UPPP 167. Public Policy and Management. 4 Units.**

Exposes students to best management practices that assure effective planning and implementation of policies and programs in government, business, and nonprofit sectors. Includes guest lecturers who are proven leaders in four principal institutions of community: business, education, government, and nonprofit.

Restriction: Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 170. Health Policy. 4 Units.**

Considers social and economic aspects of health and disease in the United States. What are the proper roles of the individual, community, and government in improving health and health care? International comparisons will be made wherever possible.

Same as PUBH 122.

Restriction: Public Health Sciences Majors have first consideration for enrollment. Public Health Policy Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 172. Latino Metropolis. 4 Units.**

Explores the processes of Latino urbanization in the United States and the spatialization of Latino identities, particularly in the context of Southern California with selected comparisons drawing from other cities.

Same as CHLT 154.

(VII)

**UPPP 177. Chicano Movement. 4 Units.**

Explores the history of Mexicans in the U.S. with particular attention paid to their integration into the U.S. capitalist economy. Examines this economic history and the Chicano movement, 'El Movimiento,' within the wide context of socio-economic change.

Same as CHLT 166.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 178. International Divided Cities. 4 Units.**

Investigates urban divisions in international cities where deep-seated nationalistic ethnic differences create pressures for intergroup conflicts, autonomy, or territorial separation, and can incite violence. Urban political polarization as it is manifest in the urban setting.

Same as PLSC 157B, SOCL 176.

**UPPP 190. Applied Statistics in Social and Behavioral Research. 4 Units.**

Covers statistical techniques used to describe and make generalizations about phenomena represented by data. Hands-on experience in data analysis and interpretation using statistical software (SPSS, STATA) is emphasized. Topics include data visualization, ANOVA, multiple regression, and categorical data analyses.

Prerequisite: SE 13

Same as CLS C190, SE 190, PSCI 190.

Restriction: Psychological Science Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**UPPP 202. History of Urban Planning. 4 Units.**

Introduction to the historical roots and fundamental perspectives of urban and regional planning. Exploration of the significant historical phases and personalities which have shaped the profession. The roles and responsibilities, the limitations and potential, of urban planning.

Restriction: Graduate students only.

**UPPP 203. Theoretical Foundations of Planning. 4 Units.**

Intellectual excursion into central themes in policy and planning, including philosophy of the market, institutionalization of space, hypostatizations of policy, constructions of communities, logics of spatial analysis. Objective is engagement of the professional in thoughtful reflections on practice and institutions.

Restriction: Graduate students only.

**UPPP 204. Plan Development and Communication . 4 Units.**

Graphic representation and communication of physical place characteristics, design and physical planning ideas, and concepts using a variety of graphic techniques of free hand drawing, sketching, orthographic representations, scale drawings, 3D representations, maps, photo-documentation, and various media.

Restriction: Urban and Regional Planning Majors only.

**UPPP 205. Environmental Economics and Policy. 4 Units.**

Provides a broad introduction to environmental economics and to environmental policy. Environmental problems facing the United States and Europe are analyzed, and whenever possible, the environmental problems facing developing countries.

Restriction: Graduate students only.

**UPPP 206. Microeconomic Analysis for Urban Planning. 4 Units.**

Provides students with a working knowledge of basic microeconomic concepts. Emphasizes applications related to urban planning and policy analysis. Topics covered include demand analysis, firm behavior, market structure, public goods, externalities, and the role of economics in land markets.

Restriction: Graduate students only.

**UPPP 207. Land-Use Law. 4 Units.**

Investigates legal and institutional frameworks for development control. Review of constitutional issues implicated in land-use regulation. Traces development control historically and analyzes contemporary approaches to land-use control which reflect environmental and economic development concerns.

Same as CLS C207.

Restriction: Graduate students only.

**UPPP 209. Qualitative Research Methods: Overview. 4 Units.**

Introduction to fundamentals of "qualitative" research and non-positivistic inquiry. Formulation of research questions, selection of method, data collection techniques, and analysis (briefly). Overview of selected methods from ethnography, naturalistic field research, phenomenology, ethnoarchaeology, critical approaches, and others.

Restriction: Graduate students only.

**UPPP 210. Practice Experience . 4 Units.**

Provides Master of Urban and Regional Planning students an opportunity to link classroom knowledge with real planning situations through a 10-week unpaid practice experience.

Restriction: Urban and Regional Planning Majors only.

**UPPP 212. Transportation Planning and Policy. 4 Units.**

Introduces current topics in transportation planning. Includes an analysis of the economic role of transportation in urban areas, land-use impacts of transportation projects, traffic congestion, air quality, alternatives to the automobile, and other transportation topics.

Restriction: Graduate students only.

**UPPP 213. Advanced Qualitative Methods: Analyzing Qualitative Data. 4 Units.**

Introduction to the theory and practice of analyzing qualitative data. Students must have already learned about data collection and research design for qualitative research and must have qualitative data they can analyze.

Same as MPHD 297K, PLSC 273A.

Restriction: Graduate students only.

**UPPP 214. Quantitative Analysis for Planners. 4 Units.**

Introduces students to the basic statistical concepts used to address issues of public concern. Prepares students to perform, interpret, and evaluate quantitative data analyses commonly used in professional studies.

Restriction: Graduate students only.

**UPPP 215. Analytical Methods for Planning. 4 Units.**

Emphasizes the development of analytical techniques proven useful in the fields of management and administration. Topics include multiple regression, cost-benefit analysis and discounting, decision trees, and other techniques useful for the purposes of community analysis and planning.

Restriction: Graduate students only.

**UPPP 220. Qualitative Methods: Fieldwork and Data Collection. 4 Units.**

Covers fieldwork, data collections techniques, and related issues for anti-positivistic research. Data collection techniques include observation, physical traces, participation, in-depth interview. Data checks include veracity, detail, completeness, rigor.

Restriction: Graduate students only.

**UPPP 221. Public Policy. 4 Units.**

Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Same as CLS C255, PLSC 221A.

Restriction: Graduate students only.

**UPPP 224. Environmental Politics and Policy. 4 Units.**

Reviews and critiques literature on discussion topics including: the nature and effectiveness of environmental movements and policies; the role of science and technology; the use of economic incentives in policy; decentralization of decision making; and creating arenas for public involvement.

Restriction: Graduate students only.

**UPPP 228. Demographics for Planning and Policy. 4 Units.**

Provides planning and policy practitioners with a condensed, nonspecialist orientation to the sources, applications, and interpretation of population statistics, and conveys the steps used in constructing local-area population forecasts and projections.

Restriction: Graduate students only.

**UPPP 231. Transportation and Environmental Health. 4 Units.**

Critically evaluates how transportation can promote sustainable, healthy, and equitable cities. Examines the interaction of transportation systems with urban form, land use, community health, and environmental quality.

Restriction: Graduate students only.

**UPPP 235. Geographic Information Systems (GIS) Problem Solving in Planning. 4 Units.**

Explores the application of geographic information systems (GIS) in urban planning. Steps through a GIS-based planning procedure that balances housing, jobs, tax base, utilities, transportation, and the natural environment.

Restriction: Graduate students only.

**UPPP 237. Introduction to Geographic Information Systems. 4 Units.**

Application of Geographic Information Systems (GIS) to the field of urban and regional planning. Emphasizes current issues that occur in actual implementation settings. Lecture/discussion followed by laboratory demonstrating the area of GIS discussed. Offers 'hands-on' student usage of GIS software.

**UPPP 239. Urban Design Theories and Applications. 4 Units.**

Introduction to contemporary and traditional theories of urban design and their applications. Organized around one question: How might planning and design of built environment contribute to making a good city? National and international case studies are introduced.

Restriction: Graduate students only.

**UPPP 243. Health Policy and Management. 4 Units.**

Multidisciplinary inquiry into theory and practice concerned with delivery, quantity, costs of health care for individuals and populations. Explores managerial and policy concerns regarding structure, process, outcomes of health services including the costs, financing, organization, outcomes, and accessibility of care.

Same as PUBH 222.

Restriction: Master of Public Health Degree students have first consideration for enrollment. Master of Public Policy Degree students have first consideration for enrollment. Graduate students only. Public Health Majors have first consideration for enrollment. Urban and Regional Planning Majors have first consideration for enrollment.

**UPPP 244. Land-Use Policy. 4 Units.**

Examination of the role of public policy in guiding growth and development in urban and suburban environments. Description of a wide-ranging set of growth policies, the rationales underlying their use, controversies and legal constraints, and evaluation of their effectiveness.

Restriction: Graduate students only.

**UPPP 246. Housing Policy. 4 Units.**

Examines theories and practices of housing policy and the relationship of housing to larger neighborhood, community, and regional development issues. Considers the roles of private for-profit and not-for-profit developers, lenders, and all levels of government in the provision of housing.

Prerequisite: Familiarity with basic statistics is required.

**UPPP 251. Poverty and Development . 4 Units.**

Examines competing conceptualizations, methods of measurement, and poverty alleviation strategies widely used in developing countries. Focuses on poverty conceptualized as economic deprivation, well-being, vulnerability, and social exclusion.

Same as SOCL 235.

Restriction: Graduate students only.

**UPPP 252. Issues in Environmental Law and Policy. 4 Units.**

Treatment of legal and policy strategies for promoting environmental protection and deterring environmental degradation within the context of other societal objectives. Topical approach with a focus on problems of special interest to criminologists and to environmental policy specialists.

Same as CLS C252.

Restriction: Graduate students only.

**UPPP 266. Economic Democracy . 4 Units.**

Explores a wide range of radical democratic and egalitarian visions (including but not limited to the Marxist tradition) for a more sane, just, and sustainable future.

Restriction: Graduate students only.

**UPPP 273. Global Urbanization. 4 Units.**

Examines the spread of cities worldwide in the 20th century. What are the political and economic causes of this process? What are the social-cultural, political, and economic effects? How is contemporary urbanization linked to global restructuring of other kinds.

Same as SOCL 252A.

Restriction: Graduate students only.

**UPPP 275. Special Topics in Urban Planning. 4 Units.**

Special topics in urban and regional planning are offered from time to time, but not on a regular basis. Course content varies with interest of the instructor.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**UPPP 279. Theories of Power and Empowerment. 4 Units.**

Studies different ways of thinking about power and its uses. Explores theories of power that inform various notions of empowerment, including resistance, participatory democracy, and workplace empowerment.

Same as MPPH 297R, PLSC 223A.

Restriction: Graduate students only.

**UPPP 281. Advanced Theory. 4 Units.**

Provides urban planning and public policy students with an introduction to advanced theory. Addresses broad theoretical approaches that cut across disciplinary and topical boundaries. Designed primarily for Ph.D. students.

**UPPP 282. Urban Design Studio for Planners: An Introduction. 4 Units.**

Introductory urban design for planners. Organized around a variety of assignments to encourage learning by design in a studio setting. Students work on design projects and drawing assignments to learn practical aspects of urban design.

Restriction: Graduate students only.

**UPPP 283. Collaborative Governance and Public Management. 4 Units.**

Introduction to inclusive management. To make effective use of public resources, public managers are inventing ways of managing that alter relationships within organizations, between organizations, between sectors, and with the public. Requires rethinking fundamentals such as leadership and motivation.

Same as PPOL 283.

Restriction: Public Policy Majors have first consideration for enrollment.

**UPPP 292. Professional Report. 4 Units.**

Workshop designed to assist M.U.R.P. students in conducting their professional reports. Students select topics, design projects, conduct professional investigations, and write up reports.

**UPPP 294A. Urban Planning Practicum I. 4 Units.**

Engages students in practical planning projects in the community under a central theme within Planning. Students take a problem-solving approach and employ and further develop data gathering, analysis, graphic and oral communication, public engagement, and report writing skills.

Restriction: Graduate students only.

**UPPP 294B. Urban Planning Practicum II. 4 Units.**

Engages students in practical planning projects in the community under a central theme within Planning. Students take a problem-solving approach and employ and further develop data gathering, analysis, graphic and oral communication, public engagement, and report writing skills.

Prerequisite: PPD 294A

Restriction: Graduate students only.

**UPPP 296. Doctoral Dissertation Research and Writing. 2-12 Units.**

Dissertation research with Urban Planning and Public Policy faculty.

Prerequisite: Advancement to candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**UPPP 297. Research Design. 4 Units.**

Provides training in research design and methods. Students learn how to evaluate the strength of research findings based on the methods used by a researcher and learn to use lessons from the course to develop a research proposal.

Restriction: Graduate students only.

**UPPP 298. Directed Studies in Urban Planning. 2-4 Units.**

Directed studies in Urban Planning.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**UPPP 299. Independent Study in Urban Planning. 2-8 Units.**

Independent Study in Urban Planning.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

## Concurrent Master's Degree Program with Civil and Environmental Engineering

*This concurrent degree program is temporarily suspended and is not currently admitting students. Please check the upcoming 2021-22 Catalogue for additional information.*

The Department of Urban Planning and Public Policy (UPPP) in the School of Social Ecology and the Department of Civil and Environmental Engineering (CEE) in The Henry Samueli School of Engineering offer a concurrent degree program that allows students to earn both a master of Urban and Regional Planning (M.U.R.P.) and a master of Civil Engineering (M.S.) in less than the three years required if the degrees were pursued sequentially. Students in the concurrent degree program must meet a minimum of twice with the UPPP graduate coordinator and/or MURP faculty program director. The first meeting is at the start of the student's concurrent program to review current requirements and devise a plan of study for the MURP. The second meeting is the start of the third quarter of the first year of the concurrent program to assess progress toward the MURP, identify the student's Capstone choice, and review the plan for completion of MURP course work.

### Requirements

The concurrent degree program involves a course plan that fulfills requirements in both programs. The engineering focus of the concurrent degree program requires 48 units and is organized around two tracks: (1) Transportation Systems, and (2) Hydrology and Water Resources Systems. The course load for both CEE and M.U.R.P. is the same for both tracks. For the CEE track, two plans are available: Thesis option and Course Work option. The plan of study for both options must be developed in consultation with a Faculty Advisor and approved by the Program Graduate Advisor. There may be no redundancy of courses between the CEE and M.U.R.P. tracks.

### Plan I: Thesis Option

Thesis option requires the completion of 48 units of study of which a maximum of 10 units can be taken for study in conjunction with the thesis research topic. Upon approval of the Program Graduate Advisor, the maximum of 10 units of thesis research can be extended to 16 units. Thesis research includes the completion of an original research project; the writing of the thesis describing it; and a review by a thesis committee. Of the 48 units, a minimum of 28 units must be in non-research, graduate-level approved engineering or related courses (numbered 200-291) with at least 16 of 28 units from the CEE Department. The remaining units may be earned as graduate-level course work, individual research, or upper-division undergraduate units (maximum 10 units).

### Plan II: Course Work Option

Course Work option requires the completion of 48 units of study, at least 40 of which must be in non-research graduate-level approved engineering or related courses (numbered 200-291) with at least 28 of 40 units from the CEE Department. The remaining eight units may be earned as graduate-level course work, individual research, or upper-division undergraduate units. Undergraduates seeking admission to the concurrent master's degree program should have a strong record of course work in disciplines related to civil and environmental engineering and urban planning, and they must meet the requirements for admission in both departments. For more information about these requirements, visit the CEE Graduate Admissions (<http://>

[engineering.uci.edu/dept/cee/graduate/admission-requirements/](https://engineering.uci.edu/dept/cee/graduate/admission-requirements/)) and MURP Graduate Admissions (<https://uppp.soceco.uci.edu/murp/admissions/>) websites.

## Master of Public Policy

The Master of Public Policy (M.P.P.) program is a two-year professional degree program administered by the School of Social Ecology. The program provides training for highly motivated and talented individuals to become leaders at the local, state, national, and international level in the development and management of policies that lead to a more effective public sector, a more productive private sector, and more vibrant communities.

### Requirements

Students are required to complete 72 units of graduate courses. In the first year, students will attend an introductory conference, participate in a workshop, and take seven core courses and two elective courses. In the summer after the first year, students will participate in a policy-relevant internship in an appropriate government, business, or nonprofit setting. In the second year, students take three core courses and five elective courses.

A part-time option is available for students. Part-time students take two courses per quarter over the span of three years. These students have the choice of completing the required summer internship in the summer after year one, or the summer after year two. The required capstone project takes place during the winter and spring quarters of year three.

### Course Requirements

#### Year One

##### A. Complete:

PUB POL 215	Statistics and Methods for Public Policy
PUB POL 219	Information and Public Policy
PUB POL 221	Public Policy
PUB POL 225	Qualitative Methods
PUB POL 240	Microeconomics and Public Policy
PUB POL 283	Collaborative Governance and Public Management
SOCIOL 249	Special Topics: Political Sociology and Social Movements

##### B. Select two electives

#### Year Two

##### C. Complete:

PUB POL 227	Economics of Government
PUB POL 260	Policy and Ethics

Two quarters of Capstone research and briefing

##### D. Select five electives

Additional information is available at the Master of Public Policy website (<http://mpp.web.uci.edu/>).

## Master of Urban and Regional Planning

The Master of Urban and Regional Planning (M.U.R.P.) provides students with a rigorous intellectual foundation and critical analytical skills that prepare them to work in public, private, and non-governmental planning and related fields. The program is fully accredited by the national Planning Accreditation Board and has more than a dozen full-time core faculty. Students gain knowledge of planning problems and practices through a series of courses related to the environmental, economic, and social challenges in Southern California, and the United States, as well as other national contexts.

### Requirements

A total of 72 graduate units are necessary to satisfy the master's degree requirements—including 32 units of core courses and successful completion of a capstone project, thesis, or comprehensive examination. A normal course load is 12 units per quarter (three courses), which enables students to complete the degree in two years.

### Course Requirements

#### A. Complete:

UPPP 202	History of Urban Planning
UPPP 203	Theoretical Foundations of Planning
UPPP 204	Plan Development and Communication
UPPP 206	Microeconomic Analysis for Urban Planning
UPPP 214	Quantitative Analysis for Planners

B. Select three additional core courses from a menu of courses in the subject areas of methods, law, and urban settlements.

C. Select eight elective courses. Possible elective course topics include; housing and community development, international development planning, environmental planning, transportation planning, health and social service planning, economic development, regional growth management, state and municipal governance, and urban design. Students work with faculty members to define their concentration and identify appropriate electives. Elective courses are selected from within as well as outside the Department of Urban Planning and Public Policy.

The curriculum culminates with a capstone requirement that may be fulfilled through one of the following options:

1. Completion of a Professional Report (PR), which provides students an opportunity to prepare an independent planning project for a planning organization. This entails a two-quarter course sequence: UPPP 292, and four units of UPPP 299 with a PR faculty advisor;
2. Completion of a Planning Practicum, which is a team-based course taught by a planning practitioner and conducted in conjunction with planning organizations. This entails a two-quarter course sequence: UPPP 294A and UPPP 294B;
3. Completion of a master's thesis, which is an independent academic research project. Students must apply in writing for the thesis option. If approved by the MURP faculty program director, thesis students must complete a two-quarter sequence of four units of UPPP 299 with a thesis faculty advisor.
4. A comprehensive examination.

The program supports a diverse set of educational opportunities for master's students including events and workshops sponsored by the department, student organizations, and the MURP Alumni Council. In addition, several students each year incorporate an international educational experience as part of their degree either through the University of California's Education Abroad Program (UCEAP) or the Network for European and U.S. Regional Urban Studies program (NEURUS). Practical experience in planning in the form of part-time planning internships is also strongly encouraged.

The range of employment opportunities for planners in the public, private, and non-governmental sectors is expanding due to rapid urbanization, rising concerns over environmental issues, and increases in social inequality. Career paths exist in public entities dealing with urban planning, economic development, transportation, community development, regional growth management, air quality, water treatment, community health, community revitalization, and public infrastructure. Employment possibilities also exist with private firms that specialize in transportation, general plans, economic development, environmental planning, emergency management, and residential, commercial, and industrial development. Finally, planners are increasingly pursuing meaningful careers in the growing non-governmental sector. These career opportunities include working with affordable housing developers, environmental and conservation organizations, community-based organizations, advocacy groups, and labor unions.

### **Concurrent Master's Degree Program with Law and Graduate Studies**

Highly-qualified students interested in combining the study of law with graduate qualifications in Urban and Regional Planning are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS).

Students in this program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Master's degree in Urban and Regional Planning. Contact the PLGS Director's office for additional information at 949-824-4158, or by email to [plgs@law.uci.edu](mailto:plgs@law.uci.edu). A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Program website (<http://www.law.uci.edu/academics/interdisciplinary-studies/concurrent-degrees.html>) and in the Law School section of the *Catalogue*.

## **Urban and Environmental Planning and Policy, Ph.D.**

Today's complex urban, social, and environmental issues can best be understood by researchers who can work across disciplinary boundaries, and who understand the relationship of research to action. For example, efforts to control transportation problems by building neighborhoods that encourage alternatives to the automobile require an understanding of travel behavior and human interactions with the built environment. Understanding how to reduce tobacco use requires an appreciation of how behavior is shaped by programmatic interventions, community settings and norms, and policy tools. Environmental cooperation across national borders often requires understanding of political processes, infrastructure systems, and metropolitan structure and governance in regions, such as the U.S.-Mexico border, where population is concentrated in urban settlements that span the border. And, issues of public safety are increasingly related to the design of public and private spaces, and how those spaces are used and regulated.

In all of these areas, public and private officials are increasingly working on topics that span the boundaries of several traditional academic disciplines. The Urban and Environmental Planning and Policy (UEPP) doctoral program at the University of California, Irvine trains scholars for national and international prominence in the analysis of social problems related to the built, natural, and institutional environments. Faculty members and students combine perspectives from urban planning, public policy, and design behavior. The Urban and Environmental Planning and Policy Ph.D. is based on the Department's internationally prominent research and teaching strengths, including design-behavior research, environmental policy, health promotion and policy, and urban and community development. Students in the Ph.D. program take a common core of classes, and then specialize in study related to their research interests. Students may design their own specialization or may follow the guidelines provided to specialize in Policy and/or Urban and Regional Planning. In either case, the elective courses must be approved by the student's faculty advisory committee.

### **Program Details**

The Ph.D. program consists of four components: course work, comprehensive exams, advancing to candidacy, and dissertation research, writing, and defense. Each component is described below. A typical pattern for completion of requirements is the following:

*Years 1 and 2:* Take required departmental courses supplemented by electives.

*September after year 2:* Take comprehensive exams.

*Year 3:* Finish required course work, write and defend dissertation prospectus, advance to candidacy.

*Years 4–6:* Dissertation research and writing (students are expected to complete and defend their dissertations within nine quarters of advancing to candidacy).

Students must also TA for at least one quarter. The normative time for completion of the Ph.D. in Urban and Environmental Planning and Policy is six years, and the maximum time permitted in seven years.

## Requirements

The following courses are required of all students and must be completed before advancement to candidacy:

A. Complete the following:

UPPP 297	Research Design
SOCECOL 200	Seminar in Social Ecology
UPPP 209	Qualitative Research Methods: Overview
SOCECOL 264A	Data Analysis (or equivalent)

B. Complete one advanced research methods course

C. Two courses providing disciplinary/theoretical orientation

D. Two quarters of UPPP 298 or UPPP 299

E. Nine electives

Graduates with a doctorate degree in Urban and Environmental Planning and Policy are employed in a wide array of activities, ranging from university teaching and research, to administrative and research—oriented positions in governmental agencies, international organizations, nonprofit organizations, and private consulting practices.

## Urban and Regional Planning, Minor

The Urban and Regional Planning minor focuses on urban planning issues and offers opportunities to students to learn about the planning and development problems in our cities that we already face and those that we are likely to face in the next few decades. Students explore a number of ways to make our cities more equitable, inclusive, sustainable, and livable. Courses in the department provide important insights into the social, political, economic, historical, and cultural forces shaping urban areas. In addition, these courses offer students an excellent opportunity to prepare for graduate programs in related fields, including architecture, landscape architecture, urban and regional planning, public policy, law, business, public administration, public health, and social services.

The minor in Urban and Regional Planning requires two courses (UPPP 4: Introduction to Urban Studies; UPPP 107: Urban and Regional Planning) and seven upper-division UPPP courses.

Why should you consider minor in Urban Studies or in Urban and Regional Planning? You can learn more about the design and development of urban areas including the planning and design of sustainable neighborhoods, urban environmental problems, inequities in access to urban amenities, housing affordability crisis and transportation, climate change. Students could draw their own conclusions on how to address different types of urban problems from a variety of themes and perspectives including those that involve class, gender, and race.

Nine courses (36 units):

A. Complete:

UPPP 4	Introduction to Urban Studies
or UPPP 5	Introduction to Urban Planning and Policy
UPPP 107	Urban and Regional Planning

B. Select six of the following:

UPPP 102	Urban Inequality
UPPP 108	Cities and Transportation
UPPP 109	Housing and Urban Development Policy
UPPP 120	Introduction to GIS for Planning and Policy
UPPP 133	Environmental Law and Policy
UPPP 139	Water Resource Policy
UPPP 155	Urban Design Principles
UPPP 166	Urban Politics and Policy

## Urban Studies, B.A.

Undergraduate students who major in Urban Studies will become acquainted with the global challenges of urbanization and the analytical skills needed for addressing them. Students will acquire the background for entering graduate study in related fields, including urban planning, community and economic development, and transportation, to name only a few, or for seeking entry-level positions in fields that address urban problems, including urban planning, community development, transportation, and housing.

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Departmental Requirements

Twelve courses (48 units) as specified below:

A. Three lower-division courses:

UPPP 4	Introduction to Urban Studies
UPPP 5	Introduction to Urban Planning and Policy
UPPP 40	Urban Sociology

B. Three of the following core upper-division courses:

UPPP 101	History of Cities
UPPP 107	Urban and Regional Planning
UPPP 113	Poverty and Change in Developing Countries
UPPP 131	Environmental Sustainability I
UPPP 146	Principles of Economics for Planning and Policy
UPPP 155	Urban Design Principles
UPPP 166	Urban Politics and Policy

C. Six additional upper-division electives from UPPP 100-177 or ECON 144A-ECON 144B.

### Optional Geographic Information Systems (GIS) Specialization

A. Complete:

UPPP 120	Introduction to GIS for Planning and Policy
UPPP 100	Special Topics in Urban Studies (GIS Capstone)

<sup>1</sup> Integrative course.

## Urban Studies, Minor

The Urban Studies minor focuses on urban issues and offers opportunities to students to learn about a variety of urban problems from a variety of perspectives including those that involve class, gender, and race. Students explore different approaches to make our cities more equitable, inclusive, sustainable, and livable. Courses in the department provide important insights into the social, political, economic, historical, and cultural forces shaping our cities. In addition, these courses offer students an excellent opportunity to prepare for graduate programs in related fields, including urban and regional planning, public policy, law, business, public administration, geography, sociology, public health, and social services.

The minor in Urban Studies consists of one required course (UPPP 4: Introduction to Urban Studies) and seven upper-division UPPP courses.

Why should you consider minor in Urban Studies? You can learn more about the urban issues and environmental problems, inequities in access to urban amenities, housing affordability crisis and transportation, climate change.

Eight courses (32 units):

UPPP 4	Introduction to Urban Studies
--------	-------------------------------

Select any seven upper-division UPPP courses.

## Social Ecology, B.A.

The major in Social Ecology embraces the unique and interdisciplinary spirit of the School of Social Ecology. Students take courses from all three of the school's departments: Criminology, Law & Society, Psychological Science, and Urban Planning and Public Policy. Students graduate with a well-rounded understanding of how these disciplines intersect and inform an understanding of social, psychological, environmental, and legal problems. Students also learn how research can address these problems with the intent of finding solutions.

**Learning objectives** for this major include:

1. Develop an understanding, both theoretical and empirical, of social, psychological, environmental, and legal problems and the settings in which they occur, ranging from the interpersonal to the societal/global.
2. Develop the ability to examine these problems through the application of social scientific and naturalistic research methods.
3. Develop an awareness of the challenges inherent in translating research findings to inform policies and practices to mitigate these problems.
4. Develop skills and knowledge in preparation for the needs of today's workplace.

## Requirements for the B.A. in Social Ecology

**All students must meet the University Requirements.**

**All students must meet the School Requirements.**

### Requirements for the Major

Ten 4-unit upper-division courses (40 units) as specified below:

A. Three courses (12 units)—one course (numbered 100–193) selected from each of the three departments—Criminology, Law and Society; Urban Planning and Public Policy; and Psychological Science

B. Seven additional courses (28 units - numbered 100-193) selected from Social Ecology or the departments of Criminology, Law and Society; Urban Planning and Public Policy; and Psychological Science. Course prerequisites established by the individual departments must be satisfied.

Students may petition to have two SOCECOL 199 courses (total of 8 units) count toward upper-division major credit, provided that the courses (1) were taken for a letter grade; (2) required a written term paper or research presentation at an academic conference; and (3) were taught by a Social Ecology faculty member whose name appears on a list maintained in the Social Ecology Student Services Office. Students may also petition graduate courses (numbered 200–209) to fulfill upper-division major requirements. A maximum of one PSCI 196 course may be counted toward the major. A maximum of one CRM/LAW C196 course may be counted toward the major.

## Social Ecology, Minor

The minor in Social Ecology embraces the unique and interdisciplinary spirit of the School of Social Ecology. Students take courses from all three of the school's departments: Criminology, Law & Society, Psychological Science, and Urban Planning and Public Policy. Students graduate with a well-rounded understanding of how these disciplines intersect and inform an understanding of social, psychological, environmental, and legal problems. Students also learn how research can address these problems with the intent of finding solutions.

**Learning objectives** for this minor include:

1. Develop an understanding, both theoretical and empirical, of social, psychological, environmental, and legal problems and the settings in which they occur, ranging from the interpersonal to the societal/global.
2. Develop the ability to examine these problems through the application of social scientific and naturalistic research methods.
3. Develop an awareness of the challenges inherent in translating research findings to inform policies and practices to mitigate these problems.
4. Develop skills and knowledge in preparation for the needs of today's workplace.

### A. Three lower-division courses (12 units)

CRM/LAW C7	Introduction to Criminology, Law and Society
------------	--

SOCECOL E8

or

UPPP 4

Introduction to Urban Studies

Select one of the following courses:

PSCI 9

Introduction to Psychology

PSCI 11B

Psychology Fundamentals

PSCI 11C

Psychology Fundamentals

### B. Six upper-division courses (24 units):

Three courses (12 units). One upper-division course (numbered 100-196) selected from each of the three departments-Criminology, Law and Society; Urban Planning and Public Policy; and Psychological Science.

Three additional courses (12 units). Selected from Social Ecology or the departments of Criminology, Law, and Society; Urban Planning and Public Policy; and Psychological Science. Course prerequisites established by the individual departments must be satisfied.

NOTE: Students pursuing a major in the School of Social Ecology may not use upper-division coursework for both school major or minor requirements. No overlap is permitted. SOCECOL 198 and SOCECOL 199 may not be applied toward the minor.

## Social Ecology, Ph.D.

For more detailed catalogue information regarding doctoral programs in the School of Social Ecology, please select the appropriate department for which the program is offered.

The training program that leads to the Ph.D. in Social Ecology allows students to develop a tailored course of graduate study that draws upon the knowledge of several traditional academic disciplines. The emphases of this training program are in keeping with the academic mission of the School, namely, its emphases on an interdisciplinary approach to theory and research, and the application of research to policy and intervention. Students are encouraged to integrate the diverse theoretical and methodological insights of several disciplines to analyze important social and environmental problems from a perspective of breadth as well as depth.

### Course Requirements

The following **five core courses** are required:

A. Complete:

SOCECOL 200	Seminar in Social Ecology
SOCECOL 264A	Data Analysis
SOCECOL 264B	Data Analysis

B. Select one of the following:

CRM/LAW C201	Research Methods
UPPP 297	Research Design
PSCI P201	Research Methods in Psychology

B. Complete one additional approved graduate research methods or statistics course.

C. In addition, students must take a minimum of six elective courses, chosen in consultation with their faculty advisor.

### Second Year Research Project Requirement

Students are strongly encouraged to become involved in research very early in their graduate careers by participating in the research projects of the faculty. Students complete a supervised research project before they begin work on their doctoral dissertation. Research is broadly construed to include experimental methods, questionnaire and interview studies, systematic field observation, secondary analyses, legal analyses, etc. Students should begin work on this **second year research project** during their first year and should complete the project during the second year in residence (preferably by the end of the winter quarter of the second year). The research project must be evaluated and approved by a committee of three Social Ecology faculty members. Normally, one faculty member will serve as the chair of the committee and the major advisor for the research, but students should consult with all three members of the committee about their research plans. [Note: Students who wish to submit the written report of their research as a thesis in partial fulfillment of the requirements for the M.A. must have the membership of their thesis committee approved by the Associate Dean of the School acting on behalf of the Dean of the School and must be advanced to M.A. candidacy the previous quarter. Please see information on M.A. in Social Ecology]. Please contact the Assistant Director of Graduate Affairs if you have any questions.

A written report of the research must be prepared for evaluation by the members of the committee. The report typically will be comparable in scope and format to articles that appear in leading journals in the social and behavioral sciences. Approval of the student's research project must be certified by obtaining the signature of each committee member on a form that is available by contacting the Assistant Director of Graduate Affairs.

### Breadth Requirement

Students complete the **Breadth Requirement** during their **third** year of study, through which they demonstrate mastery of theory, research, policy, and practice on two social or environmental problems relevant to Social Ecology, or two papers on a single problem provided the two papers are clearly distinct (e.g., a review of research literature on the problem and a separate empirical analysis bearing on the problem). Writing one paper for each of the two problems selected, or the two papers on a single problem, meaning a total of two papers written, satisfies the Breadth Requirement. The papers should be different from the second-year research project and demonstrate an interdisciplinary understanding of relevant research bearing on these two problems and show how that research can inform policies, programs, or practices designed to solve or mitigate these problems. Each student's plans for completing the Breadth Requirement are developed in consultation with a committee of three Social Ecology faculty members and the Faculty Graduate Advisor. Students are encouraged to assemble and meet with this committee as early as possible during their graduate career, and are required to do so by no later than the third quarter of their second year of study. Please contact the Assistant Director of Graduate Affairs for details.

Once the student's plans have been approved and implemented, the committee will review the student's work to evaluate whether the Breadth Requirement has been fulfilled and to recommend additional work if it is deemed necessary. The Breadth Requirement must be completed before the student can advance to candidacy for the Ph.D.

### Advancement/Prospectus Requirement

The fourth year of study is devoted to developing and defending a dissertation proposal and conducting dissertation research. The normative time for advancement to candidacy is four years. Students complete the dissertation in their fourth or fifth year. See additional information under Advancement

and Dissertation. Please take special note of the School of Social Ecology deadline that requires students to advance to candidacy for the Ph.D. by the end of their fifth year of study.

## **Dissertation**

The final years of doctoral study are devoted to developing and defending a dissertation proposal and conducting dissertation research. Students should strive to complete all requirements for the Ph.D. in Social Ecology by their fifth year of study, but those requirements must be completed no later than their seventh year of study, adjusted for any approved leaves of absence that the student may have taken. Failure to complete all degree requirements by the end of the seventh year may result in initiation of steps to terminate the student's status as a doctoral student.

## Bill Maurer, Dean

Social & Behavioral Sciences Gateway

Undergraduate Student Affairs: 949-824-6803

Graduate Student Affairs: 949-824-4074

<http://www.socsci.uci.edu>

Boundaryless. Google the term – coined by former GE CEO Jack Welch – and you'll learn that it's most often applied in business to explain an organization that throws caution to the wind, scrapping boundaries, and bureaucracies in order to tap the internal power of its people to directly enact change.

For more than 50 years, the School of Social Sciences has been putting this approach into practice, breaking down traditional barriers to create change in society, economies, and human well-being. But never has this boundaryless-mindset been more important than today.

The 21st century has brought on profound and previously unthinkable social change. We live longer and face new social, economic, and health challenges brought on by an aging population. Political, ethical, and environmental challenges are marked by ever-increasing uncertainty and, paradoxically, the easy availability of more and more data about us.

These challenges know no boundaries – they stop at no border and they aren't limited to one discipline.

That's why social scientists at the University of California, Irvine are facing them head on, together.

Our students, who comprise nearly 20 percent of the entire UCI student body, are in the conflict zones of the Middle East and teaching global awareness in Orange County high schools. They are in our groundbreaking behavioral economics labs, testing new methods to reduce traffic congestion, create better online marketplaces, and prevent the spread of disease. They are in our brain, behavior, and cognitive robotics labs – mapping the structure of the human brain to understand how speech works in order to help restore it in victims of stroke, and building interactive robots aimed at improving social engagement in children with ADHD and autism. Our students are doing fieldwork in India, Africa, China – indeed, everywhere on the planet, exploring fundamental issues of peace, politics, population, migration, and cross-cultural communication.

Our faculty are breaking with convention to forge connections with computer science, engineering, the arts and the humanities. Interdisciplinary work with law, medicine, and environmental science helps our researchers educate policy makers on the social, cultural, and psychological factors impacting regulation and policy adoption, health and human behavior.

Our maverick spirit and openness to new approaches and unexpected collaborations has kept us nimble and at the cutting-edge in a number of fields as different as transportation economics, cultural anthropology, the philosophy of physics and biology, and the sociology of mass movements.

Our world-class professors in our seven top-ranking departments are experts in their fields, consistently sought by national media to provide perspective on innovative discoveries and pressing social problems. Our faculty are teaching courses within the most popular majors on campus and leading more students to successful graduation than any other academic unit at UCI.

Our alumni – numbering more than 50,000 strong – are taking their world-class education from our Irvine classrooms to the halls of justice in D.C. and international relations work in capitals around the world, to entrepreneurial endeavors from Northgate to Northern Africa, to courtrooms across the nation, boardrooms in some of the world's top companies, and classrooms around the globe where they're training our next generation of leaders.

And we're just getting started.

Learn more within these pages about our degree programs, research centers, student programs, and opportunities. Involvement in any one of our endeavors helps us in our continuing effort to push the limits in traditional social sciences work because we believe that solutions to some of society's greatest challenges lie in our ability to break the mold, to be boundaryless.

Join us in our pursuit. –*Dean Maurer*

## Special Facilities

The school maintains several special facilities for research and education.

The **Social Sciences Research Laboratory**, used for both faculty and student research, occupies the entire fourth floor of the Social Sciences Laboratory Building. The facility contains 40 experiment and control rooms and several specialized facilities including a virtual reality facility and cognition laboratory.

Three **Computer Laboratories** provide access to networked systems, where students can work on assignments using full-featured word-processing, database, graphics, and statistical packages. In addition, these computers provide students with access to e-mail and Internet services. The Social Science Plaza facility contains state-of-the-art, high-tech lecture halls and is fully Internet accessible.

The **Social Sciences Academic Resource Center (SSARC)** was created over a decade ago to help School of Social Sciences students obtain the appropriate information to select a career and/or graduate school program, generate professional contacts, and learn how to gain a competitive edge during their undergraduate years. Centered around the five educational pillars (academics, research, practical experience, leadership, and community service), the SSARC offers valuable services, programming, and resources ranging from resume consultation, internship opportunities, and graduate school guidance, to research and leadership training. Through one-on-one consultations and various co-curricular programs, staff assist students with developing an educational blueprint that will ensure a quality educational experience while developing a strong educational portfolio and transforming each student into successful leaders within their chosen careers. Visit the Social Sciences Academic Resource Center website (<http://www.ssarc.socsci.uci.edu/>) for more information.

**Social Sciences Undergraduate Student Affairs (SSUSA)** provides general and detailed information about UCI, the School of Social Sciences, and specific requirements exclusive to the majors and minors in the school to students, faculty, administrators, and the general public. SSUSA is fully staffed with academic advisors who speak one-on-one with students regarding their UCI academic career as well as opportunities beyond the classroom. There are also eight peer academic advisors available to undergraduates for walk-in advising regarding requirements and classes. Visit the Social Sciences Undergraduate Student Affairs website ([http://www.undergrad.socsci.uci.edu/ugs\\_usa/](http://www.undergrad.socsci.uci.edu/ugs_usa/)) for more information.

The **Experimental Social Science Laboratory**, launched in fall 2011, is dedicated to experimental studies on individual and interactive decision making in the social sciences. The facility is available to researchers in all social science disciplines and can accommodate up to 40 research subjects at a time for computer-based studies of human behavior. Researchers interested in using the facility, and students interested in participating in paid studies, should visit Experimental Social Science Laboratory website (<http://www.essl.socsci.uci.edu/>) or email [essl@ss.uci.edu](mailto:essl@ss.uci.edu).

The **School of Social Sciences Anechoic Research Facility** opened in fall 2011 as a shared school resource for use by all faculty who have an interest in auditory research. The facility includes a large (12.5' x 12.5' x 7' interior) acoustically isolated RF-shielded chamber for free-field research and a second smaller RF-shielded steel booth for research using headphones. The facility has access to state-of-the-art equipment including a harmonizer, function generators, oscilloscopes, mixers/equalizers, amplifiers, ABR setup (auditory brainstem recording), and research-quality vocal microphones and headphones. To learn more about the facility, or to request time for use, visit the School of Social Sciences Anechoic Research Facility website (<http://faculty.sites.uci.edu/anechoic/>).

Part of the campuswide strategic initiative to assume leadership in brain imaging and analysis, the Facility for Imaging & Brain Research (FIBRE) (<http://imaging.uci.edu/fibre/>) joins the Neuroscience Imaging Center and Preclinical and Translational Imaging Facility under the auspices of the Campus Center for Neuroimaging to make UCI the place where tomorrow's technologies for studying the human brain take flight. Housed in the Social and Behavioral Sciences Gateway, FIBRE is the newest imaging facility on campus and provides researchers access to the latest technology in structural MRI, fMRI, MRS and diffusion imaging. The facility is a collaborative endeavor of the School of Biological Sciences, School of Social Sciences, School of Medicine, School of Education, School of Engineering, School of Social Ecology, Health Affairs, and Office of Research.

## Centers for Research

The UC Irvine branch of the **California Census Research Data Center** is a partnership between the School of Social Sciences and the U.S. Census Bureau. The on-campus site allows UCI researchers access to confidential Census data that is central to high quality research in economics, sociology, health services, public health, transportation, law, and business. With these data, researchers can link information about the policy environment at a detailed geographic level with micro level data on public health, transportation, labor, crime, education and other highly relevant public policy-oriented outcomes. The result? Studies that address pressing policy needs – like how crime impacts local businesses, or how educational attainment effects labor earnings at local and national levels. Data accessible through the center includes U.S. Census records as well as datasets from the National Center for Health Statistics and Agency for Healthcare Research and Quality and others. Learn more at Census Research Data Center website (<http://www.ccrdc.uci.edu/>).

The **Center for Administrative Data Analysis (CADA)** partners with organizations to help better utilize data to answer core questions and advance scientific understanding. The center believes that substantial progress on important issues can be made by making better-informed decisions. Center data infrastructure and faculty expertise enable analyses that address questions that are vital to society. Research affiliates believe that important societal questions deserve answers, and they seek to help schools, clinics, and others serving the public good get the evidence they need to do so more effectively. Learn more at the CADA website (<https://www.cada.socsci.uci.edu/>).

The **Center for the Advancement of Logic, its Philosophy, History and Applications (C-ALPHA)** provides a formal structure that strengthens extant cross-disciplinary connections while fostering new ones. Modern logic is the science of valid inference. Not being restricted to any particular subject matter, it applies to all human endeavors that aspire to an understanding of rationality, the discovery of proofs, the assessment of evidence,

or the establishing of truths - including the physical sciences, the formal sciences like mathematics and legal theory, as well as the social sciences, whether they follow quantitative or qualitative research paradigms. Learn more at the Center for the Advancement of Logic, its Philosophy, History and Applications website (<http://www.calpha.socsci.uci.edu/>).

The **Center for Asian Studies** at the University of California, Irvine is comprised of more than 40 interdisciplinary faculty members who study China, Japan, Korea, India, and Southeast Asia and enhance the study of the many countries and cultures of Asia. Housed in the School of Social Sciences, the Center provides a forum for discussions across geographic and disciplinary boundaries both on campus and within the community. Learn more at the Center of Asian Studies website (<http://www.asianstudies.uci.edu/>).

The **Center for Citizen Peacebuilding** at UCI is a distinctive international clearinghouse for research, education, and action on public peace processes. The program focuses on how citizens participate in these activities to prevent violent conflict and, if violence occurs, to promote reconciliation, and sustainable peace. The purpose is to significantly contribute to the theory and practice of conflict resolution. Learn more at the Center for Citizen Peacebuilding website (<http://www.peacebuilding.uci.edu/>).

The **Center for Cognitive Neuroscience and Engineering (CENCE)** is a multidisciplinary research center aimed at understanding the relation between cognitive abilities and neural systems through brain imaging, brain mapping, computational modeling, informatics, and engineering techniques. The center's research focus in cognitive neuroscience and engineering spans a wide range of methods involving human and animal work, and engineering techniques, such as BCI, BMI, biorobotics, computational neuroscience, neuroinformatics, neuromorphic engineering, neurorobotics, signal processing, image analysis, and mathematical models of brain data. Learn more at Center for Cognitive Neuroscience and Engineering website (<http://www.cence.socsci.uci.edu/>).

The **Center for Decision Analysis**, located in the **Institute for Mathematical Behavioral Sciences (IMBS)** in the School of Social Sciences, is a specialized research center where the objective is to facilitate interaction and common research goals among scientists whose purpose is to formulate precisely and test theories of human behavior. This is to be interpreted in a wide sense as manifested by the membership which spans the following areas: anthropology, cognitive science, economics, engineering, logic and philosophy of science, mathematics, political science, and sociology. Additional faculty come from management science and psychobiology. To describe the focus, consider the fruitful symbiotic relationship that has existed for millennia between mathematics and the physical sciences. A goal of IMBS is to generate a similar relationship between mathematics and the behavioral and social sciences. With high-power social scientists (several are members of the National Academy) providing insights about the field and working with the mathematicians who are involved, new mathematical approaches to analyze these issues are being developed and new kinds of mathematical questions are being raised. For more information, visit the Institute for Mathematical Behavioral Sciences website (<http://www.imbs.uci.edu/>).

The **Center for Demographic and Social Analysis (C-DASA)** advances population science by bridging academic units to identify common research interests and exchange new conceptual approaches and analytic methods. Serving 50 UCI faculty members in a dozen departments, as well as their graduate and postgraduate trainees, the Center is committed to research on the critical issues shaping the well-being of local, national, and global populations. Faculty affiliates are recognized for award-winning research, ranging from China's one-child policy to global influenza epidemics, from programs to raise school achievement to social networks that link local neighborhoods. C-DASA promotes innovative research by fostering multidisciplinary exchange, supporting collaboration, and building the advanced infrastructure essential for demographic research and training in the 21st century. For additional information, including upcoming seminars, visit the Center for Demographic and Social Analysis website (<http://www.cdasa.socsci.uci.edu/>).

Established in 2016 with generous funding from the Laura and John Arnold Foundation, as well as the UCI School of Social Sciences and community members, UCI's **Economic Self-Sufficiency Policy Research Institute (ESSPRI)** spearheads original and cutting edge research on the effectiveness of policies and programs designed to support economic self-sufficiency. Learn more at the ESSPRI website (<http://esspri.uci.edu/>).

Established in 2006, the **Center for Ethnography** works to develop a series of sustained theoretical and methodological conversations about ethnographic research practices across the disciplines. It supports innovative collaborative ethnographic research as well as research on the theoretical and methodological refashioning of ethnography for contemporary cultural, social, and technological transformations. Learn more at the Center for Ethnography website (<http://www.ethnography.uci.edu/>).

The **Center for Global Peace and Conflict Studies (CGPACS)** is a multidisciplinary research unit housed in the School of Social Sciences. The mission of CGPACS is to promote research on international problems and processes. Current research emphases include weapons of mass destruction, especially biological weapons; international governance, focusing on the evolution of international norms and institutions; citizen peace building; international environmental cooperation; and religion in international affairs. CGPACS also sponsors research conferences and public colloquia on topics of current significance. The Center's Margolis Lecture brings to UCI high-profile speakers who have played active roles in international affairs. Recent Margolis Lectures have featured Justice Louise Arbour, former chief prosecutor for the International Criminal Tribunals; Chinese democracy activist Wei Jinsheng; Congressman Christopher Cox; former Secretary of State Warren Christopher; and former Secretary of Defense William Perry. Visit the Center for Global Peace and Conflict Studies website (<http://www.cgpac.uci.edu/>) for more information.

The **Center for Language Science** is a multidisciplinary, interactive research community aimed at understanding how language is organized in the human mind, how this system of knowledge is learned, how is it understood and expressed, and how it is represented and processed by the brain. This effort spans a wide range of scientific research areas, from basic and clinical hearing research to computational and psychological models of the structure and processing of linguistic knowledge to detailed neuroanatomical models hearing, comprehending, and speaking derived from advanced neuroimaging and clinical-based methods. Accordingly, Center faculty are drawn from several departments and schools at UCI including Cognitive

Sciences, Psychological Science, Anthropology, Computer Science, Logic and Philosophy of Science, Mathematics, Education, Humanities, Biological Sciences, and Medicine. The Center for Language Science has three specific aims: (1) to promote an integrated, multidisciplinary research program on language from the unique and diverse perspective afforded by UCI's faculty; (2) to promote and guide training in the field of language science; and (3) to inform and guide the development of new clinical applications for hearing, speech, and language disorders that impact millions of people worldwide. Learn more at the Center for Language Science website (<http://www.languagescience.socsci.uci.edu/>).

The purpose of the **UCI Center for Research on Immigration, Population, and Public Policy** is to foster and conduct basic and policy-relevant research on international migration and other population processes, with a main focus on U.S. immigration. In order to encourage multi-investigator, multidisciplinary, and interdisciplinary research projects, the Center organizes informal discussions of ideas for future research projects, "brainstorming" sessions about research funding opportunities, "brown-bag" presentations of research findings, and workshops and conferences. Much of the Center's research focuses on the multigenerational incorporation experiences of immigrant groups in the United States, especially those occurring in diverse contexts such as Southern California. Investigations of this type often devote as much attention to what happens to the children and grandchildren of immigrants as to what happens to immigrants themselves. For more information, visit the UCI Center for Research on Immigration, Population, and Public Policy website (<http://www.immigrationresearch.uci.edu/>).

The **Jack W. Peltason Center for the Study of Democracy (CSD)** continues the work of the UCI Focused Research Program on Democratization that was founded in 1991 and sponsors research and training on the process of democratic transition and the expansion of the democratic process in already established democracies. CSD includes a multidisciplinary faculty from four UC campuses. CSD's activities are focused on three areas. First, faculty administer a graduate training program on empirical democratic theory. The National Science Foundation selected UCI in 1995 as a national center for the training of doctoral students in democratization issues; the five-year NSF grant provides funding for graduate fellowships and other training activities. Second, the democracy research program aims at improving the democratic process in the United States and other established democracies as we enter the next century. The program focuses on reforms to increase the ability of citizens to express their preferences and have these preferences represented within the democratic process. Third, CSD supports research on the development of sustainable democracies in Eastern Europe, East Asia, and other new democracies. The New Democracies Initiative contributes to the promotion of democracy in these formerly authoritarian systems. For more information visit the Center for the Study of Democracy website (<http://www.democracy.uci.edu/>).

The **Institute for International, Global and Regional Studies (IGARS)** was created to be a hub for research and teaching at UCI on the interactions of politics, economics, societies, cultures, and history in global and international affairs. It provides a calendar of events, hosts the bi-weekly International Studies Public Forum and monthly research seminars, collaborates with over 17 other campus centers, and promotes seed funding for collaborative research activities on international and global issues. Faculty associated with IGARS participate in the international studies undergraduate major and honors program and the minor in conflict resolution. Learn more at the Institute for International, Global and Regional Studies website (<http://www.internationalstudies.socsci.uci.edu/>).

The **Institute for Money, Technology and Financial Inclusion (IMTFI)** was formed in 2008. Its mission is to support research on money and technology among the world's poorest people: those who live on less than \$1 per day. IMTFI seeks to create a community of practice and inquiry into the everyday uses and meanings of money, as well as the technological infrastructures being developed as carriers of mainstream and alternative currencies worldwide. Learn more at the Institute for Money, Technology and Financial Inclusion website (<http://www.imtfi.uci.edu/>).

The **UCI Interdisciplinary Center for the Scientific Study of Ethics and Morality** was established in 2003 by a group of scholars interested in recent scientific research that yields insight on the origins and causes of morality. In creating the center, UCI faculty both address a topic that is becoming one of the new frontiers in science and reflect critically on the moral implications of this new frontier. The center focuses on the etiology of ethical behavior and differs in several important ways from existing centers dedicated to the discussion of ethics. Traditional academic approaches tend to originate in philosophical, foundational, or religious discussions of ethics. They tend to be humanistic in orientation and emphasize abstract, theoretical considerations of what constitutes ethics and morality. The center complements this traditional approach and explores the scientific and/or the empirically verifiable factors that influence morality, using a variety of methodologies that examine factors contributing to and driving moral action in a variety of social, psychological, and biological contexts. The center encourages ties between scholars interested in ethics in humanities and the sciences—including social science, social ecology, biological sciences, and medicine—building on the interdisciplinary tradition at UCI, complementing, rather than duplicating, existing efforts. Visit UCI Interdisciplinary Center for the Scientific Study of Ethics and Morality website (<http://www.ethicscenter.uci.edu/>) for more information.

## Honors

Graduation with Honors. No more than 16 percent of the graduating seniors, who have completed at least 72 units in the University of California will receive honors: approximately 2 percent *summa cum laude*, 4 percent *magna cum laude*, and 10 percent *cum laude*. The student's cumulative record at the end of the final quarter is the basis for consideration for awarding Latin Honors. To be eligible for consideration for honors at graduation, the student must, before the end of winter quarter of the senior year, have submitted an Application for Graduation; be officially declared as a major within the School of Social Sciences; have all corrections to the academic record processed by the Registrar's Office; if completing the Language Other Than English general education requirement with a language exemption test, pass the test by the end of winter quarter; and be able to verify completion of all course work by the end of the spring quarter of the senior year. Other factors are listed in the Honors Recognition section.

**Dean's Honor List.** The quarterly Dean's Honor List is composed of students who have received a 3.5 grade point average while carrying a minimum of 12 graded units.

**Departmental Honors Programs.** Most departments in the School of Social Sciences offer an honors program (refer to the departmental information). Upon successful completion of the honors program, students graduate with honors in their respective majors and their transcripts note that they were in the honors program.

**Honor Societies.** Several departments in the School of Social Sciences belong to a national honor society. Eligibility is based on satisfying the requirements of the specific honor society. In the School of Social Sciences, these national honor societies include Lambda Alpha Kappa (Anthropology), Omicron Delta Epsilon (Economics), Pi Omicron of Pi Sigma Alpha (Political Science), Psi Chi (Psychology), Pi Gamma Mu (Social Sciences), Sigma Iota Rho (International Studies), and Alpha Kappa Delta (Sociology).

**Order of Merit.** The Dean of the School of Social Sciences' Order of Merit award recognizes the most outstanding graduating undergraduates and graduate students for their academic achievements, contributions to the School, and service to the campus and community.

**Kathy Alberti Award for Graduate Student Excellence.** This award recognizes a graduate student who holds truly outstanding promise as a future professor or teacher.

**Alumni Academic Excellence Scholarship.** This scholarship recognizes an undergraduate for outstanding academic performance and service to the School, campus, and community.

**The Ruth Fulton Benedict Prize.** This prize recognizes outstanding writing in anthropology by an undergraduate.

**Steve Borowski Scholarship.** This scholarship is awarded to an exemplary School of Social Sciences student athlete. The award winner is selected from among a pool of Social Sciences student athletes based on academic merit and extracurricular involvement. Coaches may also nominate outstanding Social Sciences student athletes. Athletes interested in being considered should contact their coaches. Administered by Athletics. Award varies.

**The Boukai Family Foundation Middle East Studies Student Initiative Research Award.** This award recognizes MESSI students for academic excellence. Applicants must be full-time MESSI students with a 3.0 GPA or higher.

**James N. Danziger Award for Teaching Excellence.** This award recognizes a Political Science graduate student who has advanced to candidacy for teaching excellence.

**David Easton Award.** This award is given for the outstanding qualifying paper written by a Political Science graduate student during the preceding academic year.

**Harry Eckstein Award for the Outstanding Undergraduate Honors Thesis.** This award is given annually for the best honors thesis written by a Political Science major.

**Harry Eckstein Memorial Fund.** The Harry Eckstein Memorial Fund is presented annually to Political Science graduate students conducting research toward the completion of the Ph.D. in Political Science at UCI. Recipients of the award are designated as Eckstein Scholars.

**Jean-Claude Falmagne Research Award.** This award is given to a Cognitive Sciences graduate student who has advanced to candidacy for the Ph.D. The award is to support the student's summer research activity.

**Jeff Garcilazo Scholarship.** This award, established in honor and memory of the late Chicano/Latino Studies and History professor Jeff Garcilazo, is awarded annually to the undergraduate student author(s) of the best research paper(s) in Chicano/Latino Studies, to provide opportunities for students to examine the historical and contemporary experiences of Latino communities.

**Sheen T. Kassouf Endowed Fellowship.** The fellowship is awarded to a student enrolled in the UCI Economics doctoral program. Graduate students in all areas of economics are eligible, with the major criteria for the award being excellence in course work and research.

**The Justine Lambert Prize in Foundations of Science.** This award is given every other year to the best submitted graduate paper on the foundations of logic, mathematics, and the empirical sciences. The competition is open to all graduate students at UCI, regardless of department or school affiliation.

**Charles A. Lave Paper Prize for Creative Modeling in Social Sciences.** The prize is awarded to any UCI undergraduate or graduate student and may be in any social or behavioral science discipline, or interdisciplinary. It may be qualitative (with words only) or quantitative (with mathematical expressions). The prize will be awarded to a paper that displays creative modeling; points to or includes data that permits model evaluation; and exhibits the clear writing and brevity that Charles Lave valued.

**Alice B. Macy Outstanding Undergraduate Paper Award.** This award is given to a Social Sciences undergraduate student in any discipline for a paper that demonstrates original research.

**The Malinowski Prize for Undergraduate Research.** This award recognizes outstanding original research in the area of anthropology.

**Thomas W. McGillin Scholarship.** This scholarship is given to an undergraduate who is a first-generation citizen of this country with at least one foreign-born parent.

**Outstanding Legal Scholar Scholarship.** This scholarship is given to an undergraduate who has achieved outstanding academic achievement as well as contributing to the UCI Law Forum program.

**Outstanding Transfer Student Scholarship.** This scholarship is given to an outstanding community college transfer student in the School of Social Sciences.

**Sanli Pastore & Hill, Inc. Excellence in Economics Writing Award.** The Institute for Mathematical Behavioral Sciences (IMBS) awards this paper prize for the top graduate student paper in economics or decision analysis. Students who have written papers in game theory, economic theory, mathematical economics, decision analysis, and related areas are encouraged to submit them for consideration.

**Jack and Suzie Peltason Scholarship.** This award is given at the discretion of the department chair to support and facilitate the education of undergraduate Political Science majors. All undergraduate political science majors are eligible to apply.

**Pi Omicron Award for Outstanding Political Science Major.** This award is given annually by UCI's Pi Omicron Chapter of Pi Sigma Alpha to a graduating senior Political Science major who best exemplifies a commitment to academic excellence and public service.

**A. Kimball Romney Outstanding Graduate Paper Award.** This award is given to a Social Sciences graduate student in any discipline for a paper that demonstrates original research.

**David and Kristen Rosten International and Community Service Scholarship.** This scholarship is awarded to an undergraduate who is planning a career in public service in either the domestic or international community.

**Vicki Ruiz Award.** This award is given to graduating seniors in Chicano/Latino Studies who have achieved scholarly excellence and service. Nomination by faculty in the Department of Chicano/Latino Studies is required for this award.

**Elena B. and William R. Schonfeld Scholarship.** This scholarship is awarded annually in the School of Social Sciences to the outstanding undergraduate who combines excellence in scholarship with dedication to the University community and the highest level of achievement in other fields. The award is available to students with one year remaining prior to graduation.

**School of Social Sciences Outstanding Graduate Scholarship Award.** This award is for high intellectual achievement by a Social Sciences graduate student.

**School of Social Sciences Outstanding Graduate Student Service Award.** This award is for contributions to the Social Science community, including the intellectual growth of others.

**School of Social Sciences Outstanding Undergraduate Honors Thesis Award.** This award is for the outstanding undergraduate honors thesis.

**School of Social Sciences Student Athlete Award.** This award is given to a Social Sciences student who has demonstrated outstanding academic achievement as well as significant contributions to the UCI Athletics Department.

**Gary Singer Scholar Athlete Award.** This award is for a student athlete who has outstanding academic achievement as well as contributions to their sport.

**Robin M. Williams Award.** This award is given to an undergraduate student and a graduate student for the best research paper in the field of sociology.

**John I. Yellot Scholar Award.** This award is given to a Cognitive Sciences graduate student who has not yet advanced to candidacy for the Ph.D. The award is to support the student's summer research activity.

## Community Outreach

The **Ambassador's Council** has been created to promote and enrich the school by supporting new and existing school-wide/department projects. It collectively acts as an official student in discussing program development with administrators and department chairs and other faculty.

**Global Connect** is a university led curriculum program through which UCI social sciences faculty, undergraduate and graduate students bring their knowledge of international issues into high school classrooms in order to better prepare students to become informed global citizens. UCI faculty and students develop global issue-focused lesson plans on topics such as UN millennium development goals, mass media and technology, and the purpose of NGOs – areas of study in which UCI experts are known internationally, but subjects which are not part of the current California state education standards. Lessons are team-taught by UCI students and faculty alongside high school educators in Newport Mesa and Saddleback School Districts. The real-time course content, updated annually, reflects the continually changing global landscape while bringing new and updated university research directly to high school teachers - a challenge that traditional textbook publishing schedules are unable to keep up with.

**HABLA** is a broad-spectrum Latino-focused educational outreach program based in the School of Social Sciences and created by Professor Virginia Mann in 2000 with the support of the Orange County Children and Families Commission. Its purpose is to increase the school readiness of disadvantaged children ages two–four years, by uniting faculty and students at UCI with the Santa Ana Unified School System, local Families Resource Center, Americorp/VISTA, FACT, and the national Parent Child Home Program (PCHP).

**Jumpstart** was established on the UCI campus by Professor Virginia Mann in 2003. Students involved as Jumpstart members are paired with children participating in pre-school programs in the local Orange County area. The purpose is to help young students develop language, literacy, and social skills. Social Sciences undergraduates usually serve with Jumpstart for a full school year. The UCI Jumpstart program recruits, trains, and supervises UCI students to work with Head Start and other early-childhood programs in low-income communities of Orange County.

## Requirements for the Bachelor's Degree

**All students must meet the University Requirements.**

### School Requirements

1. Familiarity with basic mathematical, computational, and statistical tools underlying modern social sciences. This requirement is met by passing a three-course sequence in mathematics selected from the following: ANTHRO 10A-ANTHRO 10B-ANTHRO 10C; MATH 2A-MATH 2B and either STATS 7 or MGMT 7 or PUBHLTH 7A; POL SCI 10A-POL SCI 10B-POL SCI 10C; PSYCH 10A-PSYCH 10B-PSYCH 10C; SOC SCI 10A-SOC SCI 10B-SOC SCI 10C; or SOCIO 10A-SOCIO 10B-SOCIO 10C. (NOTE: School of Social Sciences majors may not take SOC SCI 9A-B-C to fulfill the mathematics requirement.) Computer education is essential for a complete social science education. This requirement can be satisfied by passing I&C SCI 31, PSYCH 114M, or SOC SCI 3A. Departments may have preferences for specific courses. Students should see their major department for acceptable courses. This course requirement should be taken during the student's first year.
2. An understanding of the fundamental concepts, analytical tools, and methods of social science. This requirement is met by taking two four-unit introductory courses in the School of Social Sciences. (Such courses include ANTHRO 2A, ANTHRO 2B, ANTHRO 2C, ANTHRO 2D, ECON 1, INTL ST 1, LSCI 3, POL SCI 11A, POL SCI 11B, POL SCI 11C, PSYCH 7A, SOC SCI 1A, SOC SCI 5A, SOC SCI 5B, SOC SCI 5D, SOCIO 1, SOCIO 2, SOCIO 3). These courses normally should be taken during the student's first year. For students majoring in Cognitive Sciences, the requirements are waived due to the academic rigor of the B.S. curriculum.
3. An understanding of important advanced areas in social science. This requirement is met by passing satisfactorily nine four-unit upper-division courses in the School of Social Sciences, where at least three of these courses comprise core courses or a module.
4. Four additional four-unit social science courses from any level.
5. No more than two courses numbered 198-199 may be used towards a degree requirement (excluding majors in the Department of Cognitive Sciences and Economics which allow three such numbered courses).

Students are reminded that the Pass/Not Pass option is not applicable to course requirements 1 through 5 above or to any additional requirements listed for specific major programs. However, I&C SCI 31, PSYCH 114M, or SOC SCI 3A are exceptions to this rule and may be taken Pass/Not Pass, except for those whose majors are B.S. in Cognitive Sciences and/or B.A. in Social Policy and Public Service as I&C SCI 31 or PSYCH 114M or SOC SCI 3A are major requirements.

Courses used to meet requirements 2 through 5 above are included in the computation of the grade point average in courses required in the major program.

**Maximum Overlap Between Major and Minor Requirements:** Students completing both a major and a minor within the School of Social Sciences may count courses taken to fulfill the School's mathematics and computer science requirement toward satisfaction of both the major and the minor. No other course overlap is allowed. For students completing a major within the School of Social Sciences and a minor outside of the School of Social Sciences, a maximum of two courses may overlap between a major and a minor. For students pursuing a minor in Mathematics, Psychological Science, or Statistics, a total of three courses may overlap. No course overlap is permitted between minors.

- The Curriculum in Geography

## Undergraduate Programs

### Planning a Program of Study

Since there are many alternative ways to plan a program, some of which may require careful attention to specific major requirements, students should consult with the School of Social Sciences Undergraduate Student Affairs to design an appropriate program of study.

Students who select one of the School majors in their freshman year might begin by taking the one-digit courses required by their major and one of the mathematics sequences listed under Part A of the School requirements. It is a good idea to take these courses early since they include fundamental concepts that will be widely applicable in more advanced courses. In addition, the lower-division writing requirement of the general education requirement (category I) should be completed during the first year. In the sophomore year, the student might complete the course on computing, three courses toward the general education requirement, four courses in the social sciences, and four electives. Students who are planning to go on to graduate school can use their freshman and sophomore years to advantage by taking courses in theory, research methods, mathematics, and other areas important to graduate study. In the junior and senior years, the student should take courses in the major area and should create an individualized program of study through a combination of courses and course modules which fall in an area of interest. Particular attention should be paid to planning a program of study that will ensure that major requirements are met prior to graduation.

**Change of Major.** Students who wish to change their major to one offered by the school should contact the Social Sciences Undergraduate Student Affairs Office for information about change-of-major requirements, procedures, and policies. Information is also available at the UCI Change of Major Criteria website (<http://www.changeofmajor.uci.edu/>).

### Double Majors within Social Sciences

In fulfilling degree requirements for multiple majors, a maximum of two lower-division courses may overlap between any two majors.

## Other Double Majors

In fulfilling degree requirements for multiple majors, a maximum of two courses may overlap between any two majors. For students pursuing a major in Psychology and Social Behavior, a total of three courses (PSYCH 9A- PSYCH 9B-PSYCH 9C, same as PSCI 11A-PSCI 11B-PSCI 11C) may be overlapped.

## Mathematics and Social Sciences

The mathematics requirement stems from the nature of modern social science. The concepts and terms of mathematics, statistics, and computers are an important part of the social scientist's vocabulary. Basic knowledge of these tools is necessary to an understanding of current literature in the social sciences, to the analysis of data, and to an intelligent use of social science models. Each candidate for a degree in the School of Social Sciences is expected to have a basic knowledge of probability, statistics, and computing. In addition, for students who are preparing for graduate school in an area of social science, it will be important to supplement the minimal mathematics requirements with additional courses related to mathematics and social science methodology. The particular courses which would be recommended are not specified here, however, since they are highly dependent on the major emphasis of the student. Students who are preparing for graduate study should consult their advisors to determine a program of study which will give them the research skills necessary for successful graduate work.

## Transfer Study Recommendations

The School recommends that students wishing to transfer to UCI do the following:

1. Complete the Intersegmental General Education Transfer Curriculum (IGETC) prior to transfer to UCI.
2. Refer to the ASSIST website (<http://www.assist.org/web-assist/welcome.html>) for information about community college courses that will fulfill UCI lower-division major requirements.

Specific course recommendations:

Prospective **Quantitative Economics majors**: complete the equivalent of UCI's MATH 2D at a community college (in addition to the courses required for transfer student admission; see the Department of Economics section).

Prospective **International Studies majors**: complete two semesters of foreign language at the intermediate level.

Prospective **Psychology majors**: complete a three-course sequence in introductory, physiological, and either social or abnormal psychology.

## Transfer Students

**Freshmen and Sophomores**: Students transferring to UCI as freshmen or sophomores will fulfill the regular requirements of the four-year program either through work at UCI or through transfer credit for comparable work elsewhere.

**Juniors**: Following review by the School of Social Sciences, it may be determined that junior transfer students electing to major in one of the School's degree programs, who have good records at other accredited colleges and universities, have satisfied School requirement 2 and the University requirements. However, all transfer students must fulfill the upper-division writing general education requirement (category I) while at UCI. Students anticipating transfer to UCI in their junior year should plan their curriculum so as to anticipate the special mathematics requirement (School requirement 1). Every effort will be made to accommodate individual variation in background, provided students are prepared to commit themselves to intensive work in areas of deficiency. Ordinarily, the typical two-year program for junior transfers is simply the last two years of the regular four-year program, except that students who have not satisfied the mathematics requirements of the School should plan to do so in the junior year and must do so before graduation.

**Seniors**: Students wishing to graduate with a degree in the School by transferring to UCI in their senior year should plan their work carefully to ensure that the requirements can be met in one year of residence. In general, differences between the program at UCI and programs elsewhere make senior transfers difficult.

## Service Learning, Community Service, and Internships

Service learning is a meaningful educational activity that integrates community service within the curriculum. It is an opportunity for students to make positive contributions to underserved and marginalized communities through academic courses, field studies, and internships.

Service learning provides out-of-class experiences to reinforce understanding of academic theory while addressing serious community concerns. When combined with a structured curriculum that includes research components, students can explore the role of the social scientist while seeking solutions to problems affecting society. The School of Social Sciences' philosophy is to practice research, service, and good citizenship.

The School actively supports service learning through its philosophy of enhancing the learning process by motivating, inspiring, and teaching students how to recognize and accept their civic responsibilities. The goal is to educate students about social issues and provide them with the necessary tools to solve the difficult problems society faces. Under the guidance and supervision of faculty and staff, students are offered the opportunity to experience personal, professional, social, and intellectual growth through the following School of Social Sciences programs: public- and private-sector internships, community service, field studies, and the major in Social Policy and Public Service.

## Undergraduate Programs in K–12 Education

Undergraduate students who wish to pursue a career in the field of K–12 education are well-served in the School of Social Sciences and the School of Education. The following interrelated programs provide opportunities for students to gain knowledge and experience in this important area.

### Minor in Educational Studies

The minor in Educational Studies allows students to explore a broad range of issues in the field of education and provides a strong foundation for K-12 teaching. Both introductory and advanced courses are included, giving students a solid preparation for later teacher credential programs and many related occupations. NOTE: A Statement of Intent is required of all students wishing to enroll in this minor. See the School of Education section of the *Catalogue* for more information.

### School of Education Programs

The School of Education provides many other opportunities for prospective educators, including a mentoring program which provides students with valuable experience while they work with credentialed teachers; UC Links, a program in which undergraduates tutor K–8 students in after-school settings; and advising services provided by counselors who assist students in planning future careers in education. Further information about these programs is available from the School of Education counselors at 2001 Berkeley Place.

Students interested in obtaining a teaching credential should see the School of Education section of the *Catalogue* for information.

## Special Programs

### Campuswide Honors Collegium

The Campuswide Honors Collegium is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campuswide Honors Collegium, 1200 Student Services II; 949-824-5461; [honors@uci.edu](mailto:honors@uci.edu); or visit the Campuswide Honors Collegium website (<http://honors.uci.edu/>).

### UC Education Abroad Program

Upper-division students have the opportunity to experience a different culture while making progress toward degree objectives through the University's Education Abroad Program (EAP). UCEAP is an overseas study program which operates in cooperation with host universities and colleges throughout the world. Visit the Study Abroad Center website (<http://www.studyabroad.uci.edu/>) for additional information.

### Interdisciplinary Minors

A variety of interdisciplinary minors are available to all UCI students. The minor in Chicano/Latino Studies, offered by the School of Social Sciences, is designed to provide an awareness, knowledge, and appreciation of the language, history, culture, literature, sociology, anthropology, politics, social ecology, health, medicine, and creative (art, dance, film, drama, music) accomplishments of Chicano/Latino communities.

The **minor in Conflict Resolution**, sponsored by the International Studies program in the School of Social Sciences, provides skills in conflict analysis and resolution and a useful understanding of integrative institutions at the local, regional, and international levels. The curriculum includes training that students may apply toward State of California certification as a mediator.

Information about the following minors is available in the Interdisciplinary Studies section of the *Catalogue*.

The **minor in Civic and Community Engagement** seeks to provide students with the knowledge, skills, attitudes, and values to engage as citizens and active community members in the 21st century. The minor is distinguished both by *what* students learn, and by *how* they learn it.

The **minor in Global Sustainability** trains students to understand the changes that need to be made in order for the human population to live in a sustainable relationship with the resources available on this planet.

The **minor in the History and Philosophy of Science** explores how science is actually done and how it has influenced history, and is concerned with determining what science and mathematics are, accounting for their apparent successes, and resolving problems of philosophical interest that arise in the sciences.

The **minor in Native American Studies** focuses on history, culture, religion, and the environment. The three core courses serve as an introduction to the Native American experience from the perspective of different historical periods and frameworks of analysis.

Information about the following interdisciplinary minors is available in the School of Humanities section.

The **minor in African American Studies** offers undergraduate students an opportunity to study those societies and cultures established by the people of the African diaspora and to investigate the African American experience from a variety of disciplinary perspectives and theoretical approaches.

The **minor in Archaeology** introduces students to modern archaeological theory and practice, to different approaches and theoretical frameworks used in the reconstruction of cultures based on their material remains, and the use of such approaches and frameworks in a comparative context that emphasizes one geographic area.

The **minor in Asian American Studies** examines the historical and contemporary experiences of Asians after their arrival in the United States and seeks to provide an awareness of the history, culture (e.g., literary and creative art accomplishments), psychology, and social organization of Asian American communities.

The **minor in Asian Studies** creates opportunities for students to explore Asian topics in a variety of fields, to develop advanced language skills, and to acquire broader perspectives.

The **minor in Latin American Studies** is designed to develop in students an awareness, knowledge, and appreciation of Latin American issues in the areas of language, history, culture, literary studies, sociology, anthropology, political science, health, folk medicine, and creative (art, dance, film, drama, music) accomplishments.

The **minor in Religious Studies** focuses on the comparative study of religions in various cultural settings around the world and seeks to provide a wide-ranging academic understanding and knowledge of the religious experience in society.

The **minor in Gender and Sexuality Studies** fosters critical and creative analysis of the various disciplinary perspectives—historical, political, economic, representational, technological, and scientific—that have (or have not) constituted women, gender, and sexuality as objects of study. Department of Gender and Sexuality Studies also offers a minor in Queer Studies.

## Careers in Social Sciences

Business and industry often look to social science graduates to fill positions in management, finance, marketing and advertising, personnel, production supervision, and general administration. In the public sector, a wide variety of opportunities are available in city, county, state, and federal government. Teaching is a frequently chosen career at all levels from elementary school teacher to professor. In addition, many graduates enter professional practice, becoming lawyers, psychologists, researchers, or consultants in various fields.

Because all degrees offered by the School of Social Sciences involve an educational program that is interdisciplinary and that prepares students to understand quantitative methods of data analysis, graduates are well-positioned for research and analysis careers at all levels of government and in private firms. Their solid grounding in contemporary social science methods and their familiarity with a broad spectrum of social scientific thinking gives them an excellent foundation for the pursuit of further training in graduate and professional programs.

The UCI Career Center provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques. Additional information is available in the Career Center section.

The School of Social Sciences offers graduate training in the following areas: Anthropology (Ph.D. in Anthropology), Cognitive Sciences (Ph.D. in Cognitive Sciences), Economics (Ph.D. in Economics), Logic and Philosophy of Science (Ph.D. in Philosophy), Mathematical Behavioral Sciences (Ph.D. in Social Science), Politics and Society (Ph.D. in Political Science), and Sociology (Ph.D. in Sociology).

In addition, an interdisciplinary concentration in Public Choice is offered within the programs in Economics and Political Science, a concentration in Cognitive Neuroscience is offered within the program in Cognitive Sciences, a specialized concentration in Transportation Economics is offered within the program in Economics, an emphasis in Social Networks is offered within the Mathematical Behavioral Sciences concentration, and an emphasis in Global Studies is offered within the program in Global and International Studies. When an applicant's interests lie outside of or across these areas, the Associate Dean of Graduate Studies, School of Social Sciences, may, on rare occasions, appoint a three-member faculty committee to guide an independent course of study for the Ph.D. degree in Social Science.

The M.A. in Anthropology, Economics, Philosophy, Political Science, Psychology, Social Science, or Sociology may be conferred upon students in Ph.D. programs after completion of the necessary requirements.

Additionally, the M.A. degree program in Social Science with a concentration in Demographic and Social Analysis is supervised by faculty from the Schools of Social Sciences and Social Ecology. Students may apply directly to this M.A. program.

A concentration in Medicine, Science, and Technology Studies is available within the M.A. degree in Social Science.

A Master of Public Policy (M.P.P.) program is also available and is jointly supervised by faculty from the Schools of Social Sciences and Social Ecology. Students may apply directly to this program.

In cooperation with the UCI School of Education, students enrolled in a School of Social Sciences graduate program may choose to pursue a teaching credential while working toward their degree. After completion of requirements for an M.A. degree, students may apply for admission into the credential program administered by the School of Education. As required by law, the applicant must pass the California Basic Educational Skills Test (CBEST), obtain a Certification of Clearance, and successfully complete the appropriate subject area examination or an approved subject-matter program. A detailed description of the program may be obtained from the Social Sciences Graduate Office or the School of Education.

## Admission

Potential graduate students should apply by January 15 to receive fullest consideration for financial aid. Applicants should indicate the title of the degree sought (Anthropology, Economics, Political Science, Psychology, or Social Science), and the academic area of concentration (see above). All applicants

are required to submit Graduate Record Examination General Test scores. Letters of recommendation and the applicant's statement of interest are important factors in the admission decision.

In addition to the University admission requirements described in the Graduate Division section, individual graduate programs may prescribe special requirements or expectations of applicants, subject to the approval of the Graduate Council. Such requirements are minimum standards only; successful applicants typically must exceed them by a substantial margin.

## Financial Support

Many students receive financial support in the form of fellowships, teaching assistantships, or research assistantships available under grants to individual faculty. Before accepting an offer of admission with financial support for the first year, applicants should inquire about the likelihood of such support in future years. Occasionally, a newly admitted student may receive a multiyear commitment of some specified financial support, but this is not the rule. Students are also advised to seek aid from sources external to the University. NOTE: Teaching assistantships do not include remission of fees, tuition, or nonresident supplemental tuition.

## Length of Study and Residence

The normative time for completion of the Ph.D. degree is either five, six, or seven years, depending upon the specific program. See the department sections for information.

Students admitted to the M.A. concentration in Demographic and Social Analysis should be able to earn the M.A. within one to two years.

Because the intellectual training offered by the School requires full-time study and constant contact with the faculty, the School does not accept part-time students.

## Master of Arts Degree

The M.A. degree is awarded to UCI Ph.D. students who complete necessary requirements or to students currently enrolled in a Ph.D. program (or equivalent) at another institution who are directly admitted for graduate study leading only to the master's degree at UCI. Such applicants must provide evidence that their Ph.D. program agrees to this one-year arrangement. Requirements include the submission of a petition to the Graduate Committee along with a proposed plan of study consisting of 36 units of relevant Mathematical Behavioral Science courses, normally including the core requirement in mathematical statistics, and the satisfactory completion of a comprehensive examination.

## Faculty

Neerja Aggarwal, Ph.D. University of California, Irvine, *Lecturer of Economics*

Samar Al-Bulushi, Ph.D. Yale University, *Assistant Professor of Anthropology* (surveillance, policing, and militarized urbanisms; Islam, Africa, and the racialized geopolitics of the war on terror; elites, diplomacy, and transnational governance)

Yousuf Al-Bulushi, Ph.D. University of North Carolina at Chapel Hill, *Assistant Professor of Global and International Studies*

Nurudeen O. Alao, Ph.D. Northwestern University, *Lecturer of Social Sciences*

Edwin Amenta, Ph.D. University of Chicago, *Professor of Sociology; Political Science* (political sociology, historical and comparative sociology, social movements, social policy)

Vellore Arthi, Ph.D. University of Oxford, *Assistant Professor of Economics*

Richard Arum, Ph.D. University of California, Berkeley, *Dean of the School of Education and Professor of Education; Criminology, Law and Society; Sociology*

Drew Bailey, Ph.D. University of Missouri, *Associate Professor of Education; Cognitive Sciences; Psychological Science*

Stanley Bailey, Ph.D. University of California, Los Angeles, *Professor of Sociology; Religious Studies* (race and ethnicity, religion, immigration, Latin America)

Nina Bandelj, Ph.D. Princeton University, *Professor of Sociology* (economic sociology, culture, organizations, social networks, political economy, globalization, social change, central and eastern Europe)

Jeffrey A. Barrett, Ph.D. Columbia University, *Professor of Logic and Philosophy of Science; Philosophy*

Frank D. Bean, Ph.D. Duke University, *UCI Distinguished Professor of Sociology; Economics; Education* (international migration, demography, Mexican immigration, racial and ethnic relations, economic sociology, family)

Matthew N. Beckmann, Ph.D. University of Michigan, *Associate Professor of Political Science* (presidency, congress, interest groups, mass media, and politics)

D. Bell, Ph.D. University of California, Berkeley, *Professor Emeritus of Economics*

Bruce G. Berg, Ph.D. Indiana University, *Associate Professor of Cognitive Sciences* (audition, auditory attention, psychophysics of complex sounds, computational models of hearing)

Victoria Bernal, Ph.D. Northwestern University, *Professor of Anthropology; Culture and Theory; Gender and Sexuality Studies; Religious Studies* (gender, war, cyberspace, Islam, transnationalism, Africa)

Thomas D. Boellstorff, Ph.D. Stanford University, *Professor of Anthropology* (virtual worlds, sexuality, postcoloniality, HIV/AIDS, mass media and popular culture, language and culture, Indonesia, Southeast Asia)

Daniel E. Bogart, Ph.D. University of California, Los Angeles, *Professor of Economics*

Catherine I. Bolzendahl, Ph.D. Indiana University, *Associate Professor of Sociology* (gender, gender and sexuality studies, the welfare state, political sociology, comparative sociology, family, quantitative methodology)

Aaron Bornstein, Ph.D. New York University, *Assistant Professor of Cognitive Sciences* (memory, decision-making, reinforcement learning, neuroimaging, computational cognitive neuroscience)

Graeme T. Boushey, Ph.D. University of Washington, *Associate Professor of Political Science; Urban Planning and Public Policy* (California politics and statewide elections, American politics, state and federal policy-making, ballot measures and the initiative process)

John P. Boyd, Ph.D. University of Michigan, *Professor Emeritus of Anthropology*

William A. Branch, Ph.D. University of Oregon, *Department Chair and Professor of Economics*

Alyssa Brewer, Ph.D. Stanford University, *Associate Professor of Cognitive Sciences; Language Science* (neuroimaging of visual perception, visual deficits, neurological disorders)

Susan K. Brown, Ph.D. University of Washington, *Professor of Sociology; Religious Studies* (immigration, inequality, urban sociology)

David Brownstone, Ph.D. University of California, Berkeley, *Professor Emeritus of Economics*

Jan K. Brueckner, Ph.D. Stanford University, *Distinguished Professor of Economics; Urban Planning and Public Policy*

Daniel R. Brunstetter, Ph.D. University of California, Davis, *Associate Professor of Political Science; European Languages and Studies* (political theory, international relations, French political thought)

Long T. Bui, Ph.D. University of California, San Diego, *Assistant Professor of Global and International Studies*

Michael L. Burton, Ph.D. Stanford University, *Professor Emeritus of Anthropology*

Carter Butts, Ph.D. Carnegie Mellon University, *Professor of Sociology; Computer Science; Electrical Engineering and Computer Science; Statistics* (mathematical sociology, social networks, quantitative methodology, human judgment and decision making, economic sociology)

Lee Cabatingan, Ph.D. University of Chicago, *Assistant Professor of Criminology, Law and Society; Anthropology* (Caribbean law and sovereignty; construction of authority at the Caribbean Court of Justice)

Alejandro E. Camacho, J.D., LL.M. Harvard University, Georgetown University, *Professor of School of Law; Political Science*

Belinda Campos, Ph.D. University of California, Berkeley, *Associate Professor of Chicano/Latino Studies; Family Medicine; Psychological Science* (culture, relationships, positive emotion, health)

Francis A. Cancian, Ph.D. Harvard University, *Professor Emeritus of Anthropology*

David O. Carter, J.D. University of California, Los Angeles, *Lecturer of Political Science*

Jean-Paul Carvalho, Ph.D. Oxford University, *Associate Professor of Economics; Logic and Philosophy of Science; Religious Studies*

Anita Casavantes Bradford, Ph.D. University of California, San Diego, *Associate Professor of Chicano/Latino Studies; Asian American Studies; History* (20th century U.S., U.S. in the world, Cuba and the Caribbean; history of childhood; history of immigration, race and ethnicity; transnational and comparative Latina/o history; religion, politics and social movements)

Jeanett Castellanos, Ph.D. Washington State University, *Associate Professor of Teaching of Social Sciences*

Simone Chambers, Ph.D. Columbia University, *Professor of Political Science* (democratic theory, ethics, secularism, rhetoric, civility, and the public sphere)

Leo Chavez, Ph.D. Stanford University, *Distinguished Professor of Anthropology* (migration, media, discourse analysis, visual semiotics, medicine)

Jiawei Chen, Ph.D. Johns Hopkins University, *Associate Professor of Economics*

Nadia Chernyak, Ph.D. Cornell University, *Assistant Professor of Cognitive Sciences* (cognitive development, social cognition, prosocial behavior, moral cognition, agency and free will, conceptual development)

Natalia Chernyshoff, Ph.D. University of California, Davis, *Lecturer of Economics*

Michael Choi, Ph.D. University of Wisconsin, Madison, *Assistant Professor of Economics*

Damon Clark, Ph.D. Oxford University, *Associate Professor of Economics; Urban Planning and Public Policy*

Benjamin N. Colby, Ph.D. Harvard University, *Professor Emeritus of Anthropology*

Gilberto Q. Conchas, Ph.D. University of Michigan, *Professor of Education; Asian American Studies; Sociology* (urban education, sociology of education, comparative race and ethnicity)

N. Edward Coulson, Ph.D. University of California, San Diego, *Professor of Paul Merage School of Business; Economics; Psychological Science*

Susan B. Coutin, Ph.D. Stanford University, *Professor of Criminology, Law and Society; Anthropology; Religious Studies* (law, culture, immigration, human rights, citizenship, political activism, Central America)

Thomas M. D'Zmura, Ph.D. University of Rochester, *Professor of Cognitive Sciences* (vision, hearing, language, brain-computer interfaces)

James N. Danziger, Ph.D. Stanford University, *Professor Emeritus of Political Science*

Eve Darian-Smith, Ph.D. University of Chicago, *Department Chair and Professor of Global and International Studies; Anthropology; Criminology, Law and Society*

Arthur S. De Vany, Ph.D. University of California, Los Angeles, *Professor Emeritus of Economics*

Louis DeSipio, Ph.D. University of Texas at Austin, *Professor of Chicano/Latino Studies; Political Science* (ethnic politics, Latino politics, immigration, naturalization, U.S. electoral politics)

Yingying Dong, Ph.D. Boston College, *Associate Professor of Economics*

Barbara A. Doshier, Ph.D. University of Oregon, *UCI Distinguished Professor of Cognitive Sciences* (human information processing, memory retrieval, attention, visual perception)

John Duffy, Ph.D. University of California, Los Angeles, *Professor of Economics*

Greg Duncan, Ph.D. University of Michigan, *UCI Distinguished Professor of Education; Economics; Psychological Science* (economics of education, program evaluation, child development)

Nikil D. Dutt, Ph.D. University of Illinois at Urbana-Champaign, *UCI Chancellor's Professor of Computer Science; Cognitive Sciences; Electrical Engineering and Computer Science* (embedded systems, computer architecture, electronic design automation, software systems, brain-inspired architectures and computing)

Laura Enriquez, Ph.D. University of California, Los Angeles, *Assistant Professor of Chicano/Latino Studies; Asian American Studies; Sociology* (undocumented 1.5 generation young adults, immigration, citizenship, Latino families)

George Farkas, Ph.D. Cornell University, *UCI Distinguished Professor of Education; Sociology* (educational achievement gaps, interventions, educational policy)

Katherine Faust, Ph.D. University of California, Irvine, *Professor of Sociology* (social networks, animal social organization, population processes and social networks, research methods)

David Feldman, Ph.D. University of Missouri-Columbia, *Professor of Urban Planning and Public Policy; Political Science*

Martha S. Feldman, Ph.D. Stanford University, *Roger W. and Janice M. Johnson Chair in Civic Governance and Public Management and Professor of Urban Planning and Public Policy; Paul Merage School of Business; Sociology* (organization theory and behavior, stability and change in organizations, decision-making and information processing, public management, qualitative research methods)

Raúl A. Fernández, Ph.D. Claremont Graduate University, *Executive Secretary of the UC-Cuba Academic Initiative and Professor Emeritus of Chicano/Latino Studies; Social Sciences*

Gordon J. Fielding, Ph.D. University of California, Los Angeles, *Professor Emeritus of Economics*

Mark J. Fisher, M.D. University of Cincinnati, *Professor of Neurology; Anatomy and Neurobiology; Political Science*

Glenda M. Flores, Ph.D. University of Southern California, *Associate Professor of Chicano/Latino Studies; Sociology* (Latina/o sociology, gender and work, middle-class minorities, education, urban ethnography)

Matthew Foreman, Ph.D. University of California, Berkeley, *Distinguished Professor of Mathematics; Logic and Philosophy of Science* (ergodic theory and dynamical systems, logic and foundations)

Kim Fortun, Ph.D. Rice University, *Department Chair and Professor of Anthropology* (environmental problems and science, science and technology, environmental health, disaster, India)

Michael Fortun, Ph.D. Harvard University, *Associate Professor of Anthropology* (anthropology of science, air pollution science, data science, genetics, history of science, United States, Iceland)

Charles C. Fowlkes, Ph.D. University of California, Berkeley, *Professor of Computer Science; Cognitive Sciences* (artificial intelligence, computer vision, machine learning, computational biology)

David John Frank, Ph.D. Stanford University, *Professor of Sociology; Education; Political Science* (globalization, sexuality, the natural environment, higher education)

Steven A. Frank, Ph.D. University of Michigan, *Distinguished Professor and Donald Bren Professor of Ecology and Evolutionary Biology; Logic and Philosophy of Science*

Matthew Freedman, Ph.D. University of Maryland-College Park, *Professor of Economics*

Michelle Garfinkel, Ph.D. Brown University, *Professor of Economics*

Howard A. Gillman, Ph.D. University of California, Los Angeles, *Chancellor and Professor of Political Science; Criminology, Law and Society; History; School of Law*

Amihai Glazer, Ph.D. Yale University, *Professor of Economics*

David Theo Goldberg, Ph.D. The Graduate Center, City University of New York, *Director of the UC Humanities Research Institute and Professor of Comparative Literature; Anthropology; Criminology, Law and Society* (race, racism, race and the law, political theory, South Africa, digital humanities)

Rachel E. Goldberg, Ph.D. Brown University, *Assistant Professor of Sociology* (health, social demography, family, children and youth, gender, migration)

Isaac Goldbring, Ph.D. University of Illinois at Urbana-Champaign, *Associate Professor of Mathematics; Logic and Philosophy of Science* (logic and foundations)

Ruth Goldstein, Ph.D. University of California, Berkeley, *Assistant Professor of Global and International Studies*

Gilbert G. Gonzalez, Ph.D. University of California, Los Angeles, *Professor Emeritus of Chicano/Latino Studies; Social Sciences*

Sara Goodman, Ph.D. Georgetown University, *Associate Professor of Political Science; European Languages and Studies* (citizenship policy, immigration, immigrant integration, ethnic diversity in democracies, diaspora)

Michael R. Gottfredson, Ph.D. University at Albany, State University of New York, *Chancellor's Professor of Criminology, Law and Society; School of Law; Sociology* (criminology, juvenile delinquency, crime theory, public policy)

Susan M. Greenhalgh, Ph.D. Columbia University, *Professor Emeritus of Anthropology*

Bernard N. Grofman, Ph.D. University of Chicago, *Professor of Political Science; Economics* (public choice, mathematical models of collective decision making, formal democratic theory, politics of small groups, representation, voting rights)

Emily D. Grossman, Ph.D. Vanderbilt University, *Professor of Cognitive Sciences* (visual perception, neuroimaging)

Sherine Hamdy, Ph.D. New York University, *Associate Professor of Anthropology* (medical anthropology, science, technology and society, bioethics, comics, Islam, Egypt, middle east)

Matthew Harding, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Economics; Statistics*

Heidi Hardt, Ph.D. Graduate Institute of International and Development Studies, *Assistant Professor of Political Science* (international security, international organizations, NATO, European Union, African Union, crisis management, organizational learning)

Richard L. Hasen, J.D. University of California, Los Angeles, *UCI Chancellor's Professor of School of Law; Political Science*

Jeremy Heis, Ph.D. University of Pittsburgh, *Associate Professor of Logic and Philosophy of Science; Philosophy*

Gregory S. Hickok, Ph.D. Brandeis University, *Professor of Cognitive Sciences; Language Science* (neuroanatomy of language, neural plasticity, neuroimaging, cognitive neuroscience)

John R. Hipp, Ph.D. University of North Carolina at Chapel Hill, *Professor of Criminology, Law and Society; Sociology; Urban Planning and Public Policy* (community context of crime, household decisions and neighborhood change, research methods)

Ann Hironaka, Ph.D. Stanford University, *Professor of Sociology; Asian American Studies* (political sociology, war and peace, environmental sociology, ethnic and racial conflict)

David Hirshleifer, Ph.D. University of Chicago, *Paul Merage Chair in Business Growth and Distinguished Professor of Paul Merage School of Business; Economics*

Matthew L. Huffman, Ph.D. University of California, Santa Barbara, *Professor of Sociology* (inequality, organizations, work and employment, research methods)

James R. Hull, Ph.D. University of North Carolina at Chapel Hill, *Assistant Professor of Teaching of Social Sciences* (social networks and social exchange, monetization, barter, multidimensional poverty measures, migration outcomes at origin, classroom technologies and scaling, student engagement, scholarship of teaching and learning)

Anneeth Kaur Hundle, Ph.D. University of Michigan, Ann Arbor, *Dhan Kaur Sahota Presidential Chair of Sikh Studies and Assistant Professor of Anthropology; Religious Studies* (Sikh studies, African and South Asian diaspora/studies; politics of afro-asianism; citizenship, race, and decolonization; minoritization and community formation, postcolonial and transnational feminisms; gender and sexuality; critical university studies; Uganda, East Africa, global south)

Simon Huttegger, Ph.D. University of Salzburg, *Department Chair and Professor of Logic and Philosophy of Science*

Susanne M. Jaeggi, Ph.D. University of Bern, *Associate Professor of Education; Cognitive Sciences* (working memory, executive functions, cognitive training, lifespan development aging, individual differences)

Ivan G. Jeliakov, Ph.D. Washington University, *Associate Professor of Economics; Statistics*

Brian C. Jenkins, Ph.D. University of North Carolina at Chapel Hill, *Assistant Professor of Teaching of Economics*

Angela C. Jenks, Ph.D. University of California, Berkeley, *Associate Professor of Teaching of Anthropology* (medical anthropology, race and ethnicity, urban ethnography, United States)

Valerie Jenness, Ph.D. University of California, Santa Barbara, *Distinguished Professor of Criminology, Law and Society; Sociology* (links between deviance and social control [especially law], the politics of crime control and criminalization, social movements and social change, corrections and public policy)

Linda Cohen Jennings, Ph.D. California Institute of Technology, *Professor of School of Law; Economics*

Priyaranjan Jha, Ph.D. Columbia University, *Professor of Economics*

Lai Jiang, Ph.D. New York University, *Lecturer of Economics*

Philippe Jorion, Ph.D. University of Chicago, *Professor of Paul Merage School of Business; Economics*

Marek Kaminski, Ph.D. University of Maryland, College Park, *Associate Professor of Political Science; Economics* (voting models, democratization, political consequences of electoral laws)

Pamela A. Kelley, J.D. Yale University, *Lecturer of Political Science* (civil rights law, constitutional law, gender discrimination, legal profession, leadership, ethics)

Claire J. Kim, Ph.D. Yale University, *Professor of Asian American Studies; Political Science*

Eleana Kim, Ph.D. New York University, *Associate Professor of Anthropology; Asian American Studies* (kinship, transnationalism, environment, Korea)

Sharon Koppman, Ph.D. University of Arizona, *Assistant Professor of Paul Merage School of Business; Sociology* (work and occupations, sociology of culture, creative industries)

Jeffrey Kopstein, Ph.D. University of California, Berkeley, *Professor of Political Science; Religious Studies* (comparative politics, dictatorship and democracy, ethnic politics, political violence, post-communism)

Igor Kopylov, Ph.D. University of Rochester, *Associate Professor of Economics*

Jeffrey L. Krichmar, Ph.D. George Mason University, *Professor of Cognitive Sciences; Computer Science* (computational neuroscience, robotics)

Charis E. Kubrin, Ph.D. University of Washington, *Professor of Criminology, Law and Society; Sociology* (crime, neighborhood effects and social processes, race/ethnicity and violence, immigration and crime)

Arthur D. Lander, Ph.D. University of California, San Francisco, *Donald Bren Professor and Professor of Developmental and Cell Biology; Biomedical Engineering; Logic and Philosophy of Science* (systems biology of development, pattern formation, growth control)

Alana Lebron, Ph.D. University of Michigan, *Assistant Professor of Program in Public Health; Chicano/Latino Studies*

Jerry Won Lee, Ph.D. University of Arizona, *Associate Professor of English; Anthropology; Asian American Studies; Comparative Literature; Culture and Theory*

Michael D. Lee, Ph.D. University of Adelaide, *Professor of Cognitive Sciences* (computational models and bayesian methods in decision making, representation, categorization, individual differences, and the wisdom of the crowd)

Ying-Ying Lee, Ph.D. University of Wisconsin-Madison, *Assistant Professor of Economics*

Karen Leonard, Ph.D. University of Wisconsin, *Professor Emeritus of Anthropology; Religious Studies*

Julia C. Lerch, Ph.D. Stanford University, *Assistant Professor of Sociology* (sociology of education, global and transnational sociology, civic education, humanitarian emergencies, international organizations)

Ines Levin, Ph.D. California Institute of Technology, *Assistant Professor of Political Science* (elections, voting, statistics)

Mimi Liljeholm, Ph.D. University of California, Los Angeles, *Assistant Professor of Cognitive Sciences* (neural and computational bases of learning, reasoning, and decision making)

Erin Lockwood, Ph.D. Northwestern University, *Assistant Professor of Political Science* (financial derivatives, financial regulation, international political economy, political theory, risk and uncertainty)

Elizabeth F. Loftus, Ph.D. Stanford University, *UCI Distinguished Professor of Psychological Science; Cognitive Sciences; Criminology, Law and Society; School of Law* (cognitive psychology, human memory, psychology and law)

Radhika Lunawat, Ph.D. University of Minnesota, *Assistant Professor of Paul Merage School of Business; Economics*

Cecelia M. Lynch, Ph.D. Columbia University, *Professor of Political Science; Religious Studies* (international relations (theory, organization, law) religion and ethics, social movements and civil society actors (on peace, security, globalization, humanitarianism, and religion)

David C. Lyon, Ph.D. Vanderbilt University, *Department Vice Chair and Associate Professor of Anatomy and Neurobiology; Cognitive Sciences*

Lilith Mahmud, Ph.D. Harvard University, *Associate Professor of Anthropology* (freemasonry, elites, gender, nationalism, race, citizenship, critical studies of Europe, secrecy, transparency, knowledge production, secret societies, power)

David B. Malament, Ph.D. The Rockefeller University, *Professor Emeritus of Logic and Philosophy of Science*

John Manchak, Ph.D. University of California, Irvine, *Professor of Logic and Philosophy of Science; Religious Studies*

George E. Marcus, Ph.D. Harvard University, *Distinguished Professor of Anthropology* (elites, ethnography, cultural critique, Pacific)

Raffaele Mari, M.A. San Diego State University, *Lecturer of Economics*

Richard Matthew, Ph.D. Princeton University, *Professor of Urban Planning and Public Policy; Political Science*

William M. Maurer, Ph.D. Stanford University, *Dean of the School of Social Sciences and Professor of Anthropology; Criminology, Law and Society; School of Law* (anthropology of law, globalization, Caribbean, anthropology of money and finance, gender and kinship)

Shampa Mazumdar, Ph.D. Northeastern University, *Lecturer of Sociology; Religious Studies* (religion, immigration, Asian American, urban sociology)

Michael T. McBride, Ph.D. Yale University, *Professor of Economics; Logic and Philosophy of Science; Religious Studies*

Philip McCarty, Ph.D. University of California, Santa Barbara, *Associate Professor of Teaching of Global and International Studies*

James L. McGaugh, Ph.D. University of California, Berkeley, *Research Professor and Professor Emeritus of Neurobiology and Behavior; Logic and Philosophy of Science*

Martin C. McGuire, Ph.D. Harvard University, *UCI Endowed Chair and Professor Emeritus of Economics*

Mary McThomas, Ph.D. University of California, Los Angeles, *Associate Professor of Political Science* (immigration, theories of citizenship, feminist political theory, gender and politics)

Toby Meadows, Ph.D. University of Melbourne, *Assistant Professor of Logic and Philosophy of Science*

Sara Mednick, Ph.D. Harvard University, *Associate Professor of Cognitive Sciences* (memory consolidation, sleep, pharmacology, aging, brain stimulation)

James W. Meeker, J.D., Ph.D. State University of New York at Buffalo, *Professor Emeritus of Criminology, Law and Society; Sociology* (sociology of law, criminal justice, research methodology, statistics, access to civil justice)

Richard Mendelsohn, Ph.D. Massachusetts Institute of Technology, *Adjunct Professor of Logic and Philosophy of Science*

Carrie Menkel-Meadow, J.D. University of Pennsylvania, *UCI Chancellor's Professor of Political Science; School of Law*

David S. Meyer, Ph.D. Boston University, *Professor of Sociology; Political Science; Urban Planning and Public Policy* (social movements, public policy, peace and war, social justice)

John Middlebrooks, Ph.D. University of California, San Francisco, *Professor of Otolaryngology; Biomedical Engineering; Cognitive Sciences; Neurobiology and Behavior*

Fabio Milani, Ph.D. Princeton University, *Professor of Economics*

Kristen R. Monroe, Ph.D. University of Chicago, *UCI Chancellor's Professor of Political Science* (ethics, international relations, political and moral psychology, normative political theory, politics of difference, conflict resolution)

Michael J. Montoya, Ph.D. Stanford University, *Professor Emeritus of Anthropology*

Alejandro Morales, Ph.D. Rutgers, The State University of New Jersey, *Professor Emeritus of Chicano/Latino Studies* (Latin American and Chicano literature, film studies)

Keith Murphy, Ph.D. University of California, Los Angeles, *Associate Professor of Anthropology* (linguistics, design, aesthetics and morality, Sweden)

Sylvia Nam, Ph.D. University of California, Berkeley, *Assistant Professor of Anthropology; Biological Chemistry; Urban Planning and Public Policy* (urban studies, property, transnational expertise, Southeast Asia)

Louis E. Narens, Ph.D. University of California, Los Angeles, *Professor of Cognitive Sciences; Logic and Philosophy of Science* (measurement, logic, metacognition)

Emre Neftci, Ph.D. University of Zurich, *Assistant Professor of Cognitive Sciences; Computer Science* (computational neuroscience, neuromorphic engineering, machine learning)

David Neumark, Ph.D. Harvard University, *Distinguished Professor of Economics; Paul Merage School of Business*

Riley D. Newman, Ph.D. University of California, Berkeley, *Professor Emeritus of Physics and Astronomy; Logic and Philosophy of Science; Physics and Astronomy*

Walter Nicholls, Ph.D. University of California, Los Angeles, *Associate Professor of Urban Planning and Public Policy; Sociology* (urban sociology, politics and policy, social movements, immigration, comparative urbanism, theory, planning conflicts)

Andrew Noymer, Ph.D. University of California, Berkeley, *Associate Professor of Program in Public Health; Sociology*

Cailin O'Connor, Ph.D. University of California, Irvine, *Associate Professor of Logic and Philosophy of Science*

Gustavo Oliveira, Ph.D. University of California, Berkeley, *Assistant Professor of Global and International Studies*

Kevin E. Olson, Ph.D. Northwestern University, *Professor of Political Science; Culture and Theory; European Languages and Studies* (political theory, history of political thought, legal theory, philosophy of the social sciences)

Valerie A. Olson, Ph.D. Rice University, *Associate Professor of Anthropology* (environmental systems, science and technology, U.S., extreme environments)

Emily Owens, Ph.D. University of Maryland at College Park, *Professor of Criminology, Law and Society; Economics* (how government policies affect the prevalence of criminal activity as well as how agents within the criminal justice system, particularly police, prosecutors, and judges, respond to policy changes)

Lisa Pearl, Ph.D. University of Maryland, College Park, *Professor of Language Science; Cognitive Sciences; Logic and Philosophy of Science* (language development, linguistics, computational sociolinguistics, cognitive modeling)

Andrew Penner, Ph.D. University of California, Berkeley, *UCI Chancellor's Fellow and Professor of Sociology* (gender, inequality, education, family, race)

Megan Peters, Ph.D. University of California, Los Angeles, *Assistant Professor of Cognitive Sciences* (perception, metacognition, consciousness, computational modeling, computational cognitive neuroscience)

Kristin Peterson, Ph.D. Rice University, *Associate Professor of Anthropology* (science and technology, feminism, pharmaceuticals, West Africa)

Bojan M. Petrovic, Ph.D. University of California, Irvine, *Lecturer of Social Sciences*

Davin Phoenix, Ph.D. University of Michigan, *Assistant Professor of Political Science* (racial attitudes, affect and behavior, public opinion, political communication, urban politics, mobilization of marginalized groups)

Zygmunt Pizlo, Ph.D. University of Maryland at College Park, *Falmagne Endowed Chair and Professor of Cognitive Sciences* (human and machine vision, 3D shape, symmetry, virtual reality, robotics, problem solving)

Dale J. Poirier, Ph.D. University of Wisconsin-Madison, *Professor Emeritus of Economics*

Francesca Polletta, Ph.D. Yale University, *Professor of Sociology* (social movements, democracy, culture, sociology of law, political sociology, social theory)

Henry N. Pontell, Ph.D. State University of New York at Stony Brook, *Professor Emeritus of Criminology, Law and Society; Sociology* (white-collar and corporate crime, criminology, criminal justice, deviance and social control, sociology of law)

Charles C. Ragin, Ph.D. University of North Carolina at Chapel Hill, *UCI Chancellor's Professor of Sociology* (comparative and historical sociology, social inequality, political sociology, quantitative methodology, qualitative methodology)

Vibhuti Ramachandran, Ph.D. New York University, *Assistant Professor of Global and International Studies; Criminology, Law and Society*

Maria G. Rendón, Ph.D. Harvard University, *Assistant Professor of Urban Planning and Public Policy; Sociology* (urban sociology, immigration, race/ethnicity, sociology of education and social policy)

Virginia Richards, Ph.D. University of California, Berkeley, *Professor of Cognitive Sciences* (auditory perception and cognition, human psychophysics)

Gary Richardson, Ph.D. University of California, Berkeley, *Professor of Economics; Religious Studies*

Justin Richland, Ph.D. University of California, Los Angeles, *Associate Professor of Anthropology* (legal discourse analysis and semiotics, anthropology of law; contemporary native American law, politics, art, and ethnographic museology)

Ty Robbins, Ph.D. University of California, Santa Barbara, *Lecturer of Economics*

Belinda Robnett, Ph.D. University of Michigan, *Professor of Sociology* (social movements, race and ethnicity, gender, social change, African Americans)

Guillaume Rocheteau, Ph.D. University of Paris, *Professor of Economics*

Jose Antonio Rodriguez Lopez, Ph.D. University of California, Berkeley, *Associate Professor of Economics*

A. K. Romney, Ph.D. Harvard University, *Professor Emeritus of Anthropology*

Rocio Rosales, Ph.D. University of California, Los Angeles, *Assistant Professor of Sociology; Chicano/Latino Studies* (international migration, immigrant and ethnic economics, urban sociology, ethnography, Latino/a studies, race and ethnicity, immigrant detention)

Ana Rosas, Ph.D. University of Southern California, *Associate Professor of Chicano/Latino Studies; History* (Chicana/o comparative history, immigration, ethnicity)

Shawn W. Rosenberg, M.Litt. University of Oxford, *Professor of Political Science* (political psychology, deliberative democracy, ideology, social theory, social and development psychology)

Lauren Ross, Ph.D. University of Pittsburgh, *Assistant Professor of Logic and Philosophy of Science*

Jeffrey Rouder, Ph.D. University of California, Irvine, *Falmagne Endowed Chair and Professor of Cognitive Sciences* (mathematical and statistical models of perception and cognition, bayesian mixed models, psychometrics)

Vicki L. Ruiz, Ph.D. Stanford University, *Professor Emeritus of History; Chicano/Latino Studies* (Chicana/Latina history, U.S. labor, immigration, gender)

Ruben G. Rumbaut, Ph.D. Brandeis University, *Distinguished Professor of Sociology; Chicano/Latino Studies; Criminology, Law and Society; Education* (international migration, immigration laws, criminalization, incarceration, social inequality and mobility, race and ethnicity)

Donald G. Saari, Ph.D. Purdue University, *UCI Distinguished Professor Emeritus of Economics; Logic and Philosophy of Science; Mathematics*

Kourosh Saberi, Ph.D. University of California, Berkeley, *Professor of Cognitive Sciences* (conscious systems, evolutionary game theory, nature of reality, machine learning, artificial intelligence)

Kamal Sadiq, Ph.D. University of Chicago, *Associate Professor of Political Science* (comparative politics, immigration and citizenship in developing countries, India and southeast Asia, Asian security)

Jean-Daniel M. Saphores, Ph.D. Cornell University, *Professor of Civil and Environmental Engineering; Economics; Urban Planning and Public Policy* (transportation and environmental systems (with a focus on air pollution and energy use), travel behavior analysis, alternative fuel vehicles, automated vehicles, transit use, sustainable infrastructure management, and decision making under uncertainty using real options)

Barbara W. Sarnecka, Ph.D. University of Michigan, *Professor of Cognitive Sciences; Logic and Philosophy of Science* (cognitive development, language development, number concepts, conceptual change, individual cognitive development, historical development of science and mathematics)

George Sarraf, Ph.D. Claremont Graduate University, *Lecturer of Economics*

David Schaefer, Ph.D. University of Arizona, *Associate Professor of Sociology* (social networks, social psychology, criminology, health, human development)

Evan Schofer, Ph.D. Stanford University, *Professor of Sociology* (comparative political sociology, sociology of education, quantitative methods and statistics, globalization, sociology of the environment, organizations, sociology of science)

William R. Schonfeld, Ph.D. Princeton University, *Professor Emeritus of Political Science*

Jonas Schultz, Ph.D. Columbia University, *Professor Emeritus of Physics and Astronomy; Logic and Philosophy of Science*

Tonya L. Schuster, Ph.D. University of California, Riverside, *Lecturer of Sociology* (sociology of medicine and alternative medicine, social relationships and health social psychology, research design)

Gabriele M. Schwab, Ph.D. University of Konstanz, *UCI Chancellor's Professor of Comparative Literature; Anthropology; Culture and Theory; English; European Languages and Studies; German* (modern literature, critical theory, psychoanalysis, comparative literature)

Sherilyn K. Sellgren, M.B.A. University of California, Irvine, *Lecturer of Political Science*

Caesar D. Sereseres, Ph.D. University of California, Riverside, *Associate Professor of Political Science* (U.S. foreign policy, U.S. Latin American relations, Mexican-American politics)

Gregory Shaffer, J.D. Stanford University, *Director, Center of Globalization, Law and Society and UCI Chancellor's Professor of School of Law; Political Science*

Nilopa Shah, Ph.D. University of California, Irvine, *Lecturer of Economics*

Paul R. Shirey, Ph.D. University of California, Irvine, *Lecturer of Social Sciences; Economics*

Stergios Skaperdas, Ph.D. Johns Hopkins University, *Clifford S. Heinz Chair and Professor of Economics; Political Science*

Brian Skyrms, Ph.D. University of Pittsburgh, *UCI Distinguished Professor of Logic and Philosophy of Science; Economics; Philosophy*

Kenneth A. Small, Ph.D. University of California, Berkeley, *Professor Emeritus of Economics*

Charles Smith, Ph.D. University of California, San Diego, *Professor of Political Science; Criminology, Law and Society* (law and legal institutions, comparative and international law)

David A. Smith, Ph.D. University of North Carolina at Chapel Hill, *Professor of Sociology; Urban Planning and Public Policy* (world systems analysis, urbanization, development, comparative-historical sociology, dependent development in east Asia)

David A. Snow, Ph.D. University of California, Los Angeles, *Professor Emeritus of Sociology* (collective behavior, protest and social movements, framing processes, social psychology and culture, homelessness and social problems, qualitative methods)

Damien Sojoyner, Ph.D. University of Texas at Austin, *Associate Professor of Anthropology; Culture and Theory* (prisons; public education; urban anthropology; race; African diaspora theory; public policy and law; gender; United States)

Etel Solingen, Ph.D. University of California, Los Angeles, *Thomas T. and Elizabeth C. Tierney Chair in Global Peace and Conflict Studies and Professor of Political Science* (international relations theory, international political economy, international cooperation, macropolitics/institutions, comparative politics, world politics and regional orders)

Dorothy J. Solinger, Ph.D. Stanford University, *Professor Emeritus of Political Science* (Chinese domestic politics and political economy, comparative politics, East Asian politics)

Ramesh Srinivasan, Ph.D. Tulane University, *Department Chair and Professor of Cognitive Sciences; Biomedical Engineering* (perception, attention, decision-making, cognitive and clinical neuroscience)

P. Kyle Stanford, Ph.D. University of California, San Diego, *Professor of Logic and Philosophy of Science; Philosophy*

Judith Stepan-Norris, Ph.D. University of California, Los Angeles, *Professor of Sociology* (labor unions, sociology of work, political sociology, American society, research methods, historical-comparative methods, class formation)

Hal S. Stern, Ph.D. Stanford University, *UCI Chancellor's Professor of Statistics; Cognitive Sciences*

Mark Steyvers, Ph.D. Indiana University, *Professor of Cognitive Sciences; Computer Science; Psychological Science* (higher-order cognition, cognitive neuroscience, computational modeling, collective intelligence)

Ian Straughn, Ph.D. University of Chicago, *Assistant Professor of Teaching of Anthropology; Religious Studies* (archaeology, cultural heritage, middle east and Islamic studies, space and landscape, material culture)

Sabrina Strings, Ph.D. University of California, San Diego, *Assistant Professor of Sociology* (race, gender, embodiment, sociology of medicine, sociology of media)

Yang Su, Ph.D. Stanford University, *Associate Professor of Sociology* (social movements and collective action, political sociology, China's political transition)

Naomi Sugie, Ph.D. Princeton University, *Associate Professor of Criminology, Law and Society; Sociology* (sociology of crime and punishment, inequality, families, demography, methods, new technologies for data collection)

Eric Swanson, Ph.D. Stanford University, *Professor of Economics*

Bryan Sykes, Ph.D. University of California, Berkeley, *Associate Professor of Criminology, Law and Society; Program in Public Health; Sociology* (demography, criminology, research methods, health, social inequality, statistics)

Rein Taagepera, Ph.D. University of Delaware, *Professor Emeritus of Political Science*

Shauhin A. Talesh, J.D., Ph.D. University of Connecticut, University of California, Berkeley, *Director, Law and Graduate Studies Program and Professor of School of Law; Criminology, Law and Society; Sociology*

Michael Tesler, Ph.D. University of California, Los Angeles, *Associate Professor of Political Science* (American politics, race, ethnicity and politics, quantitative methods)

Danielle M. Thomsen, Ph.D. Cornell University, *Assistant Professor of Political Science* (American politics, U.S. congress, political parties, gender and politics)

Hector Tobar, M.F.A. University of California, Irvine, *Associate Professor of Chicano/Latino Studies; English* (storytelling, literature, history of Los Angeles, Latin American history, Latino history)

Keith Topper, Ph.D. University of California, Los Angeles, *Associate Professor of Political Science; Culture and Theory* (political theory, critical theory, poststructuralism, theories of power, language and politics, theory and politics of interpretation, politics of culture, philosophy of the social sciences)

Rodolfo D. Torres, Ph.D. Claremont Graduate University, *Professor of Urban Planning and Public Policy; Political Science*

Judith Treas, Ph.D. University of California, Los Angeles, *UCI Chancellor's Professor of Sociology* (gender, inequality, family, aging and life course, social demography)

Kristin E. Turney, Ph.D. University of Pennsylvania, *Associate Professor of Sociology; Criminology, Law and Society* (social inequality, family demography, population health, incarceration and punishment, intergenerational transmission of disadvantage, child well-being)

Carole J. Uhlaner, Ph.D. Harvard University, *Professor Emeritus of Political Science* (comparative political behavior, formal theory/social choice)

Robert M. Uriu, Ph.D. Columbia University, *Associate Professor of Political Science* (international relations, international political economy, international politics of East Asia/Japan, U.S. foreign policy toward East Asia)

Alfonso Valdez, Ph.D. University of Southern California, *Lecturer of Social Sciences*

Joachim S. Vandekerckhove, Ph.D. University of Leuven, *Associate Professor of Cognitive Sciences; Statistics* (response time modeling, model fitting, computational statistics, psychometrics, bayesian statistics)

Roxanne Varzi, Ph.D. Columbia University, *Professor of Anthropology; Culture and Theory; Film and Media Studies; Religious Studies; Visual Studies* (Iran, media, war, visual anthropology, film studies, ethnographic and fiction writing)

Irene I. Vega, Ph.D. University of California, Los Angeles, *Assistant Professor of Sociology* (international migration, socio-legal studies, race/ethnicity, educational inequality)

Samantha Vortherms, Ph.D. University of Wisconsin, Madison, *Assistant Professor of Political Science* (comparative political economy, development, social welfare)

Linda T. Vö, Ph.D. University of California, San Diego, *Professor of Asian American Studies; Culture and Theory; Sociology; Urban Planning and Public Policy* (race and ethnic relations, immigrants and refugees, gender relations, community and urban studies)

Wilima Wadhwa, Ph.D. University of California, Irvine, *Lecturer of Economics*

Feng Wang, Ph.D. University of Michigan, *Professor of Sociology* (contemporary demographic, economic, and social processes, social inequality in state socialisms, contemporary China)

Martin P. Wattenberg, Ph.D. University of Michigan, *Professor of Political Science* (American and comparative political behavior)

James O. Weatherall, Ph.D. Stevens Institute of Technology, *Professor of Logic and Philosophy of Science*

Kai Wehmeier, Ph.D. University of Münster, *Director, Center for the Advancement of Logic, its Philosophy, History, and Applications and Professor of Logic and Philosophy of Science; Language Science; Philosophy*

Douglas R. White, Ph.D. University of Minnesota, *Professor Emeritus of Anthropology*

Daniel Whiteson, Ph.D. University of California, Berkeley, *Professor of Physics and Astronomy; Logic and Philosophy of Science*

Christopher A. Whytock, J.D. Georgetown University, *Professor of School of Law; Political Science*

Kirk Williams, Ph.D. University of Arizona, *Professor of Criminology, Law and Society; Sociology* (family violence, youth violence, homicide studies, risk assessment, violence prevention program evaluation)

Tiffany Willoughby-Herard, Ph.D. University of California, Santa Barbara, *Associate Professor of African American Studies; Comparative Literature; Culture and Theory; Political Science* (South Africa, poor whites, race in foreign policy, diaspora, comparative racial politics, third world feminisms, feminist pedagogy, black political thought)

Charles E. Wright, Ph.D. University of Michigan, *Associate Professor of Cognitive Sciences* (cognitive psychology, human motor control, fitts task, aimed movements, handwriting, immersive virtual reality, 1/f noise, quantitative models)

Valerie L. Wright, Ph.D. Fuller Theological Seminary, *Lecturer of Social Sciences*

Martin Zeman, Ph.D. Humboldt University of Berlin, *Professor of Mathematics; Logic and Philosophy of Science* (logic and foundations)

Fan-Gang Zeng, Ph.D. Syracuse University, *Director of Hearing Research and Professor of Otolaryngology; Anatomy and Neurobiology; Biomedical Engineering; Cognitive Sciences*

Mei Zhan, Ph.D. Stanford University, *Associate Professor of Anthropology* (medical anthropology, cultural and social studies of science, globalization, transnationalism, gender, China and United States)

## Anthropology Courses

### **ANTHRO 2A. Introduction to Sociocultural Anthropology. 4 Units.**

Introduction to cultural diversity and the methods used by anthropologists to account for it. Family relations, economic activities, politics, gender, and religion in a wide range of societies. Stresses the application of anthropological methods to research problems.

(III and VIII ).

### **ANTHRO 2B. Introduction to Biological Anthropology. 4 Units.**

Evolutionary theory and processes, comparative primate fossil record, human variation, and the adequacy of theory, and empirical data.

(III)

### **ANTHRO 2C. Introduction to Archaeology. 4 Units.**

Archaeological theory and cultural processes with emphasis on the American Southwest, Mesoamerica, and Mesopotamia.

(III)

**ANTHRO 2D. Introduction to Language and Culture. 4 Units.**

Explores what the study of language can reveal about ourselves as bearers of culture. After introducing some basic concepts, examines how cultural knowledge is linguistically organized and how language might shape our perception of the world.

Same as LSCI 68.

(III)

**ANTHRO 10A. Probability and Statistics. 4 Units.**

An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Same as SOCIOL 10A.

Overlaps with PSYCH 10A, SOCECOL 13, SOC SCI 10A, POL SCI 10A.

Restriction: Anthropology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

(Va)

**ANTHRO 10B. Probability and Statistics. 4 Units.**

An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10A or ANTHRO 10A

Same as SOCIOL 10B.

Overlaps with PSYCH 10B, SOCECOL 13, SOC SCI 10B, POL SCI 10B.

Restriction: Anthropology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

(Va)

**ANTHRO 10C. Probability and Statistics. 4 Units.**

An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10B or ANTHRO 10B

Same as SOCIOL 10C.

Overlaps with PSYCH 10C, SOCECOL 13, SOC SCI 10C, POL SCI 10C.

Restriction: Anthropology Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

(Vb)

**ANTHRO 20A. People, Cultures, and Environmental Sustainability. 4 Units.**

Anthropological consideration of global environmental sustainability from the perspective of human cultures and communities. Causes and consequences of population growth, natural resource management, environmental law, environmental ethics. Case studies emphasize tropical rain forests, arid lands of Africa and North America.

(VIII)

**ANTHRO 25A. Environmental Injustice. 4 Units.**

Explores how pollution, climate change, and other environmental problems impact people around the world, often worsening social inequality. Students use social science frameworks to understand environmental problems, different interpretations of these problems, and how people have organized for political change.

(III and VII ).

**ANTHRO 30A. Global Issues in Anthropological Perspective. 4 Units.**

Explores anthropological perspectives on issues of importance in an increasingly global society. Topics include emphases on ethnic conflict; identity; immigration and citizenship; religion and religious diversity; medical anthropology; legal anthropology; development and economic change; gender.

Restriction: Anthropology Majors have first consideration for enrollment.

(VIII)

**ANTHRO 30C. Visual Anthropology . 4 Units.**

Focusing on the construction of culture through visibility, this course engages traditional ethnographic films, popular media and anthropological texts to analyze ethics, "reality" and fiction; propaganda and documentary, construction of a frame, the responsibility of the filmmaker, photographer, and anthropologist.

**ANTHRO 41A. Global Cultures and Society. 4 Units.**

Offers a general overview of the rise of global interdependence in political, economic, demographic, and cultural terms. Considers what drove people from relative isolation into intensified intercourse with one another, and investigates the consequences of this shift.

Same as INTL ST 11.

Restriction: Anthropology Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(III and VIII ).

**ANTHRO 45A. Science, Culture, Power. 4 Units.**

Examines science in historical and cultural context (Scientific and Darwinian Revolutions, Manhattan Project, contemporary biosciences) to understand scientific truths and their limits, scientists as social actors, and vital intersections of sciences with religion, politics, gender, and other forms of culture.

(III)

**ANTHRO 48. Archaeology or Aliens?: Conspiracy, Pseudoscience, and the Emergence of Civilizations. 4 Units.**

Archaeology has inspired (and sometimes actively encouraged) various theories about aliens, lost civilizations, dark conspiracies, and mysterious technologies. Does such an intimate relationship with these fantastic notions undermine archaeology and its claims of authoritative knowledge about past cultures.

(III and VIII ).

**ANTHRO 89. Special Topics in Anthropology. 1-4 Units.**

Studies in selected areas of Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 100A. Ethnography and Anthropological Methods. 4 Units.**

Anthropological research, learning ethnographic methods, and how to choose a research topic, construct research questions, explore library resources, collect data, and write an analytical paper on research findings.

Prerequisite or corequisite: ANTHRO 2A

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment. Medical Anthropology Minors have first consideration for enrollment.

**ANTHRO 100B. Anthropology Careers. 4 Units.**

Gives students the skills and perspective needed to leverage undergraduate anthropology education in diverse career domains. Students explore different career domains (health care, tech development, environmental governance, etc.) and learn to represent themselves professionally.

Restriction: Anthropology Majors only. Anthropology Minors only. Medical Anthropology Minors only.

**ANTHRO 121AW. Kinship and Social Organization. 4 Units.**

Organization of social life primarily in preindustrial societies. Theories of kinship, marriage regulations, sexual behavior, and social roles. Comparisons of biological, psychological, sociological, and economic explanations of social organization.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**ANTHRO 121D. Cross-Cultural Studies of Gender. 4 Units.**

Explores the construction of gender in national and transnational contexts. Special attention is given to how race, sexuality, class, and global inequalities shape different experiences of gender, and how gender structures political, institutional, and social life across the world.

Same as INTL ST 153B.

(VII)

**ANTHRO 121G. Political Anthropology. 4 Units.**

Utilizes anthropological accounts of Western and non-Western societies to question conventional ways of thinking about power and politics. Classical traditions in political anthropology are critiqued; an alternative view is presented through recent anthropological political analyses of various topics.

**ANTHRO 121J. Urban Anthropology. 4 Units.**

Cultural roles of urban centers and processes of urbanization in comparative perspective, focusing on both nonwestern, nonindustrial societies of past and present; the relationship between modern urban centers and Third World peoples. Migration, urban poverty, in Africa, Asia, Latin America.

Same as INTL ST 153C.

**ANTHRO 124. Gold: The Alchemy of Socio-Economic Practice. 4 Units.**

Before bitcoin, before derivatives and mortgage-backed securities, before even writing itself, there was gold. Explore gold's role in the development of culture, politics, and power. From Pharaohs to modern financial wizards, gold has impacted and mediated social life.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment. Archaeology Minors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Economics Minors have first consideration for enrollment.

**ANTHRO 125. Anthropology of Debt. 4 Units.**

Explores how debt has shaped culture across varied contexts geographically and historically. In what ways have societies naturalized indebtedness, taken it for granted as a fact of life, and used it for organizing social relations.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment. Archaeology Minors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Economics Minors have first consideration for enrollment.

**ANTHRO 125A. Economic Anthropology. 4 Units.**

Economic systems in comparative perspective: production, distribution, and consumption in market and non-market societies; agricultural development in the third world.

Prerequisite: One course in general science, anthropology, economics, geography, or sociology.

Same as ECON 152A.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment. Anthropology Majors have first consideration for enrollment.

**ANTHRO 125B. Ecological Anthropology. 4 Units.**

Studies relationships between human communities and their natural environments. The role of environment in shaping culture; effects of extreme environments on human biology and social organization; anthropologist's role in studying global environmental problems, e.g., African famine, tropical rain forests destruction.

Prerequisite: ANTHRO 2A or ANTHRO 2B or ANTHRO 2C

**ANTHRO 125C. Environmental Anthropology. 4 Units.**

Introduces students to anthropological and qualitative research on the relationship of humans, non-humans, and environments. Focuses on how to analyze and evaluate social and cultural differences in environmental perception, relations, justice, governance, sustainability, and cosmology.

Prerequisite: ANTHRO 2A or ANTHRO 2B or ANTHRO 2C or ANTHRO 2D

**(III)**

**ANTHRO 125F. Humans and Other Animals. 4 Units.**

Explores peoples' relationships with other animals, a topic that continues to shape anthropological understandings of humanness, culture, and the social. Subthemes: symbol and matter, nature/culture, ontologies, relations, moralities, ecologies, futures.

Prerequisite: ANTHRO 2A or ANTHRO 2B or ANTHRO 2D

**ANTHRO 125S. The Anthropology of Money. 4 Units.**

Anthropological approaches to money; impact of money on subsistence economies; cultural history of money; and modern transformations of money. Students conduct ethnographic research on alternative money practices in Southern California, and create an online exhibition and research paper.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 125U. Immigration, Nation, and Media. 4 Units.**

Examines media shapes and reflects public opinion on immigration and its representation of immigrants, citizens, and ideas about the nation, and who belongs and who is a potential threat; as well as the relationship between scholars and journalists.

Same as CHC/LAT 123, SPPS 101A.

**ANTHRO 125X. Transnational Migration. 4 Units.**

Examines the movement of people across national borders, governmentality and the role of state practices to control populations, and issues of citizenship, belonging, and identity. Examples are drawn from the United States, Europe, Latin America, Asia, and Africa.

Same as CHC/LAT 161, INTL ST 117A.

**(VIII)****ANTHRO 125Z. Islam in America. 4 Units.**

Offers a critical academic study of Islam in America, focusing on the core tenets of belief, the diversity of practices, and historical transformations that have taken place since the arrival of Muslims in the United States.

Same as ASIANAM 142.

**ANTHRO 126. Cultures of the Middle East. 4 Units.**

The diversity of cultures and peoples who constitute the Middle East demonstrates the failure of much contemporary media and discourse to understand this region. Students learn about the broad scope of the contemporary Middle East through an ethnographic lens.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment.

**ANTHRO 126A. Elite Cultures. 4 Units.**

The distinctive contribution that ethnographic studies have made to the understanding of elites past and present, in particular societies and globally.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 127. Controversies, Courts, Cultures: The Anthropology of Law. 4 Units.**

Assesses the contributions anthropology has made to legal scholarship, reviewing historical and contemporary themes. Considers both comparative questions of law's norms, structures, and practices around the globe, and the specific insights anthropology offers about contemporary U.S. law.

Same as CRM/LAW C183.

**(III)****ANTHRO 127A. Law and Modernity. 4 Units.**

The rise and spread of Enlightenment legal traditions, social contract theory, individual rights, ideologies of 'liberty, equality, fraternity'; contradictions of liberal law, its understandings of 'primitive' and 'civilized'; pervasive myths of property, difference, race, and rights. Reading- and writing-intensive.

Same as CRM/LAW C191.

**ANTHRO 127B. Global Migrations, Anthropology, and the Law. 4 Units.**

Course explores how cultural contexts and national laws frame migration, and define categories of migrants, families, and people. Topics include illegality, transnational families, refugees and economic migrants, labor conditions, deportation practices, discipline and crime, citizenship controversies, and nativism.

**ANTHRO 128A. Science, Technology, Controversy. 4 Units.**

Explores ways in which the social sciences conceive of science as a sociocultural practice. Emphasis on literature in Science and Technology Studies (STS), especially writings that concern the relationship of science to space and place, power, and politics.

Restriction: Anthropology Majors only.

**ANTHRO 128B. Race, Gender, and Science. 4 Units.**

Perfect for pre-health, science and social science majors wanting to appreciate how science and society interact. Race and gender as biological and socio-cultural constructs are examined. Questions explored: What is disease? What is science? What are social and biological differences.

Same as CHC/LAT 176.

**(VII)**

**ANTHRO 128C. Digital Cultures . 4 Units.**

Explores cultural and political implications of the infotech revolution and the ways new media are used around the world, new cultural practices and spaces (e.g., cybercafes), debates surrounding the meanings of these new technologies, and their implications for transforming society.

Prerequisite: ANTHRO 2A and (ANTHRO 2B or ANTHRO 2C or ANTHRO 2D)

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 129. Special Topics: Social and Economic Anthropology. 1-4 Units.**

Studies in selected areas of Social and Economic Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 132A. Psychological Anthropology. 4 Units.**

Cultural differences and similarities in personality and behavior. Child-rearing practices and consequent adult personality characteristics, biocultural aspects of child development and attachment, culture and behavior evolutionary models, politically linked personality, cognitive anthropology, psychology of narrative forms, comparative national character studies.

Prerequisite: ANTHRO 2A or PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)

Same as PSYCH 173A.

Restriction: Psychology Majors have first consideration for enrollment.

**ANTHRO 134A. Medical Anthropology. 4 Units.**

Introduces students to cross-cultural perspectives and critical theories in anthropological studies of medicine. Special attention is given to diverse ways of understanding bodies, illnesses, and therapeutic practices in our changing world.

Same as CHC/LAT 178A.

**(VIII)**

**ANTHRO 134B. Cultures of Biomedicine. 4 Units.**

An introduction to the anthropological study of biomedicine and biotechnology. Topics include medicalization, experimentation and discovery, diagnosis, expertise, health activism, and biotechnology.

**ANTHRO 134C. Medicine, Food, and Health. 4 Units.**

With anthropological studies of edible things as its foundation, this course explores topics related to the relationship between medical knowledge, eating, and health from a medical anthropological perspective.

Prerequisite: ANTHRO 2A or ANTHRO 2B or ANTHRO 2D

**ANTHRO 134F. Anthropology of the Body. 4 Units.**

Examines human bodies as both biological and sociocultural entities and explores the relationship among mind, body, and society cross-culturally. Topics include embodiment; race, sex, gender, and the body; somatization; control of the body; commodified bodies; and hybrid/cyborg bodies.

**ANTHRO 134G. HIV/AIDS in a Global Context. 4 Units.**

Examines issues concerning cultural conceptions of HIV infection and disease worldwide. Topics include treatment and prevention, identity and behavior, risk, ethnicity, gender, youth, sexuality, activism, drug use, illness, religion, the clinical encounter, national belonging, and the pharmaceutical industry.

**(VIII)**

**ANTHRO 134H. Anthropology of Food. 4 Units.**

Examines how food communicates ideas about ethnocentrism, disgust, privilege, gender, race, labor, social identities and hierarchies, globalization, power, and the 'Western diet' and its health consequences.

Same as CHC/LAT 118.

**ANTHRO 134N. Disease, Health, and Inequality. 4 Units.**

Examines the relationships among disease, health, and social inequality in the U.S. and globally. Topics include infectious and chronic disease case studies, health policy, and strategies for promoting health equity.

**ANTHRO 135A. Religion and Social Order. 4 Units.**

An anthropological exploration of religious belief and practices in diverse social and historical contexts. Emphasis placed on selected non-western traditions of the sacred, and on issues of power, ritual, moral order, and social transformation.

**ANTHRO 136A. Nationalism and Ethnicity in the Contemporary World. 4 Units.**

An exploration of the concepts of identity, culture, ethnicity, race, and nation through ethnographic cases, with a view to asking larger questions: how do people create nativeness and foreignness? How does 'culture' get worked into contemporary racisms and nationalisms.

Same as INTL ST 153E.

**(VIII)****ANTHRO 136B. History of Anthropological Theory. 4 Units.**

Provides foundational knowledge in the discipline of anthropology by reviewing competing approaches in anthropological theory, from the nineteenth century to the present. Covers historically fundamental approaches—social evolutionism, functionalism—and recent movements such as feminism, cultural studies, poststructuralism, and postmodernism.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 136D. Conflict Resolution in Cross-Cultural Perspective. 4 Units.**

Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as POL SCI 154G, SOC SCI 183E, INTL ST 183E.

**(VIII)****ANTHRO 136G. Colonialism and Gender. 4 Units.**

An anthropological enquiry into the ways colonial relations of power have been structured and gendered throughout the world, and to what effect. Examines the social locations of men and women in the everyday exercise of colonial and imperial power.

Same as INTL ST 153D.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 136K. The Woman and the Body. 4 Units.**

Probes culture and politics of the female body in contemporary American life. Focusing on 'feminine beauty,' examines diverse notions of beauty, bodily practices, and body politics embraced by American women of different classes, ethnicities, and sexualities.

**(VII)****ANTHRO 138. Prisons and Public Education. 4 Units.**

Looks at the connections between schools and prisons in the United States. Students learn about ideas that push beyond common trope of the "school to prison pipeline."

Same as AFAM 159.

**ANTHRO 139. Special Topics in Cultural and Psychological Anthropology. 1-4 Units.**

Studies in selected areas of Cultural and Psychological Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 140. Sex and Conquest in Latin America. 4 Units.**

Competing ideas of masculinity and femininity, sexual violence, sexual identities, and gendered hierarchies informed how the Spanish engaged in military and religious domination of Mexican and Andean communities, as well as the forms of native resistance throughout colonial Latin America.

Same as HISTORY 160, CHC/LAT 150A, GEN&SEX 171A.

**ANTHRO 141A. Ancient Civilization of Mexico and the Southwest. 4 Units.**

The prehistory and cultural evolution of the civilization which originated in Mexico, including the Olmecs, Aztecs, Toltecs, Maya, and Zapotec, as well as the Pueblos of the Southwestern U.S. Topics include the origins of food production and of the state.

Same as INTL ST 177I.

**ANTHRO 146. Consumption and Culture. 4 Units.**

Our modern 'society of the spectacle' often equates your consumption to your very humanity. Explores the ways in which our desire for things expresses our identity, politics, place within society, and how what we consume dominates social life.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment.

**ANTHRO 147. Egyptomania. 4 Units.**

An exploration into the archaeological heritage and cultures of ancient Egypt. Also examines how ancient Egypt became appropriated as a popular cultural phenomenon and site of scholarship in the centuries after the Pharaohs.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment. Archaeology Minors have first consideration for enrollment.

**ANTHRO 147A. Archaeology of the Islamic World. 4 Units.**

The archaeological record connected with the Islamic tradition spans nearly 1,500 years and stretches from Spain to South East Asia. Working with artifacts and other materials, students learn about the sites and historical transformations associated with Islam and Muslim societies.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment. Archaeology Minors have first consideration for enrollment.

**ANTHRO 147B. Archaeology, Politics, and Identity. 4 Units.**

Archaeologists don't excavate in a political vacuum. Their research has profound consequences for the ways in which people identify with and claim their cultural heritage. Examines archaeology's role in constructing such identities through the traces of the past.

Restriction: Anthropology Majors have first consideration for enrollment. Anthropology Minors have first consideration for enrollment. Archaeology Minors have first consideration for enrollment.

**ANTHRO 148. I Dig UCI. 4 Units.**

An introduction to archaeological fieldwork through participation in an active excavation on campus. Students engage with research design and learn the foundational methods of archaeological recovery: survey, mapping, sampling strategies, documentation, excavation, artifact identification, and interpretation.

**ANTHRO 149. Special Topics in Archaeology. 1-4 Units.**

Studies in selected areas of Archaeology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 150A. Language and Social Cognition. 4 Units.**

Explores the relationship between language and cognition in social and cultural contexts. The overall goal is to think through how language structure and use impact how individuals perceive, think about, and understand the world around them.

Same as LSCI 168S.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 151A. Improvisation, Language, and Culture. 4 Units.**

Addresses improvisation, both in performance and in everyday life. Examines improvisation as the 'flexible regulation' of everyday behavior by exploring different scholarly treatments of language and interaction, and working on developing actual theatrical improvisation skills.

Same as LSCI 168J.

Restriction: Upper-division students only.

**ANTHRO 152A. Language Origins: Evolution, Genetics, and the Brain. 4 Units.**

Examines how human language(s) may have originated. Studies pertinent techniques (reconstruction) and addresses related questions, including is our language faculty inborn (i.e., genetically encoded)? Can brain imaging and population genetics research help to unlock this mystery of human evolution?.

Same as LSCI 175, GLBLCLT 105, HISTORY 135G.

**ANTHRO 162A. Peoples and Cultures of Latin America. 4 Units.**

Surveys the prehistory of Latin America and its indigenous cultures, emphasizing the impact of colonial rule, capitalism, and twentieth-century transformations. Emphasis on communities from several countries. In some years, emphasis on comparisons between the Latin American and Caribbean experiences.

Same as INTL ST 177J, CHC/LAT 120.

(VIII)

**ANTHRO 162B. Indian North America. 4 Units.**

A survey of indigenous peoples in North America: American Indians, Alaska Natives, First Nations, Native Americans. Tribal populations and geographic distributions, political and social organization, sovereignty, self-determination, intergovernmental relations; cultural continuity and change; management, preservation, development of environments/resources.

(VII)

**ANTHRO 162C. Race and Empire in Colonial Latin America. 4 Units.**

Explores how native people of Latin America with enslaved and free African incorporated and defied Spanish and Portuguese colonization. Focuses on religious adaptations, resistance movements, legal systems, and the emergence of multicultural communities to explain how race shaped European empires.

Same as HISTORY 165.

**ANTHRO 162D. Anthropology of the United States. 4 Units.**

Examines anthropological research in and of the United States. Topics include race, class, identity, politics, law, and media.

**ANTHRO 163A. Peoples of the Pacific. 4 Units.**

The cultural history and recent developments among the Pacific peoples of Polynesia, Micronesia, Melanesia, New Guinea, and Australia.

Same as INTL ST 158B.

(VIII)

**ANTHRO 164A. 21st Century Africa. 4 Units.**

Comparative studies of the cultures and societies of Sub-Saharan Africa, with emphasis on critical study of colonialism and postcoloniality, social transformation, and the politics of identity.

Prerequisite: ANTHRO 2A

Same as INTL ST 157A.

Restriction: Anthropology Majors have first consideration for enrollment.

(Ib)

**ANTHRO 164P. Peoples and Cultures of Post-Soviet Eurasia. 4 Units.**

Examines the cultures and political conflicts of the more than 130 indigenous ethnic groups in the European and Asian territories of the former U.S.S.R. Emphasis is on the theoretical issues of ethnicity, nationalism, and conflict management.

Same as INTL ST 162B, POL SCI 154F.

(VIII)

**ANTHRO 165A. Modern Iran: Cinema and the City. 4 Units.**

Exploring modern Iran through film, literature, photography, travel writing, and philosophy and social science texts that introduce students to important concepts in post-colonial studies, social thought, war culture, religion, and media as experienced through the paradigm of a non-Western modernity.

Same as PERSIAN 165A.

**ANTHRO 169. Special Topics in Area Studies. 1-4 Units.**

Studies in selected areas of Anthropology. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 179. Special Topics: Methods and Formal Representations. 1-4 Units.**

Studies in selected areas of Methods and Formal Representations. Topics addressed vary each quarter.

Restriction: Anthropology Majors have first consideration for enrollment.

**ANTHRO 180AW. Anthropology Majors Writing Seminar. 4 Units.**

Anthropological theory designed especially for majors in Anthropology. Topics addressed vary each quarter.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 3 times as topics vary.

Restriction: Anthropology Majors only.

**(Ib)****ANTHRO 190. Senior Thesis. 4 Units.**

Senior thesis with Anthropology faculty.

Repeatability: May be taken for credit 3 times.

**ANTHRO H190A. Honors Research Design. 3 Units.**

Students design a research project and articulate its goals and significance. Written work consists of a research proposal describing the research questions, the relevant literature, methods of data collection and analysis, and ethical considerations.

Prerequisite or corequisite: ANTHRO 199

Restriction: Anthropology Honors students only.

**ANTHRO H190B. Honors Field Research. 3 Units.**

Students begin or continue ethnographic field research and gain experience with a variety of data collection methods, including participant-observation, interviews, surveys, and the study of archival and documentary materials.

Prerequisite or corequisite: ANTHRO 199 and ANTHRO H190A

Restriction: Anthropology Honors students only.

**ANTHRO H190C. Honors Research Analysis. 3 Units.**

Students apply qualitative data analysis techniques to ethnographic data collected as part of their Honors research.

Prerequisite or corequisite: ANTHRO H190B and ANTHRO 199. Anthropology Honors ONLY.

**ANTHRO H190W. Honors Thesis Writing. 3 Units.**

Students draft a senior honors thesis (typically) with the following sections: problem statement, literature review, ethnographic background, and descriptions of the methods, results, and conclusions.

Prerequisite or corequisite: ANTHRO H190C and ANTHRO 199. Anthropology Honors ONLY. Satisfactory completion of the Lower-Division Writing requirement.

**(Ib)****ANTHRO 197. Field Study. 1-4 Units.**

Field study with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

**ANTHRO 198. Directed Group Study. 1-4 Units.**

Directed study with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

**ANTHRO 199. Independent Study. 1-4 Units.**

Independent research with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

**ANTHRO 202A. Proseminar in Anthropology. 4 Units.**

Year-long intensive introduction to the history of anthropological thought and reading in classical and contemporary ethnography for first-year graduate students.

Restriction: Graduate students only.

**ANTHRO 202B. Proseminar in Anthropology. 4 Units.**

Year-long intensive introduction to the history of anthropological thought and reading in classical and contemporary ethnography for first-year graduate students.

Prerequisite: ANTHRO 202A

Restriction: Graduate students only.

**ANTHRO 202C. Proseminar in Anthropology. 4 Units.**

Year-long intensive introduction to the history of anthropological thought and reading in classical and contemporary ethnography for first-year graduate students.

Prerequisite: ANTHRO 202B

Restriction: Graduate students only.

**ANTHRO 204A. Proseminar in Medicine, Science, and Technology. 4 Units.**

Explores the phenomena studied by 'medical anthropology' and 'science and technology studies' are inextricably linked, and how understanding formations requires moving between disparate fields of inquiry. Required for students pursuing a Graduate Certificate in Anthropologies of Medicine, Science, and Technology.

Restriction: Students pursuing a Graduate Certification in Anthropologies of Medicine, Science, and Technology have first consideration for enrollment.

**ANTHRO 215A. Ethnographic Methods. 4 Units.**

Exposes students to diverse methods, both traditional and experimental, used in anthropological ethnographic research. Students gain experience practicing diverse methods, and learn to select methods appropriate to particular study designs and contexts.

Restriction: Graduate students only.

**ANTHRO 215B. Research Design. 4 Units.**

Introduces research design for anthropology, including concept work and mapping, research topic and aims development, research question construction, and fieldwork planning.

Prerequisite: ANTHRO 215A

Restriction: Graduate students only.

**ANTHRO 215C. Grant and Proposal Writing. 4 Units.**

Focuses on production, critique, and revision of student research proposals. A practical seminar designed to improve student proposals, help students through the application processes, and increase students' chances of obtaining support for their research.

Prerequisite: ANTHRO 215B

Restriction: Graduate students only.

**ANTHRO 229A. Anthropology of Knowledge. 4 Units.**

Examines the politics of knowledge. Considers the long history of anthropological studies concerning a wide variety of knowledge forms and practices, including more recent feminist and postcolonial studies. Aims to investigate and enlarge normative definitions of knowledge and science.

**ANTHRO 230D. Ethnography and its Collaborative Futures. 4 Units.**

Structured readings of selected career-making ethnographic works, past and present, with an emphasis on how ethnographic projects evolve into diverse, collaborative projects.

**ANTHRO 230F. Ethnography. 4 Units.**

Explores the theory and practice of ethnography with a focus on anthropology, the discipline most associated with ethnography. Students are exposed to the theoretical underpinnings of ethnographic work, traditional and innovative practices, and sample ethnographies.

Same as CRM/LAW C222, CHC/LAT 217.

Restriction: Graduate students only.

**ANTHRO 232B. Medical Anthropology. 4 Units.**

Explores historical and contemporary theoretical positions and debates in medical anthropology. Topics may include subjectivity, theories of the body, biopolitics, biomedical technologies, sexuality, pharmaceuticals, political economy and health, infectious disease and epidemics, health disparities, and humanitarianism.

Restriction: Students pursuing a Graduate Certification in Anthropologies of Medicine, Science, and Technology have first consideration for enrollment.

**ANTHRO 235A. Transnational Migration. 4 Units.**

Examines borders and boundaries as material and semiotic constructs. Drawing upon an array of literatures, but loosely situated in U.S. geo/biopolitics, explores transformative troubleings of places, spaces, borders, and bodies of all sorts.

Same as SOC SCI 254A, CHC/LAT 215.

Restriction: Graduate students only.

**ANTHRO 240A. Economic Anthropology. 4 Units.**

Classic and contemporary theory in economic anthropology. Case studies: Latin America (primarily Mexico and the Andes), Africa, and the Pacific. Substantive topics: non-market exchange, markets and marketplaces, households, gender, management of common property (fisheries, pastoral lands, forests), labor, and development.

Restriction: Graduate students only.

**ANTHRO 245A. Seminar in Political Anthropology. 4 Units.**

Explores anthropological approaches to politics. Covers a range of issues and topics, including: theories of culture, power, and hegemony; approaches to colonial and post-colonial relations of global inequality; and ethnographic approaches to the modern state.

Restriction: Graduate students only.

**ANTHRO 246. Feminist Anthropology. 4 Units.**

Examines feminist anthropology's rise as an interdisciplinary field. Paying special attention to issues of power, subjectivity, and authority in the research encounter, feminist anthropologists' major contributions to ethnography, gender studies, queer studies, and cultural anthropology are surveyed.

Restriction: Graduate students only.

**ANTHRO 246E. Capital and Empire. 4 Units.**

Examines theories of capital and empire via anthropological theory, post/colonial critique, feminist theory, and Black political thought. Moreover, it examines social movements, geo/political trajectories and formations, and political economic trends that have emerged after the 2008 financial crisis.

Restriction: Graduate students only.

**ANTHRO 247A. Structuralism and Post-Structuralism. 4 Units.**

Traces recent theoretical discussions and arguments over the philosophical and historical 'subject' from structuralist decenterings toward the characteristically 'post-structuralist' contemporary concern with the historical and political constitution of subjectivities and subject positions.

Restriction: Graduate students only.

**ANTHRO 249A. Humanism and Posthumanism. 4 Units.**

Examines alternative forms of human, humanisms, and posthumanisms to explore the inherent ambiguities and shifting boundaries of knowing and being human, and to venture into modes of analysis that problematize the universality and globality of liberal humanism.

**ANTHRO 250A. The Cultural Politics of Visual Representation. 4 Units.**

Develops a theoretical framework for analyzing and reading visual images. Images, as cultural productions, are steeped in the values, ideologies, and taken-for-granted beliefs of the culture which produced them and a political economy that is class, race, and gender inflected.

**ANTHRO 250B. Digital Technologies, Culture, and Media. 4 Units.**

Explores questions of sociality in cyberspace, including what social theories and ethnographic methods are effective in studying online cultures. Topics include general issues like indexicality, reference, temporality, spatiality, and embodiment, and topics such as language, gender, ethnicity, property, and inequality.

Restriction: Graduate students only.

**ANTHRO 252A. Queer Anthropology. 4 Units.**

Explores historical and contemporary scholarship that employs ethnographic approaches to address the discursive construction of sexuality. Also examines how the discipline of anthropology has been shaped by the study of sexuality.

Restriction: Graduate students only.

**ANTHRO 253A. Design, Aesthetics, and Social Life. 4 Units.**

Anthropology has only recently recognized that design demands consideration as a cultural form linked to, yet nonetheless distinct from, other aesthetic endeavors. Course is largely oriented toward collaboratively working out a conceptual basis for a distinctly anthropological approach to design.

**ANTHRO 254. Digital Anthropology. 4 Units.**

Examines "the digital" from an anthropological perspective by exploring ethnographic research on digital culture and using anthropological frameworks to approach the digital and the human. Readings are interdisciplinary, including work from history and communications.

Restriction: Graduate students only.

**ANTHRO 255A. Disability Worlds. 4 Units.**

Explores disability from a range of methodological and theoretical perspectives. Examines the genealogy of disability in anthropology and related disciplines, with an emphasis on ethnographic work. Topics addressed include access, embodiment, politics, selfhood, and sexuality.

Restriction: Graduate students only.

**ANTHRO 256B. Secrecy, Security, and Surveillance. 4 Units.**

Explores secrecy and security as fundamental to constructions of public and private domains, relations of citizenship and sovereignty, the militarization of everyday life, and the ways that the fabrics of societies are woven of both trust and deceit.

Restriction: Graduate students only.

**ANTHRO 257A. Natures and Environments. 4 Units.**

Examines social scientific understandings of natural contexts and human milieus via a survey of key analytic categories. Begins by examining historical and ongoing definitions and problems organized around "nature" and "environment" as separate but imbricated concepts.

**ANTHRO 259A. Dissertation Writing Seminar. 4 Units.**

Intended for advanced, post-fieldwork Anthropology graduate students. Emphasis on the presentation of research design and results, problems of ethnographic writing, and qualitative and quantitative data and analysis. Prerequisites: post-fieldwork; graduate standing in Anthropology or consent of instructor.

Restriction: Graduate students only.

**ANTHRO 289. Special Topics in Anthropology. 1-4 Units.**

Studies in selected areas of Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**ANTHRO 290. Dissertation Research. 4-12 Units.**

Dissertation research with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**ANTHRO 299. Independent Study. 4-12 Units.**

Independent research with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Chicano/Latino Studies Courses

**CHC/LAT 61. Introduction to Chicano/Latino Studies I. 4 Units.**

An introduction to the study of the historical foundations of the Chicano/Latino experience. Addresses such topics as empire, migration, immigrant settlement, economic integration, race, gender, and the formation of group identities.

(III, VII)

**CHC/LAT 62. Introduction to Chicano/Latino Studies II. 4 Units.**

Provides an introduction to the arts, literature, and culture of Chicano/Latino communities. Analyzes representations of and cultural production in Chicano/Latino communities through such media as folklore, literature, art, film, architecture, dance theatre, performance, music, poetry, mass media, and language.

(III, VII)

**CHC/LAT 63. Introduction to Chicano/Latino Studies III. 4 Units.**

Examines contemporary public policy issues in Chicano/Latino communities. Each offering addresses at least three of the following themes: migration, immigrant incorporation, identity construction, language policy, health policy, politics, sexuality, gender, labor, class, and education.

(III and VII ).

**CHC/LAT 64. Introduction to Race and Ethnicity in Political Science. 4 Units.**

Examines major theories that attempt to explain the roles of race and ethnicity in U.S. politics.

Same as POL SCI 61A.

(III and VII ).

**CHC/LAT 65. Ethnic and Immigrant America. 4 Units.**

Focusing on Asian, Latino, and Black immigrant groups, examines the second generation's experience of straddling two cultures and growing up American. Covers topics such as assimilation, bilingualism, race relations, education, bicultural conflicts, interracial marriage, and multiracial identities.

Same as SOCIOL 68A.

(VII)

**CHC/LAT H80. Latina/o Childhoods: Comparative Approaches to the Study of Children and Youth. 4 Units.**

Students in this seminar compare the experiences of Latina/o children to other young people in the U.S. and around the world, analyzing the historical, political, economic, and sociocultural factors that have differently structured the life stage we understand as "childhood."

Restriction: Campuswide Honors Collegium students only.

(III)

**CHC/LAT 101. Research in the Latino Community. 4 Units.**

Students engage in firsthand research in the local Orange County environment. Students identify a research problem, conduct a literature review, develop questions and/or hypotheses, appropriate methods, and write a proposal.

Prerequisite: Two courses from CHC/LAT 61 or CHC/LAT 62 or CHC/LAT 63 and two courses from CHC/LAT 110-189.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment.

**CHC/LAT 102W. Chicano/Latino Research Seminar. 4 Units.**

Taught as a writing and research seminar in Chicano/Latino Studies. Student develops own project; engages in peer editing; drafts, writes, and presents paper at Spring research conference. Prior course work in Chicano/Latino Studies helpful, i.e., CHC/LAT 61, 62, 63.

Prerequisite: CHC/LAT 101. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Chicano/Latino Studies Majors only.

(Ib)

**CHC/LAT 110. Topics in Chicano Literature and Culture. 4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter. Taught in English.

Repeatability: May be taken for credit 4 times as topics vary.

Same as SPANISH 140.

**CHC/LAT 118. Anthropology of Food. 4 Units.**

Examines how food communicates ideas about ethnocentrism, disgust, privilege, gender, race, labor, social identities and hierarchies, globalization, power, and the 'Western diet' and its health consequences.

Same as ANTHRO 134H.

**CHC/LAT 120. Peoples and Cultures of Latin America. 4 Units.**

Surveys the prehistory of Latin America and its indigenous cultures, emphasizing the impact of colonial rule, capitalism, and twentieth-century transformations. Emphasis on communities from several countries. In some years, emphasis on comparisons between the Latin American and Caribbean experiences.

Same as INTL ST 177J, ANTHRO 162A.

**(VIII)****CHC/LAT 121. Latina/Latino Pop: Latina/Latino Popular Culture. 4 Units.**

With a focus on the politics of language and space/place, prepares students to critically analyze sites of Latina/Latino popular culture including: music, film, performance, sports, media, and varied subcultures.

Same as HISTORY 151D.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. History Majors have first consideration for enrollment.

**CHC/LAT 123. Immigration, Nation, and Media. 4 Units.**

Examines media shapes and reflects public opinion on immigration and its representation of immigrants, citizens, and ideas about the nation, and who belongs and who is a potential threat; as well as the relationship between scholars and journalists.

Same as ANTHRO 125U, SPPS 101A.

**CHC/LAT 124W. Immigrant Emotionality. 4 Units.**

Explores the emotional universe created by the Latin American immigrant experience, and guides students in the creation of a literary work based on an investigation into, or reflection on that experience.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

**(Ib)****CHC/LAT 129. Special Topics in Literature, Arts, Media, Culture. 1-4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment.

**CHC/LAT 132A. Chicana/Chicano History: Pre-Colonial to 1900. 4 Units.**

Examines social history of the southwest region from antiquity to 1900. Discusses major questions, theory and research methods pertinent to Chicanas/Chicanos. Themes include: indigenous empires, conquest, colonialism, social stratification, ideology, marriage, sexuality, industrial capitalism, accommodation and resistance.

Same as HISTORY 151A.

**CHC/LAT 132B. Chicana/Chicano History: Twentieth Century. 4 Units.**

Examines social history of the Southwest with emphasis on Mexican-origin people. Discusses major questions, theory and research methods pertinent to Chicana/Chicano history. Themes explored include: immigration, xenophobia, class struggle, leadership, generational cohorts, unionization, education, barrioization, ethnicity, patriarchy, sexuality.

Same as HISTORY 151B.

**CHC/LAT 134. U.S. Latino Literature and Cultures. 4 Units.**

Focuses on aspects of literature, art, cultural production, and history of the multifaceted Latino cultures that have developed within the United States. Focuses on one group, such as Caribbean Americans, Chicanos, Central Americans, or a comparative perspective of several groups.

Same as SPANISH 110C.

**CHC/LAT 135. Latinas in the Twentieth Century U.S.. 4 Units.**

Latinas in the U.S. from 1900 to present, offering a diversity of their cultures, regional histories, sexualities, generations, and classes.

Same as HISTORY 151C.

**CHC/LAT 139. Special Topics in Chicano/Latino History. 1-4 Units.**

Studies in selected areas of Chicano/Latino History. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Chicano/Latino Studies Majors only.

**CHC/LAT 147. Comparative Minority Politics. 4 Units.**

Examines the political experiences of Blacks, Latinos, and Asian Americans in the United States from roughly 1950 to the present. Focuses on how each group has pursued political empowerment via both conventional political channels and social movements.

Same as AFAM 151, ASIANAM 132, POL SCI 124C.

**CHC/LAT 148. Racial and Ethnic Relations in the United States. 4 Units.**

Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.

Same as SOCIOL 167A.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**CHC/LAT 148W. Racial and Ethnic Relations in the United States. 4 Units.**

Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOCIOL 167AW.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**(Ib)**

**CHC/LAT 150. U.S. Intervention in Latin America. 4 Units.**

Explores political, economic, social, and cultural ties that bind Latin America to the United States. Focuses on U.S. intervention and Latin American response from early nineteenth century to present day. Case studies include Mexico, Guatemala, Cuba, Chile, and Central America.

Same as POL SCI 142J, INTL ST 177D, HISTORY 166.

**CHC/LAT 150A. Sex and Conquest in Latin America. 4 Units.**

Competing ideas of masculinity and femininity, sexual violence, sexual identities, and gendered hierarchies informed how the Spanish engaged in military and religious domination of Mexican and Andean communities, as well as the forms of native resistance throughout colonial Latin America.

Same as ANTHRO 140, HISTORY 160, GEN&SEX 171A.

**CHC/LAT 151. Latinos in U.S. Politics. 4 Units.**

Comparing the political issues facing Latino groups by examining their migration histories, voting behavior, nonelectoral participation, and policy issues. Latino issues are examined on the national, state, and local levels, including formal representation, immigration, affirmative action, and language policy.

Same as POL SCI 124B.

**(VII)**

**CHC/LAT 151B. Revolution in Latin America. 4 Units.**

Presents a comparative analysis of the causes, development, and consequences of selected revolutionary movements, focusing on outbreaks in Mexico, Bolivia, Cuba, Chile, Nicaragua, and Grenada. Explores topics of state formation, economic nationalism, social justice, ethnicity, and role of international affairs.

Same as SOC SCI 173N, HISTORY 166D, INTL ST 177C.

**CHC/LAT 152A. Race, Ethnicity, and Social Control. 4 Units.**

Provides a historical and sociological survey of racial and ethnic group relations in contexts of crime control, emphasizing the roles of racial ideology, structural racism, and social movements in shaping these dynamic relations, and their significance to American liberal democracy.

Same as CRM/LAW C116.

**CHC/LAT 152B. Community, Social Justice, and Health Equity Research for Action. 4 Units.**

Focuses on community as a unit of identity, community, well-being, and social justice perspectives and initiatives to promote community health. Addresses community change and improvements in community well-being, with a focus on health equity research for action.

Prerequisite: PUBHLTH 1 or PUBHLTH 2 or CHC/LAT 61 or CHC/LAT 62 or CHC/LAT 63

Same as PUBHLTH 115.

**CHC/LAT 153. Cross-Cultural Research on Urban Gangs. 4 Units.**

Taking an urban policy approach, examines the background and contemporary traditions of gangs in several ethnic groups including African-, Asian-, and Mexican-Americans. Cross-cultural exploration of the varied facets of gang life. The major social-control institutions affecting them.

Same as CRM/LAW C156.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment. Chicano/Latino Studies Majors have first consideration for enrollment.

**(VII)****CHC/LAT 154. Latino Metropolis. 4 Units.**

Explores the processes of Latino urbanization in the United States and the spatialization of Latino identities, particularly in the context of Southern California with selected comparisons drawing from other cities.

Same as UPPP 172.

**(VII)****CHC/LAT 155. Culture Change and the Mexican People. 4 Units.**

Reviews culture contact and colonization, innovation diffusion, acculturation, assimilation, culture conflict and marginality, modernization, urbanization, legal transformations. Mexico and the Southwestern U.S. are reviewed through several centuries to better appreciate the indigenous base of the Mexican people.

Same as CRM/LAW C172.

**CHC/LAT 156W. Chicano/Latinos and Labor. 4 Units.**

Explores theories that explain the occupational pathways and workplace experiences of Latinos in various work sectors. Investigates jobs such as migrant labor, child street vendors, Latina/Latino professionals, and Latinos migrating to the U.S. South that work in poultry processing plants.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

**(Ib)****CHC/LAT 157. Cuban Society and Revolution. 4 Units.**

Explores the causes, development, and legacy of the 1959 Revolution. Themes include economic dependency, democracy, race, gender, culture, and the always volatile relations between Cuba and the United States.

Same as POL SCI 153G, HISTORY 166C, INTL ST 177E.

**CHC/LAT 158. Feminisms of Color. 4 Units.**

Surveys the development of Chicana feminist thought and practice. Focuses on historical contemporary writings by and about Chicana feminists. Draws from interdisciplinary scholarship in order to survey the diversity of Chicana feminisms.

**(VII)****CHC/LAT 159. Special Topics in Society, Labor, Politics, Law, Gender, Race, Ethnicity. 1-4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Chicano/Latino Studies Majors only.

**CHC/LAT 161. Transnational Migration. 4 Units.**

Examines the movement of people across national borders, governmentality and the role of state practices to control populations, and issues of citizenship, belonging, and identity. Examples are drawn from the United States, Europe, Latin America, Asia, and Africa.

Same as ANTHRO 125X, INTL ST 117A.

(VIII)

**CHC/LAT 162A. Urban America . 4 Units.**

Students examine the historical, social, political, and economic factors that contributed to the construction of the American urban context, one that is poverty concentrated and racially/ethnically segregated. Students also critically assess the consequence of growing up in America's urban neighborhoods.

Same as SOC SCI 163A, UPPP 104.

**CHC/LAT 163. U.S. Immigration Policy. 4 Units.**

Examines selected immigration policy debates since the nineteenth century, rationale and consequences of immigration law since 1965, problems of administration, implementation and enforcement, impact of immigration policy on foreign relations, and contemporary debate regarding the future of U.S. policy.

Same as POL SCI 126C.

(VII)

**CHC/LAT 164A. Undocumented Immigrant Experiences. 4 Units.**

Examines the experiences of undocumented immigrants and the policies that structure their educational, economic, social, and political participation.

Same as ASIANAM 130, CRM/LAW C187, SOCIOL 177C.

(III and VII ).

**CHC/LAT 166. Chicano Movement. 4 Units.**

Explores the history of Mexicans in the U.S. with particular attention paid to their integration into the U.S. capitalist economy. Examines this economic history and the Chicano movement, 'El Movimiento,' within the wide context of socio-economic change.

Same as UPPP 177.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment. Urban Studies Majors have first consideration for enrollment.

**CHC/LAT 167. Latinos in a Global Society. 4 Units.**

Examines interconnections between diverse Latino groups in the U.S. and the effects of globalization on their social, cultural, and political realities. Topics include immigration, demographics, socioeconomic differentiation, familial relations, political protest/resistance, law and policy, and links to 'homeland' issues.

Same as SOC SCI 173L.

(VII)

**CHC/LAT 168. Chicano/Latino Social Psychology. 4 Units.**

Examines theories, research, and major issues of relevance to understanding social psychological processes in Chicano/Latino populations. Topics include social development, cultural orientations, gender and sexuality, close relationships, happiness and well-being, stereotyping, prejudice and discrimination, and mental and physical health.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as PSCI 192Q.

Restriction: Psychological Science Majors have first consideration for enrollment. Chicano/Latino Studies Majors have first consideration for enrollment. Psychology and Social Behavior Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

(VII)

**CHC/LAT 169. Special Topics in Globalization, Transnationalism, Immigration, U.S.-Mexico Border. 1-4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**CHC/LAT 170. Chicano/Latino Families. 4 Units.**

Introduction to the research, literature, and issues surrounding the topic of Chicano/Latino families including cultural history, contemporary issues, organization of family, traditions, lifestyles, values, beliefs, generational differences, gender issues, ethnic identity, evolution of demographic patterns, current economic and political standings.

Same as SOC SCI 165, PSCI 166S, PSYCH 174H.

**CHC/LAT 176. Race, Gender, and Science. 4 Units.**

Perfect for pre-health, science and social science majors wanting to appreciate how science and society interact. Race and gender as biological and socio-cultural constructs are examined. Questions explored: What is disease? What is science? What are social and biological differences.

Same as ANTHRO 128B.

**(VII)****CHC/LAT 178A. Medical Anthropology. 4 Units.**

Introduces students to cross-cultural perspectives and critical theories in anthropological studies of medicine. Special attention is given to diverse ways of understanding bodies, illnesses, and therapeutic practices in our changing world.

Same as ANTHRO 134A.

**(VIII)****CHC/LAT 179. Special Topics in Health, Medicine, and Psychosocial Dynamics. 1-4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Chicano/Latino Studies Majors have first consideration for enrollment.

**CHC/LAT 183. Multicultural Education in K-12 Schools. 4 Units.**

Provides a theoretical and empirical overview of educational issues affecting low-income immigrant and U.S. born minority student populations in an increasingly diverse and changing society.

Same as EDUC 124.

**(VII)****CHC/LAT 189. Special Topics in Educational Policy and Issues. 1-4 Units.**

Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

**CHC/LAT H190A. Honors Research Preparation. 4 Units.**

Students write a proposal describing their research question, the relevant background literature, and the method of data collection and analysis. Field work for the project may begin this quarter.

Restriction: Chicano/Latino Studies Honors students only.

**CHC/LAT H190B. Honors Field Research. 4 Units.**

Students begin or continue their research for their senior honors thesis.

Prerequisite: CHC/LAT H190A

**CHC/LAT H190C. Honors Thesis. 4 Units.**

Student drafts a senior honor thesis (typically) with the following sections: problem statement, literature review, description of the methods, results, and conclusions.

Prerequisite: CHC/LAT H190A and CHC/LAT H190B

**CHC/LAT H190W. Honors Thesis. 4 Units.**

Student drafts a senior honor thesis (typically) with the following sections: problem statement, literature review, description of the methods, results, and conclusions.

Prerequisite: CHC/LAT H190A and CHC/LAT H190B. Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**CHC/LAT 198. Directed Group Study. 1-4 Units.**

Directed study with Chicano/Latino faculty.

Repeatability: May be repeated for credit unlimited times.

**CHC/LAT 199. Independent Study. 1-4 Units.**

Independent research with Chicano/Latino faculty.

Repeatability: May be repeated for credit unlimited times.

**CHC/LAT 200A. Theoretical Issues in Chicano/Latino Research. 4 Units.**

Introduction to theoretical issues in the scholarship in Chicano/Latino Studies. Theories from social sciences, humanities, critical theory. Topics: immigration, identity, gender and sexuality, globalization, transnationalism, social, political, and economic integration, race theory, labor market participation, social history, cultural productions.

**CHC/LAT 210A. Cultural and Historical Precedents for Latinos and Medical Care. 2 Units.**

Introduction to the history of Latinos, focusing on relevant pre-Columbian, colonial, and modern social and cultural developments, including issues of race, gender, sexuality, religious beliefs, and health beliefs and practices.

Grading Option: In Progress (Letter Grade with S/U).

**CHC/LAT 210B. Cultural and Historical Precedents for Latinos and Medical Care. 2 Units.**

Introduction to the history of Latinos, focusing on relevant pre-Columbian, colonial, and modern social and cultural developments, including issues of race, gender, sexuality, religious beliefs, and health beliefs and practices.

Prerequisite: CHC/LAT 210A

Restriction: CHC/LAT 210A-210B and CHC/LAT 212 may not both be taken for credit.

**CHC/LAT 211A. Latinos/Latinas and Medical Care: Contemporary Issues. 2 Units.**

Introduction to medical anthropological and social science perspectives on Latinos/Latinas in relation to a number of health and medically-related issues, i.e., immigration, gender, reproduction, culture, social structure, political economy, sexuality, utilization of medical services, and health beliefs.

Same as PUBHLTH 211A.

**CHC/LAT 211B. Latinos/Latinas and Medical Care: Contemporary Issues. 2 Units.**

Introduction to medical anthropological and social science perspectives on Latinos/Latinas in relation to a number of health and medically-related issues, i.e., immigration, gender, reproduction, culture, social structure, political economy, sexuality, utilization of medical services, and health beliefs.

Prerequisite: CHC/LAT 211A

Same as PUBHLTH 211B.

**CHC/LAT 215. Transnational Migration. 4 Units.**

Examines borders and boundaries as material and semiotic constructs. Drawing upon an array of literatures, but loosely situated in U.S. geo/biopolitics, explores transformative troubleings of places, spaces, borders, and bodies of all sorts.

Same as SOC SCI 254A, ANTHRO 235A.

Restriction: Graduate students only.

**CHC/LAT 217. Ethnography. 4 Units.**

Explores the theory and practice of ethnography with a focus on anthropology, the discipline most associated with ethnography. Students are exposed to the theoretical underpinnings of ethnographic work, traditional and innovative practices, and sample ethnographies.

Same as ANTHRO 230F, CRM/LAW C222.

Restriction: Graduate students only.

**CHC/LAT 222. Theorizing Illegality and the Experiences of Undocumented Immigrants. 4 Units.**

Examines theories of illegality and citizenship, historical and contemporary undocumented immigrant experiences, and methodological concerns in this area of study.

Same as SOCIOL 282.

Restriction: Graduate students only.

**CHC/LAT 223. Ethnic America. 4 Units.**

Examines critically the meaning and measurement of ethnicity, race, and nation in sociological theory and research. Theories of ethnicity are explored, along with empirical studies of the construction of ethnic and pan-ethnic identities in historical and contemporary contexts.

Same as SOCIOL 234.

Restriction: Graduate students only.

**CHC/LAT 224. Immigrant America. 4 Units.**

The study of the causes and consequences of international migration has become one of the most vital fields of sociological theory and research. Examines principal theoretical perspectives and empirical research on contemporary immigration flows and the processes of incorporation.

Same as SOCIOL 264.

Restriction: Graduate students only.

**CHC/LAT 225. Crimmigration. 4 Units.**

Examines the criminalization of immigration, with an emphasis on U.S. enforcement procedures and outcomes. Analyzes the devolution of federal immigration law to local authorities, the rise in immigrant detention and deportation, and the militarization of the U.S.-Mexico border.

Same as SOCIOL 268, CRM/LAW C258.

Restriction: Graduate students only.

**CHC/LAT 251. Models of Practice and Intervention at the Community Level. 4 Units.**

Examines and critiques current models, frameworks, theories for.

Prerequisite: CHC/LAT 200A or PUBHLTH 246

Same as PUBHLTH 251.

Restriction: Graduate students only.

**CHC/LAT 289. Special Topics in Chicano/Latino Studies. 1-4 Units.**

Current research in Chicano/Latino Studies.

Repeatability: May be repeated for credit unlimited times.

**CHC/LAT 290. Dissertation Research. 1-12 Units.**

Dissertation research with Chicano/Latino faculty.

Repeatability: May be taken for credit 10 times.

Restriction: Graduate students only.

**CHC/LAT 299. Independent Study. 1-12 Units.**

Independent study with Chicano/Latino Studies faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Cognitive Sciences Courses

**COGS 14P. Python for Cognitive Science and Neuroscience Research. 4 Units.**

Introduces Python for data analysis and modeling encountered in cognitive science and neuroscience. Topics include data structures, execution control, graphic visualization, and interaction with sound and display interfaces. Application in statistical analysis, model simulation, and stimulus presentation and experimental control.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

**COGS 109. Cognitive Sciences Research Seminar. 4 Units.**

Read and discuss examples of the primary research leading to the concepts covered in Psychology Fundamentals. Focuses on how this research is conducted and how inferences from it are drawn.

Prerequisite or corequisite: PSYC 9A

Restriction: Cognitive Sciences Majors only.

**COGS 110. Quantitative Methods for Cognitive Sciences Research. 4 Units.**

Basics of quantitative methods used in cognitive sciences research focusing on linear algebra, Fourier analysis, multivariate statistics, and signal detection theory. Examples drawn from models and methods used in cognitive sciences research with practical examples.

Prerequisite: MATH 2B and STAT 7 and (PSYC 114M or ICS 31)

Restriction: Cognitive Sciences majors only.

## Economics Courses

**ECON 1. Introduction to Economics. 4 Units.**

An analysis of the problems society faces in organizing itself to provide goods and services. How decisions of government, business, and the individual relate to current economic problems such as unemployment, inflation, poverty, and environmental pollution.

Restriction: No Economics Majors. ECON 1 may not be taken for credit if taken concurrently or after ECON 20A or ECON 20B.

(III)

**ECON 11. The Internet and Public Policy. 4 Units.**

How the Internet works. Current public policy issues concerning the Internet. Introductory economics. Communications law. Interactions between information technology, economics, and law. Case studies about Internet and communications policy.

Same as ICS 11.

(II or III).

**ECON 12. Federal Reserve: Past, Present, and Future. 4 Units.**

Studies central banking in the United States from colonial times to the present. Focuses on the past, present, and future of the Federal Reserve and precursors to that system, which was established in 1913.

**ECON 13. Global Economy. 4 Units.**

Acquaints students with the fundamental patterns of the global economy. Emphasizes the historical roots and political implications of economic choices.

Same as IS 13.

Restriction: International Studies Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

(III, VIII)

**ECON 15A. Probability and Statistics in Economics I. 4 Units.**

An introduction to probability, statistics, and econometrics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Examples from economics.

Prerequisite: MATH 2A and MATH 2B

Overlaps with MGMT 7.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

(Va)

**ECON 15B. Probability and Statistics in Economics II. 4 Units.**

An introduction to probability, statistics, and econometrics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Examples from economics.

Prerequisite: ECON 15A

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**(Va)****ECON 17. An Economic Approach to Religion. 4 Units.**

Introduction to how basic economic concepts such as demand, supply, consumption, production, competition, free-riding, innovation, regulation, and rent-seeking can be applied to understand observed religious behavior.

Same as RLGN 17.

**(III)****ECON 20A. Basic Economics I. 4 Units.**

The fundamentals of microeconomics. The behavior of firms and consumers: markets, supply/demand, utility maximization, resource allocation, and efficiency.

Overlaps with MGMT 4A, ECON 23.

Restriction: Economics, Quantitative Economics, Business Economics, and Business Info Management majors have first consideration for enrollment. For School of Social Sciences majors, MGMT 4A may not be used as a substitute for ECON 20A.

**(III)****ECON 20B. Basic Economics II. 4 Units.**

The fundamentals of macroeconomics. Government behavior: monetary and fiscal policy, inflation, and unemployment. Effective fall 2006, the content of Economics 20B is macroeconomics. This course cannot be taken to repeat Economics 20B taken prior to fall 2006.

Prerequisite: ECON 20A or ECON 13 or ECON 23

Overlaps with MGMT 4B.

Restriction: Business Information Mgmt Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Mechanical Engineering Majors have first consideration for enrollment. Aerospace Engineering Majors have first consideration for enrollment. Civil Engineering Majors have first consideration for enrollment. Environmental Engineering Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment. For School of Social Sciences majors, MGMT 4B may not be used as a substitute for ECON 20B.

**(III)****ECON 23. Basic Economics for Engineers. 4 Units.**

The fundamentals of microeconomics. The behavior of firms and of consumers: markets, supply/demand, utility maximization, resource allocation, and efficiency.

Overlaps with ECON 20A.

Restriction: Engineering Majors only. Mechanical Engineering Majors only. Aerospace Engineering Majors only. Civil Engineering Majors only. Environmental Engineering Majors only.

**(III)****ECON 25. The Economics of Accounting Decisions. 4 Units.**

Introduction to accounting concepts and principles, including the accounting model and accounting style, transaction analysis, and preparation of financial statements. An analysis of the similarities and differences between accounting and economic concepts (e.g., value, profits).

Prerequisite: ECON 20A

Overlaps with MGMT 30A.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 100A. Intermediate Economics I. 4 Units.**

Determinants of supply and demand; operation of competitive and monopolistic markets; imperfections of the market system, explanations of unemployment, inflation, recessions; public policy for macroeconomic problems.

Prerequisite: ECON 20A and ECON 20B and MATH 2A and MATH 2B

Overlaps with ECON 105A.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 100B. Intermediate Economic II. 4 Units.**

Determinants of supply and demand; operation of competitive and monopolistic markets; imperfections of the market system, explanations of unemployment, inflation, recessions; public policy for macroeconomic problems.

Prerequisite: ECON 100A

Overlaps with ECON 105B.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 100C. Intermediate Economic III. 4 Units.**

Determinants of supply and demand; operation of competitive and monopolistic markets; imperfections of the market system, explanations of unemployment, inflation, recessions; public policy for macroeconomic problems.

Prerequisite: ECON 100B

Overlaps with ECON 105C.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 105A. Intermediate Quantitative Economics I . 4 Units.**

An advanced and mathematical version of ECON 100A for students in the Quantitative Economics major.

Prerequisite: ECON 20A and ECON 20B and MATH 2A and MATH 2B and MATH 3A

Overlaps with ECON 100A.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 105B. Intermediate Quantitative Economics II . 4 Units.**

An advanced and mathematical version of ECON 100B for students in the Quantitative Economics major.

Prerequisite: ECON 105A

Overlaps with ECON 100B.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 105C. Intermediate Quantitative Economics III . 4 Units.**

An advanced and mathematical version of ECON 100C for students in the Quantitative Economics major.

Prerequisite: ECON 105B

Overlaps with ECON 100C.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 107. Economics of Asymmetric Information. 4 Units.**

Focuses on the effects of asymmetric information in the markets for traditional economic goods and resources, such as labor, insurance, used cars, credit, and in auctions and bargaining problems. Prerequisite:.

Prerequisite: ECON 100A or ECON 105A

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 109. Special Topics in Economic Theory. 4 Units.**

Studies in selected areas of Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 115. Behavioral Economics. 4 Units.**

Studies the behavioral and psychological biases in economics settings. Both individual decisions and games are discussed.

Prerequisite: ECON 20A and ECON 20B

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 116A. Game Theory I. 4 Units.**

Extensive form games with perfect information, and coalitional games. The key solution concepts are Nash Equilibrium, Backward Induction, and the Core. Substantive examples include public good production, oligopoly, electoral competition, auctions, holdup, market entry, and voting.

Prerequisite: (ECON 15B or STAT 120B) and (ECON 100A or ECON 105A)

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 116B. Game Theory II. 4 Units.**

Two-quarter sequence on game theory. Bayesian games, extensive form games with imperfect information, zero-sum games.

Prerequisite: ECON 116A

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 122A. Applied Econometrics I. 4 Units.**

Introduction to econometrics emphasizing practical applications in microeconomics and macroeconomics.

Prerequisite or corequisite: ECON 100A or ECON 105A and (ECON 15B or MATH 130B or MATH 133A or STAT 120C)

Overlaps with ECON 123A, ECON 123B.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 122B. Applied Econometrics II. 4 Units.**

Introduction to econometrics emphasizing practical applications in microeconomics and macroeconomics.

Prerequisite: ECON 122A

Overlaps with ECON 123B.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 122CW. Data Analysis Writing. 4 Units.**

Research writing course in econometrics focusing on individual research projects. Students employ econometric analysis to address an economic question in a 20-page paper and present their findings to the class in a short presentation.

Prerequisite: ECON 15A and ECON 15B and ECON 122A and ECON 122B. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**(Ib)**

**ECON 123A. Econometrics I. 4 Units.**

Specification, estimation, and testing of econometric models. Applications in various areas of microeconomics and macroeconomics.

Prerequisite: MATH 2A and MATH 2B and MATH 3A and STAT 120A and STAT 120B and (STAT 120C or MATH 131C) and (ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C)

Overlaps with ECON 122A, ECON 122B.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 123B. Econometrics II. 4 Units.**

Specification, estimation, and testing of econometric models. Applications in various areas of microeconomics and macroeconomics.

Prerequisite: ECON 123A

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 123CW. Econometrics III. 4 Units.**

Seminar course in which students do an original econometric research project.

Prerequisite: ECON 123B. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**(Ib)**

**ECON 125. Business Forecasting. 4 Units.**

Students learn how to produce forecasts of the behavior of economic (and other) variables. The techniques examined are linear regression, nonlinear regression, and nonparametric kernel regression; AR, MA, ARMA, ARIMA, and Box-Jenkins.

Prerequisite: ECON 122A

Overlaps with MGMT 180.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 126. Computational Macroeconomics. 4 Units.**

Introduction to the computational methods for studying economic growth and the business cycle. Students learn how to write computer programs to simulate macroeconomic models, download and manage data from internet resources, and to do basic statistics.

Prerequisite or corequisite: (ECON 100C or ECON 105C) and (ECON 122A or ECON 123A)

Restriction: Business Economics Majors only. Economics Majors only. Quantitative Economics Majors only.

**ECON 127A. Experimental Economics . 4 Units.**

Students will learn what constitutes proper experimental design and what laboratory experiments teach us about human behavior and the economy. Students will participate in a sample experiment, evaluate the results, and discuss experiment design and larger issues. Formerly ECON 117.

Prerequisite: ECON 15B and ECON 100B

**ECON 128. Machine Learning for Economists. 4 Units.**

Develops the theory and computation of recent methods at the intersection of econometrics and machine learning as used in economics and business. Building on intermediate econometrics, it introduces causal random forests, double machine learning, and neural networks.

Prerequisite: ECON 123A

Restriction: Business Economics Majors only. Economics Majors only. Quantitative Economics Majors only.

**ECON 129. Special Topics in Quantitative Methods. 4 Units.**

Studies in selected areas of Quantitative Methods. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 131A. The Economics of Risk and Uncertainty. 4 Units.**

The theory of insurance and joint-ownership of risky enterprises; optimal procedures for the allocation of uncertain payoffs.

Prerequisite or corequisite: (ECON 15B or ECON 105A or MATH 130B) and (ECON 100B or ECON 105B or STAT 120B or MATH 133A) and (ECON 100C or STAT 120C)

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 132A. Introduction to Financial Investments. 4 Units.**

Modern theories of investment and their application to the study of financial markets. The relation between risk and return, diversification, asset pricing, efficient markets hypothesis, and the market valuation of stocks, bonds, options, and futures.

Prerequisite or corequisite: ECON 15A and ECON 15B and (ECON 122A or ECON 123A) and (ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C) or (MATH 130A and STAT 120A and STAT 120B and STAT 120C) or MATH 130B or MATH 133A

Overlaps with MGMT 141.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 134A. Corporate Finance. 4 Units.**

Provides an overview of the modern theory and practice of corporate finance and focuses on two fundamental financial decisions; investment as well as financing. Beginning with discounted cash flow analysis, basic theory will be applied to the valuation of stocks.

Prerequisite: (ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C) and (ECON 15A or MATH 130A or STAT 120A) and (ECON 15B or STAT 120B)

Overlaps with MGMT 109.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 135. Mathematics of Finance. 4 Units.**

After reviewing tools from probability, statistics, and elementary differential and partial differential equations, concepts such as hedging, arbitrage, Puts, Calls, the design of portfolios, the derivation and solution of the Blac-Scholes, and other equations are discussed.

Prerequisite: MATH 3A or MATH H3A

Same as MATH 176.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Mathematics Majors have first consideration for enrollment.

**ECON 137W. Financial Markets and the Macroeconomy. 4 Units.**

Students are required to write a paper on a research question related to.

Prerequisite: ECON 122A or ECON 123A. Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**ECON 139. Special Topics in Financial Economics. 4 Units.**

Studies in selected areas of Financial Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 140. Managerial Economics. 4 Units.**

A collection of concepts and methods for effective decision making. Explores how the tools of microeconomics, including game theory and industrial organization theory, can be used to make better managerial decisions, particularly those involving allocation of resources within firms.

Prerequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 141A. Public Economics I. 4 Units.**

Examines the role of the government in the economy and its impact on individuals and firms.

Prerequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

**ECON 141B. Public Economics II. 4 Units.**

Theory of public goods, externalities, voting models, analysis of bureaucracy, the Tiebout model, income redistribution, intergovernmental grants.

Prerequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 142A. Industrial Organization I. 4 Units.**

The theory of market structure. Imperfect markets, government policies, and industry performance.

Prerequisite: (ECON 15A and ECON 15B) and (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 142CW. Industrial Organization III. 4 Units.**

Research in industrial organization. Satisfies the honors research requirement.

Prerequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

(Ib)

**ECON 143. Energy Economics. 4 Units.**

The economics of markets for oil, natural gas, electricity, and renewable energy, and their interactions with each other and the rest of the economy. Effects of government intervention, policy measures, economic policy issues arising between energy use and the environment.

Prerequisite: ECON 15A and (ECON 100A or ECON 105A)

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 144A. Urban Economics I. 4 Units.**

Why cities exist, economics of urban land-use, housing demand and tenure choice, traffic congestion.

Prerequisite or corequisite: ECON 20A and ECON 20B. Recommended: ECON 100A.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 144B. Urban Economics II. 4 Units.**

Housing policy analysis, urban public goods and services, crime, pollution, urban amenities.

Prerequisite: ECON 20A and ECON 20B. Recommended: ECON 100A.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 145E. Economics of the Environment. 4 Units.**

Surveys economic aspects of natural resources, pollution, population, and the environment. Examines the causes of pollution; analysis of public policies regarding these problems. Emphasis on microeconomic aspects of environmental problems.

Prerequisite: ECON 100A or ECON 105A

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 145FW. Economics of the Environment II. 4 Units.**

Applications of the tools covered in ECON 145E to topics such as global warming, destruction of the ozone layer, and emissions trading. Emphasis on independent research papers. Syllabus and classes include writing technique.

Prerequisite: ECON 145E. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**(Ib)****ECON 145L. Economics of Law. 4 Units.**

Examination of several economic concepts which are useful in understanding legal rules: externalities, the assignment of property rights, and Coase's theorem. Examples are drawn from the fields of pollution control, no-fault insurance, medical malpractice, and product liability.

Prerequisite or corequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 146A. Illegal Economics. 4 Units.**

How illegal firms function in illegal markets, why individuals participate in these groups and markets, and what federal, state, and local governments do to disrupt organized illegal activity.

Same as CLS C182.

Restriction: Business Economics Majors have first consideration for enrollment. Criminology, Law and Society Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Social Ecology Majors have first consideration for enrollment.

**ECON 147A. Corporate Governance. 4 Units.**

Studies topics in the internal organization of firms, including rent seeking, incentive contracts, principal-agent problems, internal labor markets, contests, and herd behavior.

Prerequisite: ECON 100A

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 147B. Economics of Strategy. 4 Units.**

Uses tools of economics, game theory in particular, to develop an understanding of business decision-making. Deals with questions such as how the firm decides what kind of business to be in, how large should it be, and others.

Prerequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

Overlaps with MGMT 110, MGMT 168.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 148. Business Decisions. 4 Units.**

Surveys normative and descriptive models of decision-making behavior, with an emphasis on organizational and policy contexts. Topics include rational choice theory, biases and heuristics, framing effects, and overconfidence. Management fads, panics, and herd behavior are also discussed.

Prerequisite: (ANTH 10A and ANTH 10B and ANTH 10C) or (SOCL 10A and SOCL 10B and SOCL 10C) or (SSCI 10A and SSCI 10B and SSCI 10C) or (MATH 2A and MATH 2B and (STAT 7 or MGMT 7)) or (STAT 120A and STAT 120B and STAT 120C) or (ECON 15A and ECON 15B)

Same as SOCL 138.

Restriction: Sociology Majors have first consideration for enrollment.

**ECON 149. Special Topics in Economics of Public and Private Organizations. 4 Units.**

Studies in selected areas of Economics of Public and Private Organizations. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 149W. Special Topics in Economics of Public and Private Organizations. 4 Units.**

Studies in selected areas of Economics of Public and Private Organizations. Topics addressed vary each quarter.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

(Ib)

**ECON 151A. Labor Economics and Human Resources I. 4 Units.**

Labor demand, labor supply, human capital, personnel economics, and other topics.

Prerequisite: (ECON 15A and ECON 15B) and (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B)

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 152A. Economic Anthropology. 4 Units.**

Economic systems in comparative perspective: production, distribution, and consumption in market and non-market societies; agricultural development in the third world.

Prerequisite: One course in general science, anthropology, economics, geography, or sociology.

Same as ANTH 125A.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment. Anthropology Majors have first consideration for enrollment.

**ECON 154. Voting and Political Manipulation. 4 Units.**

Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Same as IS 156A, SSCI 121T, PLSC 151H.

Restriction: International Studies Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON H155. Current Issues in Political Economy. 4 Units.**

Political economy seeks explanations that combine insights from both economics and politics. Topics include the interaction of government and markets, the causes of the Great Recession, and the sources of income and wealth inequality.

Prerequisite: ECON 20A or ECON 20B or ECON 13 or IS 13

Restriction: Economics Honors students only.

**ECON 157. Economic Development. 4 Units.**

Considers the process of economic development across the globe and why some countries are rich and others poor. Discusses the major problems facing developing countries, such as population growth, education, capital formation, environmental protection, and international trade.

Prerequisite: ECON 20A and ECON 20B

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 158. Economics of Education. 4 Units.**

Arms students with tools, concepts, and evidence that can be used to analyze complex policy questions in education, enabling students to arrive at their own reasoned judgments about how to improve education.

Prerequisite: ECON 15A and ECON 100A

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 161A. Money and Banking. 4 Units.**

Basic elements of money and banking: institutional features and economics of financial markets and, in particular, the U.S. banking system; determinants of interest rates; the Federal Reserve and its role in money supply; effects of money on output and inflation.

Prerequisite or corequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B) and (ECON 100C or ECON 105C)

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 161B. International Money. 4 Units.**

Open economy macroeconomics and determination of exchange rates. Asset-market approach to the balance of payments. Internal and external balance in the economy. Macroeconomic policies under fixed and floating exchange rates. The international monetary system and institutions.

Prerequisite or corequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B) and ECON 100C

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 161D. Advanced Money and Banking. 4 Units.**

Studies business cycles in the United States during the last century. The first portion of the course reviews the theoretical models employed to study economic fluctuations and empirical methods used to measure fluctuations.

Prerequisite: ECON 161A and (ECON 100C or ECON 105C)

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

**ECON 162. Poverty, Growth, and Development. 4 Units.**

Examines India as a case study for each of the topics studied: growth experience of India along with its poverty eradication record, aspects of poverty, and the policies that have been undertaken to tackle poverty.

Prerequisite: (ECON 15A or STAT 120A) and (ECON 15B or STAT 120B) and (ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C)

**ECON 164AW. The Industrial Revolution in Western Europe. 4 Units.**

How do economists explain the process of economic development during the past three centuries? Has the process of industrialization affected living standards? Focusing on these questions, students learn how to apply economic theory and quantitative methods.

Prerequisite or corequisite: ECON 100C or ECON 105C. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Business Economics Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment.

(Ib)

**ECON 164C. American Economic History from Colonization to the Present. 4 Units.**

Examines how the American economy evolved from colonization to the post-war era. Topics include relations with foreign countries, the emergence of manufacturing and big business, railroads, slavery, war, the Great Depression, the rise of fiscal and monetary policies.

Prerequisite: ECON 20A and ECON 20B

**ECON 165. Economics of International Business . 4 Units.**

Students learn to understand and analyze the principal economic issues in the international business arena. Covers topics such as trade theory, foreign direct investment, foreign exchange market, and strategy of international business.

Prerequisite or corequisite: ECON 100C or ECON 105C

**ECON 167. International Trade and Commercial Policy. 4 Units.**

Determination of trade flows and the relative prices. Gains from trade, the terms of trade, and income distribution. Imperfect competition and international trade. The effect of tariffs, export subsidies, and import quotas. The effects of free and restricted trade.

Prerequisite: ECON 100A or ECON 105A

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 169. Special Topics in Development Economics. 4 Units.**

Studies in selected areas of Development Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**ECON 190. Senior Thesis. 4 Units.**

Students work with faculty to complete their honors thesis.

Repeatability: May be taken for credit 3 times.

**ECON 190BW. Economics Honors Colloquium II. 4 Units.**

Colloquium required for honors students in Economics, Quantitative Economics, and Business Economics. Introduces students to independent research and helps students plan a research program. Students complete their thesis.

Prerequisite: ECON H190A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Economics Honors students only.

**(Ib)****ECON H190A. Economics Honors Colloquium I. 4 Units.**

Colloquium required for honors students in economics, quantitative economics, and business economics. Introduces students to independent research. Helps students plan a research program. Prepares students for thesis writing.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Economics Honors students only.

**ECON 197. Field Study. 4 Units.**

Not listed in Catalogue.

Repeatability: Unlimited as topics vary.

Restriction: Authorization required or Enrollment by add card only

**ECON 198. Directed Group Study. 4 Units.**

Not listed in Catalogue.

Repeatability: Unlimited as topics vary.

Restriction: Authorization required or Enrollment by add card only

**ECON 199. Independent Study. 1-5 Units.**

Independent research with Economics faculty.

Repeatability: May be repeated for credit unlimited times.

**ECON 200A. Graduate Colloquium for Economics I. 2 Units.**

Weekly reports and colloquia by faculty, students, and visitors. Supplemented by class discussion of these presentations and other material on current research methodology.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Economics Majors only.

**ECON 200B. Graduate Colloquium for Economics II. 2 Units.**

Weekly reports and colloquia by faculty, students, and visitors. Supplemented by class discussion of these presentations and other material on current research methodology.

Prerequisite: ECON 200A

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Economics Majors only.

**ECON 200C. Graduate Colloquium for Economics III. 2 Units.**

Weekly reports and colloquia by faculty, students, and visitors. Supplemented by class discussion of these presentations and other material on current research methodology.

Prerequisite: ECON 200B

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only. Economics Majors only.

**ECON 202. Probability and Statistics. 4 Units.**

Provides lectures on probability theory and the beginning of mathematical statistics (continued in ECON 220A-ECON 221A) necessary to prepare students for the required econometrics sequence. Topics include probability, distributions, mathematical expectation, sampling, and point estimation.

Restriction: Graduate students only.

**ECON 203A. Mathematics for Economists. 4 Units.**

Gives students the mathematical background required for graduate work in economics. Topics covered include multivariate calculus, differential equations, and linear algebra.

Restriction: Graduate students only.

**ECON 210A. Microeconomic Theory I. 4 Units.**

Theoretical microeconomics. Emphasis on the meaning and empirical interpretation of theoretical models. Topics include theory of the firm, theory of the market, theory of the consumer, duality theory, application to econometrics, general equilibrium and welfare economics, uncertainty, game theory.

Restriction: Graduate students only.

**ECON 210B. Microeconomic Theory II. 4 Units.**

Theoretical microeconomics. Emphasis on the meaning and empirical interpretation of theoretical models. Topics include theory of the firm, theory of the market, theory of the consumer, duality theory, application to econometrics, general equilibrium and welfare economics, uncertainty, game theory.

Prerequisite: ECON 210A

Restriction: Graduate students only.

**ECON 210C. Microeconomic Theory III. 4 Units.**

Theoretical microeconomics. Emphasis on the meaning and empirical interpretation of theoretical models. Topics include theory of the firm, theory of the market, theory of the consumer, duality theory, application to econometrics, general equilibrium and welfare economics, uncertainty, game theory.

Prerequisite: ECON 210B

Restriction: Graduate students only.

**ECON 210D. Macroeconomic Theory I. 4 Units.**

Advanced macroeconomic theory including alternative macroeconomic models, microeconomic foundations of macroeconomics, investment and growth theory, inflation and unemployment, rational expectations and macroeconomic policy, wealth effects, crowding out and fiscal policy, money and interest, open economy models.

Restriction: Graduate students only.

**ECON 210E. Macroeconomic Theory II. 4 Units.**

Advanced macroeconomic theory including alternative macroeconomic models, microeconomic foundations of macroeconomics, investment and growth theory, inflation and unemployment, rational expectations and macroeconomic policy, wealth effects, crowding out and fiscal policy, money and interest, open economy models.

Corequisite: ECON 211L

Prerequisite: ECON 210D

Restriction: Graduate students only.

**ECON 210F. Macroeconomic Theory III. 4 Units.**

Advanced macroeconomic theory including alternative macroeconomic models, microeconomic foundations of macroeconomics, investment and growth theory, inflation and unemployment, rational expectations and macroeconomic policy, wealth effects, crowding out and fiscal policy, money and interest, open economy models.

Prerequisite: ECON 210E

Restriction: Graduate students only.

**ECON 211L. Macroeconomics Theory II Lab. 2 Units.**

Overview of stochastic processes; introduction to dynamic programming; two equilibrium concepts; Ricardian equivalence; real business cycle model; complete versus incomplete markets; asset pricing and the equity premium puzzle.

Corequisite: ECON 210E

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

**ECON 219. Special Topics in Economic Theory. 2-4 Units.**

Studies in selected areas of Economic Theory. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 220A. Statistics and Econometrics I. 4 Units.**

Takes up where ECON 202 leaves off. Continuing in the likelihood perspective, begins with Bayesian point estimation and then covers interval estimation and hypothesis testing from both frequentist and Bayesian perspectives.

Corequisite: ECON 221A

Restriction: Graduate students only.

**ECON 220B. Statistics and Econometrics II. 4 Units.**

Begins by relaxing the ideal conditions of the standard regression model. Potential topics include kernel density estimation, instrumental variables (IV), two stage least squares (2SLS), panel data models, and simulation-based Bayesian methods, including Gibbs sampling, and the bootstrap.

Corequisite: ECON 221B

Prerequisite: ECON 220A

Restriction: Graduate students only.

**ECON 220C. Statistics and Econometrics III. 4 Units.**

Covers econometric time series, discrete choice and count models, sample selection, and duration models along with Bayesian and classical asymptotic methods.

Corequisite: ECON 221C

Prerequisite: ECON 220B

Restriction: Graduate students only.

**ECON 221A. Statistics and Econometrics Laboratory I. 2 Units.**

Discussion of problems in statistics and econometrics, and their relationships to statistical and econometrics theory. Instruction in the use of computers for applied econometric work.

Corequisite: ECON 220A

**ECON 221B. Statistics and Econometrics Laboratory II. 2 Units.**

Discussion of problems in statistics and econometrics, and their relationships to statistical and econometrics theory. Instruction in the use of computers for applied econometric work.

Corequisite: ECON 220B

**ECON 221C. Statistics and Econometrics Laboratory III. 2 Units.**

Discussion of problems in statistics and econometrics, and their relationships to statistical and econometrics theory. Instruction in the use of computers for applied econometric work.

Corequisite: ECON 220C

**ECON 222. Replication and Applied Economics Writing. 4 Units.**

Before the course begins, students choose a published empirical economics article and obtain the necessary data to replicate it. Students will replicate and extend the economic analysis and write a paper describing their work.

Prerequisite: ECON 220A and ECON 220B and ECON 220C

**ECON 223A. Discrete Choice Econometrics. 4 Units.**

Specification, estimation, and testing of discrete choice models, with emphasis on cross-sectional and panel data models and applications. Students use computer packages to apply models and techniques to real data.

Prerequisite: ECON 220A and ECON 220B and ECON 220C

**ECON 224A. Time Series Econometrics. 4 Units.**

Econometric analysis of time series data. Moving average and autoregressive series, regression analysis, Box-Jenkins techniques, computational methods, and causality conditions.

Prerequisite: ECON 220A and ECON 220B and ECON 220C

**ECON 227A. Experimental Econ I. 4 Units.**

An introduction to experimental social science. Students learn experimental methodology, design, and analysis, and be exposed to active research areas. Each student writes a proposal for their own experiment and presents the design in class.

Restriction: Graduate students only.

**ECON 227B. Experimental Econ II. 4 Units.**

Focuses on implementing experimental projects in a laboratory environment. Subjects learn about human subjects protection, program experimental software for their own projects, and conduct live experiment sessions.

Restriction: Graduate students only.

**ECON 229. Special Topics in Econometrics. 2-4 Units.**

Studies in selected areas of Econometrics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 232. Business Cycles in Historical Perspective. 4 Units.**

Investigates business cycles in the United States and worldwide during the last two centuries. Topics include causes and consequences of business fluctuations, monetary and fiscal policy, models of fluctuations, and empirical macroeconomics.

Prerequisite: ECON 210A and ECON 210B and ECON 210C and ECON 210D and ECON 210E and ECON 210F

**ECON 234. American Economic History. 4 Units.**

Focuses on American economic history from colonization onwards. Topics include the development of legal systems, transport systems, financial markets, industrialization, migration, immigration, technological change, and the consequences of slavery.

Prerequisite: ECON 210A and ECON 210B and ECON 210C and ECON 210D and ECON 210E and ECON 210F

**ECON 239. Special Topics in Financial Economics. 2-4 Units.**

Studies in selected areas of Financial Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 241A. Industrial Organization I. 4 Units.**

Analysis of the structure and economic performance of markets, and the impact of public policy and their efficiency and equity. Effects of information structure. Oligopoly, cartels, mergers, vertical integration, patents, innovation, antitrust, and regulation.

Prerequisite: ECON 100B and ECON 203A

Restriction: Graduate students only.

**ECON 241B. Industrial Organization II. 4 Units.**

Analysis of the structure and economic performance of markets, and the impact of public policy and their efficiency and equity. Effects of information structure. Price flexibility and dispersion, auctions, search and industrial structure, intrafirm organization.

Prerequisite: ECON 241A and ECON 100B and ECON 203A

Restriction: Graduate students only.

**ECON 243A. Game Theory. 4 Units.**

A formal introduction to non-cooperative game theory. Topics include properties of Nash Equilibrium and equilibrium refinements, games with imperfect information, and games with incomplete information.

Prerequisite: ECON 210A and ECON 210B and ECON 210C

Restriction: Graduate students only.

**ECON 243B. Advanced Game Theory. 4 Units.**

Provides advanced instruction in game theory. The topics covered will be (i) the theory of repeated games and (ii) evolutionary game theory. Applications include bargaining, collusion, reputation, social norms, and the evolution of preferences via natural selection and cultural transmission.

Prerequisite: ECON 243A

Restriction: Graduate students only.

**ECON 245. Empirical Methods in Applied Microeconomics. 4 Units.**

Focuses on the empirical methods used in modern applied microeconomics. Teaches methods that can be applied to produce original research in applied fields using cross-sectional and panel data. Applications will be drawn heavily from labor, public, health and development economics.

**ECON 249. Special Topics in Microeconomics. 2-4 Units.**

Studies in selected areas of Microeconomics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

**ECON 251A. Labor Economics I . 4 Units.**

Analysis of the relationships between education and the labor market (human capital theory), between resources devoted to education and the return to education (the education production function) and between education and labor market inequality (the theory of skill-biased technical change).

Prerequisite: ECON 203A

Restriction: Graduate students only.

**ECON 251B. Labor Economics II. 4 Units.**

Analysis of core topics in labor economics, with an emphasis on empirical methods. Topics may include minimum wages, discrimination, gender, aging and retirement, labor market networks, personnel economics, and employment policy.

Prerequisite: ECON 203A

Restriction: Graduate students only.

**ECON 251C. Labor Economics III . 4 Units.**

Discussion of treatment effect/program evaluation in labor economics, emphasizing identification. Classical labor topics, including human capital, technology, wages, labor supply, and migration are discussed in the context of causal inference. A unified framework is used in analyzing identification strategies.

Prerequisite: ECON 203A

Restriction: Graduate students only.

**ECON 255. Microeconomics and Public Policy. 4 Units.**

Introduces the fundamental principles of microeconomics that are required for applied policy analysis. Provides students with an intuitive understanding of the microeconomic approach, and familiarizes them with concepts used in applied public policy analysis.

Repeatability: May be taken for credit 2 times.

Same as PPOL 240.

Restriction: Graduate students only.

**ECON 259. Special Topics in Labor Economics. 2-4 Units.**

Studies in selected areas of Labor Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 260B. Monetary Economics II. 4 Units.**

Surveys recent issues on monetary policy in uncertain environments. Examines settings where both the policy makers and the private sector are uncertain of future outcomes or the underlying economic structure.

**ECON 261A. International Trade I. 4 Units.**

Covers theoretical models, empirical methods, and policy issues in international trade. Following the conventional treatment of the Richardian model, the Heckscher-Ohlin model and the specific factors model, new trade models which incorporate scale economics and imperfect competition will be discussed.

Prerequisite: ECON 210A and ECON 210B

**ECON 263A. Advanced Macroeconomics I. 4 Units.**

Students build Dynamic Stochastic General Equilibrium (DSGE) macroeconomic models from microeconomic foundations. This approach emphasizes intertemporal optimization by firms and households and typically incorporates nominal rigidities such as sluggish price and/or wage adjustment.

**ECON 269. Special Topics in Macroeconomics. 2-4 Units.**

Studies in selected areas of Macroeconomics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 270A. Political Economy I. 4 Units.**

Political Economy lies at the intersection of economics and political science. Studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.

Restriction: Graduate students only.

**ECON 270B. Political Economy II. 4 Units.**

Political Economy lies at the intersection of economics and political science. Studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.

Prerequisite: ECON 270A

Restriction: Graduate students only.

**ECON 270C. Political Economy III. 4 Units.**

Political Economy lies at the intersection of economics and political science. Studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.

Prerequisite: ECON 270B

Restriction: Graduate students only.

**ECON 272A. Public Economics I. 4 Units.**

Covers two broad categories of government expenditure policies, redistribution programs, and social insurance, from a theoretical and empirical perspective, as well as the effects on individuals of the income tax system.

Prerequisite: ECON 210A and ECON 210B and ECON 210C

**ECON 272B. Public Economics II. 4 Units.**

Covers the theory of public goods and models of decentralized provision of such goods, including voluntary provision, voting, bureaucratic provision, and preference revelation mechanisms.

Prerequisite: ECON 210A and ECON 210B and ECON 210C

**ECON 275. Economics of Government. 4 Units.**

Prepares students to analyze public policy questions with tools from economics. By the end, students should be able to identify important economic issues in public policy debates and consume and critique economic research on these topics.

Same as PPOL 227.

**ECON 279. Special Topics in Political Economy. 2-4 Units.**

Studies in selected areas of Political Economy. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 281A. Urban Economics I. 4 Units.**

Economic reasons for the existence of cities, analysis of urban spatial structure, urban sprawl, Third World urbanization, hedonic price analysis, housing tenure choice.

Prerequisite: ECON 210A

**ECON 281B. Urban Economics II. 4 Units.**

Housing in the portfolio, land-use controls, rent control, homelessness, neighborhood effects, urban quality-of-life measurement, and subcenters.

Prerequisite: ECON 210A

**ECON 282A. Transportation Economics I. 4 Units.**

Applies microeconomic concepts of demand, costs, pricing, investment, and project evaluation to analyze transportation activities. Empirical studies include travel demand using discrete models, and cost functions.

Restriction: Graduate students only.

**ECON 282B. Transportation Economics II. 4 Units.**

Economics of the airline industry. Hub-and-spoke networks, the effects of competition on airfares, price dispersion, airline alliances, airport congestion, product unbundling.

Prerequisite: ECON 282A

Restriction: Graduate students only.

**ECON 289. Special Topics in Urban and Transportation Economics. 2-4 Units.**

Studies in selected areas of Urban and Transportation Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

**ECON 290. Dissertation Research. 2-12 Units.**

Dissertation research with Economics faculty.

Repeatability: May be repeated for credit unlimited times.

**ECON 299. Independent Study. 2-4 Units.**

Independent research with Economics faculty.

Repeatability: May be repeated for credit unlimited times.

## International Studies Courses

**INTL ST 1. Introduction to Global Studies. 4 Units.**

Ongoing historical processes that increase global integration, the social, economic, and political interdependence of different regions, cultures, and peoples. Topics include ancient empires, colonialism, nationalism, industrialization, modern imperialism and warfare, decolonization, global social movements, conflict, inequality, and global governance.

Same as SOC SCI 4A.

Restriction: International Studies Majors have first consideration for enrollment.

(III and VIII ).

**INTL ST 11. Global Cultures and Society. 4 Units.**

Offers a general overview of the rise of global interdependence in political, economic, demographic, and cultural terms. Considers what drove people from relative isolation into intensified intercourse with one another, and investigates the consequences of this shift.

Same as ANTHRO 41A.

Restriction: Anthropology Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(III and VIII ).

**INTL ST 12. Global Political Ideologies. 4 Units.**

An overview of the major political ideologies shaping the current world order and global conflict. Topics include liberalism, democracy, nationalism, capitalism, communism, socialism, fascism, neoliberalism, clash of civilizations, sectarian violence, populist nationalism, and de-globalization.

Same as POL SCI 44B, SOC SCI 12.

Restriction: International Studies Majors have first consideration for enrollment.

(III and VIII ).

**INTL ST 13. Global Economy. 4 Units.**

Acquaints students with the fundamental patterns of the global economy. Emphasizes the historical roots and political implications of economic choices.

Same as ECON 13.

Restriction: International Studies Majors have first consideration for enrollment. Economics Majors have first consideration for enrollment. Quantitative Economics Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

(III, VIII)

**INTL ST 14. Introduction to International Relations. 4 Units.**

Analysis of political relations between and among nations with emphasis on explanations of conflict and cooperation. The role of ideologies and their relation to international problems are also examined.

Same as POL SCI 41A.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**(III and VIII ).**

**INTL ST 15. Global Political Economy. 4 Units.**

The global economy as an integrated system. The rise of world trade, capitalism, national economies, market cycles, competing economic ideologies, development, globalization, transnational labor, multinational corporations, and the role of UN, World Bank, WTO, and the IMF in global governance.

Same as SOC SCI 15.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

**(III and VIII ).**

**INTL ST 16. Human Rights and Global Governance. 4 Units.**

Historical development of civil, political rights and the rise of human rights in international law. Explores role, and limitations, of the UN, ICJ, and ICC in global governance. Reconceptualizing democracy and political representation in a postnational 21st century.

Same as POL SCI 45A, SOC SCI 16.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

**(III and VIII ).**

**INTL ST 17. Global Environmental Issues. 4 Units.**

Examines problems such as global climate change, growing human populations, fisheries depletion, ocean acidification, biodiversity loss, deforestation, and food security. Introduces political, social, and economic factors contributing to environmental issues and their disproportional impacts on the world's poor and minorities.

Same as SOC SCI 17.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

**(III and VIII ).**

**INTL ST 32A. Dilemmas of Diversity. 4 Units.**

Focuses on racial, ethnic, and gender diversity, multiculturalism, and their impact on our social and political ideals. Traces the sources of ideas about difference, equality, and toleration, and examines tensions that occur when forms of identity conflict with one another.

Same as POL SCI 32A.

**(VII)**

**INTL ST 100. Global Trials. 4 Units.**

Explores landmark legal trials that have impacted both domestic and world affairs. The trials provide a lens through which to explore society at the time, as well as shed light on the historical legacies of current social, political, and legal values.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 101A. Global Social Movements. 4 Units.**

The evolution of global social movements over past 250 years. Age of Revolutions in America, France, and Haiti; nationalism and labor; 1960s global decolonization; 21st century Latin American indigenous movements; Occupy Wall Street, Arab Spring, and social media's #metoo, #BlackLivesMatter.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 101B. Global Cities and Slums. 4 Units.**

Cities as a window into contemporary challenges of the globalized world. Global cities such as Los Angeles, London, and Beijing compared with cities with slums in the global south such as Rio de Janeiro, Johannesburg, and Mumbai.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 102A. Global Refugees and Stateless People. 4 Units.**

Examines the reason behind global refugee crises, and what it means to be a displaced migrant or stateless person in history and in contemporary society. Links case studies about refugees around the world.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 102B. Global Asia and Orientalism. 4 Units.**

Examines how the modern world is divided between East and West in the age of globalization. Through the postcolonial framework of Orientalism, it considers a pluralistic idea of Asia and the current notion of the new world order as one.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 103A. Case Studies in Global and Planetary Health. 4 Units.**

Explores critical global health and planetary health studies, linking past trends to current research of health inequalities. Case studies include maternal-fetal mortality, environmental contamination, disaster preparedness, pharmaceutical development and access, and humanitarian aid interventions.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 104A. Global Trafficking. 4 Units.**

Explores trafficking in different global contexts. Covers sex trafficking, labor trafficking, and organ trafficking. Tracks the use of the concept in policy, human rights, law, humanitarianism, and media. Provides a complex and nuanced understanding of the problem and its solutions.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 104BW. Global Gender and Sexuality. 4 Units.**

Develops critical insights into gender and sexuality as products of the world around us and as lived experiences across the globe. Topics include agency and resistance, intersectionality, feminisms, colonialism, heteronormativity, gender violence, masculinities, media and popular culture, globalization and migration.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**(Ib)****INTL ST 106A. Global Political Ecology. 4 Units.**

Introduction to political ecology and critical analysis of the global scale and globalization. Topics include current and historical climate change, fossil fuels, international trade and investment, soil erosion and pollution, deforestation, waste, ocean ecology, water crisis, wars, revolutions, and refugees.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 106B. Global Food Environment. 4 Units.**

Examines the global political ecology of food, focusing on the U.S., China, and Brazil. Topics include the history of agriculture, imperialism/neocolonialism, Malthusianism, migration, agro-industrialization, deforestation, GMOs, agrochemicals, soil and water contamination, land struggles, food security/safety/sovereignty, dietary habits, and climate change.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**INTL ST 111B. World of Coffee . 4 Units.**

History of consumption and production of coffee over the centuries, and coffee's cultural, economic, social, political consequences. Coffee's social life as a drug, symbol of hospitality, religious rite, sociability and bourgeois lifestyle, commodity, source of livelihoods, imperial revenues, corporate profits.

Same as HISTORY 163.

**INTL ST 112A. International Business. 4 Units.**

Introduction to conducting business in the international arena, decision making in the organization, and globalization of markets and production. Topics covered range from tax and finance to ethics, marketing, and more. Continuing corporate regulatory scandals discussed.

Same as SOC SCI 115D.

**INTL ST 114A. International Political Economy. 4 Units.**

Examination of problems in global political-economic relations through competing conceptual lenses or grand theories: mercantilism, liberalism, and Marxism. Surveys North-North and North-South issues relating power and wealth.

Same as POL SCI 141B.

**(VIII)**

**INTL ST 115. Global Poverty and Inequality in the 21st Century. 4 Units.**

Explores a multidisciplinary understanding of poverty and inequality in the 21st century and assesses impact of education, health, technology, and other interventions. Course offered online only.

Same as UPPP 115.

**INTL ST 117A. Transnational Migration. 4 Units.**

Examines the movement of people across national borders, governmentality and the role of state practices to control populations, and issues of citizenship, belonging, and identity. Examples are drawn from the United States, Europe, Latin America, Asia, and Africa.

Same as CHC/LAT 161, ANTHRO 125X.

**(VIII)****INTL ST 122. Nuclear Environments. 4 Units.**

Understanding the impact of the nuclear age on the environment and human health through interrelated developments of nuclear power and nuclear weapons. The early years of weapon development, catastrophic environmental pollution, perils of nuclear power in the U.S. and Russia.

Same as SOCECOL E127, PUBHLTH 168.

**(VIII)****INTL ST 124A. Introduction to the Comparative Study of Legal Cultures. 4 Units.**

Traces the anthropological and comparative cultural study of law from the nineteenth century to the present; briefly surveys the diversity of recorded legal cultures and critically examines key concepts which have been used to describe and classify them.

Same as CRM/LAW C102.

Restriction: Criminology, Law and Society Majors have first consideration for enrollment. SocEcol-Urban & Regional Plan Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 130. Transnational Gangs. 4 Units.**

Examines the internationalization of U.S. domestic street gangs. The relationship between California gangs Mara Salvatrucha and 18th Street and Mexico/Central American gangs is assessed. Specified topics include: mobilization, migration, territorialism, culture, organization, and use of technology.

Same as SOC SCI 120.

Overlaps with SOC SCI XI120, INTL ST XI130.

**INTL ST 131A. Just War Revisited. 4 Units.**

Examines the evolution of the doctrine of the just war across the history of Western political thought, the importance of changes in the doctrine and whether it applies today; examines international relations case studies to determine today's relevancy.

Same as POL SCI 135B.

**INTL ST 140A. Approaches to International Relations. 4 Units.**

Reviews theoretical and methodological approaches to the study of international relations using contending perspectives to analyze power and influence, capabilities, interdependence, reciprocity, international regimes, anarchy, cooperation, imperialism, and hegemony.

Same as POL SCI 144A.

Restriction: Upper-division students only. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 141B. Homeland Security . 4.0 Units.**

Examines the 9/11 origins of the concept of homeland security; assess the evolution, structure, and operations of the Department of Homeland Security; critically examines the evolution of threat assessment to the U.S. and the utilization of risk management methodologies.

Same as POL SCI 143G.

**INTL ST 142A. U.S. Foreign Policy I: Globalism and Cold War. 4 Units.**

Looks at changing international perspectives, policy responses, and military strategies of presidential administrations from Truman to Reagan. In assessing the motives and objectives of U.S. foreign policy leaders during the "Cold War" era, the concept of "national interest" is examined.

Same as POL SCI 142D.

Restriction: International Studies Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment.

**INTL ST 142D. The International Relations of East Asia. 4 Units.**

Surveys various aspects of relations between the nations of East Asia. Topics include the historical development of the region; current political and security relations, including the impact of the American military presence.

Same as POL SCI 142B.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 142E. U.S. Coercive Diplomacy. 4 Units.**

Examines the theory of compellence and the U.S. practice of coercive diplomacy--the power to change behavior of other governments. Specific case examples: the Cuban missile crisis, bombing of North Vietnam, the Nicaraguan Contras, Desert Shield/Desert Storm, and Libya.

Same as POL SCI 142G.

Restriction: Upper-division students only. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 142G. U.S. Foreign Policy Toward Asia. 4 Units.**

U.S. policy toward the countries of East Asia: bilateral and regional security relationships, U.S. economic relations with the major Asian countries, the development of regional institutions, and human rights.

Same as POL SCI 141E.

**INTL ST 143A. Vietnam War. 4 Units.**

Examines social structures and social changes in Vietnamese and U.S. societies through the study of the Vietnam War.

Same as SOCIOL 170A.

**INTL ST 144A. Comparative Politics: Four Nations, Three Continents. 4 Units.**

Studies four countries in a comparative fashion: their respective political histories and cultural traditions; actual differences among their superficially similar party, parliamentary, and executive institutions; contemporary economic policy. The countries represent three continents and varying levels of economic development.

Same as POL SCI 154C.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 145A. International Law. 4 Units.**

Examination of the origin, changing structure, application of international law, and the role of legal norms in regulating the behavior of states and maintaining international order.

Prerequisite: POL SCI 71A

Same as POL SCI 172A.

**(VIII)****INTL ST 147CW. International Humanitarianism. 4 Units.**

Examines, analyzes, and evaluates the humanitarian phenomenon, the actors involved in it (including states, international organizations (IOs), and nongovernmental organizations (NGOs)), the rise of a body of international humanitarian law, and the problems and debates associated with international humanitarianism today.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as POL SCI 147CW.

**(Ib)****INTL ST 147D. International Organizations. 4 Units.**

Active learning course that examines origins, decision-making processes, activities, and evolution of leading international organizations (e.g. U.N., NATO, EU, AU, WTO, World Bank, IMF). Activities include drafting reforms, applying theory, assessing dysfunctions, and participating in U.N. negotiation simulations.

Same as POL SCI 147D.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 148W. Global Futures. 4 Units.**

Develops critical insights into our collective future as it reflects different perspectives of the world. Topics include techno-orientalism, afro-futurism, feminist futures, indigenous cosmology, and environmental concerns.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: International Studies Majors have first consideration for enrollment. International Studies Minors have first consideration for enrollment.

**(Ib)**

**INTL ST 150. Racism and Global Apartheid. 4 Units.**

The concept of race has been used to draw a global color line dividing rich from poor, developed from developing, first from third worlds. Racism is used to justify slavery, colonialism, imperialism, eugenics, genocide, and extreme inequalities produced by globalization.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

**INTL ST 151B. Religion and World Politics. 4 Units.**

Examines the relationship between religion and world politics historically and today, focusing on connections with peace/war, democracy, human rights, secularism(s), and globalization. Covers major debates, scholarship, concepts, and theories through class exercises, exams, and essays.

Prerequisite: POL SCI 41A or INTL ST 11 or INTL ST 12 or REL STD 5A or REL STD 5B or REL STD 5C

Same as POL SCI 146B, REL STD 115.

**INTL ST 152A. Non-Government Organization (NGO) Fundamentals. 4 Units.**

Introduction to non-governmental organizations, including their role in U.S. society and the international community. Explores varying definitions of NGOs and the characteristics held in common by all NGOs.

Same as SOC SCI 152A.

**INTL ST 153B. Cross-Cultural Studies of Gender. 4 Units.**

Explores the construction of gender in national and transnational contexts. Special attention is given to how race, sexuality, class, and global inequalities shape different experiences of gender, and how gender structures political, institutional, and social life across the world.

Same as ANTHRO 121D.

**(VII)**

**INTL ST 153C. Urban Anthropology. 4 Units.**

Cultural roles of urban centers and processes of urbanization in comparative perspective, focusing on both nonwestern, nonindustrial societies of past and present; the relationship between modern urban centers and Third World peoples. Migration, urban poverty, in Africa, Asia, Latin America.

Same as ANTHRO 121J.

**INTL ST 153D. Colonialism and Gender. 4 Units.**

An anthropological enquiry into the ways colonial relations of power have been structured and gendered throughout the world, and to what effect. Examines the social locations of men and women in the everyday exercise of colonial and imperial power.

Same as ANTHRO 136G.

Restriction: Anthropology Majors have first consideration for enrollment.

**INTL ST 153E. Nationalism and Ethnicity in the Contemporary World. 4 Units.**

An exploration of the concepts of identity, culture, ethnicity, race, and nation through ethnographic cases, with a view to asking larger questions: how do people create nativeness and foreignness? How does 'culture' get worked into contemporary racisms and nationalisms.

Same as ANTHRO 136A.

**(VIII)**

**INTL ST 153F. Militarism and Gender. 4 Units.**

Examination of feminist approaches to militarism, war, and political violence; drawing on representations of women as both victims of and participants in military violence; effects of militarism on formations of gender; effects of military industrial complex on nationalism and identity.

Same as GEN&SEX 167A.

**INTL ST 154B. Human Rights. 4 Units.**

Examines the causes and consequences of human rights violations with a focus on Latin America. What are human rights? When and where are they violated? What political mechanisms are available to deal with human rights problems? How effective are they.

Same as POL SCI 153E.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 154C. Ethics in an Age of Terror and Genocide. 4 Units.**

Original sources document personal impact of wars on genocides, from World War II to the Bosnian and Rwandan genocides and current wars in Iraq and Afghanistan. Students train for and conduct personal interviews with someone who lived through a war.

Same as POL SCI 145A.

**INTL ST 154W. Ethics and Justice in International Affairs. 4 Units.**

Analyzes choices regarding the use of force, resolving conflict, and promoting human rights and social justice. Special attention is given to the American experience as a principal case study of ethics and statecraft.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. International Studies Majors have first consideration for enrollment.

**(Ib)****INTL ST 156A. Voting and Political Manipulation. 4 Units.**

Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Same as POL SCI 151H, SOC SCI 121T, ECON 154.

Restriction: International Studies Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment. Business Economics Majors have first consideration for enrollment.

**INTL ST 157A. 21st Century Africa. 4 Units.**

Comparative studies of the cultures and societies of Sub-Saharan Africa, with emphasis on critical study of colonialism and postcoloniality, social transformation, and the politics of identity.

Prerequisite: ANTHRO 2A

Same as ANTHRO 164A.

Restriction: Anthropology Majors have first consideration for enrollment.

**(Ib)****INTL ST 157C. Comparing European and US Societies. 4 Units.**

Society, culture, institutions of U.S. and European countries. Fertility to football, guns to government, work to welfare, health to housework. Cross-national approaches for understanding the world and thinking critically about taken-for-granted practices. Policies the U.S. might borrow for social issues.

Same as SOCIOL 157C.

**INTL ST 158B. Peoples of the Pacific. 4 Units.**

The cultural history and recent developments among the Pacific peoples of Polynesia, Micronesia, Melanesia, New Guinea, and Australia.

Same as ANTHRO 163A.

**(VIII)****INTL ST 158D. China in the Global Age. 4 Units.**

Chinese society from 1949 to present. Social change in the context of political control and ideological considerations. Focus on the power structure, political decision processes, and ideological legitimization, and interplay with the Chinese community and its culture.

Same as SOCIOL 175B.

**INTL ST 161A. Political Islam. 4 Units.**

Political Islam is a diverse phenomenon. While noticeable barriers exist to 'Islamist democracy,' it is the Islamists who will define the political future of much of the Muslim world. Reviews the experience of Saudi Arabia, Egypt, Pakistan, Turkey, and Indonesia.

Same as SOC SCI 188K.

**INTL ST 162B. Peoples and Cultures of Post-Soviet Eurasia. 4 Units.**

Examines the cultures and political conflicts of the more than 130 indigenous ethnic groups in the European and Asian territories of the former U.S.S.R. Emphasis is on the theoretical issues of ethnicity, nationalism, and conflict management.

Same as POL SCI 154F, ANTHRO 164P.

**(VIII)**

**INTL ST 163. Global Inequalities. 4 Units.**

An examination of various forms of social, economic, and political inequality within and between nations. Different approaches to understanding inequality and the intersections of poverty, race, ethnicity, class, gender, nationality, health, and violence.

Restriction: International Studies Majors have first consideration for enrollment.

**INTL ST 165. Introduction to Contemporary Middle East Politics. 4 Units.**

An overview of basic issues that shape the politics of the Middle East and North Africa. Themes include implication of the colonization era, nation-state formation, inter-Arab relations, nationalism, Arab-Israel conflict, Islamic resurgence, and more.

Same as SOC SCI 188A, POL SCI 158D.

**INTL ST 175A. U.S. War on Terrorism. 4.0 Units.**

Analyzes the United States war on terrorism by focusing on terrorism, the U.S. wars in Afghanistan and Iraq, and changes in police powers through the Patriot Act, as well as the political leadership which directs the war.

Same as SOCIOL 170B.

**INTL ST 176C. Introduction to Chinese Politics. 4 Units.**

Background to the Chinese revolution, rise of the communist party; and institutions, ideology, and structure of Communist party rule from 1949-present.

Same as POL SCI 151B.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 176D. Chinese Politics: Policy, Leadership, and Change. 4 Units.**

Examines major policies from 1949 to the present, and considers the changing role of the Communist Party and its shifting treatment of various social groups; the era of Mao Zedong, reforms under Deng, and post-Deng politics.

Same as POL SCI 151C.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 176I. West European Politics. 4 Units.**

Explores four main themes: (1) thinking scientifically about politics; (2) understanding the linkages between different political structures and spheres of activity; (3) evaluating some theories about politics; (4) learning about three countries: Britain, France, and Germany.

Same as POL SCI 152F.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 176L. Canadian Politics. 4 Units.**

Addresses the basic structures and processes of contemporary Canadian government and politics. Additional topics may include regionalism, federalism, western alienation and oil, Canadian solutions to social welfare policy questions, developments in Quebec, and other issues associated with French-English relations.

Same as POL SCI 153B.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**INTL ST 177C. Revolution in Latin America. 4 Units.**

Presents a comparative analysis of the causes, development, and consequences of selected revolutionary movements, focusing on outbreaks in Mexico, Bolivia, Cuba, Chile, Nicaragua, and Grenada. Explores topics of state formation, economic nationalism, social justice, ethnicity, and role of international affairs.

Same as CHC/LAT 151B, HISTORY 166D, SOC SCI 173N.

**INTL ST 177D. U.S. Intervention in Latin America. 4 Units.**

Explores political, economic, social, and cultural ties that bind Latin America to the United States. Focuses on U.S. intervention and Latin American response from early nineteenth century to present day. Case studies include Mexico, Guatemala, Cuba, Chile, and Central America.

Same as POL SCI 142J, HISTORY 166, CHC/LAT 150.

**INTL ST 177E. Cuban Society and Revolution. 4 Units.**

Explores the causes, development, and legacy of the 1959 Revolution. Themes include economic dependency, democracy, race, gender, culture, and the always volatile relations between Cuba and the United States.

Same as POL SCI 153G, HISTORY 166C, CHC/LAT 157.

**INTL ST 177G. Revolution and Reaction in Cold War Latin America. 4 Units.**

Explores Latin American experiences of revolutionary change and military dictatorship during the Cold War (1945-1990). Pays particular attention to the lives of women, peasants, workers, and the urban middle classes. Case studies include Guatemala, Cuba, Chile, Argentina, Nicaragua, and Mexico.

Same as HISTORY 166B.

**INTL ST 177I. Ancient Civilization of Mexico and the Southwest. 4 Units.**

The prehistory and cultural evolution of the civilization which originated in Mexico, including the Olmecs, Aztecs, Toltecs, Maya, and Zapotec, as well as the Pueblos of the Southwestern U.S. Topics include the origins of food production and of the state.

Same as ANTHRO 141A.

**INTL ST 177J. Peoples and Cultures of Latin America. 4 Units.**

Surveys the prehistory of Latin America and its indigenous cultures, emphasizing the impact of colonial rule, capitalism, and twentieth-century transformations. Emphasis on communities from several countries. In some years, emphasis on comparisons between the Latin American and Caribbean experiences.

Same as ANTHRO 162A, CHC/LAT 120.

**(VIII)****INTL ST 178A. Immigration Politics in Western Europe. 4 Units.**

Examines immigration politics in Western Europe, analyzing trends and policy from the postwar period through to today. Topics include citizenship, immigrant integration, asylum, the far-right, and a rotating focus on contemporary issues, e.g., terrorism, Islamophobia.

Same as POL SCI 152K.

Overlaps with POL SCI 141D.

**INTL ST 179. Special Topics: Geographic Focus in International Studies. 4 Units.**

Studies in selected areas of international studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**INTL ST H180. International Studies Honors Research Seminar. 4 Units.**

Assists students to prepare a thesis prospectus for the Honors Program in International Studies. Students choose a topic, learn writing and research methods, write a prospectus and orally present and defend it, and conduct a literature review.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Honors students only.

**INTL ST 183A. Global and International Studies Forum. 4 Units.**

A faculty-student forum featuring lectures from a variety of institutions with discussion issues related to Global and International Studies.

Repeatability: May be taken for credit 4 times.

Same as SOCECOL 183A, SOC SCI 183A.

**INTL ST 183B. Seminar in Mediation. 4 Units.**

Student develop mediation skills and refine knowledge in the practice and theory of conflict resolution. Students who complete this course may serve as mediators in the Campus Mediation Program. Course is a prerequisite to completing Indep Study as an intern.

Same as SOC SCI 183B, SOCECOL 183B.

Restriction: International Studies Majors have first consideration for enrollment. School of Humanities students have first consideration for enrollment. School of Social Ecology students have first consideration for enrollment. School of Social Sciences students have first consideration for enrollment.

**INTL ST 183CW. Seminar Conflict Resolution. 4 Units.**

Designed for seniors who are pursuing the minor in Conflict Resolution and/or International Studies major. Provides a forum in which students will refine skills and theory in the study of cooperation and conflict, from local to global arenas.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOCECOL 183CW, SOC SCI 183CW.

**(Ib)**

**INTL ST 183E. Conflict Resolution in Cross-Cultural Perspective. 4 Units.**

Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as ANTHRO 136D, SOC SCI 183E, POL SCI 154G.

**(VIII)**

**INTL ST 189. Special Topics: Global Focus in International Studies. 2-4 Units.**

Studies in selected areas of international studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**INTL ST H190. Honors Thesis. 4 Units.**

Students work with faculty to complete their honors thesis.

Repeatability: May be taken for credit 2 times.

Restriction: International Studies Honors students only.

**INTL ST 199. Individual Study. 2-4 Units.**

Students participate in planned research and study under written contract with a supervising UCI instructor. Students may enroll for only one individual study course each quarter.

Repeatability: Unlimited as topics vary.

**INTL ST 201. What is Global Studies?. 4 Units.**

Introduces graduates to the field of global and international studies. Landmark studies outline the transition from globalization studies to contemporary global studies. Identify complex global issues, underlying processes of globalization, and the impacts they have on people around the world.

Restriction: Graduate students only.

**INTL ST 202. Foundations of European Social Thought. 4 Units.**

Provides graduate students with a broad overview of the major landmarks in the development of modern social thought. Introduces key philosophers and theorists Adam Smith, Marx, Durkheim, Weber, Freud, and Du Bois, focusing on the global dimensions of their work.

Restriction: Graduate students only.

**INTL ST 203. Globalizing Social Theory in the Age of Extremes. 4 Units.**

Examines important developments in social theory between 1914 and 1991. The overarching goal is to synthesize from these various approaches a critical and transdisciplinary theoretical framework to analyze complex global issues.

Restriction: Graduate students only.

**INTL ST 204. Theories of Globalization. 4 Units.**

Theories of globalization engage deep historical transformations, keeping the interrelated dynamics of economics, politics, and culture in focus. Theories examine transformations emanating at transnational and state levels, and from below in the form of social movements led by everyday people.

Restriction: Graduate students only.

**INTL ST 205. Theories from the Global South. 4 Units.**

Looking beyond the theoretical traditions of the Euro-American academy scholars can begin to engage important theoretical contributions from the Global South. Explores alternative standpoints and interventions challenging dominant narratives and calling into question taken-for-granted assumptions, categories, concepts, values, and perspectives.

Restriction: Graduate students only.

**INTL ST 206. Engaging Global Issues. 4 Units.**

Critical and interdisciplinary works on global issues serve as examples that graduates can use in their own research. Each week focuses on a different example of outstanding global research done by a scholar having an important impact on the field.

Restriction: Graduate students only.

**INTL ST 207. Research Design and Methods . 4 Units.**

Fundamentals of empirical research design, strategies for global research, sampling logics, reliability, validity, mixed methods, integrating qualitative and quantitative methods. Introduction to basic data collection methods and examples of more advanced methodological strategies. Research ethics and the IRB review process.

Restriction: Graduate students only.

**INTL ST 208. Grant Writing. 4 Units.**

Focuses on production, critique, and revision of student research proposals. A practical seminar designed to improve student proposals, help students through the application processes, and increase students' chances of obtaining support for their research.

Restriction: Graduate students only.

**INTL ST 210A. Proseminar in Global Studies I. 4 Units.**

Year-long intensive introduction to graduate students to a range of topics pertinent to the field of Global Studies. The guest speakers and topics addressed vary each quarter.

Repeatability: May be taken for credit 6 times.

Restriction: Graduate students only.

**INTL ST 210B. Proseminar in Global Studies II. 4 Units.**

Year-long intensive introduction to graduate students to a range of topics pertinent to the field of Global Studies. The guest speakers and topics addressed vary each quarter.

Repeatability: May be taken for credit 6 times.

Restriction: Graduate students only.

**INTL ST 210C. Proseminar in Global Studies III. 4 Units.**

Year-long intensive introduction to graduate students to a range of topics pertinent to the field of Global Studies. The guest speakers and topics addressed vary each quarter.

Repeatability: May be taken for credit 6 times.

Restriction: Graduate students only.

**INTL ST 260. Directed Reading and Research. 4-12 Units.**

Readings focused on specialized topics in consultation with, and with the consent of, a faculty member. Students are expected to produce a paper based on the readings.

Repeatability: May be taken for credit 6 times.

Restriction: Graduate students only.

**INTL ST 290. Dissertation Research. 1-12 Units.**

Dissertation research with Global and International Studies faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**INTL ST 299. Independent Study. 4-12 Units.**

Independent research with Global and International Studies faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

## Linguistics Courses

**LINGUIS 150. Acquisition of Language II. 4 Units.**

Focuses on native language learning, exploring the way in which infants and very young children unconsciously uncover the rich systematic knowledge of their native language. Examines both experimental and computational studies that quantitatively investigate the 'how' of language acquisition.

Prerequisite: PSYCH 56L or LINGUIS 51

Same as PSYCH 156A.

Restriction: Cognitive Sciences Majors have first consideration for enrollment. Psychology Majors have first consideration for enrollment.

## Logic and Philosophy of Science Courses

**LPS 29. Critical Reasoning. 4 Units.**

Introduction to analysis and reasoning. The concepts of argument, premise, and conclusion, validity and invalidity, consistency and inconsistency. Identifying and assessing premises and inferences. Deductive versus inductive reasoning, and introduction to the probability calculus. Evaluating definitions. Informal fallacies.

Same as PHIL 29.

(II and Vb ).

**LPS 30. Introduction to Symbolic Logic. 4 Units.**

An introduction to the symbolism and methods of the logic of statements, including evaluation of arguments by truth tables, the techniques of natural deduction, and semantic tableaux.

Same as LSCI 43, PHIL 30.

(Vb)

**LPS 31. Introduction to Inductive Logic. 4 Units.**

Philosophical questions concerning the foundations of scientific inference, e.g., the traditional problem of induction, the Goodman paradox, the concept of cause, Mill's method of inductive reasoning, probability calculus, different interpretations of probability, and their interaction in inductive reasoning.

Same as PHIL 31.

(II, Va)

**LPS 40. The Nature of Scientific Inquiry. 4 Units.**

Investigates the nature, scope, and status of scientific knowledge and the methods used to acquire it. Uses concrete historical examples from a variety of scientific fields to identify distinctive features of the scientific enterprise and explore their significance.

(II)

**LPS 60. The Making of Modern Science. 4 Units.**

Surveys the history of science and mathematics since the Scientific Revolution, examining central developments both chronologically and thematically, as well as investigating their significance for contemporary philosophical debates about the role and status of current scientific theories.

Same as HIST 60.

(GE II or GE IV ).

**LPS H80. Scientific Realism and Instrumentalism. 4 Units.**

Explores competing views of the character and status of theoretical knowledge in science, including challenges to and defenses of the view that contemporary scientific theories offer straightforward and accurate descriptions of how things stand in otherwise inaccessible domains of nature.

Restriction: Campuswide Honors Collegium students only.

(II)

**LPS H81. What is Space? . 4 Units.**

Historical, philosophical, scientific exploration of the concept of 'space.' Questions of interest include: What kind of a thing is space? How can we know what space is like? How is space different from time.

Restriction: Campuswide Honors Collegium students only.

(II)

**LPS 91. The Philosophy of Sex. 4 Units.**

Discusses the origins of biological sex, dynamics of sexual selection, sex differences in humans, and the construction of gender in human societies. Seeks to understand the role social values play in the creation of science.

Same as PHIL 91.

Overlaps with LPS H91.

(III)

**LPS H91. The Philosophy and Biology of Sex. 4 Units.**

Covers the origins of biological sex, dynamics of sexual selection, the evolution and cultural creation of sexual behavior in humans, and the construction of gender in human societies.

Restriction: Campuswide Honors Collegium students only.

(II and III ).

**LPS H95. Jurisprudence and Constitutional Law. 4 Units.**

Applies competing theories of the nature of law and legal reasoning to evaluate decisions of the U.S. Supreme Court in controversial areas of constitutional law such as free speech, privacy, sexual conduct, affirmative action, and political campaign contributions.

Restriction: Campuswide Honors Collegium students only.

(III)

**LPS 100W. Writing Philosophy. 4 Units.**

Discussion of those aspects of writing of special importance in philosophy, e.g., philosophical terminology, techniques for evaluating arguments, philosophical definitions and theories. At least 4,000 words of assigned composition based on philosophical readings.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as PHIL 100W.

Restriction: Upper-division students only.

(Ib)

**LPS 102. Introduction to the Theory of Knowledge. 4 Units.**

A study of one or more of the basic issues in epistemology, e.g., the role of perception in the acquisition of knowledge, the nature of evidence, the distinction between belief and knowledge, and the nature of truth and certainty.

Same as PHIL 102.

**LPS 104. Introduction to Logic. 4 Units.**

Introduction to sentence logic, including truth tables and natural deduction; and to predicate logic, including semantics and natural deduction.

Same as LSCI 142, PHIL 104.

**LPS 105A. Elementary Set Theory. 4 Units.**

An introduction to the basic working vocabulary of mathematical reasoning. Topics include sets, Boolean operations, ordered n-tuples, relations, functions, ordinal and cardinal numbers.

Same as LSCI 145A, PHIL 105A.

**LPS 105B. Metalogic. 4 Units.**

Introduction to formal syntax (proof theory) and semantics (model theory) for first-order logic, including the deduction, completeness, compactness, and Löwenheim-Skolem theorems.

Prerequisite: PHIL 105A

Same as LSCI 145B, PHIL 105B.  
Overlaps with MATH 150.

**LPS 105C. Undecidability and Incompleteness. 4 Units.**

Introduction to the formal theory of effective processes, including recursive functions, Turing machines, Church's thesis, and proofs of Gödel's incompleteness theorem for arithmetic, and Church's undecidability theorem for first-order logic.

Prerequisite: PHIL 105B

Same as LSCI 145C, PHIL 105C.  
Overlaps with MATH 152.

Concurrent with LPS 205C.

**LPS 106. Topics in Logic . 4 Units.**

Selected topics in mathematical or philosophical logic.

Prerequisite: PHIL 105B or LPS 105B

Repeatability: Unlimited as topics vary.

Same as PHIL 106.

**LPS 108. Topics in Induction, Probability, and Decision Theory. 4 Units.**

Selected topics in induction, probability, and decision theory.

Repeatability: Unlimited as topics vary.

Same as PHIL 108.

**LPS 113. Topics in Modern Philosophy. 4 Units.**

Focuses on the works of central philosophical figures of modern Philosophy (e.g., Descartes, Leibniz, Hobbes, Locke, Hume, Kant) or on the treatment of one or more central philosophical problems by a number of these figures.

Repeatability: Unlimited as topics vary.

Same as PHIL 113.

**LPS 115. Topics in History of Analytic Philosophy. 4 Units.**

Review of central theories or figures in the history of analytic philosophy. Emphasis on writings of Frege, Russell, Schlick, Carnap, and Quine. Topics include the nature of meaning and truth, the synthetic/analytic distinction, and scientific knowledge.

Repeatability: Unlimited as topics vary.

Same as PHIL 115.

**LPS 120. Topics in Metaphysics. 4 Units.**

Examines central philosophical questions concerning our own fundamental nature and that of the world around us (e.g., causation and necessity, determination, free will, personal identity, the mind-body problem).

Repeatability: Unlimited as topics vary.

Same as PHIL 120.

**LPS 121. Topics in the Theory of Knowledge . 4 Units.**

One or more topics in the theory of knowledge, e.g., the nature of rational justification, of perceptual knowledge, of a priori knowledge.

Repeatability: Unlimited as topics vary.

Same as PHIL 121.

**LPS H123. What is Disease?. 4 Units.**

Explores philosophical issues associated with scientific efforts to understand and explain disease.

Restriction: Campuswide Honors Collegium students only.

**(II)****LPS H125. What Is Time? . 4 Units.**

Engages the question 'what is time?' by drawing on physics, philosophy, fiction, film, and psychology. Organized around understanding and addressing the tension between time as represented in physics and our immediate temporal experience.

Restriction: Campuswide Honors Collegium students only.

**(III)****LPS 140. Topics in Philosophy of Science. 4 Units.**

Selected topics in contemporary philosophy of science, e.g., the status of theoretical entities, the confirmation of theories, the nature of scientific explanation.

Repeatability: Unlimited as topics vary.

Same as PHIL 140.

**LPS 141A. Topics in Philosophy of Physics. 4 Units.**

Selected topics in the philosophy of physics, e.g., the interpretation of quantum mechanics, the nature of spacetime, the problem of quantum field theories.

Repeatability: Unlimited as topics vary.

Same as PHIL 141A.

**LPS 141B. Geometry and Spacetime. 4 Units.**

An examination of the foundations of the special theory of relativity, with emphasis on the geometry of Minkowski spacetime, and its relation to both Euclidean and non-Euclidean (hyperbolic) plane geometries.

Prerequisite: MATH 2D and (MATH 3A or MATH 6G)

Same as PHIL 141B.

**LPS 141C. Philosophy of Quantum Mechanics. 4 Units.**

An examination of the standard von Neumann-Dirac formulation of quantum mechanics. The quantum measurement problem is discussed along with several proposed solutions, including GRW, many-worlds, man-minds, and Bohm's theory.

Same as PHIL 141C.

**LPS 141D. Probability and Determinism. 4 Units.**

An examination of a cluster of interrelated issues concerning probability, determinism, logic, and the foundations of quantum mechanics.

Prerequisite: MATH 2D and (MATH 3A or MATH 6G)

Same as PHIL 141D.

**LPS H141. Honors Philosophy of Quantum Mechanics. 4 Units.**

An examination of the standard von Neumann-Dirac formulation of quantum mechanics. The quantum measurement problem is discussed along with several proposed solutions, including GRW, many-worlds, man-minds, and Bohm's theory.

Overlaps with LPS 141C.

Restriction: Campuswide Honors Collegium students only.

**LPS 142W. Writing/Philosophy of Biology. 4 Units.**

Philosophy of biology, e.g., scientific method in biology, the structure of evolutionary theory, teleology, ethics, and evolution. Course work includes one 4,000-word and four 1,000-word papers.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as PHIL 142W, BIOL E142W.

Restriction: Juniors only.

**(Ib)****LPS 143. Topics in Philosophy of Psychology. 4 Units.**

Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as PHIL 143, PSYC 123P.

Restriction: Psychology Majors have first consideration for enrollment. Philosophy Majors have first consideration for enrollment.

**LPS 144. Topics in Philosophy of Social Science. 4 Units.**

Selected topics in the philosophy of the social sciences, e.g., Is their goal to understand behavior or to predict and control it?; Are they normative and the natural sciences not?; Do they incorporate philosophical doctrines about language and mind?.

Repeatability: May be taken for credit for 4 units as topics vary.

Same as PHIL 144.

**LPS 145. Topics in Philosophy of Language. 4 Units.**

Selected topics in the philosophy of language, e.g., the nature of meaning, mechanisms of reference, speech acts.

Repeatability: Unlimited as topics vary.

Same as LSCI 141, PHIL 145.

**LPS 146. Topics in Philosophy of Logic. 4 Units.**

Selected topics in the philosophy of logic, e.g., the nature of logical truth and our knowledge of it, the status of propositions, definite descriptions, and existential presuppositions.

Repeatability: Unlimited as topics vary.

Same as PHIL 146.

**LPS 147. Topics in Philosophy of Mathematics. 4 Units.**

Selected historical and contemporary topics in the philosophy of mathematics, e.g., mathematical truth and ontology, mathematical knowledge, the nature and role of proof, the workings of mathematics in application.

Repeatability: Unlimited as topics vary.

Same as PHIL 147.

**LPS 199. Independent Study. 1-4 Units.**

Independent research with Logic and Philosophy of Science faculty.

Repeatability: May be taken for credit for 12 units.

**LPS 200. Topics in Logic and Philosophy of Science. 4 Units.**

Studies in selected areas of Logic and Philosophy of Science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**LPS 205A. Set Theory. 4 Units.**

The basic working vocabulary of mathematical reasoning. Topics include: sets, Boolean operations, ordered n-tuples, relations, functions, ordinal and cardinal numbers.

Same as PHIL 205A.

**LPS 205B. Metalogic. 4 Units.**

Formal syntax (proof theory) and semantics (model theory) for first-order logic, including the deduction, completeness, compactness, and Loewenheim-Skolem theorems.

Prerequisite: PHIL 205A or LPS 205A

Same as PHIL 205B.

**LPS 205C. Undecidability and Incompleteness. 4 Units.**

Formal theory of effective processes, including recursive function, Turing machines, Church's thesis, proofs of Goedel's incompleteness theorem for arithmetics, and Church's undecidability for first-order logic.

Prerequisite: PHIL 205B or LPS 205B

Same as PHIL 205C.

Restriction: Graduate students only.

Concurrent with LPS 105C.

**LPS 206. Topics in Logic . 4 Units.**

Studies in selected areas of logic. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 206.

**LPS 213. Topics in Modern Philosophy. 4 Units.**

Studies in selected areas of modern philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 213.

**LPS 215. Topics in Analytic Philosophy. 4 Units.**

Studies in selected areas of analytic philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 215.

**LPS 220. Topics in Metaphysics. 4 Units.**

Studies in selected areas of metaphysics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 220.

**LPS 221. Topics in Epistemology. 4 Units.**

Studies in selected areas of epistemology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 221.

**LPS 221A. Medical Epistemology. 4 Units.**

Analysis of epistemological issues concerning medical research and healthcare. Topics may include medical evidence, transmission of medical knowledge in the doctor-patient interaction, medical expertise, epistemology of medical disagreement, classification of illness, well-being, philosophy of pain, or medical decision making.

Same as PHIL 221A.

Restriction: Graduate students only.

**LPS 232. Topics in Political and Social Philosophy. 4 Units.**

Studies in selected areas of political and social philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 232.

**LPS 240. Topics in Philosophy of Science. 4 Units.**

Studies in selected areas of philosophy of science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 240.

**LPS 241. Topics in Philosophy of Physics. 4 Units.**

Studies in selected areas of philosophy of physics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 241.

**LPS 242. Topics in Philosophy of Biology. 4 Units.**

Studies in selected areas of philosophy of biology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 242.

**LPS 243. Topics in Philosophy of Psychology. 4 Units.**

Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as PHIL 243, PSYC 231P.

**LPS 244. Topics in Philosophy of Social Science. 4 Units.**

Studies in selected areas of philosophy and social science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 244.

**LPS 245. Topics in Philosophy of Language. 4 Units.**

Studies in selected areas of philosophy of language. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 245.

**LPS 246. Topics in Philosophy of Logic. 4 Units.**

Studies in selected areas of philosophy of logic. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 246.

**LPS 247. Topics in Philosophy of Mathematics. 4 Units.**

Studies in selected areas of philosophy of mathematics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHIL 247.

**LPS 289. Logic and Philosophy of Science Workshop. 1-4 Units.**

A two- or three-quarter-long workshop on selected topics in logic and philosophy of science.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

**LPS 298. Independent Study. 4-12 Units.**

Independent research with Logic and Philosophy of Science Faculty.

Repeatability: May be taken for credit for 12 units.

**LPS 299. Directed Research. 1-12 Units.**

Directed study with Logic and Philosophy of Science Faculty.

Repeatability: May be repeated for credit unlimited times.

**LPS 399. University Teaching. 4-12 Units.**

Required of and limited to Teaching Assistants.

Repeatability: May be taken for credit for 12 units.

## Political Science Courses

**POL SCI 10A. Probability and Statistics in Political Science I. 4 Units.**

Introduction to the variety of statistical applications in the social sciences. Descriptive statistics. Measures of central tendency and dispersion. Percentile ranks. Standardization and normal approximation. Basic probability theory focuses on application to statistical inference and binomial distribution. Laboratory required.

Prerequisite: SOC SCI 3A

Overlaps with ANTHRO 10A, ECON 15A, PSYCH 10A, SOCECOL 13, SOC SCI 9A, SOCIOL 10A.

Restriction: Lower-division students only.

**(Va)**

**POL SCI 10B. Probability and Statistics in Political Science II. 4 Units.**

Introduction to statistical inference, sampling distribution, standard error. Hypothesis tests for proportions and means. Inferential techniques for nominal variables including chi-square, study measures of strengths, significance of relationships between variables, assumptions, data requirements, and types of error in significance tests.

Prerequisite: POL SCI 10A

Overlaps with ANTHRO 10B, ECON 15B, PSYCH 10B, SOCECOL 13, SOC SCI 9B, SOC SCI 10B.

**(Va)**

**POL SCI 10C. Probability and Statistics in Political Science III. 4 Units.**

Focus on correlation, regression, and control for effects of variables. One-way and two-way factorial analysis of variance. A priori and a posteriori comparisons. Introduction to repeated measures design and non-parametric statistics. Discusses use of statistics in newspapers and popular magazines.

Prerequisite: POL SCI 10B

Overlaps with ANTHRO 10C, PSYCH 10C, SOCECOL 13, SOC SCI 9C, SOC SCI 10C, SOCIOL 10C.

**(Vb)**

**POL SCI 11A. Introduction to Political Science: Political Analysis. 4 Units.**

Presents various modes of understanding politics. Emphasis on basic approaches to political analysis, their uses in constructing theories, and their application to particular national political systems.

**(III and VIII ).**

**POL SCI 11C. Introduction to Political Science: Micropolitics. 4 Units.**

Introduction to political behavior of individuals and groups within national systems. Three questions addressed: How do individuals come to understand the political world? How do individuals behave within this world? How do groups and individuals engage in the political process.

(III)

**POL SCI 21A. Introduction to American Government. 4 Units.**

Introduction to American political processes and institutions. Topics include elections, political participation, parties, interest groups, the Presidency, Congress, the bureaucracy, and the judiciary.

(III)

**POL SCI 31A. Introduction to Political Theory. 4 Units.**

Types of questions: What is politics? What are the theoretical and philosophical bases for different types of political arrangements? How do these perspectives get translated into reality? Among others, the works of Rousseau, Locke, Mill, and Marx are read.

(III)

**POL SCI 32A. Dilemmas of Diversity. 4 Units.**

Focuses on racial, ethnic, and gender diversity, multiculturalism, and their impact on our social and political ideals. Traces the sources of ideas about difference, equality, and toleration, and examines tensions that occur when forms of identity conflict with one another.

Same as INTL ST 32A.

(VII)

**POL SCI 41A. Introduction to International Relations. 4 Units.**

Analysis of political relations between and among nations with emphasis on explanations of conflict and cooperation. The role of ideologies and their relation to international problems are also examined.

Same as INTL ST 14.

Restriction: Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

(III and VIII ).

**POL SCI 44B. Global Political Ideologies. 4 Units.**

An overview of the major political ideologies shaping the current world order and global conflict. Topics include liberalism, democracy, nationalism, capitalism, communism, socialism, fascism, neoliberalism, clash of civilizations, sectarian violence, populist nationalism, and de-globalization.

Same as INTL ST 12, SOC SCI 12.

Restriction: International Studies Majors have first consideration for enrollment.

(III and VIII ).

**POL SCI 45A. Human Rights and Global Governance. 4 Units.**

Historical development of civil, political rights and the rise of human rights in international law. Explores role, and limitations, of the UN, ICJ, and ICC in global governance. Reconceptualizing democracy and political representation in a postnational 21st century.

Same as INTL ST 16, SOC SCI 16.

Restriction: International Studies Majors have first consideration for enrollment. Social Science Majors have first consideration for enrollment.

(III and VIII ).

**POL SCI 49. Lower-Division Special Topics in International Relations. 4 Units.**

Studies in selected areas of international relations. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**POL SCI 51A. Introduction to Politics Around the World. 4 Units.**

Introduces comparative politics. Compares political systems in a variety of countries. Includes elections, parties, parliaments, presidents, protest movements, and other aspects of national politics. Addresses how to make meaningful comparisons across countries.

(III, VIII)

**POL SCI 61A. Introduction to Race and Ethnicity in Political Science. 4 Units.**

Examines major theories that attempt to explain the roles of race and ethnicity in U.S. politics.

Same as CHC/LAT 64.

(III and VII ).

**POL SCI 71A. Introduction to Law. 4 Units.**

An introduction to the study of judicial politics. Questions include: what is law?; what is a court?; who are the judges? Analysis of a wide range of judicial decisions illustrates the political importance of courts in the U.S. and elsewhere.

(III)

**POL SCI 79. Lower-Division Special Topics in Law. 4 Units.**

Studies in selected areas of law. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

**POL SCI H80. Globalization and Human Security. 4 Units.**

Emerging issues of human security in the globalized world, including personal human security, physical integrity, human trafficking, global climate change, food. Challenges of these complex human security problems for a multi-scalar system (international, national, local).

Restriction: Campuswide Honors Collegium students only.

(III, VIII)

**POL SCI 120. Public Opinion. 4 Units.**

Theories concerning sources of public opinion, processes by which it is altered, organization of citizens' belief systems, and role of public opinion in government policy. Students analyze survey data as a research project.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 121A. The American Presidency. 4 Units.**

Presents a comprehensive survey of the American presidency and considers the question of political power.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 121C. U.S. Elections and Voting Behavior. 4 Units.**

Examines how voters evaluate political parties, candidates, and issues in electoral campaigns to reach their decisions. Numerous controversies concerning the degree of issue voting, sophistication of candidate evaluations, and the decline of political parties are discussed.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 121F. Presidents Since World War II. 4 Units.**

Reviews the actions and character of presidents from Harry Truman through Bill Clinton. Each week a different president is examined from a variety of perspectives. Students are expected to write a substantial original research paper.

Prerequisite: POL SCI 21A

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 121G. American Public Policy. 4 Units.**

Focuses on the development and implementation of public policy in the United States. Lectures cover theoretical models of the policy process as well as significant problems facing contemporary American decision-makers.

Same as PUBHLTH 132, SOC SCI 152C, UPPP 129.

**POL SCI 121HW. Writing for the President of the United States. 4 Units.**

Imagines how White House staffers can help presidents with clear, focused, and effective writing. Through a variety of formats, students study, hone, and practice writing skills that will prove useful- in and out of the White House.

Prerequisite: POL SCI 21A

(Ib)

**POL SCI 122A. American Metropolitan Politics. 4 Units.**

Explores the politics of urban and suburban America, including the policy making process; the exercise of political power; local politics, federalism and the problems of metropolitanism; and major policy problems facing urban areas.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 122B. California Politics. 4 Units.**

Examines the structure and function of California government, traces historical development of political power, with constantly changing casts of power-brokers and seekers. Explores California exceptionalism and the roles played by the electorate, legislature, executive, and organized interests in policy making.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 122BW. California Politics. 4 Units.**

Examines the structure and function of California government, traces historical development of political power, with constantly changing casts of power-brokers and seekers. Explores California exceptionalism and the roles played by the electorate, legislature, executive, and organized interests in policy making.

Prerequisite: Satisfactory completion of the Lower-Division writing requirement.

Restriction: Political Science Majors have first consideration for enrollment.

**(Ib)****POL SCI 123B. Representation. 4 Units.**

Deals with classical theories of representation: issues of racial and political representation in U.S. legislatures and city councils; proportional representation models; and comparative election systems.

Prerequisite: SOC SCI 3A or SOC SCI 10A or SOC SCI 10B

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 124A. The Politics of Protest. 4 Units.**

Examines the Civil Rights, Black Power, and women's movements in relationship to the Asian American movement. Uses social movement theories to illuminate the cases, and the cases to critique and revise the theories.

Same as ASIANAM 144.

**(VII)****POL SCI 124B. Latinos in U.S. Politics. 4 Units.**

Comparing the political issues facing Latino groups by examining their migration histories, voting behavior, nonelectoral participation, and policy issues. Latino issues are examined on the national, state, and local levels, including formal representation, immigration, affirmative action, and language policy.

Same as CHC/LAT 151.

**(VII)****POL SCI 124C. Comparative Minority Politics. 4 Units.**

Examines the political experiences of Blacks, Latinos, and Asian Americans in the United States from roughly 1950 to the present. Focuses on how each group has pursued political empowerment via both conventional political channels and social movements.

Same as AFAM 151, CHC/LAT 147, ASIANAM 132.

**POL SCI 124E. African American Politics. 4 Units.**

Examines politics of African Americans in order to gain a broader perspective of the American political process. Major developments in African American politics (including the civil rights movement, Black presidential bids), continuing problem of racism, responsiveness of key governing institutions.

Same as AFAM 152.

**POL SCI 125A. The United States Congress. 4 Units.**

Does the Congress do a good job of representing the American citizenry? Is it the most appropriate mechanism for the creation, resolution, and implementation of public policy.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 125CW. Constitutional Convention. 4 Units.**

Analyzes the Constitution, its amendments, and periods of Constitutional reform as a foundation for a critical evaluation of the Constitution with an eye both to necessary reforms and to elements of the Constitution that should be maintained.

Prerequisite: POL SCI 21A. Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**POL SCI 126C. U.S. Immigration Policy. 4 Units.**

Examines selected immigration policy debates since the nineteenth century, rationale and consequences of immigration law since 1965, problems of administration, implementation and enforcement, impact of immigration policy on foreign relations, and contemporary debate regarding the future of U.S. policy.

Same as CHC/LAT 163.

(VII)

**POL SCI 126D. Urban Politics and Policy. 4 Units.**

Examines economic limits of cities and welfare policy. Addresses such issues as why are the poor concentrated in the central cities? Which anti-poverty programs will work best in cities? Which level of government can best combat poverty in the U.S.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 126F. Politics of Animal Rights. 4 Units.**

Examines animal rights/welfare movement's efforts to transform moral, practical, and legal standing of nonhuman animals in contemporary U.S. Explores intersection of racism, sexism, and speciesism informed by theories of race and ethnicity, including Asian American Studies.

Same as ASIANAM 168.

Restriction: Political Science Majors have first consideration for enrollment. Asian American Studies Majors have first consideration for enrollment.

**POL SCI 128BW. Political Ideologies: The Way We View Our World. 4 Units.**

Politics has become divisive and ideological. But ideologies are poorly understood and have become mere labels for identifying friends and enemies. Course analyzes the nature of ideology, focusing on liberalism, conservatism, fascism, socialism, and contemporary 'liberation' ideologies.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

**POL SCI 128C. Political Psychology. 4 Units.**

Examination of how psychological theory and research may be used to better understand political thought and behavior. Drawing on theories of learning, cognition, and personality, discusses such topics as the formation of political attitudes, and the process of political decision-making.

Same as PSYCH 176A.

Restriction: Majors only. POL SCI 128C may not be taken for credit if taken after POL SCI 137C.

**POL SCI 129. Special Topics in American Politics and Society. 4 Units.**

Studies in selected areas of American politics and society. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 130A. Game Theory and Politics I. 4 Units.**

Introduction to game theory and a survey of its political applications. Examples of topics covered include voting in small committees, legislatures, and mass elections; interest group activities and environmental issues; institutional design, and the evolution of cooperative behavior.

Same as SOCIOL 134, SOC SCI 103A.

Restriction: Social Policy/Public Service Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment. Sociology Majors have first consideration for enrollment.

**POL SCI 130B. Game Theory and Politics II. 4 Units.**

More advanced game theory and its political applications, beginning where Game Theory and Politics I ends. Examples of topics covered include revolutions; arms race; spatial models of party competition; political manipulation; political coalitions and their power.

Prerequisite: POL SCI 130A or ECON 116A

Same as SOC SCI 103B.

Restriction: Social Policy/Public Service Majors have first consideration for enrollment. Political Science Majors have first consideration for enrollment. International Studies Majors have first consideration for enrollment.

**POL SCI 131C. Modern Political Theory. 4 Units.**

Examines major thinkers and intellectual movements in the political thought of the 17th and 18th centuries.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 131F. Twentieth Century Political Theory. 4 Units.**

Examines major thinkers and intellectual movements in the political thought of the 20th Century.

Prerequisite: POL SCI 31A

**POL SCI 134F. Social and Political Theory. 4 Units.**

Focus is on recent major work in social and political theory. An in-depth analysis of a relatively small body of writing. Authors discussed include Jurgen Habermas, Anthony Giddens, and Richard Rorty.

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 135A. Origins of Liberalism. 4 Units.**

Examines the ideals, social forces, and historical events that gave rise to liberal political theory. Topics include patriarchal authority, the divine right of kings, religious toleration, slavery, colonialism, political economy, the evolution of law, and tensions between liberty and equality.

Prerequisite: POL SCI 31A

Restriction: Political Science Majors have first consideration for enrollment.

**POL SCI 135B. Just War Revisited. 4 Units.**

Examines the evolution of the doctrine of the just war across the history of Western political thought, the importance of changes in the doctrine and whether it applies today; examines international relations case studies to determine today's relevancy.

Same as INTL ST 131A.

**POL SCI 136B. Cannibals and Conquistadores: The Philosophy of the Other. 4 Units.**

Examines critically the notion of the 'other' by looking at the philosophical challenges difference poses in the context of the European discovery of the New World. Seeks to understand the naissence of the concept of human rights and tolerance.

**POL SCI 136BW. Cannibals and Conquistadores: The Philosophy of the Other. 4 Units.**

Examines critically the notion of the 'other' by looking at the philosophical challenges difference poses in the context of the European discovery of the New World. Seeks to understand the naissence of the concept of human rights and tolerance.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with POL SCI 136B.

(Ib)

**POL SCI 137BW. Types of Political Representation. 4 Units.**
